ELLIS, Theodor Gunville, soldi er, b. in Boston, Mass., 25 Sept., 1829; d. in Hartford, Conn., 8 Jan., 1883. He became a civil engineer, was chief engineer of the Sackett's harbor and Saratoga railroad, subsequently had charge of silver mines in 1856-58 in California during the passage of the secession ordinance in North Carolina.

ELLSKAWATAWA, Indian prophet, b. on the banks of the Scioto river, near what is now Chillicothe, about 1770. The date of his death is un-
known. He was the son of Pukeesheno, a chief of the Shawnees, and a brother of the famous Tecumseh. He possessed in 1808 a tract of country near the confluence of the Tippecanoe with the Wabash. With him was a band of about a thousand warriors belonging to various tribes. He administered the affairs of his followers so badly that in a short time he was deserted by all but a few of the tribe, and within three hundred, and these were in a mostretched state of existence. At this juncture Tecumseh appeared among them, and assumed the direction of affairs, acting, however, in the name of the prophet. In 1809 the government directed Gov. William H. Harrison to purchase for the Delawares, Miami, and Potawatamies a large tract of country on both sides of the Wabash, and extending up the river sixty miles beyond Vincennes. This tract included the section settled upon by the prophet and his band, and the purchase led to the famous interview between Harrison and Tecumseh. The prophet is next heard of at the battle of Tippecanoe, 4 Nov., 1811, where he directed or ordered the attack. During the action he was performing congratulating the victors in the vicinity, but out of the reach of danger. After the end of the war between Great Britain and the United States the prophet received a pension from the British government, and resided in Canada till 1826, when, together with the only surviving son of Tecumseh and others, he settled beyond the Mississippi. The accounts relative to his character, and his pretensions as a prophet, are conflicting. There can, however, be but little doubt that the Indians generally regarded him as possessing the gift of prescience in an eminent degree. In the fifth year, while in the act of lighting his pipe, he fell back upon his bed, and became apparently lifeless. Preparations were made for his interment, but during his removal for that purpose he revived. His first words were: "Don’t be alarmed. I have seen heaven. Call the nation together, that I may tell them what has appeared to me." When the people had assembled, he told them that he had been conducted to the gates of heaven by two young men sent by the Great Spirit, and that the Great Spirit was angry with them, and would destroy them unless they refrained henceforth from drunkenness, lying, and stealing. See Edward Eggleston’s "Tecumseh and the Shawnee Prophet" (New York, 1878).

ELLISLER, Fanny, dancer, b. in Vienna, Austria, 23 June, 1816; d. there, 27 Nov., 1894. She began her career at six years of age, and at the age of seventeen, with her sister, who was two years her senior, appeared on the stage at Naples. In 1830 the two performed in Berlin, afterward in Vienna, and in 1834 went to the opera-house in Paris. Fanny was much preferred for her grace, agility, and beauty, and caused great excitement among theatre-goers in the French capital. In 1840 she came to this country and appeared at the Park theatre in several ballets with immense success, finally making a general tour through the principal cities of the United States. She returned to England in 1842, visited Russia and Germany professionally, and took leave of the stage at Vienna in 1851. Most of her later years were spent in retirement at her villa near Hamburg. She was tall and slender, and her features were regular, animating, and expressive. In her dancing, combined with grace, she has never been excelled.

ELLISWORTH, Ephraim Elmer, soldier, b. in Mechanicsville, Saratoga co., N. Y., 23 April, 1837; d. in Alexandria, Va., 24 May, 1861. After entering mercantile life in Troy and New York city, he removed to an early age to Chicago, where he studied law, and became a solicitor of patents. In 1860 he organized a regiment of zouaves, which became renowned for the perfection of their discipline, and of which he was commissioned colonel. He accompanied Lincoln to Washington in 1861, and proceeded thence to New York, where in April he organized a zouave regiment composed of firemen. Of this regiment he was appointed colonel, and sent to Alexandria, Va. Seeing a Confederate flag floating above a hotel owned by a man named Jackson, he rode up, and tore down the flag. On his way from the roof he was met and shot dead by Jackson, who in turn was immediately killed by one of Ellsworth’s men, Frank E. Brownell.

ELLISWORTH, Erastus Wolecott, poet, b. in East Windsor, Conn., 27 Nov., 1822. He was graduated at Amherst college in 1844, and studied law, but was diverted from the profession by a taste for mechanics, and has occupied himself chiefly as an inventor. In 1845 he took out patents for a drawing or copying instrument, and for a device for making a printing-machine a portion of its contents at the highest point. He then entered an extensive foundry. His first published poem, entitled "The Yankee," appeared in 1849; his best and longest is "Ariadne," originally printed in the "International Magazine" (1852); his most popular is "Tuloum." Some of his fugitive pieces were collected and published (Hartford, 1855).

ELLISWORTH, Mary Wolecott, writer, b. in Exeter, N. H., in 1830; d. in Newton, Mass., 12 Aug., 1870. Her maiden name, under which she wrote, was Jackson. She was educated at the Exeter female seminary, and began her literary career at eighteen years of age with a prize tale for a Boston journal. She afterward wrote both prose and verse for periodicals, and in 1858 began an engagement as a regular contributor to "Godsey’s Lady’s Book." Miss Janvrin edited and wrote biographical articles for "Cypress Leaves" (Boston, 1857); and published "Peace, or the Stolen Will" (Boston, 1857), and "An Hour with the Children" (Boston, 1860). She also compiled a series of books entitled "The Juvenile Miscellany" (Boston, 1860).

ELLISWORTH, Oliver, jurist, b. in Windsor, Conn., 29 April, 1745; d. there, 26 Nov., 1807. He entered Yale in 1762, but afterward went to Princeton, where he was graduated in 1768, with high rank as a scholar. After a year’s study of theology he was abandoned to the law, and admitted to the bar of Hartford county in 1771. He married in the following year, and for three years divided his attention between farming and practice. Becoming states’ attorney in 1775, he sold his farm, removed to Hartford, and soon acquired a larger farm and more remunerative existence, was elected a member of the Connecticut bar. As a Whig he was chosen, at the outbreak of the Revolution, to represent Windsor in the general assembly, was
one of the committee of four, called "the Pay-able," that managed all the military finances of the colony, and in October, 1778, took his seat as a delegate to the Continental congress, where he served on the marine committee (acting as a board of admiralty) and the committee of appeals. By yearly election, from 1780 till 1784, he was a mem-
ber of the governor's council, in which he held a rivalled influence, and in June, 1783, left his seat in congress and, although re-elected, declined to serve. In 1784 he declined the appointment of commissioner of the treasury, tendered by congress, but accepted a legislative assignment as judge of the Connecticut superior court, which he held un-
til he made a member of the Federal convention at Philadelphia in May, 1787. Here he was conspicuous in advocacy of the rights of the individual states, and it was on his motion that the words "National government" were expanded from the constitution and the words "Government of the United States" substituted. His name was not af-
fixed to that document, because pressing domestic considerations compelled his return home as soon as all of the provisions of the constitution had been completed; but his force and energy were successful the next year in securing its ratification, against much opposition, in the Connecticut state conven-
tion. When the new government was organized at New York in 1789, he was one of the senators from Connecticut, and was chairman of the committee for organ-
izing the U. S. judiciary, the original bill in his own handwriting, passing with but slight alterations, being still in force. His watchfulness over the public expen-
ditures earned him the title of "the Cerberus of the Treas-
ury," and his abilities were strenuously opposed to his efforts in building up the financial credit of the govern-
ment, and for the encouragement and protection of manufactures. John Adams spoke of him as "the finest pillar of Washington's whole admin-
istration," and he was, by common consent, the Federalist leader in the senate. The mission of John Jay to England in 1794 was suggested by him, and by his influence Jay's treaty, though strenuously opposed in the house of representatives, was defended and approved by the senate. In March, 1796, he was appointed chief justice of the U. S. supreme court, and served with distinguished ability till 1799, when President Adams, on the recommendation of the senate, appointed him, with Patrick Henry and Gov. William R. Davie, an extraordinary commission to negotiate with France, the relations between which nation and the United States were then severely strained. On reaching Paris, 2 March, 1800, they found Napol-
eon Bonaparte at the head of the new republic, and soon concluded a satisfactory adjustment of all disputes. The negotiations and discussions were conducted almost exclusively by Judge Ellsworth, and secured all the points most essential to the securing of peace, including a recognition from France of the rights of neutral vessels, and an in-
demnity for depredations on American commerce. III health preventing his immediate return, Mr. Ellsworth sent home his resignation as chief justice and visited England, where, while trying the mineral springs at Bath and elsewhere, he became the recipient of marked attention from the court and from leading public men, as well as from the English bench, in which he held a high place. Rivalled in April, 1801, his impaired health decided him to remain free from the cares of public life, but in 1802 he was again elected a member of the governor's council, which acted as a supreme court of errors, being the final court of appeals in Con-
necticut from all inferior courts of state jurisdic-
tion. In May, 1807, on a reorganization of the state judiciary, he was appointed chief justice of the supreme court, but failing health compelled his resignation within a few months, and he died soon afterward. His extraordinary endowments, accom-
plishments as an advocate and jurist, as a judge, patriotism as a legislator and ambassador, and sincerity as a Christian, were fitly complemented by a fine personal presence and by manners at once plain, unaffected, and social, yet incased with a courtliness and dignity that charmed all with whom he came in contact. In 1790 Yale, and in 1797 both Dartmouth and Princeton, conferred on him the degree of D. D.—His son, Henry Leavitt, commissioner of patents, b. in Windsor, Conn., 10 Nov., 1791; d. in Fairhaven, Conn., 27 Dec., 1858, was graduated at Yale in 1810, served as a judge, lawyer and legislator, and died in 1858, aged 67. Henry Leavitt's twin brother, William Wolcott, jurist, b. in Windsor, Conn., 10 Nov., 1791; d. in Hartford, 15 Jan., 1868, was graduated at Yale in 1810, studied law at Litchfield and Hart-
ford, and was admitted to the bar in 1813. In the same year he married Emily, eldest daughter of Noah Webster, and established a successful prac-
tice in Hartford. In 1817, when his brother-in-
law, Judge Williams, then the foremost lawyer at the Hartford bar, was elected to congress, he made Mr. Ellsworth his partner. In 1827 Mr. Ellsworth became professor of law in Trinity college, and held this office till his death. In 1829 he was elected to congress as a Whig, and served till 1834, when he resigned and returned to the practice of his profession. During his congressional service he was a member of the judiciary committee, and in this capacity took an active part in preparing and reporting measures to carry into effect President Jackson's proclamation against nullification. He prepared and reported for the committee the present law relating to the enforcement of the judicial decisions of the U. S. supreme court and comparative research into the laws of the United States and other countries. He was also one of the committee to investigate the U. S. bank at Phila-
delphia. In 1838 he was chosen governor of Con-
necticut, and re-elected the three following years, during which he endeavored to bring about a reform of the U. S. senate. In 1847 he was elected by the legislature a judge of the superior court and of the supreme court of errors, and remained on the bench.
till he reached the age of seventy, when his term expired by limitation. He received the degree of LL. D. from the University of New York in 1888. An oration delivered at his funeral by George A. Gould was published (Hartford, 1889).—Henry Leavitt's son, Henry William, lawyer and author, was born in Cambridge, Mass., in New Haven in August, 1854, was graduated at Yale in 1874, studied in the law-school, and removed to Indiana in 1883. He was charged d'affaires to Sweden, 1845-50, and after this counsel for Samuel F. B. Morse in suits connected with his telegraph patents. He was editor of the "New York Daily Tribune in 1839-40," the Valley Swine Breeder (1840), and was a contributor to the 'Knickernooker Magazine.'

ELLISON, Henry Keeling, journalist, b. in Richmond, Va., 21 July, 1833. He was apprenticed at an early age as a printer, and steadily rose in his calling. In 1854-5 he served his native city in the Virginia legislature, from 1875 till 1865 was sheriff of Henrico county, and in 1870 was elected mayor of Richmond. He has long been connected, as associate professor and editor with the Richmond "Dispatch," one of the most widely circulated journals in the south. Mr. Ellison has been prominently identified with all the great enterprises of the Virginia Baptists for the past forty years, and as secretary of the state mission board he has performed some of the most valuable work. He was a contributor to the "Memorial of the Va. State Historical Society," and president of the trustees of Richmond college.

ELMENDORF, Joschim, b. in Rochester, Ulster co., N. Y., 26 March, 1827. He was graduated at Rutgers in 1850, and at the New Brunswick, N. J., theological seminary in 1856. He was licensed to preach by the Dutch Reformed church in Poughkeepsie in the same year, and had pastorates in Syracuse, Albany, and other places, till 1872, when he was called to Poughkeepsie, N. Y., where he remained until he removed to New York city in 1886. He was a trustee of Rutgers college in 1859. He is the author of several discourses, memoirs of Richard Varick De Witt and Alice Justina De Peyster (1872), and many addresses and contributions to periodical literature. The degree of D. D. was conferred upon him by Union.

ELMENDORF, John James, educator, b. in New York city, 27 March, 1827. He was graduated at Columbia in 1845, and entered the priesthood of the Protestant Episcopal church. In 1848 he became instructor of mathematics at Columbia, and in 1868 professor of philosophy and belles-lettres in Racine college, Wis. The degree of D. D. was conferred upon him by Columbia in 1866. His publications include "Manual of Rites and Ritual" (1857); "A History of Philosophy" (1876); and "Outlines of Logic" (1882).

ELMER, Jonathan, jurist, b. in Fairfield, Cumberland co., N. J., 26 Nov., 1743; d. in Burlington, N. J., 3 Sept., 1807. He was graduated in medicine at the University of Pennsylvania in 1771, and elected the next year a member of the American philosophical society. He began the practice of medicine, and afterward turned his attention to the militia. In company, was active in the committee of vigilance, entered the provincial congress in 1776, and was a member of the committee that formed the first constitution of the state. He was a member of the National congress during the Revolution, and was a member of the board of inspectors of the army. In the establishment of independence he was for two years a member of the National house of representatives, and was a member of the upper house of the state legislature in 1780, and again in 1784. He was high sheriff, and afterward surrogate, of Cumberland county, holding the latter office from 1784 till 1802. In 1787 he was elected to the presidency of the State medical society, and in 1789 was chosen to represent the state as a Federalist in the U. S. senate, resigning it in 1791. He was one of those who voted for a state government on the Potomac. For many years after leaving the senate he devoted himself both to literary and legal pursuits, and was presiding judge of the county court of common pleas, which office he resigned in 1814. His brother, Ebenezer, physician, b. in Camden, N. J., 18 Oct., 1843, after receiving an academic education, studied medicine with his brother, and was admitted to practice. He entered the army as an ensign, and in 1777 was appointed surgeon of the 2d New Jersey regiment. He practised medicine in Bridgeton, N. J., was a member of the state house of representatives from 1789 till 1795, serving as speaker of the assembly in 1791 and 1795, and was thrice elected to congress, serving from 1801 till 1807. He was appointed collector of customs in Bridgeton in 1808. He was vice-president of the state council from 1807 till 1815, and was elected president of vice-president of Burlington college from 1808 till 1817, and again from 1822 till 1822. During the war of 1812 he commanded a brigade of New Jersey militia on the eastern bank of the Delaware. He was president of the Society of the Cincinnati for New Jersey at the time of his death, and was the last survivor of the original members, as he was also the last surviving Revolutionary officer of New Jersey.—Lucius Quintius Cincinnatus, son of Ebenezer, jurist, b. in Bridgeton, N. J., 3 Feb., 1793; d. there, 1862. He was educated in the schools of his native town and at Woodbury, Bordentown, and at Philadelphia. He served in the militia during the war of 1812 as lieutenant of artillery, and was promoted to the rank of brigade major and inspector. In 1815 he studied law, was admitted to the bar of New Jersey, and returned in his native town, where he was prosecuting attorney for the state for many years, and was a member of the assembly from 1829 till 1833, and in the latter year acted as its speaker. In 1824 he was prosecutor of the pleas for Cumberland county, and in the same year he was made attorney general of the state. He was elected a representative in congress, as a Democrat, in 1842, was appointed attorney-general of New Jersey in 1850, holding the office two years, and twice appointed justice of the supreme court—in 1852, and again in 1859. In 1866 he retired from public life. He was president of the New Jersey Society of the Cincinnati when he died. Princeton gave him the degree of A. M. in 1824, and that of LL. D. in 1865. His published works were "A Digest of the Laws of New Jersey," which became known as "Nixon's Digest" (Newark, 1838; 4th ed., 1888); "Genealogical and Biographical Account of the Elmer Family" (Bridgeton, N. J., 1860); "History of Cumberland County." (1860); "History of the Constitution and Government of New Jersey, with Biographical Sketches of Public Characters" (1845); "Eulogium on Garrett D. Wall, delivered before the Bench and Bar of New Jersey," (1872); and several historical collections.

ELMORE, Franklin Harper, financier, b. in Laurens district, S. C., 16 Jan., 1798; d. in Washington, D. C., 26 May, 1868. He was the son of Gen. John A. Elmore, a soldier of the Revolution. He was graduated at South Carolina college in 1819, studied law, and was admitted to the bar in 1821. From 1822 till 1836 he was solicitor
of the southern circuit. In 1824 he was appointed aide to Gov. Manning, with the rank of colonel. He married Harriet, the second daughter of President Taylor. He was elected trustee of the state in 1825, 1829, and 1833, was elected to congress in 1835, as a State-rights Democrat, and remained until 1838 when he was elected president of the bank of North Carolina. To this office he was annually elected till April, 1850, when by the governor's appointment he became U. S. senator, to fill the vacancy occasioned by the death of John C. Calhoun, and his own life closed twenty-three days after he entered the senate. He had been selected in 1825, by the congressional delegation, to obtain authentic information concerning the anti-slavery movement; and the letters that passed between him and James G. Birney were printed, under the title of the "Elmore Correspondence."—His brother, Rush, jurist, b. in Alabama about 1810, was elected for the bar, served in the Mexican war, and in 1854 was appointed an associate justice of the U. S. court in Kansas, residing in Lecompton. He died during the civil war.

ELMSLEY, John, Canadian jurist, b. in England in 1792; d. in Montreal, April 16, 1888. He was a nephew of the noted London bookseller of the same name. After serving for a time as puisne judge in Upper Canada, he became speaker of the legislative council of Lower Canada, and was a member of the executive council. In October, 1835, he was appointed chief justice.—His son, John, Canadian legislator, b. in Elmsley House, Toronto, in 1801; d. in Toronto, 8 Aug., 1863, entered the British navy, attained the rank of captain, and after his retirement from the service took a leading part in the public affairs of Upper Canada, and was appointed by royal mandate to the legislative council, and sat as a member of that body until the union of the two provinces in 1840. On his marriage with Miss Sherwood, a Catholic lady of Toronto, he went over to the Church of Rome, and henceforth he was a munificent patron of Catholicism in the city of Toronto, and in a great measure was instrumental in founding the College of St. Michael in the same city. He also established the first Roman Catholic school in Upper Canada.

ELPHINSTONE, George Keith, Viscount British, b. in Inverness, Scotland, in 1740; d. 10 March, 1828. He was made commander in 1773, and as post-captain he served in America in 1775-6. During the American war he commanded the "Pearl," a frigate of 32 guns, participated in the attack on Mud Island, and at the capture of Charleston he commanded a detachment of seamen. In 1782 he captured the French frigate "L'Aigle," of 40 guns. He obtained the rank of vice-admiral in 1795, and the same year captured Cape Town. In 1800 he was commander-in-chief in the Mediterranean, where he took Malaga and Cadiz. For his services in Egypt he was raised to the British peerage, as baron (1801), having for four years had the same title in the Irish peerage. In 1805 he was made admiral of the white, and in 1814 was created a viscount of the United Kingdom. He was a special friend of Mr. and Mrs. Thrale, friends of Dr. Samuel Johnson.

ELSBERG, Louis, physician, b. in Isenheim, Prussia, 2 April, 1836; d. in New York city, 19 Feb., 1893. He emigrated to Philadelphia with his parents in 1848, was educated in the public schools of the city, and was graduated at Jefferson medical college in 1857. For six months after graduation he was resident physician at Mount Sinai hospital, New York. He then studied in Europe for a year, and on his return introduced medical laryngoscopy into the United States. He settled in New York city, delivered a course of lectures at University medical college in 1861, and in 1862 established the first public clinic for diseases of the throat. This was his specialty, and he contributed largely to the literature of the subject, both by lectures and writings. In 1875 he became a member of the American medical association to his essay on "Laryngoscopic Surgery, illustrated in the Treatment of Tubid Growths within the Larynx." From 1880 till 1884 he published the "Archives of Laryngology," a quarterly, and a "Complete Manual of Throat Diseases." He also wrote many essays on subjects pertaining to music, general literature, and science, among which are the Discovery of a New Kind of Resonant Tones," "Explanation of Musical Harmony," "The Preservation of Organic Molecules," and "The Plasticium Hora Missis."—ELSON, Louis Charles, musical critic, b. in Boston, Mass., 17 April, 1848. His theoretical knowledge of music was mostly gained from Carl Glogger, under whom he studied at the Conservatory of music in Munich, 1865. He was a contributor to the "Musician and Artist," and in 1877 began contributing to the "Vox Humana," of which he became editor in 1879. He is chiefly known as one of the editors of the Boston "Musical Herald," and through his criticisms in the Boston "Courier," has contributed articles to the Boston "Transcript," New York "Tribune," and "St. Nicholas" magazine, and has translated and arranged over two thousand German, French, and Italian songs. He has composed songs in the style of the German lied, has published "Curiosities of Music" and "The Songs of Song and Story," and is now (1887) engaged in preparing a "History of German Song."—ELTON, John P., manufacturer, b. in Waterbury, Conn., 24 April, 1809; d. in Waterbury, Conn., 10 Nov., 1864. His early education was received in the public schools and in the academy at Farmington, Conn. In March, 1832, he went into business in Waterbury, Conn., and in January, 1833, his firm began the manufacture of brass wire, being the first in the country to take up that industry. In 1836 the manufacture of brass and copper tubing was begun. In 1840, 1842, and 1851 he served in the state legislature. In 1858 he engaged in private banking, under the style of the Elton loan and trust company, and after his death the business was organized into a joint stock company. In 1864 he was a presidential elector.

ELTON, Romeo, clergyman, b. in Ellington, Conn., in 1790; d. in Boston, 5 Feb., 1870. He spent his early days on his father's farm, and was graduated at Brown in 1813. He studied theology, was ordained in June, 1817, pastor of the 1st Baptist church in Rhode Island, and in 1824 held an charge in Windsor, Vt. Failing health obliged him to resign each pastorate. After his resignation at Newport he was called to the chair of Latin and Greek at Brown in 1825, and passed two years in Europe in preparing himself for the duties of the professorship. Resigning his professorship, he returned to England, and resided in Exeter until 1851, and in Bath two years. On returning to this country, he was again pastor in Rhode Island and Connecticut, resumed his residence in England after two or three years, and returned to the United States again in 1830, and was a part of the committee of the editors of the "Eclectic Review," and received the degree of D. D. from Nashville University in 1842. Among other bequests that Dr. Elton made
was one of $30,000 to establish a professorship of natural philosophy at Brown, and nearly as much to Columbian college, D. C., to establish a professorship of intellectual and moral philosophy. He also endowed scholarships in Brown university. His published works include "Callender's Century Sermon," edited with copious notes and sketches; the "Works of Jonathan Maxey, D. D.,” first president of Brown university, with an introductory essay on New England literature and "Life and Labors of Roger Williams, the Earliest Legislato." The latter work contains much original matter, particularly the letters of Mrs. Sadler, daughter of Sir Edward Coke, to Roger Williams. His second wife, Prothesia S. Goss, b. in England about 1600; d. in 1687, wrote "The Philanthropist," "Spirit of Sectarianism," and "The Piedmonte Savoy, or the Men, Manners, and Religion of the Commonwealth" (1844).

ELUYAR Y SUVISA (erroneously written D'ELUYAYT), Fausto de (ay-loo-yar ee-soo-vay-sah), Spanish chemist, b. in Logroño, Spain, 11 Oct., 1757; d. in Madrid in 1838. After studying in Spain, he went to Paris, devoted himself to natural science, and was appointed professor of mineralogy at the seminary of Veragua when he was scarcely nineteen years old. Ten years afterward he was succeeded by some other professor, and began scientific researches in the mineralogical academy of Freiberg, Saxony, and in the mineral region of that country, whence he returned in 1781 to Veragua, and again occupied his chair. During 1782-4, by order of the government, he made scientific explorations and studies in the mountains of Biscay and Navarre, and, in company with his brother Juan (who was afterward superintendent of mines in New Granada, and died there), analyzed the German wolfram ore, discovering the new metal called tungsten in 1783. In the same year he was sent by the Spanish government to study the new method of amalgamation, used by Born in Hungary, where he remained two years, and married in 1786 the daughter of Maria Theresa's privy councilor, Raab. In 1788 he went to New Spain as president of the royal supreme court of mines, and studied for him twenty years until a special professor could be obtained. During his presidency he established a complete chemical laboratory, a physical cabinet, and collections of minerals and models of machinery constructed in Mexico of beautiful native woods. Humboldt visited the college in 1803, and admired its completeness and scientific merits. Eluyar's distinguished qualities were so much appreciated that, in 1797, when his term of nine years was about to expire, the junta general of the vice-royalty petitioned the king to reappoint him, with the rank of minister of the royal council of commerce, mines, and mints for New Spain. After the rebellion of Iturbide and the independence of Mexico, Eluyar returned to Spain, and was then appointed general director and member of the council of mines (1823), which position he held until his death. He was the inventor of a hydraulic machine and the author of several works on mineralogy, mining, and mints, the principal one being "Descubrimiento de un nuevo metal hecho en el análisis del wolfram" (printed by the Basque society); "Tratado sobre la nueva amalgamación descubierta por Born" (printed by the Mineralogical society of Germany);

"Plan y distribución para el Colegio Seminario de minería de Mójico;" "Memoria sobre noticias de minas" (1793); "Sobre una nueva máquina hidráulica del autor" (1792); and "Indagaciones sobre la extinción y subsistencia del Reial cuerpo de la minera, en Nueva España" (1815); "Disertación sobre reconocer la moneda provisional, y sobre las casas de moneda provinciales;" "Discursos sobre la minería, su gobierno en general, su estado actual en Nueva España y su reforma," "Indagaciones sobre el sistema de amonedación observado en Nueva España, su actual estado y producto" (1818).}

ELWIN, Alfred Langdon, philanthropist, b. in Portsmouth, N. H., 9 July, 1804; d. in Philadelphia, Pa., 15 March, 1884. He was a grandson of John Langdon, the first continental governor of New Hampshire. Alfred was graduated at Harvard in 1823, studied medicine abroad in 1824-5, and, on his return, at the University of Pennsylvania, where he received his degree in 1831. Dr. Elwyn never practised his profession, but became widely known as a philanthropist. He was the originator of the Pennsylvania agricultural society and farm-school, and its president in 1850, and was also at various times president of the Pennsylvania institution for the instruction of the blind, of the Training-school for feeble-minded children, and of the Society for the employment and support of cripples. He published "Bonsaparte," a poem (Philadelphia, 1845); "Glossary of Supposed Americanisms" (1860); "Letters to the Hon. John Langdon, during and after the Revolution" (1860); "Melancholy, and its Mysteries" (1881); and "A Few Hints to the City on Intemperance."}

ELY, Alfred, clergyman, b. in West Springfield, Mass, 3 Nov., 1778; d. in Monson, Mass., 6 July, 1846. He was graduated at Princeton in September, 1804, and elected a tutor in that college, where he remained one year. He then returned to West Springfield, entered on the study of theology, was licensed to preach in February, 1806, and ordained the following December. His pastoral was remarkable for its success as well as for lasting through his life. He was one of the earliest trustees of Amherst college, and was in that office associated in sustaining the institution in the difficulties and discouragements of its early history. He was elected in 1840 a corporate member of the American board of foreign missions. Several of his sermons have been published.}

ELY, Alfred, lawyer, b. in Lyme, New London co., Conn., 18 Feb., 1815. He received an academic education, removed to Rochester, N. Y., in 1835, studied law, was admitted to the bar in 1841, and began practice in Rochester. Mr. Ely was elected to congress as a Republican in 1838, and served from 5 Dec., 1839, to 3 March, 1833. He went as a civilian spectator to the battle-field of Bull Run in July, 1861, where he was captured by the Confederates and put into Libby prison, Richmond. After nearly six months' confinement he was exchanged for Charles J. Faulkner, the American lives to France, which had been presented in disloyalty. During his term of imprisonment he kept a diary, which was edited by Charles Lanman, with the title "Journal of Alfred Ely, a Prisoner of War in Richmond" (New York, 1862).}

ELY, Ely, decease, clergyman, b. in New York, Conn., 13 June, 1786; d. in Philadelphia, Pa., 18 June, 1861. He was graduated at Yale college in 1803, studied theology with his father, Rev. Zebulon Ely, and was ordained pastor of the Presbyterian church in Colchester, Conn., in 1806. He was then chaplain of the New York city hospital, subsequently pastor of the Pine street church,
ELY, William Mather, politician, b. in Binghamton, N. Y., in 1818; d. there, 5 Feb., 1872. He was educated at an academy in his native town, and graduated. After leaving college he followed mercantile pursuits for a time, but afterward engaged in farming, and was for several years president of the State agricultural society. In 1868 he was elected to the legislature, and served till his death. He was an excellent statesman, and had acquired extensive knowledge of state affairs.

ELY, William Mather, soldier, b. in Somerset county, Md., 18 Dec., 1816; d. in Baltimore, Md., 21 Feb., 1871. His name was originally Arnold Elsey of Jones, but in 1823 he assumed the name of William Mather, in connection with his graduation at the U. S. military academy in 1837. He was assigned to the 2d artillery, and served in the Florida war of 1837-'8 and in the Canada border disturbances. During the Mexican war he was brevetted captain for gallantry at Contreras and Churubusco, and was also at Port Brown, Vera Cruz, Cerro Gordo, San Antonio, Molino del Rey, Chapultepec, and the capture of the city of Mexico. He became captain in the 2d artillery, 14 Feb., 1849, and served against the Seminoles in 1849-50 and 1856. On 25 April, 1861, he resigned and entered the Confederate army with the rank of colonel. At the first battle of Bull Run he was senior colonel of Kirby Smith's brigade, and in the afternoon after Gen. Smith was wounded, led a successful charge, for which he was complimented by Gen. Beauregard, and promoted on the field to a brigadier-generalship by Jefferson Davis. He commanded a brigade through Stone wall Jackson's valley campaign, was wounded and had his horse shot under him at Port Republic, and at Cold Harbor was shot through the head. This last wound prevented him from seeing any more active service, but after his recovery he was promoted to major-general, and commanded the department of Richmond till just before the close of the war, when he joined Hood in Georgia, and was with him at Chattanooga. After the close of the war he retired to a farm near Jessup's Cut, Anne Arundel co., Md.

EMANGARD, or ESMANGARD, Charles, West Indian jurist, b. in Port au Prince, Hayti, in 1753; d. in Paris in 1817. He studied in the Jesuit college of Port au Prince, and after graduation he was appointed chief of the superior council of the civil court of his native city, where his father was president of the civil court. Young Emangard began to administer equal justice to all without regard to persons, and thereby made enemies of the rich proprietors of the island. His first offence against the privileged classes was the condemnation of a rich planter to a large fine for maltreating his slaves. In 1780 Emangard volunteered as counsel for Elmina, a mulatto girl who had been emancipated by her former master at his death, but had been detained and atrociously tortured by her widow, and brought before a tribunal. The woman, Madame de Laurier, was arrested, and, as the feeling on both sides ran high, she was sent to France for an impartial hearing. The case was submitted in privacy to the king, who ordered the widow's estate to be confiscated and given to Elmina; and as Emangard refused to carry out the sentence. In consequence, he was promoted judge of the civil court of the island of Martinique. At the outbreak of the rebellion of the negroes in Santo Domingo in 1800 he was sent by the government to that island, where he was the means of saving many from death. Some of the prominent proprietors, some of them formerly his enemies, Bonaparte, in recompense, promoted
him judge of the supreme court of Santo Domingo, and when this island was finally lost to France, he became president of the court of Martinique, which position he held until 1800. He then removed to Paris, and, on the accession of Louis Philippe, was appointed member of the state council. He published "De la marine française" (1800); "Des colonies françaises, et en particulier de Saint Domingue" (1805); "La vérité sur les affaires d'Haïti", issued at the expense of the former planters of the French part of the island, as Emanuel had sustained their right to an indemnity (1833); and "Nouvel avis aux propriétaires de Saint Domingue sur le payement de l'indemnité" (1836).

EMBRY, James Crawford, clergyman, b. in Knox county, Ind., 5 Nov., 1824. He is of African descent, and was brought up on a farm. He was admitted to the ministry of the African Methodist Episcopal church in 1863, was elected by the general conference of his church in 1876 to be secretary of education, and chosen also financial secretary in 1878. He was a member of the Methodist ecumenical conference at London in 1881, and of the Baltimore centennial conference of 1884. In the latter year he was made general manager of the publishing department of his church. He is the author of "Condition and Prospects of the Colored American" (Knox City, Minn., 1872).

EMBURY, Emma Catherine, author, b. in New York city in 1806; d. in Brooklyn, N. Y., 10 Feb., 1883. She was the daughter of Dr. James R. Manley of New York city, and in 1828 became the wife of Daniel Embury, afterward president of the Atlantic bank of Brooklyn. From girlhood to the time of her death she was a frequent contributor to various periodicals, in many of them over the pen-name "Ianthe." Her printed volumes include "Guide and other Poems" (New York, 1828); "Female Eucalyptus"; "The Blind Girl and other Tales"; "Glimpses of Home Life"; "Token of Flowers"; "Pictures of Early Life"; "Nature's Gems, or American Wild Flowers" (1845); "Love's Token Flowers" (1845); "The Waldorf Family, a Grandfather's Legend" (1846); "Poems" (1860).

EMERY, Timothy, b. in Ballygarvan, Ireland, 21 Sept., 1729; d. in Camden, Washington co., N. Y., in August, 1775. His parents were members of the colony of Germans that emigrated from the Palatinate to Ireland early in the eighteenth century, and in which Wesley labored with great success. Embury was educated at a school near Ballygarvan, and learned the carpenter's trade. He was converted on Christmas day, 1752, became a local preacher in 1758, and in 1760 came to New York and worked at his trade. In common with his fellow-emigrants, he began to lose interest in religious matters, and did not preach in New York till 1766, when, moved by the reproaches of Barbara Heck, sometimes called the "foundress of American Methodism," he began to hold services first in his own house on Barrack street, now Park place, and then in a rigging loft on what is now William street. The congregation thus formed was probably the first Methodist congregation in the United States, though it is a disputed question whether precedence should not be given to Robert Strawbridge, who began laboring in Maryland about 1750. A church for the congregation was built under Embury's charge in 1768, on the site of the present John street church, and he himself worked on the building as a carpenter, and afterward preached there gratuitously. He resigned in 1769 and went to Camden, N. Y., where he continued to work at his trade during the week, preaching every Sunday. He organized among Irish emigrants at Ashgrove, near Camden, the first Methodist society within the bounds of what is now Troy conference. He died suddenly, as a consequence of his having been buried on a neighboring farm, but in 1883 his remains were removed to Ashgrove churchyard, and in 1886 to Woodland cemetery, Cambridge, N. Y., where in 1873 a monument to him was unveiled, with an address by Bishop Simpson.

EMERIAN, A. J. P., Comte d', French naval officer, b. in Carhaix, Finisterre, 30 Oct., 1762; d. in Paris, 2 Feb., 1845. On his father's side he belonged to a creole family of Santo Domingo, and was an extensive land-owner there and in the island of Martinique. At the age of sixteen he entered the royal navy as a volunteer, and took part in the war of American independence, distinguishing himself under Comte d'Estaing in the combats of the island of Grenada and of Savannah. He took part in twelve sieges, received three wounds, and in 1768 was rewarded with the rank of lieutenant. In 1787 he was given command of a corvette on the naval station of Santo Domingo, and while cruising in the waters of that island, as well as as on the coast of the United States, he rendered important services during the revolt of the negroes. He was then promoted to captain, appointed chief of squadron, and on the first division, which formed the vanguard of the Egyptian expedition. For his brilliant services in the battle of Aboukir he was appointed rear-admiral, and was for some time maritime prefect of Toulon. In 1800 he was sent to Santo Domingo to re-establish communication with the south of the island, and successfully accomplished his mission, forcing Dasselines to raise the siege of Port au Prince. In 1803-11 he had charge of the defence of the coast of the Mediterranean against the English, and rendered important services to his country. In 1811 he was appointed commander of a fleet of twenty-one vessels of the line and ten frigates, constructed and equipped under his personal inspection while he was prefect of Toulon. He had frequent engagements with the English fleets, and for three years was vice-admiral of the Ballygarvan. In 1818, he was made rear-admiral in 1813, and in 1814 defended Toulon against the attack of a formidable fleet. Emerian was made a peer of France by Napoleon in 1815, and by Louis Philippe in 1830. He was engaged in writing his memoirs when he died.

EMERSON, Benjamin Kendall, naturalist, b. in Nashua, N. H., 20 Dec., 1843. He was gradu-
EMERSON, Charles Franklin, educator, b. in Cheilmsford, Mass., 29 Sept., 1843. He was graduated at Dartmouth in 1868, becoming at once inspector in the domestic institute of mathematics in the agricultural department. In 1869 he became instructor in mathematics in the college proper, and in 1872 associate professor of natural philosophy, succeeding in 1878 to full possession of that chair. His work has consisted largely in the development of physical laboratory in Dartmouth, for which purpose he travelled extensively through Europe during 1883-4. He is a fellow of the American association of the advancement of science, and is an occasional contributor to scientific literature.

EMERSON, Aparis Nattle, lawyer, b. in Williamstown, Mass., 6 Feb., 1821; d. in New York city, 15 April, 1859. He was graduated at Williams in 1840, studied law and was admitted to the bar there, and served in the civil war, advancing to the rank of major of volunteers. He delivered a popular lecture on Williams college in 1859. He was appointed assessor of internal revenue in Massachusetts in 1865, and published a "Handbook of the Internal Revenue" (Springfield, 1868).

EMERSON, George Barrett, educator, b. in Kennebunk, Me., 12 Sept., 1797; d. in Newton, Mass., 14 March, 1881. He was educated at a forward in 1817, and soon afterward took charge of an academy in Lancaster, Mass. He was tutor in mathematics and natural philosophy in Harvard in 1819-21, and in the latter year was chosen principal of the English high-school for boys in Boston, after declining the professorship of mathematics in Harvard. In 1823 he opened a private school for girls in the same city, and conducted it until 1855, when he retired from professional life. In 1831 he assisted in organizing the Boston society of natural history, of which he became president in 1837. He was instrumental in getting the legislature to authorize the geological survey of the state, and took charge with Dr. Dewey of the botanical department of the survey, under appointment from Gov. Everett. Mr. Emerson was also president of the Massachusetts society of arts and science, and aided in securing the establishment of the state board of education. He passed forty years of his life in teaching, thirty-four of which were spent in Boston. He received the degree of LL. D. from Harvard in 1856, and was a member and associate of many learned bodies. He was the second part of the "School and School-master" (New York, 1842), of which the first part was written by Bishop Potter, of Pennsylvania. A copy of this work was placed in every school in the states of New York and Massachusetts in 1841, and was also the author of several lectures on education, and a contributor to various periodicals, and published a "Report on the Trees and Shrubs growing naturally in the Forests of Massachusetts" (Boston, 1846); a "Manual of Agriculture" (1851); and "Reminiscences of an Old Teacher" (1878).

EMERSON, Gouverneur, physician, b. in Kent county, Del., in 1796; d. 2 July, 1874. He was graduated in medicine at the University of Pennsylvania in 1816, and began practice in Philadelphia in 1820, but spent many years in retirement on a farm, where he devoted himself to agriculture, and gave much attention to the subject of fertilizers. He wrote extensively on the subject of vital statistics, and contributed to the "American Journal of the Medical Sciences," in 1827-48, tables of the mortality of Philadelphia from 1807 till 1848, showing, among other things, the excessive mortality of males during childhood. He also adapted Cuthbert W. Johnson's "Farmers and Planters' Encyclopedia of Rural Life" (London, 1842) to the United States (Philadelphia, 1853), and published a treatise on "Organization of Labor." He also contributed numerous scientific papers to the proceedings of the American philosophical society, of which he became a member in 1828.

EMERSON, James E., machinist, b. in Maine, 2 Nov., 1823. His trade was spent in farming and working in saw-mills, and he was a carpenter in Bangor for several years. In 1850 he removed to Lewiston, where he established a manufactory for making wood-working machinery, and while engaged in this business made his first invention. This was a machine for cutting hunting and cutting the heads on the spools or bobbins that are used in cotton factories, and did the same work that formerly required three machines. In 1852 he removed to California, where he was first employed as superintendent of a saw-mill, and afterward became a proprietor of mills in various counties of that state. Here he proved the advantages of circular saws with movable teeth. For several years he was occupied in the introduction of his saw, but subsequently returned to the east and manufactured edge tools in Trenton, N. J., receiving letiorate at a forward in 1817, and soon afterward took charge of an academy in Lancaster, Mass. He was tutor in mathematics and natural philosophy in Harvard in 1819-21, and in the latter year was chosen principal of the English high-school for boys in Boston, after declining the professorship of mathematics in Harvard. In 1823 he opened a private school for girls in the same city, and conducted it until 1855, when he retired from professional life. In 1831 he assisted in organizing the Boston society of natural history, of which he became president in 1837. He was instrumental in getting the legislature to authorize the geological survey of the state, and took charge with Dr. Dewey of the botanical department of the survey, under appointment from Gov. Everett. Mr. Emerson was also president of the Massachusetts society of arts and science, and aided in securing the establishment of the state board of education. He passed forty years of his life in teaching, thirty-four of which were spent in Boston. He received the degree of LL. D. from Harvard in 1856, and was a member and associate of many learned bodies. He wrote the second part of the "School and School-master" (New York, 1842), of which the first part was written by Bishop Potter, of Pennsylvania. A copy of this work was placed in every school in the states of New York and Massachusetts in 1841, and was also the author of several lectures on education, and a contributor to various periodicals, and published a "Report on the Trees and Shrubs growing naturally in the Forests of Massachusetts" (Boston, 1846); a "Manual of Agriculture" (1851); and "Reminiscences of an Old Teacher" (1878).
was professor in the seminary at Lahaina and pastor of the church at Kaanapali. He visited the United States in 1809 and took the degree of M. D. there. He baptized nearly 1,200 persons during his pastorate. He published five volumes of elementary works, three of them in the Hawaiian language, and, while at Lahaina, was joint author, with Rev. Artemas Bishop, of an "English-Hawaiian Grammar," to which the degree of D. D. was given. He married Ursula Sophia Newell, b. in Nelson, N. H., 27 Sept., 1806, and gave her efficient aid in his work.

EMERSON, Joseph, educator, b. in Hollis, N. H., in 1777; d. in Wethersfield, Conn., in 1833. He was graduated at Harvard in 1798, and was tutor there in 1801-3, meantime studying theology. He was pastor of Beverly, Mass., in 1805-16, and delivered there a course of historical lectures. After visiting the south, and delivering and publishing "Lectures upon the Mind," he established an academy in Byfield, Mass., and afterward lectured on astronomy in Boston. He taught school and was pastor at Saugus, Mass., in 1821-3, but in the latter year moved to Charleston, S. C., for his health, returning to New York and engaging in teaching ministerial duties in 1825 and engaged in teaching in Wethersfield, Conn. During his residence there he again visited Saugus, and delivered lectures on Pollok's "Course of Time." He published an edition of "Watts on the Mind."—His brother, Ralph, editor of the "North American Review," was a graduate of Harvard in 1877; d. in Rockford, Ill., 20 May, 1863, was graduated at Yale in 1811, and at Andover theological seminary in 1814, and, after holding a tutorship in Yale for two years, was ordained, 12 June, 1816, as pastor of the 1st Congregational church at Norfolk, Conn., where he remained till 1826. He was professor of ecclesiastical history and pastor at Andover from 1826 till 1828, then removed to Newburyport, and in 1828 to Rockford, Ill., where he remained till his death, also lecturing at the Chicago theological seminary. Yale gave him the degree of D. D. in 1826. He continued largely to religious periodicals, published a "Life of Rev. Joseph Emerson," his brother (Boston, 1844), and translated, with notes, Wiggins's "Augustianism and Pelagianism" (Andover, 1840).

EMERSON, Luther Orlando, musician, b. in Pennsylvania, Mar. 18, 1829. He began the study of music at the age of twenty-four, and has devoted himself to teaching singing-classes and to writing vocal school-exercises and church music, in Boston, Salem, and West Greenfield, Mass. Mr. Emerson is well known as the conductor of numerous musical festivals and conventions in all parts of the Union. Besides occasional pieces in the form of sheet-music, he has written and compiled many collections of church music. Among them "The Romberg Collection" (Boston, 1859); "The Golden Wreath" (1857); "The Golden Harp" (1858); "The Sabbath Harmony" (1860); "The Harp of Judah" (1868); "Merry Chimes" (1865); "Jubilate" (1886); and sundry other collections.

EMERSON, Ralph Waldo, author, b. in Boston, Mass., 25 May, 1803; d. in Concord, Mass., 27 April, 1882. He was the son of Rev. William Emerson, minister of the 1st church, Boston. His grandfather at the sixth remove, Rev. Joseph Emerson, of Mendon, Mass., married the granddaughter of Rev. Peter Bulkeley, who was one of the founders of Concord, Mass., and married the daughter of the Rev. Samuel Moody, of York, Me., and three of the sons of this union were clergymen; among them William, Ralph Waldo's grandfather, who preceded over the church in Concord at the time of the first battle of the Revolutionary war, which took place close by the minister's manse. This grandfather also had married the daughter of a minister, the Rev. Daniel Bliss, his predecessor in the pulpit at Concord. Thus the ministerial line went back, and in Ralph Waldo Emerson's ancestry were strong in the direction of scholarly pursuits and religious thought. His family was one of those that constitute, as Dr. Holmes says, the "academic races" of New England. His father (see Emerson, William) was a successful but not popular preacher; his son is one of the far removed from Calvinism. He published several sermons, and was editor of the "Monthly Anthology" from 1805 till 1811, a periodical that had for contributors John Thornton Kirkland, Joseph S. Buckminster, John S. Gardiner, William Tudor, and Samuel C. Thacher. He was largely instrumental in developing a taste for literature in New England, and led to the establishment of the "North American Review." The mother of Waldo was a woman "of great patience and fortitude, of the serene truth in God, of a discerning spirit, and the most conservative bearing of the world. She resembled his father. Her aunt, Mary Moody Emerson, a woman of high intellectual attainments, was one of his early companions; and in some printed extracts from her journals a mode of thought and expression that is still heard from the pens of the now celebrated essayist is traceable. His youngest brother, Charles Chauncey, who died young, in 1834, was distinguished by a singularly pure and sweet character, and contributed to the Harvard Register three articles in which there are passages which bear a close resemblance to some of the essays afterward produced by Ralph Waldo. The latter concentrated in himself the spiritual and intellectual tendencies of several generations. He entered the grammar-school at the age of eight, and the Latin-school, under Master Gould, in 1815; but neither here nor at Harvard did he show unusual ability. After leaving college he engaged in teaching, and began the study of theology under the direction of Dr. Channing, although not regularly enrolled at the Cambridge divinity-school. He read Plato, Augustine, Tilton, Jeremy Taylor, and had from boyhood been largely interested in regards to Montaigne's essays, of which he said: "It seems to me as if I had myself written the book in some former life." In 1826 he was "approbated to preach" by the Middlesex association of ministers; but his health forced him to pass the winter in South Carolina and Florida. He was ordained in March, 1829, as colleague of Rev. Henry Ware, Jr., in the pastorate of the 3d church, Boston, and succeeded to Ware's place within eighteen months. His preaching was eloquent, simple, and effective. He took part actively in the city's public affairs, and showed a deep interest in philanthropic movements, opening his church also, to the anti-slavery agitators. In 1832, however, he resigned his pastorate, and did not thereafter regularly resume ministerial labors. Having decided that the use of the elements, with the forms of that formality—the true communion, as he thought, being purely spiritual—he refused to make the compromise proposed, that he should put his own construction on the Lord's supper, leaving his congregation to retain their view. The parting with his flock was bitter, and sad. The story is told that he stood in certain quarters, he always maintained a strong sympathy with Christianity. For several
years he had been writing poetry, but he published no literary work during the term of his pastorate. The poem "Good-bye, Proud World," incorrectly attributed to the date of his resignation, was written before he entered the ministry. Excepting this piece, little poetry of his early period has been given to the world. He published, in 1829, Miss Ellen Louisa Tucker, who died in February, 1832. In 1833 he went to Europe for his health, visiting Sicily, Italy, and France, and preaching in London and Edinburgh. At this time he met Coleridge, Wordsworth, and Thomas Carlyle, forming with the last named writer a friendship and correspondence which is one of the most interesting in literary annals. It resulted in a correspondence, which was continued for thirty-six years, and has been published under the editorship of Charles Eliot Norton (Boston, 1885). Returning to the United States in 1834, Mr. Emerson preached in New Bedford, declined a call to settle there, and went to Concord, where he remained. In the next winter he began lecturing, the subjects of his choice being, curiously enough, "Water" and "The Relation of Man to the Globe." But he soon found themes better suited to his mind, like the "Ancient Sceptics," lectures given in Boston, discussing Luther, Milton, Burke, Michael Angelo, and George Fox. Two of these were published in the "North American Review." This course was followed by ten lectures on English literature in 1835, twelve on the philosophy of history in 1839, and in 1837 ten on human culture. Much of the matter embraced in them was afterward remoulded and brought out in his later volumes of essays, or condensed into the rhythmic form of poems. Mr. Emerson married in the same year, 1835, Miss Lydia Jackier of Plymouth, Mass. He then left the "Old Manse," where he had been staying with Dr. Ripley, and moved into a house on the old Lexington road, along which the British had retreated from Concord in 1775. In this "plain, square, wooden house," surrounded by horse-chestnut and pine trees, with pleasant garden-grounds attached, he made his home for the rest of his life; and, through his presence there, the village became "the Delphi of New England." On 19 April, 1838, the anniversary of the Concord fight, Emerson's hymn, composed for the occasion and containing those lines which have since resounded almost as widely as the fame of the deed, "Here once the embattled farmers stood, / And fired the shot heard 'round the world," was sung at the dedication of the battle-monument. In September of the same year his first book, "Nature," an idealistic prose essay in eight chapters—which had been written in the same room of the "Old Manse" in which Hawthorne afterward wrote his "Mosses"—was published anonymously in Boston. During the summer he had supplied the pulpit of the Unitarian church for three months, and in the autumn he preached a while for a new society at East Lexington; but he refused to become its pastor, saying: "My pulpit is the lyceum platform." Doubts had arisen in his mind as to the wisdom of public prayer, the propriety of offering prayer for others, and the rightfulness of adorning to any formal worship. From this time his career became distinctively that of a literary man, although for several years he confined himself mainly to lecturing, and most of his prose writings were first given to the public orally. Carlyle said to Longfellow that when Emerson came to Cambridge it was "like the visit of an angel." In 1836 he edited early sheets of Carlyle's "Sartor Resartus," and in 1838 three volumes of the same author's essays, all of these appearing in book-form in this country before they did so in England, and netting a comfortable sum for Carlyle. "Nature," similar ly, met with considerable appreciation in England, but in the United States it took twelve years to sell 600 copies. The "able argument of the Univer- sals" is both methodical and rhapsodical. It taught that the universe consists of nature and the soul, and that external nature serves four purposes—viz.: commodity, beauty, language, and discipline. It ministers to the senses; then to the love of beauty; then it gives us language, and then to the love of natural facts, by which we interpret our own spirits. Natural laws applied to man become moral laws; and thus we perceive the highest use of nature, which is discipline. It trains reason, develops the intellect, and becomes the means of moral culture. Thus nature speaks always of spirit, suggests the idea of the absolute, teaches worship of God, whom we cannot describe, and shows us that nature itself is only an apparition of God. "The mind is a part of the nature of things," and God is revealed directly to the soul, spirit being present all through nature, but existing upon itself and not from without. In verbal style this treatise has great beauty, and rises to the plane of a prose poem; but the contents perplexed theologians. The author was accused of pantheism, though it is hard to see how the belief so named differs from the profound Christian doctrine of the omnipresence of God. Most of the practical people in the community regarded Emerson as a revolutionary or a fool who did not know his own meaning. Ex-president John Quincy Adams, a Unitarian, called him in a letter: "If failing in the everyday vocations of a Unitarian preacher and school-master, he starts a new doctrine of transcenden tialism, declares all the old revelations superannuated and worn out, and announces the approach of new revelations.

The term transcendentalism is at first used vaguely applied to a number of writers, among whom Emerson was the chief; but they did not constitute a regularly organized group, and had no very well-defined aims in common that could warrant the classification. Emerson himself disclaimed it later, saying to Thoreau: "I am a man of the moun tains to establish certain opinions or to inaugurate some movement in literature, philosophy, or religion . . . but only two or three men and women, who read alone, with some vivacity. Perhaps all of these were surprised at the rumor that they were a school or a sect, but more especially at the name of 'Transcendentalism.'" Nevertheless, the scholars and writers of the period under notice, who numbered considerably more than two or three, finally adopted the name that had been forced upon them by changing the name of a periodical, gathering held by the meeting of the society known as the "Transcendental Club." A period of new intellectual activity had begun about 1830, on the return of Edward Everett from Europe, laden with treasures of German thought, which he put into circulation. Gradually his influence, and that of Coleridge and Carlyle in England, produced a reaction against the philosophy of Locke and Bentham, which, denying all innate ideas, and insisting upon purely mechanical revelation, had hitherto ruled Unitarians in Old and New England. The reactionists affirmed the existence of some spiritual conception in man that transcends the senses and the understanding. Supported by Goethe's deep love of nature as a companion of man, and Wordsworth's conception of it as interfused with spirit, Emerson
made a new advance, reiterated the idea of a transcendent faculty, intuitive religion, and perception of God, and emboldened us to do practice for the spiritual interpretation of nature. The Symposium, or Transcendental Club, began to meet in 1836, first at the house of Dr. George Ripley. Among the members were Emerson, Frederic H. Hedge, James Freeman Clarke, Convers Francis, Theodore Parker, Jr., Alcott, Margaret Fuller, and Miss Elizabeth P. Peabody. Dr. Channing once attended, and was in sympathy with the club, which discussed religion, impersonality, justice, truth, mysticism, pantheism, and the development of America and genius. In this last he perhaps lay the germ of Emerson's oration, "The American Scholar," delivered before the Phi Beta Kappa society at Cambridge in August, 1837. This has been well called "our intellectual Declaration of Independence," an event without any former parallel in our literary annals. After eloquently describing the education and duties of the scholar, it protested against the prevailing subserviency to European taste, suspected the American freeman of being "timid, imitation, tame," and denounced all such men as "the soul indomitably on his instincts and there abide. . . . We will walk on our own feet; we will work with our own hands; we will speak our own minds. . . . A nation of freemen will for the first time exist, because each believes himself inspired by the Divine, in which implies all men."

Bronson Alcott, having set up a school in Boston for teaching young children by methods based on a new theory of education, published in 1837 a book reporting his own conversations with the children on the gospels, which excited severe criticism. In this year, in the Boston "Courier," he was destined to arouse a much greater hostility himself by his address to the senior class in the Divinity college, Cambridge, 15 July, 1838. With great force and beauty of language he attacked the conformity of contemporary religion, and the traditional limited way of using the mind of Christ. "Men have come to speak of the revelation as somewhat long ago given and done, as if God were dead. . . . The soul is not preached. . . . It is the office of a true teacher to speak not only, but also to speak not. The true Christianity—a faith like Christ's in the infinitude of man—is lost." To each of the graduates he said: "Yourself a new-born child of the Holy Ghost, cast behind you all conformity, and acquaint men at first hands with the Deity." The address, pronounced with strong conviction, led to lively controversy, in which Emerson took no part. Ten lectures were given by him, in the winter of 1838–9, on "The Doctrine of the Soul," "Home," "The School," "Love," etc., followed later by "Man the Reformer," "The Method of Nature," and a "Lecture on the Times." In these he treated some of the reforms then agitated—temperance, anti-slavery, non-resistance, no government, and equal labor. Having come to hold the position of a religious reformer, he was looked to for sympathy with other reforms; but he could not adjust himself in the same religion, and proceeded to reform the reformers. He pointed out that "reforms have their higher origin in an ideal justice, but they do not retain the purity of an idea." Their work is "done proflaneously, not piously; by management, by tactics, and not by the spirit of the practical faculty, must become an offense. The end should be "inapprenhensible to the senses"; then it would always be a good, always giving health. Briefly, it was Emerson's mission not to do practical good, but to supply impulses and a high inspiration to the workers. In 1841 he lectured on "The Conservative," and the next year on "The Transcendentalist," saying that "transcendentalism" was simply modern idealism, and that the "new views" were the "most honest of all the men."

In July, 1840, he was again, under the name of "The Dial." Emerson succeeded Margaret Fuller as the editor, and during its continuance, until April, 1844, published more than forty of his own pieces, prose and verse, in its columns. The poems included such famous ones as "The Problem," "Wood-notes," "The Sphinx," and "Fire." This periodical contained much delicate and valuable writing, but failed of pecuniary support. Associated as he was with the idealists, in the capacity of chief intellectual leader, he took a cordial interest in the semi-socialistic experiment at Brook Farm (1840 to 1847), with which some of the brightest New England men were associated. In this, which Nothing but a moment, not join the community. Hawthorne, who was actually a member and lost money in the undertaking, has been much criticised for having viewed it independently; but Emerson, outside, held a similar neutral attitude, and wrote an account of the affair, in which nothing it humorously at points, he called it "a French Revolution in small, an Age of Reason in a patio-pan." In 1841 appeared the first volume of his essays, made up from lectures. It included "History, Compensation," "Self-Reliance," "Hermitism," "The Over-Soul," and the Spirit of Laws, published "Friendship," "Prudence," "Intelligent," "Circles," and "Art." A second series was published in 1844, containing "Character," "Gifts," "Manners," "The Poet," "Politics," "New England Reformers," and a new one on "Nature." Thoreau made a marked impression in France and England, and laid the basis of his lofty reputation in this country as a prose-writer. Two years later he collected in a volume of "Poems" his scattered metrical pieces, many of which had been printed in periodicals. He did not expect the speaking part of his admirers rapidly widened. A new periodical, "The Massachusetts Quarterly Review," began its career at Boston in 1847, edited by Theodore Parker, a disciple of Emerson, who explained the "new views" in a more combative way; and Emerson wrote for it an "Editor's Address," incalculating a wise and sincere spirit in meeting the problems of the state, of slavery, and socialism. In October of that year he sailed to England on a lecturing tour, repeated a course on "Representative Men" in various places, read a special series in London on "The Mind and Manners in the Nineteenth Century," and lectured frequently in Scotland. He was enthusiastically received by large audiences, met a great number of the foremost men and women of the time, and was a guest in many private houses. In 1848 he returned to Boston and published "Representative Men." Here he contributed to the "Memoirs" of Margaret Fuller Ossoli (1852) an account of her conversations in Boston and her Concord life. He also, having visited Paris while abroad, gave a lecture on "France," which has never been published; and at the Women's Literary Club in 1856 delivered an address that took advanced ground, for that date, in favor of larger liberty for women. In
EMERSON

this year the result of his observations in England was published in the volume entitled "English Traits," which gained cordial recognition both at home and abroad, and has been translated into several foreign languages. It is certainly the best analysis of the English people that has been written by an American, and probably the best produced in any country. The style is succinct and exact, sown with epigram, as in most of Emerson's writings; but, the purpose being more objective than that of his essays, the saving common sense that underlies all of his thinking is here brought constantly and predominately to the view. Prior to the publication he had given seven lectures in Freeman place chapel, Boston, and another in New York, and had also made addresses before the Anti-slavery society in both cities. While in the ministry he alone had opened a number of abolition speakers, and his sympathies were always on the side of emancipation. In 1835 he countenanced Harriet Martineau in her outspoken condemnation of slavery, and in the height of her unpopularity invited her to his house. Again, in 1844, he spoke stirringly on the anniversary of the emancipation, and scourged his countrymen for tolerating negro servitude. His own plan was to buy the slaves, at a cost of $2,000,000,000, and he put faith in moral and spiritual influences to remove the evil, rather than in legislation. He never formally united with the abolition party, but he encouraged it, and his influence was great. As the contest grew warmer, he rose to the emergency and took a more active part, even making campaign speeches for John G. Pope, who, having missed re-election to congress on account of his anti-slavery course in that body, was nominated as free-soil candidate for governor of Massachusetts. The assault on Charles Sumner by Preston S. Brooks called forth another vigorous speech. In November, 1858, he said before the Parker fraternity that John Brown, were he to be hanged, would "make the galaxy glorious, like the cross." A few days afterward he spoke at a John Brown meeting at Tremont temple, with Wendell Phillips, and took part in another at Concord, and in still a third at Salem, Mass. In January, 1861, also, he addressed the Anti-slavery society of Boston, in the face of disturbance by a mob. Though he was not a chief agitator of the cause, these efforts, so alien to his retired habits as a student, poet, and meditative writer, made him a marked advocate of freedom.

The "Atlantic Monthly" made its first appearance in November, 1857, with James Russell Lowell as the editor, and Emerson became a contributor, printing in all twenty-eight poems and prose articles in the first thirty-seven volumes. "The Romany Girl," "Days," "Brahma," "Waldenhouse," "The Chinese," "Boston Hymn," "Saadi," and "Terminus," which are among his best-known poems, belong to this period; and in the "Atlantic" in 1858 appeared his essay on Persian poetry, which is instructive as to the influence of oriental verse upon Emerson's. He contributed to it some lines in the form of a country diary, and at the Burns festival in Boston in January, 1859, made an after-dinner speech which is described as imbued with a passion uncommon in his utterances. Its effect on the assembly was said, by a competent judge who had heard the chief orators of the day in the time, to have surpassed anything accomplished by them, and it seems to have indicated a reserve power in Emerson seldom suspected. In 1860 and 1862 he lost by death his friend Theodore Parker and his intimate con-

pianon Thoreau, both of whom he celebrated in memorial addresses. The "Conduct of Life" was published in the former year—a series of essays on fate, power, wealth, culture, behavior, worship, considerations by the way, beauty, and illusions. With a diminished admixture of mysticism, it offered a larger proportion of practical philosophy, and stated the limitations of fate in life, while still reaffirming the liberty of the individual. Hitherto Emerson's books had sold very slowly; but of the "Conduct of Life" the whole edition, 2,500 copies, was sold in two days. This is an index of the great change that had occurred in the popular estimate of him since the issuing of his first volume, "Nature," twenty-seven years before. He who had been feared as a revolutionist, or laughed at as erratic, was now, at the age of fifty-seven, accepted as a veritable prophet and sage. The peculiarity of the times had, in a measure, grown up to him. A new "Dial" having been established in Cincinnati about this time, he wrote for its pages. During the civil war he delivered a lecture on "American Civilization" at the Smithsonian institution in February, 1862; an address in Boston on the emancipation proclamation, September of the same year; and at Concord, 19 April, 1865, he pronounced a brief eulogy on Abraham Lincoln.

On 30 May, 1867, he attended at the organization of the Free religious association in Boston, and stated his view as to religion briefly thus: As soon as every man is apprised of the Divine presence in his mind, and sees that the law of duty corresponds with the laws of physical nature—that duty, social order, power of character, wealth of culture, perfection of taste, all draw their essence from this moral sentiment—then we have a religion that exalts, that commands all the social and all the private action." Emerson passed many severe criticisms on his countrymen, publicly accused America of wanting in faith, hope, enthusiasm, and in a letter to Carlyle called it an intelligent but senile, aversive, America. The war, with its heroisms and exhibitions of moral strength, gave him new courage, new belief in the national future. His Phi Beta Kappa oration of 1867 on "The Progress of Culture" expressed even more sanguine expectation than "The American Scholar," thirty years before. He received the degree of LL. B. from Harvard in 1866, and was elected to the board of overseers in 1867. He began to feel the approach of age, and in 1866 wrote the noble poem "Terminus."

"It is time to be old, To take to sail; . . . . . . . .
I trim myself to the storm of time, I man the rudder, reef the sail, Obey the voice at eve obeyed at prime."
Nevertheless, in the following year he brought out "May-Day," a long poem, the freshest and most youthful in tone of any that he had written, accompanied by many other pieces, some of which had appeared previously. In the next three years, 1868–70, he read at Harvard a number of lectures on "The Natural History of the Mind," which have not been reprinted. The essays entitled "Society and Solitude" were published in 1870. They are noticeable for an easy, almost conversational tone, differing remarkably from the earlier published essays and "English Traits." The same year (1870) appeared Emerson's method of composition was to jot down notes from reading and observation, which were entered in a commonplace book, with a memorandum on the margin. From this he drew the material for his lectures, which, heard from the platform, were flowing in style and clear in sequence. When he prepared them for publication, much of the incidental matter and connecting links were struck out. The latest two volumes were arranged for the press when the author, growing old, gave them a less rigorous revision, and relied upon help from others. In 1870 and 1870-71 he contributed a translation of Pintarch's "Morals" and W. E. Channing's poem "The Wanderer." "Parnassus," a collection of poems by British and American authors, was brought out, with a short introduction, in 1874. Emerson was nominated in the latter year for the lord-rectorship of Glasgow university by the independents, and was defeated by a vote of 500 in his favor against 700 for Benjamin Disraeli. In 1875 he made a short address at the unveiling of France's statue of "The Minute Man" on the Concord battle-field. He responded to an invitation from two societies of the University of Virginia in 1876 by lecturing to them on "The Scholar." In March, 1878, he read a paper at the Old South church, Boston, on "The Fortune of the Republic," in which, commenting with engagingly fluent tenacity on the national life, he said: "Let the passion for America cast out the passion for Europe." The same year he printed in the "North American Review" "The Sovereignty of Ethics"; in 1879 he read "The Preacher" in Divinity college, Cambridge, and an essay on "Easter" was published in "The Century" magazine for February, 1882, shortly before his death. Two posthumous volumes of essays and reminiscences have appeared: "Miscellanies," and "Lectures and Biographical Sketches"; and many brief poems heretofore unpublished have been included in a new edition.

In July, 1872, Emerson's house at Concord was partly destroyed by fire. This shock hastened the decline of his mental powers, which had already set in, and impaired his health. His friends spontaneously asked to be allowed to rebuild the house, and deposited with him over $11,000 the same time suggesting that he go abroad for rest and change. With his daughter Ellen he visited England and the Nile, and returned to Concord in May, 1873, to find his house rebuilt, and so perfectly restored to its former state that few on the slightest trace of alteration. After 1867 Emerson wrote no poems, and little prose, but revised his essays and arranged the "Selected Poems." Always inclined to slow speech, sometimes pausing for a word, he succumbed to a gradual aphasia, which made it difficult for him to converse. He forgot the names of persons and things. He had some difficulty in discriminating printed letters, and for the last five years of his life was unable to conduct correspondence. Yet he read through all his own published works "with much interest and surprise," and tried to arrange his manuscripts, which he examined thoroughly. He also, following his custom of reading a daily newspaper, plowed "plow in a garden," and took his place on the local council. He was interested in the Concord school of philosophy, organized in 1880, and supplied to its sessions an essay on "Natural Aristocracy." Most of these later productions were put together from portions of earlier compositions. Throughout this time of decline he retained the perfect courtesy and consideration for others that had always characterized him. He was apparently quite able to comprehend the essence of things around him, and, to a certain extent, ideas; but the verbal means of communication were lost. He had so long regarded language as a species of direction, that the symbols at last melted away and eluded him. He continued to read everything in printed form that he found upon his table, whispering the words over like a child, and was fond of pointing out pictures in books. In April, 1882, he took a severe cold, and, attended by his son, Dr. Edward Waldo Emerson died of pneumonia. He was buried in the cemetery at Concord, near the graves of Hawthorne and Thoreau, in ground over which he had often walked and talked with them and with Margaret Fuller. Emerson was tall and slender, not of robust physique, rather sallow in the face, with an aquiline nose, brown hair, and eyes of the "strongest and brightest blue." His head was below the average in circumference, long, narrow, but more nearly equal in antero-posterior and transverse than most heads. His appearance was majestic. He was calm, kindly in expression, and frequently smiled, but seldom laughed. His manners were dignified but essentially simple. He was a ready listener, and often seemed to prefer listening, as if he were to be instructed rather than to instruct. He rarely showed irritation. His hospitality was almost unbounded, and he frequently waited upon the humblest of his guests with his own hands. He was never well-to-do until in his latest years. In 1888 he wrote to Carlyle that he possessed about $32,000 at interest, and could earn $800 in a winter by lecturing, but never had a dollar "to spend on a fancy." He worked hard every summer writing, and every winter travelling and lecturing. His habits were regular and his diet frugal, the only peptic luxury in which he indulged being pie at his breakfast. Every morning he was up in his study, and he would go all day without food unless called to eat. His bed-time was ten o'clock, but, if engaged in literary work, he would sit up until one or two, and was able to do this night after night. He fulfilled the duties of a citizen by attending town-meetings punctiliously. Much question has been made whether Emerson was rather a poet than a philosopher, or whether he was a philosopher at all. An exact philosopher he was not; but all that he wrote and said was based upon philosophic ideas. He was something more than an emotional mystic, an idealist who insisted upon the application of idealism to the affairs of daily life. He believed that "Nature is the incarnation of a thought.... The world is mind-pre,
March, 1887, describes his philosophy as that of a poet, and adds, "so his ethics is the ethics of a poet." He regards the poems as the most complete and worthy expression of Emerson's genius. But Dr. Everett's discovery of passion in Emerson's poetry is by no means generally accepted. His work has many critics. As has been well remarked by another writer, the verse, in general abstractly and intellectually beautiful, kindles to passion only when the chosen theme is distinctly American or patriotic. Emerson constantly preached by life and pen his new revolutionary creed, in his own morals, putting himself always in the place of a harbinger, a John crying in the wilderness. Julian Hawthorne has written of him: "He is our future living in our present, and showing the world, by anticipation, what sort of excellence we are capable of." His own life conformed perfectly to the idealism that he taught; but he regarded himself as a modest link in the chain of progress. He made his generation turn their eyes forward instead of backward. He equipped upon them courage, self-reliance, patriotism, hope. People flocked to him from all quarters, at least by the 1860's. In the 9th edition of "Nature" he prefixed some verses that said: "And, striving to be man, the worm
Mounts through all the spires of form."

This came out ten years before Darwin's "Origin of Species," and twenty years before Marx's "A Doctrine of Man." Lamêck's theories, however, had been popularized in 1844. But Emerson here showed how quick he was to seize upon the newest thought in science or elsewhere if it seemed to be true. Eleven years passed, and he declared in the essay "Walden," in "Nature," the "religion which is to guide and fulfill the present and coming ages must be intellectual. The scientific mind must have a faith which is science... There will be a new church founded on moral science, at first cold and naked... but it will have heaven and earth for its base and resting science for symbol and illustration. It will fast enough gather beauty, music, picture, poetry," while he thus advanced in viewing science, he advanced also in viewing all other subjects; but it was from the point of view of intuition and oneness with what he called the Over-Soul. Everything that he said must be looked at in the light of his own remark, "Life is a train of moods." But his moods rest upon the certainty, to him, of his own intuition. Emerson's presentation of his views is generally in a large degree poetic. His poems sum up and also expand his prose. The seeming want of technical skill in his verse is frequently due to a more subtle art of natural melody which defies conventional rules of versification. The irregular lines, the flaws of metre and rhyme, remind us of the inimitable breathing of an Aolian horn. Emerson's poetic instrument may have been a rustic contrivance, but it answered to every impulse of the winds and the sighs of human feeling, from the "Monadnock" to the "Threnody" upon the death of his child-sorrows. Sometimes he unconsciously so perfumed their poetical delight that Dr. Holmes says a moment after they were written they seemed as if they had been carpt on marble for a thousand years," as this in "Voluntaries":

"So nigh is grandeur to our dust,
So near is God to man,
When duty whispers low, Thou must,
The youth replies, I can.

Matthew Arnold has pronounced his essays the most important work done in prose in this century; but Prof. C. C. Everett, discussing the qualities of Emerson in the "Anover Review" for
periodically for many years. In 1804 he undertook, in conjunction with several friends, a literary periodical, the precursor of "The North American Review," entitled "The Novelettes and Reviews," which was published during 1810, and enlisted some of the best talent in New England. Mr. Emerson's theological views were liberal, but he was always tolerant toward those who differed from him most widely. In addition to numerous scientific papers, he contributed an "Oration Pronounced at Boston, 4 July, 1802"; a "Discourse before the Humane Society" (1807); and a "Selection of Psalms and Hymns" for use in churches (1806). After his death, his "History of the First Church in Boston," with two sermons appended, was issued (1812).

EMERTON, James Heney, b. in Salem, Mass., in 1847. At the age of fifteen he began the study of natural history in the museum of the Essex Institute in Salem, became assistant at the museum of the Boston society of natural history in 1873-4, took charge of the Salem museum in 1879, and in 1880 became an assistant at the Yale college museum, and also an assistant on the U. S. fish commission. He stands at the head of natural history artists in the United States, and has drawn the illustrations for such important works as Packard's "Guide to the Study of Insects" and most of Prof. Verrill's later publications. Mr. Emerton is the author of "Notes and Additions to a Second Edition of Hentz's Spiders of the United States" (1876); "Structures and Habits of Spiders" (1878); and "Gleanings from English Records," and has published "Deacon Richard Prince, of Salem, and some of His Descendants" (Salem, 1877); "Genealogical Account of Henry Silsbee" (1880); "Materials toward a Genealogy of the Emerton Family" (1881); "Eighteenth Century Revivals in Salem, Mass." (1886); and "Record of the 23d Massachusetts Regiment" (Boston, 1886).

EMERTON, James Arthur, genealogist, b. in Salem, Mass., 28 Aug., 1834. He was graduated at Harvard in 1853 and at the medical school in 1858, and then studied abroad for six months. He served as soldier and surgeon in the civil war in 1861-5, was assistant at the State lunatic asylum, Utica, N. Y., in 1866-7, and since then has practised his profession. He has contributed papers to the Essex institute historical collections, including "Gleanings from English Records," and has published "Deacon Richard Prince, of Salem, and some of His Descendants" (Salem, 1877); "Genealogical Account of Henry Silsbee" (1880); "Materials toward a Genealogy of the Emerton Family" (1881); "Eighteenth Century Revivals in Salem, Mass." (1886); and "Record of the 23d Massachusetts Regiment" (Boston, 1886).

EMERTON, Thomas Addis, Irish patriot, b. in Cork, Ireland, 24 April, 1764; d. in New York city, 14 Nov., 1827. He was an elder brother of the famous Irish patriot, Robert Emmet, who was executed in Dublin in 1803. The father of the Emmets was an eminent physician in Dublin. Thomas was graduated at Trinity college, Dublin, and studied medicine in Edinburgh university, where he received his degree in 1794. After travelling through Italy and Germany, and returning to Dublin, he decided to adopt the legal profession, for which he had always had a fondness. He studied law in the Temple, London, for two years, and in 1791 was admitted to the Dublin bar, of which he soon became a prominent member. He early became a leader of the "United Irishmen," an association whose object was to make Ireland an independent republic, and was one of the committee whose duty it was to supervise all branches of the society through the country. Disclosures being made to the government, Emmet was apprehended by order of the privy council in 1798, confined in Kilmainham jail, Dublin, and, being promised his liberty, made a full confession, but without implicating other persons, before a committee of the Irish house of commons of a few months later. Notwithstanding this, he was confined for two years and a half in Fort George, Scotland, but was liberated after the treaty of Amiens, and permitted to go to France with his wife, who had been with him in his imprisonment, both being forbidden to set foot again on Irish soil. Emmet spent the winter of 1802-3
in Brussels, whence he saw his brother, Robert, under cáchryn, and, on his return, he died,
he came to the United States in 1804, inten-
ting to go to Ohio, but, by the advice of Gov.
George Clinton, remained in New York city, where
he spent the rest of his life, attaining great emi-
nence at the bar. He identified himself with the
Democratic and Republican parties, and was in the state in 1812. Mr. Emmet was a hard worker,
devoting more than thirteen hours a day to study
and business, mingling but little in society, and
resorting to mathematics for diversion. He ex-
celed as an advocate. "His mind," says Judge
Story, "was quick, vigorous, searching, and brun-
ant. He kindled as he spoke. His rhetoric was
never florid, and his diction, though select and
pure, seemed the common dress of his thoughts, as
they arose, rather than any studied effort at adorn-
ment." He was seized with an apoplectic fit in
the court-room, and, on the 2nd of March, died the same day. He is buried in Marble cemetery in Second street, be-
tween First and Second avenues, New York city,
next to the vault occupied for twenty-seven years by the remains of President Monroe, and a monu-
ment to his memory stands in St. Paul's church-
yard. His memoirs were written by Charles G. Haynes (London, 1829).

---His son, Robert, lawyer, b. in Ireland about 1792; d. in New Rochelle, N. Y., 15 Feb., 1873, came to this country with his father, was admitted to the bar, attaining high rank in his profession, and became a justice of the supreme court of the state during the lifetime of the contemplated Irish insurrection of 1848 he was one of the directory formed in New York for the purpose of aiding it, and made an eloquent address at a mass-meeting held on 6 June, 1848.---Another son, John Patton, chemist, b. in
New York, N. Y., 8 April, 1750; d. in New York city, 13 Aug., 1842, also came to New York with his father. He left school in 1813 on account of his health, was at the U. S. military academy in 1814-7, spent a year in Naples, and on his return studied medicine in New York for four years with Dr. John M. McElvain. He received his degree at the College of physicians and surgeons, and practised in Charleston, S. C., in 1822-4, also giving popular lectures on chemistry there. In the latter year he accepted the chair of chemistry and natu-
ral history in the University of Virginia, where his lectures were noted for simplicity of style and
beauty and novelty of illustration. Several months before his death his health, which had never been
good, failed completely, and after a visit to Florida he returned to New York to die. Dr. Emmet was
a good draughtsman, and did some work as a sculp-
tor, making an excellent bust of his father. He
also occasionally attempted musical composition.
His chemical papers, published in "Silliman's Jour-
nal," include "Isode of Potassium as a Test for Arse
nic" (1830); "Solidification of Gypsum" (1833); a
review of new radio-activity of magnet currents (1833); an inquiry into the cause of the
curious effects, in which he concludes that it is
induction (1835); and one on "Formic Acid" (1837).

---Another son, Thomas Addis, b. in Ireland in 1798; d. in Astoria, L. L., 12 Aug., 1863, also came to this country with his father, was well known as
a lawyer, and for many years filled with credit the
office of master in chancery.---Robert's son, Thomas
Addis, engineer, b. in New York city, 4 June, 1818; d. in Carmel, Putnam co., N. Y., 12 Jan., 1880, en-
tered Columbia in 1854, and went to the Ohio river to mine coal, and in the following year and became a civil engineer. He was en-
gaged in the construction of various railroads, but
was employed chiefly on the Erie. From 1870 till
his death he was an assistant in the Croton aque-
duct department, and superintended the construc-
tion of the Harlem, Scranton and Binghamton. Mr. Emmet was one of the twelve founders of the American society of civil engineers.---John Patton's son,
Thomas Addis, physician, b. at the University of Virginia, 29 May, 1828, took a partial course there,
and was graduated in medicine at Jefferson med-
ical college, Philadelphia, in 1850. He began prac-
tice in New York city in 1852, and in 1862 became
surgeon-in-chief to the Women's hospital, of which he had been assistant surgeon since 1835. He re-
tained this office till 1872, and since then has been visiting surgeon. Dr. Emmet is a member of vari-
ous medical associations. Since 1839 he has made
a specialty of the diseases of women, and has intro-
duced new operations and methods of treatment that are important in the history of medical science.
He has contributed largely to the literature of that branch of medicine, his important papers in medi-
cal journals are "Tumors of the Uterus," "The Uterus by Tractation" (New York, 1861); and "Principles and Practice of Gynecology" (Philadephia, 1870; 3d ed., revised, 1884). The last-named work has passed through three editions in London, has been translated into German (Leip-
sic, 1881), and is now (1867) in course of translation into French. Dr. Emmet's papers include one on "Certain Mottled Points in Gynecology," read before the British medical association in August, 1886, and "Pelvic Inflammations," before the American gynecological society, Baltimore, in Sept,
ember, 1890.---Robert's grandson, Robert Temple,
son, soldier, b. in New York, 29 Dec., 1834, is the son of William J. Emmet. He was graduated
at the U. S. military academy in 1877, assigned to the 9th cavalry, and served with distinction as com-
mander of Indian scouts through the four-years
campaign against the Apaches.---His twin-sister,
Rosina, artist, was educated at Wellesley Priory,
Westchester co., N. Y., and studied art under
William M. Chase in 1879-80, and in Paris in 1885-6. She received the first prize in Prang's Christmas-card competition in 1879, and a first prize medal in London in 1878, for heads on china.
She has illustrated a book for children, entitled
"Pretty Peggy," collecting and arranging for it the poems and music (New York, 1880), and Mrs.
Burton Harrison's "Odd-Fashioned Tales" (1884),
and has made many illustrations for prominent periodicals. She is a member of the Society of American painters, and has exhibited many paint-
ings, both in oil and water-colors.

EMMONS, Ebenezer, geologist, b. in Middle-
field, Berkshire co., Mass., 16 May, 1799; d. in
Brunswick, N. C., 1 Oct., 1893. He was graduated at Williams in 1818, and, after studying medicine and the natural sciences in various parts of the
state, entered the Berkshire medical institute, Pittsfield, Mass., in 1830, and in 1833 become pro-
fessor of natural history at Williams, being one of the first in the country to occupy such a chair.
Here he made important contributions to the
geology, and mineralogy of the northern states, and prepared a report on the "Quadrupeds of Mass-
sachusetts." He was then appointed geologist-in-
EMMONS, Nathanael, theologian, b. in East Haddam, Conn., 20 April, 1745; d. in Franklin, Mass., 23 Sept., 1840. He was graduated at Yale in 1767, and was licensed to preach in 1769, although holding doctrines that were unsatisfactory to many of his examiners. He was accustomed to call himself a "genuine Calvinist," though he excepted to the received Calvinistic doctrines in several important respects. From 1773 till his retirement from active duties in 1827 he was pastor at Franklin, Mass., and during this long pastorate prepared fifty-seven young men for the ministry. He was for a long time president of the Massachusetts missionary society, and an editor of the Massachusetts "Missionary Magazine." Dartmouth gave him the degree of D. D. in 1798. He was noted for shrewd sense, mingled with oddity. Among his aphorisms is the well-known rule "A divinity school has something to say: then say it." Another is: "The worst books are the best; they compel us to think." Dr. Emmons was a zealous patriot during the Revolution, and afterward an ardent Federalist. On "fast-day," in 1801, he delivered a sermon on Jeremiah, picturing Thomas Jefferson in the guise of that king, so that the portrait was easily recognized. He published about two hundred sermons, besides essays and dissertations. His collected works were published by his son-in-law, Dr. Jacob Ide, with a memoir (6 vols., Boston, 1842). See also "Memorial of Nathaniel Emmons," by Edwards A. Park, D. D. (Andover, 1861).

EMMONS, Samuel Franklin, geologist, b. in Boston, Mass., 29 March, 1841. He was graduated at Harvard in 1861, and then studied at the École des mines, Paris, during 1862-4, and at Heidelberg (Saxony) during 1864-7. In May, 1867, he was appointed assistant geologist under Clarence King on the U. S. geological exploration of the forty-ninth parallel, and in July, 1879, became geologist in charge of the Colorado division of the U. S. geological survey. He has traveled extensively throughout the United States in connection with his work, and in 1870 made a survey of Mount Rainier, the highest and most inaccessible peak in Washington territory. During the autumn of 1872, with Clarence King, he discovered the locality of the supposed diamond-fields in Arizona, and was active in exposing their fraudulent character. He is a member of scientific societies, and an occasional contributor of papers to their transactions. His larger publications are: "Descriptive Geology," in vol. ii. of the "Reports of the Exploration of the River Rattlesnake," by J. W. Powell (Washington, 1877); "Statistics and Technology of the Precious Metals," written in conjunction with George F. Becker (1885); and "Geology and Mining Industries of Leadville, Colorado" (1886).

EMORY, John, M. E. bishop, b. in Queen Anne county, Md., 17 Dec., 1835. He was educated under tutors at Easton and Lancaster, Pa., and in Washington
college, Md. He began to study law in 1805, and
was admitted to the bar in 1808, but his attention
was turned to the pulpit, and he entered the min-
istry of the Methodist Episcopal church in 1810. He
came well known, and his services were much in
demand throughout the middle states. He was
chosen to the general conference of 1818, and to
each of the four following ones, excepting one
until 1832, when he was elected and ordained bishop.
He was sent as a delegate to the British Wesleyan
conference in 1820, and in 1824 was appointed
book agent and editor for his denomination at New
York. His episcopal appointment did not
make him away from the book concern, and during
his management he was successful in paying all its
depts and putting it on a solid and satisfactory
foundation. He was active in promoting the im-
provement of the literature of his church. The
"Methodist Quarterly Review," was founded by
him, and nearly all the original articles in the first
two volumes are from his pen. His services and
experience were made available in the founding of
the University of New York and Wesleyan uni-
versity, and he was one of the principal organizers
of both. In 1826 in a debate, and in 1817, in a pamphlet controversy, he
used literary weapons, not unsuccessfully, with
Bishop White, of Pennsylvania. In the contro-
versy of 1828 he was the chief defender of the
existing church government. He was of a logical
turn of mind, had command of a pure, clear,
and vigorous style. After his election to the episco-
pracy he was largely influential in giving to the
church code known as the Methodist discipline its
present form. He met his death by being thrown
from his carriage. He left several works, includ-
ing "The Divinity of Christ Considered," and
"Defence of Our Fathers," in which he upholds
Wesley's policy.—His son, Robert, educator, b.
in Philadelphia, 29 July, 1814; d. in Baltimore,
Md., 18 May, 1848, was graduated at Columbia in 1842,
and studied law. He was appointed profes-
sor of ancient languages in Dickinson college in
1834, but resigned in 1839, and entered the Balti-
more annual conference of the Methodist Episco-
pal church. In 1842 he was recalled to Dickinson
college and made president pro tempore, and after
the death of Dr. Durbin was elected president, and
holding the office for the rest of his life. Colum-
bia gave him the degree of D. D. in 1846. He
published a "Life of Bishop Emory," with a collection of
his writings (New York, 1841), and "History of the Discipline of the Methodist Episcopal Church"
(1843); and left behind him an unfinished "Analysis
of Butler's Analogy," which was afterward com-
pleted and published by Dr. Crooks (1850).—Bishop
Emory's first cousin, William Hemslcy, soldier,
b. in Queen Anne county, Md., 9 Sept., 1811, was
graduated at the U.S. military academy in 1831, and
appointed lieutenant of artillery and mounted
rangers. He was stationed chiefly at sea-posts in
1831-5, and was in Charleston harbor during the
mutilation trouble in South Carolina. He was
in the Creek nation in 1836-8, was appointed 1st
lieutenant of topographical engineers in the latter
year, and employed successively in the improve-
ments of Delaware river, and on the northeast
boundary survey. He went with Gen. Stephen W.
Kearny to California in 1849, and was on his staff
during the Mexican war, when he was successively
made captain and brevet major. He was on the
Mexican and California border in 1848-53, and
in those years was commissioner and astronomer to
run the boundary between Mexico and the United
States, especially under the Gadsden treaty
of 1853. He was in Kansas in 1854, in Utah in
1858, and remained on border duty till 9 May,
1861, when he resigned. He was reappointed as
lieutenant-colonel of the 6th cavalry on 14 May,
and he took part in the peninsular campaign, being
engaged at Yorktown, Williamsburg, and Han-
over Court-House. He was made major except
sionally at Chipy Creek, 19 Sept., adjutant-
general of volunteers, 17 March, 1862, commanded
a division under Banks in Louisiana in 1863, and, hav-
ing been raised to the command of the 19th corps, was with
the same commander in 1864 in the
Red river expedition, in which he displayed unwonted
bravery and skill, winning distinction especially at Mine Cross Roads,
at Pleasant Hill, and
at Cane River. Later in the same year, at the
head of the 19th corps, he carried a splendid
and successful resistance to Early in the Shenandoah
valley, especially at Cheat Monster, 19 Sept., Fisher's Hill, 22 Sept., and at Cedar Creek in
October. He received the successive brevets of major-
general of volunteers, 23 July, 1864, and brigadier-
general and major-general in the regular army, 13
March, 1865, and on 26 Sept., 1865, was commis-
sioned full major-general of volunteers. After the
war he was successively in command of the Depart-
ment of West Virginia in 1865-6, of the Depart-
ment of Washington in 1869-71, and of the Depart-
ment of the Gulf in 1871-5. He retired in 1876
with the rank of brigadier-general. Gen. Emory
has published "Notes of a Military Reconnaissance in
Missouri and California" (New York, 1848); and
"Report of the United States and Mexican Boundary
Commission" (Washington).—His son, William
Hemslcy, naval officer, was graduated at the
U. S. naval academy in 1865, became master in
1869, and lieutenant in 1870, and in 1884 comman-
ded the "Bear," of the Greeley relief expedition.
EMOTT, James, jurist, b. in Poughkeepsie, N.
Y., 14 March, 1771; d. there, 7 April, 1850. He
did not receive a collegiate education, but the
degree of A. M. was conferred on him by Union in
1800. He studied law, began to practise at Ball-
ston Centre, and soon became a distinguished
member of the bar. He was a commissioner to settle disputes concerning titles to lands in the
military tract of Onondaga county in 1797, and
about 1800 removed to Albany, which he repre-
sented in the legislature of 1804. He was a leader of the Federalist party in congress from 1806 till
1813; a member of the New York assembly from
1814 till 1817, and its speaker in 1814; first judge of the court of common pleas of Dutchess county
from 1817 till 1843, and judge of the improvi-
sed circuit court from 1827 till his resignation,
about 1831. He received the degree of LL. D. from
Columbia in 1833.—His son, James, jurist, b. in
Poughkeepsie, N. Y., 23 April, 1823; d. there, 11
Sept., 1854, received his early education in Pough-
keepsie, and at Union was graduated at the head
of his class at Columbia. He then studied law in
Poughkeepsie, was admitted to the bar there, and
at once began active practice in his native place,
soon taking a prominent position in the profession. When Poughkeepsie received its charted, he was elected its first mayor, holding the office from April, 1894, to January, 1895, when he resigned to accept the office of justice of the New York supreme court for the second judicial district. He was appointed presiding judge of his district in 1862, and judge of the court of appeals in 1863, when his term closed. He then resumed the practice of law in Poughkeepsie, but removed to New York city in 1870. He was a vice-president of the Union League club and a warm supporter of the Union League during the civil war, having taken a prominent part in organizing the first regiment sent from Dutchess county. He was one of the founders of the New York bar association, and a member of the committee of seventy, so largely instrumental in the overthrow of the Tweed ring in 1870. From 1862 till his death he was president of the Merchant's bank of Poughkeepsie. Judge Emmott was considered by his associates a man of wide reading and large culture, thorough professional training, sound judgment, and masterly clearness in the exposition of the law. He was a member of the Protestant Episcopal church.

EMPÁBAN, Diego de (em-par'-an), Mexican author, b. in Puebla, Mexico, 5 April, 1719; d. in Ravenna, Italy, after 1807. He came of a noble and rich family, studied in the seminary of his native city, and in 1733 was sent to Rome to complete his education in the Jesuit college of the Trinity. He received consecration as priest in 1745, and soon published his first work, "Los escritos de Pipa" (1746), which appeared at the same time in Latin, Spanish, and Italian, and was soon translated into English and French. In this work he attacked Louis XIV., and, on the demand of the French government for his punishment, he was confined in the ecclesiastical prison, where he remained for nearly five years. After his release he published "La orden de los templarios y la de los jesuitas bajo el punto de vista historico; Santiago de Molay Igacio de Loyola" (Bologna, 1751), which attracted a censure from the holy office, and a suspension for a year of his functions as priest. But Emparan was not to be subdued, and soon issued "Los apostoles de salay los apostoles de tuma," containing a panegyric of the company of Jesus and a bitter critice of the princes of the church and their vices (1792). This time he had gone too far, and the clergy of the church ordered him to leave London. Only by the powerful that the pope deposed him from the priesthood and condemned him to perpetual imprisonment in the fortress of San Angelo. His work was publicly burnt by the executioner, but one copy was saved, and exists to-day in the National academy of Mexico. Emparan finally received pardon through the intercession of his mother, and remained for some years in obscurity, but, unable to remain silent for a long time, published the most noteworthy of all his books, "Pitagonicas, Espanidas Americanas," in 1709. This work, which attracted the censure of the holy office, was put on the "Index expurgatorius," and its author interdicted; but he, foreseeing his fate, had escaped to France and hid in Paris for several months, nearly reduced to absolute poverty. In 1761 another book, "Le Diable en ses Societes," was caused to him to be arrested and imprisoned in the Bastile. In 1763, thanks to the influence of Voltaire, he was set at liberty, and acquainted with the principal philosophers and encyclopedists of the 18th century living at the court. He soon became one of the leaders of the philosophic age, and for several years, together with Condorcet, was a contributor to different scientific reviews under the pen-name of "Zoroaster." He received a rich inheritance from his parents in 1790, and, after several years of foreign travel, settled in England in 1793. He removed again to Paris in 1795, and in 1806 made a voyage to Mexico, but iturragaray, at that time viceroy, considering Emparan's presence in New Spain dangerous for the public order, expelled him, without consideration for his advanced age and infirmities. He then went to England, and went to Bologna, and afterward to Ravenna, where he died. Emparan was an accomplished linguist, speaking and writing correctly Greek, Latin, Spanish, French, Italian, and English. His other works include "The Tombs of Mohammed and Christ"; "Voltaire and his System," "Science and Superstition"; and "Religion and Hygiene" (London, 1794-5); and "La Virgen Inglesa," predicting the independence of Mexico (Bologna, 1807).

ENAMBUC, Pierre Vandenroques Diez d', founder of French colonies in the West Indies, b. about 1686; d. in 1757. He belonged to a Normandy family, and became a captain in the French navy, but, wishing to better his fortune, he fitted out a small armed brig, and with about forty sailors sailed from Dieppe in the spring of 1625 for the West Indies. When the voyagers reached the islands he met and vanquished a Spanish ship of thirty-five guns, but was obliged to put into St. Christopher for repairs. Here he found some French settlers, and, after deciding to remain with them, was elected their chief. He subsequently defeated an attempt of the Spaniards to land, captures the peasants on the island, and, eight months after his arrival in St. Christopher, sailed for Europe, taking with him tobacco and mahogany. Cardinal Richelieu authorized D'Enambuc to found French colonies in all the Antilles from 11th to 18th north latitude, appointing him governor-general and lieutenant of the king. On 14 Feb., 1637, D'Enambuc and his second, Duroseus, sailed again for the West Indies, taking with them 600 colonists. D'Enambuc and his followers met with many reverses, through sickness and the attacks of the English, and Duroseus went to England for aid. D'Enambuc returned to St. Christopher six royal ships and six transports, so that the English were defeated, but soon afterward the Spaniards landed in the island and destroyed the French possessions. Just then Duroseus proposed to D'Enambuc to abandon his colony and to found a new colony at Antigua, and, although the latter was opposed to this venture, they sailed away, arriving at St. Martin after a voyage of three weeks. There Duroseus left the expedition and sailed for France, where he was imprisoned in the Bastile for abandoning his chief. After a short sojourn at Antigua, D'Enambuc re-
ENCALADA, Manuel Blanco (en-calah-lah-da), South American soldier, b. in Buenos Ayres, 21 April, 1790; d. in Santiago, Chili, 5 Sept., 1876. He was the son of Blanco Cicera, a Spaniard, who for some time acted as judge of the supreme courts in Peru, La Plata, and Bolivia. Blanco Encalada was sent to Spain in 1803, entered the "Seminario de Nobles" at Madrid, and from there went to the naval academy of the island of Leon. In 1807, when the French blockaded the port of Cadiz, Encalada distinguished himself as second gunner on board the "Fetich." Wishing to return to America, he was sent in 1808, through the influence of his uncle, the Count of Villa Palma, to the port of El Callao as an ensign, which rank he had obtained as a reward for his conduct at Cadiz. In 1811 he began to show revolutionary ideas, and was soon afterward ordered by the Oroya and Cochrane, but returned to Montevideo at the end of two years. Soon afterward he left his post, and, after flying to the woods and overrunning great dangers, swam across the Uruguay river and rode 240 miles to Buenos Ayres, where in 1813 he started for Chile, arriving there in March, at the same time that the landing of Pareja in Talcahuana. Encalada was appointed captain of artillery, and in March, 1814, had been promoted lieutenant-colonel for his services to his party. About that date he was taken prisoner in a court in Peru, La Plata, and Bolivia. Encalada, appointed second to Lord Cochrane, who had begun his Pacific campaign. In 1820 Encalada was appointed major-general of infantry. In August, 1821, after having been a senator, he was tried for bringing charges against the government, but was absolved by O’Higgins. In January, 1822, Encalada served under Bolivar in the expeditions of Guayaquil and El Callao, greatly contributing toward the victory of Ayacucho in December, 1824. In July, 1825, he was appointed general-in-chief of the army of Chili. In July, 1826, Encalada became president of the republic of Chili, but tendered his resignation two months afterward, and up to the civil war of 1827-30 took no active part in public affairs. He was in the Chilian expedition against Peru in 1828, after which he was removed from public affairs for ten years, visiting Europe in 1844-6. In 1847 he was appointed governor of Valparaiso, and contributed greatly to the progress of that city, laying in 1852 the first rail of the railroad between it and Santiago. He was appointed Chilian minister to France in 1854, but returned in 1858 and retired again to private life. In 1865, notwithstanding his age, he protested against the so-called war with Spain. To commemorate his services for his adopted country, the Chilian government had in 1875 a powerful iron-clad of 3,500 tons named "Blanco Encalada," which, together with his sister ship "Chile," took a conspicuous part in the war against Peru and Bolivia in 1879 and 1880.

ENCISO, Martín Fernández de, Spanish cosmographer, b. in Seville about the middle of the 15th century; the same city is not known in what year or in what capacity he went to America, but he had established himself in 1508 in the island of Santo Domingo, where he made a fortune as a lawyer, and had the title of "bailiff y letrado." The government of that part of America along the isthmus of Darien and east of the gulf of Uraba had just been granted to Ojeda, but to get possession of the lands which were granted and to colonize them, money was needed, and he addressed Enciso, who had then the reputation of being rich and adventurous. A bargain was soon made between Ojeda and Enciso, leaving Francisco Pizarro in the new colony. Nearly two months had passed, when Enciso appeared at last in the harbor of Carthagena with a ship loaded with provisions, and having on board twelve mares, several stallions, sows and boars, ammunition, pickets, swords, and other arms, and over 150 men. At Carthagena he was joined by a ship, under the orders of Pizarro, which had left Uraba some fifty days after the departure of Ojeda and was carrying to Santo Domingo the few colonists who had received grants as a desolate. Enciso embarked, and with the aid of Pizarro, he and the other Spaniards found a town and built it, naming it Balboa, after one of the ships which had sailed from Spain. About building a city, when Enciso excited a mutiny by forbidding them to trade with the Indians for gold under pain of death, and was finally deposed by Vásquez de Balboa (see BALBOA) Enciso sailed for Spain (1512), brought the arbitrary conduct of Balboa before the court, and Pedrarias Davila was sent out as governor of Darien (1514), with instructions to do justice between the contestants. Enciso accompanied him as alguacil mayor, and afterward he gained great fortune in disclaiming Balboa to pay him a large sum as an indemnity for the wrongs he had suffered. In 1515 he was sent at the head of an expedition into the province of Guayana, where it was reported there was much gold, and unsuccessfully tried first to persuade and then to force the caciques to submit to the king of Spain. Shortly after this event, he returned to Spain and devoted his time to the arrangement and publication of the materials which he had gathered during his stay in the New World. He published a memoir in favor of the commander, and established the West Indies, which met with much opposition from the Franciscans, and "Suma de geografía que trata de todas las partidas y provincias del mundo; en especial de las Indias y trata largamente de las riquezas y costumbres, 1530 and 1540," "Enciso," says Navarrete, "has embraced in this work all that was then known of the theory and practice of pilotage." He gives a dissertation on the sphere according to the Ptolemaic system, with tables of declination, the method of taking the cardinal points, and its use, and the construction of the mariner's compass with thirty-two rhumb-lines. Enciso was not ignorant of the inaccuracies that resulted from
these projections, and of the difficulty of representing a spherical figure on a plane surface, though he could not find the means of correction. The geographical portion of the work is written with great exactness, and contains the first description of the result of Spanish exploration up to 1519. He fixed the latitudes of the islands discovered, and of several points on the coast of the Caribbees, in Santo Domingo, is marked 30°, and Cape Cruz 33°, and those positions, although incorrect, are less so than those found in Ryusch, Peter Martyr de Anghiari, and others.

ENDICOTT, Charles Mason, author, b. in Danvers, Mass., in 1733; d. in Northampton, Mass., in 1833. He was a descendant in the eighth generation of Gov. John Endicott. His education was received mainly at the Phillips Andover academy and at a school in Salem, Mass. At the age of fifteen he entered the counting-room of his uncle, Samuel Endicott, of Salem, where he remained two or three years, and whence he went by invitation to the counting-room of William Ropes, of Boston. Influenced by a desire to see somewhat of the outside world, he went as supercargo to St. Petersburg, Russia, in 1781, and afterward made a voyage to the east in the same capacity, visiting Calcutta and Sumatra, and returning to Salem in 1818. After this he became captain of a merchantman, and traded for many years, being engaged extensively in the importation of pepper. Later, from 1829 till 1832, he was cashier of the Salem bank, Salem, Mass. He was a frequent contributor to the "New England Historical and Genealogical Register," and to the Boston "Gazette," under the pen-name of "Junius Americanus." Some of his papers are to be found in the "Collections of the Salem Institute." He wrote a "Life of John Endicott" (privately printed, 1847); "The Persian Poet: A Tragedy;" "Essay on the Rights and Duties of Nations;" and "Three Orations."

ENDICOTT, John, colonial governor of Massachusetts, b. in England, in 1589; d. in Boston, Mass., 13th June, 1663. He was one of the six patentees of the Dorchester company, which succeeded, by purchase in 1627, to the property and all the rights and privileges that had formerly belonged to the Plymouth company. Among those who, almost immediately after the purchase, secured proprietary rights in the company, and who became respectively governors and deputy-governors of the company in London, were Matilda Cradockland, Roger Ludlow. Being related to both of these by marriage, Endicott was sent out with full powers to take charge of the plantation at Naumkeag (afterward Salem), where he arrived in September, 1628, accompanied by his family and numerous colonists. He continued to reside as chief of authority till April, 1630, when, the charter and company having been transferred to New England, John Winthrop arrived and took charge. In 1634, when member of the court of assistants, inflamed, it is said, by the fiery eloquence of Roger Williams, he publicly cut out the red cross of St. George from the king's colors, which hung before the governor's gate, for the reason, as he said, that the cross savored of popery. Endicott was reprimanded, removed from his office, and disqualified to hold any other for the space of twelve years. Only before it became manifest that he was not without sympathizers. Some of the militia refused to march under a flag that displayed what they regarded as an idolatrous figure; and, after no little controversy, the military commissioners agreed that, while the cross should be retained, no forts or ships, it should be omitted from the colors of the militia. In 1636, Endicott, in conjunction with Capt. John Underhill, conducted a sanguinary but ineffectual expedition against the Block island and Pequot Indians. His harsh measures on this occasion were instrumental in bringing on the Pequot war. He was deputy-governor in 1641-4, in 1650, and in 1654, and governor in 1644, 1649, and from 1650 till 1655, with the exception of 1654. In addition to these honors, he was made a major-general, and afterward the highest military office in the colony, and in 1655 president of the colonial commissioners. Endicott was a fair specimen of the men who made New England. It was characteristic of the man that, to meet the monetary requirements of the time, he established a mint which, contrary to law, continued to coin money for a period of thirty years. With all his many excellences, however, he had his faults. Of strong convictions, and of great decision of character, he was impatient of any resistance to his authority, and hasty of temper. On one occasion, in the early part of his career, he so far forgot himself as to strike a man, for which offence he was fined forty shillings. He was a Puritan of the Puritans, and would allow no divergence from what he conceived to be the straight line of orthodoxy. He had a taste for economy in the way he had for popery, as some of the pretensions of the Priscian party of the clergy found to their cost. His hand fell heavily upon the unfortunate Quakers, of whom, under his administration, four were executed at Boston for so-called disobedience of the laws. But he aimed for good, and he sought, as a Whig, to make the highest welfare of the colony. He had been sent out, in the first instance, because he was believed to be a "fit instrument to begin the wilderness work." "A man of dauntless courage," says Bancroft, "and that cheerfulness which accompanies courage: benevolent, though austere; firm, though choleric; of a rugged nature, which his stern principles of non-conformity had not served to mellow."

ENDICOTT, William Crowninshield, secretary of war, b. in Salem, Mass., 19th Nov., 1827. He is a direct descendant of Gov. John Endicott, and is a grandson of Jacob Crowninshield, noticed elsewhere. He was graduated at Harvard in 1847, and, after studying in the law-school and with Nathaniel J. Lord, was admitted to the bar in 1850. He was elected a member of the Salem common council in 1853, and five years later a lawyer's selectman. He retired from this office in 1864, and resumed practice, but in 1873 he was appointed by Gov. William B. Washburn to the bench of the supreme court of Massachusetts. This office he held for ten years, when he resigned on account of ill health. He was originally a Whig, but the Democrats when the Whig party was broken up, and in November, 1884, was the unsuccessful candidate for governor of Massachusetts. In 1885 he became secretary of war.
ENDRESS

Christian, clergyman, b. in Philadelphia, Pa., 12 March, 1775; d. in Lancaster, Pa., 30 Sept., 1827. He was graduated at the University of Pennsylvania in 1790, and began to study theology. He was ordained to the ministry at Easton, Pa., was ordained at Reading in 1802, and afterward held pastorates at various places in Pennsylvania. In 1812 he was induced to come to the United States, and in September, 1822, sailed from Bremen for Baltimore. He settled in St. Clair county, near Belleville, Ill., but three years later removed to St. Louis, where he soon became prominent. His death of Henry E. Michelenberg in 1815, he was chosen to succeed him as pastor of the Lutheran congregation in Lancaster. Here he conducted services in English, and in consequence the Germans withdrew from his congregation. The University of Pennsylvania gave him the degree of D. D. in 1819. Dr. Endress was a contributor to the "Lutheran Intelligencer, and after his death several of his sermons were published in the "Lutheran Preacher." He published, in the German language, "The Kingdom of Christ not Subject to the Power of this World," in 1791, and left in manuscript a "Commentary on the Epistle to the Romans."  

ENGELHARD, Joseph Adolphus, soldier, b. in Monticello, Miss., 27 Sept., 1832; d. in Raleigh, N. C., 1879. After leaving schools in Mississippi and New Albany, Ind., he was graduated at the University of North Carolina in 1854. He studied law at Harvard, and subsequently at Chapel Hill, and was licensed to practise in the county courts in 1856. He then removed to Tarboro, where he remained until the beginning of the war. He entered the Confederate army as captain and quartermaster of the 3d regiment in May, 1861, and in April, 1862, was promoted to be major and quartermaster of Branch's brigade. In December of that year he was transferred to Gen. Pendleton's brigade as its adjutant-general, and served in this capacity till Lee's surrender. He became the editor of the Wilmington "Journal" in 1865, and was afterward elected secretary of state, which office he held till his death.

ENGELHARDT, Francis Ernest, chemist, b. in Germany, 11 March, 1832, 23 June, 1883. He was educated at the gymnasium in Duderstadt and Hildesheim, and in the University of Göttingen. In 1856 he became assistant to Prof. Frederick Wöhler in the chemical laboratories in Göttingen, where he remained until he came to the United States in 1857. He was assistant in chemistry to Prof. William S. Clark at Amherst in 1857-8, and to Prof. Charles A. Joy at Columbia in 1860. From 1861 till 1866 he was professor of chemistry in the College of St. Francis Xavier in New York city, and from 1869 till 1886 chemist to the Onondaga salt reservation and the salt companies of Onondaga. In 1886 he became chemist to the Genesee salt company, and is one of the experts for the State board of health, having special charge of the examination of all wines, beers, and liquors. In 1864 he received the degree of Ph.D. from St. Francis Xavier. His contributions to chemical literature have been large, but are mostly in the form of technical reports bearing on his special work.

ENGELMANN, George, botanist, b. in Frankfurt-on-the-Main, Germany, 2 Feb., 1809; d. in St. Louis, Mo., 11 Feb., 1884. His uncle, Theodor, a German pioneer of Illinois, was one of the early American viticulturists. He received his early education at the gymnasium in Frankfurt, and studied the sciences in the University of Heidelberg, where he met Karl Schimper and Alexander Braun. Later he was connected with the University of Berlin, and received in 1831 the degree of M. D. from the University of Wurzburg. In 1832 he went to Paris, where he again became associated with Braun, and also with Louis Agassiz. Meanwhile he was induced to come to the United States, and in September, 1832, sailed from Bremen for Baltimore. He settled in St. Clair county, near Belleville, Ill., but three years later removed to St. Louis, where he soon became prominent. His death of Henry E. Michelenberg in 1815, he was chosen to succeed him as pastor of the Lutheran congregation in Lancaster. Here he conducted services in English, and in consequence the Germans withdrew from his congregation. The University of Pennsylvania gave him the degree of D. D. in 1819. Dr. Endress was a contributor to the "Lutheran Intelligencer, and after his death several of his sermons were published in the "Lutheran Preacher." He published, in the German language, "The Kingdom of Christ not Subject to the Power of this World," in 1791, and left in manuscript a "Commentary on the Epistle to the Romans."
tice in diseases of women. Toward this end he founded the St. Louis school of midwives, the St. Louis lying-in hospital, and the St. Louis polyclinic and graduated medical college, to which he was elected president in 1866, and also the St. Louis medical-chirurgical society. Dr. Engelmann has been active in archeology, having opened mounds and collected specimens in southern Missouri. He has a valuable museum of the material which he has gathered, and has exchanged specimens with museums in Berlin and Vienna, and with the Peabody in Cambridge, Mass., the Natural history in New York, and the National museum in Washington, D.C. Dr. Engelmann is the author of numerous papers contributed to medical journals in his specialty, some of which have been translated into French and German.

**ENGLAND, John, R. C.** bishop, b. in Cork, Ireland, 23 Sept., 1786; d. in Charleston, S. C., 11 April, 1842. He was educated in the schools of Carlow county, and was then entered the theological college of Carlow. Here his progress in his studies was so brilliant that after his second year he was selected to deliver public lectures on religious subjects. He also devoted much of the time given him for recreation to the instruction of the poor. He was ordained to the holy order in 1814 after a long illness of ten years. He also founded an asylum for unprotected females which afterward suggested the plan of the Presentation convent, and established free schools for the education of poor boys. In 1808 he was recalled by his bishop and appointed president of the theological seminary at Cork. He took a leading part in the agitation for Catholic emancipation, and, with the view of helping the cause of religious liberty, founded the "Chronicle," which he continued to edit till his departure from Ireland. When the see of Charleston, embracing the states of North Carolina, South Carolina, and Georgia, was founded, Dr. England was nominated its first bishop. As he had determined to become an American citizen, he refused to take the oath of allegiance exacted from Irish bishops on their consecration. He came to the United States in 1819, and arrived in Charleston the same year. Bishop England had many obstacles to contend with. There were only two priests and two churches in the three states under his jurisdiction, and his flock was made up chiefly of poor Irish emigrants and refugees from Santo Domingo. In order to provide priests for his diocese he opened a classical school in Charleston, and the success that attended his efforts in this respect enabled him to support several of his ecclesiastical students. Not only did he succeed in training a body of educated men to conduct the instruction of his church, but he largely contributed to the revival of classical learning in South Carolina. Several schools were reopened, and the College of Charleston, which had suspended for some time, resumed its studies. He infused new life into the Philosophical literary association of Charleston, as well as into the Philosophical society of Pennsylvania. He did much to suppress dueling, not by intemperate denunciations, but by forming the most influential gentlemen of the state into an anti-duelling association. His address in reprobation of the practice before this body is considered a masterpiece of sound and temperate reasoning. In 1832 he was elected to Congress to preach in the hall of representatives at Washington, and was the first Catholic clergyman on whom this honor was conferred. To explain and defend the doctrines of his church he established the "United States Catholic Review," which was published in Charleston. It was through the columns of this periodical that most of Bishop England's writings found their way to the public. His influence was felt in every part of the Catholic church in this country, and his influence at Rome was decisive in all ecclesiastical affairs connected with the Catholics of the United States. His courses of lectures, which he delivered in all the great cities of the Union, were attended by citizens of every creed. Nothing, however, endeared him to the people of Charleston so much as his heroism during the frequent visitations of the yellow fever, when he continued at his post night and day. In 1834 he visited Ireland and obtained the services of three nuns of the Ursuline order, by whose aid he established the Ursuline schools of Charleston. He also founded orphan asylums, boarding-schools, and free schools, which he placed under the charge of Sisters of Our Lady of Mercy. He conceived the plan of assembling the prelates in council for mutual aid, and has been styled "the author of our provincial councils." He visited Europe four times in the interests of his diocese, but in 1840 he entered the theological college of Carlow. Here his progress in his studies was so brilliant that after his second year he was selected to deliver public lectures on religious subjects. He also devoted much of the time given him for recreation to the instruction of the poor. He was ordained to the holy order in 1814 after a long illness of ten years. He also founded an asylum for unprotected females which afterward suggested the plan of the Presentation convent, and established free schools for the education of poor boys. In 1808 he was recalled by his bishop and appointed president of the theological seminary at Cork. He took a leading part in the agitation for Catholic emancipation, and, with the view of helping the cause of religious liberty, founded the "Chronicle," which he continued to edit till his departure from Ireland. When the see of Charleston, embracing the states of North Carolina, South Carolina, and Georgia, was founded, Dr. England was nominated its first bishop. As he had determined to become an American citizen, he refused to take the oath of allegiance exacted from Irish bishops on their consecration. He came to the United States in 1819, and arrived in Charleston the same year. Bishop England had many obstacles to contend with. There were only two priests and two churches in the three states under his jurisdiction, and his flock was made up chiefly of poor Irish emigrants and refugees from Santo Domingo. In order to provide priests for his diocese he opened a classical school in Charleston, and the success that attended his efforts in this respect enabled him to support several of his ecclesiastical students. Not only did he succeed in training a body of educated men to conduct the instruction of his church, but he largely contributed to the revival of classical learning in South Carolina. Several schools were reopened, and the College of Charleston, which had suspended for some time, resumed its studies. He infused new life into the Philosophical literary association of Charleston, as well as into the Philosophical society of Pennsylvania. He did much to suppress dueling, not by intemperate denunciations, but by forming the most influential gentlemen of the state into an anti-duelling association. His address in reprobation of the practice before this body is considered a masterpiece of sound and temperate reasoning. In 1832 he was elected to Congress to preach in the hall of representatives at

**ENGLISH, Richard, British soldier.** b. about 1750; d. 7 Nov., 1812. He was a resident of Clifford, County Clare, Ireland, served with distinction in the American campaigns from 1775 till 1781, and was at one time commandant of Detroit. He was efficient in aiding the colonization of the extreme west, and consequently was made a colonel. His son, Sir Richard, b. in Detroit, Mich., in 1798; d. 19 Jan., 1883, joined the British army, and in recognition of his services in the Crimean war was made a lieutenant-general in 1855.

**ENGLISH, Frederick, naval officer.** b. in Delaware county, Pa., in 1790; d. in Philadephia, 12 Feb., 1866. He entered the navy as a midshipman on 30 Nov., 1814, and became lieutenant on 13 Jan., 1825. During the Mexican war he commanded the "Princeton" and served in the blockading squadron. He was promoted to captain in 1855, and at the beginning of the war with China to bring home the "Hartford." He was then assigned to the command of the Philadelphia navy-yard, and subsequently became governor of the naval asylum in that city. He was promoted to rear-admiral on the retired list, 25 July, 1866.

**ENGLISH, Henry.** b. in Philadelphia, 17 Nov., 1737. He was graduated at the University of Pennsylvania in 1758, and studied theology with Dr. Samuel B. Wylie, receiving his license to preach in 1781. After spending some time in missionary labors in Wyoming, he was invited to New York in 1782, and was ordained pastor of the 7th Presbyterian
church. He resigned in 1834 on account of impaired health, and was editor of the "Presbyterian" for a time. He was chosen president of the old-school party. In 1838 he was appointed editor of the books and tracts issued by the Presbyterian board of publication, and held this office till 1866, when he was chosen to be president of the board. Ball's tracts were prepared in connection with the board of publication, and are chiefly devotional. Among them are "Records of the Presbyterian Church" (Philadelphia, 1840); "English Martyrology" (1845); "Sick-Room Devotion" (1845); "Bible Dictionary" (1850); "Sailor's Companion" (1857); and "Soldier's Pocket-Book," of which 300,000 copies were circulated, principally in the army, during the civil war (1861).

**ENGLISH, Earl**, naval officer, b. in Crosswicks, Burlington co., N. J., 18 Feb., 1824. He was educated in Trenton, N. J., and entered the naval service 25 Feb., 1840. He was commissioned lieutenant of the U. S. frigate "Constellation" around the world, returning after an absence of four years, then being ordered to the naval academy in Annapolis, where he graduated in 1846. He joined the U. S. frigate "Independence," and was actively employed on the Mexican coast, principally in cutting the cable which was then at the capture of Mazatlán, Mexico, in November, 1847, and remained there till the close of the Mexican war. In 1852 he was attached to the U. S. brig "Dolphin," which was engaged in "deep-sea soundings" across the Atlantic ocean from Newfoundland. He was appointed master, 1 March, 1855, and lieutenant on 14 Sept. In 1857 he cruised in the East Indies, and took part in the engagement with the barrier forts, seven miles below Canton, China, in which he was wounded. He was made master-commander on 1 July, 1862, and served throughout the civil war, being employed principally in the Gulf of Mexico and the sounds of North Carolina, and commanding at different periods the "Somerset," "Sagamore," and "Wyalusing." In 1866 he was appointed commander, and after the war served four years on the East India station. He was then employed in Japanese waters during the struggle that resulted in the overthrow of the Tycoon. When the latter was defeated at Osaka, 18 Feb., 1868, he received him on board the "Iroquois," which was then anchored in the Osaka river. He was credited a capture, 28 Sept., 1871, commodore, 25 March, 1890, and rear-admiral, 4 Sept., 1884, at which time he resigned the office of chief of the bureau of equipment and recruiting, which he had held for six years. He then took command of the European station, and was retired, 18 Feb., 1896.

**ENGLISH, George Bethune**, adventurer, b. in Cambridge, Mass., 7 March, 1877; d. in Washington, D. C., 20 Sept., 1828. He was graduated at Harvard in 1807, and then studied law, but neglected his practice and turned his attention to theology. While studying Hebrew in Cambridge he began to doubt the truth of the Christian religion, which he attacked in a book entitled "The Grounds of Christianity Examined" (Boston, 1813). This was answered by Edward Everett in 1814, and in 1820 he wrote "Five Truths Stones out of the Brook." Subsequently he edited a paper for a time, and then sailed to the Mediterranean as a lieutenant of U. S. marines. On his arrival in Egypt he resigned his commission and joined Ismail Pacha in an expedition against Sennaar in 1843, winning distinction as an officer of artillery. As an experiment, he revived the ancient scythe-armed war-chariot, which was destroyed by being driven against a stone wall in Cairo, and he also employed camels for dragging cannon. He next became an agent of the U. S. government for the slave trade, but in 1857 he returned to the United States and went to Washington, where he remained until his death. His friend, Samuel L. Knapp, has composed an ingenious epitaph recounting the incidents of his life. His genius was versatile, and he possessed remarkable facility for the study of languages. Besides the works mentioned above, he published replies to William E. Channing's two sermons on infidelity (1813), and a "Narrative of the Expedition to Dongola and Sennar" (London, 1822; Boston, 1823).

**ENGLISH, Edward**, statesman, b. in New Haven, Conn., 13 March, 1812. He received a common-school education, and served an apprenticeship in a carpenter's shop. Here his energy and capacity were such that before he had attained his majority he was made master builder. He then engaged in the lumber trade and subsequently in real estate, banking, and manufacturing enterprises, and became one of the richest men in Connecticut. In 1848 he was a member of the New Haven common council, and elected a member of the state general assembly in 1853, and elected to the senate in 1856. He was then chosen as a War-Democrat, and served from 1861 till 1865, voting with the Republicans for the abolition of slavery. He was a delegate to the Philadelphia national union convention in 1866, and was governor of Connecticut in 1867-70. He then traveled extensively in Europe and the United States. In 1875 he was elected U. S. senator to fill a vacancy, and served till the following spring. He is president of the New Haven savings bank, and a manager of Adams express co.

**ENGLISH, Thomas Dunn**, author, b. in Philadelphia, Pa., 20 June, 1816. His ancestors were Quakers, who settled in Mount Pleasant, N. J., in 1684. The name was originally Angelos, which has been corrupted to the present form. He was educated chiefly in private academies and at the Friends' boys' school in Philadelphia, N. J. When only seventeen years of age he wrote for the Philadelphia press. He graduated in medicine at the University of Pennsylvania in 1839, but after a short practice he studied law in Philadelphia, and was admitted to the bar in 1842. He was elected a fellow of New College in 1844, and in the following year began the publication of a literary magazine, "The Aristidean," of which only a single volume was issued. In 1848 he edited a humorous periodical entitled "John Donkey," and in the same year he wrote a work on the French Revolution of that period, in conjunction with G. G. Foster. He removed to Virginia in 1852, where he remained five years, after which he wrote in New York the "Logan Grazier" and other poems descriptive of life and character in that region. In 1860 he settled in New Jersey, where he has since practiced medicine. He has been actively engaged in politics, and served in the New Jersey legislature in 1863-4. William and Mary gave him the degree of LL. D. in 1876. He is the author of several novels, mostly pseudonymous, and of more than twenty dramas, of which "The Morlocks" is the only one printed. He wrote "Ben Bolt," a popular song, which first appeared in the New York "Mirror" in 1843, and the "Gallows-Goers," a rough but vigorous poem, which had an immense circulation during the agitation of the question of capital punishment. His publications include "Walter Wolfe" (Philadelphia, 1842); "MDCXXXIV. or, the Power of the S. F.," a political satire (New York, 1845); "Poems" (New
York, 1855; edition suppressed); "Ambrose Feict, or the Peer and the Painter" (1869); "American Ballads" (1883); and "Book of Battle Lyrics" and "The Senator's Son" (1884). He has also written numerous pamphlets, and has contributed lyrics and essays to various periodicals.

ENGLISH, William Hayden, lawyer, b. in Lexington, Scott co., Ind., 27 Aug., 1822. His father, Elisha G. English, one of the pioneers of Indiana, was in close contact with public trusts during a period of forty years. William was educated in the common schools and at Hanover college, studied law, and was admitted to practice in the U. S. supreme court before he was twenty-three years of age. He served as deputy clerk of his native county, and as postmaster of Lexington, before reaching his majority. In 1843-4 he was a principal clerk in the Indiana house of representatives. He was principal secretary of the State convention of 1850, which framed the constitution of Indiana, and was a member and speaker of the first house of representatives after its adoption in 1851. He was a clerk in the U. S. treasury department during Polk's administration, and held a clerkship in the U. S. senate about 1850. He was elected to congress in 1852 as a Democrat, and served from 1853 till 1857, when he resigned and engaged in business in his home county. In 1856 Mr. English was unanimously nominated for vice-president, on the ticket with Gen. Hancock, by the Democratic national convention. He is president of the Indiana historical society, and author of an historical and biographical work on the constitution and law-makers of that state (Indianapolis, 1887).

ENNEKING, John Joseph, artist, b. in Minster, Auglaize co., Ohio, 4 Oct., 1841. He was educated at Mount St. Mary's, Cincinnati, Ohio, and studied art in Europe in 1873-6, most of the time in the art-schools of Munich and Paris. He was a pupil of Bonnats and D'Aubigny. After his return to this country he opened a studio in Boston, and his works are frequently shown in the exhibitions of the Boston art club. For several years he has made a specialty of New England landscapes in November and winter twilights. He has also been successful as a painter of children's portraits. Among his works are "The Drove," cattle crossing a brook on a November morning (1878); a large "November Twilight" (1880); "Winter Twilight" (1882); "Summer Twilight" (1883); "Cloudy Day in Summer" (1884); "The Coming Storm," "Indian Summer," and another "November Twilight" (1885). The most successful of his figure-paintings are "Spring-time" and "Old Lady darning Stockings."

ENOS, Roger, soldier, b. in Simsbury, Conn., in 1729; d. in Colchester, Vt., 6 Oct., 1808. He was in the colonial service during the French war in 1758, became ensign in March, 1760, lieutenant in regiment and captain-lieutenant in 1761, 1st lieutenant in 1765, and captain in Israel Putnam's regiment in 1764.

ENRÍQUEZ DE ALMansa, Martín (en-re'-kayth), viceroy of New Spain, b. in Alcañices, Spain, about 1525; d. in Lima, Peru, 15 March, 1563. He took possession of the government, 9 Nov., 1562, and, on his arrival at Vera Cruz, attacked and deposed Sir John Hawkins in the bay of San Juan de Ulúa. In 1570 he sent an expedition against the Indians, established in their territory the presidios of Ojo de背后 and Pueblos, and founded the towns of Colima and Tlapozamica in the province of Nueva Galicia. During his government great activity was displayed in the foundation of towns, convents, and colleges. He established the independence in 1571, a year before the arrival of the Jesuits, and in 1573 began to build the cathedral of Mexico. He established the exact duties in the latter year, and abolished the forest service of the natives in the mines. When,
in 1576, the plague of Matlahuatzin broke out, in which two million natives perished. Enríquez showed them great kindness, and excused them from all taxes. He was promoted viceroy of Peru on 4 Oct., 1580, and arrived in Lima in 1581. He founded the College of San Martin, 11 Aug., 1582, giving them the direction to the Jesuits, and, up to the abolition of that order in 1767, this college was one of the most picturesque in the New World. Enríquez authorized the conversion of the third concilium of Lima on 15 Aug., sent assistance to the city of Arequipa, which had suffered greatly from an earthquake, gave orders for the cleaning of the streets and markets of Lima, organized the mail service to the interior, and initiated numerous other improvements. Enríquez died suddenly, while in office, and his remains were buried in the convent of San Francisco of Lima. He is the author of "Ordenanzas de Mesta para la Nueva España" (1574) and "Instrucciones sobre las cosas y gobierno de Nueva España," both of which are preserved in manuscript in Mexico.

ENRIQUEZ DE RIVERA, Pedro, viceroy of Mexico, b. in Seville, Spain, about 1610; d. in the convent of Nuestra Señora del Risco, Avila, Spain, 8 April, 1684. He belonged to the family of the Duke of Alcalá, a distinguished Spanish nobleman. He entered the religious order of Saint Agustin, and graduated as doctor of theology, which science he taught afterward in the convents of Burgos, Valladolid, and Alcalá. He was appointed bishop of Guatemala by Philip IV, in 1657, and in 1667 was assigned to the bishopric of Michoacán, Mexico, but before he could reach his new see he received notice of his promotion to the archbishopric of Mexico, where he arrived 27 June, 1668. In 1673 Pedro Nuño Colon, Duke of Veragua, then an old man, came to New Spain as viceroy, but died six days after his arrival. Then some sealed instructions, which had been deposited in the inquisition, were opened, and it was found that they appointed Payo Enriquez deputy viceroy. His government was remarkable for its liberality and justice. He ordered many repairs of public buildings and other improvements, built the causeway between Mexico and Guadalajara, and took energetic measures for the defence of the coasts during the disturbances in Yucatán by English corsairs. In 1681, after resigning both the office of archbishop and that of viceroy, he returned to Spain, and, declining the bishopric of Cuernavaca, retired to the convent, where he died. When the news of his death arrived at Mexico, the bishops,abbots, and priests who were present signed a petition that the Duke of Veragua be appointed viceroy, which was, however, denied by the Holy See on account of his advanced age. Enríquez was a man of great benevolence and generosity, and became popular in all the provinces he visited.

ERAUZO, Catalina de (a-row-tho), also called Erasno and Eraso, Spanish adventurer, b. in San Sebastian de Guipuzcoa, province of Biscay, Spain, 10 Feb., 1585; d. in Cuixtla, near Orizaba, Mexico, in 1650. She was the daughter of Capt. Miguel de Erauzo. At the age of four years she was placed in a Dominican convent; but on 18 March, 1600, she scaled the wall and escaped to the woods, where, subsisting on herbs and roots, she remained three days, during which time she discovered her hair was of such length that she was not discovered by her hair. Proceeding in male attire to Vitoria, she found employment as an amanuensis. Subsequently she was a page, and then, under an assumed name, visited her native place and, hearing of her conduct, her uncle, who did not recognize her. She sailed in the fleet commanded by Gen. Luis Fernandez de Cordova, which reached Punta de Araya, near Cuixtla, and there destroyed a
small Dutch squadron. Next she went to Panama, and thence to Saffa, and there took charge of a shop, managing it to the entire satisfaction of her employer. On one occasion, while at the theatre, Catalina saw a man named Reyes, who threatened to disfigure her face, and on the following day went to the shop with the purpose of provoking her. When he left her she got a knife, made it into a sort of saw, and, gripping it on her sword, went in search of Reyes. She found him and disfigured him, and left him bleeding on the street, and crying, "This is the face that is to be disfigured," tore his face with the rude weapon. A friend of Reyes then attacked her, but she wounded him dangerously, and then took refuge in a church. Her employer, who entertained feelings of friendship for the sister-in-law of the wounded Reyes, thought matters would be brought to a satisfactory termination by a marriage between her and his clerk. Catalina gave her employer to understand that nothing could induce her to marry. She then went to Trujillo to take charge of another shop, but Reyes, who wounded her, tried, owned and attacked her, but Catalina defended herself against all three, and killed one of them. Ordoño, the chief magistrate, was taking her to prison, when, passing by a church, she allowed her to take refuge in it. He was after that sentenced to prison, and sent to speak to her in the Basque dialect. She next went to Lima, and after some months enlisted as a soldier, under the assumed name of Alonso Diaz Ramirez de Guzman, in the expedition that was to be sent to Chili. The company was commanded by Capt. Gonzalez Rodriguez, who was directed part of the forces sent to Concepcion under the command of Sarabia, but made the campaign under the command of Gov. Ribera, whose secretary was Capt. Miguel de Erau- zo, whom she knew to be her brother, but he did not recognize her. But he found that Ramirez de Guzman frequented a certain gambling saloon, and caused her transfer to Paica (Arauco), where she remained three years in service. She accompanied the expedition to Valdivia, where, in a severe engagement, she with two soldiers rushed in among the Indians, and both soldiers perished in the fight, but Catalina was wounded in one arm and one leg. She was transferred to the casique, after receiving three wounds from arrows and one from a lance. For this exploit she was appointed ensign, and served as such in the company of Alonso Moreno, in the battle of Puren, and when her captain fell she took his place and led the company bravely. Afterward Catalina took part in other engagements, and was wounded many times by arrows. She fought with the famous casique Quispehuncha, unhorsed him, and then had him hanged on a tree. When Catalina was at Nacimiento she obtained a six-months' leave of absence, to return to Concepcion, and while there was insulted in a gambling-saloon by an officer, whom she wounded in the breast, and took refuge in a church. The governor had the church surrounded for six months, and by this time the fury of the people had abated. Catalina was left, accompanied by the ensign Don Juan Silva, who had asked her to be his second in a duel with Don Francisco Rojas. Silva being wounded and Rojas killed, Catalina fought with the second of the latter while the moon was obscured by a cloud, so that she did not see the face of her opponent. The cloud passed away and Catalina looked upon the face of her brother, whom she had killed. She then set out on a journey to Tucuman (in the Argentine province). Some idea may be formed of her hardships and sufferings on that perilous journey from the fact (as she herself relates) that for the first time in her life she shed tears. When she saw two deserters and two Indians who accompanied her perish of hunger and cold, her heart failed her for a moment, but she killed a horse, and, subsisting, arrived at Tucuman. After travelling a long time, she came to a farm, whose owner, a widow, treated her with the greatest kindness, and wanted Catalina to marry her daughter. She went to Tucuman, as if for the purpose of celebrating the marriage, but fled, and directed her steps towards Potosi, accompanied by a soldier. On the way they were attacked by a gang of robbers, two of whom they killed. She reached Potosi, and was for a short time valet to Gov. Argujo, but soon joined the command of the corregidor of Potosi, who was raising troops to put down an insurrection headed by Yanez, and took part in a severe engagement. She was made aide-de-camp to Gen. Alba, and accompanied him on an expedition against the Mojos Indians. After this she went to Charcas, where she was employed by a merchant, whose business prospered rapidly under her able management, but she had a dispute at the gaming-table, and fought a duel with the cousin of the bishop, killing her adversary. In Pomabamba (Bolivia), Catalina had another duel, in which she killed her adversary, and was thrown into prison, and sentenced to speak to her confession, but was sentenced to die, refused to receive the consolations of the church, and ascended the scaffold. But an order arrived from President Don Diego de Portugal to suspend the execution and send the culprit to Chucuissas, as it had been proved that the allegations of the woman were false. Catalina went to Cochabamba. A nun named Uloa induced the president of Charcas to commission Catalina to conduct the trial of Francisco Escobar, who had treacherously killed two Indians. The result of the trial was that she condemned him to be hanged, and it was sentenced to be carried into execution. Catalina next went to La Paz, where the servant of the corregidor enraged her by throwing his hat in her face. Catalina stabbed him with her dagger, and he fell, mortally wounded. She was imprisoned, sentenced to the galleys, and finally allowed to prepare for death, but finally escaped. When the viceroy, Marquis de Montesclaros, was preparing a fleet to attack the naval forces of the Dutch in the Pacific, under the command of George Spilberg, Catalina joined the fleet, and embarked in the "Almirante," which, stranded off Callite, was completely destroyed in the conflict. Catalina was one of the few persons that were saved, and fell into the hands of the Dutch, but were set free at Payta. She went to Lima, and, after a stay of seven months, proceeded to Cusco. Here she was a great favorite with the ladies. On one occasion, in a gambling-saloon, she met a Spaniard commonly known as the "Cid." He was repulsive and quarrelsome, but courageous. The "Cid" took his seat beside her. Twice he took from the table the money she had won; but on his next attack, she pinned his hand to the table with her porriand. The "Cid," with two of his friends, attacked her; she, battling with all three, made way to the street, where two Basque friends came to her aid. The "Cid," wounded Catalina in the back and in the left side, and she felt, for a moment, as if she were about to die. From loss of blood, she believed herself to be dying, and longed to reveal her sex. Rousing herself, she saw the "Cid" standing opposite the church at whose door she lay. The dying woman rose, staggered toward the "Cid," and thrust her sword through his body, killing him on the instant. The corregi-
door arrived, and, seeing her dangerous wound, ordered her to confess. She revealed the secret of her sex to the priest, and was taken to the house of the treasurer's widow. After many more adventures, mostly personal encounters, she met Bishop Agustin de Carvajal, to whom she related the story of her life, telling him she was willing to submit to examination by a committee of matrons, adding that she had promised her father that it was proved by the declarations of the matrons that she had spoken the truth. Catalina lived in a convent in 1620–2, then travelled to New Granada, and sailed for Spain, arriving in Cadiz, 1 Dec. 1624. Her fame had preceded her, and crowds thronged the streets with cries of "Long live to valor," "Long live the ensign-nun!" In Madrid she presented an account of her services to King Philip IV, who granted her a pension for life of 800 crowns. Catalina set out for Barcelona, but before arriving there was robbed. From Barcelona she went to Genoa, and thence to Rome, where the pope, Urban VIII, granted her an audience, and, having heard the narrative of her adventures, gave her absolution for all the crimes she might have committed, with permission to dress in male attire for the rest of her life. She next went to Naples, and thence to Genoa, in which city she was in 1632, when she embarked again for Havana, and thence for Mexico, as ensign in the fleet commanded by Capt. de Echaroacet. In Mexico she made a long campaign, and, as usual, distinguished herself by her bravery in battle, and after some years retired from the service. She married a rich merchant and began trade between the city of Mexico and Vera Cruz. A certain rich merchant commissioned her to take a young lady from Jalapa. Catalina, enchanted with the beauty of the young lady, grew very fond of her; but when she reached Mexico a nobleman became enamored of the girl, and, although Catalina offered to place $5,000 at interest in her name, and give her half her pension, if she would become a nun, the young lady married the nobleman. Unable to endure the absence of her beloved friend, Catalina went to the house of the latter, where she was well received; but as she repeated her visits too often, the lady, jealous of her reputation, persuaded her husband to forbid Catalina the house. At this the latter almost lost her reason, and challenged the husband, who declined to appear on the same terms. A short time afterward the husband was defending himself against three men who had attacked him, when Catalina took up his defence and vanquished them. In 1650, on her way to Vera Cruz, she fell ill at Oaxaca, and in a few days expired, and was buried at Orizaba. Archbishop Palfox, of Mexico, caused an eulogistic epitaph to be inscribed on her tomb in 1651. The memorial presented by her to King Philip IV is referred to on page 135 of the book published by Don Joaquin Maria Ferrer, and was accompanied by a certification of Don Luis de Cespedes, governor of Paraguay, of Don Francisco Perez de Navarrete, of Don Juan Cortes de Monroy, governor of Vera Cruz, and of General Don Juan Riquel de Leon. The king and the pope called her Ensien Doña Catalina Erazno. Don Pedro de la Vega, in a work on his voyages (1630), says that she was buried in Rome, and that in that city Francesco Cencicco executed a portrait of her. The history of her life, written by herself, was published in Mexico in 1653. 'The Rev. Nicholas Renteria in 1693 gave a succinct account of her life. The poet Juan de Montalvo wrote a drama entitled "La Monja Al LFrez" ('The Ensign Nun'), which was represented in Lima and in Seville at the beginning of the present century. Don Candido M. Trigueros wrote a poem on Doña Catalina Erazno (Seville, 1784). Gil Gonzales Davila, in his life of Philip III, gives a succinct account of Doña Catalina. He mentions that he met her at an inn in the dress of a soldier, and that he saw her wounds, and the documents that proved her services. Joaquin M. Ferrer published her history (Paris, 1829). In 1839 D'Andres made a full-length portrait of her from the following description: "She is tall, for a woman; her eyes are large, black, and brilliant; her lips red and full; her nose rather short, the nostrils dilated; her neck is short; her figure, neither good nor bad; her hair short, and anointed with pomade, according to the fashion. Her gait is light and elegant; her manners natural; her hands alone are feminine, but rather in gestures than in form. There is a bright brown down on the upper lip."

ERBEN, Peter, organist, b. in Philadelphia, Pa., in 1771; d. in New York city in 1868. After the death of his father, who was one of the early German settlers in Pennsylvania, he removed to New York, where he became an organ-builder, and was also organist in Trinity parish from 1807 till 1836. His son, Henry, b. in New York city in 1801; d. there about 1850. He was the third son of Portus Garcia, lord of Torre de Ercilla, and Leonor de Zuniga, a noble lady in the service of Empress Isabella, wife of Charles V. In early youth he was a page to the Prince of Asturias, afterward Philip II., and in 1564 accompanied Philip to England on the occasion of the latter's marriage to Queen Mary. While he was in London news was received of the rebellion of the Araucanians, a brave nation of Chile, and Ercilla at once joined the expedition against them under Alderete. He highly distinguished himself in the campaign that followed, taking part in seven battles and many other fierce encounters. He afterward accompanied Hurtado de Mendoza to the conquest of Chiloé, near the straits of Magellan, and with ten followers, on 28 Feb., 1568, penetrated inland to a point that had been reached by no other Europeans, leaving a statement of that fact in verse, cut in the bark of a tree. After taking possession of those regions in the name of the Spanish monarch, he returned to the city of Imperial, and, being suspected of joining in a mutiny, was condemned to be tortured, but was reprieved and afterward exiled. While at Lima he heard of the rebellion and cruelties of Lope de Aguirre in Venezuela, and
reached Panama in 1651, on his way to fight against him; but Aguirre had just been deposed and killed, and Escilla, with a large part of his force, returned to Spain in 1653. After travelling extensively through Europe, he entered the service of the Emperor Rudolph, of Austria, as one of his chamberlains, but about 1590 returned to Madrid, where he passed the rest of his life in retirement, almost forgotten. He died in poverty. When Escilla began his seven years' campaign in Chili he conceived the idea of making it the subject of a poem; and in the intervals of active duty, mostly at night-time, he composed the first part of "La Araucana," writing his verses on scraps of paper, and often on bits of leather. The third and last part of the poem he finished after his return to Spain. "La Araucana" is one of the most celebrated of Spanish epics, and one of the best ever written in any language. It not only possesses the merit of pure diction, vivid description, and majestic style, but it is also a true history of the Araucanian war, in which the author was personally engaged, and as such has been used by the most conscientious historians. The first fifteen cantos of "La Araucana" were published in Madrid in 1590, the second part in 1576, and the third part, completing the thirty-seven cantos, in 1595. His best edition is those of Madrid (1776 and 1828). A portion of the poem, translated into French by Grainville, is found in vol. vii. of the "Quatre Saisons du Farina." An analysis of the poem, with translations of parts of it, has been made in Hayley's "Essay on Epic Poetry" (London, 1782).

ERIC, bishop, b. in Norway in the 11th century. He was active in the conversion of the natives of Greenland, and was the first bishop that exercised jurisdiction in America. As soon as the Norwegians once more had settled among the Greenlanders, Eric followed his countrymen from Greenland to the newly discovered continent. Here he labored among the natives for several years. He returned to Norway in 1120, gave an account of the progress of religion in Vinland and Greenland, and advised the establishment of a bishopric in the new colonies. The bishop of Scandinavia erected the new see of Garda in Greenland, and recommended Eric as bishop. He was consecrated at Lund, in Denmark, in 1121, by Archbishop Adair, and sailed for Garda with a body of missioners. He soon went to Iceland, where he established a new colony in Vinland. The situation of Vinland has been fixed by some in southeastern New England. Some have gone so far as to place it about Narragansett Bay; but such conjectures are supported by inadequate evidence, and have little historical value.

ERIC THE RED, Scandinavian navigator. He was the son of a jarl of Jadar, and was called red from the color of his hair. In 982 he was one of the Northmen who braved the dangers of the Atlantic ocean to settle in Iceland. During the following year he set sail from Breidshald in search of land seen by Gunnbjorn, of which a tradition still lingered among the Northmen. He doubled Cape Farewell, and sailed up the west coast to the present site of Julianshaud, where he saw large herds of reindeer browsing on the meadowland and named it Greenland, and the inlet Ericfjord. In 985 he returned to Iceland, but soon again set sail with twenty-five ships loaded with emigrants, and the means of founding a colony. He reached Ericfjord with but fourteen of his vessels, the remainder having stayed, or been driven back, and he built a settlement far up the fjord. The town grew and prospered, and in time the coast was explored and new plantations founded. As no trees grow in that region now, it is probable that the land was far more habitable than at present, and very little mention of ice is made by the early chroniclers. About 1000, an exploring party sent out by him, under the command of his son Leif, discovered the continent of North America, part of which they called Markland, and another part Vinland. The latter appears to have been southeastern New England. He is supposed to have established a colony in that neighborhood, but the evidence on which this supposition is made is not satisfactory. See Bryant and Gay's "Popular History of the United States," and Rev. Benjamin F. De Costa's "Pre-Columbian Discoveries in America by the Northmen"; also, Laing's "Heimskringla," which contains by far the ablest discussion of the subject.

ERICH, Augustus Frederick, physician, b. in Eisleben, Germany, 4 May, 1837. He was educated at the Gymnasium in Eisleben, and came to the United States in 1856. He was graduated in medicine at the University of Maryland in 1851, and began to practise in Baltimore. In 1868 he was elected a member of the Baltimore special dispensary, and was assigned to the charge of diseases of women. In 1867 he became professor of chemistry in the College of Physicians and Surgeons in Baltimore, and was afterward elected to fill the chair of diseases of women in the same institution. He is a member of numerous medical societies, and in 1871 was president of the Medical and Surgical Society of Baltimore. His contributions to medical literature have been important, and are chiefly composed of papers on his specialities.

ERICSSON, John, engineer, b. in Langelandshyttan, province of Wernland, Sweden, 31 July, 1803. His father, Olof, was a mining proprietor, and his brother, Daniel, became the captain of engineers, and became chief of the Swedish railways. As a boy, John had ample opportunity of watching machinery connected with mines, and his mechanical talent was early developed. He received his earliest instruction from a Swedish governor, and a German engineering officer who had served under Bernadotte. Before he was eleven years of age he had constructed with his own hands, and after his own plans, a miniature saw-mill, and had made numerous drawings of complicated mechanical contrivances. These efforts having attracted the attention of Count Platen, this celebrated engineer appointed him a cadet in the corps of mechanical engineers, and, after six months' tuition, he was made a leveller at the grand Swedish ship canal, then in course of construction. Two years later, at the age of fourteen, he was employed to set out the work of a section employing 600 soldier operatives, and occupied his leisure in making drawings of every implement used on the back, and he thus built a settlement far up the fjord. The town grew and prospered, and in time the coast was explored

[Signature: J. Ericsson]
Shortly afterward he passed with distinction a competitive examination for an appointment on the staff of northern Sweden. Notwithstanding Gripenberg's short labor attendant upon his duties as a surveyor, he undertook to make drawings for a work on canals, and to engrave the plates in the style of what was known as machine engraving. He devised a line engraving machine, by means of which, within one year, he completed nineteen of the copper plates, which experts pronounced to be of superior merit. When about twenty-two years old he constructed a condensing flame-engine of ten-horse power, and in 1826 went to England to introduce it; but it was so successful, the first Engine, that in 1827 Smeaton, fuel being far less in volume than that obtained from a pine-wood fire, while the intense heat from coal seriously affected the working parts of the engine. In 1827 he resigned his commission in the army, after being promoted to a captaincy. The failure of the Steam rifle compelled him to draw upon his mechanical abilities for means to prosecute further experiments. He produced, in rapid succession, an instrument for taking sea soundings, a hydrostatic weighing machine, and numerous other devices, including tubular steam-boiler, with contrivance of the principle of condensing steam and returning the water to the boiler, and in the same year submitted to the Admiralty his self-acting gun-lock, the peculiarity being that by its means naval cannon could be automatically discharged at any elevation, notwithstanding the rolling of the ship. Not being able to agree as to the terms of adoption in the British navy, he kept the secret of this invention till 1843, when he applied it to the wrought-iron gun of the "Princeton." In 1829 he produced the celebrated steam carriage "Novelty," built for the purpose of competing with George Stephenson for the historical Liverpool and Manchester railway prize. This engine was planned and completed, and placed on the trial-ground within seven weeks; but, although the "Novelty," guied by its inventor, was the first of its species to run in perfection, and to attain the then amazing speed of thirty miles an hour, Stephenson's "Rocket" proved superior in traction, and was awarded the prize. In the "Novelty" he introduced several features, the four most important of which are retained in the locomotive of the present day. This year, also, he invented a steam fire-engine, which excited great interest in London, and for which he afterward received, in 1840, the great gold medal of the Mechanics' institute of New York. In 1830 he introduced "link motion" for reversing locomotive engines, and a modification of this device is now in use in all locomotives. His long-cherished plan of a caloric engine was realized in 1833, and was hailed with astonishment by the scientific world of London. Lectures were delivered on it by Dr. Dionysius Lardner and Michael Faraday, and an attempt was made to defend it at the meeting of the Society of Arts and Sciences. In 1833 the fire-ship "Ericsson," of 2,000 tons, was propelled by a motor on the same principle. A sea trial from New York to Washington and back established great economy in fuel, but at a speed too slow to compete with steam. For several years the designer dwelt in light of the improvement of the stationary caloric engine and its application to light mechanical purposes, and more than 6,000 of such engines have been built up to 1887, hundreds being employed in New York city in pumping water in private dwellings. In 1852 the American academy of arts and sciences awarded the gold and silver Rumford medals to Ericsson for his improvements in the management of heat, particularly as shown in his caloric engine of 1835. This was the second bestowal of the premium for the highest scientific discovery. In 1860 Ericsson invented and patented the screw propeller, which revolutionized navigation, and in 1837 built a steam vessel having twin screw propellers, which on trial towed the American packet-ship "Toronto" at the rate of five miles an hour on the river Thames. Subsequently the Admiralty, bearing the lords of the admiralty, was towed at a rapid rate, but the endeavor to convince them of the practicability of the new device was futile, since they thought that, as the power must be applied at the stern, the vessel would not steer. In 1898 he constructed a large iron ship named "F. Stockton," which crossed the Atlantic under canvas in 1839, and was afterward employed as a tug-boat on the river Delaware for a quarter of a century. In 1886, urged by Com. Robert F. Stockton, U.S.N., Ericsson resigned his office in London as superintending engineer of the Eastern Counties railway, and came to the United States during November. In 1841, under order from the U.S. navy department, he furnished designs for the screw war-ship "Princeton," the first vessel having the propelling machinery below water, out of the reach of hostile shot. This vessel dictated the reconstruction of the navies of the world. Besides its screw propeller, the "Princeton" was remarkable for numerous mechanical novelties devised by Ericsson, such as a direct-acting semi-cylindrical steam-engine of great compactness, and independent centrifugal blowers for ventilation and for promoting combustion in the boiler-furnaces, obviating the necessity of exposing the chimney during battle. He also fitted it with wrought-iron gun-barriages, with mechanical contrivances in lightness, elegance, and speed, taking up the recoil of the twelve-inch wrought-iron gun, the first of its kind, and up to that time the largest and most powerful piece of ordnance mounted on ship-board; the self-acting lock, before referred to; and an optical instrument to enable the commanding officer, by mere inspection, accurately to ascertain the distance of the object to be aimed at. The "Princeton" is correctly regarded as the pioneer of modern naval construction, and also as the foundation of the steam marine of the world. During the construction of the "Princeton," and before the end of 1840, numerous screw propeller vessels were built and furnished with engines by Ericsson, for carrying freight on the rivers and inland waters of the United States, and his propellers were in successful application in more than sixty vessels in this country before a single attempt was made to defend them in Europe. The period was skeptical regarding the commercial value of the new method of propulsion. In 1851, in the U.S. division of the World's fair held in London, he exhibited several of his inventions, including his instruments for measuring the chances at sea. It was a sad day for Europe to see their gas-gauges for fluids under pressure; a gauge for the volume of water passing through pipes; the alarm barometer; a pyrometer;
an instrument for measuring fluids by the velocity with which they pass through definite apertures; and a self-registering deep-sea lead, still in use by the U.S. coast survey, the principle of which was adopted in constructing the sounding apparatus used by the "Challenger" expedition. For these philosophical exhibits Ericsson was awarded the prize medal of the exhibition. Previous to 1858, Ericsson conceived the idea that was put in practical shape when, in 1854, he presented to Emperor Napoleon III. plans of a partially submerged armed vessel, with guns in a revolving shot-proof cupola placed centrally on the deck. This was the first suggestion of the "Monitor," which was designed and built by him in Greenpoint, N. Y., in 1861, for the U.S. government, under very arbitrary conditions. When the proposition to build this vessel was accepted, the only drawing completed by the designer was a mere outline and section to illustrate the stability of the structure; but, by extraordinary energy and executive skill, calculations and working-plans were made, and the "Monitor" launched, with steam machinery complete, in one hundred days from the laying of the keel. She arrived in Hampton Roads just in time to defeat, on 9 March, 1862, the Confederate iron-clad "Merimac," which, on the day preceding, had destroyed the "Cumberland" and "Congress," and was about to sink or disperse the rest of the government's wooden fleet. But for the victory of the "Monitor," the result of the war might have been changed, and European interference attempted. A fleet of monitors was then quickly built, which defeated several Confederate iron-clad batteries; and Ericsson's system was taken up by European maritime powers and carried out by them on a large scale. In 1869 he constructed for the Spanish government a fleet of thirty steam gun-boats, which was intended to guard Cuba against filibustering parties. In 1851 his latest war-vessel, the "Destroyer," was devised. It carries a submarine gun of sixteen inches calibre, which discharges 300 pounds of gun-cotton, in a 1,500-pound projectile, against an iron-clad's hull beneath the water-line. During many years Ericsson has devoted much time to scientific investigation, including computations of the influences that retard the earth's rotary motion. His "Sun Motor," erected at New York in 1883, develops a steady power obtained from the supply of mechanical energy stored up in the sun. This motor is intended by the designer as a contribution to applied science. Ericsson has contributed numerous papers, on scientific, naval, and mechanical subjects, to various journals in America and Europe. In "Contributions to the Centennial Exhibition" (New York, 1876) he describes the scientific apparatus devised and employed by him in experiments which determined all important practical questions relating to radiant heat, and of numerous novel instruments by which he has demonstrated the intensity of solar energy and the temperature of the solar surface; it also contains a description of his principal engineering constructions during his residence in the United States. Many honors have been bestowed upon him. Besides receiving royal favors from Sweden, he is knight commander of royal orders in Denmark and Spain; recipient of the grand cross of naval merit from the late King Alfonso of Spain, and of a special gold medal sent by the emperor of Austria in behalf of science; has received the thanks of congress, and is a member of various scientific institutions in Europe and America. Wesleyan university gave him the degree of L.L. D. in 1882. In 1867 a huge monument, quarried in one piece from the neighboring granite-mines, was set up in front of his birthplace, bearing the inscription, in the Swedish language, "John Ericsson was born here, 31 July, 1803." He now (1887) resides in New York city. See "Ericsson and his Inventions," "Atlantic Monthly," July, 1892, and "John Ericsson," "Scribner's Monthly," April, 1877.

ERNST, Oswald Hubert, soldier, b. near Cincinnati, Ohio, 27 June, 1848. He entered Harvard in 1868, and two years later was appointed to the U.S. military academy, where he was graduated in 1864, becoming at once 1st lieutenant in the engineer corps. In July, 1864, he was made engineer of the Army of the Tennessee, and served throughout the Georgia campaign. After a short service at the U.S. military academy as assistant professor of engineering, he was appointed assistant engineer in constructing fortifications on the Pacific coast, and remained so occupied until 1869. He was promoted captain in March, 1867, had command of an engineer company at Willett's Point, N. Y., in 1868-'71, and in 1870 was sent as astronomer with the government expedition to Spain, to observe the solar eclipse of that year. Here he was appointed instructor of practical military engineering, military signalling, and telegraphy at the military academy, performing also the duties of architect for the more important structures of the place. In 1878 he became assistant engineer on the western river improvements, and in 1880 was given charge of the improvements of the Mississippi river, between the Illinois and Ohio rivers. He received his commission as major in May, 1882, and has since had charge of the works of river and harbor improvement in Texas. Major Ernst has written articles on engineering subjects, and has also published "A Manual of Practical Military Engineering" (New York, 1873).

ERRANI, Achille, musician, b. in Faenza, Italy, 20 Aug., 1823. When seventeen years of age he entered the conservatory of Milan, and studied singing under the famous Vaceci. About five years later he made his first appearance as a leading tenor at Reggio di Modena. In 1859, after singing often in Italy, Spain, and Greece, he went to Havana under the management of Max Maretszek. He came to New York in 1869, sang at Winter Garden with Fabbri, Giordani, and Fressolini, and in 1861, when Adelina Patti sang Violetta in "Traviata" for the first time, he took the part of Alfredo. He went to Mexico in 1863, and after the civil war made a tour through the southern states as first tenor of the first company. He then settled in New York as a teacher of the Italian style of singing. His most famous pupils are Minnie Hauck, Miss Thursby, Mme. Durand, and Stella Bonheur.

ERRAZURIZ, Federico (er-mel-tho-eth), Chilian statesman, b. in Santiago, Chili, 27 March, 1835; d. there, 20 July, 1877. He studied law in
the University of Chili, was made a deputy at an
early age, and took some part in the parliamentary
debates. In 1860 he was made chief of the presi-
dance of Santiago, and introduced many reforms.
In 1865, during Perez's administration, he became
secretary of justice and of public instruction; and
in 1865, during the
law which was very much desired in Chili, ab-
ounced ecclesiastical privileges, and built several
railways in the northern and southern parts of
the country. He also organized several exhibi-
tions of industry and art, the most important being
the "Exposicion Universal" of 1873, held in a
magnificent palace built at Santiago Normal de
Agreicultura expressly for that purpose. Er-
razuriz improved the navy by adding to it the
two steel men-of-war "Cochrane" and "Blanco
Encalada." He also improved the condition of
the army, and contributed greatly to the material
progress and welfare of his country. He died
soon after retiring from office.

ERRETT, Russell, journalist, b. in New York
in 1827. In 1829 he removed to Pittsburgh, Pa.,
where he adopted journalism as a profession. He
has been repeatedly elected to the legislature of
that state. In 1861 he was appointed paymaster
in the U. S. army, and served in that office till the
close of the civil war. He was a state senator in
1867, assoeutor of internal revenue in 1869-73, and
deer of the state senate in 1869-71 and 1873-76. He
described a representative in congress in 1876
as a Republican. In 1827-36, his brother, Isaac,
clergyman, b. in New York city, 2 Jan., 1820. His parents were among the
earliest converts of Alexander Campbell, and he
became a preacher of the Christian denomination
in 1840. He has held pastorates in Pittsburg, Pa.,
New Lisbon, Warren, and North Bloomfield,
Ohio, Detroit, Mio, and Ionia, Mich., and in
Chicago, Ill. He had been associated with Alexander Campbell in the editorship of the "Millennial Har-
biner," and in 1846 he began the publication of
"The Christian Standard" in Cleveland. He was
elected president of Alliance college in 1868, but,
finding that his journal did not succeed in Alliance,
Ohio, he resigned his office, and in 1868 established
himself in Cincinnati, where he has since con-
tinued the publication of the "Christian Standard,"
now the foremost weekly periodical of his church.
He received the degree of L.L.D. from Butler uni-
erity in 1886, was corresponding secretary of the
Ohio Christian missionary society from 1853 till
1856, and president from 1857 till 1870. He was
also corresponding secretary of the General Chris-
tian missionary society from 1855 till 1866, and
president from 1874 till 1876, and president of the
foreign society from 1873 till 1886. Dr. Errett's
books include "Debate on Spiritualism with Joel
Tiffany" (1855); "A Brief View of Missions"
(1857); "War of 1812" (1871), the Pacific.

ERKIN, Field Montague, Baron, diplomat, b.
in England in 1776; d. there, 19 March, 1855.
He was the son of Thomas Erskine, lord high
chancellor of England, and received his education
at Eton and Cambridge. He became a barrister at
law in 1802, and in 1806 was returned for parliament
for Portland. Soon afterward he was sent to
the United States as envoy from Great Britain,
and continued as such till 1809. For many years he
was minister plenipotentiary to the court of Bavaria,
and remained there till his withdrawal from active
service in 1843. He succeeded to the peerage in
1829—his wife, Frances, b. in Philadelphia, Pa.,
28 June, 1781; d. in England, 25 March, 1843, was
the daughter of Gen. John Cadwalader, of Phila-
delphia, and married Lord Erskine in 1799. She
was the great-granddaughter of Judge William
Moore, of Moore's Hall, Pa., whose niece married
the lord high chancellor Erskine, and hence Baron
David Montagu Erskine and his wife were cousins.
Lady Erskine was distinguished for her graces of
character as well as of person, and was one of the
most remarkable beauties of her time. The por-
trait of her by Gilbert Stuart is con-
sidered one of his
masterpieces. It is
worthy of note, as a
proof of the regard evinced by Lord Erskine for
the United States, that his eldest sons, Thomas
Americus and John Cadwal-
ader, each of whom
succeeded to the
title, were named, the former after Thomas Cawd-
aler, his wife's brother, who had become an officer
during the war of 1812, and the lat-
ter after his father-in-law, who was distinguished
as a general in the American army during the
American war. The descendants of Lady Er-
skine, and therefore of a Revolutionary
genealogy, include the present Duke of Portland and the son of Lord Archibald Campbell, prospective Duke of
Argyll, his eldest brother being childless.

ERKINE, Ebenezer, clergyman, b. in Ridley
Park, Pa., 31 Jan., 1821. He was graduated at
Jefferson college in 1843, and at Princeton theological
seminary in 1848. In 1849 he was called to the
pastorate of Penn church in Philadelphia, and was
ordained by the Presbytery of Philadelphia in
September of the same year. He held his charge till
1851, and was then for six years pastor of the
cruch in Columbia, Pa. He was pastor in Star-
ing, Ill., from 1858 till 1864, and from 1865 till
1869 edited the "Northwestern Presbyterian" in
Chicago. In 1870 he was called to the church in
Newville, Pa., and in 1878 became a director of the
Princeton theological seminary.
ERSKINE, Mason, clergyman, b. in New York city, 16 April, 1805; d. there, 14 May, 1851. He was graduated at Dickinson in 1823, while his father, Rev. John M. Erskine, was president of that institution, and studied theology in Baltimore. He was licensed to preach in 1826 by the 3d Presbytery of New York, and in May, 1827, was installed pasto- ral of Springfield, Clark County, Indiana. In 1829 he was then called to the pastorate of Bleecker street Presbyterian church in New York, and was installed on 10 Sept., 1830. In February, 1836, he became professor of ecclesiastical history in Union theological seminary, New York, and held that chair till 1842. He published several sermons, and after his death a collection of them appeared under the title "A Pastor's Legacy," with a biographical memoir by Rev. William Adams (New York, 1853).

ERSKINE, Robert, scientist, b. in Scotland, 7 Sept., 1835; d. in Ringwood, N. J., 2 Oct., 1870. He was the son of the Rev. Ralph Erskine, of Dunfermline, Scotland, author of "Gospel Songs" and "Scripture Songs," and for his scientific researches was elected a member of the Royal society. He afterward came to this country and became geologist in California. He was appointed a lieutenant-colonel. He was sent to America with the appointment of brigadier-general, and commanded the 7th brigade in the battle of Long Island in 1776. Subsequently he was second in command of Gov. William Tryon's marauding expedi- tion. He published several sermons, and after his death a collection of them appeared under the title of the 17th century; d. in Salutacura, Mexico, 15 May, 1708. While very young he was taken to New Spain by his father, who had been appointed attorney of the audiencia or supreme court of Mexico. There the boy entered the college of San Ildefonso, first in 1771. His studies there set out with fifty Spaniards and some thousands of Indians to take revenge. A battle ensued, in which the Spaniards were victorious, but with the loss of seven men, among them Escalante himself.

ERSKINE, Sir William, British soldier, b. in England in 1728; d. on 9 March, 1795. He entered the Scots greys in 1743, and became a cornet at Fontenoy. In March, 1763, he was made a major in the 15th light dragoons, and served with great credit in Germany; and in 1768 he was promoted to the rank of lieutenant-colonel. He was sent to America with the appointment of brigadier-general, and commanded the 7th brigade in the battle of Long Island in 1776. Subsequently he was second in command of Gov. William Tryon's marauding expedi- tion. He published several sermons, and after his death a collection of them appeared under the title of the 17th century; d. in Salutacura, Mexico, 15 May, 1708. While very young he was taken to New Spain by his father, who had been appointed attorney of the audiencia or supreme court of Mexico. There the boy entered the college of San Ildefonso, first in 1771. His studies there set out with fifty Spaniards and some thousands of Indians to take revenge. A battle ensued, in which the Spaniards were victorious, but with the loss of seven men, among them Escalante himself. 

ESCALANTE Y COLOMBES, Manuel, Mexican bishop, b. in Lima, Peru, about the middle of the 17th century; d. in Salutacura, Mexico, 15 May, 1708. While very young he was taken to New Spain by his father, who had been appointed attorney of the audiencia or supreme court of Mexico. There the boy entered the college of San Ildefonso, first in 1771. His studies there set out with fifty Spaniards and some thousands of Indians to take revenge. A battle ensued, in which the Spaniards were victorious, but with the loss of seven men, among them Escalante himself.

ERVIN, James, lawyer. b. in Williamsburg, district, S. C., 17 Oct., 1778; d. near Darlington Court-House, S. C., 7 July, 1841. He was graduated at Brown in 1797, studied law with W. D. Hames, and was admitted to the bar in Columbia in November, 1800. He was elected to the legislature in the same year, re-elected in 1802, and served until 1804. Meanwhile he had entered on his practice in Peelee county, and was solicitor of the northern judicial district from 1804 till 1816. He was then elected to congress as a supporter of the tariff, and served from 1 Dec., 1817, till 3 March, 1821. Failing health led to his declining a re-election. From 1809 till 1817 he was a member of the board of trustees of the South Carolina college.

ERVING, George W., diplomatist, b. in Boston, Mass., in 1771; d. in New York city in July, 1850. He was a son of George Erving, who, during the Revolutionary war, went to Halifax and thence to London, and sent his son back to the United States after educating him at Oxford. Mr. Erving was made a member of the American Legation in 1804 and was appointed special envoy to Spain, where he remained for six years. In 1611 he was commissioned special minister to Denmark, and charged with the subject of spoliations committed under the Danish flag on the commerce of the United States from 1814 till 1819 he was United States minister to Spain.

ERWIN, Alexander R., clergyman, b. in Loui- siana, 12 Jan., 1820; d. in Huntsville, Ala., 10 Jan., 1860. He was licensed to preach in the Methodist Episcopal church in 1840, and joined the Tennes- see conference in 1844. He occupied a high rank in the ministry, presided over the Clarksville female academy and the Huntsville female college, and while stationed in Nashville received the degree of D. D. from Nashville university.

ESCALERA, Antonio, Spanish soldier, b. in the 16th century; d. in 1510. He was one of the adventurers that accompanied Hernan Cortes in his expedition to Mexico. When Cortes founded Villa Rica de Vera Cruz on the spot where he had disembarked, Escalante was appointed high constable, and discharged the duties of that office in the absence of the general-in-chief. By order of Cortes, he destroyed the ten vessels that formed the Spanish fleet. When Cortes marched to Mexico he left Escalante with 150 men to guard the newly founded city. Shortly after this an Aztec chief, called Quaquapech, a wrangler, wished to go to pay homoge- nously to the Spaniards, obtained from Escalante a guard of four soldiers to protect him from the hostile tribes he would have to encounter. Two of the soldiers were able to reach Vera Cruz, but the others were ambushed. Escalante then set out with fifty Spaniards and some thousands of Indians to take revenge. A battle ensued, in which the Spaniards were victorious, but with the loss of seven men, among them Escalante himself.
stones. After Díaz Molgarejo assumed command, Escalera continued in his work of conquest, engaged in a nine months’ campaign against the Guanany Indians, founded several forts, and in 1570 returned to Ciudad Real. After that date Escalera retired to the exercise of his ecclesiastical duties, and wrote several memoirs relating to the conquest and the natural products of the country. Previously, in 1556, he had sent to Charles V. a report of Tiral’s behavior, and one to the prosecutor for the council of Indies. His writings have been published by the Madrid Academy of History.

ESCALONADA, Juan (es-ca-lo-nah), South American soldier, b. in Caracas, Venezuela, in 1798; d. there in 1834. He joined the revolutionists in 1810, and on 5 July, 1811, as president of the federal executive, he declared the independence of Venezuela to the republican soldiers. He assisted in reconquering Venezuela in 1813, and in 1814 defended Valencia till obliged to surrender to Boves, who put citizens and soldiers to death on entering the city. Escalona escaped to Caracas, where he hid himself, but continued to encourage the revolutionists by his writings. He returned to the seat and became a favorite of the revolutionary faction, and was elected commander-in-chief of Venezuela, relieving Gen. Paez, who had been suspended by order of the senate pending an official investigation. After the restoration of public order in 1827 he resigned his commission, but continued in the service of the government till 1830, when the republic of Columbia was dissolved. After Venezuela had become a separate country he was made prefect of Caracas, and as such was instrumental in suppressing an insurrection in 1811.

ESCALONADA Y CALATAYUD, Juan José, South American bishop, b. at Quer, Rioja, Spain, in 1765; d. near Valladolid, Mexico, 23 May, 1797. He studied at the colleges of San Jeronimo, Alcala, and San Bartolome, Salamanca, and subsequently was theologian, regular, canon of the cathedral of Calahorra, and chaplain of the royal convent of La Encarnacion of Madrid. Afterward he occupied the see of Caracas, Venezuela, where he remained for a short time, and was translated to that of Valladolid de Michoacan in 1792, where he was bishop till his death. He gave large sums to various churches, finished at his expense the convent of Santa Catalina, built the Episcopal palace and the church of Nuestra Señora de los Urdiales, as well as a part of that of San Jose, and the hospital of the Guadalupe shrine. He also finished the most costly part of his cathedral, founded a college for girls, and a home for women of good character, made many endowments for poor married women and for nuns, and often distributed clothing among the needy. One of his pastoralis is entitled “Instrucción para una vida perfecta.”

ESCANRON, Antonio (es-can-don), Mexican capitalist, b. in the city of Mexico, 23 Aug., 1825; d. in Paris, France, 14 Jan., 1882. He began life as a merchant and manufacturer, and afterward became a banker. His thorough knowledge of the trade of his country soon led him to understand the importance of a better communications between the capital and the principal port of entry, Vera Cruz, and he was active in building the railroad between those points. The road was begun in 1861, and opened by President Lerdo de Tejada, 1 Jan., 1873, and is considered one of the triumphs of modern engineering skill. During the tempest Escondon accepted the decoration of the order of Guadalupe, and frequented the imperial court, and on the eve of the downfall of Maximilian went to Paris, where he stayed until the beginning of 1877. During his residence there he ordered from the sculptor Charles Cordier a statue of Christopher Columbus, which he gave to his native city. The monument is nearly forty feet high; the statue itself represents Columbus with one hand outstretched, while with the other he lifts a veil, uncovering a globe. On the four corners of the pedestal are seated four monks—Diego de Puebla,turning over the leaves of the Bible to see if it contains any text opposed to the mariner’s idea; Juan Perez de Marcana, studying a chart and measuring with compasses the distance between Spain and the New World; Bartolome de las Casas, preparing to write the defence of the Indians whom he mainly sought to protect against the cruelty of the conquerors; and Bernardino de Sahagun, holding aloft the cross, on which the Indians are prostrated. The four sides of the pedestal contain bas-reliefs representing scenes from the conquest of America, and the chart used by Columbus. Escondon came to Mexico in 1877 to see this monument unveiled, and returned in 1878 to Paris, where he remained till his death. Escandon built a country house, about 1860, at Tacubaya, the gardens of which are among the finest in America, while the building contains fine collections of natural history.

ESCOBAR, Bartolome de, b. in Seville, Spain, in 1562; d. in Lima, Peru, in 1624. He belonged to one of the noblest families in Spain, and had immense possessions, which he employed in works of charity. His religious zeal led him to the West Indies, where he became a Jesuit and lived seventeen years. He afterward went to Lima, Peru, where he spent the three years preceding his death. His works are “Conciones de Christi testament” (Lyons, 1617); “De Festis Domini” (Paris, 1624); “Super omnes Beatae Virginis festivitates” (1624); and “De la Concepcion de Nuestra Sehora” (Oviedo, 1625).

ESCOBAR, Maria de (es-co-bar), Spanish colonist, b. in Truxillo about the end of the 15th or the beginning of the 16th century; d. in Cuzco, Peru, about 1560. She was the wife of Diego de Chaves, one of the companions of Pizarro, and one of the few officers who had the courage to protest against the execution of Atahualpa in 1533. Maria followed her husband to Peru, shared the fatigues and dangers of the Spaniards, and introduced the cultivation of wheat and barley into the conquered country. The first experiment was tried on a small estate near Cuzco with few grains brought by her from Spain, and in a few years there was sufficient grain to furnish seed for all the colonists of the different provinces. Maria
taught the Indians personally how to cultivate the grain, and after the death of her husband in Lima, about 1540, Pizarro granted her a fine piece of land near Lima, together with the Indians upon it. The grateful colonists resolved to clear the land and cultivate it for her during ten years, but it seems that they soon forgot their promise, as Maria is said to have died very poor in Cuzco.

ESCOBAR, Pedro Suárez de, Spanish theologian, b. in Medellin, Spain; d. in Tlayacapec, Mexico, in 1591. He belonged to the order of St. Augustine, which he entered at the age of thirteen in Mexico. After having mastered the Matuzian language, he devoted himself to preaching the gospel to the Indians, and was successively first theologian of the cathedral of that city, professor of the Scriptures in the university, prefect of his province, prior of several convents, and bishop of Guadalajara. His works include “Escuela del Pájaro celestial,” “Silva de la perfección evangélica,” “Relox de principios,” and “Sermones de los evangelios de todo el año” (4 vols., Madrid, 1601).

ESCOBECHO, Mariano, Mexican soldier, b. in Dos Arroyos, Gualeana, state of New Leon, in January, 1829. He was of humble parentage, and as soon as his age permitted he became a muleteer. At that time Mexico had no railroads, and scarcely any good highways, but merely mountain-paths, especially near the Texas frontier, where the muleteers were at the same time traders and smugglers. Escobedo was in charge of a string of pack mules belonging to his father when the war with the United States began; and when Gen. Zachary Taylor marched against Mexico, crossing the river Nueces, Escobedo converted his muleteers into partisans, and attacked the American forces wherever he could meet them in small bodies. He also took part in the fight at the Cañon de Santa Rosa, and in the battles of Palo Alto and Resaca de Guerro, and in the rest of the campaign in the northern states. After the peace of Guadalupe Hidalgo, in 1848, Escobedo retired again to his former life in the country; but when, in 1854, the revolution of the “Plan de Ayutla” broke out, he offered his services to the Liberal party, was appointed captain of a company, and, together with Geronimo Treviño, Francisco Naranjo, and Diodoro Corella, who afterward became notorious, contributed, in 1855, to the defeat of Guittian at Saltillo, and of Parrodi in Morterillos. His name first became known during the three years' war called the “war of the reform,” when he again fought for the Liberal party against the forces of Maximilian. Escobedo ap-

ESCOBEDO

ESCOBEDO Y ALARCÓN, Pedro José Alcántara, Mexican physician, b. at Queretaro, 19 Oct., 1798; d. in Jalapa, 28 Jan., 1844. He was graduated at the University of Mexico, and studied medicine there and in the University of Leyden, and at the San Andres hospital. He was one of the founders of the Academy of practical medicine, and occupied the special chair of surgery there in 1826-8. In 1833 he joined the medical staff of the military column established at Jalapa, and rendered valuable service from 1829-44. In 1844 he labored to improve the institution under his direction, established boards of health, and, with a credit which he obtained from the government, facilitated the printing of the "Farmacopea Mexicana." He spent his salary in books and instruments for the college of medicine, in which he took great interest. Dr. Escobedo was for some time in congress, and was a member of several societies in Mexico and Europe. He was the author of many treatises and articles on medicine.

ESCOBEDO Y ALARCÓN, Jorge, Spanish jurist, b. in Jaen, Spain, in February, 1748; d. in Madrid in March, 1806. He entered the college of Cuenca in 1762, and afterward studied law at Salamanca, where he in 1769 passed the examination of the especial grade of legal philosophy. In 1776 he was sent to Peru by the king as judge of the superior court of Charcas. Afterward he was appointed political and military governor of Potosí, and was superintendent of the mint, the bank, the mines, the taxes, and of the royal treasury. In 1779 he incorporated the government bank of purchases and barter, which, under Escobedo's direction, yielded a large revenue to the exchequer, and provided for the wants of the miners. He defended Potosí during the Revolution of 1780, organizing the troops in that city, and ordering the casting of cannon and the manufacture of arms. He was then appointed criminal judge of the supreme court of Lima, and in 1782 Charles III. made him inspector of the courts of justice and royal treasury of the vice-royalties of Lima and Buenos Ayres, and superintendent subordinate delegate of the treasury, in which capacity he was placed in the honorary rank in the council of the Indies. He was also appointed political governor of Lima, and from 1785 till 1787 presided over the city corporation. In that period he founded the superior junta of the treasury, of which he was president. In all these public functions he introduced many reforms, and at the same time co-operated in the pacification of Peru. In February, 1788, he returned to Spain, and soon afterward was elected president of the supreme council of the Indies.

ESCOBEDO
ESCUDERO, José A. (es-tseh-day'-ro), Mexican judge, d. in Chihuahua, 3 May, 1862. He received his education in his native town, and in 1835 was appointed chief clerk of the secretary of state of Chihuahua. He afterward became supernumerary member of the supreme court, and magistrate of the same body. After receiving his degree at Guanajuato, he was admitted to the bar in the city of Mexico, and was appointed judge for the district of Chihuahua, which office he held for ten years. He represented his native city in five state legislatures, was twice elected to congress, and was afterward prosecutor to the supreme military court. Escudero was a member of congress in 1847, a year of severe trials for Mexico, and it distinguished himself by his patriotism. He was the author of some economic studies on the general history of various states, and his pamphlets are "Cón- ducta del jefe político de Chihuahua"; "Manual del Cultivador"; "Manual del Viñador"; "Orde- nanzas de tierras y aguas"; and "Recopilación de los decretos y órdenes del rey D. Fernando VII."

ESGLIS, Louis Philip Marieauch d', Cana-dian bishop, d. in L'Ile d'Orleans, Canada, 4 June, 1788. His name was submitted to the court of Rome by the Canadian government as its choice for coadjutor bishop of Quebec in 1770. He had been previously parish priest of L'Ile d'Orleans for seventeen years. He was a man of few words on the subject of war, and with a mild character, and it was supposed by the Canadian clergy that the object of the governor-general in selecting him for the office was to weaken the church. Their resistance, however, and that of the titular bishop, Briand, was feeble. He was consecrated on 17 May, 1729, under the name of Doryleus in partibus. Immediately after his consecration he was sent back to his parish by Bishop Briand, who refused to admit him to any share in the government of the diocese. But in 1774, at the request of the governor-general, he recognized him as coadjutor of Quebec, and assigned him a revenue suitable to his rank. In 1784 the resignation of his predecessor made him bishop of Quebec. The priests of his diocese, who were persuaded of his unfitness for the office, asked him to name a coadjutor, which he did, and then retired to the presbytery of Saint Peter in L'Ile d'Orleans, where he resided until his death.

ESCHLEMAN, Isaac Stauffer, physician, b. in Lancaster county, Pa., 22 May, 1820. He was graduated at Jefferson college, Philadelphia, in 1841, and began practice at once in that city. He claims to be among the first to use stimulants in pneumonia, and also to have proved that blisters are not revellents, but stimulants. He found that cerebro-spinal meningitis yielded to free depilition if made use of early in the stage, and followed by chlorosis taken internally. This was prepared for him by the use of chloral, which he has successfully prescribed in every form of convulsion. In 1866 he used with success a narrow-blade forceps for rigid obstetrical cases, having failed with the usual remedies, and without an unpleasant symptom the delivery took place. He claims that fractures which involve the joints where the callus is washed by synovial fluids are capable of forming good bony union if well adjusted and kept in apposition for a much longer period than usual. Dr. Feshelman is the author of pamphlets on originality of proof in practice of medicine. He opened a new era in the treatment of osteoarthrosis. He is vice-president of the Philadelphia county medical society, member of the Northern Pacific medical society, and a member of the Medico-chirurgical society of Philadelphia.

ESLABA, Sebastian (es-lah'-bah), Spanish soldier, b. in Eguiller, Spain, in February, 1698; d. in Madrid in January, 1759. In 1723 he served with distinction as captain of the Spanish guards, and as colonel of the regiments of "Asturias" and "Castilla." He took part in nearly all the battles of the second reign of Philip V., reaching the rank of lieutenant general in 1738. At the beginning of the war between England and Spain in 1740, Elsaba was appointed viceroy of New Granada, and immediately after his arrival set to work to repair the old fortifications of Carthagena and Portobello, and to build new ones. Early in November the most powerful British fleet that had ever been sent to South America appeared before Carthagena, under the command of Commodore Monckton, and on 5 November the bombardment began. Notwithstanding that Sir Edward made continuous attacks by land and sea on Carthagena during the prolonged siege, the splendid fortifications withstood the bombardment, and repeated assaults were repulsed by Elsaba, his son, and several British warships were forced to raise the siege with the loss of seventeen ships. As a recompense for his services, Elsaba was promoted captain-general of the army, and in 1743 was made viceroy of Peru, but did not go to fill this place, as he was called to Spain early in 1744 to become minister of war, and held this office for several years. The splendid fortifications of Carthagena, built under his personal inspection, exist to this day nearly intact. After his death, in 1769, Charles III, in memory of his brilliant defence of Carthagena, raised his son, Col. Gaspar Elsaba, to the peerage of Plasencia and Castilla, under the title of "Marquis of the Royal Defense."

ESLING, Catherine Harbeson, poet, b. in Philadelphia, Pa., 12 April, 1812. She contributed to the press for many years under her maiden name of Waterman, and in 1840 married George Esling, a captain in the mercantile marine, with whom she lived in Rio de Janeiro for four years before his death. She has published "The Broken Bracelet, and Other Poems" (Philadelphia, 1860).

ESLING, Charles Henry Augustin, author, b. in Philadelphia, Pa., in 1845. He was educated in St. Joseph's college, Philadelphia, and Georgetown college, D.C., and was admitted to the bar in 1869. He was invited to act as representative of the Catholic laity of the United States at the Vatican on the celebration of the golden jubilee of Pius IX., in 1877, and on his return to America he was appointed editor of the "Catholic Record," and other magazines dealing with the religious questions of the day, and has published the "Life of Saint Germaine Cousin, the Shepherdess of Pilbrae"; metrical translations from the hymns of the "Roman Missal and Prayer Book"; and several poems, religious and secular, the longest being "The King's Ring, a Legend of Merry England."

ESMENARD, Joseph Alphonse, French poet, b. at Pelissane, France, in 1770; d. near Fondi, Italy, in 1811. He was elected deputy to the national assembly in 1790, and soon became noted
as a royalist writer in the public papers, for which reason he was banished in 1792. In 1797 he returned to France, but was exiled again, and was not permitted to return till 1801. In 1801 he was appointed secretary to Gen. Leclerc, brother-in-law of Napoleon Bonaparte, whom he accompanied in his expedition to Santo Domingo, and remained there after Leclerc's death. On his return to Paris he was appointed censor of the theatres and libraries under Gen. del Rio, in the ministry of police, and in 1810 he became a member of the Academy of sciences. He published a didactic poem of eight cantos, "La Navigation," containing exact descriptions of the scenery of tropical seas and the landscapes of Santo Domingo (Paris, 1809); and also wrote the text for the opera of "Trajanus," by Lesueur (1807), and that of "Hernan Cortes," by Spontini (1809). A satire against the Russian emperor, Alexander I. (1811), caused his banishment to Italy, but he was recalled after three months, and was killed while returning.

ESPADÁ, Juan D. Díaz y Landá (es-pah-dah), Cuban bishop, b. at Alava, Spain, 20 April, 1756; d. in Havana, 13 Aug., 1833. He studied at the University of Salamanca, where he received sacred orders. He was appointed bishop of Havana in 1795. In 1810, and in his office till 29 Feb., 1802. During thirty years Bishop Espada contributed actively toward the progress and welfare of the island. In 1804 he caused a vast public cemetery to be laid out in Havana, the first one ever established in the island, and it was subsequently named after him. In 1806 the cities and towns of Cuba were also provided with cemeteries, abolishing forever the old and unhealthy custom of burying in the churches or near them. During the first decade of the century Bishop Espada encouraged vaccination, which had been introduced in the island in 1801, and endowed many public schools out of his own revenues, founded in 1827 an asylum for the insane, and paid much attention to the improvement of the morals of the clergy. He was indefatigable in his efforts to promote public instruction, and introduced many useful reforms in the theological seminary of San Carlos, and in the University of Havana, where he created several new cathedras. In 1833 a memorial of Bishop Espada was published, to which the best writers of Cuba contributed. In 1860 his remains were transferred, with great pomp and solemnity, from their old resting-place to the new cemetery near Havana, where a fine monument has been erected to his memory. A street in Havana bears his name.

ESPADERO, Nicolás Ruiz (es-pah-day-ro), Cuban musical composer. b. in Havana, Cuba, in 1813. He was a friend of Gottschalk and of Fon-tana, and acquired a remarkable mastery of the piano. Gottschalk says of Espadero: "He has written with such a freshness of melody, an elegance of harmony, a sonority and knowledge of the piano, that a prominent place is insured for him among the multitude of modern composers." In 1876 Espadero was commissioned to collect and classify the unpublished works of Gottschalk. Among his principal productions are "La chute des feuilles," "La Plante du Poete,""Sur la tombe de Gottschalk," "Chant de l'ame," "Oseian," "La Canto de la vida," "Adorando al virgen Maria," besides many barcarolles, nocturnes, and songs. See "Biographie universelle des musiciens" (Paris, 1881).

ESPARTERO, Baldemoro (es-par-tay-ro), Spanish soldier, b. at Granada, Ciudad Real, 27 Oct., 1793; d. in Leghorn, Simi, 5 Jan., 1873. He was the son of a peasant, and destined for the church; enlisted as a soldier in 1809, and took part against the French in the battle of Oscañas on 19 Nov. of that year. Afterward he entered the military academy of Iala de Leon, where he was graduated, 12 Jan., 1812, as ensign of engineers, but, failing to pass subsequent examinations, was transferred to the infantry, and took part in the blockade of Tortosa, 1 of 10 and 11 Feb., 1816, and on 1 Aug., 1817, was promoted major. In 1820, while in temporary command of his battalion, at Oruro, he succeeded, by prompt action and personal valor, in quelling a revolt, and thus prevented this important town, with a large deposit of ammunition and arms from falling into the hands of the republicans. For his behavior on this occasion he was promoted lieutenant-colonel of his battalion, 20 Feb., 1821. He was brevetted colonel, 23 May, 1822, and toward the latter part of the year joined the division of Gen. Valdes, operating in the southern coast-disticts against the insurgents under Gen. Alvarez. On 19 Jan., when at the head of his battalion, he was the first to take possession, under the enemy's fire, of the heights of Valdivia, where the bloody battle of Torata was fought. Here Espartero, although repeatedly wounded, sustained himself against superior forces with great bravery. On 21 Jan., notwithstanding his wounds received at Torata, he took an active part with his battalion in the operations of Valdes's brigade against the enemy's right wing at Moquegua, and on 1 Feb. was promoted by the vice-roy to the full rank of colonel. He afterward took part in Valdes's campaign against the northern provinces, and also in the unlucky battle of Zepita, 20 Aug., 1823. In September, Espartero was promoted to brigadier-general, and soon afterward commissioned by the viceroy, La Serna, to go to America for a conference with the Argentine general Las Heras, respecting an armistice proposed by the Spanish government. On his return, at the end of January, 1824, he was sent to upper Peru to suppress the revolt of Gen. Pedro Olaleta, and on 5 June sailed for Spain, to explain and justify La Serna's conduct, and in making rapid promotions, which had been the cause of Olaleta's disaffection. He had a long audience with Ferdinand VII., and was so skilful in his representations that all the acts of La Serna were approved, and Espartero himself appointed chief of the general staff of the army of Peru. He arrived in the port of Quilca, 4 May, 1825, after the overthrow of the Spanish
in Peru, and was arrested by the republican authorities, but found means to throw overboard the official correspondence intrusted to him. He was sent as a prisoner to Arequipa, and it was generally believed that he would be shot in reprisal for the execution of republicans, but he was subsequently released, and returned to Spain in 1829. He did not return to Mexico until 1840, when he was made chief of the regiment of Soria. He favored the succession of Isabella II. to the throne, and the appointment of Queen Christina as regent, and at the beginning of the civil war, after the death of Ferdinand VII. in 1833, he was made commander-in-chief of the province of Biscay, and afterward lieutenant-general. In his operations against the Carlists he displayed energy and ability, and was appointed general-in-chief of the army of the north, viceroy of Navarre, and captain-general of the Basque provinces. After new victories, early in 1839, he was created a grandee of the first class, with the title of Duke of Victoria and Morella. In August, 1839, he concluded with the Carlist general Maroto the convention of Vergara; Don Carlos left the country, and Cabrera, the only Carlist general remaining in arms, was defeated by Espartero in the same year. Queen Christina endeavored to strengthen her government by placing Espartero at the head of the ministry; and when, in 1841, she was compelled to resign the regency, he was appointed regent by the Cortes. During his administration he suppressed various insurrections; but, notwithstanding his energy, a revolutionary junta assembled at Barcelona in 1843, declared that the queen had attained her majority, and, when Narvaez entered Madrid at the head of an army, Espartero was forced to yield to the Cortes, and in 1847 he was restored to his honors, and lived in Logroño in retirement till 1854, when he was placed by Isabella at the head of the ministry, but resigned in July, 1856. After the expulsion of Isabella in 1868 he supported the provisional government, and in 1870 several members of the Cortes offered him the crown of Spain, but he declined it on the ground of his great age and want of heirs. He was afterward created prince of Vergara.

ESPEJO, Antonio de (es-pa'-ho), Spanish explorer, 1817-1852, native of Spain (some say in Léon, in about the middle of the 1817, he was a captain of the army in Mexico, when in 1852, after organizing a special force of one hundred horsemen and a corresponding infantry detachment, almost at his own expense, he undertook, in company with Father Bernardino Beltran, a journey in search of the Franciscan missionary Agustin Ruiz. After travelling several days toward the north, he met some natives who had been converted during the expedition of Panfilo de Narvaez to Honduras in 1528. The people among whom these lived, the Ju- names, were so far away for civilizing that they inhabited houses of stone. Shortly afterward he learned that Ruiz had been killed, but pushed on toward the east, and, after marching through a fertile country, reached the territory of the Cunames, whose capital, Cia, possessed "eight public markets," and for a distance of twenty leagues divers colors, and the inhabitants wore beautiful cloaks of cotton, woven in the country. Five leagues northwest of this he found the Amayes, who had seven cities, and afterward visited the town of the Acomas, situated on an almost perpendicular cliff, considered a desirable fortress; by the generous stairs cut in the stone. After journeying eighty leagues farther, he reached the country of the Zunis, where he met three Spaniards who had accompanied the expedition of Vasquez in 1549, and who had lived so long with the Indians that they had almost forgotten their native tongue. Here Father Beltran, with most of the party, left Espejo and returned to Mexico, but he pushed on with but nine followers, and reached the town of Saguate, whose inhabitants lodged him sumptuously and gave him all the clothes he had worn, and through the land of the Quires, which contained 25,000 inhabitants, and abounded in mines. The natives wore cloaks of cotton or of painted skin, and lived in houses four stories high. The forests abounded in game, the rivers in fish; and in the valleys grew maize, melons, flax, fruit-trees, and vines. But he soon encountered the Tamos, who refused to let him proceed through their territory, and, turning back, he journeyed along a river which he named "Rio de las Vacas," from the cattle on its banks. He reached San Bartolome in 1853, after a journey of nine months. He left a work entitled "Relación del viaje al Nuevo Méjico" (1836).

ESPEJO, Jeronimo, Argentine soldier, b. in Mendoza in 1801. At the age of fifteen he entered the Army of the Andes as a cadet, and fought bravely for the liberal cause. In 1833, notwith-
withstanding Pedrarias's strenuous opposition. In the beginning of 1518, Pedrarias, to get rid of Espinosa, sent him with a force of 150 men on an expedition against the natives of Tumaco. The narrative is still highly esteemed on account of its exactitude, and in it the author contradicts the stories regarding the gigantic stature of the Patagonians, which he never found to be above six feet three inches.

This publication, as it was not contradicted by De Gennes, turned the tide of public opinion in Espesleta's favor, and the king, toward the end of 1698, made him a knight of Saint Louis, and in January, 1099, lieutenant-general and governor of the colony of Saint Louis, with power to found other French colonies in the South sea. Espeleta sailed again on 11 March, 1703, with 180 solano, and 340 colonists. On his arrival in Saint Louis he found the colony a prey to famine and at war with the Patagonians. He promptly concluded peace with the Indians, set the colonists to clearing and cultivating the land, and in a few years they became very prosperous, and a new colony was founded at Port Gallant. The vessels which he sent to France laden with colonial produce were twice captured by the British, and Espeleta conducted the third expedition himself. After his return in 1715, hostilities with the Patagonians broke out again, and in one contest fought near Camas, but his death was the ruin of the colony, and although his deputies continued to hold out for a year, the colonists became disheartened, and, after blowing up the fort, returned to France. Maite Brun says, in his "Geographic general" "Espeleta's death was a great loss for France, as he certainly would have founded, in the course of time, in South America a vast colonial empire for France, if he had been properly supported by his government."

ESPINOZA, Gaspar de (es-pe-no-a), Spanish soldier, born in Medina del Campo, in 1484; d. in Cuzco, Peru, 14 Feb., 1537. In 1514 he came to Darien with Pedrarias Davila as supreme judge of the expedition, and in that capacity preceded the first trial of Balboa, Davila's predecessor. (See BACBA, BASCO Y NUNES DE.) When Pedrarias left the colony of Darien, called Pororosa, he ordered Espinosa to leave Acla with an expeditionary force of infantry and cavalry. He attacked a body of 3,000 Indians, and, after an obstinate flight, they fled, frightened by the horses and the blood-hounds that the Spaniards carried with them. The victors did many cruelties against the Indian prisoners, and on the arrival of reinforcements from Pedrarias he invaded the Indian territory still farther, and recovered a great part of the treasure that had been abandoned some time before by Gonzalo de Badajos, amounting to about 80,000 gold castellanos. After defeating an army of 20,000 men with which the native cacique hoped to crush him, and conquering several other tribes, he began his return march to Darien, which he finally reached, with great riches and over 2,000 Indian slaves. Espinosa, preferring the adventurous life of a conqueror to that of a judge, soon started on another expedition, and, according to his assertion, explored many miles of the Pacific coast. On his return to Darien in 1517, he found that Balboa had been imprisoned a Pedrarias declared war against the Indian, and it as his opinion that that explorer ought to be pardoned in consideration of his services to the crown, he sentenced the prisoner to death on a written order from Pedrarias. Favored by the military for his generosity, and by the municipality of Darien on account of his successes in his expedition, Espinosa was proclaimed deputy governor of the island.

ESPINOZA, Juan, South American soldier, b. in Montevideo in 1804; d. in Arenas, Peru, in 1874. He was a wealthy merchant before his military career, and in this respect he was little inferior to his Mexican namesake. In the Argentine republics Espinosa is regarded as a national hero. His family emigrated to Buenos Ayres in 1807. His father was exiled in 1810 by the revolutionists, and the boy remained with his mother till he was twelve years of age, when he enlisted in the troops that left Buenos Ayres in 1816 to fight for the independence of Chili. Espinosa fought at Chacabuco, 12 Feb., 1817, and
Espinosa, Pedro, Mexican bishop, b. in Texas, 26 June, 1789; d. in the city of Mexico, 12 Nov., 1866. He completed his studies at the seminary of Guadalajara, and afterward occupied the chair of the Holy Scriptures at the university, where he received the degree of doctor of theology, and was consecrated bishop of Guadalajara and Huentitan. As sub-secretary of war, Espinosa shared in the encounter of Callao on 2 May, 1866. He left two works, "Herencia española a car de Isabel II," and "Diccionario republicano."

Espinosa, Pedro, Mexican bishop, b. in Texas, 26 June, 1789; d. in the city of Mexico, 12 Nov., 1866. He completed his studies at the seminary of Guadalajara, and afterward occupied the chair of the Holy Scriptures at the university, where he received the degree of doctor of theology, and was consecrated bishop of Guadalajara and Huentitan. As sub-secretary of war, Espinosa shared in the encounter of Callao on 2 May, 1866. He left two works, "Herencia española a car de Isabel II," and "Diccionario republicano."

Espinosa, Pedro, Mexican bishop, b. in Texas, 26 June, 1789; d. in the city of Mexico, 12 Nov., 1866. He completed his studies at the seminary of Guadalajara, and afterward occupied the chair of the Holy Scriptures at the university, where he received the degree of doctor of theology, and was consecrated bishop of Guadalajara and Huentitan. As sub-secretary of war, Espinosa shared in the encounter of Callao on 2 May, 1866. He left two works, "Herencia española a car de Isabel II," and "Diccionario republicano."
and devoted himself to the study of philosophy and theology, becoming distinguished as a professor and preacher. His learning procured for him among his countrymen the title of the "Lacordaire of America." He was so abashed by the praises that he received, that he retired among the mestizos among whom some time he had been brought up. He was sought out and nominated to the bishopric of Parana, but declined it, and retired to the missionary college of Tarija, in Bolivia, whence he was summoned by the archbishop, who made him professor of theology in the college of Sucre. Here he wrote the first scientific journal of the Spanish republic, called "El Cruzado," his articles in which attracted attention throughout Spanish America. His reputation led to his nomination as archbishop by the authorities of Buenos Ayres. He again declined, but fearing that he might be compelled to assume the office, he concealed himself, with the consent of his superiors, in different monasteries in Peru until it was filled by another. He then returned to his missionary college of Tarija. In 1875 he sailed for Europe to visit the Holy Land. While in Palestine the see of Cordoba became vacant, and he was ordered by the pope to return to South America and assume its duties. He entered Cordoba barefoot, in his Franciscan habit, and, after his consecration, continued to travel as a missionary from town to town throughout his diocese. He acted successfully as a preacher in the civil wars, and it was on the occasion of a journey in the heat of summer, to restore peace at Riosa, that he fell sick and died by the road-side.

**ESQUIVEL, Juan de (es-ke-vel), Spanish adventurer, b. in Spain about 1480; d. in Jamaica about 1519.** On the death of his friend Ovando, he was appointed to succeed Bobadilla as governor of Hispaniola, Esquivel went to the island as one of his lieutenants. In 1504 Ovando sent him, at the head of 400 men, to subjugate the province of Higuey, which had revolted under the leadership of the famous cacique Cotalaba. The Indians were defeated and driven to the mountains, but there was soon another insurrection, and Esquivel was again sent by Ovando to subdue the province. This was done after much bloodshed and the capture of the cacique, after which Esquivel founded in 1505, in the plains of the island, a convent which was afterward destroyed in the middle of the 18th century by an earthquake. Diego Columbus sent Esquivel, in 1509, with seventy men, to take possession of the island of Jamaica on his behalf. In 1508 he reduced it easily, and, in further obedience to his instructions, began a colony and founded the seat of government on the spot where Christopher Columbus had been shipwrecked in 1503, and named it Sevilla Nueva. The Indians betook themselves to the mountains, and stood on their defence; but Esquivel, after several engagements, found means at length to cut off the chiefs. The rest submitted, and were employed in planting cotton and grain. Esquivel introduced a Spanish breed of cattle, hogs, and horses, and several kinds of garden-stuff were cultivated. By the moderation of the continent and the influence of the Indians, it was compelled to be done under the rule of the word of God. Unfortunately, his rule was short. In the space of ten years, five vessels had been fitted out under his direction, and two new towns were established, which he named Oristan and Melilla.

**ESTAING, Charles Hector Theodat, Count d', French naval officer, b. in Ravel, Auvergne, France, in 1729; d. in Paris, 28 April, 1794.** At the age of sixteen he entered the Mousquetaires, became colonel of the regiment Rouergue in 1748, and brigadier in 1756. In 1757 he served in the fleet of Count de Grasse, and in 1768 took Goulphar and Fort St. David. He then joined the East Indian squadron under Count Lally, and was made prisoner at Madras in 1759, but was released on parole. After this he joined the navy, was given command of two men-of-war, and inflicted great damage on the French while in the east, but on his return was captured near L'Orient by British cruisers. He was imprisoned in Portsmouth and subjected to cruel treatment, on the ground that he had broken the parole that he had given in Madras. Admiral Boscau was then commander-in-chief in India, and often said that, if ever he should get "the villain" in his power again, he "would chain him upon the quarter-deck and treat him like a baboon." D'Estaing seems to have had equally bitter feelings against the English. In 1763 he was made lieutenant-general in the navy, and in 1778 vice-admiral, a rank which he had at first refused. Meanwhile the colonies in America had found an advocate at the French court in the person of Marie Antoinette, who placed in the hands of Louis XVI. a memoir prepared by the Count de Maillebois and D'Estaing, which censured the timid policy of the king's ministers. After the defeat of Burgoyne, 8 Feb., 1777, a treaty was concluded between the United States and France, and, pursuant to its stipulations, a fleet of twelve ships-of-the-line and large frigates, under the command of D'Estaing, sailed for America on 13 April, 1778. Early in July D'Estaing reached Delaware bay, and, after landing Conrad A. Gerard, the French ambassador, sailed for New York in hopes of engaging the British fleet, but, being unable to secure a pilot, anchored near the Jersey shore, not far from the mouth of the Shrewsbury river, where he captured several prizes. At the suggestion of Gen. Washington, the French fleet was requested to co-operate with Gen. John Sullivan in the expulsion of the British from Rhode Island. D'Estaing appeared at Newport late in July, and on 5 Aug., 1778, the British burned six frigates in order to prevent their falling into the hands of the French. Events seemed favorable for the capture of the islands, but the expedition into Newport, but delays and lack of proper understanding between the two commanders prevented united action. The appearance of the British fleet, and a subsequent storm in which several of the French vessels were seriously injured, led to their withdrawal to Bermuda, and the campaign terminated without success. In May, 1779, D'Estaing proposed a joint expedition with his fleet and the American troops to capture Halifax and Newfoundland for the king of France. Washing-
EStaugh could not afford to reduce his army by the required number of troops, and the enterprise was consequently abandoned. Later, D'Eestaing sailed to the West Indies, where, without order or plan, he attempted to take St. Lucia, he captured St. Vincent and Grenada, and also forced the British admiral, Byron—who came to the relief of Grenada—to retire. In September, 1779, with twenty ships-of-the-line and eleven frigates, bearing about 6,900 soldiers, D'Eestaing's fleet, composed of Georgean and Four British vessels at once fell into his hands, and a plan was arranged with Gen. Benjamin Lincoln for a united attack on the city of Savannah. The lateness of the season, the dangerous coast, and the reported approach of a British fleet, made it necessary for him to insist on immediate action; but unfortunate circumstances, with various delays, made it possible for the British to prepare themselves, and in consequence, the attack was postponed. Finally, on October 9, it was decided to carry the town by naval bombardment. In the meantime the Americans and French advanced in three columns, the principal one under the direct command of D'Eestaing, assisted by Gen. Lincoln. Early in the engagement the French commander was wounded both in the arm and thigh, and in this condition was carried to the ship. D'Eestaing's health now began to fail, and he was prevented from attending to the direction of the fortifications, and, after severe losses, withdrew. A second attack was urged by Gen. Lincoln, but D'Eestaing's loss had been heavy, and he determined on immediate departure, in consequence of which the siege was raised. He returned to France in 1781, and was reappointed to preside over the ministry to send 12,000 men to America as the best way of pursuing the war. Lafayette had given similar advice, and in June, 1780, Count de Rochambeau, with 8,000 men, was sent to the colony. In 1787, he resigned the command of the allied fleets of France and Spain, and was made a grandee of Spain. Subsequently he declared himself in favor of national reforms, and was elected in 1787 to the assembly of notables. In 1789 he was appointed commandant of the National guard, and was elected a deputy in 1792 by the legislative assembly, but was retired soon afterward. He continued to cherish a regard for the royal family, and wrote friendly letters to the queen, which came to the knowledge of the revolutionary authorities, and he was arrested and imprisoned. On the trial of 1797 he continued to hold his favor, and was almost without avail. He was himself brought to trial in 1794, and cited his military and naval services to the nation in his defence, but, seeing that his death was determined on, said, "Send my head to the English: they will pay you well for it." D'Eestaing wrote a poem, "Le rêve," a tragedy, and a pamphlet, "Aperçu hasardé sur l'exportation dans les colonies; dédié à feu M. Franklin" (Paris, 1790).|

ESten, James Christie, Palmer, Canadian jurist, b. in St. George, Bermuda, 7 Nov. 1805; d. in Toronto, Canada, 29 Oct. 1864. He was a grandson of a former attorney-general of the Bermudas, and his father was chief-justice of those islands for twenty years. The son was educated at the Charter House school, London, called to the bar in Lincoln's Inn in 1836, and to the bar of the Supreme Court of the United States for the Northwest territory, and his practice extended to the U.S. supreme court. In 1834 he was elected president judge of the ninth judicial circuit of Ohio, and in 1838 judge of the superior court of Cincinnati. On the expiration of his term in 1846 he returned to private life. D'Eestaing was an advocate of much force and skill, and a man of great research. In his long life he was singularly above reproach.

ESteryl, George, inventor, b. in Plattekill, N. Y., 17 Oct., 1809. He received a common-school education, and in 1827 removed to Wisconsin, where he engaged in wheat-growing. Finding difficulty in securing laborers, he turned his attention to the invention of agricultural machines. He experimented at first with a reaper, and, converting his barn into a machine-shop, produced in 1844 an improved device, in various stages of development ten acres of wheat in half a day. A year later he built a harvesting machine, and soon began to manufacture various agricultural implements. Subsequently he obtained numerous patents, and his establishment at Whitewater, Wis., has become one of the largest of its kind in the United States. His inventions include steel plows, a self-reaping reaper, reaper for harvesting without binding, and an improved broadcast seeder and cultivator. The use of steel in reapers and harvesters is his most important invention, and his machines are now considered of that metal. Mr. Esterly has written several pamphlets on the currency.
ESTEVEZ Y UGARTE, Pedro Agustín (es-ta'vet), Mexican R. C. bishop, b. in Oruro, Ca-
nary Islands, 8 March, 1854; d. in Merida, Mexico, 8 May, 1887. He studied theology, philosophy, and
literature in a Franciscan convent in his native island, and then entered the College of San Bar-
tolome and Santiago de Granada, where he won a first place in the humanities. Shortly
afterward he became rector of the college, and profes-
sor in the University of Granada. On 15 July,
1773, he received the degree of doctor in canonical
law. In 1770 he was ordained as a priest, and be-
came noted for the eloquence of his sermons. For
some time he was regent of the seminary of Zamora,
and on 27 July, 1796, was appointed by Charles IV, bishop of Yucatan, Mexico. He arrived at
Campeche in May, 1802; and immediately set about
remodelling the plan of studies in the seminary, in-
creasing its faculty and founding the chairs of
Greek and canon law. When Mexico became
independent he accepted the result of the contest
uneffectually, and, without mixing in politics, 
preached peace, union, and Christian fraternity. He
was the founder of the University of Yucatan,
which was opened in 1854.

ESTORGE, Joseph Leonard, physician, b. in
Opeiousus, La., in 1800; d. there, 21 Aug., 1889.
He studied at the royal college of Cahors, France,
where he was a classmate of Gambetta. After
receiving the degree of M. D., he was pursuing scien-
tific studies in Paris, when the war in 1840, the United States recalled him to this country. He
was appointed a surgeon in the Confederate army
in the trans-Mississippi department, but was made
a prisoner at Fort De Russy. After the war he
practised his profession in St. Landry, and endeared
himself by his skill and devotion during the
epidemic of 1878.

ESTRADA, Bartolome Ruiz de, Spanish pilot,
lived in the early part of the 10th century. He ac-
companied Francisco Becerra in the first voyage of
exploration he made, by order of Pedro de Davila.
Sailing from Cadiz with 150 men, he explored the
Pacific coast, visited the river Peru, and at the end
of six months returned with an immense quantity
of gold and pearls. It is also said that it was he
who conducted Pizarro and Almagro to the empire
of the Incas, as Atalaipa, which they called Peru, after
the river of that name.

ESTRADA, Jose Dolores (es-trah'-doh), Nicara-
guan general, b. in Matagalpa in 1787; d. near
Granada, 12 Aug., 1869. Up to his sixty-fourth
year he lived quietly in the country, occupied in
the cultivation of his estate, but in the civil war of
1851 offered his services to the conservative leader,
Fruto Chamorro, and enlisted under the same chief
against the democrats in the revolution of 1833.
He participated in the nine months' defence of the
city of Granada, and was wounded in the battle of
5 Feb., 1854; but not withstanding the enemy
raised the siege, Estrada, as second in command,
remained for twenty-four hours in the saddle in the
pursuit of the retiring army. When the re-
public was invaded by Walker and his followers in
June, 1855 (see WALKER, WILLIAM), Estrada did
himself the honor of his country, and after the
capture of Granada, 15 Oct., 1855, he retired with
a few followers to the southern department of
Chinandega, and continued, with Generals Martinez
and Fernando Chamorro, to oppose the forces un-
der Walker's command. After Walker had caused
himself to be respected in January 1856, and
declared war on the rest of the Central American
republics, Estrada marched with his little army to
join the Costa Ricans, but was intercepted by Walk-
er's forces, and intrenched himself in a favorable
position in San Jacinto. Early in the morning of
14 Sept., 1856, his position was stormed by the en-
emy, who attacked in three columns, and one of his
redoubts was taken. After many hours of fierce
fighting, Estrada saw that his forces would soon
be surrounded, and made a desperate sally at the
head of his troops. In general confusion they fled,
and were pursued as far as Tipitapa. After Walker had been driven from the
country, Estrada left the army, and although,
on the second invasion of Nicaragua by Walker, in
November, 1857, he offered his services again, he
refused all honors and offices, and took part in the
electoral campaign of 1863 only to avoid the unconsti-
tutional re-election of the last president. When
the revolution of 1869 began, Estrada, although
eighty-two years old, was appointed commander-
in-chief of the army, and defeated the revolution-
ists in several encounters, but, a few days before the
final pacification, he died in consequence of the
fatigue that he had undergone. The congress of
1870 ordered a marble monument to be erected on
his grave with the inscription "Al general Estrada,
concedor de San Jacinto, el 14 de Setiembre 1866 la
patricia agradecida."

ETHERIDGE, Emerson, statesman, b. in Car-
rituck county, N. C., 28 Sept., 1819. When thir-
ten years of age he removed to Tennessee, received
a public-school education, studied law, and was ad-
mitted to the bar in 1840. He was a member of
the legislature in 1845-7, and a candidate for speaker,
and was then chosen to congress as a Whig, and
re-elected an American, serving from 1853 till 1857. He was the defeated American candidate
for the next congress, but was successful in 1858,
and served again in 1859-60, when he was chairman of the committee on Indian affairs.
He was then elected clerk of the house of represen-
tatives, and served from 4 July, 1861, to 8 Dec.,
1863. On his return to Tennessee he devoted him-
self to the practice of his profession and the study
of philosophy, served in the Tennessee senate in
1869-70, and was twice nominated for the gov-
ernorship of his state, being defeated once and de-
clining the second nomination. He was the last
Whig that served in congress. He is the author of
"Speeches from Congress" (Washington, 1857).

ETTWEIN, John, Moravian bishop, b. in Tren-
denstadt, Wurttemberg, 29 June, 1721; died in
Bethlehem, Pa., 2 Jan., 1802. In 1754 he came to
the American colonies, where he lab-
ored for nearly half a century as an
evangelist, as a pastor, and finally
as a bishop of the Moravian church.
He was consecrated to the episcopacy on
25 June, 1784. In 1801, owing to the
infirmities of old age, he retired from
active labors, and after the death of Few men of the last century dis-
played greater zeal in spreading the
gospel through the country of his adoption. He
studied the language of the Delaware Indians, pre-
pared a small dictionary and phrase-book there-
of, and in 1788 gave an account of their language and traditions, including a vocabulary, since pub-
lished by the Historical society of Pennsylvania. He travelled thousands of miles, often on foot, and preached in eleven of the thirteen original colonies and in what is now the state of Ohio; "in cities," to use his own words, "in villages, in homes, from pulpit, in the open air, in court-houses and barns, to many and very different classes of men, and even among the Indians, and in 1772 led the Christian Indians from the Susquehanna to the Tuscarawas valley of Ohio, a journey of eight weeks, full of hardships and dangers, and ministered with great faithfulness to the sick of the American army, in 1778 and 1779, when the general hospital had been established at Bethlehem. Throughout the Revolutionary war he received, in the name of his church, the many distinguished visitors who flocked to that town, both military officers and statesmen. With some of the latter he became intimate. Henry Laurens, of South Carolina, was his particular friend. On various occasions he corresponded with Washington and negotiated with congress, as the agent of the Moravians. Not the least important act of his life was the founding, in 1787, of the "Society for Propagating the Gospel among the Heathen," which still exists, has a large endowment, and contributes liberal amounts toward the support of the extensive missions of the Moravian church. Ettwein stood at the head of this church as its presiding bishop for seventeen years, displaying sound judgment, great decision of character, and often, amid trying circumstances, a marvellous heroism. He was quick in expressing his opinions, and abrupt in his utterances; but upon closer acquaintance whatever seemed offensive was forgotten.

1777, when the general hospital was the extensive hospital of St. Joseph's Charity, b. in Dublin, Ireland, 18 April, 1816; d. near Emmetsburg, Md., 18 March, 1887. Her secular name was Catherine Blenkenosoff. She emigrated to the United States in early girlhood, and entered the novitiate at St. Joseph's academy, near Emmetsburg, Md. She was elected to the principal teacher in the academy, and was soon afterward transferred to St. Mary's orphan asylum, Baltimore, and appointed mother-superior. She was after several years returned to St. Joseph's, and appointed to the same place in the institution. At the end of the first three years of her direction she was appointed mother-superior of all the Sisters of Charity in the United States. Mother Ephemia, as superior of her order, made a tour through the south in 1866, and arranged for the establishment of two branch houses.

EUSTACE, John Skye, soldier, b. in Plushing, L. I., 10 Aug., 1760; d. in Newburg, N. Y., 25 Aug., 1805. He was graduated at William and Mary in 1776, and in the same year was appointed aide to Gen. Sullivan and Gen. Greene. Congress commissioned him major in the British army in 1779. He was in the British colony Burton. After the war he resided in Georgia, where he practised law and became adjutant-general of the state, and held other civil and military offices. In 1794 he entered the French service, was made aide-de-camp to Luchner, and after the French-Prussian war he voluntarily gave his services to the U. S. legation in Paris.—Another son, James Biddle, senator, b. in New Orleans, 27 Aug., 1834. He received a classical education, was graduated at Harvard law-school in 1854, admitted to the bar in 1856, and practised in New Orleans. He was a member of the state legislature in 1858. He entered the Confederate army, and, after one year's service, was a judge-advocate on the staff of Gen. Magruder, was transferred to the staff of Gen. Joseph Johnston, with whom he served till the close of the war. He then resumed practice in New Orleans, was elected a member of the legislature of the reconstruction acts, and was one of the committee sent to Washington to confer with President Johnson on Louisiana affairs. He was a member
of the state house of representatives in 1872, and was elected a member of the state senate for four years, during which he was chosen as a Democrat in January, 1876, to fill the vacancy which, it was claimed, existed by failure of the senate to give the seat to P. B. S. Pinchback, who had been elected in 1873. Only three Republicans took part in the election, on the ground that no vacancy existed, and Mr. Evans held the seat till late in 1877, serving till 1878. He then became professor of civil law in the University of Louisiana, but in 1884 was again elected to the U. S. senate for the full term of six years.—Abraham's son, Henry Lawrence, engineer at Fort Independence, was born, Mass., 1 Feb., 1819; d. in Cambridge, Mass., 11 Jan., 1885, was graduated at Harvard in 1888, and in that year was appointed to the U. S. military academy, where he was graduated at the head of his class in 1842. He was then assigned to the engineering corps, and ordered to Washington as assistant to the chief engineer. He assisted in the construction of Fort Warren and Lovell's island sea-wall, in Boston harbor, in 1843—5, and during the following two years was connected with engineering operations in Newport harbor. He was made a principal assistant professor of engineering at West Point, but resigned in 1849 in order to become professor of engineering in Harvard, and organized that department in the Lawrence scientific school there, and held this office until his death. He was dean of the scientific faculty from 1871 to 1873. In the civil war he was colonel of the 10th Massachusetts volunteers, and served at Williamsport, Fredericksburg, Marye Heights, Salem, Gettysburg, Rappahannock Station, Mine Run, Wilderness, Spottsylvania, Cold Harbor, and many minor actions of the war. He was a member of various learned societies, to whose transactions he contributed, and also wrote reports and technical articles.

EVANS, Anthony Walton White, civil engineer, b. in New Brunswick, N. J., 31 Oct., 1817; d. in New York city, 28 Nov., 1886. He received his early education in New Jersey, and then studied civil engineering at the Rensselaer Institute in Troy. His first professional employment was on the enlargement of the Erie canal, where he served principally on the eastern division. He was made assistant on the survey and construction of the New York and Harlem railway in 1843, and for five years was resident engineer of two divisions of this work. He then accompanied Allan Campbell to Chili, and became his principal assistant in the construction of the Capiapo railroad. Subsequently he entered the employ of the Chilian government as chief engineer in the construction of one of its railroads, and still later was appointed chief engineer of the Arica and Tacna railway company in Peru. After a brief visit to the United States, he returned to Chili, and became chief engineer on several railroads then in course of building under the direction of the government. On the completion of these he returned to the United States and settled in New Rochelle, N. Y., resuming his profession as a consulting engineer, and acting as purchasing agent of rolling-stock and other railway materials for various governments and mining companies of South and central America, and the islands of the South sea. Mr. Evans took an active interest in the matter of a ship-canal between the Atlantic and Pacific oceans, and favored the San Blas route. He was a fellow of the American society of civil engineers, and other societies both in the United States and in Europe. He was a member of the Society of the Cincinnati, and he prepared for this organization an illustrated memoir of Kosciusko, which was printed privately (New York, 1883).

EVANS, Augustus B. Jane, author, b. in Columbus, Ga., 8 May, 1825. When a child she was removed with her father to Texas, residing in San Antonio from 1847 till 1849, when the family settled in Mobile, Ala. She was educated almost entirely by her mother. While her parents lived in the frontier town of San Antonio the Mexican war was in progress, and that town was a place of rendezvous for the soldiers sent out to re-enforce Gen. Taylor. She afterward entered a school in Mobile, but did not return to her home. During the civil war Miss Evans was an active, zealous sympathizer with the Union cause, and was a principal assistant, an active agent of the Union league in her town. Her travels have been widely popular, especially in the southern states. She is the author of "Inez, a Tale of the Alamo," "Calamity, the novel that established her reputation (1850); "Macaria" (Richmond, 1863); "St. Elmo" (New York, 1886); "Vashii" (1879), and "Infeliz" (1878).

EVANS, Caleb, English clergyman, b. in Bristol, England, in 1787; d. in 1791. He was a Baptist clergyman, and received the degree of D.D. Dr. Evans was an advocate of American independence, and published "A Letter to Mr. Wesley," under the signature "Americanus," on his "Calm Address to the American Colonies" (London, 1775), and a "Reply to Rev. Mr. Fletcher's Vindication of Wesley" (Bristol, 1776).

EVANS, David Held, lawyer, b. in Westminster, England, 1769; elected to the House of Commons for the Fairfield district, S. C., 8 March, 1843. He came to South Carolina with his father in 1784, was educated at Mount Zion college, studied law, and was admitted to the bar in 1796. In 1800 he acted as second to Thomas Baker in a duel with Daniel Brown, in which both the principals were killed. He was a member of the legislature in 1800—4, was solicitor of the middle judicial circuit in 1804—11, and was then elected to congress as a Democrat, serving in 1813—5, and declining a renomination on account of failing health. He was in the state senate in 1818 and 1822, was its president, and became president of the Fairfield Bible society, and a ruling elder in the Presbyterian church for thirty years. He bequeathed $8,000 to benevolent societies.

EVANS, De Scott, artist, b. in Boston, Wayne co., Ind., 29 March, 1847. Graduated at Miami university, Oxford, Ohio, 1863—5, studied art by himself, and opened a studio in Cleveland, Ohio, in 1874, giving his attention to portrait-painting. After studying under Bouguereau in Paris, in 1877—8, he returned to Cleveland, and became instructor and co-director of the Cleveland Art Institute. He is specially skillful in painting dress figures. His genre pictures include "The First Snowfall," "Grandma's Visitors," "Day before the Wedding,"
and "The Flirtation." He has sent to exhibitions of the National academy in New York city "The Answer" (1881); "Old Clock" (1883); "Morning" and "Wading in the Brook" (1883); "Birthday Child" (1883); "Fair at the St. Mary's"; "A Perfect Pose" (1885); and "Love-Letter" and "Christmas Morning" (1886). He is now (1887) engaged on a picture of the Garfield family, entitled "Winter Evening at Lawnfield," to be placed in the reception-room of the Garfield monument at Cleveland.

EVANS, Charles Payson, scholar b. in Remsen, N. Y., 8 Dec., 1833. His father was a Welsh Presbyterian clergyman. Edward removed to Michigan in 1839, and was graduated at the state university in 1854. He taught in an academy in Hernando, Miss., in 1855, and was professor in Carroll college, Waushara, Wis., in 1856-7. After spending the years from 1857 till 1860 in travel and study abroad, he became in 1861 professor of modern languages in Michigan university, but resigned in 1870 and went abroad, where he has since been engaged in literary work. Since 1884 he has been connected with the "Allgemeine Zeitung," of Munich, Bavaria, and has contributed to it many articles on the literary, artistic, and intellectual life of the United States. Prof. Evans has made a specialty of oriental languages. Besides many articles he has made valuable contributions, has published "Abriess der deutschen Literaturgeschichte" (New York, 1869) and a "Progressive German Reader" (1870), and has translated Stahr's "Life and Works of Lessing," with an introduction (2 vols. Boston, 1860), and Coquetoil's "First Historical Transformations and Liability" (1870). He has, in preparation (1887) a work on "Animal Symbolism in Art and Literature," and a "History of German Literature," to be completed in five volumes, two of which are already written, though not published.—His wife, Elizabeth Edson Gibson, author, b. in Newport, N. H., 8 March, 1829, was educated at a high school for young ladies in Ann Arbor, Mich., and has done some work as an artist. She has contributed essays and short stories to magazines, and has published "The Abuse of Maternity" (Philadelphia, 1875), and "American Girls" a novel (1864).

EVANS, Elizabeth Hettie, poet, b. in Philadelphia in 1818; d. in Amelia county, Va., in 1855. She was a daughter of William S. Stockton, of Philadelphia, and in 1839 married Dr. M. F. T. Evans, of Amelia county, Va. Mrs. Evans contributed poems to various periodicals, and was widely known to the public. A volume of her poems, with a preface by her brother, the Rev. Thomas H. Stockton, was published shortly before her death (Philadelphia, 1851).

EVANS, Evan, clergyman, b. in Wales; d. in Hartford county, Md., in October, 1721. He was educated in England, entered the ministry of the established church, and, on the grant of a royal bounty of £50 to Christ church, Philadelphia, was appointed its second rector in 1700 by Dr. Compton, lord-bishop of London. He at once became a leader, and had many pupils, that many visiting Philadelphia were deeply impressed by his preaching, and formed congregations when they returned to their homes. His duties, not lest of which was his work among young men over whom he exercised great influence, were thereby much increased. In visiting the country, from the forty or fifty or sixty miles, through Pennsylvannia, West Jersey, and Delaware. The chief of them were Radnor and Oxford, and his church at the former place, where there was a colony of Episcopalians from Radnorshire, Wales, is represented in the accompanying illustration. He went to England in 1707 on private business, and urged that a bishop should be sent to the colonies, and on his return in 1709 brought the communion service presented by Queen Anne to Christ church. He visited England again in 1718 "on some family concerns," and while there received the degree of D. D. from one of the universities, and was appointed missionary at Oxford and Radnor, in addition to Christ church. Having been presented to St. George's parish, Harford co., by the governor of Maryland, he became rector in 1718. On 18 Feb., 1718. When on a visit shortly afterward, he was seized with an apoplectic fit in the pulpit of Christ church on Sunday, and died on the following Wednesday. During his ministry he baptized 800 persons, about 600 of whom had belonged to the society of Friends, whose members flocked to hear him in great numbers.

EVANS, Evan William, scholar, b. near Swanssea, Wales, in 1827; d. in Ithaca, N. Y., 22 May, 1874. He came to this country with his parents when a child, and was graduated at Yale in 1851. After studying theology in New Haven for a year he became principal of Delaware institute, Franklin, N. Y., and in 1855-7 was a tutor in Yale, accepting in the latter year the chair of natural philosophy and astronomy in Marietta college, Ohio, where he remained until 1864. He was then occupied for three years as a mining engineer, spent one year in European travel, and on the foundation of Cornell university was the first professor appointed, occupying the chair of mathematics there till 1872, when he resigned on account of failing health. Prof. Evans was regarded as the best Celtic scholar in the United States.

EVANS, George, senator, b. in Hallowell, Me., 12 Jan., 1797; d. in Portland, Me., 5 April, 1867. He was graduated at Bowdoin in 1815, studied law, and was admitted to the bar in 1818. He began to practise at Gardiner, but afterward removed to Hallowell, and attained eminence as a criminal lawyer. He was a member of the legislature in 1825-8, and was speaker of the house in his last year. He was then chosen to congress as a Whig, and served six terms, from 1829 till 1841, when he was elected to the senate, and served until 1841-7. During his twelve years in the house, although his party was in the minority, he exerted a commanding influence. In the senate he was chairman of the committee on finance. Henry Clay is reported to have said that Mr. Evans knew more about the tariff than any other public man in the country. His speeches on important and complicated economical questions were very effective. He was a candidate for the vice-presidential nomination when Gen. Taylor was nominated for president, and after the latter's accession in 1849 was appointed chairman of the Mexican claims com-
mission. He was attorney-general of Maine in 1833, 1854, and 1866, and was for twenty-two years a trustee of Bowdoin college, which gave him the degree of LL. D. in 1843.

EVANS, Sir George De Laury, British soldier, b. in Moig, Ireland, in 1787; d. in London, 9 Jan., 1870. He entered the British army in 1807, served in India and Spain, and in 1814, when brevet lieutenant-colonel of the 5th West India regiment, was ordered to this country. He saw the battle of Bladensburg on 24 Aug., where two horses were killed under him, and led the small force that entered Washington and destroyed the public buildings there. He also took part in Ross's expedition against Baltimore in September, and was near that officer when he fell. At New Orleans he was the only landsman that volunteered to accompany the expedition against the American troops defending Lake Borgne. He was wounded before New Orleans on 28 Dec., 1814, and again on 8 Jan., 1815, and was sent home. He recovered just in time to join We Vermilye at Quatre Freres, where again two horses were killed under him. He commanded in Spain, in 1833–7, the British auxiliary legion, and after 1846 was member of parliament from Westminster. He served as a lieutenant-governor of Jamaica, president of the division of the English army, and was distinguished at the Alma and at Inkerman, receiving for his services the thanks of parliament and the grand cross of the bath. He published "Facts relating to the Capture of Washington" (London, 1829).

EVANS, George Henry, reformer, b. in Bromyard, Herefordshire, England, 25 March, 1805; d. in Granville, N. J., 2 Feb., 1855. He came to this country with his father and brother in 1820, and was one of the earliest land-reformers in the United States, adopting views similar to those held by Henry George. Among the reforms for which he labored were the destruction of the U. S. bank, inalienable homesteads, the transportation of the mails on Sundays, a limitation in the right of any person to hold lands, general bankrupt laws, and laborers' liens. He also favored the abolition of slavery, of laws for selling debts, and of imprisonment for debt. He edited and published "The Man," at Ithaca, N. Y., about 1823; the "Working Man's Advocate," in New York, in 1830; "The Daily Sentinel," in 1837; and "Young America," in New York and Readville, N. J., in 1843. He was editorial writer for the "Free Press," and editor, b. in Bromyard, England, 9 June, 1808, spent his boyhood on a farm of 500 acres at Chadwick Hall, near Worcester. He says: "My maps were the landscape of hills and valleys: my books, trees and plants: my teachers, the servants, and their masters and mistresses. I graduated, and emigrated to America in 1820. Then I taught myself how to read, and began the study of history. I learned how to think, observe, and reason upon theology and the social and governmental organization of mankind, until I became a materialist, a socialist, a land-reformer, and an infidel to all the popular church and state religions of Christendom." On his arrival in New York his father apprenticed him to a hatter, and it was in the intervals of his work that he thus educated himself. At first a follower of Godkin, then a reformer and boats down the Mississippi to New Orleans, he made a short visit to England, and on his return joined the Shakers at Mount Lebanon, N. Y., on 3 June, 1830. He was appointed assistant editor in the "North Family" in 1838, and in 1839 became first editor of three "free papers." He has invented a simple method of warming the rooms of the community uniformly. Elder Evans has "feted frequently, has contributed to seventy different publications, and in 1875–6 edited and published, with Adonzo Foster and Durfee, "A Description of the Shaker and Shakers." His teachings have considerably modified the dogmas of his sect. He has published "Compendium of Principles, Rules, Doctrines, and Government of Shakers," with biographies of Ann Lee and others" (New York, 1856); "Auto-biography of the Children of the "I amsterdam Revelation" (1860); "Shaker Communism" (London, 1871); "Religious Communism," a lecture delivered in St. George's hall, London (1872); and "Second Appearance of Christ" (1873).

EVANS, Henry G., journalist, b. in 1812; d. in Brooklyn, N. Y., 14 Aug., 1849. He was editor and proprietor of the New York "Evening Mirror" almost from the beginning of its career to its close, and was one of the best writers for the daily press in the city. About fifteen years previous to his death the publication of the "Mirror" was discontinued, and he engaged in mercantile business, in which he maintained a high reputation.

EVANS, Hugh Davy, author, b. in Baltimore, Md., 26 April, 1792; d. there, 16 July, 1868. He left school at thirteen years of age on account of his health, and went to Baltimore, where he was admitted to practice in Baltimore on 19 April, 1815, took rank, while yet a young man, with Pinckney, Wirt, Reverdy Johnson, and the other leaders of the Maryland bar, and afterward attained eminence as a constitutional lawyer. He was prominent for many years in the counsel of the Protestant Episcopal church, and in 1848–56 edited "The True Catholic," a high-church periodical. He was also connected with the Philadelphia "Register" in 1853, contributing to it "Thoughts on Current Events," with the New York "Church Monthly" in 1857–8, and the New York "Church Monthly" in 1857–8, and in the two years last mentioned edited the "Monitor," a weekly paper published in Baltimore. He was a prominent member of the Maryland colonization society, and prepared a code of laws for the Maryland colony in Liberia, in 1848. He received the degree of LL. D. from St. James's college, Maryland, in 1852, and from that time till 1864 was lecturer there on civil and ecclesiastical law. During the civil war Mr. Evans was an earnest supporter of the National government, and in 1861 went to the London office in defense of the arrests made in Baltimore in that year, which attracted much attention. His published works include "Essays on Pleading" (Baltimore, 1827): "Maryland Common-Law Practice" (1857; revised ed., 1867); "Essays to prove the Validity of Anglican Ordinations," in reply to Archbishop Kenrick's book on the subject (Baltimore, 1841; second series, 2 vols., 1851); "Theophilus Americanus," an American adaptation, with additions, of Canon Wordsworth's "Theophilus Anglicanus" (Philadelphia, 1853); and "Episcopal Relations of the Protestant Episcopal Church in the United States" (1855); and several pamphlets. After his death appeared his "Treatise on the Christian Doctrine of Marriage," which he considered his best work (New York, 1857), and a memoir by F. R. Harris, then an resident, and a collection written by himself (Hartford, Conn., 1870).

EVANS, H. Sugden, Canadian chemist, b. in London, England, in 1830. He was graduated at the School of pharmacy in 1848, and then removed to Liverpool, where he took charge of the laboratories of his father, a wholesale druggist. In 1849 he read before the London chemical so-
EVANS, John, colonial governor of Pennsylvania, b. about 1700. He was of Welsh origin, and in February, 1704, was induced to make an tour of the province, under the proprietor, William Penn. He was not a Quaker, and was doubtless selected out of deference to the court party, who did not believe in the peace principles of that sect. His administration was marked by quarrels with the assembly, and especially with the speaker of the house, David Lloyd, who headed the popular party. Disregarding the convictions of the Quakers, Evans, for the first time in the history of the colony, made a public call for troops, with the object of bringing the French and Indians. The call met with no response, whereupon the governor, resorting to a discreditable ruse, arranged to have a messenger ride into Philadelphia on the day of the annual fair, announcing, with apparent consternation, that the French had burned the Delawares and were marching on the city. Evans then rode through the street with drawn sword, entreating the people to arm, and for a time great excitement prevailed. Valuables were hastily thrown into wells, and many of the stores were sold to取得森林; but the Quakers, now Evans, it had been reported, had given an impression, continued quietly at their devotions, as it was the day for their "weekly meeting." The governor also built a fort at Newcastle, and unlawfully demanded tribute of all vessels passing up the river. Evans was accused of dealing in学习 and refinement, but his habits were unsuited to the Quaker city. Watson, in his "Annals of Philadelphia," says that in 1702 "Solomon Cresson, going his round at night, entered a tavern to suppress a riotous assembly, and found there John Evans, who, after much persuasion, agreed to bear the cost." Evans was finally recalled in February, 1709, and was succeeded by Col. Charles Gookin.

EVANS, John, geologist, b. in Portsmouth, N. H., 14 Feb., 1812; d. in Washington, D. C., 13 April, 1861. His father, Richard Evans, was a judge of the New Hampshire supreme court. After taking his degree at St. Louis medical college, he served, under Dr. David Dale Owen, on the geological surveys of Wisconsin, Minnesota, Iowa, and Nebraska. He first attracted notice, both here and abroad, by his discovery and description of a large deposit of fossil bones of extinct species in the "Mauvais Terres" of Nebraska. He was afterward commissioned by the U. S. government to carry on the geological surveys of Washington and Oregon territories, and was subsequently governor of the Chiriqui commission. At the time of his death he was preparing a report on his surveys of Washington and Oregon.

EVANS, Josiah James, jurist, b. in Marlborough district, S. C., 27 Nov., 1786; d. in Washington, D. C., 5 May, 1858. He was graduated at South Carolina college in 1808, studied law, was admitted to the bar in 1811, and gained a high reputation as a lawyer. He was chosen to the legislature from Marlborough district in 1812-13, and in 1816 from Darlington district, whither he had removed in that year. He was state solicitor for the northern circuit in 1817-18, and for his microscopical labors in this connection was made a fellow of the Royal microscopical society. He was also, in 1839, president of the Pharmaceutical society of Great Britain. In 1866 he entered the wholesale drug business in Montreal, Canada, which he continued in the Delaware until his death in 1877. He retired from active connection with the business in 1884, and became chief analyst for the Dominion government.

EVANS, Lewis, geographer, b. about 1700; d. in June, 1866. He was a state-riots in 1802, and served from 1803 till his sudden death from illness in 1816. Tributes were paid to his character by both political friends and opponents. In 1856 Judge Evans made a speech in the senate in vindication of South Carolina, in reply to Charles Sumner.

EVANS, Nathan George, soldier, b. in Darlington district, S. C., in 1823; d. in Midway, Ala., 30 Nov., 1864. He was graduated at the U. S. military academy in 1848, assigned to the 1st dragoons, and served on frontier duty and against the Indians. He was made 1st lieutenant in the 2d cavalry, 3 March, 1855; captain, 1 May, 1856; and distinguished himself in a fight with Comanche Indians, 1 Oct., 1858, killing two of them in personal combat. He resigned on 27 Feb., 1861, entered the Confederate service as colonel, and commanded a brigade at Bull Run. He was then promoted to brigadier-general, and commanded the Confederate forces at Ball's Bluff, 19 Oct., 1861. He also commanded in the actions at James Island, S. C., and Kinston, N. C., in 1862, and subsequently became major-general. He led a division of Gordon's corps at Hatcher's Run, surrendered with Gen. Lee on 9 April, 1865, and from 1866 till his death was in the Supreme court of Texas.

EVANS, Nathaniel, poet, b. in Philadelphia, Pa., 8 June, 1742; d. in Gloucester county, N. J., 29 Oct., 1767. After studying at the Philadelphia academy, he was apprenticed to a merchant, but afterward entered the College of Philadelphia (now University of Pennsylvania). He was not graduated, but received the degree of M. A. in 1765. He then went to England, was ordained in the established church, and returned in December, 1765, as a missionary of the Society for propagating the gospel in foreign parts. Mr. Evans published an edition of Thomas Godfrey's poems, with a memoir (1767). After his death, selections from his writings, entitled "Poems on Several Occasions," with other pieces, including one of his sermons, were published with a memoir by his friend, the Rev. Dr. Busy (Philadelphia).

EVANS, Oliver, inventor, b. in Newport, Del., in 1755; d. in New York city, 21 April, 1819. He was apprenticed to a wheelwright, and before he had reached the age of manhood the construction of a land-carriage to be propelled without animal power began to occupy his mind. At the age of twenty he invented a machine for making card-threads. Two years later he entered into business with his brothers, who were millers, and in a
short time invented the elevator, the conveyer, the drill, the hopper-boy, and the device; the application of which to mills worked by water-power effected a revolution in the manufacture of flour. In 1786-7 he obtained from the legislature of Maryland and Pennsylvania the exclusive right to use his improvement in flouring-mills, and Maryland gave him a similar privilege with regard to steam carriages. It was not till 1799 or 1800 that he was able to set about the construction of a steam carriage. Finding that his steam-engine differed in form as well as in principle from those in use, he secured a patent and applied it to mills more profitably than to carriages.

This was the first steam-engine constructed on the high-pressure principle, and Dr. Evans, who had conceived the idea of it in early life, and in 1787 and again in 1794-'5 had sent to England drawings and specifications, the merit of the invention belongs, although it has been common to assign it to Vivian and Trevithick, who had had access to Evans's plans. In 1803-'4, by order of the board of health of Philadelphia, he constructed the first steam-dredging machine used in America. It consisted of a scow, with a small engine to work the machinery for raising the mud. The machine, which he named the "Orator Amphibolus," propelled itself on wheels to the Schuylkill, a distance of one and a half mile, was fitted with a paddle-wheel in the stern, and navigated the river to its junction with the Delaware. This is believed to have been the first instance in America of the application of steam-power to the propelling of land carriages. He predicted in 1805 that such carriages would be propelled on railways of wood or iron, and urged the construction of a railroad between Philadelphia and New York, but was always prevented by his limited means from prosecuting his mechanical experiments to the extent he desired. He was the author of "The Young Engineer's Guide" (Philadelphia, 1805; translated into French, Paris, 1821); and of the "Miller and Millwright's Guide" (Philadelphia, 1797; Paris, 1830; 14th ed., with additions by Thomas P. Jones); and he also published a description of an improved merchant flouring mill, by C. and O. Evans (Philadelphia, 1853).

EVANS, Thomas, quaker, b. in Philadelphia in 1798; d. May 25, 1868. In 1827-'8 he opposed the Unitarian views of Elias Hicks in a series of sermons. In 1835 he and his wife escaped shipwreck on a voyage to Charlestown, S. C., and, from over-exertion at the pumps, his health was irreparably injured. From 1837 till 1854 he edited, with his brother William, "The Friend's Library," a collection of standard religious writings by eminent members of the society, in fourteen volumes. He was the author of "An Exposition of the Faith of the Religious Society of the Friends" (Philadelphia, 1828).

EVANS, Thomas Willberger, b. in Philadelphia, Dec. 23, 1853. He received a common-school education, and at the age of fourteen, entered the employ of a silversmith, who was also a maker of dental appliances. In 1841 he entered the office of Dr. John D. White, of Philadelphia, with whom he remained two years, meanwhile following courses at the Juvenile Medical College. He established himself as a dentist in Maryland, and afterward in Lancaster, Pa., where he acquired an extensive practice. His early familiarity with metals, and especially with gold-foil, enabled him to fill cavities, which up to that time had been considered impracticable. Many teeth that would otherwise have been extracted were filled by him, and he made an exhibition of his achievements at the Franklin Institute in Philadelphia. About 1848 he went to Paris, where, under the patronage of Napoleon III, he became distinguished, and in time he treated many of the crowned heads of Europe. Dr. Evans was active in the establishment of the Red Cross Society, and in organizing the American Ambulance Corps that was sent out under its auspices with the French army in 1870. At the downfall of the empire in 1870, he succeeded in delivering the Empress Eugenie to escape, and, although the story is told in several ways, it is generally accepted that the empress, after leaving the Tuileries, was taken to Dr. Evans's residence for refuge. She was hurried into his carriage and driven beyond the walls of the city, while he held in front of her face an open newspaper, which he was apparently reading. Dr. Evans's fortune is estimated at many millions, including a valuable collection of souvenirs, which he has received from his titled patients. He is the proprietor of the "American Register," a weekly journal issued in Paris, and has recently purchased a daily, which is now (1887) published in the English language in that city.

EVANS, William, squire, b. in Cavan, Ireland, in 1786; d. in Montreal, Canada, in 1857. He emigrated to Canada in 1819, and settled in Montreal, where he was made secretary to the first agricultural society founded there. In 1837 he contributed a series of letters upon agriculture to the "Courier" which were published in pamphlet form. He established the "Canadian Quarterly" and the "Agriculturist and Industrial Magazine." In 1842 he edited the "British American Cultivator" in Toronto. When he returned to Montreal in the following year he founded the "Canadian Agricultural Journal," of which he was editor until a short time before his death. He frequently contributed to the "Gazette," in Montreal, on agricultural subjects, and in 1853 was appointed secretary and treasurer of the board of agriculture in Lower Canada. He published "Theory and Practice of Agriculture" (Montreal, 1835).

EVARTS, Jeremiah, philanthropist, b. in Sunderland, Vt., March 3, 1781; d. in Charleston, S. C., May 10, 1831. He was graduated at Yale in 1802, and, after some time spent in teaching, studied law, was admitted to the bar in 1807. He then entered that profession in New Haven for about four years. From 1810 till 1820 he edited the "Panoptist," a religious monthly magazine published in Boston. In 1812 he was chosen treasurer of the American board of commissioners for foreign missions, and in 1819 when this was discontinued and the "Missionary Herald" was issued by the board in its stead, he took charge of the latter periodical. He was chosen correspond-
ing secretary of the board in 1831, and retained that office until his death. He died while traveling for the benefit of his health. He wrote twenty-four essays on the rights of the Indians, under the signature of "William Penn," and also edited a volume of "Speeches on the Indian Bill," writing the introduction; and wrote most of the reports of the board of missions, that of 1830 especially being an able document. See "Memoirs of Jeremiah Evarts," by E. C. Tracy (Boston, 1845).

His son, William Maxwell, lawyer, b. in Boston, 6 Feb., 1818. He was prepared for college in the Boston Latin-school, graduated at Yale in 1837, and while in college, with four of his classmates, he founded the "Yale Literary Magazine." Choosing the profession of the law, he studied in Harvard law-school, and in the office of Daniel Lord, of New York city, and was admitted to the bar in New York in 1841. He soon established a reputation for learning and acumen, and was often consulted by older lawyers. In 1849-33 he was assistant district attorney of New York city, and in 1851 successfully conducted the prosecution of the Cuban sibbblers concerned in the "Cleopatra" expedition. The same year he was elected to argue in favor of the constitutionality of the Metropolitan police act. In 1857 and 1860 he was retained by the state of New York to argue the Lemmon slave case against Charles O'Conor, the counsel for the state of Virginia, before the supreme court and the court of appeals. He became an active and prominent member of the Republican party, was chairman of the New York delegation in the Republican national convention of 1860, and proposed the name of William H. Seward for the presidency. In 1861 he and Horace Greeley were rival candidates for the U. S. senatorship before the New York legislature, but finally his name was withdrawn to enable his supporters to secure the election of Ira Harris. In 1862 he conducted the case of the government to establish the supreme court the right of the United States in the civil war to treat captured vessels as maritime prizes, according to the laws of war. In 1865 and 1866 he maintained with success before the courts the unconstitutionality of state laws taxing U. S. bonds or National bank stock without the authorization of Congress. In 1869 President Johnson chose him as chief counsel in the impeachment trial before the senate, and from 15 July, 1868, till the end of President Johnson's administration, he filled the office of attorney-general of the United States. He acted in 1869 as counsel for the United States before the tribunal of arbitration on the Alabama claims at Geneva, and presented the arguments on which the decisions favorable to the United States were to a large extent based. In 1875 he was senior counsel for Henry Ward Beecher in the trial of the suit against him in Brooklyn, and it is said his reputation had been national, and he had been engaged in a large number of cases involving great interests, among the more famous of which were the Parrish will case and the trial of Mrs. Gardner, both of the widow of President Tyler. His services were often sought in cases in which large corporations were parties, and he received in some instances fees of $25,000 or $50,000 for an opinion, such as that on the Berdell mortgage upon the Boston, Hartford and Erie railroad. The firm of Evarts, Choate & Beaman, of which he is senior partner, has among its clients many of the prominent merchants and bankers of New York city. In 1877 he was the advocate of the Republican party before the electoral commission, and during the administration of President Hayes he was secretary of state. His administration of the state department was marked by a judicious and dignified treatment of diplomatic questions, and especially by the introduction of a higher standard of efficiency in the consular service, and the publication of consular reports on economic and commercial conditions in foreign countries. In 1881, after the conclusion of his term of service in the cabinet, he went to Paris as delegate of the United States to the International monetary conference. On 4 March, 1885, he took his seat in the U. S. Senate for the term vacant, having been elected as a Republican to succeed Elbridge G. Lapham as senator from New York.

Mr. Evarts is known as a brilliant speaker at convivial gatherings, and as a public orator of eloquence and versatility. On many important occasions he has delivered addresses in New York that have been published. Among his public addresses are the oration on Chief-Justice Chase, at Dartmouth college, in June, 1873; the Centennial oration, in Philadelphia, in 1876; and the speeches at the unveiling of the statues of William H. Seward and Daniel Webster, in New York, and of Bartholdi's Statue of Liberty.

EVE, Joseph Adams, physician, b. in Charleston county, S. C., 1 Aug., 1805. He was graduated at the South Carolina medical college in 1828, and began to practice in Augusta, Ga., making a specialty of obstetrics and diseases of women and children. He was one of the founders in 1832 of the Medical college of Georgia, and took the chair of materia medica and therapeutics, which he exchanged in 1839 for that of obstetrics and women's and children's diseases. In 1843 materia medica and gynecology have appeared in the "Southern Medical and Surgical Journal."—His son, Robert Campbell, physician, b. in Augusta, Ga., 15 May, 1843, was graduated at the Medical college of Virginia in 1863, and, after practising some time at Staunton, Va., settled in Augusta, and became professor of materia medica and medical jurisprudence in the Georgia medical college. He has written on the "Influence of the Ovaria in Uterine Disorders," "Epilepsy," and "Tonic Properties of Mercury in Minute Doses."—Joseph Adams's niece, Marie Lou, author, b. near Augusta, Ga., about 1848, was graduated at Greensborough college, Ga., and after leaving school contributed to "Scott's Magazine" and other southern literary journals. In 1879 she wrote a prize poem entitled "Conquered at Last," expressing gratitude for northern aid during the yellow-fever epidemic of 1878. She has published many poems in magazines and newspapers, some of which are included in "Woman in Sacred Song" (Boston), and some in George M. Baker's "Reading Club."—Joseph Adams's cousin, Paul Fitzsimons, physician, b. near Augusta, Ga., 28 Jan., 1849, settled in Nashville, Tenn., 3 Nov., 1877, was graduated at Franklin col-

VOL. II.—25
George, Ga., in 1826, and studied in the office of Dr. Charles D. Meigs and in the medical department of the College of Medicine, where he was graduated in 1828. He then studied three years in London and Paris, and served as ambulance surgeon during the revolution of 1800, and as a regimental surgeon in the Polish war. He returned to the United States in November, 1821, and the following year entered the University of Tennessee, where he became professor of surgery in the University of Nashville, which was established at that time. In 1825 he accepted the professorship of surgery in the University of Missouri, but was obliged by the unhealthfulness of the climate to return to Nashville, where he became professor of obstetrics and medical surgery. In 1827 he became professor of the principles of surgery and of the diseases of the genital-urinary organs in the Medical college there. He was one of the best surgeons in the southwest. In 1830 he was appointed surgeon-general of Tennessee, and served during the war of 1846. He was on the medical examination board, and with the Confederate army at Shiloh, Columbus, Miss., Atlanta, and Augusta, Ga. He performed more than a hundred operations of lithotomy, usually by the bilateral method, and lost only eight out of ninety-two cases of lithotomy bilaterally. He is believed to have been the first American surgeon to excise the uterus in situ, the patient living over three months, and has removed the crista galli, the patient surviving six days, trephined the lateral sinus of the brain, removed a nail from the lung by tracheotomy, and performed other difficult operations. He was for a time editor of the "Southern Medical and Surgical Journal," and assisted in editing the "Medical and Surgical Journal." He has published over 600 articles on medical subjects. His most important medical work was published in "Cases in Surgery" (1852); "One Hundred Cases of Lithotomy" in the "Transactions" of the American medical association for 1870; "What the South and West have done for American Surgery"; and reports of 20 amputations and 13 resections at the high-joint performed by Confederate surgeons, contributed to the "Medical History of the War."

Eveline, Robert, an English colonist in Virginia. He published "Directions for Adventurers, and True Description of the Healthiest, Pleasantest, and Richest Plantation of New Albion, in North Virginia" (London, 1641).

Everard, Sir Richard, colonial governor of Carolina, d. in London, England, 17 Feb., 1733. He was the last of the proprietary governors, and his administration was disturbed by frequent alterations with the council. When he had been governor for four years the lords proprietors, in 1726, surrendered the province to the crown, each receiving in consideration of the surrender the sum of $12,500. The population of North and South Carolina, after the charter had been in existence sixty-six years, was not at that time more than 25,000 persons, including negroes. On the death of Lord —, the new governor, Sir Richard, was recalled, and the first royal governor, George Burrington, succeeded him in February, 1730.

Everest, Charles William, poet, b. in East Windsor, Conn., 27 May, 1814; d. in Waterbury, Conn., 11 Jan., 1877. He was graduated at Trinity college in 1838, and ordained in the Protestant Episcopal church in 1848, became rector at Hamden, Conn., and taught the recrery school. He contributed to magazines, edited many books of poems, and published "The Poets of Connecticut," of which he was the author. He was the youngest of its members. After leaving college he was for a year assistant teacher in Phillips Exeter academy, then studied law in the office of John Quincy Adams, whom in 1809 he accompanied to Russia, staying two summers in his family, attached to the legation. At the close of the year he was appointed secretary of legation, and held this post from 1818 till 1824. In 1825-9 he was minister to Spain, after which he returned home and became proprietor and editor of the "North American Review," to which he had contributed. In 1836, Edward, one of the chief contributors. From 1830 till 1835 he sat in the legislature of Massachusetts; in 1840 he resided, as a confidential agent of the United States, in the island of Cuba; and while there was appointed president of Jefferson college, Richmond, but was soon obliged by failing health to return to New England. On the return of Caleb Cushing from his mission to China, Mr. Everett was appointed commissioner to that empire, and sailed for Canton, 4 July, 1845. He was detained by illness at Rio Janeiro, and returned home, but in the summer of 1846 made a second and more successful attempt to reach his destination, and died in Macao. Mr. Everett's first published composition appeared in the "Monthly Anthology," the vehicle of the Anthology club. On, which consisted of G. F. Usis, Dr. Ticknor, William Tudor, Dr. Bigelow and Rev. J. S. J. Gardiner, Alexander H. Everett, Rev. Messrs. Buckminster, Thacher, and Emerson. The "Monthly Anthology," established by Phineas Adams, was published from 1833 till 1811. Mr. Everett published several volumes of poems, contributed to the "Political Situation of the Principal Powers, with Conjectures on their Future Prospects" (London and Boston, 1822; translated into German, French, and Spanish, the German version edited by Prof. Jacobsi, of the University of Halle); "New Ideas on Population, with Remarks on the Theories of Godwin and Malthus" (London and Boston, 1823); "America, or a General Survey of the Political Situation of the Several Powers of the Western Continent, with Conjectures on their Future Prospects, by a Citizen of the United States," (Philadelphia, 1827; London, 1828); "Critical and Miscellaneous Essays" (first series, Boston, 1845; second series, 1847); and "Poems" (1845). To Spark's "American Biography" Mr. Everett contributed the lives of Joseph Warren and Patrick Henry. His principal contributions to the "North American Review" were on English, French, and German literature; French Dramatic Literature; Louis Bonaparte; Private Life of Voltaire; Literature of the 18th Century; Dialogue on Representative Government, between Dr. Franklin and President Montesquieu; Bernardin de St. Pierre; M. Rousseau; M. de Voltaire; Chinese Grammar; Cicero on Government; Degrado's History of Philosophy; Lord Byron; British Opinions on the
Protecting System; The American System; Life of Henry Clay; Early Literature of Modern Europe; Early Literature of France; Origin and Character of the Old Parties; and Thomas Carlyle. His principal contributions to "Democratic Review" are the following: The Spectre Bridegroom, from Bürger; The Water-King, a Legend of the Norse; The Texas Question; and The Malthusian Theory. His contributions to the "Boston Quarterly Review" were chiefly, if not altogether, devoted to an exposition of questions connected with the currency. Among Mr. Everett's published orations are the following: On the Progress and Limits of the Improvement of Society; The French Revolution; The Constitution of the United States; Discovery of America by the Northmen; Battle of New Orleans; and Battle of Bunker Hill.

His brother, Edward, b. in Dorchester, Mass., 11 April, 1794; d. in Boston, 15 Jan., 1885, entered Harvard (where he edited the "Harvard Lyceum") in 1807, and was graduated with the highest honors in 1811. In 1813 he was settled as pastor over the Unitarian church in Brattle square, Boston, succeeding the Rev. Joseph Stevens Buckminster, and soon attained the attention by his eloquence, especially by his sermon delivered in the hall of the house of representatives, Washington, in February, 1809. The sermon was truly splendid," wrote Judge Joseph Story, "and was heard with a breathless silence. The audience was very large, and, being in that magnificent apartment of the house of representatives, it had vast effect. I saw Mr. King of New York, and Mr. Otis of Massachusetts, when ideas were both very much affected with Mr. Everett's sermon; and Mr. Otis, in particular, wept bitterly. There were some very stirring appeals to our most delicate feelings on the loss of our friends. Indeed, Mr. Everett was almost universally admired as the most eloquent of preachers. Mr. King told me he never heard a discourse so full of unctious, eloquence, and good taste." After his graduation Mr. Everett was Latin tutor at Harvard, and in 1814 he was chosen to fill the newly-formed chair of Greek literature, to qualify himself for which he spent more than four years (from the spring of 1815 to the autumn of 1819) in Europe, studying for two years in the University of Göttingen. "Edward Everett," remarks Abraham Hayward in his sketch of "American Orators and Statesmen," in the "London Quarterly Review," for December, 1840, "is one of the most remarkable men living.... At nineteen he had already acquired the reputation of an accomplished scholar, and was drawing large audiences as a Unitarian preacher. At twenty-one (the age at which Roger Ascham achieved a similar distinction) he was appointed professor of Greek in Harvard university, and soon afterward he made a tour of Europe, including Greece. M. Cousin, who was with him in Germany, informed a friend of ours that he was one of the best Grecians he ever knew, and the translator of Plato must have known a good many of the best. On his return from his travels he lectured on Greek literature with the enthusiasm and success of another Abelard—we hope without the Heloise." Before his departure for Europe, Mr. Everett had given proof of his reading and critical powers in answering a volume entitled "The Grounds of Christianity Examined," by George B. English (Boston, 1813). Mr. Everett convicts English of dishonesty in his assertions, and of plagiarism from Evanson, Collins, Toland, Somers, amongst others. About ninety-four pages are borrowed from other writers, while English credits other authors with twenty-four pages only. In 1819 Mr. Everett returned home and entered upon the duties of the Greek professorship. In addition to his regular duties he published a translation of buttman's Greek grammar, and a Greek reader based upon that of Jacobs. He became editor of the "North American Review" in January, 1820, and in the next four years contributed to its pages about fifty papers, to which are to be added sixty more written while the "Review" was president of its man college, of his brother Alexander and his successors. In May, 1822, Mr. Everett married Charlotte Gray, a daughter of Peter Chardon Brooks, whose biographer he wrote. In 1824 Mr. Everett was elected to congress from the fourth district, of the state of Massachusetts, a house of representatives for ten years. He took the side in politics maintained by the friends of President John Q. Adams, as a "National Republican" and "Whig"; but gave special attention to obtaining pensions for the survivors of the Revolution, and on the passage of the removal of the Indians from Georgia. In 1835, and for three successive years thereafter, he was elected governor of Massachusetts, and at the next election was defeated by only one vote out of more than 100,000. In 1840 he made another journey to Europe, and while residing in London he was elected, chiefly through the influence of Daniel Webster, minister to England. During his sojourn in that country he received the degree of D. C. L. from Oxford and that of LL. D. from Cambridge and Dublin. He was recalled by President Polk in 1845. From 1846 till 1849, at whose instance, he was sent as a minister to England, and on the death of Daniel Webster, in 1852, was appointed secretary of state. In 1853 he succeeded John Davis in the U. S. senate. In the summer and autumn of this year he spoke on the Central American question, addressed the New York historical society on colonization and emigration, replied to Lord John Russell's protest against the doctrines of the U. S. government in the note declining the Tripartite convention, and spoke in opposition to the proposed new constitution in Massachusetts. On the assembling of congress in December, 1853, although his health had been impaired by his labors, he continued them with such zeal and fidelity in the discussion of the bill to repeal the Missouri compromise, and other important measures of that session, that in the following May he was obliged to resign..his resignation was on Washington, from 10 March, 1856, till June, 1859—122 times—with a result of more than $58,000. In the autumn of 1858 Mr. Everett contracted with Robert Bonner, proprietor of the New York "Ledger," to furnish an article weekly for that paper for one year, in consideration of $10,000, to
be paid in advance to the Mount Vernon fund. Mr. Everett also invited the readers of the "Ledge-ter" to transmit each the sum of fifty cents or more toward the support of our youth, for which purpose more than $3,000. On 22 Dec., 1857, he delivered an address on charity and charitable associations for the benefit of the Boston provident association, which was repeated fifteen times, with receipts of about $13,900. On 17 Jan., 1859, he delivered an address on the story of education in the "Franklin," which was repeated five times, yielding about $4,000 to various institutions. The receipts of these lectures were not less than $80,000. A notice of the "Life and Works of Daniel Webster," by Mr. Everett, is included in the collective edition of the works of the former (6 vols., Boston 1852). From his pen also came the "Life of General Stark," in Sparks's "American Biography," and several of the annual reports of the Massachusetts board of education. At the instance of Lord Macaulay, he contributed a life of Washington to the "Encyclopaedia Britannica" (published separately, New York, 1860). Mr. Everett had substantial claims to the character of a poet. His dirge of "Alaric the Visigoth" and the beautiful poem of "Santa Croce are among the few compositions that carry the name of him who wrote. The declamation can present without fear of rebuke to the mature judgment of riper years. In addition to the "Defence of Christianity," already mentioned, and occasional addresses, official letters, reports, etc., Mr. Everett published "Orations and Speeches on various occasions," (Boston, 1859), containing forty-six articles, and also a copious index to the contents of the three volumes. Volume IV. of the "Orations and Speeches" (Boston, 1859) contains fifty-nine articles. Those who would witness a remarkable illustration of the power of eloquence on Lafayette, transfuse life and beauty into the teachings of science, the lessons of history, the ethics of politics, and viscerities of letters, will not neglect to devote their "days and nights" to the orations of Edward Everett. He first oration that drew upon Mr. Everett's eyes of his countrymen at large was delivered at Cambridge before the Phi Beta Kappa society, 27 Aug., 1824. The subject was, "The Circumstances Favorable to the Progress of Literature in America." When the youthful orator had excited to a painful pitch the feelings of the vast assembly, he suddenly turned to the illustrious guest, Lafayette, who had seen so much of the rise and fall of human greatness, who had witnessed alike the destruction of a throne and the birth of a nation, and addressed him in an apostrophe never to be forgotten by auditor or reader. Perhaps Mr. Everett's words were never invested with a more playing to greater advantage than in that passage in his Fourth of July address delivered at Dorchester, Mass., in 1855, in which he epitomizes, in a single eloquent paragraph, the far-reaching consequences of the battle of Lexington, to which he says: "On the 19th of April the all-important blow was struck; the blow which severed the fated chain whose every link was bolted by an act of parliament, whose every rivet was closed up by an order in council—which bound to the wake of Europe the brave bark toward the same object until a national force produced more than $3,000. On 22 Dec., 1857, he delivered an address on charity and charitable associations for the benefit of the Boston provident association, which was repeated fifteen times, with receipts of about $13,900. On 17 Jan., 1859, he delivered an address on the story of education in the "Franklin," which was repeated five times, yielding about $4,000 to various institutions. The receipts of these lectures were not less than $80,000. A notice of the "Life and Works of Daniel Webster," by Mr. Everett, is included in the collective edition of the works of the former (6 vols., Boston 1852). From his pen also came the "Life of General Stark," in Sparks's "American Biography," and several of the annual reports of the Massachusetts board of education. At the instance of Lord Macaulay, he contributed a life of Washington to the "Encyclopaedia Britannica" (published separately, New York, 1860). Mr. Everett had substantial claims to the character of a poet. His dirge of "Alaric the Visigoth" and the beautiful poem of "Santa Croce are among the few compositions that carry the name of him who wrote. The declamation can present without fear of rebuke to the mature judgment of riper years. In addition to the "Defence of Christianity," already mentioned, and occasional addresses, official letters, reports, etc., Mr. Everett published "Orations and Speeches on various occasions," (Boston, 1859), containing forty-six articles, and also a copious index to the contents of the three volumes. Volume IV. of the "Orations and Speeches" (Boston, 1859) contains fifty-nine articles. Those who would witness a remarkable illustration of the power of eloquence on Lafayette, transfuse life and beauty into the teachings of science, the lessons of history, the ethics of politics, and viscerities of letters, will not neglect to devote their "days and nights" to the orations of Edward Everett. He first oration that drew upon Mr. Everett's eyes of his countrymen at large was delivered at Cambridge before the Phi Beta Kappa society, 27 Aug., 1824. The subject was, "The Circumstances Favorable to the Progress of Literature in America." When the youthful orator had excited to a painful pitch the feelings of the vast assembly, he suddenly turned to the illustrious guest, Lafayette, who had seen so much of the rise and fall of human greatness, who had witnessed alike the destruction of a throne and the birth of a nation, and addressed him in an apostrophe never to be forgotten by auditor or reader. Perhaps Mr. Everett's words were never invested with a more playing to greater advantage than in that passage in his Fourth of July address delivered at Dorchester, Mass., in 1855, in which he epitomizes, in a single eloquent paragraph, the far-reaching consequences of the battle of Lexington, to which he says: "On the 19th of April the all-important blow was struck; the blow which severed the fated chain whose every
familiar views, in passing through his hands, gather such a halo of luminous illustrations that their likeness seems transformed, and we entertain doubts of their identity." In 1860, when secession was seriously threatened by South Carolina, Mr. Everett, against his own inclination (as he wrote to the author of this sketch), permitted his name to be used by the Constitutional-Union party as a candidate for the vice-presidency. John Bell of Tennessee, being the candidate for president, they received thirty-nine electoral votes—those of Virginia, Kentucky, and Tennessee. (See Bell, John.)

During the civil war Mr. Everett labored zealously in defence of the Union, but was always disposed to extend the hand of fraternal reconciliation toward those whom he regarded as so greatly in the wrong; and his last public service was one of kindness that in behalf of southern sufferers by the conflict, at the meeting in Faneuil hall on Monday, set for May 16, 1865, for the relief of the people of Savannah. On his return home after a day of fatiguing engagements, he was obliged to summon his physician, and did not again leave his house. "We all remember him," remarks Daniel Webster, "some of us personally, myself, certainly, with great interest, in his deliberations in the congress of the United States, to which he brought such a degree of learning and ability and eloquence as few equalled and none surpassed. He administered, afterward, satisfactorily to his fellow-citizens, the duties of the chair of the commonwealth. He then, to the great advantage of his country, went abroad. He was deputed to represent America at the most important court of Europe, and he carried thither many qualities, most of them essential, and all of them ornamental and useful, to fill that high station.

He had education and scholarship. He had a reputation at home and abroad. More than all, he had an acquaintance with the politics of the world, with the laws of this country and of nations, and with the history and policy of the countries of Europe. And how well these qualities enabled him to reflect honor upon the literature and character of his native land, not we only, but all the country and all the world know. He has performed this career, and yet is at such a period of life that I may venture something upon the character and privilege of my countrymen when I predict that those who have known him long and know him now, those who have seen him and see him now, those who have heard him and hear him now, and very likely to think that his country has demands upon him for future efforts in its service." It is pleasing to know that the cordial relations that united the hearts of these distinguished patriots were not disturbed by misrepresentations; to the gratifying truth we have the following testimony, which occurs in a letter from Webster to Everett, written about three months before the decease of the former:

"We now and then see extending across the heavens a cloud, blue, cerulean blue, without sound, or mist, or haze. And such appears to me our acquaintance from the time when I heard you for a week recite your lessons in the little school-house in Short street, to the date hereof." [21 July, 1822].

Mr. Everett died on 22d December, 1865, at the age of sixty-four, and was buried in the cemetery of Mount Auburn, near Boston. He was a man of international law, and at the time of his death he was preparing a course of lectures on this theme, which he had "promised to deliver before the Dane law-school." But failing health, and the fatigue and excitement of travel arising from "much serving" in patriotic enterprises, prevented the completion of the greatly desired treatise. The accompanying illustration is a view of Mr. Everett's birthplace in Dorchester, Mass. The house is supposed to have been built by Col. Robert Oliver, about 1740. Another brother, John, b. in Dorchester, Mass., 32 Feb., 1801; d. in Boston in 1826, was graduated at Harvard in 1818. At his graduation he delivered an oration on "Byron," and the year previous one on "The Poetry of the Oriental Nations" at a college exhibition. On 14 July, 1818, he addressed the senior class on "The "Prospectus of Progress.""

Shortly after leaving college he accompanied President Holly to Lexington, Ky., where he became tutor in Transylvania university. While there he delivered an impromptu oration in the presence of Andrew Jackson, which was much praised. On returning to Boston, Mr. Everett entered the law-school at Harvard, subsequently studied with Daniel Webster, and was called to the bar. Before completing his legal studies he visited Europe, and for a brief period was connected with the American legation at Brussels. He lived at Edinburgh, where his elder brother, Alexander, was chargé d'affaires. Mr. Everett's early death cut short a career that promised to be unusually brilliant. He possessed great facility in extemporaneous debate, and was a leader among the young men of Boston. His poetical abilities were also considerable, as is shown by his "Ode to St. Paul's Church," and by one written for the Washington society, and sung at Concert Hall, 4 July, 1825. He is the author of articles in "The North American Review," and delivered the oration before the Washington society on 4 July, 1824.

He married (1788), as his second wife, Miss Minerva, educator, b. in Watertown, Mass., 10 Oct., 1838, was graduated at Harvard in 1858, and at Trinity college, Cambridge, England, in 1863. He was tutor and assistant professor of Latin at Harvard from 1870 till 1877, receiving from that institution the degree of Ph. D. in classics in 1875. In 1876 he became master of Adams academy at Quincy, Mass., where he still (1887) remains. He occasionally preaches, under a license from the Boston ministers' association, as a strongly conservative Unitarian. He has taken an active part in different political movements since 1864, both as a Republican and an Independent, notably in that of 1884, when he supported the Democratic ticket. He is a pronounced civil-service and tariff reformer.

Mr. Everett is the author of "On the Camp," a series of lectures on the Union (Boston, 1869); two books for boys, "Changing Base" (1868), and "Double Play" (1870); "Ilies One, or Europe Unchained," a poem (Boston, 1869); "School Sermons" (1881); and various pamphlets on political, literary, and religious subjects.
University of Berlin, Germany, and after his return was librarian and for two years tutor, and then for two years professor of chemistry at Bowdoin. He then entered Harvard divinity-school, and was graduated in 1859. For the next ten years he was pastor of the Independent Congregational church in Bangor, Me., which post he resigned in 1869 to accept the Bussey professorship of theology in Harvard. In 1863 he became also dean of the theological faculty. He has published, besides pamphlets and reviews, "The Science of Thought" (Boston, 1869); a discourse commemo-
rative of Leonard Woods (1870); "Religions before Christianity," a Sunday-school manual (Boston, 1885); and "Picture's Sense," of the "Knowledge, a Critical Exposition" (Chicago, 1884).

EVERTT, David, journalist, b. in Princeton, Mass., 29 March, 1770: d. in Marietta, Ohio, 21 Dec., 1813. He was graduated at Dartmouth in 1790. While teaching a grammar-school at North Ipswich he wrote the well-known juvenile recita-
tion, beginning,

"You'd scarce expect one of my age
To speak in public on the stage."

He studied law in Boston, and wrote for Russell's "Cassar's" paper in New York; he also contributed to a literary paper, the "Nightingale," in 1796. He removed to Amherst in 1802, where he practised law. Returning to Boston in 1807, in 1809 he edited the "Boston Patriot," and in 1812 the "Pilot." He wrote a series of papers on the Apollon, which were published in a pamphlet. He left Boston in 1813 for Marietta, Ohio, for the purpose of establishing a newspaper, but death interrup-
ted his plans. He was the author of "Common Sense in Dishable" and "Farmer's Monitor" (1799); "The Rights and Duties of Nations," an essay, and "Picture's Sense," of the "Boston Gazette," in defence of John Adams; and "Dar- renzel, or the Persian Patriot," a tragedy, which was brought out in Boston (Boston, 1800).

EVERTT, Edward Franklin, genealogist, b. in Northfield, Mass., 28 May, 1840. He was graduated at Harvard in 1860. He was secretary of the New England historical and genealogical society in 1862. From 1862 till 1865 he served in the volunteer army as lieutenant in 2d Massachusetts heavy artillery regiment, after which he went to Paris on the business of the New England Historical and Genealogical Society and discovered many new fungi, and several such plants have been named for him by his fellow-scientists. His brother, James Bowen, author, b. near West Chester, Pa., 26 July, 1821, was graduated at West Chester University, in 1843, and studied medicine at Philadelphia, and at the Harvard law-school. After prac-
tising law in West Chester for a few years, he travelled extensively in Europe and the east, and then devoted himself to literature. He was elected to the state senate in 1876, and was re-elected in 1880, but resigned in 1883, having been chosen as a Republican to congress, where he served in 1883-7, and then retired to private life. His writings, which are marked by terseness of style, include "Miscellaneous," in prose (West Chester, Pa., 1862); a volume of short poems (Philadelphia, 1868); and "The Fox Chase," a poem (Philadelphia, 1875).

EVERTT, Horace, congressman, b. in Vermont in 1789; d. in Windsor, Vt., 30 Jan., 1851. He was graduated at Brown in 1797, studied law, and practiced law for ten years. In 1825 he was elected to the Vermont legislature in 1819-20, 1822-4, and 1834, a prominent member of the State constitutional convention of 1838, and in that year was elected to congress as a Whig, serving from 1829 to 1843. While a member of congress he was a zealous advo-
cate of the rights of the Indians.

EVERTT, Joseph, clergyman, b. in Queen Anne county, Md., 17 June, 1732; d. in Cambridge, Md., 16 Aug., 1809. While living a licentious life he was converted at a meeting of the followers of Whitefield in 1762; he became the leading man of the Presbyterian church. He was a zealous Whig, and fought with the Maryland militia in the Revolu-
tionary war. He had grown less earnest in re-
ligious matters, when, in 1778, he was deeply impressed by the preaching of Francis Asbury, united with the Methodist church, and in 1780 became an itinerant preacher. He was ordained a deacon in 1786, and an elder in 1788. He was presiding elder of Cecil and neighboring circuits in 1789-90, and of other districts in Maryland till 1800, when he became presiding elder in Philadelphia, and afterward of the Delaware district. In 1804 he became disabled for continuous labor, though he continued to preach as a supernumerary. He was distinguished for the boldness and directness of his preaching; and was one of the most successful of the early Methodist preachers.

EVERTT, Edward Franklin, genealogist, b. in Northfield, Mass., 28 May, 1840. He was graduated at Harvard in 1860. He was secretary of the New England historical and genealogical society in 1862. From 1862 till 1865 he served in the volunteer army as lieutenant in 2d Massachusetts heavy artillery regiment, after which he went to Paris on the business of the New England Historical and Genealogical Society and discovered many new fungi, and several such plants have been named for him by his fellow-scientists. His brother, James Bowen, author, b. near West Chester, Pa., 26 July, 1821, was graduated at West Chester University, in 1843, and studied medicine at Philadelphia, and at the Harvard law-school. After prac-
tising law in West Chester for a few years, he travelled extensively in Europe and the east, and then devoted himself to literature. He was elected to the state senate in 1876, and was re-elected in 1880, but resigned in 1883, having been chosen as a Republican to congress, where he served in 1883-7, and then retired to private life. His writings, which are marked by terseness of style, include "Miscellaneous," in prose (West Chester, Pa., 1862); a volume of short poems (Philadelphia, 1868); and "The Fox Chase," a poem (Philadelphia, 1875).

EVERTT, Horace, congressman, b. in Vermont in 1789; d. in Windsor, Vt., 30 Jan., 1851. He was graduated at Brown in 1797, studied law, and practiced law for ten years. In 1825 he was elected to the Vermont legislature in 1819-20, 1822-4, and 1834, a prominent member of the State constitutional convention of 1838, and in that year was elected to congress as a Whig, serving from 1829 to 1843. While a member of congress he was a zealous advo-
cate of the rights of the Indians.
EVERTS, William Wallace, clergyman, b. in Granville, Washington co., N. Y., 13 March, 1814. He was graduated at the Hamilton literary and theological institution (now Madison university) in 1835, and became the pastor of the Baptist church in Earlville, N. Y. In 1838 he became pastor of the Tabernacle Baptist church in New York, and in 1842 he founded the Laight street Baptist church in the same city. Subsequently he was pastor in Wheatland, N. Y., Louisville, Ky., and in Chicago, where he remained twenty years. While there he was actively engaged in founding the Chicago university and the Chicago Baptist theological seminary. He removed to Jersey City, N. J., in 1879, and became pastor of a Baptist church there, but resigned his charge in 1885. Dr. Everts is the author of the following works: "The Pastor's Hand-Book" (New York, 1856); "The Bible Prayer-Book"; "The Scriptural School Reader"; "Life and Thoughts of John Foster"; "The Voyage of Life"; "The Promise and Training of Childhood"; "Words in Earnest"; and "Tracts for the Churches."

EVERTSEN, Cornelius, Dutch naval officer, b. in Zealand. He was a son of Admiral Cornelis Evertsen, who was killed in a battle with the English in 1668. He commanded a squadron of fifteen ships that was dispatched against the English colonies in 1673. After capturing or destroying the Virginia fleet of tobacco ships in the Chesapeake, he sailed northward, and on 7 Aug. anchored off Staten Island. His fleet had been re-enforced, and now, with its prizes, numbered 27 sail, with 1,600 men on board, and he demanded the surrender of the city, saying, "We have come to take the place, which is our own, and our own we will have." Some of the Dutch citizens visited the hostile fleet, and described the state of the defenses to the officers. The Dutch militia spiked the guns of a recently erected battery on the shore, and moved up the bay, exchanged shots with the fort, and landed 600 men under Capt. Anthony Colye, to whom the fort was surrendered without bloodshed, the British garrison being allowed to march out with the honors of war. The name New Orleans was applied by the city, which was enlarged by the neighboring settlements hastened to make their submission, and Evertsen, after confiscating the Duke of York's property, restoring the old form of municipality, and proclaiming Colye governor-general, set sail for Holland.

EVERTS, Thomas West, lawyer, b. in Grand View, Washington co., Ohio, 27 Feb., 1816; d. in Granville, Ohio, 8 Oct., 1881. He was self-educated, but rose to prominence in his profession. He was a member of the convention that formed the present constitution of Ohio and was actively engaged for more than a generation in promoting the educational and missionary work of the Baptist denomination, with which he was identified. He was a trustee of Denison university, president of the Ohio Baptist state convention, and vice-president of the national Baptist missionary union. In 1878 the degree of LL.D. was conferred upon him by Denison university.

EWBANK, Thomas, scientist, b. in Durham county, England, 11 March, 1722; d. in New York, 18 Sept., 1870. At the age of thirteen he was apprenticed to a carter and other trades, and in 1748 emigrated to New York, and followed the trade of a machinist, occupying at first Fulton's factory at Paulus Hook, which had remained undisturbed since the inventor's death. In 1790 he began the manufacture of metallic tubing in New York, and retired in 1856 to devote himself to literary and scientific pursuits. From 1849 till 1852 he was U.S. commissioner of patents. As a member of the commission to examine and report upon the strength of the marbles offered for the extension of the National bank, he expressed the opinion of woolen instead of the plates of lead usually placed between the stones, and established the fact that lead caused the stones to give way at half the pressure they would sustain without it, and that consequently in all previous trials there had been an undervaluation of the power of resistance to pressure in building-stones. He was one of the founders of the American ethnological society. He published "Descriptive and Historical Account of Hydraulic and other Machines, Ancient and Modern" (New York, 1842; 15th ed., with additions, 1863); "The World: a Work for the Popular Relation of Man to the Earth" (1855); "Life in Brazil," describing a visit to that country in 1845-6, with an appendix on a collection of American antiquities (1857); "Thoughts on Matter and Force" (1865); "Reminiscences of the Patent Office" (1859); and a variety of miscellaneous essays on the philosophy and history of inventions, which appeared chiefly in the "Transactions of the Franklin Institute." His "Experiments on Marine Propulsion, or the Virtue of Form in Propelling Bodies" was reprinted in Europe. In 1860 he published an essay that he had read before the Ethnological society, entitled "Inorganic Forces Ordained to Supersede Human Slavery."
in support of the petition of William and Mary college for an appropriation on account of the destruction of its buildings and property during the Civil War. — His brother, Richard Stoddert, soldier, b. in Georgetown, D. C., 8 Feb., 1817; d. in Springfield, Tenn., 25 Jan., 1872, was graduated at the U. S. Military Academy in 1840. His first experience of actual warfare was in Mexico, where, in August, 1847, he was engaged at Contreras and at Cerro Buchosco. He was promoted to captain, 4 Aug., 1849, and in June, 1857, won distinction fighting against the Apaches in the Mexico. When the civil war began, he resigned his commission, entered the Confederate army, and was actively engaged throughout the war. He was promoted to the rank of major-general, and fought at Blackburn's Ford, 18 July, 1861, and at Bull Run, 21 July. In the following year he distinguished himself under Jackson, by whose views and generalship he was greatly trusted, and took an active part in the various movements preceding the second battle of Bull Run, losing a leg at Warren ton Turnpike on 28 Aug., 1862. He took part also in the Maryland campaign. When Gen. Jackson was fatally wounded at Chancellorsville, Ewell, at his request, was promoted to lieutenant-general, and assigned to the command of the 2d corps. At the head of Jackson's veterans he fought valiantly at Winchester, at Gettysburg, and at the Wilderness on the Confederate left. He was captured, with his entire force, by Sheridan at Sailor's Creek, 6 April, 1865. After the war he retired to private life. Gen. Grant says in his "Memoirs": "Here [at Farmville] "I met Dr. Smith, a Virginian and an officer of the regular army, who told me that a conversation was had between Gen. Ewell, a relative of his [who had just been made a prisoner]. "Ewell had said that when we had got across the James river he knew their cause was lost, and it was the duty of their authorities to make the best terms they could while they still had a right to claim concessions. The authorities thought differently, however. Now the cause was lost, and they had no right to claim anything. He said further, that for every man that was killed after this in the war, somebody is responsible, and it would be but very little better than murder. He was not sure that Lee would consent to surrender his army without being able to consult with the president, but he hoped he would." Grant says this gave him the first idea of demanding the surrender. — Another brother, Thomas, was killed at the battle of Fredericksburg, 13 Dec., 1862.

EWELL, Marshall Davis, lawyer, b. in Oxford, Oakland co., Mich., 18 Aug., 1844. He was graduated at the Michigan state normal school in 1864, studied law, and was admitted to the bar at Detroit in 1868. He was elected judge of probate in Mason county, Mich., in 1874, and since 1877 has been professor of common law in the Union college of law, Chicago, Ill., and is an editor of the "American Law Register," of Philadelphia, and of the "Chicago Law Times." He has also given much attention to microscopy and meteorology; and

is professor of microscopical technology in Northwestern university, Evanston, Ill., and secretary of the Medico-legal society of Chicago. In 1886 he was elected a fellow of the Royal microscopical society of London. Michigan university gave him the degree of LL.D., and the medical college of Chicago the degree of M.D. in 1884. Dr. Ewell has published "Blackwell on Tax Titles" (Boston, 1875); "Leading Cases in Disabilities" (1876); "Treatise on the Law of Fixtures" (Chicago, 1877); "Illinois Reports" (vols. xxxii.-xxxvi., inclusive, 1877); "Washburn's Manual of Criminal Law" (1878); "Evans on Agency" (1879); "Lindley on Partnership" (1881); "Student's Manual of Medical Jurisprudence" (1887); and an abridgment of Blackstone.

EWEN, Mary Cecilia, actress, b. in New York city in 1850; d. there, 10 Nov., 1886. Her maiden name was Taylor. She made her first public appearance, at ten years of age, at a concert given in New York, and sang a scene from "Der Freischütz." Shortly afterward she appeared in the chorus of "Amilco" at the National theatre. Her special forte was light comedy, and she became so great a favorite that she was called "the American Mary." Among her greatest successes in the various theatres where she played were "Life in New York," "Child of the Regiment," and "Pride of the Market." She married, 11 Nov., 1852, W. Ogilvie Ewen, and retired from the stage about 1870. d. in Georgia soon after the Revolution. He came to Georgia about 1734 as an apprentice to the trustees, and was one of the earliest and most active of the Revolutionary leaders of that state. He was a member of the Council of safety, and as first president of the executive council performed the duties of governor in 1775.

EWER, Ferdinand Cartwright, clergyman, b. in Nantucket, Mass., 22 May, 1836; d. in Montreal, Canada, 10 Oct., 1888. He was graduated at Harvard in 1854. His parents were Prot estants, but he was baptized by the rector of the Protestant Episcopal church in Nantucket. This gentleman was one of the earliest of the "Ritualists," and young Ewer entered zealously into the novelties in worship of that day in the Episcopal church. It was his purpose to enter the ministry, but instead he chose civil engineering as his profession, and in 1849 sailed for California by way of Cape Horn. There he became a journalist, and for eight years was busily occupied in editorial work. In 1832, after years of doubt, he returned to the Episcopal church, was ordained deacon in 1857, and priest in 1858. He soon became rector of Grace church, San Francisco, where he labored for two years. His health having become impaired, he returned to the east in 1860, and was a while assistant minister in St. Ann's church, New York city, and in 1862 was chosen rector of Christ church. Here he began the introduction of practices not usual in Episcopal churches, which, after a time, created disturbance among the people, and the rector felt it best to resign his charge. This was in 1871, when some free thinkers organized a new parish, which was called by the name of St. Ignatius. Here he was at liberty to carry out fully his views as to doctrine and ritual, and he became the foremost champion of what he called catholic principles. Dr. Ewer was a man of genial spirit and temper, and was an able writer on theological and controverted points. While preaching in St. John's church, Montreal, Sunday, 7 Oct., 1883, he was stricken with paralysis, and died the third day afterward. Among other works he wrote "Two Eventful Nights, or the Futility of Spiritualism Exposed" (New York, 1858);
"Catholicity in its Relations to Protestantism and Romanism" (1878); "The Holy Spirit" (1880); and "Grammar of Theology" (1880).

EWING, Andrew, Confederate soldier, b. in Nashville, Tenn.; d. in Atlanta, Ga., 16 June, 1864. He studied law and became eminent in his profession, and for years participated in the political controversies that distinguished the history of Tennessee at that time. He represented the Nashville district in congress from 3 Dec, 1849, to 3 March, 1851, having been elected as a Democrat. In February, 1861, he was elected as a Unionist to represent Davidson county in the proposed State convention, which was voted down by the people. Subsequently he was drawn away from his allegiance to the Union, and took an active part against the government. After the fall of Fort Donelson he left his home, and until he died held an office in the Confederate army.

EWING, Charles, justice, b. in Venango county, Pa., 18 Jan., 1841; d. in New York, Feb., 1901. He was of Scotch-Irish descent, and it is known that both his parents were emigrant farmers. His early education was neglected, but it is said that he studied for a time in college. After the death of his parents he settled near Nashville, Tenn., and in 1823 married a daughter of William Davidson, a Revolutionary general. Soon afterward he went to Logan county, Ky., where he was licensed to preach, and in 1830 was ordained by the Cumberland presbytery. He met with remarkable success as a revivalist, but his ordination was not recognized by the Kentucky synod, and the presbytery being dissolved, and the action of the synod having been sustained by the general assembly, he, with two others, organized in 1810 the new Cumberland Presbyterian church, which now numbers about 2,000 congregations. In doctrine they occupy a middle ground between Calvinism and Arminianism.

EWING, James, soldier, b. in Lancaster county, Pa., 3 Aug., 1759; d. in Hellam, York co., Pa., 1 March, 1806. He was of Scotch-Irish descent, his father having emigrated from the north of Ireland to Pennsylvania in 1734. The son received a good education. In 1775 for service in the Revolution, and Duquesne he entered the provincial service, and was commissioned lieutenant 10 May, 1778. He was a member of the general assembly from 1771 till 1775. At the outbreak of the Revolution he was on the committee of safety for York county, and was chosen one of the two brigadier-generals of the Pennsylvania associators, 4 July, 1776. He had a part assigned to him at the surprise of Trenton, but was prevented from crossing the Delaware as previously arranged, owing to the ice and high wind. He served as vice-president of Pennsylvania from 1775 till 1779. In the latter year, and under the constitution of 1789-90, he was a member of the assembly of Pennsylvania, and served as state senator from 1795 till 1799. He was one of the original trustees of Dickinson college, Carlisle.

EWING, John, educator, b. in Nottingham, Md., 22 June, 1732; d. in Philadelphia, Pa., 8 Sept., 1792. His ancestors emigrated from Ireland and settled in Pennsylvania. After attending the academy of Dr. Francis Alison in New London, he entered Princeton, and graduated in 1754, and served as tutor in 1756. He then studied theology with Dr. Alison, and was licensed by the presbytery of Newcastle. While employed in instructing the philosophical classes in the College of Philadelphia, during the absence of the professor of divinity, he was an examiner in the first Presbyterian church of that city. He was commissioned in 1773 to solicit contributions in Great Britain for the support of the college of New Jersey, in Delaware, and was successful. He had frequent interviews with the prime minister, Lord North, and Dr. Johnson, 1774. The last affirmed that the Americans were as ignorant as they were rebellious, and said, "You never read. You have no books there." "Pardon me," was the reply, "we have read the 'Rambler.'" In 1775 he returned from Europe, and from 1779 till his death held, by appointment, the office of provost, or chancellor, of the University of Pennsylvania. He was a thorough mathematician and scientist, and assisted Rittenhouse in surveying the boundaries of several states. The University of Edinburgh gave him the degree of D.D. in 1773. He was vice-president of the American philosophical society, and made several contributions to its "Transactions," among which was an "Account of the Transit of Venus over the Sun." His collegiate lectures on natural philosophy, and a biography by Rev. R. Patterson, were published after his death (2 vols., 1809), and also a volume of his sermons, with a memoir (Philadelphia, 1812).

EWING, Thomas, statesman, b. near West Liberty, Ohio co., Va., 28 Dec., 1799; d. in Lancaster, Ohio, 20 Oct., 1874. His father, George Ewing, served in the Revolution; the latter with his family in 1792 to the Muskingum river, and then to what is now Athens county, Ohio. In this unsettled district young Ewing's education was necessarily imperfect. His sister taught him to read, and in the evenings he studied the few books at his command. At the age of 16 he left his home and worked in the Kanawha salt establishments, pursuing his studies at night by the light of the furnace-fires. He remained here till
he had earned enough money to clear from debt the farm that his father had bought in 1792, and had qualified himself to enter the Ohio university at Athens, where, in 1815, he received the first degree of A. B. that was ever granted in the Northwest. He then studied law in Lancaster, was admitted to the bar in 1816, and practised with success for fifteen years. In 1831-7 he served as U. S. senator from Ohio, having been chosen as a Whig. He supported the protective tariff system of Clay, and advocated a reduction in the rates of postage, a recharter of the U. S. bank, and the renewal of the collection bill, known as the "force bill." He opposed the removal of the deposits from the U. S. bank, and introduced a bill for the settlement of the Ohio boundary question, which was passed in 1838. During the same session he brought forward a bill for the reorganization of the general land-office, which was passed, and also presented a memorial for the abolition of slavery. In July, 1836, the secretary of the treasury issued what was known as the "specie circular." This directed receivers in land-offices to accept payments only in gold, silver, or treasury certificates, except from certain classes of persons for a limited time. Mr. Ewing brought in a bill to annul this circular, and another to make it unlawful for the secretary to make such a discrimination, but these were not carried. After the expiration of his term in 1837 he resumed the practice of his profession. He became secretary of the treasury in 1841, under Harrison, and in 1849 accepted the newly created portfolio of the interior, under Taylor, and organized that department. Among the measures recommended in his first report, 3 Dec., 1849, were the establishment of a mint near the California gold-mines, and the construction of a railroad to the Pacific. When Thomas Corwin became secretary of the treasury in 1850, Mr. Ewing was appointed to succeed him in the senate. During this term he opposed the fugitive slave law, Clay's compromise bill, reported a bill for the establishment of a branch mint in California, and advocated a reduction of postage, and the abolition of slavery in the District of Columbia. He retired from public life in 1851, and again resumed his law-practice in Lancaster. He was a delegate to the peace congress of 1861. During the civil war he gave, through the press and by correspondence and personal interviews, his counsel and influence to the support of the National authorities. While he devoted much of his time to political subjects, the law was his favorite study and pursuit. He early won and maintained throughout his life unquestioned supremacy at the bar of Ohio; and ranked in the supreme court of the United States among the foremost lawyers of the nation. In 1839, just after his father's death, Gen. William T. Sherman, then a boy nine years of age, was adopted by Mr. Ewing, who afterward appointed him to the U. S. military academy, and in 1850 he married Ellen, the daughter of his benefactor. His son, Hugh Boyle, soldier, b. in Lancaster, Ohio, 31 Oct., 1826, was educated at the U. S. military academy. At the time of the gold fever, in 1849, he went to California by way of New Orleans and Texas, and travelled extensively through that country, going to the High Sierra in an expedition sent by his father, the latter of whom a year later opened an office with his brother Thomas in Leavenworth, Kansas. In 1858 he removed to Ohio, in order to assume charge of his father's salt-works. In April, 1861, he was appointed brigade-inspector of Ohio volunteers, with the rank of major, and took part in the early combats in the mountains of West Virginia under McClellan and Rosecrans. He commanded the 30th Ohio regiment in August, 1861, was appointed brigadier-general, 29 Nov., 1862, and brevetted major-general in 1865. He led a brigade at Antietam, and at the siege of Petersburg, 1864-5, and subsequently served in Georgia, which formed the advance of Sherman's army, and which, in a desperate battle, carried Mission Ridge. He was afterward ordered to North Carolina, and was preparing a secret joint military and naval expedition up the Roanoke, when the war came to an end. In 1866 he was appointed U. S. minister to Holland, where he served for four years. After his return he bought a small estate near his native town, where he has since resided. Gen. Ewing has travelled widely in this country and abroad, and is author of "The Grand Ledge, a Tale of Early California," and "A Castle in the Air" (1887). —Another son, Thomas, lawyer, b. in Lancaster, Ohio, 7 Aug., 1829, was educated at Brown university, which gave him the degree of A. M. in 1860. He was private secretary to President Taylor, and subsequently studied law in Cincinnati, where he began to practise his profession. In 1856 he removed to Leavenworth, Kansas, and became a member of the Leavenworth constitutional convention of 1858, and in 1861 became the first chief-justice of the state. He was a delegate to the Peace conference of 1860. He resigned his judgeship in 1862, recruited the 11th Kansas regiment, was made its colonel, and served with distinction in the civil war, taking part in the battles of Fort Wayne, Cane Hill, and Prairie Grove. He was made brigadier-general, 13 March, 1863, for gallantry at the last-named battle, commanded the district of the border, and subsequently at Pilot Knob, 28 Sept., 1864, with a thousand men, held his position against the repeated assaults of the Confederates under Price, thus checking the invasion of Missouri. He retired to Rolla in 1864, and in 1865 was brevetted major-general of volunteers. After the war he practised law in Washington, D. C., but returned to Lancaster in 1871, and in 1877-'81 was a member of congress, where he prepared a bill to establish a bureau of labor statistics. He also actively supported the measures that stopped the use of troops at the polls, advocated the remonetization of silver, and the retention of the greenback currency. In 1879 he was the unsuccessful candidate for governor of Ohio. At the close of his last term in 1882 he declined a renomination, and removed to New York city, where he has since practised law.—Another son, Charles, soldier, b. in Lancaster, Ohio, 6 March, 1855; d. in Washington, D. C., 20 June,
1888, was educated in his native town, at a Dominican college, and at the University of Virginia. At the beginning of the civil war he received a commission in the regular army of the United States, and served for some time on the staff of his brother-in-law, Gen. William T. Sherman. He was brevetted major in 1863 for gallantry in the first assault at Vicksburg, where he was wounded while planting the flag of his battery on the parapet of the fort. He became major in 1864 for services in the Atlanta campaign, and colonel in 1865 for gallant conduct during the war. On 8 March, 1865, he was appointed brigadier-general of volunteers. He resigned his commission in 1867, and practised law successfully in Washington, D.C., during the remainder of his life.

Ewing, William Bellford, physician, b. in Greenwich, N. J., in 1776; d. there, 23 April, 1866. He was graduated at Princeton in 1794, studied medicine at Trenton under Dr. Nicholas Bellville, and began to practise his profession in the island of St. Croix, where he continued for two years. He then settled in Greenwich, where he practised for twenty-eight years. For many years he was presiding judge of the county courts, for ten years a member of the legislative, and a member of the New York House of Delegates. He became in 1823 he was president of the New Jersey medical society, of which he was one of the oldest fellows.

Ewing, William Lee Davidson, senator, b. in 1793; d. in Ohio, 25 March, 1846. He received an academic education, studied law, was admitted to the bar, and engaged in practice. He was receiver of public moneys for the district of Vandalia in 1853, and in 1856-7 was U. S. surveyor of public lands and general of state militia. He served as major of the "Spy battalion" in the Black-Hawk war in 1832, became a member of the state senate in that year, and was its speaker. In 1834, acting as governor from 15 Nov. till 9 Dec. On 29 Dec., 1835, he was chosen to the U. S. senate to fill the vacancy caused by the death of Elias K. Kane, and he served till 4 March, 1837. He was speaker of the state house of representatives in 1849, and in 1843 was chosen state auditor, which office he held until his death.

Exmouth, Edward Pellew, Viscount, English naval officer, b. in Dover, England, 19 April, 1797; d. in Teignmouth, 23 Jan., 1863. He entered the navy in 1797, was appointed a midshipman, and served in the "Blondel," which sailed to the relief of Quebec. His first distinction was gained in the battle of Lake Champlain, 11 Oct., 1778, against the flotilla of Arnold, whom he nearly made prisoner. In command of a body of seamen, he rendered great assistance to the army of Burgoyne in its difficult advance to Saratoga, was sent to England with despatches, and promoted. He became post-captain in 1782, and from 1786 till 1789 was stationed off Newfoundland. In the war with France he commanded the frigate "Nymph," of thirty-six guns, in 1793, and captured the French frigate "La Cleopatre," after a desperate battle. This was the first prize taken in the war, and Exmouth was knighted, and afterward employed to blockade the coast of France. In 1796, by his bravery and presence of mind, he saved the lives of all on board a wrecked transport. In 1798, he was made a baronet. He was elected to parliament in 1802. He returned to the navy in 1804, was promoted rear-admiral, and made commander-in-chief in the East Indies, where he annihilated the Dutch fleet in 1806. He became vice-admiral in 1816, was sent to command forces in the Mediterranean in 1810, and during this service con-
and in 1862 he was chosen to administer the government of Jamaica and its dependencies during the absences of Gov. Davidson. He found this a matter of difficulty, as the inhabitants were disaffected and on the point of rebellion. The colored population, constituting 97 per cent. of the inhabitants of the island, suffered from agricultural depression and loss of trade, and attributed their distress to the government of their white legislators, who had recently increased the taxes and voted money for public works of a speculative character. They were further incensed by new laws prescribing flogging for petty offenses, and introducing cruel punishments in the prisons. In 1864 Mr. Eyre was appointed captain-general and vice-admiral of the island of Jamaica, and in October, 1865, suppressed an insurrection. The means that he adopted in accomplishing this were censured by many in Great Britain, especially his condignation to death of a rioter, Matteo, George Williams the Madman. A commission of inquiry was despatched to Jamaica, and Gov. Eyre was superseded temporarily by Sir Henry Storks. Though the report of the commission, published in June, 1866, disproved the charges brought against Eyre, he was nevertheless recalled, and on his arrival in England was prosecuted by the "Jamaica Committee" for his action in suppressing the revolt; but this and other prosecutions, extending over four years, costing him £10,000, failed to substantiate the charges against him.

EYRE, Sir William, British soldier, b. in Hatfield, England, in 1805; d. in England in 1859. He was a son of Vice-Admiral Sir George Eyre. He entered the army in 1823, accompanied the 73rd regiment to Canada, and acted as aide-de-camp to the lieutenant-governor of Upper Canada while there. In 1847 he was appointed captain-general and attained the rank of lieutenant-colonel. He had command of a brigade in the Crimean war, and for his services was created a knight of the bath, a commander of the legion of honor, and a knight of the Turkish order of Medjidie. In June, 1850, he was appointed to the command of all the troops in Canada, and he also administered the government during the absence of Sir Edmund W. Head, the governor-general.

EYSTER, Nellie, author, b. in Frederick, Md., in 1831. She is the daughter of Abraham Blessing, publisher of "The Lancaster Eagle," and T. Eyster, of Harrisburg, Pa., where she resided till her removal to San José, Cal., in 1875. She has contributed frequently to "Harper's Magazine," "Saint Nicholas," and "Wide Awake," and has published in book-form "Sunny Hours" (1865); "Chincapin Charlie" (Philadelphia, 1869); "On the Wing"; "Tom Harding and his Friends" (1869); "Robert Brent's Three Christmas Days"; and "Lionel Wintour's Diary" (1885).

ETYINGE, Rose, actress, b. in Philadelphia, Pa., in September, 1833. She first appeared in Brooklyn as an amateur in 1852, and during the following year went west, playing with Hough's dramatic company. Later she was connected with the Green street theatre in Albany, and acted there for some time. Her first appearance in New York was under the management of Laura Keene, where she filled an engagement of two weeks. Subsequently she was connected with Edwin Booth, and afterward was engaged at the Winter Garden theatre. In 1866-'9 she was leading lady in Wallack's company, playing in "Hamlet," "Les Liaisons," and other characters. She then staid through the country in various roles, succeeded best in Rose Michel, and afterward played Gervaise in "Drink" at the Standard theatre, New York, making a great success. She also appeared in the title role of "Policia" at the Utica opera in New York. In 1880 she visited England, where she was well received, and in 1884 made a starring tour through the United States, playing in legitimate drama. While in Albany she married David Barnes, from whom she was afterward divorced, and married George H. Butler, for a time U. S. consul-general to Egypt. Later she married Cyril Searle, who was her leading support while travelling.

EYZAGUIRRE (ay-thah-ghee-ray), the name of five brothers, Chilian, who lived in the 19th and 20th centuries.—Aquita, a town, that caused a go-de-Chili in 1766; d. there, 17 July, 1837. During the first days of the revolt of Chili against Spanish domination in 1810 he was a member of the municipal corporation of Santiago, and joined the revolutionary cause with enthusiasm, and in 1812 was elected deputy to the first congress. When, in 1813, Gen. Carrera marched to meet the invasion of Pareja, the senate appointed a temporary government, and Eyzaguirre was elected a member. He took an active part in founding the national academy and many schools, and in promulgating the liberty of the press. He was one of those by whom illustration the first republican paper was printed at Santiago. After the unfortunate battle of Rancagua, in October, 1814, he, with other patriots, was imprisoned on the island of Juan Fernandez, until the battle of Chacabuco, 12 Feb., 1817, restored the exiles to their families. During the presidency of O'Higgins, Eyzaguirre retired to private life and devoted himself to his commercial interests. During this time he organized the famous Calcutta company, for direct trade between the East Indies and Valparaiso, and thus was the first to cause the Chilian flag to float in Asiatic seas. After the downfall of the O'Higgins government, 28 Jan., 1823, Eyzaguirre was twice called to the executive chair of the republic, first as a member of the provisional government, and again after the resignation of President Vidal in 1838, and as vice-president, 10 Sept., 1826, to 26 Jan., 1827, when he resigned in consequence of a military mutiny, and returned to private life.—Miguel, jurist, b. in Santiago about 1770; d. in Lambayeque, Peru, in 1821. In 1806 he was appointed prosecutor of the royal supreme court. As the supreme court made judge of the same court; but, on account of the participation of his brothers in the liberation of Chili, he fell under suspicion, was arrested and sent as prisoner to Spain, but died on the way.—Domingo, philanthropist, b. in Santiago, 17 July, 1775; d. there in April, 1834. He studied in the seminary of his native city, and showed remarkable aptitude for mathematics and chemistry. When scarcely nineteen years old he was appointed sev- eror of the royal mint of Santiago, but resigned the next year, and devoted himself entirely to the cultivation of a farm near Santiago, inherited from his father. There his labors tended more to the improvement of the condition of the laboring classes than to his own pecuniary interest. He improved the yield of some of the poorest lands by his knowledge of the care of agricultural implements, and, by giving his laborers better than the accustomed wages and caring for their moral and material welfare, soon assembled a colony of well-to-do and contented people. He also introduced looms, which, although imperfect, served to work for, Bedruff, which was worn by the peasantry. From the first years of his country life he agitated the project of a canal
to water the barren plain surrounding Santiago, which had been begun some time before, but was abandoned. The Spanish government approved this plan, and in 1835 he was Eyzaguirre diocese. He continued the work with energy, until it was interrupted by the revolution of 1810, and notwithstanding he sympathized with the patriotic cause, he abstained from any participation. His prestige as an honorable and impartial man was so great that he was left in peace, and he suffered no persecution from the Spanish authorities, and was enabled to alleviate the sufferings of his compatriots. When the independence of Chili was finally established in 1817, he resumed his favorite work, and in 1830, amid great festivities, the canal of Maipo was opened. This, with many smaller lateral canals, soon converted the arid plain into a fertile garden. It was placed by the government under the administration of a board, of which Eyzaguirre was appointed president. In 1833 he was commissioned to reorganize the charitable institutions, and undertook the task of building a home for wayfarers and needy persons. Within a few years he had collected the necessary means, and a new and commodious building was erected. In 1835 he was appointed first governor of the department of Victoria, the capital of which he had founded, and in 1847 he was consecrated priest. He established the agricultural society in 1838, and was elected its president. He was several times deputy to the National congress, where he soon became noted for his honesty. In 1845 he attempted to establish a socialist colony in the country, where the labor and produce should be shared by all, but soon disquisitions broke out, and the project failed. A few years later he undertook to establish a large cloth-factory, with the object of improving the condition of the poor and giving employment to women and children. In this enterprise he invested the greater part of his fortune, but before the factory was finished he died. The Maipo canal board erected a statue to his memory. —José Alejo, clergyman, b. in Santiago in 1783; d. there in 1840, studied in the seminary of his native city, attended the University of San Felipe, where he was graduated in law in 1808. He began the practice of his profession, and at the same time was made professor of canonical law in the university. In 1805 he accompanied his brother Miguel to Lima, but decided to enter the church, and in 1807 was consecrated priest. He returned in 1815 to Chili, and was appointed attorney of the ecclesiastical court of the archdiocese of Santiago, and afterward rector of the parish of Sagrario, where he became known as the most eminent pulpit orator of South America. In 1823 he was banished by the dictator O'Higgins to Mendoza, where he was well received by the clergy, and for two years directed an educational institute that was founded by him. Then he returned to Chili, and by the government of Freire was appointed on several important commissions. The archbishop made him his vicar, and afterward canon of the cathedral. He was elected three times to congress, and as such signed the constitution of 1828, and later was councillor of state. Some years later he was elected dean of the cathedral, and possessed the "breviario" for life, which he had founded, he was offered the seat, but declined it. In 1843, on the death of Archbishop Vicuña, he was appointed capitular vicar, and soon elected to the archbishopric, in which dignity he continued his simple, unostentatious life. Toward the end of 1846, on account of declining health, he resigned the archiepiscopal see, and lived in privacy at Santiago till his death. —José Ignacio, senator, b. in Santiago about 1877; d. there about 1850, took a prominent part in the Chilian struggle for liberty, was banished, went to Argentina, then to Juan Fernandez, and returned in 1817. In 1828 he was appointed secretary of the treasury, and in 1834 senator of the republic, which place he held until his death. In 1837 he wrote a history of the Chilian revolution. —His son, José Ignacio Victor, clergyman, b. in Santiago, 20 March, 1894; d. in Alexandria, Egypt, 8 Oct., 1875, studied in the seminary of Santiago, was early consecrated priest, and soon became famous as an orator. In 1854 he was elected to congress, and in 1866 became vice-president of the lower house. At the same time he was a member of several benevolent societies, and received high credit for promoting public instruction and protecting the poor. He was also professor of the humanities, theology, and sacred science. He travelled extensively in Palestine, Europe, and the United States, and published a work descriptive of that country. In 1871 he founded in Rome a South American seminary, and was appointed a monsignor. Eyzaguirre was elected member of several scientific societies in Italy and France, and honorary member of the Spanish academy. Returning from one of his trips to Paris, he died of exhaustion in the port of Alexandria. His most important publications are "La historia eclesiástica, política y literaria de Chile"; "El catolicismo en presencia de sus disidentes"; and "Los intereses católicos en América," all of which were published in Chili, and translated into French (Paris, 1874). —EZEKIEL Moses Jacob, sculptor, b. in Richmond, Va., 28 Oct., 1844. He is of Hebrew parentage, and at an early age manifested his talent by painting panoramas. He entered the Virginia military institute, at Lexington, in 1861, and was graduated there in 1866, after serving in the Confederate army in 1864-5. He then served in his father's dry-goods store, but devoted a portion of each day to his art, and executed some creditable paintings, among which was "The Prisoner's Wife." Soon afterward he removed his attention to sculpture, and produced "Cain, or the Offering Rejected," an ideal bust that showed dramatic talent. After studying anatomy in the Medical college of Virginia, he removed to Cincinnati in 1868, and in the following year went to Berlin, Germany. In 1872 he modelled the colossal bust of Washington, now in Cincinnati, which gained him admission into the Society of artists of Berlin. In 1873 he won the Michael Beer prize, which had never before been awarded to a foreigner. In 1874 the Jewish secret order Sons of the Covenant commissioned him to execute a group entitled "Religious Liberty" for the Centennial exhibition. This was unveiled in Fairmount Park, Philadelphia, 30 Nov., 1876, and now stands in front of Horticultural Hall. He was afterward commissioned to execute statues for the outside niche of the Corcoran art-galley, Washington, D. C. Since 1886 his works have been mainly ideal. Among his works are busts of Liszt and Cardinal Hohenlohe; a statuette of "Industry" (1888); reliefs of Schiller and Goethe (1870); bas-relief portraits of Farragut (1872) and Robert E. Lee (1870); "Relief of Washington," relief (1875); "Fountain of Neptune," Nettuno, Italy (1884); a bronze medallion of William W. Corcoran for his gallery in Washington (1886); and a group entitled "Art and Nature," in Frankfurt, Germany (1887). He received the cavalier's cross of merit for art and science, with a diploma from the grand-duke of Saxo-Meiningen, in 1887.
tained an audience with the pope, and returned to Canada. He was ordained priest, 28 Feb., 1850, and stationed as curate in Sorel. On 30 Oct., 1852, he was appointed pastor of Pointe-Claire, where he exercised his ministry for two years. He was then summoned to Montreal, and became distinguished as a pulpit orator; also for his influence among the students of the city, his lectures and retreats having wrought a marked change among the medical students. He made a second visit to Rome in 1889 at the time of the Vatican council, and thence went to Belgium to study the historical and medical instruction in use in the deaf-and-dumb asylums. He afterward turned his experience to account in the institution that he founded in Montreal. On 1 April, 1873, he was consecrated bishop of Gatineau, and confessor of the Order of Montreal. He was appointed bishop of Montreal, 11 May, 1876, and in 1886, the diocese of Montreal having been erected into an archiepiscopal see, Dr. Fabret became the first archbishop, 8 June.—His brother, Louis K. Hector, Canadian journalist, b. in Montreal, 9 Aug., 1834, was educated at the College de L'Assomption and St. Hyacinthe, and at St. Sulpice of Montreal. He studied law with his brother-in-law, the late Sir George E. Cartier, and was called to the bar of Lower Canada in 1856. He has been long connected with the newspaper press of Quebec. He was for some time editor of the Montreal "Evening Star," and from 1863 till 1866 had editorial management of the "Canada," Quebec. In 1869 he founded the "L'Evénement," Quebec, and was its editor and proprietor. He has been a vice-president of the Dominion editors' and reporters' association, and president of the Literary and Historical society of Quebec. He was an unsuccessful candidate for a seat in the house of commons in 1873, but was called to the senate in 1875. He is the author of "Esquisse biographique sur Chevalier de Lorimier" (Montreal, 1854), and of several literary "Reviews and Essays," "Canadian Review," "1885-6," "Canadian Literature" (1840); and "Confederation, Independence, Annexation" (Quebec, 1871).

FABREGAT, Lino (lah-bray-gah), Mexican scholar, b. in Mexico in 1746; d. there in 1809. He was the son of a Spanish merchant, who was himself engaged in commerce for some time, but, after suffering several severe losses, he decided to give up business and devote himself to study. He entered the Jesuit's college in Mexico in 1774, and was debating as to what branch he should pursue, when Father Figuere, superior of the order, suggested that he apply himself to deciphering some Aztec manuscripts in the college library. Father Fabregat immediately set to work, became greatly interested, and was soon able to read the manuscripts. He spent much time in wandering about the country, examining private libraries, and searching for stones bearing Aztec inscriptions. He soon gathered a magnificent collection, which he spent his time in deciphering. The Jesuits now urged him to go to Rome, where he could profit by the labors of such men as Boturini, Veytia, Bornemass, Espinosa, Ambrosio Garcia, some of whom were still living, and where the treasures of the Vatican would aid him in his researches. He accordingly set out for Rome, where, to facilitate his studies, Cardinal Borgia made him librarian in 1790. Thenceforward Father Fabregat lived alternately in Rome and Mexico. The French invasion of 1800 forced him to return to Mexico.
permanently, and he remained there till his death. Father Fabregat's works are of great value, as he was one of the first to explain the signification of Aztec manuscripts, and we owe to him all knowledge of Mexican history before the Spanish conquest. It is much to be regretted that Father Fabregat died before the completion of his labors, and left behind him but few notes, for since his time but little advance has been made in knowledge of his history and his writings. A few years longer, many points would have been decided that to this day remain contested. Father Fabregat left a manuscript in the Vatican library entitled "Explicationes degli figurari hieroglifici del Codex Mexicano." This work was published by Ramirez (1827), and opened the way to important discoveries. The notes left by Father Fabregat were collected and published by Tennaux-Compan, as "Notes et manuscrits et ouvrages inachevés laissés par l'illustre hierogamiste Mexicain, Fabregat tires des archives du collège des Jésuites et de la bibliothèque Vaticane" (4 vols., Paris, 1843).

FAGNANI, Joseph (fan-yah-ne), artist, b. in Naples, Italy, 24 Dec., 1819; d. in New York city, 22 May, 1873. He studied art in the Royal Academy of Naples, and began his career at an early age. His reputation was established by his "Femmina e Bambino," which was exhibited at the Paris exhibition in 1843. While under this engagement he formed the acquaintance of Sir Robert Peel and Sir Henry Bulwer, with whom he came to New York in 1851, and there married an American. In 1858 he visited Europe, and was ordered by Queen Christina, then at Madrid, to paint portraits of herself and portraits of the Prince and Princess Ladislas Czartorski. In 1860 he painted two portraits of Richard Cobden, one of which was given by Fagnani to the New York sanitary fair, where it was bought by Morris Ketchum, Esq., who presented it to the New York chamber of commerce; the other was purchased by the National portrait gallery of London. His principal works are the portraits of Garibaldi, Victor Emanuel, the Prime Minister Rattazzi and Gen. Cialdini, Sir Henry Bulwer, Lord Byron, the ex-Empress Eugenie, and the Congress of 1866. Among his most notable works is the sketch of President Taylor, taken after his death, and a portrait of Sir Henry Bulwer, executed in Madrid in 1846. His house in New York contained many rare specimens of art, collected from all parts of Europe. This collection was sold shortly after his death. His paintings of the "Nine Muses," now in the Metropolitan museum of art, New York, attracted much attention, as well-known American beauties had served as models.

FAOOGA, Francisco (fa-goh-gah), Mexican patriot, b. in Toluca, 7 Feb., 1788; d. there, 20 July, 1851. He was a son of the first Marquis of Apaitaro. Fagoaga entered the College of San Ildefonso in 1796, where he studied philosophy, went to Paris in 1808 to finish his studies, and afterward travelled through Europe. As a representative of Guadalajara, in 1824, he was elected deputy for the province of Mexico to the Spanish Cortes, and, sympathizing with the struggle for independence in his native country, spoke often in defense of its political rights, and, together with Ramos Aripe, prepared the recognition of its independence. He returned to Mexico after the fall of Iturbide in 1823, and was immediately elected president of the municipal council of Mexico, where he made many improvements. In 1832 he was appointed secretary of foreign relations by the government of the latter having been overthrown by Santa Anna. Fagoaga was forced to emigrate to Europe, where he lived for several years. After his return adverse circumstances obliged him, in 1841, to make an assignment, and, giving up his art collection and his library to his creditors, he retired from public life. When his elder brother, the Marquis of Apaitaro, died, leaving the greater part of his fortune for charitable purposes, Fagoaga was appointed trustee, and soon was recognized as one of the public benefactors of Mexico. He rebuilt and endowed the School of Bookbindery and the Lancasterian schools, established, as donor, with Luis de la Rosa, the School of design, and with Francisco Carvajal, the School for trades and mechanical teaching. Moreover, privately and without ostentation, he relieved innumerable needy families by means of his own savings. He was a legislator, a member of the board of mines, and of several scientific associations and public boards. At his death the inmates of the Charitable home petitioned that his body be buried in the chapel of the institution, which was done.

FAHY, Anthony, b. in Ireland, in 1804; d. in Buenos Ayres in 1871. He studied theology in St. Clement's Irish conven of Dominicans, Rome, where he became a member of the order. After being ordained priest he came to the United States, and for more than ten years was a missionary in Kentucky. In 1849 he was invited by the Irish residents of Buenos Ayres to become their pastor, and went thither. In 1857 he brought out Sisters of Mercy from Ireland, by whose aid he founded the Irish convent, and in 1861 he erected a large building for them in the Calle Rio Bamba. As the number of irishmen increased in numbers and prosperity, he provided them with chaplains at Luxembourg, Petersburg, Capilla del Senor, San Antonio, and in all the mining districts. He founded burses in the missionary college of All-Hallows, Dublin, especially for this purpose, and traveled all over Ireland, organizing new libraries, and schools. Notwithstanding his age and ill-health, he continued his attendance on the sick during the yellow-fever epidemic of 1871, until he was prostrated by the disease three days before his death. He died so poor that his funeral expenses had to be borne by his parishioners.

FAILLON, Michel Ettienne, author, b. in Tarbes, France, in 1799; d. in Paris, 25 Oct., 1870. He was a Sulpician of Paris, and came to Montreal in 1854 as a visitor to the houses of the congregation in America. He has contributed to the history of Canada. His works include: Les Vivants (1834); Madame d'Yonville, foundress of the Grey Sisters (1853); Mlle. Maure, foundress of the Hôtel Dieu (1854); Madame d'Yonville, foundress of the Grey Sisters (1853); Mlle. le Ber., foundress of the Grey Sisters, etc. He has written the history of the French colony in Canada, of which three volumes (1865-6) appeared before his death, embracing only a small portion of his plan.

FAIR, James Graham, capitalist, b. near Bel-
fast, Ireland, 3 Dec., 1801. His parents emigrated to the United States in 1835, and settled in Illinois, where he attended the public schools.
completed his education in Chicago, received a business training there, and paid much attention to scientific studies. He went to California in 1849, and after engaging in mining till 1860, he removed to Nevada, where he amassed a fortune of $50,000,000. He was especially successful in the construction of quartz-mills, water-works, and chlorinizing furnaces. In 1865 he became superintendent of the Ophir mine, and in 1867 of the Maine and Norcross. In the latter year he also formed a partnership with John W. Mackay, James C. Flood, and William T. O'Brien, and purchased the control of several well-known mines. The yield of gold and silver in these mines during Mr. Fair's service as superintendent is estimated to have reached $200,000,000. Mr. Fair was elected to the U. S. senate from Nevada, as a Democrat, to succeed William Sharon, Republican, and served from 1881 till 1887. He is largely interested in manufactures on the Pacific coast.

**FAIRBANKS.** Erastus, manufacturer, b. in Brimfield, Mass., 28 Oct., 1792; d. 24 Nov., 1864. He was fifth in descent from Jonathan Fairbanks, who came from England and settled in Dedham, Mass., in 1633. The old Fairbanks house in Dedham is the residence of the family, and still in possession of the family, is represented in the accompanying illustration. Erastus began to study law, but gave it up on account of an affection of the eyes, and engaged in trade in various places, finally removing to St. Johnsbury, Vt. He formed a partnership with his brother Thaddeus in 1824, and began the manufacture of cast-iron plows and stovе-castings. In 1826 the firm, with several others, formed the St. Johnsbury hemp-dressing company, and in 1831 the brothers gave their entire attention to making the platform-scales invented by Thaddeus. Erastus remained at the head of the firm till his death. He was a member of the legislature in 1836-8, president of the Passumpsic railroad company in 1849, and was elected governor of Vermont in 1851 and 1860, rendering efficient aid to the government in the early days of the civil war.—His brother, Thaddeus, inventor, b. in Brimfield, Mass., 17 Jan., 1796; d. in St. Johnsbury, Vt., 12 April, 1886, removed with his father in 1815 to St. Johnsbury, Vt., and aided him in a saw and grist-mill, also making carriages. He had an aptitude for mechanics, and in 1826, while engaged in the business of dressing hemp, observed the rudeness of the methods in use for weighing it. The result was the invention of his platform-scale, for which he received a patent on 21 June, 1831. Platform-scales were not unknown before that time, but had been little used. The most essential improvements invented by Mr. Fairbanks were the employment of only two levers, and the use of knife-edge bearings, resting on plane-polished steel surfaces. Other improvements, covered by about fifty patents, were afterward made, and the Fairbanks scales are now used in all parts of the world. It has been estimated that they weigh a million-million pounds a week. The scales have received medals at eight international exhibitions, and Thaddeus Fairbanks received in 1873, from the emperor of Austria, the cross of the order of Francis Joseph.—Another brother, Joseph Paddock, b. in Brimfield, Mass., 26 Nov., 1816; d. 15 May, 1855, studied law, but became a member of the firm in 1834, and took charge of the introduction of the scales into general use.—Erastus's son, Horace, b. in St. Johnsbury, Vt., 21 March, 1826, succeeded his father as manager of the firm, and on the organization of the Fairbanks scale company, 24 Nov., 1874, became its president. He has served as state senator, and in 1876 was elected governor of Vermont.—Another son, Franklin, b. 18 June, 1828, has contributed several inventions toward perfecting the scales, and has also patented modifications of the special machinery used in their manufacture. He was a member of the Vermont legislature in 1871-2, and was speaker of the house.—Thaddeus's only son, Henry, b. in St. Johnsbury, Vt., 6 May, 1830, was graduated at Dartmouth in 1851, and at the Philadelphia seminary in 1857. He was ordained in 1858, held pastorates in Burke and Barnet, Vt., and in 1859 became professor of natural philosophy at Dartmouth. He exchanged this chair for that of natural history in 1865, and since 1868 has resided in St. Johnsbury, devoting his time to mechanical experiments. He has patented several inventions relating to the manufacture of scales and to other industries. He has been a member of the board of trustees of Dartmouth college since 1870.

**FAIRCHILD, Asa Eliot, soldier, b. in Kent, Ohio, 16 Dec., 1829; d. in Milwaukee, Wis., 26 Oct., 1868. In 1846 his father settled at Madison, Wis., where, as state treasurer and in other responsible offices, his time was so fully occupied that Cassius, the eldest living son, devoted himself mainly to the care of his father's private business. He was elected a member of the state legislature in 1860. On President Lincoln's first call for troops in 1861, he was commissioned major of the 16th Wisconsin volunteers. In the battle of Shiloh, 6 April, 1862, he received a wound that disabled him until 15 April, 1863, when he rejoined his regiment on full strength, and took command of it on 18 June. He served on general court-martial at Vicksburg, Miss., from 10 Oct., 1863, till 7 March, 1864, at which date he again took command of his regiment, participated in the march from Clifton, Tenn., to Ackworth, Ga., and was engaged in the battle of Big Shanty and Kenesaw Mountain, and many other conflicts. He was detached on recruiting
service, 12 Aug., 1864, but rejoined his regiment at Beaufort, S. C., in January following. He commanded a brigade of the 17th army corps from 15 Jan., 1865, till 1 April, and, on being mustered out in July, was brevetted brigadier-general, his commission to date from 13 March, 1865. On his return to Wisconsin he was appointed U. S. marshal, the duties of which office he continued until his death, which was caused by the reopening of his wound.

FAIRCILD, Charles Stebbins, secretary of the treasury, b. in Cazenovia, N. Y., 30 April, 1842. He was graduated at Harvard in 1863, and, after studying at the law-school of that university, was admitted to the bar in 1865. Subsequently, he became a member of the law-firm of Hand, Hale, Swartz & Fairchild, and continued actively engaged in the practice of his profession for several years. In 1874 he was deputy attorney-general of New York, and in 1876 was elected, as a Democrat, to the attorney-generalship. He served in that capacity for two years, and then spent some time in travel abroad. In 1880 he settled in New York city, and devoted himself to the practice of law. He continued so engaged until 1888, when he was appointed assistant secretary of the Treasury. While holding this office, he was frequently called on to represent Sec. Daniel Manning, and when the latter was compelled to give up the duties of the place, Mr. Fairchild became acting secretary. On 1 April, 1887, the resignation of Mr. Manning went into effect, and the portfolio was turned over to Mr. Fairchild, who thus became a member of President Cleveland's cabinet.

FAIRCILD, Herman Le Roy, naturalist, b. in Montrose, Pa., 29 April, 1859. He was graduated at Cornell in 1874, where he received the degree of B. S. From 1874 till 1876 he was professor of natural science, and from 1877 till 1878 professor of geology ad interim at Vassar. Prof. Fairchild then went to New York, where he has been occupied as lecturer in natural sciences in New York schools and in the Cooper Union. He is a member of several scientific societies, and a member of the Copley Society of sciences. His contributions to literature include articles on comparative physiology in the "Popular Science Monthly," and more technical papers in the "Transactions of the New York Academy of Sciences." He has also published "A History of the New York Academy of Sciences," and "The Lyceum of Natural History" (New York, 1887).

FAIRCILD, James Harris, educator, b. in Stockbridge, Mass., 25 Nov., 1817. While he was a child his father removed to Oberlin, Ohio, and he was graduated there in 1838—42, ordained in 1841, professor of languages in 1842—7, professor of mathematics from 1847 till 1858, and professor of moral philosophy and theology from 1858 till 1866. He was elected president of the college in 1866. During the years 1870—71 he travelled in Europe, Asia, and Africa. In 1884 he visited the Hawaiian Islands. He has edited "Memoirs of Charles G. Finney" (New York, 1876), and "Finney's Systematic Theology" (Oberlin, 1878); and is the author of "Moral Philosophy" (New York, 1880); "Oberlin, the Colony and the College" (Oberlin, 1881). In 1883 he was re-elected to Congress, and in 1885 he retired (1877—79) as President of the College of the Colored Orphans' home in Madison, and was one of the founders of the State board of charities and reform. Gen. Fairchild was appointed U. S. consul at Liverpool in November, 1872, and served six years. He was consul-general in Paris in 1872—80, and then U. S. minister to Spain till 1882, when he resigned and returned to Madison, Wis. In 1888 he was elected commander-in-chief of the Grand army of the republic.

FAIRCILD, Lucas, statesman, b. in Kent, Portage co., Ohio, 27 Dec., 1831. He was educated in the public schools of Cleveland, and at Carroll college in Waukesha, Wis. In 1846 his father removed to Wisconsin, then a territory, and settled in the northern part of the state. In 1834 the son, at the age of eighteen, joined with others, and with a four-yoke ox-team set out for the gold

fields across the plains. After months of toil and travel the party arrived in San Francisco with a capital of twenty thousand cents. For six years he worked as digger, miner, prospector, and laborer, then returned to Wisconsin in 1855, not much richer than when he left. His entrance into politics began in California with his election as delegate to a convention for the nomination of governor. On his return to the bar, he was chosen a member of a local company known as the "Governor's Guard," and promptly enlisted. He entered the service as captain in the 1st Wisconsin regiment, and served in the three months' campaign. In August, 1861, he was commissioned by President Lincoln a captain in the 6th regiment of the regular army, also about the same time a major in the 2d Wisconsin infantry. He accepted both appointments, and was the first officer of the regular army to receive leave of absence to serve with a volunteer regiment. At Bull Run he commanded the consolidated 2d and 7th Wisconsin regiments, forming part of the famous "iron brigade." At the beginning of the battle of Antietam he was sick in an ambulance at the rear, but went into action, where his regiment lost more than half its force. As colonel of the 2d Wisconsin, in the battle of Gettysburg, he led a charge at Seminary Hill, where he was shot, and there he lost his left arm. While recovering from his wounds he was commissioned a brigadier-general, 19 Oct., 1863, and shortly afterward elected secretary of state in Wisconsin, where he remained two years. He was then elected governor, and served for six consecutive terms, during which time he aided the Soldiers' orphans' home in Madison, and was one of the founders of the State board of charities and reform. Gen. Fairchild was appointed U. S. consul at Liverpool in November, 1872, and served six years. He was consul-general in Paris in 1872—80, and then U. S. minister to Spain till 1882, when he resigned and returned to Madison, Wis. In 1888 he was elected commander-in-chief of the Grand army of the republic.
Catherine, daughter of Lord Culpepper, and thus acquired the title to vast estates in the northern neck of Virginia, and also in the Shenandoah valley. Their son, Thomas, was educated at Oxford, enjoyed the reputation of a man of wit and letters, and was in early life a contributor to the “Spec-

When he became sixth Lord Fairfax, he sent his cousin, Sir William, son of Henry, to take charge of the Virginia estates. Sir William's daughter, Anne, married Lawrence, elder brother of George Washington. In 1739, Thomas came himself to Virginia. Remaining about a year, he returned to England, when, on account of an alleged disappointment in love, he closed his affairs in England and came a second time to his Virginia estate in 1745. His inherited domain embraced all that section lying between the Potomac and Rappahannock, comprising the twenty-one counties of Lancaster, Northumberland, Richmond, Westmoreland, Stafford, King George, Prince William, Fairfax, Loudoun, Fauquier, Culpeper, Clark, Madison, Page, Shenandoah, Hardy, Hampshire, Morgan, Berkeley, Jefferson, and Frederick. The area was 5,292,000 acres, and formed nearly one quarter of the commonwealth of Virginia. Lord Fairfax lived for several years with Sir William at Belvoir, and thus in 1748 he made the acquaintance of George Washington, then a youth of sixteen, and, impressed with his energy and talents, employed him to survey his lands lying west of the Blue Ridge. This was the beginning of an intimacy between Fairfax and Washington, which survived all differences of opinion on political subjects, and terminated only with the death of the former. So favorable was the report of Washington, that his employer soon afterward took up his residence at Greenway court (see illustration), in the midst of a manor of 10,000 acres, about twelve miles from Winchester, where he resided during the remainder of his life. Here he laid out a farm, and put it under a high state of cultivation. He was very fond of hunting. He was indulgent to all who held lands under him and around him, kind to the poor, and allowed them a large part of the surplus produce of his estate. During the panic on the Virginia frontier after the defeat of Braddock, Fairfax organized a troop of horse, and, as lord-lieutenant of Frederick county, called out the local militia. Although a pronounced loyalist, his benevolence and the qualities that caused him to be held in so much esteem and veneration that during the entire Revolutionary war he was never insulted or molested, and his property was equally respected by Americans and British. The great wealth in the immense clay deposits in that section of Virginia being unavailable, Lord Fairfax had brought from England the brick used for the erection of Christ church, Alexandria, the church at Falls Church Corners, and the hotel in Alexan-

dria where Washington had his headquarters. He was a friend and patron of Washington's early life, and saw, with the most intense anguish, that the widow's son, who surveyed his lands, was destined to be the great instrument for dismembering the British empire. The surrender at Yorktown deeply wounded his national pride, and, according to tradition, was the immediate cause of his death, which happened soon afterward. He was a dark, swarthy man, more than six feet in height, of large frame, and extraordinary strength. His remains were deposited under the communion table of the Episcopal church in Winchester, but were removed in 1838, and the old church was torn down to make way for the erection of a pile of buildings. He never married, and his extensive domain descended to his only surviving brother, Robert Fairfax, who became the seventh Lord Fairfax, but, as the estate was in the possession of Thomas during the Revolution, it was confiscated.

—George William, b. in England; d. in Bath, England, 3 April, 1787, was the son of Thomas's first cousin, Col. Sir William Fairfax, lieutenant of the county of Fairfax, and member and president of the council of Virginia. He was educated in England, and, coming to Virginia in early manhood, became quickly identified with the country. He was the early companion of Washington and his associate as surveyor of lands. Some property in Yorkshire having descended to him in 1778, he went to England, and, in consequence of the political troubles which followed, did not return to America. During the war he evinced much kindness to American prisoners who were carried to England. A part of his Virginia estate was confiscated, by which his income was much reduced. In making his will, he named Washington as his executor, but the office was declined on account of the pressure of public engagements. He left no children, and bequeathed his property to Ferdinando, the second son of his only surviving brother, Bryan, or Brian.

—His brother, Bryan, eighth baron Fairfax, b. about 1780; d. in Monticello, Va., in August, 1802, was the third son of Sir William Fairfax and a life-long friend of Washington. He was a just man, and that he was not bound to the spiritual reigns descended to him, and his claim was recognized as valid by the house of lords in 1800, but he never asserted it. —His son, Thomas, sometimes called ninth Lord Fairfax, b. in 1762, d. at Vaucluse, Va., 21 April, 1846, lived on his Potomac estates. He married Miss Cary. Thomas's eldest son, Albert, died during the lifetime of his father. —Albert's son, Charles Snowden, b. in Vaucluse, 8 March, 1829; d. in Baltimore, 7 April, 1880, was speaker of the California house of representatives in 1854, and clerk of the supreme court of that state from 1857 till 1862. He was chairman of the California delegation to the Democratic national convention held in New York, 1864.
FAIRFIELDFAIRMAN

FAIRFIELD, Sumner Lincoln, poet, b. in Warwick, Mass., 25 June, 1803; d. in New Orleans, La., 6 March, 1844. His father died when he was three years old, and the mother with her two children removed to a small farm in western Massachusetts. Fever, which prevented his graduation, and he became a tutor in Georgia and South Carolina. There he passed several years and prepared himself for entering the university, but changed his purpose and returned to the northern states. Meanwhile, as he says, he had published "two pamphlets." In December, 1825, Fairfield took passage for England. About this time his "Cities of the Plain" was published in Buckingham's "Oriental Herald." During his absence in Europe he contributed letters to several New York city weeklies. He returned home in July, was married, and removed to Elizabeth, N. J., but afterward went to Boston, Harper's Ferry, Philadelphia, and other places, winning a precarious subsistence by writing for the press. In 1838 he became principal of the Newtown academy, near Philadelphia, but soon afterward left for New York city. In 1838 he began the publication of the "North American Magazine" in Philadelphia, continuing as its editor and proprietor during five years. Soon afterward his health failed entirely. Fairfield excelled as an instructor in history and literature more than the ambition of a Souther for writing essays, and was equally unfortunate in finding few readers and no admirers. He stoutly maintained that Bulwer-Lytton had taken thoughts and subject-matter from him in the construction of his "Last Days of Pompell." Fairfield's published writing include "Lays of Melpomene" (New York, 1824); "The Sisters of St. Clara" (1827); "Cities of the Plain" (1828); "Heir of the World" (1828); "Abaddon, the Spirit of Destruction" (1830); "The Last Night of Pompeii" (New York, 1832); "Poems and Prose Writings" (Philadelphia, 1840); and "Select Poems" (1860). His wife, Jane Frazee, published her husband's "Life," including a few of his poems (1846).—Their eldest daughter, Genevieve, has written several volumes of miscellaneous literature.

FAIRLAMB, James Remington, musician, b. in Philadelphia, Pa., 28 Jan., 1839. He received his first musical instruction from his mother. At the age of twenty, after serving as organist of churches in Philadelphia, he went to Paris, where he pursued his instrumental and vocal studies under Marmontel, Prudent, and Masset, of the then Conservatoire impérial and Mme. Bockholtz-Falconi. Later he studied under Mabellini in Florence. Subsequently, while U. S. consul at Zurich, he visited Leipsic, Berlin, and Stuttgart. Soon after his return to this country he received from King Carl of Wurttemberg the "great gold medal for art and science." Between 1867 and 1890 he was successively director of the music in different churches in Washington, D. C. He was called to a similar office in the Church of the Ascension, New York city, and to the church of St. C., Waterford, Conn. His published works, chiefly sacred compositions and songs (the latter including contributions to the St. Nicholas song-book), number nearly a hundred, exclusive of "Valerie," a romantic opera in five acts, which was successfully produced in Washington, and of which a score of parts is still being sung in London in form. "Leonello," a grand opera in five acts, and a mass in B flat, are still in manuscript.

FAIRMANDFairman, Gideon, engraver, b. in Newtown, Conn., 26 June, 1774; d. in Philadelphia, Pa., 18 March, 1827. He was apprenticed to a firm of

York in July, 1868.—Another son, John Contee, eleventh representative of the title, b. 13 Sept., 1830, is a physician, residing at Northampton, Prince George Co., Md.—Bryan's great-grandson, DONALD McNeiL, naval officer, b. in Virginia. His commission, 27 Aug., 1837, served under Dupont on the west coast of Mexico and California during the Mexican war, and was at the capture of several towns. He was promoted to a lieutenantcy, 26 Feb., 1837, made commander, 16 July, 1862, and served for three years on the "Caragua" of the coast of Brazil. He resigned from June, 1862, till February, 1863, under Farragut, when he was transferred to the command of the steamers "Nantucket" and "Montauk," of the South Atlantic squadron, in which he made several attacks on the defenses of Charleston harbor, under Dupont and Dahlgren. In 1884—5 he was in command of the naval academy, promoted to a captaincy, 25 July, 1886, served on the flag-ship "Rhode Island," in the North Atlantic squadron, in 1886—7, and on the steam sloop "Susquehanna" in 1887—9. He was advanced to the rank of commodore, 24 Aug., 1873, and made rear-admiral, 11 July, 1880. Admiral Fairfax was in service forty-eight years and five months; of this time, twenty years and four months were spent at sea, his last cruise terminating in 1888. See "Magazine of American History," vol. xiii, pp. 27—28. (2968.)

FAIRFIELD, Francis Gerry, journalist, b. in Stafford, Conn., 18 Aug., 1844; d. in New York city, 4 April, 1887. He was educated at a private school in Massachusetts, at the Pennsylvania college in Gettysburg, and finished his course in a Lutheran theological seminary. When twenty-two years of age he was placed in charge of a Lutheran church in Waterloo, N. Y. After about two years he abandoned his calling and came to New York city, which became his home. Here he was at first employed in the editorial department of the "Home Journal," and later wrote for the "Daily News," the "Herald," and other papers. He then went to Mexico, where he was an eye-witness at the execution of Maximilian, an account of which he furnished to several journals. On his return to New York city he became a space writer for several newspapers, contributed poems, sketches, short stories, and literary criticisms to various periodicals. Tempted by the prospect of greater emoluments, Fairfield for a brief period followed the pursuit of a veterinary surgeon. Disappointed, he returned to his former occupation, and at the last was employed as an occasional writer for the New York "Sunday Mercury" and Albany "Argus." Fairfield, in the best period of his life, was a forcible and incisive writer, and his signed articles were always read with attention. But he became addicted to the morbid habit, and gave way to mental vagaries and irregularities that eventually reduced him to poverty. He published "The Clubs of New York" (New York, 1873), and "Ten Years with Spiritual Mediums" (1875).

FAIRFIELD, John, senator, b. in Saco, Me., 30 Dec., 1810. He was graduated at Dartmouth, 24 Dec., 1847. He received a common-school education, studied law, was admitted to the bar in 1856, and practised successfully in his native town. He was appointed reporter of the state supreme court in 1852, and was then elected to congress as a Demo- crat, 3 Dec., 1860. He was governor of Maine in 1839—40, and again, in 1842, was chosen U. S. senator from Maine, in place of Reuel Williams, resigned, and served from 4 Dec., 1845, till his death. He was the author of "Supreme Court Reports" (Augusta, 1855—7).
jewellers and engravers in Albany, and in 1810 settled in Philadelphia as one of a firm of bank-note engravers. In the war of 1812 he entered the army as a captain, and in 1813 he was made a major. In 1819 he became a partner with Jacob Perkins, and went to England, where he resided and conducted the engraving business for three years, and then returned to Philadelphia. He contributed much toward the elevation of the art of engraving in the United States; he was a fellow of the Academy of Fine Arts, and Richard (1787-1821) were also engravers.

FALARDEAU, Anthony Sebastian, artist, b. in St. Ambrose, near Quebec, Canada, 13 Aug. 1823. He manifested from his childhood a strong love for art, but it met with no encouragement from his father, who took him from school when twelve years old and set him to work on a farm. When he was fourteen years old he ran away to Quebec, where he endured hardships of every kind, and was for several years a servant. He still continued to draw and paint during his hours of leisure, and after he had succeeded in obtaining employment as clerk in a mercantile house he was enabled to take lessons, and some of his pictures began to attract attention. He wished to continue his studies in Europe, so he sold his pictures for $100, and shipped to England, setting out from Montreal in the summer of 1846. Lord Calthart, the governor-general, received him kindly, and furnished him with a letter of recommendation that was afterward of great value to him. He finally reached Florence, and, after many disappointments, he went to Rome to the Academy of Fine Arts. During the Revolution of 1848 he refused to enter the civic guard of the fine arts, and was obliged to leave the academy, but re-entered it after the battle of Novara. From this time he worked hard, but led a life of great poverty until 1850, when he married a young American lady. He purchased some of his pictures. He then studied in the principal Italian cities, and in 1857, when he was in Parma, won a prize that had been offered for the best copy of the Saint Jerome of Correggio, exciting much enthusiasm by his work. He was chosen an honorary member of the Academy of Fine Arts, and afterward presented the picture to the grand duke, who created him a knight of the order of Saint Louis. After this he had orders for pictures from the empress dowager of Russia and other persons of rank. In April, 1860, he visited Canada, which he afterward visited with especial feeling. His pictures are considered by art critics to be distinguished for finish and elegance rather than vigor.

FALCONE, John M., artist, b. in Edinburgh, Scotland, 22 May, 1820. He was educated at the high school in Edinburgh, and came to the United States at the age of sixteen. He studied art in the National academy of design, and with the Society of painters in water-colors in New York city, in the Graham art school and that of the Art association of Brooklyn, and in the Louvre at Paris. He became a member of the New York art union and the New York sketch union in 1847, was a member of the Society of painters in water-colors, and exhibited in their collection in the Crystal Palace, New York, in 1854. He became an honorary member of the National academy of design in 1856, of the Succession of Art in France in 1860, the American water-color society in 1872, of the New York etching club in 1878, and fellow of the Painters' and etchers' society of London, England, in 1882. He proposed the first exhibition of engravings in the United States, which was successfully held in Brooklyn in 1880. He was a member of the art department of the U. S. sanitary fair, and organized the first chronological exhibition of American art in the United States, which was held at the opening of the galleries of the Brooklyn art association in 1872, and the first exhibition of water-color paintings by the Artists' fund society of New York, out of which grew the present American water-color society. He has made numerous paintings in oil of American and European subjects, including "Kenilworth Castle," "House where the Declaration of Independence was written," and "Fulton's House in Philadelphia." In water-colors he produced the "William Penn Mansion," exhibited, with others of his works, by the American water-color society at the Centennial exhibition in 1876, and a series of "Historic Houses," in enamel on porcelain, now in the possession of the Long Island historical society. He has also restored many oil-paintings, and etched on copper very plates from his own works, and twenty from those of other artists. He wrote a "Sketch of the History of Water-COLOR Painting for the Society of Painters in water-colors (1855), and has compiled the "Catalogue Raisonne of the Chronological Exhibition of American Art" (Brooklyn, 1872).

FALES, Almira L., philanthropist, b. in New York; d. in Washington, D. C., 8 Nov., 1868. She was for some years, set out artists, and in 1845 married Joseph T. Fales, having received an appointment as examiner in the patent-office in Washington, she thenceforth made that city her home. As early as 1860, from her extended knowledge of southern feeling and action, she foresaw and predicted the approach of the Confederate army, which to the surprise of her friends, began the collection and preparation of articles for hospital use. At the beginning of the war she entered, fully prepared, on the care of sick and wounded soldiers, and at Pittsburg Landing and other battle-fields of the west was busy in ministering to the wants of the sufferers. The government placed an ambulance at her command, and during the war she was unremitting in her visits to the hospitals in the neighborhood of Washington, at Fredericksburg, on the Peninsula, and elsewhere. In the yard of her own house she pitched a large tent, into which she gathered sick and disabled soldiers, and there ministered to their needs until means could be provided to send them to their homes. For some time Mrs. Fales was charged by the government with the superintendence of soldiers' hospitals in and around Washington to the hospitals in New York and elsewhere. Amid all this activity she found time to correspond extensively and obtain pecuniary aid to carry on her work.

FALKNER, Thomas, clergyman, b. in Manchester, England, in 1710; d. in Plowdenhall, Selborne, England, 30 Jan., 1784. He studied under his father, who was a distinguished surgeon in Manchester, and afterward attended the hospitals in London. He went as a surgeon on board of a ship, visiting Guinea, and then proceeded to Cadiz, where he remained a year. He returned home and during an illness there was nursed so devotedly by the Jesuits, that on his recovery he determined to join the order. He entered one of their colleges, and was sent in 1734 to evangelize the vast territory comprised in the viceroyalty of Buenos Aires, in the province of La Plata. He had extraordinary success in his missionary labors, which was largely due to his ability in curing the sick, his dexterity in surgical operations, and his knowledge of mechanics. During forty years he lived at different stations on the Plata, the Paraguays, and on the Pampas. The station of St. George
flourished so well that in 1773 it had 7,000 civilized Indians, five churches, three convents, two hospitals, a college, and a library. He was employed by the Spanish government in 1750 to draw a map of the coast of South America from the south of Brazil to Tierra del Fuego, which on its completion was published in 1761 at Quito, and is noted for its accuracy. He also designed a chart of Paraguay in 1757, a chart of the Tucuman in 1759, and several others of less importance. On the expulsion of the Jesuits he was sent to Spain, and afterward went to England, where he became chaplain in an old English Roman Catholic family near Worcester. Here he wrote his "Description of Patagonia and of the Neighboring Countries of South America" (Hereford and London, 1774; German translation, Gotha, 1775; French translation, entitled "Description des terres Magellaniques et des pays adjacents," 2 vols., Geneva and Paris, 1787). This work is valuable for its descriptions of the countries in which he lived; but Falkner's superficial knowledge of natural history diminishes the value of his account of the natural productions of South America. He also published "A Treatise on the Language of the Indians of South America"; "Botanical, Mineral, and, like Observations," by the bishop of the place; "Reise in die heilige landschaften," a "A Treatise on South American Dis- tempers cured by American Drugs." Several South American plants were introduced by him into the European materia medica.

FALLOWS, Samuel, bishop of the Reformed Episcopal church, b. in Pendleton, near Manches- ter, England, 13 Dec., 1835. He removed with his parents to Wisconsin in 1848, was graduated at the State university there in 1859, and was vice- president of Gainsville university till 1861, when he was ordained in the Methodist Episcopal church. He served as a colonel in the civil war, and was brevetted brigadier-general. On returning to civil life he became a pastor in Milwaukee. He was chosen state superintendent of public instruction for Wisconsin in 1871, and was twice re-elected. In 1874 he was elected president of the Illinois Wesleyan university at Bloomington. In 1875 he united with the Reformed Episcopal church, and became rector of St. Paul's, Chicago, in May of that year. In January, 1876, he was appointed chief editor of the "Appeal," the organ of the Reformed Episcopal church. In 1879 he was elected a bishop. He was regent of the University of Wisconsin in 1864-'74, and received the degree of D. D. from Lawrence university in 1873. He has published a "Supplemental Dictionary" (Chi- cago, 1884), and "Past Noon" (1886).

FANAILL, Peter, merchant, b. in New Rochelle, N. Y., in 1700; d. in Boston, Mass., 3 March, 1748. His parents were French Huguenots. He became a merchant in Boston, and in 1748, after the project of erecting a public market-house in that city had been rejected for some years, he offered, at a public meeting, to build a suitable edifice at his own cost as a gift to the town; but so strong was the opposition to market-

houses that, although a vote of thanks was passed unanimously, the offer was accepted by a majority of only seven. The building was begun in Dock Square in September of the same year, and was completed in two years. It comprised a market-house on the ground floor, and a town-hall, with other rooms, over it. In 1761 it was destroyed by fire, nothing but the brick walls remaining. It was rebuilt by the town in 1806, and in 1775, during the British occupation of Boston, it was used as a hospital. In 1805 it was enlarged by the addition of another story, and increased forty feet in width. The large hall is about eighty feet square, and contains many fine paintings of distinguished men. During the Revolutionary period it was the assembly-place of the patriots, and, from the stirring debates and important resolutions that were often heard within its walls, it gained the name of "the cradle of American liberty." (See illustration.)

FANNIN, James W., soldier, b. in North Carolina about 1800; d. at Goliah, Texas, 27 March, 1836. He was a captain in the Texan service in 1835, and on 28 Oct., at the head of ninety men, with Capt. Bowie, defeated a superior Mexican force near Bexar. Gen. Houston soon afterward made him colonel of artillery and inspector-general. In January, 1836, Col. Fannin was sent to the head of the Coleta river by a Mexican force under Gen. Urrea. Throwing up a breastwork of wagons, baggage, and earth, the Texans defended themselves with spirit until night interrupted the fighting. Col. Fannin broke through the intrenchments and escaped; the battle was renewed on the 20th, but the Mexicans having received a re-enforcement of 500 men, with artillery, a capitulation was signed, by which it was agreed that the Texans should be treated as prisoners of war, and as soon as possible sent to the United States; on the morrow of the battle, they were taken to Goliah, where, on the 26th, an order was received from Santa Anna requiring them to be shot. At daybreak the next morning 357 of the prisoners, all of them but four physicians and their assistants, were marched out under various pretenses and hurried to their destruction. Col. Fannin was killed last. Many attempted to escape, and were cut down by the cavalry, but twenty-seven are believed to have eluded pursuit.

FANNING, Alexander C. W., soldier, b. in Massachusetts in 1788; d. in Cincinnati, Ohio, 19 Aug., 1846. He was graduated at the U. S. mili- tary academy in 1812, and immediately went into service on the Niagara frontier, being engaged in the capture of York (now Toronto), Canada, 27 April, 1813, where he was severely wounded by the explosion of the enemy's magazine. He took part in the defense of Sackett's Harbor, four weeks later, and in November following distinguished himself in the battle of French Creek, when the British flotilla was repulsed. For his bravery in the defence of Fort Erie when besieged by the British forces from 19 Aug. till 17 Sept., he was brevetted major. He was then transferred to the Florida frontier and served there till 1819, participating in Jackson's campaign against the Seminole Indians in 1817-'18, and in the capture of St. Mark's, 7 April, 1818, and was the provost-mar- shall at the exchange of prisoners and the British subjects, on 29 April, 1818. He was in command of St. Mark's in 1819-'19, and was then
transferred to Fort Gadsden. On the reorganization of the army in 1821, he was appointed captain in the 2d artillery, and served in the garrison at Detroit in 1822-3, Fort Mackinaw, Mich., in 1825, and Fort Columbus in 1824, after which he was appointed acting major of the artillery-school at Fortage. On 15 Aug., 1834, he received a brevet lieutenant-colonelcy, and became major on 3 Nov., 1832. He took part in the war against the Seminole Indians in 1835-9, was brevetted colonel, 31 Dec., 1835, and became lieutenant-colonel of the 4th artillery, 10 Sept., 1838. During the Seminole War in 1840-1 he was on the frontier, after which he was on recruiting service in the western department.

FANNING, David, freebooter, b. in Johnston county, N. C., about 1754; d. in Digby, N. S., in 1825. He seems to have been a carpenter, but claimed that he was a planter in the back part of the southern provinces. He trafficked with the Indians, and was connected with the notorious Col. McGirth on the Pedee. When Wilmington was occupied by the British in 1781, Fanning, having been robbed by a party of men who called themselves Whigs, attacked the Tories, collected a small band of desperadoes, and scourced the country, committing frightful atrocities, but doing such good service to the British that Maj. Craig gave him a commission as lieutenant-colonel in the militia. By the rapidity and secrecy of his movements he succeeded in capturing many prominent Whigs, and hanged those who had incurred his personal resentment. At one time he dashed into the village of Pittsborough, where a court was in session, and carried off the judges, lawyers, officers, and all the citizens. A few weeks later, he captured Col. Alston and thirty men in his own house; and soon afterward, at Hillsborough, took Gov. Burke with his whole suite and a number of the principal inhabitants. He was excepted in every treaty and enactment made in favor of the loyalists, and was one of the three persons excluded by name from the benefit of the general "act of pardon and oblivion" of offences committed during the Revolution. When the Whigs gained the ascendency in North Carolina he went to Florida, and afterward to St. John's, N. B., where he became a member of the assembly. In 1800 he was sent to the legislature. Among the officers held by him was the justice and recorder of deeds, and it was alleged that to his abuses of this trust and his exorbitant charges was due the rebellion of the regulators in Gov. Tryon's administration. By his vicious character "nearly all the esteem obnoxious to the people and, to escape the popular indignation, he accompanied Gov. Tryon, who was his father-in-law, to New York as his private secretary in 1771. He subsequently applied to the North Carolina legislature, through Gov. Martin, the successor of Gov. Tryon, for reparation for losses from destruction of his property; but the petition was unanimously rejected, and the governor was rebuked for presenting it and thus "trifling with the dignity of the house." In 1774 Fanning received from the British government the lucrative office of surveyor-general, as a reward for his services to the cause of the crown and his losses in North Carolina. In 1777 he raised and commanded a corps of 460 loyalists, which bore the name of the "associated refugees," or "king's American regiment." While his regiment was on Long Island some of his men entered a house, tied the owner of it to a bed-post, and held a candle under the end of his fingers, to force him to disclose the hiding-place of his money. Fanning was equally severe toward all. During the war he was twice wounded, and in 1779 his property was confiscated. He removed to Nova Scotia near the close of the war, and became councillor and lieutenant-governor on 23 Feb., 1783, and three years later governor of Prince Edward Island. This office he held for nineteen years. He was made a major-general in the British army in 1793, lieutenant-general in 1799, and general in 1808. The degree of A. M. was given him by Harvard in 1764, and by Kings in 1772; the degree of D. C. L. by Oxford in 1774, and that of LL. D. by both Yale and Dartmouth in 1803. His brother, Thomas, of Suffolk county, N. Y., delivered the address before Gov. Tryon in November, 1776, and was deputed to present the submission of the committee of that county. In June, 1780, Fanning was captured and carried off by a party of Whigs.

FANNING, John Thomas, civil engineer, b. in Norwich, Conn., 31 Dec., 1837. He was educated in the public and normal schools of his native city, and then studied architecture until 1853. During the three following years he perfected himself in building construction by labor as a mechanic, meanwhile pursuing studies in theoretical engineering. In 1861 he enlisted as a private in the 3d Connecticut regiment, and rose gradually until he attained the rank of lieutenant-colonel. He began the general practice of engineering and architecture in 1862, opening an office in Norwich, where he remained until 1870, having charge during that time of all the engineering work of the city, including the laying out of its cemetery and the construction of its public water-works, as well as making plans for numerous mills and water-powers in New England. From 1870 till 1880 he was engaged principally as chief and consulting engineer in building water-works for cities. While superintending the construction of water-works for Manchester, N. H., he removed his office to that city, where he designed various public buildings. After 1880 he was called on by an association of citizens of New York and Brooklyn to make a report concerning an adequate public water-supply for these cities, and of all the cities
in the Hudson valley, from the upper Hudson river water-shed. This project contemplated an aqueduct 225 miles in length, capable of conveying from the Adirondack region 1,000,000,000 gallons of water daily to New York and Brooklyn, at an estimated cost of $60,000,000. In 1886 he prepared plans for the further development of the great water-power of St. Anthony's falls on the Mississippi river, at the city of Minneapolis, Minn., and in 1886 constructed new purchasing departments of water at an estimated cost of $8,000,000. Mr. Fanning received in 1883 from the New England agricultural society its highest prize for architectural and engineering designs, and he has secured patents for a water-wheel, a turbine motor valve, a steam boiler, a steam pumping-engine, for improvements in fire-proof building construction, and numerous original designs for hydraulic apparatus. He is a fellow of the American association for the advancement of science, and a member of other scientific associations. Besides a great number of reports on technical matters, he has published a "Treatise on Hydraulic and Water-Supply Engineering" (New York, 1877; rev. ed., 1886).

FARGO, William George, expressman, b. in Pompey, N. Y., 20 May, 1818; d. in Buffalo, N. Y., 3 Aug., 1881. He worked for his living from the age of thirteen until attending school for a few winters only. He was engaged for some time in mercantile business, but in 1841 removed to Auburn and became freight agent for the Auburn and Syracuse railroad company. He left this place in 1842 to become messenger for Pomery and company's express, running from Buffalo to Albany, and was made resident agent of the company in Buffalo in 1845. Mr. Fargo's connection in connection with Henry Wells and Daniel Dunning, organized in January, 1844, the first express company running west from Buffalo, under the name of Wells and company. At first the line reached only to Detroit, but the business was gradually extended to Chicago, Milwaukee, Cincinnati, and St. Louis. In 1845 the firm became Livingston and Fargo, and remained thus until 1850, when the American express company, uniting the interests of several firms, was organized. Henry Wells was president and William G. Fargo secretary of this company till its consolidation with the Merchants' union express company in 1868, when Mr. Fargo succeeded to the presidency. At the time of his death the corporation had a capital of $1,000,000, maintained 2,200 offices, and gave employment to more than 5,000 men, of whom 600 were messengers. In 1851 he was associated with Henry Wells and others in the organization of a company which undertook the transaction of express business between New York and San Francisco, as well as maritime trade and also operated interior lines to the Pacific coast under the firm name of Wells, Fargo and company. This was continued until the completion of the trans-continental railways, when the management was transferred to various capitalists, but Mr. Fargo remained a director of the company and its vice-president. Mr. Fargo was a director of various railroads, was largely interested in various Buffalo enterprises, and from 1862 till 1866 was mayor of that city. His brother, James Congdel, b. in Pomery, N. Y., 3 Nov., 1811, was in the employ of Wells and company in 1844 in Buffalo, and remained there until 1848. He was then transferred to Detroit, and a few years later to Chicago, where he became agent and manager of the American express company. In 1866 he came to New York city as the general manager of the company's interests, which office he held until 1881, when he succeeded to the presidency of the company. Mr. Fargo is also president of the Merchant's despatch transportation company, and director of several important railroad and express corporations. Another brother, Charles, b. in Pompey, N. Y., 15 April, 1831, entered the express business in Detroit in 1851. In 1833 he was made agent of the Toledo office of the American express company, and three years later returned to Detroit to take charge of the office. Much of the development of Michigan is credited to his energy in pushing the express into remote districts, making possible the ready transportation of produce to the markets. In 1868 he became assistant general superintendent of the company, with general management of the Chicago office. After the death of William G. Fargo he became second vice-president and general western manager.

FARGUES, Thomas, physician, b. in Quebec, Canada, in 1780; d. there, 11 Dec., 1847. He was graduated at Harvard in 1797, and soon afterward sailed for Scotland, where he studied medicine at the University of Edinburgh, and obtained a degree, after defending a Latin thesis on "Chorea." He subsequently practised for several years in London, and became intimate with the eccentric physician, John Abernethy. Dr. Fargues returned to Quebec in 1811 and became a medical practitioner. He was a man of extensive reading, keen powers of observation, and unusual strength of intellect, and owned the best private medical library in the province, which was purchased after his death and given to the Laval university. He was a member of the legislative council in the provincial legislature, but preferred to devote himself exclusively to professional work.

FARIBAULT, George Bartholomew, Canadiant antiquarian, b. in Quebec, 5 Dec., 1788; d. there, 21 Dec., 1866. He studied law, and was admitted to the Quebec bar in 1811. During the war of 1812-15 he served as lieutenant in the Canadian militia. In 1822 he was appointed secretary of committees and French translator to the legislature of Lower Canada, and in 1832 promoted to the post of assistant. On the organization of the two Canadas in 1841 he was named assistant secretary of the legislative assembly, which office he held until 1855. While fulfilling the duties of these offices he found leisure for the formation of a collection of works and documents relating to the history of the colony, which at 16,000 volumes, was lost in the fire that destroyed the legislative buildings in Montreal in 1849. Faribault at once began to form a second collection, and was sent by the legislature to examine the libraries of Europe. At first he received every aid from the French ministers in his investigations; but the events of 2 Dec., 1852, interfered
with his researches, and the death of his wife decided him to return to Canada. He then devoted himself to the formation of the new national library, which had reached 20,000 volumes when the legislative buildings of Quebec were burned, 1 Feb., 1854, and although 13,000 volumes were saved, the 7,000 that were lost comprised publications of the 16th and 17th centuries that never could be replaced. He was injured by this calamity, and the legislature voted him a pension of $2,000. The principal work of the close of his life was the execution of the monument that the French troops had resolved to raise in 1761 to the memory of Montcalm in the church of the Ursulines of Quebec. He was one of the founders of the Historical Society of Quebec. He wrote a "Catalogue raisonné d’ouvrages sur l’histoire de l’Amérique" (1837), which is still considered an indispensable guide for the historian. His collection of manuscripts and old works, which he left to Laval University, comprised 400 manuscripts, half of which are original, or copies collated of very old documents (1626, 1686, and the years following). Among these the most precious is the "Journal des Jésuites" (1645-88), the only part dispersed by fire. Of the entire collection of 1,000 printed volumes, some of which are very rare and important, such as "Lessecart" (1609); "Champlain" (1613); "Les voyages aventureux de Jean Alphonse"; "Relations des Jésuites"; and an album containing plans, maps, views, and portraits, all relating to the history of the country, and several of them of great importance.

FARIBAULT, John Baptist, pioneer, b. in Berthier, Quebec, about 1799; d. in Faribault, Minn., in 1860. He received his education in the village school, and at the age of seventeen entered a business house in Quebec. In 1838, he went to the United States, and remained in New York a few years. In 1846 he became agent of the American company of the northwest, under the presidency of John Jacob Astor. He left Montreal in the spring for the straits of Mackinaw in a canoe, accompanied by nineteen men. After remaining seven days at Mackinaw he engaged an Ojibway Indian as a guide, and set out for the residence of Gen. Harrison, governor of the territory of Indiana, at Port Vincent on the Wabash, in order to obtain permission to trade with the Indians in the United States. He nearly perished on the journey through the treacherous and rugged country, but reached Gen. Harrison, who received him kindly and granted the necessary permission. He then returned to the mouth of the Kankakee, where he passed the remainder of the year. He afterward established himself at the port of Des Moines, and engaged in a lucrative trade with the Sakis, Foxes, Iowas, and Yankons. Then he proceeded to the Saint Peter, and traded with other Sioux tribes, making also an effort to teach them agriculture. He married a half-breed, by whom he had eight children, and, having provision of the future greatness of the wild country in which he lived, he had them educated under circumstances of great difficulty. He remained ten years with the Astor company, and then entered into business for himself, realizing a large fortune, which he lost in the war of 1812. He returned to the Minnesota country, where he had engaged in the fur trade, and, having to go on business to Mackinaw after the siege of the fort that the Americans had erected there, he was made prisoner by the English as a traitor to British interests. He continued for several years to travel over the prairies, and although frequently exposed to the assaults of the Indians, frequently wounded, and on two or three occasions left for dead, he always escaped. He was the first to cultivate the soil west of the Mississippi and north of the Des Moines, and brought agricultural implements into the purpose of teaching the Indians farming. His influence extended among all the Indian tribes of the vast territory from the Mississippi to the Missouri, and as far as Red river. He also acted as a missionary among them, and built, at his own expense, a Catholic church during which period he was injured by the calumny, and the legislature voted him a pension of $2,000. The principal work of the close of his life was the execution of the monument that the French troops had resolved to raise in 1761 to the memory of Montcalm in the church of the Ursulines of Quebec. He was one of the founders of the Historical Society of Quebec. He wrote a "Catalogue raisonné d'ouvrages sur l'histoire de l'Amérique" (1837), which is still considered an indispensable guide for the historian. His collection of manuscripts and old works, which he left to Laval University, comprised 400 manuscripts, half of which are original, or copies collated of very old documents (1626, 1686, and the years following). Among these the most precious is the "Journal des Jésuites" (1645-88), the only part dispersed by fire. Of the entire collection of 1,000 printed volumes, some of which are very rare and important, such as "Lessecart" (1609); "Champlain" (1613); "Les voyages aventureux de Jean Alphonse"; "Relations des Jésuites"; and an album containing plans, maps, views, and portraits, all relating to the history of the country, and several of them of great importance.

FARLEY, Harriet, editor, b. in Claremont, N. H., about 1815. She was the daughter of a Congregational clergyman, and born the age of 5. In 1841, Harriet began to earn her own living, by turns working at straw- and palm-leaf plaiting, binding shoes, tailoring, weaving, and teaching. Her father then removed to Atkinson, N. H., and combined the duties of principal of two academies with those of his pastorates. Here she learned something of French, drawing, ornamental needle-work, and the usual accomplishments of that day. These were taught her because her friends wished her to be a teacher, an occupation for which she felt the greatest re- pugnance. She remained with her parents, married a neighbor, and, going to Lowell, she determined that if she must support herself she would do so in her own way. She would then, to use her own words, be at liberty to "read, think, and write," when she could, and without restraint. She made good wages in the factories of Lowell, and extended her earnings in caring for her brothers and sisters, one of whom she assisted in educating. While she was thus engaged, the publication of "The New England Offering," the writers on which were exclusively women operatives in the mills of the city, gave her the opportunity to return to her first study, and, published a volume containing extracts from "The Offering," including some of her own contributions, entitled "Shells from the Strand of the Sea of Genius" (Boston, 1847). In 1849 a second collection from the monthly was made and issued in London, with an introduction by Charles Knight, under the title "Mind Among the Spindles." An autobiographical sketch of Miss Farley, not written for publication, may be found in Mrs. Sarah J. Hale's "Biography of Distinguished Women."

FARLEY, James Thompson, senator, b. in Virginia, 6 Aug., 1829. He received a common-school education, and removed to Missouri, and subsequently to California. He studied law, and was admitted to the California bar in 1854, in which state he has since practised. He served for two terms as member of the assembly from Calaveras county, and in 1860 was elected to the state senate in 1860, and re-elected for the eight years following, acting as president pro tempore during one session. He was for several years the recognized leader of the Democratic party in California, and in 1874 was defeated as a candidate for the United States Senate, running against Beck. He was afterward elected, and served as a senator from 18 March, 1879, till 3 March, 1885.
FARLEY, Michael, patriot, b. in Ipswich, Mass., in 1719; d. there, 20 June, 1789. He represented his native county in the general court, and ranked among its most active members. In 1774 he was chosen one of the council, but Gov. Gage negatived his election. This, however, was considered something of an honor, such men as John Adams, Bowdoin, Winthrop, and Jedediah Hawke being barred by a similar ban. He was a delegate to the Provincial congress of Massachusetts in 1774–5, and was afterward a member of the house of representatives, July, 1775. He subsequently acted as one of the supreme executive council, and was for several years major-general of the 2d division of militia. He appears to have been an ardent patriot, and rendered the popular cause essential service.

FARLINGER, Alexander, land-owner, b. in Dundee, Huntingdon co., Quebec, 1 Jan., 1824. His grandfather, Nicholas, though of German descent, was a loyalist during the war of the Revolution, and emigrated from the Mohawk valley, settling in Cornwall, Canada. Capt. Farlinger in early life commanded one of the line of steamers plying between Kingston and Montreal, and on several occasions accomplished the difficult feat of forcing the St. Lawrence, Long Sault, Caledonia, Cedar, and Cascade rapids at night. After seven years spent in the service he retired, and engaged in business as a forwarder and general merchant at Prescott. He subsequently removed to Morrisburg, where he became the owner of a large amount of real estate. He managed, also speculating in land, until, in 1880, he found himself the owner of 19,000 acres of improved farming property in various parts of eastern Ontario. Many years ago he established a system of farm-tenantry, and now he hears from many of them of the large annual returns which they have realized from the same holdings for twenty-five years. Capt. Farlinger has interested himself in railway enterprises, and in 1853 projected the Ottawa, Waddington, and New York rail road and bridge company, which obtained a charter in 1892. He is an extensive stockholder of the Aerolite stock, and has been prominent in military matters.

FARLOW, William Gilson, botanist, b. in Boston, Mass., 17 Dec., 1844. He was graduated at Harvard in 1866, at the medical department of that university in 1870, and spent several years in Europe, studying botany in Germany, Scotland, and also with Eduard Bornet and Gustave Thuret. In 1874, after his return to the United States, he was appointed adjunct professor of botany at Harvard, and in 1879 was elected to the chair of cryptogamic botany. He is a member of scientific societies in Europe and in the United States, and besides being a fellow of the American association for the advancement of science, received in 1879 an election to the National academy of sciences. Prof. Farlow's publications have been principally devoted to marine algae, fungi, and diseases of plants. These have gained for him a high reputation among cryptogamic botanists. The accounts of the "Progress of Botany," in the reports of the Smithsonian institution from 1879 till 1886, were written by him, and he has also contributed valuable articles to the American journal of science, the Quarterly of the U. S. fish commission and to the Massachusetts board of agriculture. He has published "The Potato Rot" (Boston, 1875); "Diseases of Olive and Orange Trees" (1876); "The Gymnosporangia, or Cedar-Apples of the United States" (1880); "The Maidenhair Family" (Washington, 1881); and has in preparation (1887) "Introduction to Cryptogamic Botany."
Manie's Dream, and Other Poems" (New York, 1818). His "The Farmer's Taste" includes an appeal to "Croaker." His verses indicate considerable facility in composition, a poetical taste, kindly feeling, and occasionally sound the louder notes of the lyre. It was the intention of Simms, the novelist, to publish a complete edition of Dr. Farmer's poems, and the best of his other writings, but his good work was not obtained from the family. But his death prevented, and the poems have since been scattered and lost.

**FARMER, John**, genealogist, b. in Chelmsford, Mass., 12 June, 1789; d. in Concord, N.H., 13 Aug., 1838. After teaching for ten years, and subsequently engaging in business, he finally devoted himself to antiquarian investigation with extraordinary zeal and success. He was elected a member of various literary societies, and at his death was corresponding secretary of the New Hampshire historical society, of which he was one of the founders. Among the results of his work in which he condensed the results of his researches, are his edition of Belknap's "History of New Hampshire" and the "Genealogical Register of the First Settlers of New England" (1829). The latter is a remarkable example of the author's industry and talent for research. He also published histories of Billerica (1806) and Amherst (1820), and, with the assistance of J. B. Moore, a "Gazetteer of New Hampshire" (1822). Besides contributing to the "Collections of the historical societies of Massachusetts and New Hampshire," and to the "American Quarterly Register," he compiled the "New Hampshire Register." In 1822, in connection with Jacob B. Moore, he began the historical, biographical, and topographical "Collections of New Hampshire" (3 vols.).

**FARMER, Peter**, gave freely to New Haven, Half Moon, Saratoga Co., N.Y., 9 Feb., 1788; d. in Detroit, Mich., 24 March, 1839. He was educated in the vicinity of Albany, N.Y., and taught a Lancasterian school in that city. By invitation of Gov. Cass and the trustees of the University of Michigan, he removed to the state in 1821, and, after teaching for a time, engaged in surveying and drew the first published map of Michigan. In 1825 he issued one on his own account, and afterward published twelve different maps of Michigan, Wisconsin, Lake Superior, and Detroit, most of which he engraved. In 1831 he published a "History of the state and the state's first and only map of Detroit, transmitted by them to congress. It was accepted by that body as authoritative, and was reproduced among the American state papers. His early maps are conceded to have been largely influential in promoting the extensive emigration to Michigan that occurred between 1825 and 1840. During his residence in Detroit, Mr. Farmer filled many important city offices. Before leaving Albany he published the first "Gazetteer of Michigan" (1830). His son, Silas, b. in Detroit, Mich., 6 June, 1830, was brought up to his father's business, and continued the publication of maps. In 1882 he was chosen historiographer of the city of Detroit. Mr. Farmer claims to have been the first to suggest in print the summer garden. He has written and published a "History of Detroit and Michigan" (1884; 2d ed., 1887).

**FARMER, John W.**, philanthropist, b. in 1819; d. in Brooklyn, N.Y., 23 Oct., 1860. Mr. Farmer was a generous and philanthropic resident of the city of New York, whose benevolence and practical interest in the condition of the poor and laboring classes. He was active for several years in the organization of co-operative societies in New York and vicinity, and was ever fertile in expedients to help the poor to help themselves. In this good work he was supported by the means, and in the winter of distress that followed the financial panic of 1857 he not only gave out provisions with a liberal hand, but established soup-kitchens for the benefit of the needy. In this way those in want were able to procure nutritious food for less than it would have cost them to prepare it at home, even if the raw material had been given them. He pursued the same course through the winter of 1861-2. The example of opening soup-kitchens was quickly followed in Philadelphia, Boston, and other cities. **FARMAN, Henry**, philanthropist, b. in Scoio, N.Y., 9 Nov., 1803; d. in New Haven, Conn., 4 Oct., 1888. His early years were spent on his father's farm and in attending the district school. He afterward studied mathematics by himself, and became a surveyor. He was engaged on the Erie canal, west of the Hudson, for several years. He also was engineer of the New Haven and Northampton canal in 1825, and its superintendent in 1827. He removed to New Haven in 1839, and in 1846-8 built the railroad that took the place of the canal. He went to Illinois in 1850, and with Joseph E. Sheffield built the Chicago and Rock Island road, of which he was president in 1854-68. He then retired from active life, and, after spending about five years abroad, returned in 1868 to New Haven, where he remained till his death. Mr. Farnam gave the hospitalities especially to the state hospital, and built for Yale. Farnam Hall, one of its best dormitories. He contributed largely for the development of East Rock park, and provided in his will that his residence, one of the finest in the city, should be given, after the death of his immediate heirs, to Yale college for a "president's house."—His son, Charles Henry, b. in New Haven, Conn., 12 Sept., 1846, was graduated at Yale in 1868, and at Columbia law-school in 1871. He has been for several years assistant in archæology in the Peabody museum of Yale, and has published a "History of John Whiting and his Descendants" (New Haven, 1887).—Another son, Henry Wallace, b. in New Haven, Conn., 6 Nov., 1853, was graduated at Yale in 1874, and received the degree of R. P. D. at Strausburg, Germany, in 1876. He was a tutor in Yale from 1879 till 1886, when he was appointed professor of political economy in Sheffield scientific school. In 1881 he became a member of its governing board. Prof. Farnam has contributed to periodicals numerous articles on his specialty. **FARNHAM, Horace Putnam**, physician, b. in Salem, Mass., 7 May, 1822; d. in New York city, 9 June, 1886. He was graduated at Harvard in 1843, studied law with Rufus Choate, and, after graduating from the Dane law-school in 1846, was admitted to practice in 1847. After a visit to Europe in 1855-6, he was attending physician of the Cuyahoga county (Ohio) insane asylum, and obtained the degree of M. D. from Jefferson medical college in 1860. He was once settled in the city of New York as a general practitioner, but paid especial attention to diseases of the throat and nose, in which he was deemed an expert. In 1861-3 he was attending physician to the hospital of the city of New York. He was a member of various professional bodies, having been president of the New York medical association in 1865, and tress-
urer and vice-president of that and other societies at different times. He gave largely to the New York academy of medicine, was elected its treasurer in 1850, and its vice-president. He stood in the front rank of his profession for over twenty years, but was compelled, on account of failing health, to retire in January, 1884.

FARNHAM, Lather, clergyman, b. in Concord, N. H., 3 Feb., 1810. He was educated at Dartmouth and at Andover theological seminary, where he was graduated in 1841. He has since held pasto- rates at Northfield, Marshfield, Concord, and Linnfield, Mass., and at other places (1844-'89), but has made Boston his permanent residence, serving as one of the editors of the "Christian Alliance," and also of the "Massachusetts Ploughman." In 1855-'61 he was secretary of the Southern aid so- ciety, a missionary association having for its espe- cial object the spreading of the gospel among the poorer classes, white and colored, of the south and southwest. In 1893 he was chosen secretary of the General theological library of Boston. Mr. Farnham has succeeded in raising for the Library an endowment of $32,000, and funds with which he has purchased for its use over 11,000 volumes. He has published "A Glance at Private Libraries," a manual (1853) and has also published a "His- tory of the Massachusetts Horticultural Society."

FARNHAM, Noah Lane, soldier, b. in New Haven, Conn., 4 June, 1829; d. in Washington, D. C., 14 Aug., 1861. His ancestor, Henry Farnham, came from Kentworth, England, and settled in Roxbury, Mass., in 1644. In 1838 Noah's parents removed to the city of New York. He was edu- cated in New Haven and at Cheshire, Conn., and entered business in New York at the age of sixteen. When eighteen years old he joined the city guard, and was present with the company when the riot of 1863 occurred. He subsequently joined the fire department, and was soon chosen foreman of a "hook and ladder" company, where he introduced new methods of drill, and practised his men in climbing, jumping, and other athletic exercises. In 1856 he was assistant engineer of the New York fire department, and in 1857 joined the 7th regiment, soon attaining the rank of 1st lieutenant. He became acquainted with Col. Ellsworth on the arrival of the later from Chicago in April, 1861, was persuaded by him to accept the lieutenant- colonelcy of the 7th regiment, and succeeded to the command after Ellsworth's death. When the regiment was ordered to march on Manassas, Col. Farnham was confined to a sick- bed, but left it, and rode into action at the head of his men. He was wounded early in the engagement and removed to a hospital in Washington, where he died a few weeks afterward.

FARNHAM, Ralph, soldier, b. in Lebanon, York co., Me., 7 July, 1756; d. in Acton, Me., 26 Dec., 1861. He was the last survivor of the battle of Bunker Hill. In 1776 he settled in Acton, be- ing the first white inhabitant of that township. In 1860 he was invited to Boston, where a concert was given for his benefit in Tremont Temple.

FARNHAM, Roswell, governor of Vermont, b. in Boston, Mass., 23 July, 1827. When he was three years old his family removed to Milford, Vt. He was graduated at the University of Vermont in 1849, was admitted to the bar in 1857, and was state attorney from 1859 till 1862. He entered the army as lieutenant of the 1st Vermont regiment, and was provost-marshal at New York. He was elected to the legislature in 1863, and lieutenant-colonel of the 12th Vermont during its service in the field. He was in the state senate in 1858-'9, a delegate to the Republican national con- vention in 1876, and a presidential elector on the Hayes ticket in 1880. He has served on the state board of education, and has been one of the trustees of the University of Vermont and the State agricultural college since 1878. He was governor of Vermont from 1880 till 1882, having received the largest vote ever cast, and defeating Edward J. Phelps, who has served on the board of education, and has been one of the trustees of the University of Vermont and the State agricultural college since 1878. He was governor of Vermont from 1880 till 1882, having received the largest vote ever cast, and defeating Edward J. Phelps, who has served on the board of education, and has been one of the trustees of the University of Vermont and the State agricultural college since 1878. He was governor of Vermont from 1880 till 1882, having received the largest vote ever cast, and defeating Edward J. Phelps, who has served on the board of education, and has been one of the trustees of the University of Vermont and the State agricultural college since 1878. He was governor of Vermont from 1880 till 1882, having received the largest vote ever cast, and defeating Edward J. Phelps, who has served on the board of education, and has been one of the trustees of the University of Vermont and the State agricultural college since 1878. He was governor of Vermont from 1880 till 1882, having received the largest vote ever cast, and defeating Edward J. Phelps, who has served on the board of education, and has been one of the trustees of the University of Vermont and the State agricultural college since 1878. He was governor of Vermont from 1880 till 1882, having received the largest vote ever cast, and defeating Edward J. Phelps, who has served on the board of education, and has been one of the trustees of the University of Vermont and the State agricultural college since 1878. He was governor of Vermont from 1880 till 1882, having received the largest vote ever cast, and defeating Edward J. Phelps, who has served on the board of education, and has been one of the trustees of the University of Vermont and the State agricultural college since 1878. He was governor of Vermont from 1880 till 1882, having received the largest vote ever cast, and defeating Edward J. Phelps, who has served on the board of education, and has been one of the trustees of the University of Vermont and the State agricultural college since 1878. He was governor of Vermont from 1880 till 1882, having received the largest vote ever cast, and defeating Edward J. Phelps, who has served on the board of education, and has been one of the trustees of the University of Vermont and the State agricultural college since 1878. He was governor of Vermont from 1880 till 1882, having received the largest vote ever cast, and defeating Edward J. Phelps, who has served on the board of education, and has been one of the trustees of the University of Vermont and the State agricultural college since 1878.
17th Illinois regiment, by order of the war department, and was commissioned brigadier-general, 29 Nov., 1862, but was compelled to resign from the army in March, 1863, owing to injuries received at the field. He then removed to St. Charles, Ill., and from 1863 till 1873 was again a member of congress. Since 1873 he has been engaged in the practice of his profession in Washington, D. C. —

His nephew, Elon John, soldier, b. in Green Oak, Livingston co., Mich., in 1857; enlisted in the 20th Ohio infantry in 1864, and served through the Mexican war. Subsequently he joined the Lopez expedition to Cuba which left New Orleans in 1850, and also took an active part in Walker's Nicaraguan expeditions. Still later he was captain of the slave-ship "Water Witch" out of Charlotte, N. C., and for carrying on the slave-trade. He is said to have regretted this episode in his life, and at the beginning of the civil war he became major in the 70th New York volunteers, which was raised and commanded by Gen. Sickles. He distinguished himself for gallantry in all the engagements in which his command took part, and was promoted colonel of his regiment. At the battle of Williamsburg, 5 May, 1862, he was severely wounded, but recovered in time to take part in the battles of Fredericksburg, Chancellorville, and Gettysburg, and was brevetted brigadier-general for gallant conduct in those engagements. He was then compelled by his wounds to abandon active service, and accepted the colonelcy of the 11th regiment of the veteran reserve corps, which he retained till the close of the war. He was postmaster and inspector of customs in the city of New York, which office he held at the time of his death.

FARQUHAR, Norman von Heldreth, naval officer, b. in Pennsylvania, 11 April, 1840. He was graduated at the U. S. naval academy in 1858, became a lieutenant in 1861; a lieutenant-commander in 1865, and a commander in 1873. In 1862—3 he was executive officer of the steamer "Mahaska," of the North Atlantic squadron, and during that period frequently engaged the enemy both afloat and in expeditions on shore. As executive officer of the "Santiago de Cuba" he took part in both attacks on Fort Fisher, N. C., and led the men of that vessel in the successful assault on the fort of 15 Jan., 1865. He was commandant of cadets at the U. S. naval academy in 1881—6, and in the latter year was promoted in Vermont. He was for fifteen years chief judge in Franklin county, and for twenty-seven years a member of the legislature. He was especially active in promoting the interests of the Baptist denomination, to which he belonged, and vigorously opposed an act passed by the legislature in 1877 requiring the inhabitants of each town to support "the standing order," unless they could show that they were connected with some other religious organization. This act was repealed in 1887.

FARNSWORTH, Philo Judson, physician, b. in Westford, Chittenden co., Vt., 9 Jan., 1822. He was graduated at the University of Vermont in 1844, and at its medical department in 1848. He practised at Phillipsburg, Canada, until 1860, in which year he received a second medical degree from the College of physicians and surgeons in New York. He was in Point of Point, Iowa, in 1862—4, then went to Clinton, Iowa, and in 1870 was elected to the chair of materia medica and diseases of children in the University of the State of Iowa. He is a member of several medical societies, and has contributed frequently to professional journals, chiefly to the "Medical and Surgical Reporter," of Philadelphia. He has also paid some attention to local geology and archeology. He read a paper on the "Therapeutics of Ammonia" before the American medical association in 1873, and one on "Indian Mounds" before the Iowa national society in 1876. He is the author of "A Synopsis of a Course of Lectures on Materia Medica" (Chicgo, 1844).
March, 1792, to the 26th of October, 1793." George Farragut, as sailing-master of an expedition to the Bay of Pascagoula in 1810-11, sent by Gov. Claiborne, of the Mississippi territory, bore a principal part in securing from the Spanish authorities the disputed territory of Louisiana. Farragut wrote in his report: "At the special request of the inhabitants of Pascagoula, by whom he is greatly beloved, I prevailed on Sailing-Master George Farragut to accept the commission of magistrate. George Farragut and Elizabeth S'ane, of North Carolina, bore him five children—three sons and two daughters—and died in New Orleans in 1808, of yellow fever.

The boyhood of David Glasgow Farragut lacked none of the dangers and hardships of frontier life. In his journal he says: "I remember that on one occasion, during my father's absence, a party of Indians came to our house, which was somewhat isolated; when my mother, who was a brave and energetic woman, barred the door in the most effective manner, and sent all of us trembling little ones up into the loft of the house while she guarded the entrance with an axe. The savages attempted to parley with her, but she kept them at bay until finally they departed. My father arrived shortly afterward with his command (he was a major of cavalry), and immediately pursued the Indians, whom I have never seen killed. This fear of nothing on land or sea, and once went from New Orleans to Havana in a pirogue (a sort of canoe), was in the habit of taking his children across the lake in all sorts of weather, saying "now was the time to teach them fear." At the age of eight the boy accompanied his father in a small boat across Lake Pontchartrain, during a gale. "This expedition," he says in his journal, "was my first experience on salt water, and I fervently hoped at that time it would be my last." The father, who was killed in the bombardment at "Yemulhing." At the age of eight the boy accompanied his father in a small boat across Lake Pontchartrain, during a gale. "This expedition," he says in his journal, "was my first experience on salt water, and I fervently hoped at that time it would be my last." The father, who was killed in the bombardment at "Yemulhing." At the age of eight the boy accompanied his father in a small boat across Lake Pontchartrain, during a gale. "This expedition," he says in his journal, "was my first experience on salt water, and I fervently hoped at that time it would be my last." The father, who was killed in the bombardment at "Yemulhing." At the age of eight the boy accompanied his father in a small boat across Lake Pontchartrain, during a gale. The father, who was killed in the bombardment at "Yemulhing." At the age of eight the boy accompanied his father in a small boat across Lake P
foot-warmer. I drew it to me rather unceremoniously, at which she remarked that I 'ought to feel myself highly complimented, and should not be offended.' To which I replied, 'Madame, it might be so considered in your country, but not in mine.'

In the spring of 1818 Farragut made another cruise in command of the Eunice, which was armed as a schooner and commissioned as a schooner. He visited the coast of China, and returned to New York. In 1820, he was commissioned a lieutenant on the brig "Shark." In 1820 he was ordered home for his examination, and sailed in a merchantman. On the voyage they were sighted and chased by a Colombian war vessel, which the frightened captain supposed to be a pirate. Farragut, as a pendant to the commodore, accompanied the crew, and prepared for resistance. When a small boat from the man-of-war came alongside, he had a grindstone and a barrel of tar ready to drop into it and sink it if they should prove to be pirates. He passed his examination, but not well enough to satisfy himself, and went to Norfolk, Va., where he fell in love with Miss Susan C., daughter of Jordan Marchant, whom he married three years later.

In May, 1829, he was ordered to sea in the sloop-of-war "John Adams," which conveyed the newly appointed U. S. minister to Mexico and Guatemala. On this cruise he met Gen. Santa Ana (afterward president of Mexico) at Vera Cruz, and made his first acquaintance with the Gulf where his fame was to be won forty years later. After his return he obtained orders to sail in the schooner "Greyhound," of Com. Porter's fleet, which was preparing for a cruise against freebooters of the West Indies. They had numerous encounters with the pirates, and on one occasion Farragut was sent ashore at the Isle of Pines, in command of a detachment who, after making their way through swamps and thick chasms, found the caves and concealed houses of the robbers, drove them out, and set fire to everything that would burn. Soon afterward Farragut was made executive officer of Porter's flag-ship, the "Seagull," which made a cruise to examine the reefs and shoals of the Gulf. In a subsequent cruise he obtained leave of absence and went to visit his friends in New Orleans, taking passage in a vessel that was carrying timber the first load of bricks for the construction of Fort Jackson, with which Farragut fought his first battle in the civil war. In July, 1829, he was assigned to the command of the "Farola," an armed merchantman through the Gulf, to protect them from pirates. He had many cases of yellow fever on board, and treated them himself, the only death being that of a midshipman who refused his prescription because he was not a physician. He himself took the fever on his homeward voyage, and on his arrival was sent to the hospital in Washington, where he remained until his recovery.

In 1825 he was commissioned lieutenant, and ordered to the frigate "Brandywine," Capt. Charles Morris, which in September carried Lafayette home to France, and after that made a cruise in the Mediterranean. On his return home in May, 1826, Farragut took his wife to New Haven, Conn., to be treated for neuritis, and remained there four months, attending the lectures of the Yale professor of medicine, and especially interested him. After this he spent two years at Norfolk, Va. He was an accomplished cook, and prepared all the food for his invalid wife, and personally took a large part of the care of her. At the same time he established a successful school for boys on the seaward side of Annapolis with Samuel L. Southard, secretary of the navy, inspected this school, he gave it what Farragut calls "one of the few, the very few, compliments I ever received from the navy department or its head."

In October, 1838, he was ordered to the new sloop-of-war "Vandalia," which in December sailed for the Brazil station. The squadron went to Buenos Ayres, and was there when Rossas became dictator. In the autumn of 1829 he returned to Rio de Janeiro, where Farragut witnessed the marriage of Monroe and the Emperor Pedro I. He became aide-de-camp at court. In December an affection of the eyes, which had long troubled him; compelled him to ask for leave of absence, and he went home in a merchantman, which on the way was chased by a pirate. Farragut found four carronades and twenty-four 12-pounder guns on board, two hand-guns, and got everything ready for a vigorous defence; but the merchantman outsailed her pursuer. In December, 1833, he was ordered to the "Natchez," which in January, 1833, sailed for Charleston harbor, where she remained until the nullification troubles were over. The vessel was next ordered to the Brazil station. Of Farragut's qualities as executive officer at this time, one of those that sailed with him wrote: "Never was the crew of a man-of-war better disciplined or more contented and more respected. Whenever officers were called, and Farragut took the trumpet, every man under him was alive and eager for duty. I remember well only one occasion when he took the "Natchez" out of the harbor of Rio, which at the entrance is quite narrow, against a head wind, by a maneuvre termed "box-hauling." There were several men-of-war in port, English and French, whose officers and crews were watching us closely. Many declared that the manoeuvre could not be successfully accomplished, but it was done splendidly, without a bark or failure, and I shall remember to my dying day the proud feelings and satisfaction which we all felt." In March, 1834, he took command of the schooner "Boxer," which he thoroughly overhauled and repaired in the harbor of Rio. The "Boxer" was ordered home in the summer, and for four years the lieutenant was in Norfolk and Washington, serving as anavy, waiting for sailing orders, and taking care of his wife, who died in 1840. In August, 1838, he was given command of the sloop "Eríc," and ordered to Tampico, because of the prospect of war between France and Mexico. There he made minute observations of all the men in all the vessels, particularly the bombardment of the castle of San Juan de Ulloa, and gave his conclusions in a long letter to Commodore Barron, in which he wrote: "If we who wander about the world do not keep those at home informed of the daily improvements in our navies, how can we hope to improve, particularly when we see men impressed with the idea that, because they once gained a victory, they can do it again? So they may; but I can tell them it must be with the means of 1838 and not those of 1812."

He now spent two years more at home, serving on courts-martial and learning the carpenter's trade, till the spring of 1841, when he became executive officer of the "Delaware," and in September he received his commission as commander. He sailed once more for South American waters, and in June, 1842, he was sent to the Potomac. He took every opportunity to travel in the countries whose ports he visited, and became specially familiar with South American affairs. The cruise ended in Norfolk harbor in February, 1843. There, in December of that year, he married Virginia, elder daughter of the late James F. Deming. This lady possessed a superior character and cultivation, and no little literary ability, who survived him fourteen years. In April, 1844, he became executive officer of the "Pensylvania," and at the beginning of the Mexican war in
1846 applied for command of a ship and active service. After much difficulty, he obtained the sloops-of-war "Oscula," "Wicomico," and "Lavey," in 1847. He collected a crew, and sailed two days after his assignment, eager to capture the castle of San Juan de Ulloa, which he believed could be done with three vessels; but when he arrived at Vera Cruz, the castle had just surrendered to the land forces. Farragut says, "I had much pleasure, had I lost a great opportunity in not attacking it." He says in his journal: "Of all the service I have seen since entering the navy, this cruise was the most mortifying. As I had the ill-will of my commodore." [Matthew C. Perry], "I was not permitted to participate in any of the engagements and more important duties, but was placed under a reef of rocks off Tuxpan, to blockade that port. When I could hear the imposition no longer, I reported the facts to the navy department, and asked to be relieved from under his command, or from command of the ship. Accordingly, I went home with my vessel. My letters were considered improper by the secretary of the navy." [Com. Perry denied that he had any prejudice against Farragut.]

In February, 1846, Farragut's vessel returned home, when he was assigned to the Norfolk navy-yard, and in February, 1849, was ordered to Washington to compile a book of ordnance regulations for the navy, in collaboration with Commander T. A. Dornin and Lieuts. Barron, Harwood, and Fairfax. This work occupied them a year and a half. When it was completed, Farragut says: "Many of the best features were engraved and stricken out, as were also the drawings, which we considered fine illustrations. The book was highly commended by officers of other navies than our own; but where is it now? God only knows. In an exhibition of the products of the navy another year ten afterward, and made a new board ten years afterward, and made a few necessary changes to suit the introduction of steam and heavy guns, and the names of the original board were obliterated." During those eighteen months he attended regularly the lectures at the Smithsonian Institution. When he returned to the Norfolk navy-yard as ordnance officer, he gave the officers a weekly lecture on gunnery. Lieut. Percival Drayton was associated with him at this time in a series of experiments at Fort Monroe, to test the various classes of guns used in the navy, and an annual taking of the range at Hampton Roads, the two officers which lasted through their lives.

When the Crimean war began, in 1854, Farragut asked to be sent thither as a professional observer. This request was denied by the navy department; but soon afterward he was sent to establish a navy-yard on the Pacific coast, the site chosen being Mare Island, in the bay of San Francisco. This task occupied him four years. During this time the affair of the vigilance committee took place, and he was appealed to for aid to the state authorities; but he carefully refrained from all interference.

In July, 1858, he returned to the Atlantic coast, and was given command of the "Brooklyn," a new sloop-of-war, in which he conveyed to Vera Cruz Robert M. McLane, the new U. S. minister to Mexico. The ship was then placed at the disposal of Mr. McLane and took him to various points on the coast, that he might communicate with the American consuls. Farragut was taunted with being at the beck and call of a civilian, and made a characteristic answer: "I can only say that I am always at the service of the country in doing my duty, that I am the property of an intelligent man appointed by the government for a purpose on account of his qualifications, than to be under some old fool who has floated up to his position without the first requisites, the only merit that he possesses is that he has been in the navy all his life without having done anything to recommend himself either to the government or to his brother officers." From Vera Cruz he wrote: "I can't help loving my profession; but it has materially changed since the advent of steam. I look for much pleasure, but was after the other day in a gale of wind as ever a boy did in any feat of skill. The people seemed astonished. McLane said he would sooner have done it than anything else—except to take a ship." Governmental affairs in Mexico were very much disturbed at this time, 1858, and Farragut was of great service, protecting American interests there, for which he received a letter of thanks from American merchants in Vera Cruz. He made another trip to Mexico in November, and in December passed up the Mississippi to New Orleans, where he arrived just in time to attend the funeral of Gen. William. Who was retired as a lieutenant. The intimate acquaintance with the Gulf of Mexico and the lower Mississippi, which Farragut gained by these frequent visits, was found to be of inestimable value later.

In the winter of 1860-1 Farragut was on waiting orders in Norfolk, Va. The one topic of discussion there, as elsewhere throughout the country, was the impending secession of the south and the probability of civil war. If an amicable separation of the country should take place, he was asked what would be his attitude toward the south, because his relatives were there and his home, so far as he had a home on shore. But he did not see how secession could be attempted without war, and in that event he held that his allegiance was due to the National government, to which he was sworn and called to serve, rank, and employment. He watched with intense interest the efforts to carry Virginia into the Confederacy, and when it was accomplished he declared that "the state had been dragged out of the Union." As he expressed his opinions freely, and boldly said that he felt it to be his duty to resist any effort at secession. He was a member of a naval retiring-board in Brooklyn, but had little else to do for nearly a year. One privateer, the "Sumter," had already been sent out by the Confederates. Farragut, who had a theory as to her probable movements, asked the government to let him go in chase of her with a swift vessel, but the suggestion was not approved.

In December, 1861, he was summoned to Washington, whence he wrote a hurried note to his wife: "Keep your lips closed, and burn my letters, for perfect silence is to be observed—the first injunction of the secretary. I am to have a flag in the Gulf, and the rest depends upon myself. Keep calm and silent. I shall sail in three weeks." For some time a formidable expedition had been in preparation, intended to reduce the defences of New Orleans and the Mississippi, and capture the farthest city in the south. The expedition included twenty-one schooners, each carrying a large mortar, under command of Commander (now Admiral) David D. Porter. Farragut had no faith in the efficacy of these mortars, but, as a great deal of time and money was spent in preparing for this operation, he accepted the fleet as he found it. He sailed from Hampton Roads, 2 Feb., 1862, in the
steam sloop-of-war "Hartford," 1,900 tons, which from that time till the close of the war was his flag-ship. She had a speed, under steam alone, of eight knots, or with steam and sail combined, of eleven knots. She carried twenty-two nine-inch Dahlgren guns, two twenty-pounder Parrots, and a monster ram on the forecastle; and Farragut had her fore- and main-tops protected with boiler iron and armed with howitzers. His orders instructed him to "collect such vessels as can be spared from the blockade, and proceed up the Mississippi river and redress the defences which gunboats and monitors have offered up to New Orleans, when you will appear off that city and take possession of it under the guns of your squadron. . . . As you have expressed yourself perfectly satisfied with the force given to you, and as many more powerful vessels will be added before you can commence operations, the department and the country require of you success." A military force of 15,000 men, designed to co-operate with the fleet in capturing New Orleans, and to garrison the place after it should be taken, sailed in transports from Fort Monroe, the opening for the bay, on 20 April, under the command of Benjamin F. Butler. The place of rendezvous was Ship Island, which is about one hundred miles northeast of the mouths of the Mississippi.

At the last great bend in the river, about thirty miles above the mouth, stood Fort Jackson on the right bank, and Fort St. Philip and a single fort at this point had held the British forces in check for nine days in 1814-'15, though they threw a thousand shells into it. Fort Jackson was a bastioned fortification, built of brick, with casemates and glacis, rising twenty-five feet above the water line. Fort St. Philip was smaller, and rose nineteen feet. The whole number of guns in the two works was about 115, which were of various kinds and sizes, but mostly smooth-bore thirty-two-pounder. Above the forts lay a Confederate fleet of large vessels, including an iron-clad ram and a large, unfinished floating battery covered with railroad iron. Below the forts two iron chains were stretched across the river, supported on eight huks anchored abreast. Two hundred Confederate sharp-shooters kept constant watch along the bank. As the gunboats were ready to be launched and sent down against the fleet. To pass these obstructions and fight his way to the city, Farragut had six sloops-of-war, sixteen gun-boats, twenty-one mortar schooners, and five other vessels, carrying in all over 200 guns. This was the largest expedition that had ever sailed under the United States flag, but it did not include a single iron-clad, and while it was mainly built for sea-service, its task now was to operate in a river with many shoals and a shifting channel. To get the larger vessels over the bar at Southwest pass, it was necessary to lighten them as much as possible, and then drag them over through a foot of mud. With the "Pensacola" alone, this process occupied two weeks. The "Colorado" could not be taken over at all.

The mortar schooners were towed up the stream to a point within reach of the forts, and began to take their places and open fire on 18 April. There was a stretch of woods between them and the forts, and their masts were trimmed with bushes to prevent them from being distinguished. The gunners could not see the forts, but fired with a computed aim, the result of careful observation and triangulation by a coast-survey officer. They used shells weighing 285 pounds, and kept up a constant fire for six days and nights, throwing nearly 6,000 shells. This resulted in disabling fifty-three of the garrison and destroying some of the build-
promptly boarded it and set it on fire, so that it drifted down the river and exploded. The gun-boat "Varuna," of Farragut’s fleet, was rammed by two Confederate gun-boats and sank in fifteen minutes. At daylight the fleet continued on its way up the river, and Capt. Bailey, leading in the "Cayuga," captured a Confederate regiment encamped on shore. On the 30th the Chalmette batteries, three miles below the city, were attacked and silenced, and an hour later New Orleans itself was at the mercy of Farragut’s guns. This exploit had cost the National fleet 37 men killed and 147 wounded, and one vessel sunk out of the seventeen. The Confederate fleet was completely destroyed. At noon the surrender of the city was demanded of the mayor, and Capt. Bailey was sent ashore to haul down the Louisiana flag and raise the stars and stripes over the public buildings. A troublesome correspondence with the mayor ensued, and Farragut was glad to turn over the city to Gen. Butler as soon as the troops could be brought up, on the evening of 1 May. The forts had surrendered to Com. Porter on the 28th. It appears that this timely capture of New Orleans changed the course of the war for Napoleon, who was about to recognize the Confederacy and take measures to raise the blockade.

Farragut wanted to take his fleet at once to Mobile, capture that place, and close the port to blockade-runners; but the government was anxious to open the Mississippi through its whole length, and the ships were therefore kept in the river for some months. Before daylight, on 28 June, 1862, he ran by the batteries at Vicksburg with eight vessels, joining Com. Charles H. Davis’s fleet of iron-clads above the city. In this passage Farragut fired a volley of shot and shell, and lost fifteen men killed and thirty wounded. On 15 July, finding that nothing could be effected at Vicksburg by the fleet alone, he ran the batteries again, descending the river to New Orleans. The next day he was commissioned rear-admiral.

On 14 March, 1863, to assist Gen. N. P. Banks in his siege of Port Hudson, Farragut attempted to run by the batteries at that place with seven vessels—three sloops-of-war, each with a gun-boat lashed to the port-side, and the side-wheel steamer "Mississippi." By this arrangement, if a vessel were disabled, the gun-boat could take her out of the fight. But they met so destructive a fire that only the "Hartford," and her attendant gun-boat succeeded in getting by. The "Mississippi" ran aground and was burned, and the others were compelled to drop down stream. With the "Hartford" and the "Albatross" Farragut proceeded up stream and blockaded the mouth of Red river, thus preventing Confederate supplies from coming down, or re-enforcements from going up to the army of Gen. Richard Taylor. Coal and provisions were sent down to him by Com. Grant and Admiral Porter, on barges that drifted past the Vicksburg batteries in the night. Subsequently he assisted Gen. Banks in the investment of Port Hudson, till it was surrendered, 8 July.

The Mississippi was now open to navigation through its entire length. Admiral Porter took Farragut’s place at New Orleans, while Farragut sailed for New York in the "Hartford," arriving in August. When the flag-ship was examined at the navy-yard, it was found that she had been struck 840 times by shot and shell during her nineteen months’ service. Farragut’s flag was presented to him by public welcome and receptions by the New York chamber of commerce and committees of citizens, and rested five months while the ship was refitted.

In January, 1864, he returned to the Gulf, visited Ship Island and Pensacola, establishing depots of supplies, and prepared for his long-mediated attack on the defences of Mobile. In May a beautiful sword, with a gold and silver scabbard and the hilt set in brilliants, was sent to him by the Union League club of New York. About this time he wrote: "If the devil of the 20th of June were to return, the Chalmette batteries, three miles below the city, were attacked and silenced, and an hour later New Orleans itself was at the mercy of Farragut’s guns. This exploit had cost the National fleet 37 men killed and 147 wounded, and one vessel sunk out of the seventeen. The Confederate fleet was completely destroyed. At noon the surrender of the city was demanded of the mayor, and Capt. Bailey was sent ashore to haul down the Louisiana flag and raise the stars and stripes over the public buildings. The Mississippi was now open to navigation through its entire length. Admiral Porter took Farragut’s place at New Orleans, while Farragut sailed for New York in the "Hartford," arriving in August. When the flag-ship was examined at the navy-yard, it was found that she had been struck 840 times by shot and shell during her nineteen months’ service. Farragut’s flag was presented to him by public welcome and receptions by the New York chamber of commerce and committees of citizens, and rested five months while the ship was refitted.
through a trumpet from the "Hartford," "Torpedoes!" was the answer. "Damn the torpedoes! Exclaiming, Farragut had assisted in the "Hartford," Lieutenant Drayton, go ahead! Jouett, full speed!" Thus the "Hartford" passed the "Brooklyn," took her place at the head of the line, and led the fleet into the bay. Every vessel suffered from the enemy's fire as it approached the fort, poured in rapid broadsides that silenced the Confederate guns when it was abreast of the work, and suffered again from raking fire after it had passed. Inside of the bay, the signal "Chase enemy's gun-boats" was given, and the lashings that held the gun-boats to the slopes were cut with axes and the former made off for the sea. The Confederate gun-boat that captured, one was sunk, and another driven under the guns of the fort. There was a brush with the iron-clad ram, but it was not serious, and the fleet came to anchor three miles up the bay. Farragut was planning to attack the fort as soon as it should be dark enough to prevent the garrison of the fort from seeing which was friend and which foe; but the ram anticipated him, steaming directly for the flag-ship in the midst of the fleet. The admiral at once gave orders for every ship to attack her, not only by her regular armament, but by a desperate vengeful contest ensued. The ram had the advantage in that she was sure of striking an enemy with every blow, while the fleet had to avoid running and firing into one another. Their shot had no effect on the sloping iron sides of the monster, and when the wooden ships entered her they received her own bows and only heeled her over. But the monitors, with their enormous guns, shot away her smoke-stack and steering apparatus and jammed her shutters, while one fifteen-inch shot actually penetrated her armor. Her commander was wounded, her crew, all killed or wounded, and her smoke-stack and column of smoke that filled their vessel, and she displayed a white flag and surrendered. In the fight the "Lackawanna" had accidentally run into the flag-ship and cut her down nearly to the water's edge. The victory cost the National fleet 345 men, including 92 killed by shot and 113 drowned in the "Teumsch." The Confederate fleet lost 10 killed, 16 wounded, and 280 prisoners. The loss in the forts is unknown. A few days later they were surrendered. Farragut in his official report awarded the most generous praise and highest credit to the men of the victory. He said: "The commanding officers of all the vessels that took part in the action deserve my warmest commendations, not only for the unintermitting zeal with which they had prepared their ships for the contest, but for their skill and daring in carrying out my orders during the engagement," and he mentioned every one of them specially. He also wrote: "I witnessed the terrible effects of the enemy's shot, and the good conduct of the men at their guns; and although no doubt their hearts sickened, as mine did, when their ships were struck down beside them, yet there was not a moment's hesitation to lay their comrades aside and spring again to their deadly work." The quartermaster that tied him in the rigging says he saw the admiral come on deck just as the killed of the "Hartford" were being laid out, and "it was the only time I saw him cry, but tears came in his eyes like a little child." Henry Howard Brownell was on board the flag-ship as an acting ensign, and described the battle in one of his finest poems, "The Bay Fight." The city of Mobile could not but be captured by the fleet as later Orleans had been, because of shore water and obstructions in the channel. But the purpose of the operation, to stop the passage of blockade-runners and so close another main avenue of supply to the Confederacy, was accomplished. The accompanying view of the "Hartford" shows the ship as she appeared in Mobile bay after the battle. The stunned appearance of her masts is due to the fact that her top-gallants were housed. Her hull was painted lead-color.

In November, as Farragut's health was failing, the department ordered him home, and on 12 Dec., he reached New York, where he was given a public reception and a return presentation to him for the purchase of a home in the city. A bill creating the grade of vice-admiral was passed by congress on 22 Dec., and the next day President Lincoln signed it, and nominated Farragut for the office, which nomination the senate at once confirmed. When Richmond fell into the hands of the National forces, Farragut, who was on the James, with Gen. George H. Gordon, procured horses, and rode thither post haste, entering the city a short time before the president got there. A few days later he visited his old home, Norfolk, and was given a public reception by the naval and military officers there and those of the citizens who had remained true to the Union. In the course of his speech he said: "This meeting recalls to me the most momentous events of my life, when I listened in this place till the small hours of the morning, and returned home with the feeling that Virginia was safe and firm in her place in the Union. Our Union members of the convention were elected by an overwhelming majority, and we believed that everything was right. Judge, then, of our astonishment when the victory, a few days later, that the state had been voted out by a miserable minority, for want of firmness and resolution on the part of those whom we trusted to represent us there, and that Virginia had been dragged out of the Union. . . . I was told by a brother officer that the state had seceded, and that I must either resign and turn traitor to the government which had supported me from childhood, or I must leave this place. Thank God, I was not long in making my decision! I have spent half of my life in revolutionary countries, and I know the horrors of civil war, and I told the people what I had seen and what they would experience. They laughed at me, and called me 'granmy' and 'croaker'; and I said, 'I can not live here, and will seek some other place where I can live.' I suppose they said I left my country, for my country's good, and, thank God, I did!"

On 6 July, 1865, the Union club of Boston gave a dinner to the admiral, at which Oliver Wendell Holmes read one of his happiest occasional poems, a few lines of which may be quoted here:

"Fast, fast are lessenings in the light
The names of high renown-
Van Tromp's proud besom pales from sight,
Old Benbow's half hull down."

The numbers of high renown—
Sarsen one tall frigate walks the sea,
Or skirts the safer shores.
Of all that bore to victory
Our stout old commodores.
Hails, men—what winds and waves—
Where are they found?
The answering billows roll,
Still bright in memory’s sunset ray,
God rest each gallant soul!
A brighter name must dim their light,
Woe to the present day—
The Viking of the River Fighl,
The Conqueror of the Bay.
I give the name that fits him best—
Ay, better than his own—
The Sea-King of the sovereign West,
Who made his mast a throne.

On 25 July, 1866, congress created the grade of admiral, before unknown in the U. S. navy, and the rank was given to Farragut. The next year he was assigned to the European squadron, hoisted his flag on the “Franklin,” and made a long cruise in European waters. By special permission of the president, Mrs. Farragut and her cousin, Mrs. Pennock, wife of his fleet captain, Alexander M. Pennock, accompanied them. They visited the principal European capitals, and were everywhere received with the highest honors. One of the most interesting incidents of the cruise was a visit to the island of Minorca, the home of Farragut’s ancestors, where the whole population turned out to welcome him. In the summer of 1869 the admiral and Mrs. Farragut visited Vallejo, Cal. His last official duty was to take charge of the naval defenses of the Pacific Coast. After the war he was a visitor to the island of Minorca, the home of Farragut’s ancestors, where the whole population turned out to welcome him. In the summer of 1869 the admiral and Mrs. Farragut visited Vallejo, Cal. His last official duty was to take charge of the naval defenses of the Pacific Coast. After the war he was a visitor to the island of Minorca, the home of Farragut’s ancestors, where the whole population turned out to welcome him.

Admiral Farragut had a strongly religious nature, believing in the constant guidance of Divine Providence. At the time of his death he was a communicant of the Protestant Episcopal church. He is one of the few great heroes of the world whose character has never been clouded by the slightest suspicion of a want of honesty or personal purity. Many entertaining anecdotes are told of him. When we consider the novel and complicated problems that confronted him in naval warfare, and the providential manner in which he seemed to have been schooled for them through a long life—when we remember how other commanders merely fought line against line in simple though courageous fashion, while he contended with casemated forts, fire-rafts, fleets, and hidden torpedoes—always ready, when the hour of death approached, to pronounce the name of the greatest naval commander the world has ever seen.

There is a colossal bronze statue of the admiral in Farragut square, Washington, executed by Vinnie Ream, paid for by congressional appropriation. There is one of heroic size in Madison square, New York, executed by Augustus St. Gauden, paid for by a subscription raised among the citizens. In the chancel of the Church of the Incarnation, New York, is a mural tablet containing a bas relief likeness by Launt Thompson. William Page’s original picture of “Farragut’s Entry into Mobile Bay” is now in the possession of the emperor of Russia; a replica is still owned by Mr. Page’s family. (See illustration on page 417.) The authorized life of the admiral is that by his son, Loyall Farragut, which includes many and many of his letters (New York, 1870). See also James E. Montgomery’s “Cruise of the Franklin” (New York, 1869), and “The Battle of Mobile Bay,” by Com. Foxhall A. Parker (Boston, 1870).

FARRAR, John, educator, b. in Lincoln, Mass., 1 July, 1779; d. in Cambridge, Mass., 8 May, 1853. He was graduated at Harvard in 1800, studied theology at Andover, and in 1805 was appointed Greek tutor at Harvard. He was chosen Hollis professor of mathematics and natural philosophy in the same institution in 1807, and retained the chair till 1827, when he resigned in consequence of a painful illness that finally caused his death. He published for the use of his pupils a translation of Laproix’s “Elements of Algebra” (1816), which he followed by selections from Legendre, Biot, Beazit, and others. These works were at once adopted as textbooks by Harvard, the U. S. military academy, and other institutions. He was a contributor to scientific journals, to the “North American Review,” and to the “Memoirs” of the American academy.

—His wife, Eliza Ware, author, b. in Flanders, Europe, in 1784, d. in Andover, Mass., 28 Jan. 1868. She was the daughter of Benjamin Rotch, of New Bedford, Mass. She was educated in England, lived there until 1819, and in 1828 became the second wife of Prof. Farrar. She wrote “Children’s Robinson Crusoe”; “The Story of Lafayette”; “The Life of Howard”; “Youth’s Literature”; “Young Lady’s Friend” (1837); “Congo in Search of His Master” (New York, 1854); and “Recollections of Seventy Years” (Boston, 1865).

FARRAR, Samuel, lawyer, b. in Lincoln, Mass., in 1754; d. in Andover, Mass., 15 May, 1804. He was graduated at Harvard in 1779, and was tutor there in 1800. He then studied law, and soon afterward began practice in Andover. He was one of the chief founders of the Andover theological seminary, and for thirty-eight years was treasurer of that institution and of Phillips Academy, and receiving a large share of his salary to support. He was the first president of the Andover bank, and held the office thirty years.

FARRAR, Thomas Charles, artist, b. in London, 10 Dec., 1838; d. in Andover, Mass., 15 May, 1864. He was graduated at Harvard in 1797, and was tutor there in 1800. He then studied law, and soon afterward began practice in Andover. He was one of the chief founders of the Andover theological seminary, and for thirty-eight years was treasurer of that institution and of Phillips Academy, and receiving a large share of his salary to support. He was the first president of the Andover bank, and held the office thirty years. He was married.

FARRAR, John, educator, b. in Lincoln, Mass., 1 July, 1779; d. in Cambridge, Mass., 8 May, 1853. He was graduated at Harvard in 1800, studied theology at Andover, and in 1805 was appointed Greek tutor at Harvard. He was chosen Hollis professor of mathematics and natural philosophy in the same institution in 1807, and retained the chair till 1827, when he resigned in consequence of a painful illness that finally caused his death. He published for the use of his pupils a translation of Laproix’s “Elements of Algebra” (1816), which he followed by selections from Legendre, Biot, Beazit, and others. These works were at once adopted as textbooks by Harvard, the U. S. military academy, and other institutions. He was a contributor to scientific journals, to the “North American Review,” and to the “Memoirs” of the American academy. —His wife, Eliza Ware, author, b. in Flanders, Europe, in 1784, d. in Andover, Mass., 28 Jan. 1868. She was the daughter of Benjamin Rotch, of New Bedford, Mass. She was educated in England, lived there until 1819, and in 1828 became the second wife of Prof. Farrar. She wrote “Children’s Robinson Crusoe”; “The Story of Lafayette”; “The Life of Howard”; “Youth’s Literature”; “Young Lady’s Friend” (1837); “Congo in Search of His Master” (New York, 1854); and “Recollections of Seventy Years” (Boston, 1865).

He was the first president of the Andover bank, and held the office thirty years.
“A Windy Day” and “The Old House on the Hill.”

FARRAR, Thomas, lawyer, was born in Concord, Mass., 11 July, 1747; d. in Hollis, N. H., 21 Feb., 1840. He was graduated at Harvard in 1767, taught school and settled in New Ipswich, N. H., in 1770. He was a major in the Revolutionary army, and after the war became a justice of the court of common pleas of New Hampshire, and afterwards a justice in February, 1802, and altogether filled the office of judge for more than forty years.—His son, Timothy, jurist, b. in New Ipswich, N. H., 17 March, 1788; d. in 1874. He was a law partner of the elder Mr. Farrar from 1818 to 1816, and from 1824 to 1833 was judge of the New Hampshire court of common pleas. He was vice-president of the New England historic genealogical society from 1833 to 1838. He published “Report of the Dartmouth College Case” (Portsmouth, 1819); “Review of the Democratic Decision” (1857); “Manual of the Constitution of the United States” (Boston, 1867); and also wrote articles for the “North American Review” and the “New Englander.”

FARRAR, John P., Canadian R. C. bishop, b. in Kingston, Ontario; d. in Hamilton, Ontario, 26 Sept., 1892. He studied theology at the seminary of Montreal, and after completing the course was ordained priest and stationed at L’Original, Ottawa. In 1856 the diocese of Hamilton was created, and Dr. Farrar was appointed its bishop.

FARRAR, Thomas, clergyman, b. in Ireland; d. in New York, 10 July, 1894. He came to the United States when a boy, studied for the priesthood at Mount St. Mary’s college, Emmitsburg, Md., and was ordained by Archbishop Hughes. He was a staunch supporter of the Union during the war of secession, took great interest in the welfare of the colored people, and bequeathed $5,000 to form the nucleus of a fund to establish a church for their benefit in New York. In accordance with his wishes, the church of St. Benedict the Moor, on Bleecker street, was organized after his death.

FARRAR, Edward, Canadian journalist, b. in Castlegar, County Kootenay, B. C., 1840. He was educated by private tutors at Stonyhurst college, England, and at the Jesuit college in Rome. On completing his course of study, he declined the places of assistant teacher of Greek and Latin and teacher of mathematics in the University of Toronto. In 1870 he arrived in Canada and connected himself with the “Daily Telegraph” in Toronto, but upon the establishment of the Toronto “Mail” in 1872 he joined its editorial staff, and remained there till 1881, when he became foreign editor of the New York “World.” After about a year’s service on this paper he went to Winnipeg, Manitoba, and was for two years editor of the Winnipeg “Times.” In the autumn of 1884 he became editor-in-chief of the Toronto “Mail,” a position which he now (1887) holds. Mr. Farrar has made a special study of the Indian languages, and prepared material for the press a work on “The Algonkin Religion.”

Farrington, William George, clergyman, b. in New York city, 15 Dec., 1832. He was graduated at Columbia in 1853, and at the General theological seminary, New York, in 1856, was ordained deacon and priest the same year. In 1870 he was rector of Trinity parish, New York city, till 1862. In 1863 he organized Christ church in Hackensack, N. J., of which he was rector till 1870. He subsequently had charges of churches at Newark, Orange, N. J., and at Bloomfield from 1877. He is the author of a tract on “The Historical Church” in 1861, and has edited the “Church Almanac” since 1867.

Farrow, Samuel, lawyer, b. in Virginia about 1755; d. in Columbia, S. C., 18 Nov., 1824. His father settled near Columbia, South Carolina, about 1765. The son was a member of a company of scouts in the Revolutionary war, was wounded in one of the numerous skirmishes in which he was engaged, and took part in the battle of Musgrove Mills. The war being over, he returned to his home, and in 1782 married his first wife. In 1783 he married his second wife, a daughter of Col. Philemon Waters, obtained their release by delivering up six British prisoners, and boasted that she had made a good bargain, because she could beat the British four to one. After the war he studied law, and was admitted to the bar in Charleston in 1793, and settled at Spartanburg. In 1810 he was elected lieutenant-governor, and in 1812 as a Democrat to congress from the Pinckney district, serving from 24 May, 1813, till 4 March, 1815. He was re-elected, but resigned, preferring to serve in the state house, of which he was a member from 1816 till 1821, when he retired from public life. The organization of the South Carolina lunatic asylum and deaf and dumb asylum was chiefly due to his efforts.

Farrwell, Benjamin, senator, b. in Painted Post, N. Y., 1 July, 1828. He was educated at Elmira academy, removed to Illinois in 1838, and was employed in government surveying and farming until 1844, when he engaged in the real estate business and banking in Chicago. He was elected county clerk in 1852, and subsequently held this office in 1857. Subsequently he engaged in mercantile pursuits, and became a member of the firm of John V. Farrwell and Company. He was a member of the state board of equalization in 1857, chairman of the board of supervisors in 1859, and in 1862 was elected a presidential elector. He was a member of the constitutional convention in 1861, and in 1871 he was elected to congress as a Republican, and served on the committee on banking and currency, and as chairman of that on manufactures. He was re-elected in 1873, and was again re-elected in 1875, and in 1876 elected U. S. senator from Illinois.—His brother, John Villiers, merchant, b. in Meads Creek, Steuben co., N. Y., 29 July, 1825, was graduated at Mount Morris seminary, Ill., in 1844. In 1860 he was a presidential elector for the Republican ticket, and he held the office of Indian commissioner during President Grant’s first term, and travelled 10,000 miles in this service. In connection with his brother, he is now (1887) building the state house of Texas for 3,000,000 acres of land.

Farrwell, Nathan Allen, senator, b. in Unity, Me., 24 Feb., 1812. He received a public-school education, graduating in 1831, studied law, was admitted to the bar, and began to practise in Rockland, Me. He was a member of the state senate in 1853, 1854, 1861, and 1862, serving as a presidential elector in 1860, and of the lower branch of the legislature in 1860, 1863, and 1864. He was a delegate to the Baltimore National Republican convention in 1864, and in that year was appointed to the U. S. senate as a Republican for the unexpired term of William Pitt Fessenden. He was a delegate to the Democratic national conclave of 1866. He travelled in Europe from 1845 till 1847. He has been master mariner, trader, and twenty-five years president of marine insurance.

Farrwell, Samuel, contractor, b. about 1800; d. in Seginaw, Mich., 17 Nov., 1875. He was a contractor for the United States for fifty years as a contractor for the building of public works. He began
work on the Erie canal in 1835, completed contracts for the slack-water navigation in Lehigh river in 1835, the Croton aqueduct in 1838, and afterward constructed the Boston water-works. Subsequently he engaged in railroad work and executed extensive contracts for the New York and Erie railroad, the Great Western railway of Canada, the Utica and Black river railroad, and the Flint and Pere Marquette railway, of which last he was vice-president and principal stock-holder. He also built the Brooklyn water-works.

FASNACHT, Charles H., soldier, b. in Lancaster county, Pa., 27 March, 1842. He enlisted in 1861 in the 99th Pennsylvania regiment, and mustered out of service in July, 1865, as 1st lieutenant. On 12 May, 1864, just after the taking of the salient at Spottsylvania, he captured the flag of the 2d Louisiana regiment, taking the color-bearer and color-guard prisoners, but was shortly afterward wounded, and fell into the enemy's hands. With over one hundred others he lay on the battle-field several days, waiting to be taken to Richmond, and was finally rescued by National troops. During this time he had the flag concealed in the lining of his blouse. For his gallantry he received the United States medal of honor, a silver medal from the directors of the sanitary fair at Philadelphia, and a special commission at Paris.

FASQUELLE, Jean Louis, educator, b. in France in 1809; d. in Michigan in 1862. He came to the United States in 1834, and became a teacher of languages. From 1846 till his death he filled the professorship of modern languages and literature in the University of Michigan, and was also librarian for two years. In 1854 he published in New York "French Course, or a New Method for Learning to Read, Write, and Speak the French Language," which was extensively used in the United States, and of which 80,000 copies were sold in England. He also published, besides other textbooks, "Télémaque, with Notes and Grammatical References," a "Colloquial French Reader," and a "General and Idiomatic Dictionary of the French and English Languages." He married Zelma Addie (Stronko), artist, b. in Oswego, Cayuga co., N. Y., 9 Nov., 1831. She studied water-color painting in New York city, and then spent two years in Paris and Rome, painting in oil under Matteau and other artists. She returned to the United States about 1855, established herself as a portrait painter in Chicago, III., and in 1875 became a resident of Washington, D. C. She has executed portraits of Vice-President Henry Wilson, Justices Miller and Field, Chief-Justice Waite, President Garfield, John A. Logan, Clara Barton, and others, and in 1877-78 painted "The Electoral Commission in Open Session," containing portraits of about 200 persons. She became a member of the Chicago academy of design in 1873.

FAUCHER DE SAINT MAURICE, Narcisse Henri Edourd, Canadian author, b. in Quebec, 18 April, 1844. His father was seigneur of Beumermont, Vincennes, and Mont-a-peine. He was educated at the seminary of Quebec and at the college of Ste.-Anne de la Pocatiere. He went to Mexico in 1864, and became a captain in the 4th Mexican shad, and immediately wrote a number of poems, and Gen. the Viscount Courtis Rousell d'Hurbal. He served through the war, being in eleven battles, thirty-two minor engagements, and at the siege of Oaxaca and Satillo, at the latter of which he was made prisoner and sentenced to be shot, but was afterward exchanged. He returned to Canada in 1866, and was for the next fourteen years a clerk of the legislative council of the province of Quebec. In 1881 he was elected a representative for Bellechasse to the Quebec legislative assembly. He was a commissioner in 1881 from the province of Quebec at the International exposition of geography in Venice, and while in Europe was created a chevalier of the legion of honor for exceptional services rendered to France in the Canadian press. He also had been created a knight of the Imperial order of Guadaloupe by Maximilian, and received the medal of the Mexican campaign from Napoleon III. He became editor of "Le journal de Quebec" in 1883, retaining his connection with it for a year and a half, and is now (1887) editor of "Le Canadien." He has contributed largely to the newspaper press in France, Canada, and the United States. He is a member of various societies, and is the author of "De Quebec a Mexico:" "La Brunante:" "Chasses et autres:" "De Tribord a Babord:" "Promenades dans le Golf St. Laurent:" "Procédures parlementaires:" "Cours de tactique:" "Relations de ce qui c'est passe aux fouilles faites lors de la demoliion des casernes des Jeoutes, a Quebec:" "A la Veillee:" "Deaux ans au Mexique:" and "L'abbé Laverdiere."}

FAUCHET, Jean Antoine Joseph, Baron, diplomatist, b. in St. Quentin, France, in 1793. He was a lawyer and resident at Paris when the revolution began, and published a pamphlet in defense of its principles. He was appointed secretary of the executive council, and was ambassador to the United States in 1874-8. He produced a work on the United States and its relations with France (translation by W. Duane, Philadelphia, 1797). The directory nominated him a commissioner to Santo Domingo, but he declined. Under Bonaparte he was prefect of the Var, and in 1805 of the Arno, and was made a baron. On Napoleon's retreat he was made prefect of the Vosges.

FAULKNER, Charles James, lawyer, b. in Martinsburg, Va., in 1806; d. in Boydville, W. Va., 1 Nov., 1884. He was graduated at Georgetown university, D. C., studied law, and was admitted to the bar in 1829. Three years later he became a member of the Virginia house of delegates, where he introduced a measure for the gradual abolition of slavery in Virginia, on which he maintained that all children born of slave parents after 1 July, 1840, should be free, but the proposition was defeated. Mr. Faulkner after this devoted himself with success to his profession. He served as a commissioner on the disputed boundary-line between Virginia and Maryland. He was elected a state senator in 1841, but resigned in the following year. In 1848 he was elected to the house of delegates, and introduced a bill that was passed which became the famous fugitive-slave law of 1850. He was a member of the convention for the revision of the State constitution in 1850. The next year he was elected to the U. S. house of representatives, and was re-elected by the Democratic vote for four successive terms, serving from 1 Dec., 1851, to 3 March, 1855. When James Buchanan became president in 1857,
he offered Mr. Faulkner the mission to France, which he at first declined, but accepted in 1858. Louis Napoleon was encouraged by him to sympathize with the south in the approaching contest, rather than with the nation, and accordingly President Lincoln recalled Mr. Faulkner, who, on his return to the United States, was arrested and confined in the presidential prison. When released in exchange for Alfred Ely, a member of Congress who was imprisoned in Richmond, he joined the Confederate army, and served on the staff of Gen. Stonewall Jackson until the death of that officer. For some years he was detained under the rights of citizenship on account of having borne arms against the government, but in 1872 his political disabilities were removed. He was a member of the State constitutional convention of West Virginia in 1872, and in 1874 was elected to the U. S. house of representatives for the term that expired on 3 March, 1877. He was an unsuccessful candidate subsequently for the U. S. senate and for the governorship of West Virginia, after which he retired to private life.—His son, Charles James, senator, b. in Martinsburg, W. Va., about 1840, was graduated at the University of Virginia in 1860, and was a private in the Confederate army during the civil war, and after its close studied law, and rose rapidly in the profession. In 1880 he was appointed a circuit judge, to fill an unexpired term, and in 1882 was elected to the same office. On 5 May, 1887, he was elected a Democrat to the U. S. senate from West Virginia.

FAUNCE, Daniel Worcester, clergyman, b. in Plymouth, Mass., 3 Jan., 1820. He is a direct descendent of Thomas Faunce, who was for forty years ruling elder of the 1st church at Plymouth. His father, Daniel Jr., was educated at Harvard, and received his theological education at Newton theological institution. He was ordained as pastor of the Baptist church in Somerville, Mass., in 1853, and has been pastor in Worcester, Malden, and Lynn, Mass., and also in Concord, N. H., and Washington, D. C., in Hasbrouck, N. Y., in Europe, Egypt, and Palestine. The degree of D. D. was conferred upon him by Amherst in 1880. Dr. Faunce is the author of "The Christian in the World," an essay that received the Fletcher prize offered by Dartmouth college; "A Young Man's Difficulties with his wife;" "The Christian "s;" and "The Resurrection in Nature and in Revelation."

FAULTEROY, Thomas Turner, soldier, b. in Richmond county, Va., 6 Oct., 1796; d. in Leesburg, Va., 12 Sept., 1883. He was commissioned a lieutenant in the war of 1812-15 when but seventeen years old. He studied law in Winchester, practised in Warrenton, and in 1823 was elected to the legislature. In 1836 he was commissioned a major of dragoons in the regular army, and served in the Seminole war. In September, 1843, he was detached from Gen. Taylor's army to hold in check the Indians on the frontier of Texas. From this duty he was ordered to join Gen. Taylor, and subsequently, in Mexico, he commanded the cavalry of Gen. Scott's army. In 1849 he was promoted to the lieutenant-colonelcy of the 1st dragoons, and in 1850 was appointed a colonel. In the winter of 1854-5 he conducted a campaign against the hostile Indian tribes of the Rocky mountains, and in 1858 he made another midwinter campaign against the Indians in New Mexico. In May, 1861, he entered the United States service. He was commissioned a brigadier-general by the convention of Virginia, and placed in command of Richmond and its defenses. But, after the organization of the Confederate government, it refused to confirm his commission, although he ranked all the officers above him that had resigned from the U. S. army to serve the Confederacy. —His son, Archibald Magill, physician, b. in Warrenton, Va., 8 July, 1857; d. in Staunton, Va., 19 June, 1886, was graduated in medicine at the University of Pennsylvania in 1882, and in 1886 entered the U. S. army as assistant surgeon; but he and his brother, a lieutenant in the navy, resigned at the same time with their father. He became a surgeon in the Confederate army, and was president of the board for the admission of surgeons, and chief officer on the medical staff of Gen. Joseph E. Johnston, and served with him until the battle of Seven Pines. He was then ordered to build and organize the hospitals at Danville, Va., and afterward had charge of the military hospital at Staunton, Va., until the war ended. He remained and practiced in Staunton after the war, and was for several years superintendent of the lunatic asylum at that place. His contributions to medical literature include papers on bromide of potassium, chloral hydrate, the use of chloroform in obstetrical practice, and a Report upontractive in The Confederate States of America. Transactions of the Virginia medical society. —Another son, Thomas T., became judge of the Virginia supreme court of appeals.—Their sister, Mary Thurston, married Surgeon-General Barnes, of the U. S. army.

FAQUIER, Francis, colonial governor of Virginia, b. about 1720; d. in Virginia, 3 March, 1768. He was a man of a cultivated mind and liberal religious views, who counted Thomas Jefferson among his friends, and was greatly respected by his contemporaries. He was a speaker in the Virginia House of Burgesses, and in 1763, after the adoption of the Virginia Charter, and the passage of a bill for the privatization of the colony, he refused to support the new elected house of burgesses in order that it might appoint delegates. Except in combating disloyalty, he sympathized with the colonists, and was one of the ablest and most popular of the royal governors. He published several financial essays, among them one on "Raising Money for Support of the War" (London, 1757).

FAVILLE, Oran, educator, b. in Manheim, Herkimer co., N. Y., 13 Oct., 1817; d. in Waverly, Iowa, 3 Oct., 1872. He was graduated at Wesleyan university, Middletown, Conn., in 1844, and after teaching in Cazenovia, N. Y., and West Poultney, Vt., became, in 1852, professor of ancient languages in McKendree college, Lebanon, Ill. He was president of Ohio Wesleyan female college, Delaware, Ohio, in 1858-5, but retired to a farm in Mitchell county, Iowa, on account of his health, and was subsequently county judge, lieutenant-governor of Iowa, and president, and afterward secretary of the State board of education. In 1868 he was one of the board of visitors to the U. S. military and frontier school at Fauquier, Va., and in 1866-7, was state superintendent of public instruction in 1884-6, and also present of the State teachers' association. He resigned these offices on account of failing health, and lived in retirement from 1867 until his death.

FAWCETT, Edgar, army of the United States, city, 26 May, 1847. He was graduated at Columbia in 1867, and has since devoted himself to literature. His books include "Short Poems for
FAXON

FEARING

Short People" (New York, 1871); "Purple and Fine Linen," a novel (1873); "Ellen Story" (1876); "Poems of Fantasy and Passion" (Boston, 1878); "A Gentleman of Leisure" (1882); "An Ambitious Woman" (1888); "Song and Story," poems, "Twinkling Cymbals," a tale, and "The Adventures of a Widow" (1884); "Rutherford" (1884); "The Bunting Ball," an anonymous satire in verse, and "The New King Arthur," an opera. New York, 1884-5; "Social Silhouettes" (Boston, 1885); "Romance and Revery" (1886); and "The House at High Bridge" (1887). He has also written successful plays, including "A False Friend" (1886).

FAXON, Henry W., journalist, b. in Buffalo, N. Y., about 1830; d. in Washington, D. C., 11 Sept., 1884. He entered the navy as an apprentice, but left it after two or three years, and after serving as a telegraph clerk in Troy, N. Y., and then as clerk in a candle-factory, became an editor of the Buffalo "Republican" in 1853. He was afterward on the staff of the Buffalo "Times," and in 1861 became an army correspondent for New York papers. Among his most noted efforts were the "Silver Lake Snake Story" and the "A. P. L. Parin Papers." The snake story, which was the original of the sea-serpent tales that have since become popular, was published in the Buffalo "Republican," and professed to be a description of a monster seen in Silver Lake, Wyoming co., N. Y.

FAY, Francis Ball, merchant, b. in Southborough, Mass., 12 June, 1793; d. in South Lancaster, Mass., 6 Oct., 1857. His parents were poor, and he had little education. At the age of eighteen he "bought his time" of his father for $80 a year. He attended the public schools in Dock-square, Boston, in 1811-12, then served as market-man and butcher, and in 1817 became a merchant in Southborough. He was town treasurer there in 1817-21, deputy sheriff of Worcester county in 1824-30, a member of the legislature in 1839-1840, and of the state senate in 1843-5 and 1846. He removed to Chelsea in 1851, built one of the first houses there, bought the first ferry boat, and was running the ferry from that place, and was first president of the Chelsea savings bank. He was elected to congress as a Whig, to fill a vacancy, serving in 1852-3, and in 1857 was first mayor of Chelsea, but declined a re-election. In 1856-24 he was an active member of the state militia, ranking the rank of colonel. He endowed the Fay free library at Southborough in 1851, was one of the founders of the State industrial school for girls, and was connected with it as commissioner, trustee, and treasurer in 1854-64. In 1858 he removed to South Lancaster, that he might be near the institution.

FAY, Jonas, patriot, b. in Hardwick, Mass., 17 Jan., 1737; d. in Bennington, Vt., 6 March, 1818. He received a good education, and became a physician. He was clerk of a Massachusetts company at Fort Edwards in 1756, removed to Bennington in 1766, and became prominent among the settlers on the New Hampshire grants, going as their agent to New York in 1772, to lay their grievances before Gov. Tryon. He was clerk of the convention of March, 1774, that resolved to defend freedom, and the ordinance was afterward lawed by the legislature of New York. Dr. Fay was surgeon under Allen at Ticonderoga, and afterward in Col. Warner's regiment. He was a member of the convention of January, 1777, which declared Vermont an independent state, and drew up the Declaration and petition to Congress announcing the act and the reasons for it. He was secretary of the Constitutional convention of July, 1777, one of the council of safety, a member of the state council in 1778-85, judge of the supreme court in 1782, and of probate in 1783-7, and agent of the state to congresses in January, 1777, October, 1779, June, 1781, and February, 1782. He published, in connection with Ethan Allen, a pamphlet on the New Hampshire and New York controversy (Hartford, Conn., 1780).—His son, Heman Allen, b. in Bennington, Vt., in 1778; d. there, 20 Aug., 1865, was a cadet in the U. S. military academy from March, 1807, till June, 1808, when he was graduated and assigned to the artillery. During the war of 1812 he did garrison duty at various forts, and was mustered out on 15 June, 1815. He was chief forage-master of the northern division of the army in 1816-17, and U. S. military store-keeper at Albany, N. Y., from 1818 till 1842. He published an "Official Account of Battles Fought between the Army and Navy of the United States and Great Britain in 1812-15" (1816).

FAY, Theodore Sedwick, author, b. in New York city, 10 Feb., 1807. He received a liberal education, and studied law, but never practised. In 1828 he became associate editor of the New York "Mirror," under the joint control of himself, George P. Morris, and Nathaniel P. Willis. Soon thereafter Fay was in Europe, and wrote an extended series of letters of travel, which were published in his paper. He continued as co-editor of the "Mirror" for several years, and eventually became secretary of the American legation in Berlin, Germany, remaining at that post from 1837 until 1853. From 1853 until 1860 he was minister-resident in Bern, Switzerland, since which time he has lived in retirement in Berlin. His publications comprise "Dreams and Reveries of a Quiet Man" (New York, 1833); "The Mineral Book" (1838); "Norman Leslie" (1835); "Sydney Clifton" (1839); "Countess Ida" (1840); "Hoboken, a Romance" (1843); "Robert Rufeuf" (Philadelphia, 1844); "Ulric, or the Voices," poems (New York, 1851); "Views of Christianity" (1859); "History of Switzerland" (1860); "Great Outlines of Geography" (1867); and "First Steps in Geography" (1873). He has also published a series of papers on Shakespeare. His "Norman Leslie," a story of old New York city, has been popular, and was successfully produced as a play.

FEARING, Albert, philanthropist, b. in Hingham, Mass., 13 March, 1798; d. there, 24 May, 1875. After attending the public school of his native town he became a clerk in Worcester, Mass., and was afterward a ship-chandler in Boston. He retired from this business in 1868, and engaged in manufacturing, accumulating a large fortune, from which he gave liberally. His donations amounted to about $300,000, including $30,000 to the Hingham public library, and an equal sum to the college of Liberia. He was president of the American colonization society and of several charitable organizations, and was
also noted for his many private acts of charity. He was elected to the state senate in 1841, and for many years took an active part in politics, first as a conservative Whig and afterward as a Democrat. He was an earnest supporter of Harrison in 1840, and received a service of plate from his friends for his efforts in the canvass, and was a presidential elector for the Whig candidates of the western country. In his reports, which were printed by order of congress, he is called "United States geologist." The government authorized these examinations to be made only in the territories of the United States; but Featherstonhaugh took notes upon all the country passed over in his journeys, for use when congress should authorize a geographical map of the United States. Such a map is now projected (1887), fifty years after Featherstonhaugh's surveys. On account of his thorough knowledge of the country, he was appointed by the British government a commissioner to settle the northern boundary of the United States, under the Ashburton treaty, and for the successful execution of this task was made British consul for the departments of California and Seine, France. His writings on geological subjects are clear and vigorous, and his geological memoirs merited the approval of his friends Buckland and Murchison. His publications include a translation of Cicero's "Republic" (New York, 1859); "Geological Report of the Elevated Country between the Missouri and Red Rivers" (Washington, D.C., 1859); "Geological Reconnaissance in 1835 from Green Bay to Côteau de Prairie" (1836); "Observations on the Ashburton Treaty" (London, 1842); "Excursion through the Slave States" (New York, 1844); and "Canoe Voyage up the Minniy Sotor" (2 vols., London, 1847).

FEARON, Henry Bradshaw, English traveler, b. in London about 1770. He was a London surgeon, and was sent by thirty-nine English families to the United States in 1817 to ascertain what part of this country, if any, would be suitable for their residence. He gave an account of his experiences in "Narrative of a Journey of 5,000 Miles through the Eastern and Western States of America" (London, 1818). Sydney Smith, in a review of this book, said that its author was "a lover of America," and that the work was "very interesting in its views of persons and places." Fenton also published a work on "Cancers" (London, 1784).

FEATHERSTON, Winfield Scott, soldier, b. in Rutherford county, Tenn., 8 Aug., 1821. He was educated at various academies, and in 1838, while at school in Georgia, served for three months as a volunteer against the Creek Indians. He then studied law, and was admitted to the bar in 1840. He was afterward elected to congress as a Democrat, and served in 1847-51, but was defeated for a third term by the Union candidate. He was a presidential elector on the Democratic ticket in 1852, and was sent by his state to Kentucky in December, 1860, to confer with the authorities on the subject of secession. In May, 1861, he became colonel of the 17th Mississippi regiment. He served in Virginia in 1861-2, and on 4 March of the latter year he was brevetted brigadier-general for gallantry at Ball's Bluff. He was wounded on the fifth day of the battles around Richmond, and in January, 1863, was transferred to Vicksburg at his own request. He commanded an expedition sent to meet Porter's gun-boats, ascending Deer Creek, joined Johnston at Chattooga, and continued with that army till the surrender in 1865, commanding a division much of the time. After the war he returned to the practice of law, and was a member of the Mississippi legislature in 1876-8 and 1880-2. In 1881 he became judge of the 2d judicial circuit of the state.
Pittsburg, Pa., 14 Feb., 1821, entered the navy from Ohio as a midshipman, 14 Sept., 1888, and was in the "Concord," of the Brazil squadron, when she was wrecked on the eastern coast of Africa in 1848. He became passed midshipman, 20 May, 1844, and lieutenant, 30 April, 1855. He was on the "Germantown," of the East India squadron, in 1858-60, and on the sloop "Savannah" in 1861, and on 11 Aug., 1862, was commissioned commander, and assigned to the steamer "Kanawha," of the Western gulf blockade squadron. After commanding various vessels in that and the Mississippi squadron, he was given the "Mattabeset," of the North Atlantic squadron, in 1864, and in that steamer took part, on 5 May, 1864, in the fight between the little fleet of wooden vessels, under Capt. Melancon Smith, and the Confederate ram "Albemarle," in Albemarle sound, N.C. In this engagement the ram was defeated, and her tender, the "Bombehorn," captured, and Feibiger was commended for his "gallantry and skill," by Capt. Smith and Rear-Admiral Samuel P. Lee. He commanded the "Ashuelot," of the Asiatic squadron, in 1866-8, and on 6 May of the latter year was promoted to captain. He was inspector of naval reserve lands in 1869-72, was made commodore, 9 Aug., 1874, was a member of the board of examiners in 1874-6, and commodant of the Washington navy-yard, 1876-7. He was promoted to rear-admiral, 4 Feb., 1882, and on 1 July, 1882, was retired on his own application, having been in the service for forty years.

FECHTER, Charles Albert, actor, b. in London, England, 23 Oct. 1824; d. near Quakertown, Pa., 5 Aug. 1878. His father was of German parentage, but born in France. His mother was an Englishwoman. Charles was taken to France at an early age and there educated. He gave himself for a time to the study and practice of the sculptor's art, but had a natural inclination for the stage, and made his début at the Théâtre des Bouffes-Parisiens in 1840 in a piece called "Le Mari de la Veuve." After a tour of the principal cities and visiting Italy, he went in 1844 to Berlin, where he had great success as Duval in "La dame aux Camelias." After performing in London in French, he appeared in an English version of "Ruy Blas" at the Princess theatre, 27 Oct., 1860. In the following year, 20 March, at the same house, he astonished and perplexed London playgoers by his marvellous impersonation of Hamlet in English. It was not the Hamlet to which they had been accustomed, but was nevertheless a grand conception well carried out. In the following October he appeared as Othello, producing a similar effect. He became lessee of the Lyceum in January, 1863, and brought out in succession "The Duke's Motto," "Bell Demonio," and "The Long Strike." Claude Melnotte, in the "Lady of Lyons," became one of his favorite characters. He came to the United States at the close of 1869, and appeared at Niklo's in the character of Hamlet. A few nights before he had seen Edwin Booth in the same character, and had been singularly demonstrative in his approval. His own impersonation of the character was very different, but it was well received. The critics were enthusiastic, and the critics sought for merits rather than faults. After a tour through the states he returned to Europe. He again visited the United States in 1872, having determined to make this country his home, and appeared he commanded large audiences and almost fabulous prices; but his American career was not a success in the full sense of the word. As a manager in Boston he failed. As a place of retreat, when not on starring engagements, he purchased a farm in the village of Richmond, Bucks co., three miles from Quakertown, Pa., and in the company of Lizzie Price, whom he had married, he there spent most of his time. He became very corpulent, which unfitted him for some of his favorite characters. He contracted an incurable malady, and, after consulting one suffering died on his farm. As an actor he despised all stage conventionalities, but was sympathetic and realistic. If he had had more restraining, more self-governing power, he would have been greater as an actor and as a man.

FEDERMANN, Nicholas, traveller, b. in Ulm, Swabia, in 1819; d. in Rome, 1878. He early started on a military career, and was engaged in the service of the Welser, wealthy merchants of Augsburg, to whom Charles V. had granted the province of Venezuela in payment of the sums they had lent him. They were to conquer the country at their own expense, equip the troops, fit out four vessels, build two cities and three forts within two years after they took possession, and send out 150 German miners. Federmann was appointed captain of one of the companies of the Spanish soldiers and accompanied the miners, embarked at San Lucar de Barrameda, 2 Oct., 1529. His ship was driven on one of the Canary Islands, and afterward attacked by pirates, who made him prisoner; but after paying a heavy ransom was released again, set sail, and reached Santo Domingo. In 1536 he was in Spain, where he was left in order to accclimate the troops, and received the title of captain-general lieutenant. Having many soldiers for whom he could find no employment, he determined to make a journey into the interior or along the southern coast. "My preparations being complete," he says, "on the 12th of September I set out with a hundred men on foot and sixteen on horseback, accompanied by a hundred Indians, who carried our provisions and all that was necessary for our subsistence or defence." It is difficult to determine the point at which Federmann and his companions reached, or to identify the tribes through which they passed. It is conjectured that they travelled southwesterly as far as the lesser chains of the Andes, a distance of 500 miles. In some cases the Indians defended themselves fiercely. Federmann lost several of his men, and was severely wounded. These checks were cruelly avenged on the unfortunate Indians. The Spaniards then turned toward the coast, following it to Coro, which they reached on 17 March, 1531. Here Federmann was detained by a fever until 9 Dec., when he sailed for Santo Domingo and thence to Spain. He reached Seville on 16 Jan., 1532. After an audience with the emperor he returned to Augsburg, where he wrote a narrative of his travels. Alexander Dallinger, captain-general of Venezuela, under whom he had served, having died, Federmann...
mann at once sought the emperor and asked for the vacant post. This appointment he received, but soon after it was revoked at the request of the Wexford and the landing was attempted by the Rev. Mr. De Spire. He determined, however, to return to Venezuela, and, accepting the office of lieutenant under the governor, he reached Coro 22 Dec., 1534, with Spire and 160 soldiers. They were first to attempt discovery in Venezuela. In 1532, three ships, who were divided into two bodies under the respective commands of the two German officers, were to meet in the neighborhood of Barquisimeto. While Georges de Spire went eastward, Federmann journeyed to the west, with his mind well made up never to rejoin his associate, but to go on a voyage of discovery on his responsibility. Keeping always to the west, and in a continual struggle with the Indians, he overcame prodigious obstacles on his route, which are well depicted in the pages of the Spanish historians, Piedrahita and Castellanos. Finally he arrived in New Guacanada, and had the good fortune to reach the plateau of Bogotá at the very time that Quesa de and Sebastian de Benaleszar appeared there at the head of their troops. One had got there by following the course of the Magdalena river, the other had come through the convent of San Francisco, and many others as a result of fighting one to the three chiefs, and heated discussions followed as to which of the three conquerors this rich province should belong. It was finally decided to take the question to Spain to be decided by Charles V. Federmann left with regret a region rich in precious metals and advanced in civilization as Mexico or Peru, to present himself at the court of Charles V., 1538. He now received the reward of his insubordination; the Wessers, indignant at his treatment of Georges de Spire, threatened his life. A lawsuit followed, which, however, was induced to discontinue. The bold captain could not face his misfortunes, which he considered the result of sheer injustice, and the courageous spirit, which had dared without flinching all the dangers of the New World, was subdued by grief and mortification in his wanderings, which he left with his brother-in-law, John Kielpaher, a burgess of Ulm, when he set out on his last trip, was published in German. The title, translated, is "Pine and agreeable narrative of the first voyage of Nicholas Federmann, the younger, of the House of Balthasar, of all the misfortunes which happened to him in this country up to his return to Spain, written with brevity, and diverting to read" (Haguenau, 1557). This book gives curious details concerning the Indians, their manners, and the means adopted to subdue them. The author expresses himself with a simplicity that wins confidence. A French translation was inserted in the collection, entitled "Voyages, relations et mémoires originaux pour servir à l'histoire de la découverte de l'Amérique, publiés pour la première fois en français" (Paris, 1857). The account of Federmann, rich in precious metals, is lost, but a summary of it, with his portrait, may be found in the works of Castellanos and Predahita.

FEETHAN, Patrick A., R. C., archbishop, b. in Tipperary, Ireland, in 1829. He was educated at Marymount college, Kildare, and in the United States in 1832. He selected St. Louis as the scene of his missionary labors, and was appointed president of the Seminary of Carondelet. He acquired great reputation as pastor of the Church of the Immaculate Conception in St. Louis, and also of St. John's, in Nashville, Tenn. The Roman Catholic church made much progress in this state during his administration, and in 1879 the number of churches and priests had nearly trebled. He had founded a college controlled by the Christian Brothers at Carondelet. He was the refuge of Sisters of the Good Shepherd, and two orphan asylums. He also introduced into his diocese the Sisters of Mercy, the Dominican Sisters, the Sisters of Charity, and the Sisters of St. Joseph, all of whom he placed in charge of academies and parochial schools. In 1880, Chicago was created into an archiepiscopal see, with two suffragan bishops, and Dr. Feethan was consecrated its first archbishop. During his administration he has created nine new parishes in Chicago alone, and has, in a sense, founded St. Mary's training-school. He was at the plenary council of Baltimore in 1884.

FEGAN, James, soldier, b. in Athlone, Ireland, in 1827; d. in Fort Shaw, Montana, 25 June, 1886. He served in the constabulary in his native country, but came to the United States in early life, and enlisted as a private in the 2d U. S. Infantry, 29 Oct., 1851. He re-enlisted eight times, entering the service again as soon as his term expired, and was finally retired on 8 May, 1885. He was sent to the soldiers' home in Washington in 1870, but obtained a discharge and returned to active service. Fegan was a well-known character in his regiment, noted for his wit and dry humor. He served with credit in the civil war, and was wounded at Antietam. In March, 1868, at Plum Creek, Kansas, he stood guard single-handed over a deserter he had captured and a powder-train, defended both against a crowd of men who wished to recapture the deserter, and brought his charge safe to camp. For his gallantry he was given the U. S. Medal of Honor. On 6 Dec., 1882, Fegan was made the subject of a special presidential message to congress.

FEIJO, b. in S. Paulo, 10 Aug., 1784; d. there, 10 Nov., 1843. He received his early education in a clerical college in his native city. In 1807 he was ordained priest, and soon afterward began to teach in Parahyba. In 1830 the constitutional revolution triumphed in Portugal, and Feijo was chosen as a representative from the province of S. Paulo to the Portuguese assembly, to which he was admitted, 11 Feb., 1822. On 25 April he made an eloquent speech in defense of Brazilian rights, which were threatened by the Portuguese majority. The Brazilian Congress, however, supported Feijo and Feiijo, with five others, left Lisbon secretly for Falmouth, where, on 22 Oct. of the same year, they published a manifesto explaining their conduct. Feijo afterward returned to Brazil, and retired to Itu. In 1824 Dom Pedro I. submitted to the municipalities of the empire his project of a constitution, which was almost unanimously accepted, except at Itu, where Feijo proposed to amend it. The province of S. Paulo elected him successively to the legislatures of 1836-9 and 1840-7. In 1827 he proposed the abolition of clerical celibacy, and in 1828 submitted a project for the reform of municipalities. In 1831 Feijo was appointed by the regency minister of justice, and in this capacity dissolved undisenrolled military bodies, checked on 7 Oct. of that year the revolution in the north, and led on 10 Oct. a body of military police, and in 1832 suppressed another revolt. In 1833 he was appointed life senator, and in 1834 the electors of the empire made him regent of Brazil. On the previous day he had been appointed bishop of Maranham, but he declined the invitation of Nashville, Tenn. As regent, he soon proclaimed a liberal and advanced programme, but his policy met
with such opposition from the conservatives that he resigned his office, 18 Sept., 1837. He then retired to S. Paulo, and did not appear in the senate again until the land-claims, under a political paper called "O Justiciero." In the same year a revolution broke out near Campinas, where Feijó was staying, and, although enfeebled by age and sickness, he took upon himself the responsibility of the movement, and, being defeated, was arrested, taken to French sailors, and paraded before the people. He was tried by the senate. He succeeded in explaining his conduct before that body, and this proved to be the last act of his political life, for he died soon afterward. Honors were paid to his memory by the government.

FEININGER, Karl William Frederick, musician, b. in Durlach, Baden, Germany, 31 July, 1844. He came to this country in 1853, was educated at St. Mary's college, Columbia, S. C., and afterward studied music in the conservatory at Leipzig, Germany. He led an orchestra in 1863, and 1864-65, served in the national army. He afterward taught music for seventeen years, and in 1874 travelled through Brazil, where he met with success as a violinist. Mr. Feininger has developed a new mode of teaching the piano, "based upon absolute rigidity of human character," and is the author of numerous orchestral compositions, including overtures, symphonies, and choruses with orchestral accompaniment, besides many English and German songs. He has also composed an unfinished opera, "Die Brüder." He produced his orchestral compositions with success in Berlin in 1886, those performed at his first concert, 7 Oct., including his "Academische" overture (1866); his "Narciss" overture (1868); a symphony (op. 12), which was highly praised by Franz Liszt (1870); and "Emotive Pictures" (1885).

FEKE, Robert, artist, b. in Oyster Bay, L. I., about 1725; d. in Barbadoes, West Indies, aged about forty-four. He left home when young, was taken prisoner and carried to Spain, where he passed his time in making rude paintings. With the proceeds of these he returned home, settled at Newport, and became a sort of gunmaker. He was one of the earliest American artists, his first pictures bearing the date 1746. Many of his portraits are in the Bowdoin college collection, and in that of the Rhode Island historical society, Providence. One of the best is that of Lady Wanton, in the Redwood library.

FELCH, Alpheus, jurist, b. in Limerick, York co., Me., 28 Sept., 1806. His grandfather, Abijah Felch, a soldier of the Revolution, had removed to that region while it was still a wilderness, and Alpheus, who was left an orphan at three years of age, was brought up in his house. Young Felch entered Phillips Exeter academy in 1821, was graduated at Bowdoin in 1827, and in 1838 was admitted to the bar at Bangor, Me. He removed to Monroe, Mich., in 1833, and in 1843 to Ann Arbor, where he has resided. He was in the legislature in 1839-'7 and in 1838-'9, as one of the state bank commissioners, did much to expose frauds, made possible by a general "wild-cat" banking-law, which he had opposed, and which was afterward declared unconstitutional by the state, that assisted in the organization of the republican party in the state for a few weeks in 1842, and judge of the state supreme court till 1846, when he resigned to enter upon the office of governor of the state, to which he had been elected, as a Democrat, in the previous year. He resigned this also in 1847, having been chosen to the U. S. senate, where he remained until 1853, serving for four years as chair

man of the committee on public lands. At the close of his term President Pierce appointed him on the commission to settle Spanish and Mexican land-claims, under a political paper called "O Justiciero." In the same year a revolution broke out near Campinas, where Feijó was staying, and, although enfeebled by age and sickness, he took upon himself the responsibility of the movement, and, being defeated, was arrested, taken to French sailors, and paraded before the people. He was tried by the senate. He succeeded in explaining his conduct before that body, and this proved to be the last act of his political life, for he died soon afterward. Honors were paid to his memory by the government.

FELPE, or FELIPIILLO (fa-le'-pe, or fa-le'-peel'-yo), Peruvian Indian, b. in Pueches, Peru, in 1509, or, according to the Inca's annals, in 1510; d. on an expedition to Chili in 1535. When Francisco Pizarro arrived at Tumbes in 1527, he asked the Indian chiefs, who received him well, for some boys to learn Spanish, so that they might serve him on his return as interpreters. He carried two boys to Spain, where they were baptized, and one of them, receiving the name of Felipe, returned with Pizarro in 1531, and was of great use in the conquest of Peru, saving the life of the conqueror and his followers at the beginning of the campaign by revealing to him a conspiracy of the natives of the island of Tumaco to cut off the Spaniards who were adrift and kill the invaders. After the fall of Cajamarca, 15 Nov., 1532, Pizarro sent Felipillo with Hernando de Soto to treat with the Inca Atahualpa. While on this mission he fell in love with one of the Inca's wives, and, thinking that the latter's death would give him possession of the Inca, he loved, he began to give the Spanish chiefs an incorrect translation of Atahualpa's words in the different interviews with Soto, in which he assisted as interpreter. He thus excited a suspicion that the Inca was collecting troops and making other secret preparations for the destruction of the invaders, and this was one of the causes of Atahualpa's execution, which was decided upon partly through covetousness, partly, as Gomaras says, in the belief that his death would save the lives of the Spaniards. Felipillo had even some big Inca Apus, enemies of Atahualpa, to confirm his caullumies about the Inca's hostile preparation. The historians Garcilaso de la Vega, Herrera, and Gomaras, speaking about Felipillo, are all of opinion that he was the only native that assisted in the general plot against the emperor. In 1538 Felipillo was assigned to the service of Almagro, and accompanied him in 1534 on his expedition against Pedro de Alvarado, who had invaded the province of Quito. He deserted Almagro, and gave Alvarado information about the inferior force of the former, proposing to serve as a guide in surprising his little army, but Alvarado, who is
supposed to have known that he was in territory already ceded to Pizarro, preferred to make an advantageous arrangement with Almagro, and caused him to be murdered and his school razed. In Cuzco, Felipillo incited the Inca Mancio against the Spaniards by underhand intrigues, and contributed thereby to the revolt of the Indians and the burning of the city in 1535. He also took part in the dissensions between Pizarro and Almagro, was taken prisoner and compelled to flee. In 1535, to the conquest of Chili, he carried Felipillo with him as interpreter, but a few days after passing the desert Felipillo fled. He was taken prisoner and strangled by Almagro's orders, who knew of his repeated treasons. The historian Gomara says that before his death Felipillo confessed that he had falsely accused Atahuallpa.

**FELIX, Louis, Baron, b. in St. Pierre, Martinique, 28 Dec., 1755; d. in Mexico, 1 July, 1836. He took orders when very young, and was almoner of the Count de Benezheim, lieutenant-governor of the Dominions, at the beginning of the revolution of 1789. He then gave up his orders and became clerk of the national convention until 1795, when he joined Hughes, a member of the assembly, in organizing the government of Guadeloupe, and during the revolution of 1791 he became the municipal town of the 18th Brumaire, and named him a member of the tribuna. Felix took an active part in the deliberations of this assembly until it was suppressed in 1803. He was then sent to Mexico as minister and French consul-general. He was afterward French minister at Washington, and kept the post until 1806, but remained consul-general in Mexico till the fall of Napoleon in 1814. He returned to France in 1815, and Prince Talleyrand, who esteemed him highly, sent him as minister to South America, where he remained four years. He was then consul-general and minister extraordinary to the United States from 1820 to 1822. He was a deputy from Guadeloupe to the National Assembly in 1829, and a deputy from Marsailles in 1832-33, and in 1835-36 minister to Mexico, where he died. His books relating to this continent are "Aperçu sur les États Unis" (Paris, 1814); "Aperçu sur le Mexique" (1815); "Rapport au ministre des affaires étrangeres sur la situation des Français dans le Mexique et l'Amérique du Sud" (1820); "Théorie des gouvernements," in which he compares the governments of Europe with those of the United States and South America, and declares in favor of the New World (1825).**

**FELTON, John, soldier, b. in Pomfret, Conn., in 1739; d. in Sheffield, Berkshire co., Mass., 1 Aug., 1808. He served in the French and Indian War, and was a member of the Massachusetts provincial congress in 1775, and soon after the battle of Lexington led a regiment of minute-men to Boston. He was made a brigadier-general, 25 June, 1776, commanding a brigade at the battles of Long Island, White Plains, and Bemis Heights, where he took an active part in the capture of Burgoyne. After the war he was sheriff of Berkshire county.**

**FELTON, John, author, b. in Sheffield, Mass., in 1760; d. in New York city, 8 Jan., 1844. He was graduated at Yale in 1783, and published "The Veil Removed: Reflections on Humphrey's Essay on the Life of Israel Putnam" (New York, 1843); "Exposition of the Mysteries or Religious Dogmas and Customs of the Ancient Egyptians, Pythagoreans, and Druids," and a work on the authority of the Old Testament, and a work on the authority of the Old Testament.**

**FELTON, Joseph Barlow, antiquarian, b. in Salem, Mass., 22 Dec., 1798; d. there, 8 Sept., 1869. He was graduated at Dartmouth in 1813, licensed to preach in 1815, and was pastor of Congregational churches at Sharon, Mass., in 1821-4, and in Hamilton, Mass., in French style. He was commissioned by Gov. Everett, in April, 1836, to arrange the ancient state papers, then in almost hopeless confusion, and in 1845 spent six weeks in England searching for duplicates of lost records. As a result of his labors, which were ended in 1846, the state archive was now contained in several scores of carefully classified volumes. After serving as librarian of the Massachusetts historical society in 1842-58, he retired to Salem, where he engaged in literary work. He was president of the New England historic-genealogical society in 1863-5, recorder of secretary of the American statistical association in 1839-59, and a member of many other historical societies. Dartmouth gave him the degree of LL.D. in 1857. Dr. Felton was noted for his thorough acquaintance with New England history. He published "Annals of America," called by Bancroft "a most accurate and useful work" (Salem, Mass., 1827; 2d ed., 2 vols., 1845-9); "History of Ipswich, Essex, and Hamilton," including numerous biographies (Cambridge, 1833); "Historical Account of Massachusetts Currency" (Boston, 1839); memoirs of Roger Conant (1848), Hugh Peters (1851), and William S. Shaw (1852); "Genealogical Items for Gloucester and Lynn" (1850-1); "The Customs of New England" (1853); "Ecclesiastical History of New England" (2 vols., Boston, 1855-9); and various addresses.**

**FELTON, Cornelius Condit, b. in West Newbury, Mass., 6 Nov., 1807; d. in Chester, Pa., 26 Feb., 1862. He was graduated at Harvard in 1827, having partially supported himself through his course by teaching in Concord and Boston, and at the Round-Hill school in Northampton, Mass. He was his senior, being elected as a teacher of the conductors of the "Harvard Register," a students' periodical. After teaching for two years in Genesee, N. Y., he was appointed Latin tutor at Harvard in 1829, became Greek tutor in 1830, college professor of Greek in 1832, and in 1854 was given the Eliot professorship in Greek literature. He had for many years regent of the college. In 1853-4 he was...**
visited Europe, studying the various collections of art and antiquities, and spent five months in Greece, where he devoted himself not only to the topography of the country and the remains of ancient art there, but to its present language and literature, to which he attached great importance. He was an enthusiastic defender of the "true" or "ancient" Greek, by whom he was known, during his stay among them, as the "American professor." He visited Europe a second time in 1858, and in 1860 was elected president of Harvard college, which office he held until his death. President Felton was a member of the Massachusetts board of education, and one of the regents of the University. He was an institution. His literary labors were extended, and he was one of the most profound and enthusiastic classical scholars in the country. Besides making large contributions to current literature, he published a translation of Menen's "German Literature" (8 vols., 1840, in George Ripley's "Specimens of Foreign Literature"); "Classical Studies," original and translated selections, in connection with Prof. Sears and Edwards (1843); a translation of Prof. Arnold Guyot's lectures on "The Earth and Man" (1849); a selection from the writings of Prof. Popkin, with a memoir (1852); "Life of William Eaton," in Sparks's "American Biographies" (New York, 1853); a revised edition of Smith's "History of Greece," with a continuation from the Roman conquest to the present time (1855); and "Selections from Modern Greek Writers" (1856). After his death appeared "Familiar Letters from Europe," giving an account of his last trip (Boston, 1864), and "Greece, Ancient and Modern," his most important work, composed chiefly of his lectures before the Lowell institute (2 vols.). Besides other works, he translated several Greek text-books, including an edition of Homer, with Flaxman's illustrations (1833), which passed through many editions.—His brother, Samuel Morse, civil engineer, b. in West Newbury, Mass., 17 July, 1800, was graduated at Harvard in 1834, studied civil engineering, became superintendent and engineer of the Fitchburg railroad in 1843, and left it in 1851 to become the president of the Philadelphia, Wilmington, and Baltimore road, where he remained until 1865. Mr. Felton planned and directed the secret passage of Mr. Lincoln from Harrisburg to Washington previous to his inauguration as president in 1861. He received information that a deep-laid plot existed to seize the capital with its archives and records, and then declare the southern conspirators to be the government de facto of the United States, and send all communication between Washington and other places was to be cut off, except a controlled line to the south; and the transportation of troops to defend the capital was to be prevented. He was also informed that, in case his road attempted to carry troops to the defense of Washington, the bridges were to be burned and the trains attacked by parties disguised as negroes. In case Mr. Lincoln was found, he was to be put out of the way. Mr. Felton organized and armed a force of trained men, who, while apparently watching the bridges, were in reality a guard that could be summoned instantly. He also established a secret police force. Mr. Felton avoided a special train from Philadelphia to Washington by delaying a regular train for the nominal purpose of forwarding an "importance" order. Mr. Lincoln was safely on the train the telegraph wires in all directions between Harrisburg, Philadelphia, and Washington were cut, and not united again until eight o'clock on the following morning. After they were joined the first message announced the safe arrival of "some time in Europe." The package was merely a bundle of old reports, carefully sealed and directed, and sent by special messenger, but its arrival meant the arrival of Mr. Lincoln at the capital. Mr. Felton also planned and organized the transportation of troops to Annapolis when communication by way of Baltimore was cut off in April, 1861. He was a commissioner of the Hoosac tunnel in 1863, was chosen president of the Pennsylvania steel company in 1865, which office he still holds, and a government commissioner of the Union and Central Pacific railroads in 1866. He was a member of the terminal board of finance in 1876, and director of the Northern Pacific railroad in 1870-'3, and of the Pennsylvania railroad in 1878-'9. He published "Philadelphia, Wilmington, and Baltimore Railroad Investigation into the alleged Misconduct of the Superintendent" (Philadelphia, 1854-'5).

—Another brother, John Brooks, lawyer, b. in Saugus, Mass., in 1827; d. in Oakland, Cal., 3 May, 1877, was graduated at Harvard in 1847, and remained there for two years as a tutor in Greek. Afterward he spent some time in Europe, and was graduated from the Harvard law-school in 1853. During the same year he settled in San Francisco. His knowledge of French and Spanish led to eminence at the bar, of which he remained a member till his death. He was successful both as an advocate and before the higher courts. The large fees that he received were notable even in California. His fee in one case was said in the newspapers of the time to amount to more than a million dollars. He served several times as presidential elector, and was mayor of Oakland, where he lived. He was the author of a work on the University of California, of which he was one of the founders. Mr. Felton possessed attractive social qualities and brilliant wit. In the city of San Francisco the news of his death was received with public demonstrations of sorrow, the places of amusement were closed, and the flags displayed at half-mast on the day of his funeral.

FENDALL, Josias, colonial governor of Maryland. He was ordered in 1655 by Gov. Stone to seize the public stores at Patuxent, but was made prisoner in the fight that ensued, and, having afterward raised another insurrection, was appointed governor, 10 July, 1656, as a reward for his faithful services to the proprietary government. He was superseded in December, 1660, for having turned against his patron, was tried in December, 1661, was convicted of treason, and sentenced to death, but, on his petitioning the governor and council, was pardoned and made to pay a moderate fine. For engaging in seditious practices he was afterward banished, and a fine of forty thousand pounds of tobacco was imposed on him in 1681.

FENDALL, William, the bridge builder. Was born at Alexandria, Va., in 1704; d. in Washington, D. C., 16 Feb., 1698. He was graduated at Princeton in
FENDLER, August, German botanist, b. near Königsberg in 1813; d. in the island of Trinidad, 27 Sept., 1889. He resided in the United States and in 1846 was employed in collecting botanical specimens in Texas and Mexico. He was the author of "The Mechanism of the Universe," a work of an erratic character, and "Meteorology of Colonia Tovar, Venezuela" (1857).

FENN, Henry, b. in Richmond, Surrey, England, 14 Sept., 1808. He was educated at Llesworth and Richmond, and at the age of eighteen came to the United States. He has achieved great success as an illustrator of books, was one of the founders of the American water-color society, and has been one of its exhibitors nearly every year since its organization. Some of his best work is contained in "Picturesque America," "Picturesque Europe," and "Picturesque Palestine." He has travelled extensively through the United States, Canada, Europe, Egypt, and Palestine on special missions.

FENWELL, James, actor, b. in London, England, in 1766; d. in Philadelphia, Pa., 14 June, 1816. He was well educated, and studied for the bar, but made his first appearance as an actor in 1787 at the Edinburgh theatre, under the assumed name of Othello. He soon married a lady of that name, and in 1790, 1791, and 1792 engaged in mercantile pursuits, and in a few years acquired a moderate fortune. Meanwhile he took active interest in politics, and in 1843 was elected supervisor of the town of Carroll, which office he held for eight years. In 1852 Mr. Fenton was elected to congress, and was active in the contest over the Kansas-Nebraska bill, being one of the four northern Democrats that voted against the further extension of slavery. This action resulted in his defeat in 1854, when he was nominated by the Whigs and Democrats against the Know-Nothing candidate. The Republicans of his district nominated Mr. Fenton for congress in 1856, and he was elected by a large majority, serving from 1857 till 1865, when he resigned, having been chosen governor of his state. He heartily supported the cause of the Union in the civil war, and stood firmly by President Lincoln and his cabinet in their war measures. He was inaugurated governor at the close of the year 1865, and was elected by an increased majority. In 1868 he was elected to succeed Edwin D. Morgan as U. S. senator, and served from 1869 to 1875. The only public trust held by him after leaving the senate was that of chairman of the U. S. commission at the International Dairy conference in Paris in 1878. Mr. Fenton actively promoted the interests of the

FENNO, William Augustus, actor, b. in Boston, Mass., 1 March, 1814; d. in New York city, 19 Feb., 1879. His early life was spent with his father's family near Boston, but, at the age of sixteen, a love of adventure led him to ship as a sailor on board a merchantman on a voyage round the world. After a four years' cruise, he studied for the stage, and made his first appearance at the age of seventeen at the Bowery theatre, New York, as Snake in the "School for Scandal." He appeared in Philadelphia, 5 Oct., 1848, at the Arch street theatre, as Romeo, visited California in 1850, and went to England in 1854. His provincial tours were numerous and extended.

FENOUILLET, Emile de (fo-noo-yai), Canadian author, b. in Hyères, in the department of Var, France, in 1806; d. in Quebec, 25 June, 1856. After pursuing a course of legal studies at Aix, he removed to Montpellier, and soon afterward to Paris, where he became a writer on the "Époque." Subsequently he accepted a professorship at Aix, and wrote letters that were published in "L'univers" of Paris. In October, 1854, he arrived in Quebec, and during the next two years was editor-in-chief of the "Journal de Québec." Soon afterward he was appointed professor of history and literature in the normal school of Acadia, and taught Latin and French in the academy, in his native county. He was admitted to the bar in 1841, and began practice in Jemstown, but, finding law uncongenial, he engaged in mercantile pursuits, and in a few years acquired a moderate fortune. Meanwhile he took active interest in politics, and in 1843 was elected supervisor of the town of Carroll, which office he held for eight years. In 1852 Mr. Fenton was elected to congress, and was active in the contest over the Kansas-Nebraska bill, being one of the four northern Democrats that voted against the further extension of slavery. This action resulted in his defeat in 1854, when he was nominated by the Whigs and Democrats against the Know-Nothing candidate. The Republicans of his district nominated Mr. Fenton for congress in 1856, and he was elected by a large majority, serving from 1857 till 1865, when he resigned, having been chosen governor of his state. He heartily supported the cause of the Union in the civil war, and stood firmly by President Lincoln and his cabinet in their war measures. He was inaugurated governor at the close of the year 1865, and was elected by an increased majority. In 1868 he was elected to succeed Edwin D. Morgan as U. S. senator, and served from 1869 to 1875. The only public trust held by him after leaving the senate was that of chairman of the U. S. commission at the International Dairy conference in Paris in 1878. Mr. Fenton actively promoted the interests of the
community in which he lived. He projected the
erection of a cathedral, built parochial schools, and
founded convents of the Sisters of Charity and of
the Dominican nuns. In 1831 he opened the
Athenaeum, afterward known as the College of St.
Francis Xavier. He next went to visit the Indian
tribes in the 30 counties of Gen. Grant's
funeral, when a memorial service was held in Wal-
ut Grove, his place of residence.

FENTON, William Matthew, lawyer, b. in
Norwich, Chenango co., N. Y., 19 Dec., 1806; d.
in a fire at his house in May, 1871. He was one of the
earliest emigrants to Genesee county, Mich., and,
after taking an active part in founding the village
that bears his name, he resided there and at Flint,
and engaged in the practice of law. In 1848 he
was elected lieutenant-governor of Michigan, and
re-elected in 1850 and 1851. At the beginning
of the civil war he became a member of the state
military board, and was one of the principal or-
ganizers of the 8th Michigan regiment, which he
commanded and which participated in so many
battles in various parts that it became known as the
"wandering regiment by the".

FENWICK, Cuthbert, b. in England; d. at
Fenwick Manor, Md., in 1655. He was one of the
Roman Catholics that accompanied Leonard Cal-
vert to Maryland in 1634. He found a good and
powerful friend in Capt. Thomas Cornewales, for
whose addresses and kindness his patron took part
in the engagement on the Chesapeake, between a
pinnace commanded by a partisan of Calvernon,
and two armed boats commanded by Cornewales
for the government. He sat in the assembly of
1644, and in several others. He was speaker of the
house of burgesses by the French revolutionists,
and was imprisoned and threatened with death, but,
on proof of his American citizenship, was released
and went to England, where he joined a convent
of his order. Being anxious to introduce the
Dominican order into the United States, he per-
suaded three members to accompany him on his
return home. They were well received by Bishop
Carroll, who suggested that they should devote
themselves to the evangelization of the vast unex-
plored regions in the west. In 1655, Father Fen-
wick traversed the entire valley of the Mississippi
on a tour of observation with the view of finding a
suitable centre for his missionary labors. He se-
lected a farm in Kentucky, paid for it out of his
private fortune, and in the spring of 1806 built on
it the Dominican convent of St. Rose of Lima,
which he made the headquarters of his mission in
Kentucky and Ohio. In order to devote himself to
the duties of his mission, he resigned the office
of provincial, which he held in his order, and lived
almost constantly on horseback, penetrating the
states of Ohio and Kentucky in every direction,
and thus laying the foundation of the Roman
Church in those counties. In 1819, after previously
found in Cincinnati in 1819, after previously
founding eight other churches, and in 1822 became
first bishop of that diocese. He went to Europe in
1825 for Pecuniary aid, and returned to Cincinnati
in 1826 with ample resources. He at once began the
founding of a cathedral, built parochial schools, and
founded convents of the Sisters of Charity and of
the Dominican nuns. In 1831 he opened the
Athenaeum, afterward known as the College of St.
Francis Xavier. He next went to visit the Indian
tribes in the 30 counties of Gen. Grant's
funeral, when a memorial service was held in Wal-
ut Grove, his place of residence.

first bishop of that diocese. He went to Europe in
1825 for Pecuniary aid, and returned to Cincinnati
in 1826 with ample resources. He at once began the
wife died at Saybrook, and her monument is still to be seen there near the fort. Fenwick was afterward a colonel in the parliamentary army, and was one of the judges of Charles I.

**FENWICK, John**, colonist, b. in England in 1610; d. in 1683. He obtained in 1673 a grant of land in the western part of New Jersey, and, emigrating there in 1674, founded a Quaker colony at Salem. His title to the proprietorship was disputed by Gov. Andros, who confined him in prison for two years. Soon after conveying his property to William Penn, he died in poverty.

**Fenwick, John R.,** b. in Charleston, S. C., in 1790; d. in Marseilles, France, 19 March, 1842. He was educated in England, and was distinguished for his literary attainments early in life. He was appointed lieutenant of U. S. marines in 1799, captain in 1809, and lieutenant-colonel of light artillery in December, 1813. He was severely wounded and made prisoner at the battle of Queenstown Heights, 13 Oct., 1812, was brevetted colonel in March, 1813, for gallant conduct on the Niagara frontier, and was on the same date appointed adjutant-general of the army, with the rank of major. He remained with this rank in June, 1815, but retained in the army as lieutenant-colonel of light artillery. He was commissioned colonel of the 4th artillery in May, 1822, and brevet-brigadier-general in March, 1828.

**FENWICK, Kenneth Neander**, Canadian physician, b. in Kincardine, Ont., 21 April, 1852. He was educated at Queen's university, Kingston, from which he received the degree of M. A. in 1874, and at the Royal college of physicians and surgeons there, where he was graduated as M. D. in the same year. He went in 1877 to England, took the degree of M. R. C. S. in 1878, and spent some time in Paris in his hospital practice. He become a demonstrator of anatomy in the Medical college of Kingston in 1876, was afterward professor of medical jurisprudence and sanitary science for four years, professor of pathology for a like term, and in 1885 was elected to the chair of obstetrics and diseases of women and children, which he now holds. He was elected a fellow of the Obstetrical society of Edin- burgh in 1885, and is now (1887) one of the surgeons to Kingston general hospital.

**Ferguson, Adam**, Canadian agriculturist, b. in Edinburgh, Scotland, in March, 1783; d. 26 Sept., 1862. He studied law and was admitted as an advocate, but never practised. In 1833 he came to Canada, and with James Webster, of Guelph, founded the town of Fergus, in what is now the county of Wellington. He was called to the legislative council of Upper Canada in 1841, and after the union of Upper and Lower Canada, held a seat in that body from 1841 till his death. He was widely known as an agriculturist, and was a director of the first board of agriculture. To him is largely due the credit of establishing the agricultural association, of which he was repeatedly president, and the chair of agriculture in University college, Toronto.—His son, **Adam Johnston**, Canadian statesman, b. in Ballyhooock house, Perthshire, Scotland, in 1815, was first educated in Edinburgh, came to Canada in 1833, studied law, and was called to the bar of Upper Canada in 1839. He was lieutenant-colonel of the 4th battalion of the Wellington militia, and, while yet a young man, became a district judge of Upper Canada. Entering into political life, he sided with the Liberal party in Canada, and sat in the lower house of the provincial parliament for Waterloo, from 1849 till 1854, and for the South Riding of Wellington from 1854 till 1857.

In 1889 he was elected by acclamation to the legislative council from the Brock division, and re-elected on his appointment to office in 1863. From March till July, 1863, he was receiver-general, when he was appointed provincial secretary in the government of John Sandfield Macdonald. In 1866 he was president of the council in the administration of Sir. N. F. Bond. In 1867 he became a senator and president of the privy council in the government of the Dominion. Mr. Ferguson exercised much influence with the political party with which he was associated. He assumed the name of Poole after the death of his father, succeeding to the estate of Ballyhoock in 1862.

**Ferguson, Colin**, clergyman, b. in Kent county, Md., 8 Dec., 1751; d. there, 10 March, 1806. He was the son of a Scotch emigrant in very moderate circumstances. His early education was begun at home, but he afterward went to Edinburgh, Scotland, entered the university there, and, after several years' diligent study, returned to Maryland an accomplished scholar. In 1782 he was an instructor in Kent county school at Chestertown. The year following, when Washington college (the oldest in Maryland), under the presidency of Mr. Goodwin, was founded, he was appointed professor of languages, mathematics, and natural philosophy. He held this chair for ten years, when he was appointed president. The institution, however, having been deprived of its funds by the legislature of Maryland, Dr. Ferguson resigned in 1814, and spent the remainder of his life in retirement. He studied theology under Rev. William Smith, D. D., rector of Chester parish, and was admitted to deacon's orders in Christ church, Middle-town, Conn., 3 Aug., 1785, and to priest's orders, 7 Aug., by Bishop Seabury. He was licenced to preach in St. Paul's parish, Kent co., Md., which was the only parish of which he ever had charge. He received the degree of D. D. from Washington college in 1877, and was an active member of the Episcopal general convention of 1789, at which the constitution of the church was discussed and adopted. Dr. Ferguson was a ready writer, but he published nothing of importance.

**Ferguson, Donald**, Canadian legislator, b. in East River, Prince Edward Island, 7 March, 1839. His grandparents, who came from Perthshire, Scotland, settled near Charlottetown in 1832. He was educated at the University of Edinburgh, and in 1863 was elected to the Legislative council of Upper Canada. He was a member of the executive council and commissioner of public works. Since 1889 he has been provincial secretary and commissioner of public lands. He was elected by acclamation at the general election of 1879, and was appointed provincial secretary and commissioner of crown lands in 1879. He was re-elected in June, 1882. He has published "Agricultural Education," a lecture (Charlottetown, 1884), and "Love of Country," a lecture (1885).

**Ferguson, Elizabeth**, poet, b. in Philadelphia, Pa., in 1843; d. in Hennegry co., Pa., 29 Feb., 1901. Her grandfather was Sir William Keith, colonial governor of Pennsylvania, and her father was Dr. Thomas Graeme, a Scotchman, collector of customs at Philadelphia. At the age of sixteen Mrs. Ferguson's wit and beauty made her a favorite. To ease the pain from a personal disappointment, she became a writer of poems and a translator of French verse, but the close application attendant upon this impaired her health, and she travelled abroad, as the
protégées of her aged friend, Rev. Dr. Richard Peters. Her daily record of travels was written in a happy vein, and contained a vivacious series of contacts between the Abbe, and the colonial society, which, though urgently solicited for publication, she declined to have printed. Soon after her return home she married a Scotchman, Hugh Henry Ferguson, after which she lived at Granea Park until the beginning of the Revolution in 1775, when she joined the entire British army, her husband remaining true to her country, and a separation followed. Her husband’s American estate was confiscated, but a small part of it was restored to her by the legislature in 1781. After the British entered Philadelphia, Mrs. Ferguson was the bearer of an offensive letter from the Rev. Mr. Duche to Gen. Washington. The general sent the letter to congress, and hinted to Mrs. Ferguson that he “highly disapproved the correspondence, and expected it would be discontinued.” But she soon proposed to Gov. Johnston to offer Joseph Reed “ten thousand guineas, and the best post in the government” to exert his influence with Gen. Washington, and in other ways “to settle the contest,” which brought out the memorable reply of Reed, afterward published by Mrs. Ferguson in a narrative for her children. The subject of Revolution was passed in pursuits of literature and in offices of benevolence. Several of her letters were printed in the “Port-Folio.” Her poetic correspondence with the Rev. Nathaniel Evans, under the pen-name of “Laurea,” was also published. She transcribed the entire Bible by heart, and this book was more deeply on her memory. But her most important work was a translation of Fenelon’s “Telemaque” into English heroic verse, which occupied her for three years. The manuscript was deposited by her heirs in the Philadelphia Franklin Library. After Ferguson’s death she rewrote four volumes.—Her nephew, John Young, who translated D’Argent’s “Ancient Geography,” died a lieutenant in the British army. The copy of his work in the Philadelphia library is now a memorial by Mrs. Ferguson.

FERGUSON, John, D. D., and astronomer, b. in Perthshire, Scotland, 31 Aug., 1797; d. in Washington, D. C., 26 Sept., 1867. He was brought to the United States in 1800, was assistant civil engineer on the Erie canal in 1817–19, assistant surveyor on the boundary commission under the Treaty of Ghent in 1819–22, a member of the astronomical survey on the same commission in 1822–37, civil engineer for the state of Pennsylvania in 1827–32, first assistant of the U. S. coast survey in 1833–47, and assistant astronomer of the U. S. naval observatory from 1847 till his death. While holding this last office he discovered three asteroids, for which he was awarded the astronomical prize medal by the Academy of sciences of France in 1854, and again, by the same institution, in 1860. Prof. Ferguson was a contributor to Gould’s “Astronomical Journal,” and to the “Astronomische Nachrichten”; also to the “Episcopal Church Review” and other magazines.

FERGUSON, Patrick, British soldier, d. at King’s Mountain, N. C., 7 Oct., 1780. He was a son of James Ferguson, an eminent jurist, and a nephew in 1551 was sent to Flanders to enter the army in Flanders. He came to this country in the spring of 1777, and was engaged in the battle of the Brandywine in September of that year. In October, 1778, he led a band that destroyed the shipping at Little Egg harbor, burned houses, and wasted the lands of the patriots. They surprised Pulaski’s command, and killed all they could, taking no prisoners. Ferguson was active on the Hudson in 1779, and so distinguished himself at the siege of Charleston in 1780 that he was particularly recommended by the commissary chief, Sir Henry Clinton, and appointed major of the 71st regiment. He was deputed to visit each district in South Carolina, to procure lists of the militia, and to see that the orders of Cornwallis were carried into execution. Any Carolinian thereupon after taken in the British army was sentenced to death for desertion and treason. In September, when Cornwallis began his march, he relied on the loyalists of North Carolina to recruit his army. On his left, Maj. Ferguson was sent with 200 of the best troops to the uplands of South Carolina, where he enlisted young men who had fled to the mountains for security, and fugitives of the worst character, who sought his standard for the chances of plundering. After a gallant defence, he was defeated and slain in the bloody contest of King’s Mountain, the spirit of which victory to the American soldiers was, says Bancroft, “like the rising at Concord, in its effects like the successes at Bennington, and changed the aspect of the war.” It encouraged the fragments of the defeated and scattered American army to seek each other and organize themselves anew. Ferguson was reputed to be the best marksmen in the army. He invented a musket to be loaded at the breech, which could be fired seven times in a minute with remarkable precision. Just before the battle of the Brandywine, Gen. Washington was taking observations outside of the lines, and a French officer in Hussar uniform, Ferguson, who did not recognize the approaching party, ordered three shots fired at them, but quickly countermanded the order. The Hussar made a circuit on his return, but Washington passed very near him, Ferguson, and Mills, the latter of whom had passed under a French order was disregarded. There was ample opportunity to take his life, but it was not attempted. On the following day Ferguson learned the name of his distinguished visitor.

FERGUSON, Samuel David, P. E. bishop, b. in Charleston, S. C., Aug., 1829. He emigrated with his parents to Liberia, in Africa, at his age of six years. He received his education in the mission schools under Bishop Payne, was appointed a teacher in 1862, and was ordained deacon by the bishop, 26 Dec., 1863, and priest, 19 March, 1868. During his diocese he served as assistant minister in St. Mark’s parish, Harper, and when made priest, became rector of the same parish. He was president of the standing committee for several years, and also business agent of the mission, and superintendent of the Cape Palms female orphan asylum and girls’ school. Having been elected missionary bishop for West Africa in 1865, he came to the United States, and was consecrated in Grace church, New York city, 24 June, 1865. Soon afterward he returned to Cape Palms, Liberia, and entered upon his duties unimpaired. He was ordained in the cloister of San Estebane Salamanca on 5 Feb., 1543, received the degree of doctor in theology, and in 1551 was sent to Mexico as a missionary among the Zapotec Indians, in whose language he preached and published several religious books. He was elected superior of the imperial convent of Mexico, 20 May, 1557, went to Florida as provincial vicar in 1560, and in 1567 was appointed provincial of the province of Santiago in Mexico, returning in 1570 to Spain as ecclesiastical attor-
ney-general. After some time he retired to the convent of Salamanca as director of novices, and was appointed bishop of Chiapas, taking possession of his diocese in 1855. He was sent to the annual Mexican provincial council in 1858, but on his voyage he broke a leg in Oajaca, and had to remain there for nearly a year to be cured. He wrote from there to the council "Tratado canónico reeditado desde Oajaca al concilio de Mexico," and "De la preferencia en los nombres para los curatos de los Indios," which are printed and preserved in the library of the college of San Gregorio in Mexico, with his "Vocabulario de la lengua Zapoteca," which is still considered as a text-book.

FERLAND, John Antony Baptist, clergyman, b. in Montreal, Canada, 25 Dec., 1805; d. in Quebec in 1863. In 1813 his family left Montreal and settled in Kingston. Here he resided three years, and learned to speak English. In 1816 he entered the seminary of Nicolet, where he remained fourteen years. He was ordained priest, 14 Sept., 1829, and named vicar of Quebec the same day. After holding various pastorate, he was appointed professor in the seminary of Nicolet in 1841, and in 1848 was elected superior. In the preceding year he displayed great courage during the typhus epidemic which had broken out among the Irish emigrants in Chicoutimi. In 1835 he was transferred from the seminary to the archiepiscopal residence, and was named a member of the archbishop's privy council. He became chaplain of the military hospitals of Quebec in 1855, and was appointed professor in the faculty of arts in the Laval university the same year. He died on the 18th of March, 1864. Between the years 1853 and 1862 he gave a course of successful public lectures on the period that began with the expulsion of the Acadians and ended with the death of Monckton. In the midst of his labors he found time to write several books, all relating to Canada, his object being, as he says himself, to make Canada known and loved by his fellow-countrymen. It is on his "Cours d'histoire du Canada" (vol. i., Quebec, 1851; vol. ii., by M. Lavendière, 1863) that his name is written in an honorably place; brought to light a multitude of facts that were previously unknown or misrepresented, rectified a large number of dates, and harmonized and explained the confused accounts of the early settlements. He was the author of "Observations sur une histoire du Canada par M. Alain Brassens"; "Voyage au Labrador"; "Journal d'un voyage à la côte de Gaspé"; and "La vie de Mgr. Plessis," all of which were published in Quebec.

FERNALD, Charles Henry, naturalist, b. on Mount Desert, Me., 16 March, 1838. He was educated principally at the Maine Wesleyan seminary, and during the civil war served in the U. S. navy as acting ensign. In 1865 he became principal of Litchfield academy, and in 1866 principal of Houlton academy. He then was called to the chair of natural history at the Maine state college, and held it from 1871 till 1886, when he became professor of zoology in the Massachusetts agricultural college. Prof. Fernald is a member of various scientific societies, and received the degree of Ph. D. in 1880 from the Maine state college. He has a large collection of dried plants, and has studied these mosls. His principal publications are "Catalogue of the Tortricidae of North America" (Philadelphia, 1883); "Butterflies of Maine" (Augusta, 1884); "Grasses of Maine" (1885); and "Sphingidae of New England" (1886).

FERNALD, Merritt Calvin, educator, b. in South Levant, Me., 26 May, 1828. He was graduated at Bowdoin in 1861, and subsequently taught in Levant, Searsport, and Bethel, Me. Later he spent some time in the chemical laboratory at Harvard in connection with Professor Henry M. Howe in mineralogy, and also acted as assistant to Prof. Josiah P. Cooke. In 1868 he became professor of mathematics and physics in the Maine state college of agriculture and the mechanical arts, and in 1879 became president of that institution, now known as the Maine agricultural college. He is a member of the state board of agriculture in 1889, and has published in its reports papers on subjects connected with his special studies, besides meteorological and mathematical tables, and records of barometrical, geodesic, and astronomical works. President Fernald has been superintendent of schools, and received the degree of doctor of philosophy from Bowdoin in 1881.

FERNANDES, Calabar Donlingo, Brazilian soldier, b. in Olinda near the close of the 16th century; d. in Porto Calvo, 22 June, 1665. He was of African descent, and little is known of his early life. He was living in Pernambuco when the Dutch attacked the city in 1639, and, notwithstanding his humble condition, gathered some men, joined the volunteers, and gained a series of victories which forced the invaders back. In 1652 he distinguished himself at the battle of Santa Rica, and, after the war, with his troops, repulsed the Dutch at several places. He was rewarded for his devotion by the contempt of his countrymen, who were envious of his prowess. Wounded by this conduct, he left the province and joined the Dutch, whom he led to the capture and plunder of the town of Yguassu. He captured the fortress of Rio Formoso in Jan., 1663, won an important battle at Itambarca in June, and in December led the conquerors to the fortress of Reis Magos. In March, 1664, he routed the Portuguese army, which had defeated the Dutch in January of that year, and captured the port of San Augustin. The Portuguese army being threatened on all sides, its commander, Alburquerque, in order to spare the rest of the troops, began to retreat toward Laguna. In his retreat, he was attacked by a large body of Portuguese, and was captured near Porto Calvo. He found out that that town had been occupied by Fornandes, thus strengthening the Dutch garrison commanded by Picard. Sebastiao do Soto, a feigned friend of Picard, treacherously lured him and 200 of his men to a place where the Portuguese had prepared an ambush, and completely routing them. The garrison of Porto Calvo then had to capitulate, and Fornandes Calabar, who was major of the Dutch army, was taken prisoner and hanged by the Portuguese at Porto Calvo.

FERNANDES PINHEIRO, Jose Feliciano (fer-nan-dez pin-hee-yo), baron de Velloso, Viseconte de Sao Leopoldo, Brazilian statesman, b. in Santos, 9 May, 1774; d. in Porto Alegre, 6 June, 1847. He began his studies in his native country, and completed them at Coimbra, Portugal, where, in 1798, he was graduated as bachelor in canonical laws, but abandoned his ecclesiastical functions and entered the magistracy. He assisted Velloso in establishing the literary institution "Arco do Bege," wrote most of the scientific work "Flora Iluminense," and compiled the "Historia Nova de_Completa da America." In 1800 he returned to Brazil, and was sent to a remote and nearly inaccessible part of the coast to collect excise duties of Rio Grande do Sul. In 1802 he was given charge of the organization of a flotilla for coast defence. He was made colonel in 1810, and in 1812 accompanied the army to Montevideo. In 1810 he was chosen a member of a jury for the trial of numerous criminals in Rio Grande do Sul. In 1821 he was elected a member of the Portuguese
legislature for the province of São Paulo, but left Portugal when he heard of the independence of Brazil. On his return he was again elected for São Paulo to the constituent assembly of Brazil. He was appointed president of Rio Grande do Sul, 25 Nov., 1828, and founded the first typographical establishment there, the colony of São Leopoldo, and also composed the first Olimus. He was made counsellor of state, and on 21 Nov. accepted the portfolio of minister of the empire. He exerted his influence for the improvement of public instruction, reorganized the school of medicine, founded a literary academy in the capital, and established chairs of law in São Leopoldo and Olinda. On 20 Nov., 1897, soon after negotiating a treaty of peace with the Argentine republic and a commercial treaty with England, he resigned his office. In 1880 he retired temporarily from the senate, and went for his health to São Pedro, where he lived the rest of his days, 1887, he again took his seat in the senate, and was intrusted with important commissions. In 1888 he founded the Geographical and historical institute. Dom Pedro II. conferred many honors on Fernandes, and also served as an ensign in scientific societies, and was the author of several works, the most important of which are "Vida e feitos de Alexandre de Gusmão é de Bartholomeu Lourenço de Gusmão"; "Resposta as Breves Anotações que sobre a memória Gusmão, escreveu o conselheiro Manoel J. M. da Costa é 949.

FERNANDES-SARDINHA, Pedro, Brazilian R. C. bishop, b. in Lisbon, Portugal, in 1497; d. on the coast of Brazil in July, 1556. His parents, who were of noble family, destined him for the profession of arms, but he entered the church in early life, and was ordained priest in Brazil in 1549 the clergy of that country, without a head to govern them, were guilty of the grossest negligence and vices. In 1551 Fernandes-Sardinha was elected and consecrated first bishop of Brazil, and arrived in his diocese on 1 Jan., 1562. Combining in himself with prudence, he soon reformed the character of the secular clergy as well as of the Jesuits, who were beginning to work in the new region. During the government of Thomé de Sousa everything went favorably, and rapid progress was made in the conversion of the Indians; but when the government of a different and quarrelsome character, became governor, and soon serious differences arose between him and the bishop, and, as the quarrel became daily more bitter, the case was submitted to the crown, and both were ordered to appear at court. Fernandes-Sardinha sailed from Bahia, 2 July, 1556, but the vessel was attacked by violent storms, and on 16 July was wrecked on the reefs near the mouth of the São Francisco river. The crew and passengers were saved, and tried to travel along the coast to Brazil, but after some months they fell into the hands of cannibals, who slaughtered and ate the prisoners. Only three persons escaped, who afterward related that one of the first to be sacrificed was the bishop, who suffered his fate with resignation, and up to his last moment exhorbed and prayed for the Indians. In which this tragedy occurred has since been called the bishop's wood. Fernandes, during his episcopacy, established the college of the mission of São Paulo.

FERNANDEZ, Diego, Spanish-American historian, b. in Palencia, Spain, about 1590, d. in Seville, Spain, 1654. He made frequent voyages along the coast of Peru. In 1553, in which this tragedy occurred has since been called the bishop's wood. Fernandes, during his episcopacy, established the college of the mission of São Paulo. Marquis de Cañete, who was viceroy in 1556, gave him an office, and ordered him to write the history of the events in which he had taken part. He afterward returned to Spain, where Sandona, the president of the council of the Indies, requested him to write also an account of the troubles caused by Gonzalo Pizarro and his adherents. The work, composed by Pedro Fernández, was never published, and is known as "Historia de la Gomera de la Historia del Peru" (Seville, 1751). The author gives a detailed account of all that passed in Peru from the arrival of the first viceroy, Blasco Nuñez de Vela, in 1544. Since he took part in several of the events that he describes, and knew all the men of whom he writes, his history is usually regarded as the best account of the conquest of Peru. Garcilaso de la Vega, however, accuses him of partiality, and says that his record of events is colored by his animosity toward individuals. The sale of the work was forbidden by the council of the Indies, the inhabitants of Spanish America were particularly forbidden to read it.

FERNANDEZ, Juan, Spanish soldier, b. in Seville in 1490; d. in 1583. He accompanied Hernando Cortés when the latter conquered Mexico, and also served in the Indian wars. In 1549, he was made governor of the province of Peru, and went to Peru in 1545, and took part in the campaign of 1553 and 1554, in which Francisco Giron (q. v.) was defeated and his party destroyed. The
sage was rendered extremely long and laborious by the winds that prevailed constantly in these lati-
tudes, and the calculations upset them. He managed to threading out from land. His plan was successful, and he arrived in Chili without any difficulty, mak-
ing the journey in a much less time than when he followed the shore. In one of these voyages, prob-
ably about 1588, he discovered the island which bears his name. He continued his explorations, and the Spanish government granted him possession of it, while others say that he met with a refusal. He remained some time on it, however, and when he departed left several boats behind him, which multiplied to such an extent that the island was soon stocked with them. The islands of San Félix and Saint Ambrose were discovered by him in 1574.

He was so much encouraged by these suc-
cesses that, in the hope of making still more im-
portant discoveries, he sailed from the coast of Chili in 1578, bearing that part of land from land in the preceding voyages. He sailed over about forty degrees toward the west and southwest, and, after a month's journey, landed on a coast which to all appearance was that of a continent. The inhabitants, who were white, well-made, and de-
cent in dress, received him kindly. José de Acosta's ship was very small and badly equipped. Fer-
nandez did not push his researches farther, but, after a short stay, embarked for Chili. He made his companions promise to keep the discovery a secret, and arranged with them to return with a larger expedition, but he was prevented in some way from putting his design in execution, and, after his death, the whole affair was forgotten. According to another version, he partially dis-
closed his discovery to certain persons who aban-
doned the idea of pursuing it after his death. These facts are published by Luis Arias, a Spaniard, entitled "Memoir to re-
commend to the King the Conversion of the Natives of Newly Discovered Islands" (1609; English trans-
lation, Edinburgh, 1773). It has been conjectured by H. Malinvaud, a Portuguese, that Fernandez was that of New Zealand, and they ac-
count for the discrepancy between the real distance of New Zealand from South America and the forty degrees over which Fernandez sailed by supposing that Arias, from his ignorance of nautical matters, made a mistake in his calculations. Another dis-
cov ery by Fernandez was that of Easter island, forty degrees west from the Chilian coast, which was generally thought to have been sighted first by Hoggeneen, a Dutch navigator, in 1722, but Duperron, a French savant, has restored the credit of its discovery to Fernandez.

FERNÁNDEZ, Prospero, Costa Rican presi-
dent, b. in San José de Costa Rica, 18 July, 1834; d. there, 11 March, 1885. He studied at the Uni-
versity of Guatemala, and in 1852 entered the mili-
tary service under the new conscription law. In 1854 he became lieutenant, and in 1856 marched with the auxiliary forces of Costa Rica to Nicaragua to repel the invasion of William Walker and his filibusters. He took part during 1856-7 in the battles of Santa Rosa, San Jacinto, and Rivas, and finally during Walker's second inva-
sion, in the capture of the filibusters in the river San Juan. In 1870 he took an active part in the revolution headed by Col. Tomás Guardia, which broke out on 27 April against the government of President Jesús Jiménez. Dr. Bruno Carranza was appointed provisional president, but resigned on 8 Aug., and Guardia as commander-in-chief succeeded him, but, in view of the hostility of the national assembly, retired to Alajuela, and was proclaimed dictator by the military forces under Fernandez, 7 Oct. Under Guardia's despotic gov-
ernment, Fernandez again led them to Spain, held aloof from politics, but was for some time governor of the province of Alajuela, in 1881 was appointed commander-in-chief of the military forces of the republic, and in 1885 elected by popular vote to the presidency for the constitutional term of four years. At the end of his term, 6 July, 1884, Lizano assumed the power for some weeks, and on 10 Aug., Fernandez was installed. His government contributed to the material progress of the country. A revolt that was put down in October, 1884, in favor of the expelled Jesuits, was promptly quelled. Before the expiration of his term Fernandez died, and Vice-President Bernardo Soto succeeded him.
FERNÁNDEZ DE CÓRDOVA

FERNÁNDEZ DE CÓRDOVA, Diego, marqués of Guadalcazar and count of Posadas, viceroy of Mexico and Peru, b. in the last quarter of the 16th century (place unknown); d. in Guadalcazar about 1650. He was a descendant of Gonzalo de Cordova, and was educated for a military career. In his youth he fought valiantly in the wars of Flanders, and in 1612 was appointed viceroy of Mexico. During his administration in 1613, the engineer Adrian Boot began the works for the drainage of the valley of Mexico, in 1614 the city of Lerma was founded, and in 1616 the Tepehuan Indians revolted, killing their missionaries, but Ferdinand IV soon conquered them. During 1614 there were rumors of the approach of a Dutch fleet in the Pacific, and Fernandez fortified the port of Acapulco. He also equipped three warships there, which, after the fears of war had been dispelled, he sent in March, 1615, on an exploring expedition to the coast of California. In 1620 the aqueduct of the city of Mexico was finished, consisting of 900 arches and costing 250,000 dols. In 1621, shortly before the death of Philip III, Ferdinand was appointed viceroy of Peru, but the sickness and death of his wife detained him for some time, and he did not reach Lima till 25 July, 1622. In 1623, when the war between Spain and Holland was renewed and there was danger of an invasion by a Dutch fleet, the viceroy ordered all important points to be fortified with the greatest activity, and gave a military organization to all the inhabitants of the coast. Fernandez remained personally for four months in Callao, and put everything in good state of defence. Early in 1624 the Dutch fleet, consisting of eleven vessels with 294 guns and 1,600 troops, under command of Admiral Jacob Clerk, appeared before Callao, and anchored at the island of San Lorenzo. The Dutch admiral sent a fire-ship against the boom and chain at the entrance of the harbor, but an unfavorable wind took it to the beach at some distance from the town, where it exploded without doing great damage. Repeated attacks and bombardments of the port were successfully repulsed by the forts and two men-of-war, the "Leon" and "San Bartolomé," anchored in the bay. Admiral Clerk sent several expeditions against other points of the coast without notable results, and died on board his fleet. His successor, after five months of fruitless hostilities, abandoned the coast and returned to Europe. During the rest of the year Fernandez applied himself to the improvement of his government, founded the monastery of Santa Catalina in Lima, and ordered barracks to be built at Callao for the lodging of negro-slaves arriving from Africa, who had previously been kept by their importers in open camps till their sale. After the death of his nephew, Luis de Cordova y Arce, governor of Chili, and when, in 1626, the order arrived from Madrid to take up again the warfare against the Araucanians, Fernandez sent re-enforcements and ammunition to Chili from Callao. In 1629 Fernandez also succeeded in quelling the civil warfare between the rival factions of the Biscayans and Vicuñas in Potosí, which had lasted for three years, and on 19 Oct. of the same year the new cathedral at Lima, which had been finished by the viceroy, was consecrated. Fernandez also had considerable during his administration the construction of the cathedrals of Cuzco, Arequipa, and Guamanga. In 1626 he established the university of San Pedro Nolasco, and in the same year regulated the mail service. He had the bridge over the Apurimac river established at the most convenient point, constructed another at Chancay, and also ordered a yearly visit by one of the supreme judges through the court district to remedy the abuses committed by the judges, priests, and Spaniards generally against the Indians. Fernandez collected all official letters, informations, orders, and communications during his administration in Mexico and Peru from 1613 till 1628 in three volumes, and sent them to the council of the Indies, besides the official information given to his successors. On 14 Jan., 1629, the pope, in favor of the independence of the Indies, delivered to him the government and returned to Spain, where he resided in a palace which he had built in the town of Guadalcazar, near Cordova.

FERNÁNDEZ DE PIEDRAHITA, Lucas, South American historian, b. in Bogota in 1624; d. in Panama in 1658. He studied in his native city in the Jesuit college of San Bartolomé, and finished his education in the University of Santo Tomas, where he was graduated as doctor of theology in 1647. During his academical years he published several dramas, which have not been preserved. In 1654 he was elected dean of the cathedral of Popayan, and in 1655 went to Spain on a commission from the president, staying in Madrid for six years and employing his leisure time in writing his work "Historia del Nuevo Reino de Granada," for which he, as a descendant on the maternal side of the Peruvian Incas, had a special vocation. His work is considered, together with Garcilaso de la Vega's, as the most reliable history of the conquest and of the 17th century, especially as regards New Granada and Ecuador. It was not completed, as after the publication of the first part (Antwerp, 1688) the author died, and it is not known what became of his manuscript. In Spain he was offered the bishopric of San Martín, or of Santa Marta, proposed by the pope, and in 1659 sailed for Cartagena, where he was consecrated. He began to visit, evangelize, and partly civilize the savages in his diocese, and began to rebuild in stone his cathedral which had been constructed of wood and straw. He distributed his whole revenue in charges of the sacred order, especially of the poor and the sick. In 1656 he was promoted to the bishopric of Panama, but before he could leave Santa Marta this city was taken and sacked by the buccaneers Duncan and Cos. The churches were pillaged, the bishop taken prisoner, and the pirates, believing his poor appearance an hourglass, subjected him to torture, to find out the hiding place of his money and jewels. As he was unable to pay his ransom he was carried as a pris-
FERNÁNDEZ LIZARDI, José Joaquín, Mexican author, b. in the city of Mexico in 1771; d. there in June, 1827. He was graduated in 1797 at the University of Mexico as bachelor, and in 1798 as licentiate. In 1813 he was deputy magistrate of Tacso, Guerrero, and as such delivered to the revolutionary chief Morelos all the arms and ammunition in that place on 1 Jan. In the same year he moved to the city of Mexico, and began to publish a paper called "El Mexicano" (The Mexican Thinker), under which name Fernández is now generally known. In this paper he advocated free schools and compulsory education, and one of his articles, in which he censured the decree of the viceroy Venegas depriving the revolutionary priests of the right to judge in clerical courts, caused his imprisonment for seven months. As soon as he regained his liberty in 1818 he published several articles on the plague, at that time ravaging Mexico, and in the following three years published many reviews, the best of which is called "Alcance De Fray Toribio" ("The Locker for Trifles"), and "La Quisquita y Ratos Entrenudos" (1819). After the Spanish constitution was re-established in Mexico, Fernández published several pamphlets, one of which, a dialogue between Camorro and Dominquín, caused his imprisonment for the second time. In the next year he published a paper called "El Conductor Eléctrico," and a series of articles, "Conversaciones del Pefco y el Sacristán." His defence of the freemasons (1822) caused his excommunication, but, undaunted by the prosecution of the clergy and reactionary party, he published a second defence, his "Cartas del Venceslao al Papista," and "Defensa del Pensoal dirigida al Provisor," and "Ataque al Castillo de Ullas," and a political-moral paper called "El hermano del Pefco" (1823). He had to suffer many prosecutions, and often to struggle with poverty, but the lower classes adored him and shared their bread with him. He also published two novels, "Nicolle Tristes y Día Alegre" (1824), and "Vida y Hechos del Famoso Caballero Don Catrín de la Fachena" (Mexico, 1832).

FERNÁNDEZ MADRID, José, South American poet, b. in Cartagena, Colombia, 9 Feb., 1789; d. in Bogotá, 16 June, 1829. In 1810 the University of Bogotá conferred on him the degrees of doctor of laws and doctor of medicine. He was active among those who took part in the war for independence, was elected deputy to the convention of Cartagena in 1811, and then representative to the congress of New Granada. He distinguished himself in the assembly, and became its president. When the government of the united provinces of New Granada was established in 1814, Madrid became representative for Cartagena, and filled the office until 1816. He succeeded Camilo Torres in the presidency of the republic, 14 March, 1816, under critical circumstances. The country was overrun with Spanish troops, and he was obliged to retreat before them to Popayán. He refused to surrender to the Spanish colonel, Latorre, and continued fighting valiantly the last fight, but though a prisoner and transported to Havana in 1816. He lived there several years, supporting himself by practising medicine, but in 1825 he returned to Colombia. He became the confidential agent of the Colombian government in Paris, and at the time of his death in June, 1830, was minister to England. He published a collection of poems under the title "Las Rosas" (Havana, 1823); two tragedies, "Atala" (1822), and "Guatimozin" (Paris, 1837); and articles on "Cultivation," "Commerce," "The Cultivation and Manufacture of Tobacco in Cuba," and other subjects. Many of his works have been translated into French; a metrical translation of Delille's "Les trois règnes de la nature," and numerous other works.

FERNÁNDEZ-PEÑA Y ANGULO, Juan A. Ignacio, Venezuelan archbishop, b. in Merida in March, 1781; d. in Caracas, 18 Jan., 1849. He studied in the university of his native city, and was graduated as doctor in divinity in 1805 in Bogotá. He was then appointed to several parishes in the provinces of Barinas and Mérida, but, without neglecting his parochial duties, took an active part in the movement for the independence of South America, and in 1811 was sent by the province of Barinas as deputy to the first congress of Venezuela. During the whole struggle for independence he gave his services to his country as a member of the different legislatures of the united republics of Colombia, and, after the creation of Venezuela as an independent republic in 1830, was a deputy to the constituent congress for one legislative period. He served as professor of theology and ecclesiastical law, and afterward as rector of the University of Caracas, dean, and vicar-general of the cathedral of that city. His merits were acknowledged by congress by his nomination on 24 Jan., 1840, as archbishop to the vacant see of Caracas, and he was
consecrated, 2 Jan., 1843, in the cathedral of Pamplona, Colombia. He made many improvements during the eight years of his episcopacy.

FERNOW, Edward, 1st Viscount, of Nowarslaw, province of Posen, Prussia, 28 Nov., 1887. He was the son of Edward Fernow, a royal councillor, and Bertha de Jachman, sister of the vice-admiral of that name. He was educated at the royal gymnasium of Our Lady at Magdeburg, Saxony, and at a similar institution in Posen, in 1848. He then emigrated to the United States, served during the civil war as lieutenant of the 3d U. S. colored troops, and subsequently as topographical engineer. At present he is one of the state librarians, keeper of the historical records at Albany, N. Y., and the author of a book on the subject. He has written many magazine articles on historical subjects.

FERRE, Leopold, 1st Marquis of Suchitledo, of the House of Ferre, 23 Apr., 1789. He was the brother of the marquis of Casariego y Mondragon, and son of the marquis of Alcaraz. He was a noted poet and historian of Spain.

FERREIRA, Alexandre Rodrigues (fer-ray'-eh-rah), Brazilian traveller, b. in Bahia, Brazil, 27 April, 1798; d. in Lisbon, Portugal, 29 April, 1815. He studied at the University of Brazil, and then travelled in Europe. He wrote several works on natural history in 1770. In 1778 he was appointed by the Portuguese government to make researches into the geography and natural history of the region known under the general name of Amazonia. He went to Lisbon, where his instructions awaited him. He then devoted himself to his duties, and for many years, on account of various missions in which the government employed him. The Academy of sciences of Lisbon admitted him to membership on 22 March, 1780. Having completed his preparations, Ferreira embarked at Lisbon, and landed at Santa Maria de Belen on 17 Oct., 1783. He began his labors by the exploration of the island of Marajo or Joannes, and returned to the main-land in 1784 to follow up the great tributaries of the Amazon. He subsequently penetrated into territories that had been completely unknown, and traversed the Sierra de Cuanuru, the Matto-Grosso, the district of Cuyaba, and many other regions to which names had not been given on the imperfect maps of the time. He also made the Indian race a study from a physiological and ethnographical point of view. Discussing the history of Lisbon and Madrid concerning the boundary-line of their respective possessions in South America, and Ferreira received orders to decide the question. He spent nine years—from 1783 till 1792—in his investigations, and, after re-establishing the original boundary, continued his labors, suffering the greatest hardships. He returned to Belen in July,
1792, and in March, 1793, to Lisbon, where he was employed in the ministry of marine. He was named in 1796 administrator of the royal cabinet of natural history at Lisbon, and of the botanical gardens attached to it, which he established. But he felt the confinement of this new mode of life, and in 1799, after which he only lived in Brazil.

The Portuguese government had spent large sums of money in designs and engravings for the works of Ferreira on the Amazon. His death put a stop to their publication, but during more than half a century ethnographical designs taken from his Memoirs of the Moos Mass from Tidal Observations (1771); “Converging Series expressing the Ratio between the Diameter and the Circumference of a Circle” (1781); “Tidal Researches” (1784); “Meteorological Researches,” Parts I. (1879), II. (1878), and III. (1881); “Temperatures of the Atmosphere and Barometer” (1884); and also Recent Advances in Meteorology, being Part II. of the “Report of the Chief Signal Officer” (Washington, 1885).

FERRELO, or FERRE, Bartolome, Spanish navigator, b. in Biscay, Spain (according to Lorenzo y Morales, in Coimbra), in 1499; d. in Mexico in 1550 (according to Herrera, in 1548). He was the pilot of João Rodrigues Cabrillo, a Portuguese captain in the service of Spain, who was sent with two ships in 1542 by Mendoza, the viceroy of Mexico, to make discoveries to the west Coast of California. This expedition started on the 27th of June from the port of La Navidad, and sailed along the coast as far up to Punta del Año-Nuevo, 37° 10' north of Monterey. The vessels were tossed about, and often separated from each other by the bad weather, and Cabrillo died, on 3 Jan., 1543, at the island of Santa Barbara; the channel of Santa Barbara, but Ferrelo, who succeeded him in command, continued his discoveries northward up to lat. 43°, where he saw the coast of Cape Blanco, called by Vancouver, Cape Orford. Excessive cold, want of provisions, sickness, and the loss of all his vessels, obliged him to return without reaching the parallel mentioned in his instructions. At 41° 30' he perceived a point of land to which, in honor of the viceroy, he gave the name of Cape Mendocino. From this point he sailed back to La Navidad, situated at 19° 45', where they arrived, 14 April, 1548, and established the fact that the coast was one continuous line between these two points. In this voyage the Spaniards often saw the natives of the country, who were almost naked, painted their faces, lived by fishing, and inhabited large houses. A full account of the expedition is found in the “History of the Indies,” by John van Laste. Humboldt, in his work on Mexico, corrects several erroneous statements of the Dutch historian, which were drawn from the works of old Spanish writers, basing his corrections on certain documents that he had occasion to examine in Mexico.

FERRE, Rafael (fer-ray’), Spanish missionary, b. in Valencia in 1570; d. in San José, Peru, in 1611. He entered the order of the Jesuits, against the wishes of his father, who wished his son to follow a military career. He went to Santo Domingo in 1583 and became a missionary among the Conchies, a warlike mountain tribe, who had done much damage by their frequent incursions. In 1601, with no other arms than his cross and his
breviary, he penetrated into their territory. On 29 June, 1608, the mission of "San Pablo y San Pedro" of the Cofanes was regularly organized. In 1604 three other villages were brought under the influence of civilization, and the Cofanes ceased to be the terror of the Spanish government. Colonia, which was located near the port of Guayaquil, was captured by the Cofanes in 1609.

The success of Queto ordered Ferrer in 1605 to civilize the unconverted tribes along the river Napo, and to make a chart of the basin of that stream. He advanced more than 3,000 miles in this enterprise, and met with a friendly reception. He also made a menue of the places he had traversed, and brought back a tolerably complete herbarium of the plants that he had found, and presented it to the viceroy of Queto. This voyage of exploration lasted thirty-one months. After resting at his mission among the Cofanes he returned to Queto from the north and traversed a hitherto unexplored forest, of which he made a plan. He discovered a large lake and the river Pilcomayo, which, on account of its navigability, was of much service to the colonization of that country. He was the first of the missions of the Cofanes, and was, besides, appointed governor and chief magistrate of the Cofanes. When Father Ferrer returned to his missions in 1610 he devoted himself to the civilizing of the few tribes of the Cofanes that up to this time had not come within his influence, and met by his death at the hand of a chief whom he had obliged to renounce polygamy. The savage surprise Father Ferrer as he was walking in the neighborhood of San Jose, and cast him into a narrow rock which was used to bridge a torrent. The murderer was massacred by the other Cofanes as soon as they learned of his deed. The account of the explorations of Father Ferrer never saw the light, and the original manuscript was lost. An extract from it was published in the collection of "Letras Ecuatorianas" by Father Díaz, published in the last century and reprinted in 1840. Besides this, Father Bernard de Bologne published in the "Bibliotheca Societatis Jesu" the same extract under the title "Relación del père Ferrer de ses voyages dans l'Amazone et des missions qu'il a fondées en la nation Cofane" (1769), followed by a notice of Ferrer's life, Father Ferrer published "Arte de la Lengua Cofana" (Quito, 1642), and translated into the language of the Cofanes the catechism, and selections from the gospels for every Sunday in the year. The original manuscript of this translation was discovered in a Spanish convent, and published in Paris. Ferrer, Ventura P., Spanish author, b. in Havana, Cuba, 18 March, 1772; d. there in 1857. He studied in his native city and then went to Spain, where in 1784 he obtained a place among the librarians of the king. In 1800 the Madrid government sent him to Mexico on a special commission, and, after fulfilling it, he returned to Spain. In 1805 he was appointed to fill a high office in Cartagena, Colombia, where he founded a society for the propagation of science and literature, and established a printing press and a reading room. In 1821 he went to Havana, where he was assigned an office in the finance department of the government, and introduced many important reforms. He published "Viaje á la Isla de Cuba," being vol. xx. of "El Viajero Universal" (Madrid, 1790); "Historia de los Diezgueros de Rionegro" (Caracas, 1797); "Balanza General del Comercio," the first work of this class ever printed in Cuba (Havana, 1826); "Arte de Vivir en el Mundo" (1890); and several translations from Latin, French, and Italian.

FERRER-MALDONADO, Lorenzo, Spanish navigator, lived in the 16th century. According to Leon Pinelo, he submitted to the council of the Indies a new method of ascertaining longitude, for which a premium of 2,000 ducats was offered, but his invention seems to have failed, as the premium was never paid. He sailed from Acapulco with an expedition to discover a northeast passage to the Atlantic, and on his return wrote "Relacion del Descubrimiento del Estrecho de Anian en 1568," the manuscript of which found its way into the library of the bishop of Segovia and state councillor of Portugal, Gerónimo Mascareños. A copy was presented to the French geographer, Buache, who read a memoir concerning it in the Academy of sciences in Paris, 10 Nov., 1799. There is a copy of both papers in the twenty-third volume of manuscripts of the library of the metropolitan church of Mexico. This "Relacion" gave rise to the subsequent explorations of Fucu and Bartolomé Fuentes, but was full of fantastic descriptions, and Ferrer's whole book has been branded as a tissue of inaccuracies and falsehoods. Ferrer's other work is of a better character, and was printed and published under the title of "Imagen del Mundo sobre la Esfera, Cosmografia, Geografia y Arte de Navegar" (Atica, 1626).

FERRERO, Edward, soldier, b. in Granada, Spain, 18 Jan., 1871. His parents were Italian, and he was brought to the United States when an infant. His father's house in New York was frequented by Italian political refugees, and he enjoyed the friendship of Garibaldi, Argenti, Alibius, and Avazzana. Before the civil war the son conducted a dancing-school, and for his bravery was awarded a diploma at the U.S. military academy. At the beginning of the war he was lieutenant-colonel of the 11th New York militia regiment. In 1861 he raised the 51st New York regiment, called the "Shepard rifles" and led it to fame in Buena Vista's expedition to Roanoke Island, where his regiment took the first fortified redoubt captured in the war. He also commanded a brigade at Newbern, and under Gen. Reno, and in 1862 served in Pope's Virginia campaign. He was in the battles of South Mountain and Antietam, and for his bravery and conspicuous engagement was appointed brigadier-general, 19 Sept., 1862. He served at Fredericksburg and at Vicksburg commanded the 2d brigade of Gen. Sturgis's division, 9th army corps, and a division at the siege of Knoxville. He afterward marched the 9th corps over the mountains, without roads, and by compass only, to Cincinnati. Ferrero was in command at the defense of Fort Sanders against the desperate assault of Longstreet, and at the battle of Bean's Station, under General Shackleford, by his timely occupation of Kelley's Ford, frustrated Longstreet's attempt to send a detachment across the Holston, and so paralyze the National forces by striking them in the rear. In Grant's final campaign, including the siege of Petersburg, he commanded the colored division of the 9th corps. He was brevetted major-general, 2 Dec., 1864, and mustered out in the same capacity, 28 June, 1861, Ferreyros joined the patriots and soon became active in politics. In 1822 he was elected deputy to the first constituent congress of Peru, appointed secretary by his colleagues,
and was conspicuous in opposing the reactionary movement of that year, tending to re-establish the Spanish authority in Lima. In 1825 he represented Peru as envoy extraordinary in Colombia, and in December, 1826, he was appointed to the same position in Bolivia. In 1828-3-9 he strenuously opposed the Peru-Bolivian confederation, and on its disruption on 20 Jan., 1839, he was elected deputy of the new constituent congress of Huancayo, and nominated its president. He again represented Peru to Bolivia, 1840, to the general American congress in 1847, to Chili and New Granada in 1848, to Ecuador in 1858, and deputy to congress in 1860. In the intervals he occupied several times the ministry of the interior, the treasury and foreign relations, was controller of state, director-general of customs, and for ten years director of public instruction, in which capacity he remodelled the whole system, and introduced valuable reforms in the faculty of philosophy, arts, and law. He also contributed to journals in Lima, and as president of several scientific and literary commissions contributed powerfully to the intellectual development of his country. He was an accomplished linguist and book collector, and left one of the most complete libraries in South America.

FERRY, James, Canadian senator, b. in Franklin, 22 Oct., 1811. He was educated in his native country, came to Canada in 1821, and engaged in mercantile pursuits in Montreal. He became a member of the corporation of that city in 1841, mayor in 1847, and lieutenant-colonel of militia the same year. He was appointed a member of the board of the Royal institution for the advancement of learning in 1845, was subsequently its president, and was elected chancellor of McGill university, Montreal, in September, 1884. He is also a member of the council of Victoria college, Toronto, and has been a director of the Canada board of the Bank of British North America since it was first established, is chairman of the Canada board of the Grand Trunk railway company, and is connected with many other organizations. He is a life member of the legislative council of Canada from 1873, when he was elected to the senate. He was appointed a member for Victoria in the legislative council of Quebec in 1867. Mr. Ferry is a Conservative in politics.

FERRIS, Benjamin, author, d. in Wilmington, Del., 20 Feb., 1879. He was a watchmaker, lived for many years in Philadelphia, and was clerk of the Philadelphia meeting of Friends. He published "History of the Early Settlements on the Delaware, from its Discovery to the Colonization under William Penn" (Wilmington, 1846). FERRIS, Isaac, clergyman, b. in New York city, 9 Oct., 1798; d. in Roselle, N. J., 16 June, 1873. He entered Columbia when but twelve years of age, joined the military company raised among the students in the war of 1812, and did duty in the forts around New York harbor. His college course was delayed one year by this, and he was graduated in 1816 with the highest honors of his class. He taught in the Albany academy one year, and then studied theology under Dr. James M. Mason, and in Rutgers seminary, was licensed to preach in 1829. He became the 5th Commissioner of the Reformed Dutch church in New Brunswick, N. J., in 1821. He was afterward settled in Albany in 1824-36, and at the Market street church, New York, in 1836-53. He went to Holland as commissioner on behalf of American missionaries in the Dutch East Indies in 1842. He was long connected with the Sunday-school union, was president of the city organization from 1887 till 1873, was the originator of the Rutgers female institute, and for a long period its principal and the president of its board of trustees for eighteen years, and was subsequently connected with the Ferry institute. In 1832 he accepted the chancellorship of the University of New York, at that time under serious embarrassment from heavy debts. He collected about $7400 outside of the rentals and other receipts of the university, and thus relieved it from its financial embarrassment, and materially raised the standard of scholarship. He filled the chair of moral science and Christianity evidence during his whole connection with the university, and was also acting president of constitutional and international law in 1855-69. He retired from the chancellorship in 1870, but was immediately chosen chancellor emeritus. He removed a year later to Roselle, N. J., where he resided until his death. The degree of D. D. was conferred on him by Union College in 1854, and that of L.L. D. by Columbia in 1856. He published numerous occasional sermons, essays, and addresses, including "Appeal to the Ministers in behalf of Sunday-Schools" (Philadelphia, 1884), and "Report on Separate Action in Foreign Missions" (1867). His son, John Mason, clergyman, b. in Albany, N. Y., 17 Jan., 1833, was graduated at the University of the city of New York in 1848, studied theology at the New Brunswick seminary, was licensed to preach in the Dutch Reformed church in 1849, and served in various parishes from 1849 till 1853, when he was elected secretary of the Board of foreign missions. He became editor of the "Christian Intelligence" in 1853, and treasurer of the Foreign mission board in 1886. Mr. Ferris is the author of a "History of Foreign Missions," published in the "Manual of the Reformed Dutch Church" in 1858 and 1879.

FERRY, Orris Sanford, senator, b. in Bethel, Fairfield co., Conn., 15 Aug., 1823; d. in Norwalk, Conn., 21 Nov., 1875. He was graduated at Yale in 1844, studied law, was admitted to the bar in 1846, and began practice in Norwalk. In 1847 he was appointed lieutenant-colonel of the first division of Connecticut militia, and from 1849 till 1856 was judge of probate for the district of Norwalk. He was elected to the state senate in 1855, serving two years, and in 1857-9 was district attorney for the county of Fairfield. He was an unsuccessful Republican candidate for congress in 1856, but was elected two years later, serving in 1859-61, and being again defeated in 1860. When the civil war began, he zealously supported the National government, and in July, 1861, became colonel of the 5th Connecticut regiment, joining Gen. Banks's corps in Maryland. He was promoted to brigadier-general, 17 March, 1862, and was assigned a brigade in Shields's division, from which he was transferred to Peck's division of the 4th army corps under Gen. Keyes. He served till the close of the war, resigned his commission 5 June, 1865, and on 26 May, 1866, was elected U. S. senator from Connecticut, taking
his seat in March, 1867. During the latter part of the reconstruction period he opposed President Johnson, and voted guilty at his impeachment trial. In 1872 Mr. Ferry was re-elected by a coalition of Independent Republicans and Democrats, but he adhered to Gen. Grant's administration and opposed the Republican party at the presidential election of that year. He voted against the civil rights bill on the ground that it would prejudice the cause of public education. While in the lower house of congress Gen. Ferry served as a member of the committee on revolutionary claims, and the committee on�eligion. He was one of the three of the rebellious states. While in the senate he was a member of the committee on private land claims, public buildings, and patents, and after his re-election in 1873 was chairman of the latter committee.

FERRY, William Montague, clergyman, b. in Granby, Que., 8 Sept., 1806; d. in Grand Haven, Mich., 30 Dec., 1867. He was graduated at Union college in 1817, studied theology, and went as a missionary of the Presbyterian church to Michigan in 1821. He established a school for both whites and Indians near Mackinac, and labored successfully for twelve years. His health failing, he was obliged to seek a different employment, and in 1834 purchased with others a tract of land in the Grand River valley, where he founded a settlement and went extensively into the manufacture of lumber. He was elected to the legislature in 1842, and served as a member of the committee that accompanied the body of President Lincoln to Springfield, Ill., served in congress from 4 Dec., 1864, till 3 March, 1871, and was re-elected but did not take his seat, having been chosen to the U. S. Senate in 1870, but the early death of Howard Jay just took his seat, 4 March, 1871. As chairman of the committee on rules he reported a re-classification and revision of the rules of the senate, which were unanimously adopted without amendment. He was a member of the special committee of the senate that framed the resumption act of 14 Jan., 1875, was chosen president pro tempore, 9 and 19 March, and again 20 Dec., 1875, and by the death of Vice-President Wilson became acting vice-president, serving as such until 4 March, 1877. While acting vice-president he was called upon, in the absence of President Grant, to deliver the address and preside at the centennial celebration in Philadelphia, 4 July, 1876, and he also presided at the impeachment trial of Sec. Belknap, and over the sixteen joint meetings of congress during the recess. He was elected senator, 17 Jan., 1877, and was re-elected president pro tempore of the senate, 5 March, 1877, 26 Feb., 1878, 17 April, 1878, and 3 March, 1879. He traveled extensively in Europe, the Holy Land, and Egypt, during the years 1883-02.

Axel, Swedish soldier, b. in Stockholm in 1755; d. there, 20 June, 1810. He was the son of Count Axel, field-marshal of the army of Sweden, educated at the military academy of Turin, Italy, and soon afterward entered the Swedish army. After brief service he was appointed colonel of the royal regiment of Swedes, the body-guard of Louis XVI., king of France. Count Fersen came to the United States as a member of the staff of Rochambeau, fought under Lafayette at Yorktown, and retired with the French at the beginning of 1783, became a member of the Order of the Society of the Cincinnati. At the time of the treason of Benedict Arnold he wrote interesting letters to his father in Europe, which have been published, describing accurately men and manners in the days of the Revolution. On his return to France, Count Fersen was a devoted adherent of the royal family, and in their flight from Paris was the disguised coachman of the fugitives. On their capture, Fersen escaped, and returned to Sweden, where he was made chancellor of Upsala university, became a court favorite, although he was unpopular with the people, and was promoted grand marshal of the kingdom. The sudden death of the crown-prince gave rise to the suspicion that Fersen had poisoned him, which is now acknowledged to be unfounded. At the funeral Fersen was a member of a mob with sticks and stones and killed, while the troops looked on with apparent indifference.

FESSENDEN, Samuel, lawyer, b. in Fryeburg, Me., 16 July, 1784; d. near Portland, Me., 13 March, 1809. His father, the Rev. William Fessenden, graduated at Harvard in 1766, was the first minister of Fryeburg, and frequently a member of the Massachusetts legislature. He also served as judge of probate. Samuel received his early education at the Fryeburg academy, and was graduated at Dartmouth in 1806. He studied law with Judge Dana, of Fryeburg, was admitted to the bar in 1806, and began practice at New Gloucester, where he rose to distinction in his profession. In 1815-10 he was in the general court of Massachusetts, of which state Maine was then a district, and in 1818-19 represented his district in the Massachusetts senate. For fourteen years he was a member of the 13th division of Massachusetts militia, to which office he was elected on leaving the senate, and to which he gave much attention. He removed to Portland in 1822, and about 1828 declined the presidency of Dartmouth. He was an ardent Federalist, and one of the leaders of the anti-slavery party in Maine. In 1847 he was nominated for governor and for congress by the Liberty party, receiving large votes. For forty years he stood at the head of the bar in Maine. He was an active philanthropist. He published two orations and a treatise on the institution, duties, and importance of juries. The degree of LL. D. was conferred upon him by Bowdoin in 1846. His son, William Pitt, senator, b. in Boscawen, N. H., 10 Oct., 1800; d. in Portland, Me., 4 Sept., 1809, was graduated at Bowdoin in 1823, studied law, and was admitted to the bar in 1827. He practised law first in Bridgeton, a year in Bangor, and afterward in Portland, Me. He was a member of the legislature of that state in 1822, and its leading debater. He refused nominations to congress in 1831 and 1832, and one of the bills was supported by him in the Senate, becoming chairman of the committee to revise the statutes of the state. He was elected to congress as a Whig in 1840, serving one term, during which time he moved the repeal of the rule that excluded anti-slavery petitions, and spoke upon the loan and anti-slavery bills. He gave his attention wholly to his law business till he was again in the legislature in 1845-6. He acquired a national reputation as a lawyer and an anti-slavery Whig, and in 1849 prosecuted before
the supreme court an appeal from an adverse
decision of Judge Story, and gained a reversal by an
argument which Daniel Webster pronounced the
best he had heard in twenty years. He was again
in the legislature in 1853 and 1854, when his strong
anti-slavery principles caused his election to the
U. S. Senate by the vote of the Whigs
and anti-slavery
Democrats. Taking
his seat in Febru-
ary of 1854, he made
a week afterward,
an electric speech
against the Kansas-
Nebraska bill, which
placed him in the
front rank of the
Senate. He took
a leading part in
the formation of the Rep-

cuban party, and from 1854 till 1860

took one of the ablest
opponents of the
pro-slavery measures
of the Democratic administrations. His speech
on the Clayton-Bulwer treaty, in 1856, received
the highest praise, and in 1857, his speech on the
Lecompton constitution of Kansas, and his criti-
cisms of the opinion of the supreme court in the
Dred Scott case, were considered the ablest
discussion of those topics. He was re-elected to the
Senate in 1859 without the formality of a nomi-
nation. In 1860 he was a member of the Peace
Congress. By the secession of the southern sena-
tors the Republicans acquired control of the sen-
ate, and placed Mr. Fessenden at the head of the
finance committee. During the Civil War he was
the most conspicuous senator in sustaining the
national credit. He opposed the legislation for
the suspension of the legal tender as unnecessary and unjust. As chairman of the
finance committee, Mr. Fessenden prepared and
carried through the Senate all measures relating to
revenue, taxation, and appropriations, and, as
declared by Mr. Sumner, was “in the financial
field all that our best generals were in arms.”

When Sec. Chase resigned in 1864, Mr. Fessenden
was called by the unanimous appeal of the nation
to the head of the Treasury. It was the darkest
hour of our national finances. Sec. Chase had just
withdrawn a loan from the market for want of ac-
ceptable bids; the capacity of the country to lend
seemed exhausted. The currency had been enor-
mously inflated, and gold was at 200. Mr. Fessen-
den refused the office, but at last accepted in obe-
dience to the universal public pressure. When his
acceptance became known, gold fell to 225, with
no bidders. He declared that no more currency should
be issued, and, making an appeal to the people, he
prepared and put upon the market the seven-thirty
loan, which proved a triumphant success. This
loan was in the form of bonds bearing interest at
the rate of 7½ per cent., which were issued in de-
nominations as low as $50, so that people of moder-
ate means could take them. He also framed and
recommended the measures, adopted by Congress,
which permitted the subsequent consolidation and
funding of the government loans into the four and
four-and-a-half per cent. bonds. The financial
situation becoming favorable, Mr. Fessenden, in
accordance with his expressed intention, resigned
the secretaryship in 1865 to return to the Senate, to
which he had now for the third time been elected.
He was again made chairman of the finance com-
mittee, and was also appointed chairman of the
joint committee on reconstruction, and wrote its
celebrated report, pronounced one of the ablest
state papers ever submitted to Congress. It vindic-
tated the power of Congress over the rebellious
states, showed the violation to the Constitution
under the constitution and the law of nations, and
recommended the constitutional safeguards
made necessary by the rebellion. Mr. Fessenden was now
the acknowledged leader in the Senate of the Rep-

cubans, when he imperiled his party standing by
opposing the passage of the 3rd Cong. Res. in the
Conservation Bill in 1868. He gave his reasons for voting “not
guilty” upon the articles, and was subjected to a
storm of derision from his own party such as
colonists have rarely met. His last service was
in 1868, and his last speech was upon the bill to
strengthen the public credit. He advocated the
payment of the principal of the public debt in
gold, and opposed the notion that it might lawfully
be paid in depreciated greenbacks. His public
character was described as of the highest type of
patriotism, courage, integrity, and disinterested-
ness, while his personal character was of the

Mr. P. Fessenden.

Another son, Samuel Clement, lawyer,
b. in New Gloucester, Me., 7 March, 1815; d. in
1881, was graduated at Bowdoin in 1834, and at
Bangor theological seminary in 1837, and was pas-
tor of the 2nd Congregational Church in Thomaston
(now Rockland) from 1844 to 1856. In that year
he established the “Maine Evangelist,” and in
1858 studied law, was admitted to the bar, and be-
gan practice. He was elected judge of the munici-
pal court of Rockland, and was a representative
from Maine in the 37th Congress, from July, 1861, till March, 1863;

Another son, Thomas Amory Dearling, b. in
New Gloucester, Me., 28 Sept., 1829, was
graduated at Bowdoin in 1850. He studied law,
and was admitted to the bar, and began practice in
Mechanics' Falls, Me., after which he removed to Lew-
iston. He was a member of the convention that
nominated Fremont for president in 1856, in 1860
was appointed aide-de-camp to Gov. Morrill, of
Maine, and in 1860 was elected to the legislature.
In 1861 he was prosecuting attorney for Andros-
cooggin county, and was elected a representative
from Maine to the 37th congress, to fill a vacancy,
serveing from December, 1862, till March, 1863.
He was an able lawyer and eloquent speaker. — William
Pitt's son, James Deering, b. in Westbrook, Me.,
28 Sept., 1833; d. in Portland, Me., 18 Nov., 1882;
was graduated at Bowdoin in 1852, studied law,
and practised in Portland. Ill. in 1862, entered
early in the civil war, and entered the service as
captain of the 2d U. S. sharpshooters, 2 Nov., 1861.
He served on Gen. David Hunter's staff in the De-
partment of South Carolina in 1862;—and was present
at the attack on Fort McAllister in 1862, at the
operations on the James and York in 1864, and on
Charleston. He was appointed to the duty of organiz-
ing and commanding the first regiment of
colored troops in 1862, but the government was not
then ready to use colored troops. He was promoted
to colonel in 1863, and in September, 1863, reported

Digitized by Google
to Gen. Hooker, and was engaged in the campaign of Lookout Mountain and Missionary Ridge, and in the Atlanta campaign in 1864. He was promoted brigadier-general of volunteers, 8 Aug., 1864, ordered to Gen. Sheridan in October, and was with him at Cedar Creek. On 13 March, 1865, he was brevetted major-general of volunteers, and was on duty in Washington. He was appointed brevet major-general in bankruptcy for the first district of Maine in 1868, and represented Portland in the legislature in 1872-4.

—Another son of William Pitt Fréancis, soldier, b. in Portland, Me., 18 March, 1838, was graduated at Bowdoin in 1858, and studied law at Harvard and in New York. He was appointed major and captain in the 10th U.S. infantry on 14 May, 1861, and was severely wounded at Shiloh. From October, 1862, till July, 1863, he was colonel of the 25th Maine volunteers, and commanded a brigade in front of Washington and near Centreville, Va. He was appointed brigadier-general of volunteers, 10 May, 1864, and major-general, 9 Nov., 1865. In 1864 he was with Gen. Banks in the Red river expedition, and was present at Sabine Cross-Roads, Pleasant Hill, and Monett’s Bluff, where, leading his brigade in an assault of the enemy, he was mortally wounded, 17 Nov., 1864. The day after, he was on duty in Washington, and in 1865 was in command of the 1st division, Department of West Virginia, and was afterward assigned to Hancock’s 1st veteran corps. He was a member of the Wirtz military commission in Washington in 1863, and assistant commander of the bureau of refugees, freedmen, and abandoned lands in 1866. He retired with the rank of brigadier-general in the regular army, 1 Nov., 1866. He served as mayor of Portland in 1876, but declined a renomination. —Another son of William Pitt Fréancis was, b. in Rockland, Me., 6 Jan., 1838; d. in Centreville, Va., 1 Sept., 1862, was graduated at Bowdoin in 1861. He began to study law, but soon entered the military service as 2d lieutenant in the 2d Maine battery, 30 Nov., 1861. He was promoted to 1st lieutenant, 3 June, 1862, aide to Gen. Schuyler Colfax in July, 1862, and was mortally wounded in the second battle of Bull Run, 31 Aug. —Samuel Clement’s son, Joshua Abbe, b. in Rockland, Me., was appointed 2d lieutenant in the 1st U.S. cavalry, 24 March, 1862; 2d lieutenant 5th artillery, 6 Sept., 1862; 1st lieutenant, 20 Nov., 1863; captain, 1st light artillery, 1862; and was mortally wounded at Chickamauga. —Another son, Samuel, b. in Rockland, Me., was appointed 2d lieutenant in the 5th Maine battery, 18 Jan., 1865. He is a lawyer and politician in Stamford, Conn.

FESSSENDEN, Thomas, clergyman, b. in Cambridge, Mass., in 1799; d. in 1818. He was the son of Rev. William Fessenden, of Cambridge, and uncle to the first Samuel. After graduation at Harvard in 1798, he became pastor in Waterville, N. H., which charge he held from 1797 till 1813. He was author of "The Sacred Life of Lord Nelson" (1804), and "The Boston Self-styled Gentlemen-Reviewers reviewed" (1806). —His son, Thomas Green, author, b. at Waterville, N. H., 22 April, 1771; d. in Boston, Mass., 11 Nov., 1837. He was graduated at Dartmouth in 1796, and during his college term wrote a history of New England, as the result of a hydraulic machine, which proved a failure and involved him in pecuniary difficulties. While in London he became interested in the construction of a patent mill on the Thames, in which enterprise he was completely ruined. At this time he formed the acquaintance of Benjamin Douglas Perkins, patentee of the metallic tractors, which he advertised in a poem in Hudsomastic verse, entitled "Terrible Tractoration," in which he satirized the medical faculty, who opposed the use of these instruments, and published another poem, "Sawdust," in which he says: "It is a work of strange, grotesque ideas, aptly expressed." The poem was enlarged and republished in New York in 1806 as "The Minute Philosopher." He returned to the United States in 1804 and settled in Boston, but afterward edited the "Weekly Instructor," in New York for two years, and in 1812 began to practise law in Bel lows Falls, Vt. He removed to Brattleborough, Vt., in 1815, and was editor of the "Reporter" there, but from 1816 till 1822 conducted the "Intelligencer" at Bellows Falls. In the latter year he established, in the United States "In 1829, and continued," with which he remained connected till his death. He edited also, "The Horticultural Register" and "The Silk Manual," and published "Original Poems"; "Democracy Unveiled" (1806); "Pills, Poetical and Philosophical," inscribed for the purpose of purging the Public of Piddling Philosophers, Penny Poetasters, of Patrician Politicians and Petty Partisans. By Peter Pepperbox, Poet and Physician." (Philadelphia, 1809); "American Clerk’s Companion" (1810); "The Ladies’ Monitor" (1822); and "Laws for New Inventions" (1829). His last satire was a little poem, entitled "Wooden Book-sellers." See an article on Mr. Fessenden, by Nathaniel Hawthorne, included in the volume entitled "Fanshawe, and other Pieces," Boston, 1876.

FEUCHTWANGER, F. Rithe, chemist, b. in Firth, Bavaria, 11 Jan., 1805; d. in New York city, 25 June, 1876. He was the son of a mineralogist, and inherited a taste for natural science, to which he devoted special attention at the University of Jena. After receiving his doctor’s degree there in 1827, he came to the U.S. in 1828 and settled in New York, where he opened the first German pharmacy, and also practised medicine, being particularly active during the cholera epidemic of 1832. Subsequently he devoted his entire attention to chemistry and mineralogy, and became engaged in the manufacture of saltpetre in 1832; and in 1838 he introduced in 1829 the alloy called German silver, and was the first to call the attention of the U.S. government to the availability and desirability of nickel for small coins. In 1887 he issued, by permission of the U. S. government, a large quantity of one-cent pieces in nickel, and in 1894 he had struck off a number of three-cent pieces in the same metal, but they were not put into circulation. After the great fire of 1846 he called the attention of the authorities of New York to the fact that saltpetre would render safer the fire alarms; this statement created much discussion; the expression "Will saltpetre explode?" became a byword, and a play was acted at one of the theatres in which a character representing Dr. Fechtwanger was presented. He made two large collections of mineral specimens, one of which was kept in London at the World’s fair in 1851, and the other, which he bequeathed to his daughters, was for a time on exhibition at the Museum of natural history in Central park, New York. Dr. Fechtwanger was a member of scientific societies in this country and of the Royal Society of London, and of the "Proceedings" of the American association for the advancement of science. He published a
FEUILLET, Louis Eocene, French explorer, b. in Maine, near Foresight, Providence, in 1816; d. at Philadelphia, 7th of April, 1853. He studied at the college of the convent of Minimes, in Avignon, and at the early age of ten astonished his teachers by observations on astronomical subjects. On 20 March, 1840, Feuillet received holy orders and entered the convent of St. Louis in order to devote himself exclusively to his studies. Soon his discoveries in mathematics and astronomy gave him a wide reputation, and after a voyage to the Levant with the mathematician Cassini, was sent by Louis XIV. on a scientific expedition to the Gulf of Mexico, he sailed from Marseilles, 5 Feb., 1703, and arrived at Martinique on 11 April, 1704. After recovering from an illness which had interrupted his observations, he sailed on board of a buccaneer’s ship in September, 1804, and in this queer company visited Puerto Caballo, Santa Marta, Bogota, and Santo Domingo. On his return he was made a member of the Academy of Sciences, and mathematician in ordinary to the king. He sailed on a second expedition on 14 Dec., 1707, and arrived at Buenos Ayres on 14 Aug. Louis XIV, placed at Feuillet’s disposal a man-of-war, to facilitate his work, and from Buenos Ayres he sailed toward Cape Horn. On 24 Dec. he observed the snowy mountains of Staten Land, and then advanced south several degrees, entering the Antarctic ocean. He determined the positions of several islands, took soundings, and drew a chart of them. On January, 1708, he sailed as far as El Callao, Peru, and made a complete chart of the Chilian coast. He penetrated the interior of Peru as far as the mountains, and then went to Lima. On 3 Jan., 1711, Feuillet reembarked and followed a new route to the southward, going by the 50th parallel. He then visited Havana and Puerto Rico, and arrived in France on 27 Aug., 1711, where he was received with great distinction. In 1724, Feuillet was again sent on an expedition to determine the exact position of the island of Perro, where the French geographers had located the prime meridian. His works are “Journal des observations physiques, mathématiques et botaniques, faites sur les côtes orientales de l’Amérique méridionale et dans les Indes occidentales de 1707 à 1712” (2 vols., Paris, 1714); “Suite du journal des observations physiques” (1725). Both works are illustrated with numerous maps and plates. The journal of Feuillet and its continuation have at the end a separate work entitled “Histoire des plantes médicinales qui sont le plus en usage aux royaumes du Pérou et de Chine, avec description des lieux par ordre du roi ou du 1707 au 1712.” The figures, which are plants, most of which were new, are drawn with delicacy and truth. Among others are the fuchsia and the datura grandiflora, which were afterward introduced into Europe. The work of Feuillet, with its hundred botanical plates, was afterward published in 1742.

FEW, William, senator, b. in Baltimore County, Md., 8 June, 1748; d. in Fishkill, N. Y., 16 July, 1828. He was descended from William Few, who came to this country with William Penn. In 1758 the family settled in Orange county, N. C., where he received an excellent education. After studying law he was admitted to the bar, and began practice in Augusta, Ga. In 1776 he was chosen a member of the assembly, and was appointed one of the council. He served in the Revolutionary war, and in 1780, in order to study law, he held himself in several actions. In 1778 he became surveyor-general and presiding judge of the Richmond county court. He was a delegate from Georgia to the Continental congress from 1780 till 1782, and from 1788 till 1789. In 1787 he advocated the convention that framed the Federal constitution in 1787. In 1788 he was elected one of the first two senators from Georgia, and served in that capacity from 4 March, 1789, till 2 March, 1793. Subsequently he was judge of the circuit court in Georgia from 1794 till 1797, and a member of the convention that framed the constitution of the state of Georgia. In July, 1790, he removed to New York, and was elected to the state legislature from 1802 till 1805. Later he became United States commissioner of loans.

FICKLIN, Archelaus, mathematician, b. in Winchester, Ky., 9 Sept., 1833. He was graduated at the Masonic college in Lexington, Mo., in 1858, and was principal of the Trenton, Mo., high school from 1854 till 1859. Subsequently he was elected professor of mathematics in the Bloomington, Ill., public school, a position he held until 1890, and a similar one in the Christian female college in Columbia during 1864-5. He then was appointed professor of mathematics and astronomy, and director of the observatory at the University of the state of Missouri, in Columbia, which places he still holds. In 1874 he received the degree of Ph. D., and ten years later that of LL. D. from the University of Wisconsin. He is a fellow of the American association for the advancement of science, and a member of the American astronomical society. Prof. Ficklin has published “The Complete Algebra and Key” (New York, 1874); “Algebraic Problems and Key” (1874); “First Lessons in Arithmetic” (1881); “Elementary Arithmetic” (1881); “Table-Book and Primary Arithmetic” (1881); “Practical Arithmetic” (1881); “Algebraic Problems” (1881); “National Arithmetic, with a Key” (1881); and “Elements of Algebra” (1881).

FIELD, Archelaus G., physician, b. in Ontario county, N. Y., 15 Nov., 1829. He studied medicine, and was graduated at Starling medical college in 1854, and at the college of physicians and surgeons, New York, in 1864. He became examining surgeon for pensions in 1866, and held that office for many years. He settled first in Hillsborough, Ohio, and then in Des Moines, Iowa, where he devotes himself to the practice of medicine. In 1878 he was a member of the international medical congress, and he has been president of the Iowa state medical society. His contributions to medical literature have been large, and he has published reports and addresses delivered before the Iowa and American medical societies.

FIELD, William, boyhood name, Worsley, Vt., 12 June, 1816; d. in Albion, N. Y., in August, 1876. He early settled in Albion, where he became a stone-cutter and carver. Later he obtained contracts for building railroads, thereby acquiring wealth, and was associated with George M. Pullman in the construction of his sleeping-cars. In 1854-5 he was elected to the New York state senate, and in 1867 was a member of the Constitutional convention. He was a prominent member of the Republican state committee,
and was well known as a party manager, devoting the larger share of his time to the promotion of the interests of public men and the political organization of which he was a member.

FIELD, Benjamin Hazard, philanthropist, b. in Yorktown, Westchester co., N. Y., 2 May, 1814. He was educated at home and at North Salem academy, N. Y., and at the age of 13 came to New York in 1832, and entered the office of his uncle, whom he succeeded in business in 1838. He retired in 1873. Mr. Heron has been connected with many charities in and about New York. He was one of the incorporators of the Home for Incurables, "Letters of the Reform of the Judiciary System," and afterward addressed a committee of the New York legislature on the subject. In 1841 he prepared three bills, which were introduced, but, the judiciary committee, to whom they were referred, failed to take any action on them. In 1846 he wrote on The Reorganization of the Judiciary, which were widely distributed in pamphlet-form. His influence was felt in the Constitutional convention of 1846, and their report called for a general code and the "Reform of the Practice." Before the legislature met in January, 1847, he published "What shall be done with the Practice of the Court? Shall it be wholly Reformed? Questions addressed to Lawyers." In September, 1847, he was appointed commissioner on practice and pleadings, and as such took an active part in the revision of the code of procedure. The commission reported the first installment to the legislature in February, and it was enacted in April, 1848. The remainder was reported in four sections at different times until January, 1850, when the completed "Codification of Civil and Criminal Procedure" were submitted to the legislature. Both these codes have been enacted into law. The radical design of the new system of civil procedure was to obliterate the distinction between the forms of action and between legal and equitable suits, so that all the rights of the parties in relation to the subject of litigation can be determined in one action, instead of dividing them between different suits. This system has been adopted in twenty-four of the states and territories, and is the basis of the legal reform established by the new judicature act in England, and of the practice in several of the English colonies, including India. Eighteen of the states and territories have adopted his code of criminal procedure. For some years following the enactment of these laws he continued to publish numerous pamphlets, including the "Law Reform Tracts," also frequent articles in the journals, and drafted bills that were introduced into the legislature for the purpose of effecting the completion of codification. In 1857 Mr. Field was appointed by the state of New York head of the commission to divide a criminal, civil, and a civil code. These, with the two codes of procedure previously made, were designed to supersede the unwritten or common law. They were completed in 1865, and covered the entire province of American law, and presented to the people in complete form, by which they were governed. The state of New York has, as yet, adopted only the penal code, although other states have drawn largely from
the civil code in their legislation, and in California and Dakota they have adopted them in full. In 1866 he brought before the British association for the promotion of social science, at its meeting in Manchester, England, a proposal for a general internal reform of the law of nations similar to that which he had before undertaken in regard to the civil and criminal law. He procured the appointment of a committee, consisting of eminent jurists of different countries, charged with preparing and reporting to the association an internal revision, and he was first submitted to their careful revision and amendment, and when made as complete as possible, to be presented to the attention of the different governments, in the hope of receiving at some time their approval and adoption as the recognized law of nations. The distinguished jurists composing this committee resided in different countries, and hence it was difficult for them to act in concert. In consequence, Mr. Field took the whole matter upon himself, and in 1873, after the lapse of seven years, presented to the Social science congress his "Code of Internal Internationals," which attracted the attention of all jurists, and has been translated into French, Italian, and Chinese. It resulted in the formation of an association for the reform and codification of the laws of nations, also having for his object the substitution of arbitration for war in the settlement of disputes between countries. The membership includes jurists, economists, legislators, and politicians, and of this organization Mr. Field was elected first president. An eminent chancellor of England has said that "Mr. Dudley Field, of New York, has done more for the reform of laws than any other man living." Mr. Field has taken much interest in politics. Originally a Democrat, he voted with that party, although he persistently opposed its pro-slavery policy, until the nomination of John C. Frémont, in 1856, whom he supported in the presidential canvass of that year. During the civil war he was a staunch adherent of the administration, and was active with voice, pen, and purse in aid of his country. For eight weeks in 1866 he filled the unexpired term in congress of Smith Ely, who had been made mayor of New York city. He never acted with the Democratic party, and was one of the advocates on that side in the dispute over the presidential election. He has delivered numerous addresses, and has contributed very largely to current literature on political topics. His "Sketches over the Sea" appeared in the "Democratic Review" at the time of his first trip abroad in 1836, and he published "Speeches, Arguments, and Miscellaneous Papers" (2 vols., New York, 1860).—Another son, Stephen Johnson, jurist, b. in Haddam, Conn., 4 Nov., 1816, was not three years old when his father removed to Stockbridge, and ten years later accompanied his sister, Emilia, who had married a missionary, to Smyrna, for the purpose of acquiring a knowledge of oriental languages. On his return he entered Williams college and graduated in 1837, standing first in his class. Subsequently he came to New York, and began the study of law in the office of his brother, David Dudley. After his admission to the bar he became a partner in the firm. This connection was severed in 1848, and he spent some time in European travel. In November, 1849, he sailed from New York for San Francisco, where he practised his profession. A few weeks later he was among those who founded Marysville, becoming its first alcalde, and continuing as such until the organization of the judiciary under the constitution of the state. He was elected a member of the first legislature held after the admission of California into the Union, served on its judiciary committee, and secured the passage of laws concerning the judiciary, and regulating civil and criminal procedure in all the courts of the state. He was also the author of the law that gives authority to the regulations and customs of miners in the settlement of civil and criminal cases, which varies among them, thus solving a perplexing problem. At the close of the session he returned to Marysville, and during the ensuing six years devoted himself to his profession, gaining an extensive practice. In 1857 he was elected one of the supreme court of California for six years, beginning with January, 1858, but, on the occurrence of a vacancy, he was appointed to fill it in October, 1857. On the resignation of Chief Justice David S. Terry, in September, 1859, Judge Field succeeded him, and continued in office till his appointment to the supreme bench of the United States by President Lincoln in 1863. Among the prominent decisions in which he has been concerned, was the famous test oath case, in which he gave the casting vote, and wrote the opinion of the court annulling the validity of the "iron-clad" oath. His dissenting opinions in the legal-tender cases, in the confiscation cases, and in the New Orleans slaughterhouse case, have also attracted attention. Judge Field was a member of the electoral commission in 1877, and voted with, the Democratic minority of the commission. In 1880 his name was placed in nomination for the presidency at the Cincinnati convention, and he received sixty-five votes on the first ballot. He was appointed by the governor of California, in 1884, one of a commission to examine the code of laws of that state, and to prepare amendments to the same for legislative action. He received the degree of LL. D. from Williams in 1864, and in 1890 was appointed professor of law in the University of California.—Another son, Cyrus West, merchant, b. in Stockbridge, Mass., 30 Nov., 1819, received his education in his native village, and at the age of fifteen came to New York, where his brother David Dudley secured a situation for him in the employ of Alexander T. Stewart. When he attained his majority he began the manufacture and sale of paper on his own account, and in the course of a dozen years was at the head of a prosperous business. In 1833 he partially retired, and spent six months travelling in South America. The project of carrying a telegraph line across the Atlantic was suggested to him during a conversation with his brother Matthew, in which aid was solicited for the construction of a telegraph route across Newfoundland. The matter was at once presented to Peter Cooper, Moses Taylor, Marshall O. Roberts, and Chandler White, who agreed to contribute $20,000 each, and the enterprise was at once organized, under the title of the New York, Newfoundland and Labrador Telegraph. Its counsel for the company was his brother, David Dudley, and a committee was immediately sent to Newfound-
land to secure from the local legislature the exclusive right for fifty years to establish a telegraph from the continent of America to Newfoundland, and then to England. Mr. Field thenceforth devoted his time largely to the accomplishment of this purpose. He visited England, solicited financial aid, and finally subscribed, in his own name, for a one-fourth interest in the company. Several unsuccessful efforts were made to lay the cable, but finally communication was established in 1858. For a few weeks messages were sent from one continent to the other, and then the cable ceased to act. The civil war occupied the attention of the country for several years, and it was impossible to proceed further until its termination. Meanwhile, public interest was kept alive by the efforts of Mr. Field. He made repeated visits to England, and delivered addresses on the subject on both sides of the Atlantic. Finally, in 1865, active measures were renewed, and the steamship “Great Eastern” (see illustration) began the delivery of the cable. At mid-ocean, after 1,200 miles had been laid, the cable parted, and the vessel returned to England. In 1868 another expedition started, and on 27 July telegraphic communication was established between the two continents, and has not since been interrupted. Congress voted unanimously to present Mr. Field with a gold medal and the thanks of the nation, while the prime minister of England declared that only the fact that he was a citizen of another country prevented his receiving high honors from the British government. John Bright pronounced him the “Columbus of modern times,” who, by his cable, had moored the new world alongside of the old.” The Paris exhibition of 1867 gave him the grand medal, the highest prize it had to bestow. In 1869 he attended the opening of the Suez canal as the representative of the New York chamber of commerce. He became interested in 1876 in the development of the system of elevated railways in New York city, and has devoted much of his thought and capital to their successful establishment. In 1880 he left New York for a trip around the world, and since his return has obtained concessions from the Sandwich islands for the laying of a cable between San Francisco and those islands, with a view toward ultimate extension across the Pacific ocean.—Another son, Henry Martyn, clergyman, b. in Stockbridge, Mass., 3 April, 1822, was graduated at Williams in 1846, studied theology in Philadelphia, and New Haven, Conn., until 1842, and then became pastor of a Presbyterian church in St. Louis, Mo., where he remained for five years. In 1847–8 he travelled in Europe, and was in Paris during the revolution in February of the latter year, and also in Italy during the summer scenes a few weeks later. His observations and experiences in Rome were published in a pamphlet entitled “The Good and the Bad in the Roman Catholic Church.” On his return to the United States he became well acquainted with the families of Wolfe Tone, Thomas Addis Emmet, and other Irish patriots living in New York, and was led to study the history of Ireland during the latter part of the 18th century. In consequence he published “The United Irishmen, the History of the Rebellion of 1798” (New York, 1851). He was pastor of the church in West Springfield, Mass., in 1851–4, and then returned to New York to become one of the editors of the “Evangelist,” of which he subsequently became the proprietor. He visited Europe again in 1856 and 1867, and in 1877 made a tour around the world. Besides sermons and reviews, he has published “Summer Pictures from Copenhagen to Venice” (New York, 1859); “History of the Atlantic Telegraph” (1866); “From the Lakes of Killarney to the Golden Horn” (1876); “From Egypt to Japan” (1878); “On the Desert” (1888); and “Among the Holy Hills” (1888).

**FIELD, Henry Martyn**, physician, b. in Brighton, Mass., 3 Oct., 1837. He was a great-grandson of the Rev. Noah Worcester, and was graduated at Harvard in 1859. Subsequently he studied medicine, receiving the degrees of M.D. of Harvard and Surgeons and Surgeons in New York in 1862. After serving for more than a year in the U.S. army as acting assistant surgeon, he settled in New York, where he practised for four years. In 1867 he removed to Newton, Mass., and there acquired a large general practice, making a specialty of female diseases. He was elected professor of therapeutics in Dartmouth medical college in 1872. Dr. Field was one of the corporators of the Boston gynecological society, and is an active member of several medical societies. His contributions to medical journals include principally papers on his specialty, published in transactions of various societies.

**FIELD, James Gaven**, lawyer, b. in Walnut, Culpeper co., Va., 24 Feb., 1856. His ancestors were identical with those of the Fields of New York. He attended for a time a classical school, and became a teacher. In 1848 he went to California, and in 1850 was elected one of the secretaries of the convention that framed the first constitution of that state. In the same year he returned to Virginia, and began the study of law, and in 1852 was admitted to the bar. He served as the attorney for the commonwealth in his native county from 1860 till 1865. During the civil war he was actively engaged in the Confederate service, and lost a leg at the battle of Slaughter’s Mountain. Since the war he has been attorney-general of the state. Gen. Field is a Baptist, being a zealous and liberal promoter of all the enterprises in which that denomination is engaged.

**FIELD, Joseph M.**, actor, b. in London, England, in 1810; d. in Mobile, Ala., 30 Jan., 1856. His parents were Irish exiles, who brought him to the United States at an early age. He was educated in the common schools of New York city, and thereafter gave his attention to the study of law. At the age of twenty-six he married, and in 1843 made his first appearance as an actor in one of the minor New York theatres. The drama soon became his principal profession, and he travelled and performed in most of the large cities of the Union, without attaining distinction. In 1852 Field became manager of a theatre in St. Louis, Mo., where he dramatized and produced many local plays, and continued in this capacity a daily newspaper, in which he was one of the editors and chief proprietor. In St. Louis he wrote many humorous sketches for his brother’s New
Orleans "Picayune." These articles were signed "Straws," and became widely quoted. At the time of his death Field was proprietor of the theatre in Mobile, Ala. He published "The Drama of Poker-ville," in 1841, and "The Mark," in 1842. He was editor of the "C, journalist, b. in London, England, in 1812; d. at sea in 1844, was brought to the United States as an infant, and, after a course of education in the common schools of New York city, entered a printing-office, where he made his way into journalism. Field's first attempt in Mobile was the "New Orleans Watch," and other southern cities. He was for several years one of the editors of the New Orleans "Picayune," and contributed numerous articles in prose and verse to southern periodicals, over the signature of "Phaeno."—Joseph's daughter, Kate, lecturer, b. in St. Louis, Mo., about 1840, was educated in Massachusetts at various seminaries, and later gave special attention to musical studies. She made several prolonged visits to Europe, and during her stay there became correspondent of the New York "Tribune," Philadelphia "Press," and Chicago "Tribune." She also furnished sketches for periodicals. In 1874 Miss Field appeared as an actress at Booth's theatre, New York, where she met with some success; and afterward she renewed her dramatic efforts as a variety performer of a much higher order, and passed her time in making valuable publications such as "Planchette's Diary" (New York, 1868); "Adelaide Ristori" (1868); "Mad on Purpose," a comedy (1868); "Pen Photographs from Charles Dickens's "Readings" (Boston, 1868); "Haphazard" (1870); "Ten Days in London" (1875); and "A History of Bell's Telephone" (London, 1879).

FIELD, Martin, lawyer, b. in Leverett, Franklin co., Mass., in 1773; d. in Fayetteville, Va., in 1853. He graduated at Williams in 1798, studied law at Chester, Va., and began practice at Newland, Va., in 1800. He was a popular and successful jury lawyer, and for ten years filled the office of state attorney for Wyandot county. He was frequently chosen to the general assembly, and also sat in the Constitutional convention of Vermont. After practicing continuously for thirty years, he retired, and, at the age of sixty-five, suffering from "make merchandise of the gospel." He voted against the entire township, in 1834, on the proposition to expel the free negroes, and was compelled to face a mob in consequence. He was one of the original abolitionists of the west, and emancipated several valuable slaves that he had inherited. He held a debate, in 1832, with Elder Thomas P. Connolly on the "State of the Dead," and the arguments were published in book-form. He also published a humorous poem, entitled "Arts of Imposi- tion and Deception Peculiar to American Society" (1840). Dr. Field is the author of "Asiatic Cholera," has contributed many essays to medical journals, and has prepared in manuscript lectures on "Capital Punishment," "The Mosaic Record of Creation," "The Age of the Human Race," and "The Causes of deafness."

FIELD, Richard Stockton, b. in White Hill, Burlington co., N. J., 31 Dec., 1803; d. in Princeton, N. J., 25 May, 1870. He was a grandson of Richard Stockton, one of the signers of the Declaration of Independence, was graduated at Princeton in 1821, studied law in the office of his uncle, Richard Stockton, and was admitted to the bar in 1825. He was for several years a member of the New Jersey legislature, and in 1838 was appointed attorney-general of the state, which office he resigned in 1841. He was a prominent member of the convention which framed the present constitution of the state of New Jersey, and in 1851 was chosen to deliver the first annual address before an association composed of its survivors. From 1847 till 1855 he was professor in the New Jersey law-school. Ever taking a strong interest in educational matters, and opposing the common schools of the state, he was in the latter year made president of the board of trustees of the state normal-school, then just organized, and thenceforward until his death he wrote all its annual reports to the legislature. In November, 1862, he was appointed to the U.S. senate for the un-
FIELD, Samuel, philanthropist, b. in Delaware county, Pa., 12 Aug., 1803. He is a Philadelphia merchant, a ruling elder of the Walnut street Presbyterian church, and remarkably for his earnestness in forwarding every form of Christian activity. He is exceedingly liberal, and scarcely ever fails to respond to any proper appeal to his sympathies. For many years he has belonged to the Presbyterian board of education, and has taken a leading part in the establishment of the hospital under the management of that denomination. The organization of the Presbyterian home for widows and single women and the Presbyterian orphanage are also largely due to his earnest and judicious efforts. Mr. Field has several times represented his party in Congress.

FIELD, Thomas W., educator, b. at Onondaga Hill, N. Y., in 1829; d. in Brooklyn, N. Y., 25 Nov., 1881. He removed to Williamsburg, N. Y., in 1846, and engaged in teaching, surveying, and the cultivation of fruit and flowers. In 1873 he was appointed superintendent of public schools in Brooklyn, N. Y., which office he held at the time of his death. He was an ardent student and collector in American history and ethnology. He published a small volume of poems; "Pear Culture" (1858); "A History of the Battle of Long Island" (Men of Sing Sing, Historical Society," vol. ii., 1869); "Historic and Antiquarian Scenes in Brooklyn and Vicinity" (1866); "An Essay toward an Indian Bibliography" (1873); and left a large manuscript volume of "Aphorisms," unoriginal.

FIELDING, William Stevens, Canadian journalist, b. in Halifax, 24 Nov., 1848. He was educated in his native city, and has been connected for many years with the Halifax "Morning Chronicle." At the convention of the Liberal party held in Halifax after the reorganization of the Thomas government in 1882, he declined the portfolios of premier and provincial secretary. In December of the same year he became a member of the administration of W. T. Pipes, and on the latter's retirement in July, 1894, reorganized the administration, becoming premier and provincial secretary. He was first returned to the Nova Scotia house of assembly in 1882, and was re-elected in 1884.

FIELDS, James Thomas, publisher, b. in Portsmouth, N. H., 31 Dec., 1817; d. in Boston, 24 April, 1891. In the age of four years he lost his father. The lad was educated in a high school in his native place, and in 1834 went to Boston to become clerk in a book-store. In his eighteenth year he read the anniversary poem before the Boston mercantile library association. Soon after he reached the age of twenty-eight, he became a partner in the publishing firm of Ticknor, Reed & Fields, and continued a member of it till 1870, when he retired. From 1862 until 1870 Mr. Fields was editor of the "Atlantic Monthly." Meanwhile he had lectured before the sorority of Harvard and Dartmouth, and in 1867 received from the latter the degree of L.L.D. After the close of his publishing career Fields lectured successfully, chiefly on literary subjects, throughout the large cities of the northern states. He had seen much of literary society, had been in intimate with many eminent men, and possessed a special faculty of entertaining and instructing his audiences. He made four visits to Europe—in 1847, 1851, 1859, and 1869. His published volumes include "Poems" (Boston, 1849; 2d ed., Cambridge, 1854); "A Few Verses for a few Friends" (Boston, 1859); "Yesterdays with Authors" (1871); "Hawthorne" (1876); and "In and out of Doors with Charles Dickens" (1876). In conjunction with Edwin P. Whipple he edited the "Family Library of English Poetry" (1877).—His wife, Annie Adams, has published "Under the Olive," poems (Boston, 1860), and a "Memoir of James T. Fields" (1881).

FIGUEIRA, Luiz, Portuguese missionary, b. in Almodovar, Portugal, 1585; d. in Brazil in July, 1643. He belonged to the Jesuit order, and was sent on the Brazilian mission. He was the companion of the Jesuit Pinto, who, while preaching the gospel among the Tuyapes, a tribe near Pernambuco, was killed by these cannibals. Figueira fortunately escaped, and returned to Pernambuco. He was appointed superior of the college of that city, and afterward made head of all the Jesuit missions on the Amazon. He then went to Portugal with the object of finding missionaries to share his labors, and was returning with several companions when, just as his ship was entering the mouth of the Amazon, a storm arose, and he was wrecked on an island inhabited by the Aruans. These barbarians massacred Figueira with thirteen of his companions, and devoured their bodies. Figueira wrote "Arte da Grammatica da Lingua Brasiliaca" (Lisbon, 1857). The library of the Jesuit college in Rome contains French translations of these other works of Figueira, the originals of which are lost: "Voyages de découvertes à travers les pays des Tuyapes" and "Établissements fondés par le père Figueira chez les sauvages au Maranhão."
FIGUEROA, Francisco, Mexican historian, b. in Toluca about 1750; d. in the city of Mexico about 1800. He entered in his youth the order of St. Francis, and was at different times lecturer and rector of studies of the College of Tlaltetelco, superior of the convent in Mexico, and provincial of New Spain. At a royal decree dated Feb. 16, 1799, he was ordered the viceroy to collect and send to Spain all the documents that might be useful for compiling the history of Mexico, the task was intrusted to Figueroa, and in less than three years he collected thirty-two folio manuscript volumes in duplicate. One of the manuscripts, the "Codex Chichimeca," which exists to-day, although mutilated, in the Spanish Academy of history. The other copy remained in the office of the secretary of the viceroyalty, and was afterward transferred to the national general archives, where they still existed in 1853, but at present their resting-place is unknown. They include diaries of missionaries in the northern provinces (3 vols.); a "History of the Conquest of New Galicia," by Mota Padilla (3 vols.; afterward published by the Mexican geographical society); the Indian songs of Nezahualcoyotl and Itxilochichitl; "Crónica Mexicana por Hernando Alvarado Tezozomoc," and "Historia Chichimeca por Ixtlilxochitl" (all three published partly in a translation in Kingsborough's "Antiquities of Mexico"); "Crónica de Michoacán por Fr. Pablo Bezauro," partly published in Spanish, French, and Italian (3 vols.); "History of the Missions in Old California" (English translation, New York); and "Notes on New California" (partly published in French and English translations). Figueroa was also the author of several theological works, most of which have expired, and while some of them is still preserved in the Biblioteca Nacional del Mexico.

FIGUEROA, Francisco Acaña de (fe-ga-ro'-ah), Uruguayan poet, b. in Montevideo in 1791; d. there, 6 Oct., 1862. In 1804 his father sent him to Buenos Ayres, where he was also educated in Spanish, but the invasion of that city in 1807 by the British forces obliged him to return to his native city, where he was employed as a subaltern in the administration under his father. He began early to write improvisations and numerous small poems, but, as sketched in his own writings, he left Montevideo, none of his works of that period have been published. During the twenty-two months' siege of that city by the revolutionary forces in 1812-14, he kept in verse a diary of daily events, which was afterward published under the title "Diario Histórico Razonado del sitio de Montevi-deo en 1812-13 y 14." In June, 1814, when Montevideo surrendered, Figueroa emigrated to Río Janeiro, where he was employed as secretary of the Spanish envoy. In 1818, after the conclusion of peace, he gave up his idea of going to Spain, and returned to his native city. He was again employed in the administration, and in 1840 was appointed director of the national library and museum, but continued to occupy his leisure by writing poetry. Marmier, in his "Lettres sur l'Amérique," sketched these poetical efforts, and placed him at the head of Spanish-American poets. Besides his historical diary mentioned above, he published "Parafrases de los Salmos"; "Parafrases de las Lamentaciones de Jeremías," and "Las Tor- ridas." sketched in his "Poesies de Property," and the poems "La Negra," "El Duelo de Montevidéu," "Himno Nacional del Uruguay," and all his smaller poems, were published under the title of "Mosénico Poético" (1857).

FILLEBROWN, Thomas Scott, naval officer, b. in the District of Columbia, 13 Aug., 1834; d. in New York city, 26 Sept., 1884. He was appointed to the navy from Maine as a midshipman, 19 Oct., 1841; was promoted to passed midshipman, 10 Aug., 1847; became lieutenant, 15 Sept., 1855; lieutenant- commander, 15 Feb., 1867; captain, 6 Jan., 1874; and commodore, 7 May, 1885. He was present in all the operations on the gulf coast during the Mexican war, and took part in the North Pacific and Paraguay expeditions. In 1863 he was placed in command of the steam- sloop "Chesapeake" at the whaling stations in the New York harbor lost four officers and thirty men through the explosion of a boiler. He also commanded the iron-clad "Pompey," operating against Fort Sumter in May, 1864. The iron-clad "Mon- tauck," in the attack on Battery Pingle, Stono river, S. C., in July of the same year, and the steamer "Sonoma," of the South Atlantic blockading squadron, in 1864-5. He was also present at the engagement with Confederate batteries in Ta- goda river, S. C., in February, 1865. At the close of the war he was assigned to special duty at the naval department in Washington, where he remained until just before his last illness.

FILLMORE, Millard, thirteenth president of the United States, b. in the township of Locke (now Summerhill, Cayuga co., N. Y., 7 Feb., 1800; d. in Buffalo, N. Y., 7 March, 1874. The name of Fillmore is of English origin, and at different periods has been variously written. Including the son of the ex-president, the family can be traced through six generations, and, as has been said of that of Washington, its history gives proof of the "best blood of the English race." The first of the family to appear in the New World was a certain John Fillmore, who, in a conveyance of two acres of land dated 24 Nov., 1704, is described as a "mariner of Ipswich." Mass. His eldest son, of the same name, born two years before the purchase of the real estate to which sundry predecessors, who have disappeared; but one of them is still preserved in the Biblioteca Nacional del Mexico.

woman; with a sunny nature that enabled her to endure uncomplainingly the many hardships of a frontier life, and that her closing days were gladden- ed by the frequent visits of her second son, who, having taken his father's profession, became a prominent physician in the community.

From a brief manuscript autobiography prepared by "worthy Mr. Fillmore," as Washington Irving described him, we learn that, owing to a defective title, his father lost his property on what was called a "lithographic tract," was removed to another part of the same county, now known as Niles, where he took a perpetual lease of 180 acres, wholly unimproved and covered with heavy timber. It was here that the future president first knew anything of life. Working for nine months on the farm, and attending such primitive schools as then existed in that neighborhood for the other three months of the year, he had an opportunity of forgetting during the summer what he acquired in the winter, for in those days there were no newspapers and magazines to be found in pioneers' cabins, and his father's library consisted of but two books—the Bible and a collection of hymns. He never saw a copy of "Shakespeare" or "Robinson Crusoe," a history of the United States, or even a map of his own country, till he was 14. In 1816, the family moved to Buffalo where Mr. Fillmore closed his career as a school-master, and has also conversed with one of his pupils of sixty-five years ago. The wisdom of his youth and early manhood gave presage of all that was witnessed, and admired, of his character. Nature laid on him, in the kindly phrase of Pardoe, "the strong hand of her purity," and even then he was remarked for that sweet courtesy of manner which accompanied him through life. Millard Fillmore began practice at Aurora, where his father then resided, and fortunately won his first case and a fee of four dollars. In 1827 he was admitted as an attorney, and two years later as counsellor of the supreme court of the state. In 1830 he removed to Buffalo, and after a brief period formed a partnership with Nathan K. Hall, to which Solomon G. Haven was soon afterward admitted.

By hard study and the closest application, combined with honesty and fidelity, Mr. Fillmore soon became a sound and successful lawyer, attaining a highly honorable position in the profession. The death of Daniel Fillmore's misfortunes in losing his land through a defective title, and again in taking another tract of exceedingly poor soil, gave him a distaste for farming, and made him desirous that his sons should follow other occupations. As his means did not suffice, even on the farm, longing to try any profession, he wished them to learn trades, and accordingly Millard, then a sturdy youth of fourteen, was apprenticed for a few months on trial to the business of carding wool and dressing cloth. During his apprenticeship he was, as the youngest, treated with great injustice, and on one occasion his employer, for some expression of righteous resentment, threatened to chastise him. When the young woodman, burning with indignation, raised the axe with which he was at work and told him that he would have no more to do with him. Fortunately for both, the attempt was not made, and at the close of his term he shouldered his knapsack, containing a few clothes and a supply of bread and dried venison, and set out on foot and alone for his father's house, a distance of something more than a hundred miles through the primitive forests. Mr. Fillmore in his autobiography remarks: "I think that this injustice—which was no more than other apprentices have suffered and will suffer—had a marked effect on my character. It made me feel for the weak and unprotected, and to hate the in- solent tyrant in every station of life."

In 1815 the youth again began the business of carding and cloth-dressing, which was carried on from June to December of each year. The first book that he purchased or owned was a small English dictionary, which he diligently studied while at night. In 1819 he conceived the idea of becoming a lawyer. Fillmore, who had yet two years of his apprenticeship to serve, agreed with his employer to relinquish his wages for the last year's services, and promised to pay thirty dollars for his time. Making an arrangement with a relative from the country, by which he was to receive his board in payment for his services in the office, he began the study of the law, a part of the time teaching school, and so struggling on, overcoming almost insurmountable difficulties, till at length, in the spring of 1823, he was, at the intercession of several leading members of the Buffalo bar, whose confidence he had won, admitted as an attorney by the court of common pleas of Erie county, although he had not completed the course of study usually required. The writer has recently seen the brick building of one-story in Buffalo where Mr. Fillmore closed his career as a school-master, and has also conversed with one of his pupils of sixty-five years ago. The wisdom of his youth and early manhood gave presage of all that was witnessed, and admired, of his character. Nature laid on him, in the kindly phrase of Pardoe, "the strong hand of her purity," and even then he was remarked for that sweet courtesy of manner which accompanied him through life. original system of revenue, still the tariff of 1849 was a new creation, and he is most justly entitled to the distinction of being its author. It operated successfully, giving immediate life to our languishing industries and national credit. At the same time Mr. Fillmore, with great labor, prepared a digest of the laws authorizing all appropriations reported to the House of Representatives by the committee on ways and means, so that on the instant he could produce the legal authority for every expenditure which he recommended. Sensible that this was a great safeguard against improper expenditures, he procured the passage of a resolution requiring the departments, when they submitted estimates of expenses, to accompany them with a reference to the laws authorizing them in each and every instance. This has ever since been the practice of the government.

Mr. Fillmore retired from Congress in 1843, and was a candidate for the office of vice-president, supported by his own and several of the western states, in the Whig convention that met at Baltimore in May, 1844. In the following September he was nominated by acclamation for governor, but was defeated by Silas Wright, his illustrious contemporary, Henry Clay, being vanquished at the same time in the presidential contest by James K. Polk. In 1847 Fillmore was elected comptroller of the state of New York, an office which then included many duties now distributed among other departments. In his report of 1 Jan., 1849, he suggested that a national bank, with the stocks of the United States as the sole basis upon which to issue its currency, might be established and carried on, so as to prove a great convenience to the government, with perfect safety to the people. This idea involved the essential principle of our present system of national banks.

In June, 1848, Millard Fillmore was nominated by the Whig national convention for vice-president, with Gen. Taylor, who had recently won military renown in Mexico, as president, and was in the following November, on the death of the late occupant of the office, seven vice-presidents of the United States from New York, a greater number than has been yet furnished by any other state. In February, 1849, Fillmore resigned the comptrollership, and on 5 March he was inaugurated as vice-president. In test of public opinion, South Carolina, then vice-president, established the rule that that officer had no authority to call senators to order. During the heated controversies in the sessions of 1849–50, occasioned by the application of California for admission into the Union, the vexed question of slavery in the new territories, and that of the rendition of fugitive slaves in which the most acrimonious language was used, Mr. Fillmore, in a forcible speech to the senate, announced his determination to maintain order, and that, should occasion require, he would resign the usage of his predecessors upon that point. This announcement met with the unanimous approval of the senate, which directed the vice-president's remarks to be entered in full on its journal. He presided during the exciting controversy on Clay's "omnibus bill" with his usual impartiality and so perfectly even did he hold the scales that no one knew which policy he approved excepting the president, to whom he privately stated that, should he be required to deposit a casting vote, it would be in favor of Henry Clay's bill. More than seven months of the session had been exhausted in angry controversy, when, on 9 July, 1850, the country was startled by the news of President Taylor's death. He passed away in the second year of his presidency, suddenly and most unexpectedly, of a violent fever, which was brought on by long exposure to the excessive heat of a fourth of July sun, while he was attending the public ceremonies of the day.

It was a critical moment in the history of our country when Millard Fillmore was on Wednesday, 10 July, 1850, made president of the United States. With great dignity he reduced the ceremony of his inauguration to an official act to be marked by solemnity without joy; and so with an absence of the usual heralding of trumpet and shawm, he was unostentatiously sworn into his great office in the hall of representatives, in the presence of both houses. The chief justice of the circuit court of the District of Columbia—the venerable William Cranch, appointed fifty years before by President John Adams—administered the oath, which being done, the new president bowed and retired, and the ceremony was at an end. Mr. Fillmore was then in the prime of life, possessing that which to the heathen philosopher seemed the greatest of all blessings—a sound mind in a sound body. The accompanying vignette portrait was taken at this time, while the large steel engraving is from a picture made some two years later. Of Fillmore's keen appreciation of the responsibility devolving on him we have the evidence of letters written at that time, in which he says he should despair but for his humble reliance on God to help him in the honest, fearless, and faithful discharge of his great duties. President Taylor's death was not immediately resented, and a new and exceedingly able one was selected by Mr. Fillmore, with Daniel Webster as secretary of state; Thomas Corwin, secretary of the treasury; William A. Graham, secretary of the navy; Charles M. Conrad, secretary of war; Alexander H. Stuart, secretary of the interior; John J. Crittenden, attorney-general; and Nathan K. Hall, postmaster-general. Of these, Mr. Webster died, and Messrs. Graham and Hall retired in 1852, and were respectively replaced by Edward Everett, John P. Kennedy, and Samuel D. Hubbard. Stuart of Virginia is now the sole survivor of the illustrious men who aided Mr. Fillmore in guiding the ship of state during the most appalling political tempest, save one, which ever visited this fair land. It is not the writer's wish to awaken party feelings or party prejudice, or to recall the great questions of right and moment which so seriously disturbed congress and the country in the first days of Fillmore's administration, but yet, even in so cursory a glance as we are now taking of his career, some comment must be made on his part in those public acts connected with slavery which appear to have most unreasonably and unjustly lost him the support of a large proportion of his party in the northern states. Whatever the wisdom of Mr. Fillmore's course may have been, it is impossible to doubt his patriotism or his honest belief that he was acting in accordance with his oath to obey the constitution of his country. The president's dream was peace—to preserve without hatred and

Nothing in Mr. Fillmore's presidential career was, during the closing years of his life, regarded by himself with greater satisfaction than the suppressed portion of his last message of 6 Dec., 1852. It was suppressed partly, it is true, because the majority of the then approaching crisis, and in the document now under consideration proposed a judicious scheme of rescuing the country from the horrors of a civil war, which soon after desolated so large a portion of the land. His perfectly practicable plan was one of African colonization, something similar to one seriously entertained by his successor, Mr. Lincoln. Had President Fillmore's scheme been adopted, it is quite possible that he would have been successful, and that our country might have been blessed with peace and prosperity, in lieu of the late war with its loss of half a million of precious lives and a debt of more than double the estimated cost of his plan of colonization. Mr. Fillmore retired from the presidency, 4 March, 1853, leaving the country at peace with the world. 

The surviving member of Fillmore's cabinet, who also sat in the 37th congress with him, in a communication with which the writer says: 'Mr. Fillmore was a man of decided opinions, but he was always open to conviction. His aim was truth, and whenever he was convinced by reasoning that his first impressions were wrong, he had the moral courage to surrender them. But, when he had honestly examined and had satisfied himself that he was right, no power on earth could induce him to swerve from what he believed to be the line of duty. . . . There were many things about Mr. Fillmore, aside from his public character, which often filled me with surprise. While he enjoyed none of the advantages of early association with cultivated society, he possessed a grace and polish of manner which fitted him for the most refined circles of the metropolis. You saw, too, at a glance, that there was nothing in it which was assumed, but that it was the natural outward expression of inward refinement and dignity of character. I have witnessed, on several occasions, the display by him of attributes apparently of the most opposite character. When asailed in congress he exhibited a manly self-reliance and a lofty composure; he was clearly shown how little the administration sympathized with Austria by the celebrated letter addressed to her ambassador, Hulsemann, by Daniel Webster, who died soon after. His successor as secretary of state was Edward Everett, whose brief tenure of office was distinguished by his letter declining the proposition for a treaty by which England, France, and the United States were to disclaim then and for the future all intention to obtain possession of Cuba. In his last message, however, the president expressed an opinion against the incorporation of the island with this Union.
manner as to command the applause of senators. And when advanced to the highest office of our country, he so fully fulfilled the duties he drew forth the commendation of the ablest men of the opposite party. . . . For the last two years of my official association with Mr. Fillmore," adds Mr. Stuart, "our relations, both personal and political, were of an intimate and confidential character. He knew that I was a steadfast friend, and he reciprocated the feeling. He talked with me freely and without reserve about men and measures, and I take pleasure in saying that in all my intercourse with him I never knew him to utter a sentiment or do an act which, in my judgment, would have been mortifying by his fast, age, and now bathes his last resting-place, which now rolls at yours. But the site of this city was then mainly an open field. Streets and avenues have since been laid out and completed, squares and public grounds inclosed and ornamented, until the city, which bears his name, although still a man of considerable numbers and wealth, has become quite fit to be the seat of government of a great and united people. Sir, may the consequences of the duty which you perform so auspiciously to-day equal those which flowed from his act. Nor this only; may the wisdom of your administration and the wisdom of your political conduct be such that the world of the present day and all history hereafter may be at no loss to perceive what example you made your study.

It should be stated as a part of Mr. Fillmore's public record that he was a candidate for nomination as president at the Whig convention of 1852; but although his policy, the fugitive slave law included, was approved by a vote of 227 against 60, he could not command 20 votes from the free states. Four years later, while at Rome, he received the news of his nomination for the presidency by the American party. He accepted the nomination, but before the close of the campaign it became evident that the real struggle was between the Republicans and Democrats. Many, who had supported him at Buffalo, he afterwards declared to be distinguished visitors, including Mr. Lincoln, when on his way to Washington in 1861, and frequently to preside over conventions and other public gatherings, for the control of which he was so admirably qualified by his thorough parliamentary abilities, his widely read knowledge of public affairs, and a personal urbanity which nothing could disturb; of the method and exactness, the precision

you in all sincerity that I have no desire ever to occupy that exalted station again, and more especially at that time. This." "Apropos of letters, the writer has had the privilege of perusing a collection of confidential correspondence written by President Fillmore during a score of years while in public life; and, after a most careful examination, has failed to find a single passage that would not stand the test of day, not a word of ignoble office-seeking, no paltry tricks to gain notoriety, no base designs of flattering upon public plunder.

Having thus glanced at the professional and political career of Mr. Fillmore, it now only remains to allude very briefly to his private life from 1838 onward. "The circles of our felicities make short arrows." Who shall question the wise axiom of Sir Thomas Browne, the brave old knight of Norwich, a favorite author with the president? Three weeks after the close of his administration he sustained a severe affliction in the loss of his wife, Abigail Powers, the daughter of a clergyman, whom he married 5 Feb., 1836, and who was emphatically his husband's "right-hand." She had long been a sufferer from ill health and was looking forward most eagerly to a return to her old home, where she was taken away to those temples that made with him. Irving says that she received her death-warrant while standing by his side on the cold marble terrace of the capitol, listening to the inaugural address of Mr. Fillmore's successor. To this Christian lady the White House is indebted for the books which to-day make the library one of the most attractive rooms in the presidential mansion. In the following year their only daughter, who had grown to womanhood, also passed away, leaving the memory precious to all who had the privilege of her acquaintance. His home now lonely from the loss of persons who spread around it sunshine and happiness, induced Mr. Fillmore to carry out a long-cherished project of his administration and publish his "Old World," and in May, 1855, he sailed in the steamer "Atlantic." During this visit to England he received numerous and gratifying attentions from the queen and her cabinet ministers, and was proffered the degree of D. C. L. by the University of Oxford, through its chancellor, the late Earl of Derby. This honor he however declined, as did Charles Francis Adams a few years later.

We can not dwell as we could wish on Mr. Fillmore's patriotic attitude during the early years of the late war; of his warm interest in all the charitable Christian work of the city in which he passed nearly half a century; of his establishing the Buffalo historical society; how, as the first citizen of Buffalo, he extended hospitality to welcome distinguished visitors, including Mr. Lincoln, when on his way to Washington in 1861, and frequently to preside over conventions and other public gatherings, for the control of which he was so admirably qualified by his thorough parliamentary abilities, his widely read knowledge of public affairs, and a personal urbanity which nothing could disturb; of the method and exactness, the precision
and punctuality, with which he conducted his private affairs, as in earlier years he had performed his professional and public duties; of another visit to Europe in 1868, accompanied, as well as in his second marriage, to Caroline C. McIntosh, who survived him for seven years; of his manner of life in dignified retirement, surrounded by all the comfort and luxuries of a beautiful landscaped mansion, including a large library, and with an attached wife to share his happy home (see accompanying illustration). In a letter written to his friend Mr. Corcoran, of Washington, a few weeks before the inevitable hour came, he remarks: "I am happy to say that my health is perfect. I eat, drink, and sleep as well as ever, and take a deep but silent interest in public affairs, and if Mrs. Fillmore’s health can be restored, I should feel that I was in the enjoyment of an earthly paradise." The ex-president accepted an invitation to meet the surviving members of his cabinet and a few other valued friends at the residence of Mr. Corcoran. The month of January, 1874, was designated as the date of the meeting, but was afterward changed to April, by Mr. Fillmore’s request. Before that time he was no longer among the living. After a short illness, at ten minutes past eleven o’clock, on Sunday evening, 8 March, Millard Fillmore "Gave his honors to the world again, His blessed part to heaven, and slept in peace." He was gathered to his fathers at the ripe age of seventy-four years, and passed away without the knowledge that his former partner, Judge Hall, with whom he had been so long and so closely united in the bonds of friendship, as well as in professional and political life, had also, a few days previous, rested from his labors, and was then lying in the Forest Hill cemetery, where the ex-president now sleeps by his side.

Among the chief magistrates of our country there appear more brilliant names than Fillmore’s, yet none who more wisely led on the nation to progress and prosperity, making her name great and preserving peace in most perilous times, without invoking the power of the sword, or one who could more truly say: "These hands are clean." Without being a genius like Webster or Hamilton, he was a safe and sagacious statesman. He possessed a mind so nicely adjusted and well balanced that he was fitted for the fulfillment of any duty which he was called to perform. He was always ready to use a word of advice but once given. A single public act honestly and unflinchingly performed cost him his popularity. Posterity, looking from a distance, will perhaps be more just. All his acts, whether daily and common or deliberate and well-considered, were marked with modesty, justice, and sincerity. What Speaker Ossoln said of Sir Robert Walpole was equally true of President Fillmore. "He was the best man from the goodness of his heart, to live with and under, of any great man I ever knew." His was an eminently kindly nature, and the last time the writer saw him, in 1873, he was in the liberal hand, the necessities of an old and unfortunate friend. He was a sound, practical Christian "without knowing it," as Pope remarked of a contemporary. His temper was perfect, and it was doubtful if he knew of his "inner life less in dignity than in life," as Frederick the Great announced with energy that "Peter the First of Russia, to govern his nation, worked upon it like aquafortis upon iron." Fillmore, to win his way, like Lincoln and Garfield, from almost hopeless poverty to one of the most eminent positions of the world, shone in a brilliant career. He was often working for weeks and months together, till long past midnight, which happily his powers of physical endurance permitted him to do with impunity, and affording a fine illustration of the proud boast of our country, that its loftiest honors are the legitimate objects of ambition to the humblest in the land, as well as to those favored by the gifts of fortune and high birth. See Chamberlain’s "Biography of Millard Fillmore" (Buffalo, 1856); Benton’s "Abridgment of the Debates of Congress from 1789 to 1856," vol. xvi. (New York, 1861); Thomas’s "The Federal Administrations" (Indianapolis, 1873); Von Holst’s "Constitutional and Political History of the United States," vol. iv. (Chicago, 1889).

FILSON, John, explorer, b. in Chester county, Pa., in 1747; d. in Ohio, in October, 1784. He was an early explorer in the northern counties, and before he was thirty-seven had traversed the territory now occupied by the states of West Virginia, Kentucky, Ohio, Illinois, Indiana, Tennessee, Mississippi, and Louisiana. After spending several years in Kentucky seeking information from the history of the country, he purchased from Mathias Denman a one-third interest in the site of Cincinnati, which he called Losantville, a name formed by Filson from the Latin "os," mouth, the Greek "anti," opposite, and the French "ville," city, from its position opposite the mouth of the Licking river. While exploring the country between this place and the Great Miami, he disappeared, 1 Oct., 1788, having been killed, it is supposed, by hostile Indians. After his disappearance his interest in the site of Cincinnati was transferred by his partners, Denman and Johnson, to their agent, William Herd. His heirs never reaped any benefit from the subsequent increase in the value of the land. Mr. Filson was the author of "The Discovery, Settlement, and Present State of Kentucke" (Wilmington, Del., 1784; London, 1789; Paris, 1790); "A Map of Kentucky" (Philadelphia, 1784); and "A Topographical Description of the Western Territory of North America," in association with George Imlay (1789). He also left in manuscript "A Diary of a Journey from Philadelphia to Vincennes, Ind., in 1785"; "An Account of a Trip by Land from Vincennes, Ind., to Louisville, Ky., in 1785"; "A Journal of Two Voyages by Water from Vincennes to Louisville," and an account of an attempted voyage in 1786. See "Life and Writings of John Filson," by R. T. Durrett (Louisville, 1884).
was treasurer of the U. S. mint at Philadelphia.—
His brother, Thomas James, soldier, b. in Mersburg, Pa., about 1772; d. in Cincinnati, Ohio, 28 Dec., 1835, removed to Cincinnati in 1798, was a member of the territorial legislative council in 1798, and after the admission of Ohio to the Union was often in the legislature. He served under Gen. William Hull at Detroit in the war of 1812, his colonel of the 2d Ohio regiment. He was U. S. receiver of public moneys for the Cincinnati district from the first establishment of public land offices till 1824, and was then elected to congress as a Jackson Democrat, and served four terms, 1825–33. 

FINCH, Francis Miles, poet, b. in Ithaca, N. Y., 9 June, 1827. He was graduated at Yale in 1849, studied law, and was admitted to the bar in Ithaca. In 1881 he was elected an associate judge of the court of appeals of the state of New York. On the establishment of Cornell University, he was chosen secretary of its board of trustees. In July, 1853, he read a poem at the centennial celebration of the Linonian society of Yale, in which several lyrics were introduced, including one on Nathan Hale, the patriot spy of the Revolution. This was achieved with wide popularity. He has also written other well-known lyrics, including "The Blue and the Gray," and a college smoking-song, beginning "Floating away like the fountain's spray."

FINCH, Henry Theophilus, journalist, b. in Bethel, Shelby co., Mo., 25 Sept., 1864. He was graduated at Harvard in 1877–8, and received a resident graduate at Cambridge, as student of sociology. The Harris fellowship having been awarded to him, he studied physiological psychology at Berlin, Heidelberg, and Vienna from 1878 till 1881. He is on the editorial staff of the New York "Evening Post" and "Nation," his chief writings being musical criticisms, which are characterized by a strong leaning toward the Wagnerian school. He has published a philosophical work entitled "Romantic Love and Personal Beauty" (New York and London, 1887), and a collection of musical essays entitled "Wagner and other Musicians" (1887). He has contributed to periodicals papers on the "Development of the Color Sense" and the "Gastronomic Value of Odors."

FINLAY, William, governor of Pennsylvania, b. at Mercersburg, Pa., 20 June, 1805; d. Harrisburg, Pa., 12 Nov., 1846. After receiving a common-school education, he became a farmer, and early took part in politics as a Democrat. His first office was that of brigade-inspector of militia. He was elected to the legislature in 1836 and 1838, and in 1807–17 was state treasurer. He was governor from 1817 till 1820, and in the latter year was an unsuccessful candidate for re-election. Party spirit ran high during his administration, and in 1817 his opponents secured the appointment of a committee to investigate the late treasurer's conduct of his office. This investigation was conducted through Gov. Findlay offered no witness in his behalf, resulted in a report that his conduct had been "not only faithful, but meritorious and beneficial to the state." The building of the state capitol was begun during Gov. Findlay's administration, and this corner-stone was laid by him. He was elected to the U. S. senate in 1821, and served one term, and in 1827–40

FINDLEY, William, governor of Pennsylvania, b. at Mercersburg, Pa., 20 June, 1805; d. Harrisburg, Pa., 12 Nov., 1846. After receiving a common-school education, he became a farmer, and early took part in politics as a Democrat. His first office was that of brigade-inspector of militia. He was elected to the legislature in 1836 and 1838, and in 1807–17 was state treasurer. He was governor from 1817 till 1820, and in the latter year was an unsuccessful candidate for re-election. Party spirit ran high during his administration, and in 1817 his opponents secured the appointment of a committee to investigate the late treasurer's conduct of his office. This investigation was conducted through Gov. Findlay offered no witness in his behalf, resulted in a report that his conduct had been "not only faithful, but meritorious and beneficial to the state." The building of the state capitol was begun during Gov. Findlay's administration, and this corner-stone was laid by him. He was elected to the U. S. senate in 1821, and served one term, and in 1827–40 was treasurer of the U. S. mint at Philadelphia.—
His brother, James, soldier, b. in Mersburg, Pa., about 1772; d. in Cincinnati, Ohio, 28 Dec., 1835, removed to Cincinnati in 1798, was a member of the territorial legislative council in 1798, and after the admission of Ohio to the Union was often in the legislature. He served under Gen. William Hull at Detroit in the war of 1812, his colonel of the 2d Ohio regiment. He was U. S. receiver of public moneys for the Cincinnati district from the first establishment of public land offices till 1824, and was then elected to congress as a Jackson Democrat, and served four terms, 1825–33. 

He was the grandson of the Confederate president, governor of Ohio in 1824.—Another brother, John, d. in Chambersburg, Pa., 5 Nov., 1888, was a member of congress from Pennsylvania in 1821–7.—William's son, John King, jurist, b. near Mersburg, Pa., 13 May, 1803; d. in Spring Lake, N. J., 13 Sept., 1885, was graduated at the U. S. military academy in 1842, and assigned to the 1st artillery. He was assistant professor of chemistry, mineralogy, and geology at West Point from 29 Aug. till 4 Nov., 1824, of geography, history, and ethics till 17 April, 1825, and was on topographical duty till 13 May, 1828, when he was admitted to the Pennsylvania bar. He was recorder of Lancaster in 1841–5, judge of the Philadelphia district court in 1843–51, and president of the 3d judicial district of Pennsylvania in 1857–62. After this he practised his profession in Philadelphia. Judge Findley, whose name is familiar in the area of music, is a man of wide knowledge and is a fluent speaker. He published a "Review of the Funding System" (1784); "History of the Insurrection of the Four Western Counties of Pennsylvania" (Philadelphia, 1799); and several pamphlets on matters of political interest. 

FINDLEY, William, politician, b. in the north of Ireland about 1750; d. in Unity township, Westmoreland co., Pa., 5 April, 1821. He came to Pennsylvania in early life, served in the Revolution, and at its close removed to the western part of the state, where he soon became active in politics. He was a member of the legislature and of the State convention that adopted the Federal constitution, which he actively opposed as a step toward centralization. He was an able speaker. He published a "Review of the Funding System" (1784); "History of the Insurrection of the Four Western Counties of Pennsylvania" (Philadelphia, 1799); and several pamphlets on matters of political interest. 

FINDLEY, William, clergyman, b. in West Middletown, Pa., 2 June, 1814. He was removed with his parents to Ohio in 1824, was gradu-
ated at Franklin college, Ohio, in 1839, and was licensed to preach in the Associate Reformed church on 12 June of that year. He has held pasto-

torates at Chillicothe, Logan, and Xenia, Ohio, and Newark, N. J., and in 1867-8 edited the "Family Treasure," published in Cincinnati.

He has published about twenty sermons.—His brother, Samuel, educator, b. in West Middletown, Pa., 26 Oct., 1818, was graduated at Franklin college, Ohio, in 1840, was principal of Chillicothe college in 1840-5, and was professor in the Western military academy, Dayton, Ohio, in 1855-70, and has held various pastorates. Dr. Findley is a corresponding member of the American entomological society, and has published "Rambles among the Insects" (Philadelphia, 1878).

FINK, Albert, civil engineer, b. near Frank-fort-on-the-Main, Germany, 27 Oct., 1827. He was graduated at the Polytechnic institute, Darmstadt, in 1848, where he studied architecture, and emi-
grated to this country in 1849. He soon found employment as draftsman in the service of the Baltimore and Ohio railroad, and became chief office assistant of Benjamin B. Haley. In this capacity he had the superintendence of the design and construction of buildings and bridges. That portion of the road between Cumberland and Wheeling being then in process of construction, Mr. Fink designed and supervised the building of the first important iron bridges in this country, that over the Monongahela river and the viaduct over Troy Run. After this portion of the road was completed, the section from Grafton to Parkersburg was begun, and many of the bridges and tunnels were built under his supervision. During this time Mr. Fink was also consulting engineer of the Norfolk and Petersburg railroad, then building, and designed the bridge at Norfolk. In 1857 he left the service of the Baltimore and Ohio road, and became assistant to Geo. McLeod, chief engineer of the Louisville and Nashville railroad. While connected with the latter corporation he built the Green river bridge, that over the Cumberland at Nashville, and the great bridge over the Ohio at Louisville. During the civil war he served as chief engineer and superintendent of the road and military department. During this period bridges were destroyed, connections severed, and the op-

erating force kept constantly on the alert to guard against disaster and repair the gaps. The money loss involved by these depredations, the damage caused by which Mr. Fink was called upon to make good, was estimated at not less than $200,450. In 1865 he was made general manager, and in 1870 elected vice-president. The financial crisis of 1878 led him to study the question of the cost of transporting the coal, and he subsequently issued two pam-

plets on the subject. About the same time he gave his mind the necessity for a remedy, and suggested the possibility of cooperation instead of warfare on the part of rival corporations. This led him to de-

vise his plan for the creation of the Southern rail-

way and steamship association, which was adopt-

ed. In October, 1875, Mr. Fink resigned the office of vice-president and general manager of the Louisville and Nashville road, and undertook the organization and management of the above-named association, with the title of "general commis-
sioner." In June, 1877, he set out on a visit to his native land. Arrived in New York, he was waited on by Messrs. Vanderbilt, Jewett, Scott, and Garrett, presidents of the four great trunk-

lines of railway, who requested that he should re-

main in New York and attempt the organization of a "pool" of the west-bound traffic of these roads, on the plan of a division of tonnage, which he had succeeded in putting into operation in the south. Mr. Fink accordingly accepted the commission-

ship of the trunk-lines, and has been able to effect a complete revolution in the traffic management of the more important American railways.

FINK, Frederick, artist, b. in Little Falls, N. Y., 18 Dec., 1817; d. in 1849. He studied medi-
cine in Albany, but became a merchant, and after-

ward studied painting with Samuel F. B. Morse, and later in Europe. He painted a num-

ber of excellent genre pictures, the most notable of which are "The Artist's Studio," "The Shipwrecked Mariner," and "The Negro Wood-Sawyer."

FINK, Michael (in religion, Louis Maria), R. C. bishop, b. in Triest, Bavaria, in 1824. He studied in the Latin school and gymnasium of Ratisbon, and came to the United States in 1852. He joined the order of St. Benedict shortly after-

ward, and made his profession in the abbey of St.

Vincent, Westmoreland county, Pa., in 1854. He finished his theological studies in 1859, and was ordained priest. He was then stationed at Belle-

fonte, Pa., and at Newark, N. J. He was next sent to Covington, Ky., where he established a convent of Benedictine nuns, and built a church. He then went to Chicago as pastor of St. Joseph's church, and from 1868 to 1875. While connected with the latter corporation he built the Green river bridge, that over the Cumberland at Nashville, and the great bridge over the Ohio at Louisville. During the civil war he served as chief engineer and superintendent of the road and military department. During this period bridges were destroyed, connections severed, and the op-

erating force kept constantly on the alert to guard against disaster and repair the gaps. The money loss involved by these depredations, the damage caused by which Mr. Fink was called upon to make good, was estimated at not less than $200,450. In 1865 he was made general manager, and in 1870 elected vice-president. The financial crisis of 1878 led him to study the question of the cost of transporting the coal, and he subsequently issued two pamphlets on the subject. About the same time he gave his mind the necessity for a remedy, and suggested the possibility of cooperation instead of warfare on the part of rival corporations. This led him to devise his plan for the creation of the Southern railway and steamship association, which was adopted. In October, 1875, Mr. Fink resigned the office of vice-president and general manager of the Louisville and Nashville road, and undertook the organization and management of the above-named association, with the title of "general commissioner." In June, 1877, he set out on a visit to his native land. Arrived in New York, he was waited on by Messrs. Vanderbilt, Jewett, Scott, and Garrett, presidents of the four great trunk-lines of railway, who requested that he should remain in New York and attempt the organization of a "pool" of the west-bound traffic of these roads, on the plan of a division of tonnage, which he had succeeded in putting into operation in the south. Mr. Fink accordingly accepted the commissionership of the trunk-lines, and has been able to effect a complete revolution in the traffic management of the more important American railways. He painted a number of excellent genre pictures, the most notable of which are "The Artist's Studio," "The Shipwrecked Mariner," and "The Negro Wood-Sawyer."
FINLEY. Jesse Johnson, senator, b. in Wilson county, Tenn., 18 Nov., 1812. He was educated at Lebanon, Tenn., and in 1839-7 was captain of a company of volunteers from Tennessee that served in the Seminole war in Florida. On his return he studied law, was admitted to the bar in 1838, and in 1840 removed to Mississippi county, Arkansas, where he was elected to the state senate in 1841. The following year he resigned and went to California to practice law. He was elected mayor in 1845, and after the expiration of his term of office in 1846 removed to Marianna, Jackson co., Fla. In 1850 he was elected to the state senate, and in 1852 was presidential elector on the Whig ticket. In 1853 he was appointed judge of the western circuit of Florida to fill a vacancy, and was subsequently elected to the same office for two terms without opposition. He was appointed judge of the Confederate court for the district of Florida in 1861, but resigned in March, 1862, and volunteered as a private in the army. He was promoted to captain in the cavalry, and promoted to brigadier-general. At the close of the war Judge Finley went to Lake City, Fla., and in 1871 removed to Jacksonville in the same state. He was then elected to congress as a Conservative Democrat, and served in 1875-9. In 1890 he was nominated for his own state and took his seat, but was subsequently unseated by the rival candidate. In March, 1887, he was selected by the governor to supply the vacancy in the United States senate that had been occasioned by the expiration of the term of Charles W. Jones, until a choice could be made by the legislature.

FINLEY, John, poet, b. in Brownsburg, Rockbridge co., Va., 11 Jan., 1797; d. in Richmond, Ind., 20 Dec., 1806. He received a common-school education, removed about 1818 to Cincinnati, Ohio, and in 1823 to Richmond, Ind. He was one of the editors and proprietors of the Richmond "Palladium" in 1831-4, a member of the legislature for three years, and enrolling clerk of the state senate for an equal period. He was clerk of the Wayne county courts in 1825-45, and mayor of Richmond from 1832 till his death. Mr. Finley's poems were collected in a volume entitled "The Hoosier's Nest and Other Poems" (Cincinnati, 1865). The best known of these is "Bachelor's Hall."

FINLEY, Robert, clergyman, b. in Princeton, N. J., in 1772; d. in Athens, Ga., 9 Oct., 1817. His father, James Finley, came to this country from Scotland in 1769. Robert was graduated at Princeton in 1787, and taught until 1793, when he became a tutor in the college, studying theology at the same time. He was licensed to preach on 16 Sept., 1794, and on 16 June, 1795, was ordained pastor of the Presbyterian church at Baskingridge, N. J., where he also conducted a successful school. In 1815 he suggested the formation of Bible-classes throughout the church, and his plan was recommended by the general assembly. He had been for some time a member of the American Colonization society, and in January, 1817, he established an auxiliary society in New Jersey. In July, 1817, he became president of Franklin college, Athens, Ga. He was a trustee of Princeton from 1806 till he resigned, in 1817, on his departure for Georgia, and, in accepting his resignation, the college gave him the degree of D. D. Dr. Finley was a man of decision and energy, and held high rank as a preacher. Besides several sermons, he published "Thoughts on the Colonization of the Free Blacks," a pamphlet that aroused public interest in the enterprise (1816).—His son, Robert Smith, clergyman, b. in Baskingridge, N. J., 9 May, 1804: d. in Talladega, Ala., 2 July, 1880, was graduated at Princeton in 1821, studied law, and was admitted to the bar in Cincinnati, but abandoned the profession for the ministry, and was ordained as a Presbyterian clergyman in 1842. He was for some time a missionary among the slaves near Natchez, Miss., and edited for six years, in St. Louis, the "Liberian Advocate," a journal devoted to his father's scheme of colonization. He was pastor at Metuchen, N. J., in 1849-51, and in the latter year became principal of the Presbyterian female institute at Talladega, Ala.

FINLEY, Robert W., clergyman, b. in Bucks county, Pa., 9 June, 1756; d. in Germantown, Ohio, 8 Dec., 1844. His mother, who had some acquaintance with medicine, attended wounded soldiers during the Revolutionary war, and ministered to them with her own hand. Robert received a classical and theological education at Princeton, being licensed to preach as a Presbyterian, and in 1777 volunteered to go as a missionary to the new settlements in the Carolinas and Georgia. During this time Mr. Finley, who was an earnest patriot, was often with Gen. Marion in his expeditions, and narrowly escaped death at the hands of Tories in the partisan warfare then raging in that part of the district. He removed to Virginia about 1784, and two years later to Ohio, and in 1788 to Kentucky, where, after suffering from the depredations of wolves and savages, he finally settled in Bourbon county. Here, besides preaching to two congregations, he conducted a classical school, said to have been the first in that county, and in Kentucky, where he labored as a circuit preacher near Chillicothe, Ohio, in 1796, and in 1808 became a Methodist, joining the Ohio conference as an itinerant preacher about 1812. He labored for years with great success, and, when almost eighty years old, set off on horseback, as a missionary, for Sault Ste. Marie, where he formed a new circuit and opened a camp-meeting.—His son, James Bradley, clergyman, b. in North Carolina, 1 July, 1781; d. in Cincinnati, Ohio, 6 Sept., 1856, was educated by his father, entered the Ohio Methodist conference in 1806, and in 1816-21 was presiding elder of the Steubenville, Ohio, and Lebanon districts. He was a missionary to the Wyandot Indians in 1821-7, and retained the superintendency of the mission till 1828, subsequently continuing in the itinerant ministry till 1845, when he became chaplain of the Ohio penitentiary. He retained this office till 1840, and then served as conference missionary and pastor in southern Ohio till his death. His principal publications are "History of the Wyandot Mission" (Cincinnati, 1840); "Memorials of Prison Life" (1840); "Autobiography," edited by Rev. W. P. Strickland and proving "The Most Simplified Methodism" (1844); and "Personal Reminiscences Illustrative of Indian Life" (1857).—Another son, John P., educator, b. in South Carolina, 13 June, 1783; d. 8 May, 1825, removed with his parents to the west, was educated by his father, and in 1810-22 pastored the school at Canton and also preached with success. He was given the chair of languages in Augusta college, Ky., in 1822, and in 1823 became an itinerant minister of the Methodist Episcopal church.
FINLEY, Samuel, educator, b. in County Armagh, Ireland, in 1715; d. in Philadelphia, Pa., 17 July, 1786. His parents, who were of Scottish extraction, gave him a good education in his native country, and in 1734 he came to Philadelphia and studied for the ministry, which he had from childhood determined to enter. He was licensed to preach on 8 Aug., 1740, ordained by the New Brunswick presbytery, 13 Oct., 1744, was sent into Milford, Conn., "with allowance that he also preach for other places thereabout when Providence may open a door for him." Taking advantage of this permission, he accepted an invitation to preach to the "second society" in New Haven; but, as this society was not recognized by the authorities, he was arrested, under a law forbidding itinerants to preach in any parish without the regular pastor's consent, indicted by the grand jury, tried, and sentenced to be carried out of the colony as a vagrant. In June, 1744, Mr. Finley settled as pastor of a church, at Nottingham, N. J., where he remained seventeen years conducting an academy, which acquired great reputation, and at which he prepared many young men for the ministry. In July, 1761, he was chosen to the presidency of Princeton, to succeed Samuel Davies, and the college prospered under his administration. John Witherspoon, of Glasgow, gave him the degree of D. D., the first instance in which this honor was conferred on an American Presbyterian clergyman. Dr. Finley corresponded largely with eminent men in this country and Europe, and, though he published nothing but sermons, he was an able writer. His discourse, "On the Death of President Davies" (1761) was afterward prefixed to an edition of the latter's works. His nephew, Samuel, soldier, b. in Westmoreland county, Pa., 15 April, 1732; d. in Philadelphia, Pa., 3 April, 1796, was his uncle, President Finley, and settled in Martinsburg, Va. He served with distinction in the Virginia cavalry during the Revolution, and rose to the rank of major. The last three years of the war he spent as a prisoner on Long Island. Gen. Washington, whose personal friend he was, appointed him receiver of public moneys in the northwest, and he went, about 1796, to what is now Chillicothe, Ohio, where he had been given large tracts of government land for his services in the Revolution. During the war of 1812-15 he served as a general in the army, being a true winner of light-horse against the border Indians, who were considered allies of the British. His brother, John, also a major in the Continental army, afterward became an Indian trader, and in 1767, two years before Daniel Boone went to Kentucky, made a tour through that region, and brought back such glowing accounts that Boone was induced to settle there. He was one of the earliest settlers in the "Blue Licks" of Kentucky. —Clement Alexander, son of the younger Samuel, surgeon, b. in Newville, Cumberland co., Pa., 11 May, 1797; d. in Philad., 18 July, 1822, was educated at Dickinson college, Pa., and received his medical degree from the University of Pennsylvania in 1818. He entered the army on 10 Aug. of that year as surgeon's mate of the 1st infantry, became assistant surgeon, 1 June, 1821, and surgeon, with the rank of major, 13 Nov., 1821. He was medical director of the field, with Gen. Jesup, Gen. Scott, and Gen. Taylor, in the Black Hawk, Seminole, and Mexican wars, and spent nearly eight years on the frontier of Arkansas, Louisiana, and Florida. Dr. Finley was with the relief parties, and was at Pensacola, Leavenworth, Fort Gibson, and Jefferson Barracks, and in 1884 accompanied Gen. Henry Dodge on one of the earliest expeditions to the Rocky mountains. He was made surgeon-general of the army, 13 May, 1831, and continued in this office until 1846, when he retired from active service on his own application. He was brevetted brigadier-general on 18 March, 1865, "for long and faithful service," and in 1876 was granted the retired pay of a full brigadier-general. —Clement Alexander's niece, Martha, author, b. in Chillicothe, Ohio, 26 April, 1828, went with her father. Dr. James B. Finley, to Circleville, Ohio, about 1829, and in 1836 to South Bend, Ind., where she was educated. After his death in May, 1851, she taught for several years, writing for the press in the evenings and holidays. Her first effort was a short newspaper story published in New York in 1854. Miss Finley left Indiana in 1858, and lived in Philadelphia most of the time till 1876, when she removed to Elkton, Md. Under the pen-name of "Martha Parquharrow" (the Gaelic translation of her surname), she has written "Elsie Dinsmore" (New York, 1868), with several sequels, the last of which is "Elsie's Kith and Kin" (1886); "Casella; or, The Children of the Valleys" (Philadelphia, 1869); "An Old-Fashioned Boy" (Philadelphia, 1871), with its sequel, "Our Fred" (New York, 1874); and "Dinty, a Pedigree" (Philadelphia, 1872); "The Mildred Sarsfield" (New York, 1878-80); "The Thorn in the Nest," a novel (New York, 1886); and about sixty volumes of Sunday-school books, including the "Do-Goood Library" (9 folks., Philadelphia, 1888) and the "Pewit's Nest Series" (12 folks., 1864-76). FINN, Henry J., actor, b. in New York city in 1782; d. on Long island sound, 18 Jan., 1840. He received his early education at schools in New Jersey, and studied at Princeton. Thereafter he began the study of law in New York city. He appeared on several occasions in London, occasionally as an actor of small parts, at the old Park theatre. At this time his father died, and, as his mother was impoverished, she and her son set sail for England. In London, Finn at first was a teacher, cultivated a taste for painting, and joined a company of travelling players. Eventually his ability procured him an engagement at the London Haymarket theatre. In 1811 he appeared in Montreal, and thereafter played at other places, being in Savannah, Ga., in 1818-20. During the latter year he was for a brief period co-editor of the "Georgian." In 1821 the actor went again to London, appearing in dramas at the Surrey theatre, and practising the art of miniature painting for a livelihood. In 1822 he once more returned to his native land. He appeared as an actor in Boston, where for years he was a manager and performer. In Boston he set up, successfully, for a wit and punter in the manner of Thomas Hood, and relinquished heroic parts for comic and eccentric characters. Among these new assumptions were Paul Fry, Billy Black, Mawworm, and Dr. Pangloss. For ten years afterward his time was devoted to starring tours in large cities, and monologue variety entertainments in smaller places. He accumulated a handsome competence. Returning toward his Newport home, where he was proprietor of a straw-hat factory, he was lost on the steamer "Lexington," which was wrecked on Long Island sound. He left behind him a wife and twelve children. Finn wrote several dramas that were successfully produced but never published. His "Comic Annuals" were favorably received, but their witisms, puns, and sayings, being largely imitative, have perished. FINNEY, Charles, Presbyterian clergyman, b. in Warren, Litchfield co., Conn., 29 Aug., 1792; d. in Oberlin, Ohio, 16 Aug., 1875. He removed with
his father to Oneida county, N. Y., in 1794, and when about twenty years old engaged in teaching in New Jersey. He began to study law in Jefferson county, N. Y., in 1818, but, having been converted in 1821, studied theology, was licensed to preach in the Presbyterian church in 1826, and began to labor as an evangelist. He met with great success in Utica, Troy, Philadelphia, Boston, and New York. On his second visit to the last city, in 1832, the Chatham street theatre was bought and made into a church for him, and the New York "Evangelist" established as an advocate of the revival. His labors were resulted in the establishment of seven "free Presbyterian" churches, and in 1884 he became pastor of the Broadway Tabernacle church in Philadelphia, built especially for him. Mr. Finney accepted, in 1833, the professorship of theology at Oberlin, which had just been founded by his friends and retained it until his death. Here he assisted in establishing the "Oberlin Evangelist," and afterward the "Oberlin Quarterly." He also became pastor of the Congregational church in Oberlin in 1837, but continued at intervals to preach in New York and elsewhere. He spent three years in England as a revivalist, in 1849-51 and 1858-60, adding to his reputation for eloquence, and in 1851-66 was president of Oberlin. Prof. Finney relied greatly on doctrinal preaching in his revivals, as opposed to animal excitement, and his sermons were plain, logical, and direct. He was an Abolitionist, an anti-slaver, and an advocate of total abstinence. His chief works are "Lectures on Revivals," which have been translated into several foreign languages (Boston, 1833; 12th ed., 1840; enlarged ed., Oberlin, 1866); "Lectures to Professing Christians" (Oberlin, 1866); "Sermons on Important Subjects" (New York, 1839); and "Lectures on Systematic Theology" (2 vols., Oberlin, 1847; London, 1851). After his death were published his "Memoirs," written by himself (New York, 1876).

FINOTTO, Joseph M., author, b. in Ferrara, Italy, in 1817; d. in Denver, Colo., in 1889. He studied with a view of entering the Austrian army, but afterward changed his plans and entered the Jesuit college, Rome. He joined the Jesuit order and, on the completion of his theological studies, came to the United States in 1845. He was ordained priest and stationed at St. Mary's church, Alexandria, Va., where he had charge of an extensive mission both in Virginia and in Maryland. He built St. Ignatius's church, in Prince George county, Md. He left the Jesuit society in 1852 and went to Boston, where he became a member of the bishop's household and literary editor of the Boston "Pilot." He was also pastor of the Brookline and other missions, and established the Catholic cemetery of Holyhood. His health failing, he was sent to St. Mary's seminary, Cincinnati, whence he went to Omaha, and finally to Central City, Colo., in 1877, and had charge of that parish up to the time of his death. His principal works are a "French Grammar," published in Italy; "A Month of Mary" (1853); "Life of Blessed Paul of the Cross" (1860); "Italy in the Fifteenth Century"; "Diary of a Soldier" (1861); "The French Zouave" (1868); "Herman the Pianist" (1868); "The Spirit of St. Francis of Sales" (1886); "Works of the Rev. Arthur O'Leary"; and "Life of Blessed Peter Claver." His most important work, never completed, was "Theatrum Americana." He published one volume of it in 1872.

FIRM, Joseph L., inventor, b. in Williamsburg, N. Y., 19 March, 1837. He was educated in the public schools, served an apprenticeship in the press-room of Harper Brothers, and in 1859 was engaged in the manufacture of type. Since that date his connection with the house has been continuous. He has devoted much time to improvements in printing machinery, and invented and secured patents on perfecting presses, web perfecting presses, and paper-folders. He is also the inventor of a process of printing on glass from electrotype plates, in colors or otherwise.

FIRMIN, Giles, author, b. in Suffolk county, England, in 1615; d. in Ridgwell, Essex, England, in April, 1697. He entered Cambridge university in 1625, but left before taking his degree. In 1633 he came to the United States, and in 1634 settled in Boston. He returned to England before October 1633. In 1637 he again crossed the sea, and was employed, with John Higginson, to take notes of the proceedings of the synod in that year. He returned to Boston, settled at Ipswich, and died in 1651. He married the daughter of the Rev. Nathaniel Ward, and was clerk of the town of Ipswich. He sailed for England in 1644, but was wrecked off the coast of Spain, and did not reach his destination till the following summer. In 1646 he lived at Chesterton, and in 1649 was settled as pastor at Shalford. He was dismissed by the congregation there in 1662, and afterward practised medicine and preached at Ridgwell. He was the author of many published sermons and theological treatises. His most important work was "The RealChristian" (1690), several times reprinted in England and once in Boston, Mass. See a memoir by John W. Dean (Boston, 1866).

FISH, Asa Israel, lawyer, b. in Philadelphia, Pa., in February, 1829; d. there, 5 May, 1878. He was graduated at Harvard in 1842, studied law at the law-school of Rev. J. W. Young, and was admitted to the bar in Philadelphia in 1846, and began practice in that city. From 1853 till 1862 he was one of the editors of the "American Law Register." Among his many contributions to legal literature are notes to "Touland and Haly's Practice," "Coll's Practice," "Selwyn's Nisi Prius," and "Williams on Executors and Administrators." He was well known as a Shakespearian scholar.

FISH, Benjamin, engineer, b. near Trenton, N. J., in 1755; d. in Trenton, 22 June, 1880. In 1812, during the war with England, he was employed in transporting commissary and ordnance stores for the government. During the construction of the first railroads in the United States he undertook to connect New York and Philadelphia by rail. It is related concerning his management of the line that he gave four months' notice, sent to the manufacturer of the locomotive, and then sent out a locomotive to look for it, and that once, when asked by a conductor how long he should wait, his answer was, "Wait, sir, till you learn something." Mr. Fish was largely interested in various railroad and canal enterprises. He represented the town of Trenton in the New Jersey legislature in 1833.

FISH, Henry Clay, clergyman, b. in Halifax, Va., 27 Jan., 1820; d. in Newark, N. J., 2 Oct., 1877. His father was a Baptist clergyman. The son studied at an academy, taught for two years in
Massachusetts, and then entered the Union theological seminary in New York, where he was graduated in 1845. On the following day he was ordained pastor of the Baptist Church at Somerville, N. J., and remained there till January, 1851, when he entered on the pastorate of the 1st Baptist church in Newark, N. J. In 1858 the degree of D. D. was conferred on him by the Union College at Rochester, N. Y. At the beginning of the civil war he actively supported the National government, spread the flag of the United States on his altar, and caused the National anthem to be sung in his church services. On 1 June, 1864, he was drafted into the military service, and, determining at once to go to the field, he notified the officers of the church to that effect. He was persuaded with great difficulty to relinquish his purpose, and allow a substitute to be sent in his stead. He was a man of great industry, and was actively engaged in advancing the interests of his denomination and mission. He also did much by his writings to popularize life insurance. Beside a large number of tracts and sermons, he was the author of "Primitive Piety Revived," a prize essay (1855; Dutch translation, Utrecht, 1860); "Soul Liberty, and Who Paid it" (1860); "Harry's Confessions" (1863); "Harry's Conflicts" (1872); "Hand-book of Revivals" (1874); and "Bible Land Illustrations" (1876). Among his numerous compilations, abounding with annotations, are "History and Repository of Pulpit Eloquence" (1856); "Pulpit Eloquence of the Nineteenth Century" (1857); "Select Discourses translated from the French and German" (1858); and "Heaven in Song" (1874).

FISH, Melanthon Williams, physician, b. in Kortright, Delaware co., N. Y., 20 March, 1828. He was educated at Albion, Mich., studied medicine in the Rush medical college, Chicago, Ill., where he was graduated in 1854, travelled extensively in Europe, Asia, Africa, and America, and in 1856 went to Shanghai, China, where he filled for three years the office of inspector of health. He was also for a time U. S. vice-consul in that city. In 1862, after residing six years in China, he returned to the United States, and entered the national army, in which he served as regimental, brigade, and division surgeon till the end of the war. He then settled in California, Cal., but he became in 1872 professor of physiology in the medical department of the University of California.

FISH, Nicholas, soldier, b. in New York city, 28 Aug., 1758; d. there, 20 June, 1833. He entered the College of New Jersey at the age of sixteen, but soon left and began the study of law in the office of John Morn Scott. In the spring of 1776 he was appointed aide-de-camp to Gen. Scott; on 21 June of that year, major of brigade under the same officer; on 21 Nov., major of the 2d New York regiment, and at the close of the war was a lieutenant-colonel. He was in both battles of Saratoga, in 1778 was a division Inspector under Steuben, commanded a body of light-infantry at the battle of Monmouth, served in Sullivan's expedition against the Indians in 1778, was attached to the light-infantry under the secretary of state, by him in March, 1781 took an active part with his regiment in the operations that resulted in the surrender of Cornwallis. He was major of the detachment under Hamilton which gallantly stormed a British redoubt at Yorktown. Col. Fish was an excellent disciplinarian, was an intimate friend of Alexander Hamilton, and possessed in a high degree the confidence of Washington. He was appointed adjutant-general of the state of New York in April, 1786, an office which he held many years. He was a supervisor of the revenue under Washington in 1794, and an alderman of New York city from 1806 to 1817. He married Miss Stuyvesant, a descendant of the Dutch colonial governor of New Amsterdam. Col. Fish was an active member of many of the benevolent, literary, and religious institutions of his native city, and became president of the New York society of the Cincinnati in 1797. His son, Hamilton, statesman, b. in New York city, 3 Aug., 1808, was graduated at Columbia in 1827, studied law, and was admitted to the bar in 1830. He was for several years a commissioner of deeds. In politics he was a Whig, and was the defeated candidate of that party for the state assembly in 1834. In 1842 he was elected a representative in congress from the sixth district of New York over John McKean, the Democratic candidate, and served one term. In 1846 he was a candidate for lieutenant-governor. The Whig candidate for governor, John Young, was elected, but Mr. Fish, who had incurred the hostility of the anti-renters by his warm denunciation of their principles, was defeated. His successful competitor, Addison Gardiner, a Democrat who had received the support of the anti-renters, resigned the office in 1847 on becoming a judge of the court of appeals, and Mr. Fish was elected in his place. In 1848 he was chosen governor by about 30,000 majority, the opposing candidate being John A. Dix and Reuben H. Walworth. In 1851 he was elected U. S. senator in place of Daniel S. Dickinson. In the senate he opposed the repeal of the Missouri compromise, and acted with the Republican party from its formation to the end of his term, though he was not especially prominent in the party. When his senatorial term expired in 1857 he went to Europe with his family, and remained there until shortly before the beginning of the civil war. On his return he took an active part in the campaign that resulted in the election of Abraham Lincoln. In January, 1862, in conjunction with Bishop Ames, he was appointed by Sec. Stanton a commissioner to visit the U. S. soldiers imprisoned at Richmond and elsewhere, "to relieve their necessities and provide for their comfort." The Confederate government declined to admit the commissioners within their lines, but intimated a readiness to negotiate for a general exchange of prisoners. The result was an agreement for an equal exchange, which was carried out substantially to the end of the war. In 1868 he sided in the election of Gen. Grant, was appointed secretary of state by him in March, 1869, and was reappointed at the beginning of his second term in March, 1873, serving from 11 March, 1869, to 12 March, 1877. He introduced a system of examinations of applicants for consulates, to test their knowledge of subjects connected with their duties. On 9 Feb., 1871, the president appointed him one of the commissioners on the part of the United States to negotiate the treaty of Washington, which was signed by him on 8 May of that year.
He effected a settlement of the long-standing northwestern boundary dispute, giving the island of Shetland to Sweden but allowing the United States a large claim for indemnity for the damages arising out of Fenian raids, or Cuban filibustering expeditions. In November, 1873, he negotiated with Admiral Polo, Spanish minister at Washington, the settlement of the question of the "Virginius" question. He was for some years president of the New York historical society and was put in his place by the New York society of the Cincinnati.—Hamilton's son, Nicholas, b. in New York city, 17 Feb., 1846, was graduated at Columbia in 1867, and at Harvard law-school in 1869. He was appointed assistant secretary of the United States legation at Berlin on 1 July, 1871, and became secretary of the legation in July, 1874. He was afterward appointed minister to Switzerland and Belgium.

FISHER, William, soldier, b. in 1760; d. in Walterborough, S. C., 8 Nov., 1819. He was on the staff of Gen. Wayne, and at the battle of Stony Point and afterward attained the rank of major-general. He was a member of the convention that framed the constitution of South Carolina, and subsequently a member of the legislature.

FISHER, Alvan, artist, b. in Needham, Mass., 9 Aug., 1792; d. in Dedham, Mass., 10 Feb., 1863. He was educated for a merchant, but began the study of painting at the age of eighteen with an ornamental painter named Penniman. In 1814 he began as a portrait-painter, and soon afterward undertook barn-yard scenes, winter landscapes, and cattle-pieces. In 1825 he went to Paris to study. In 1829 he returned to portrait-painting, with which he practised for many years in Boston. One of his best works is a portrait of Spurzem, painted after death, from recollection, in 1832.

FISHER, Charles, Canadian statesman, b. in Fredericton, New Brunswick, in September, 1808; d. there, 8 Dec., 1880. He was graduated at King's college, New Brunswick, studied law, and was admitted to the bar. He was elected to parliament in 1837; and in March, 1845, was rejected for advancing a union of the British provinces. He was re-elected soon afterward, was a member of the executive council in 1846-51, and was appointed in 1852 a commissioner to codify the provincial statutes. He was attorney-general in 1854-61, and in April, 1866. He was a delegate, on the question of union, in 1864, and again in 1866, to London, where arrangements were arrived at. He was a delegate to the Trade convention at Detroit.

FISHER, Charles Harris, physician, b. in Killingly, Windham co., Conn., 30 June, 1822. He obtained a classical education by his own exertions, and studied medicine under Alfred C. Post, of New York University, New York city, at Harvard, and the medical department of Dartmouth college, where he was graduated in 1848. He established himself at Scituate, R. I., giving special attention to surgery and uterine diseases in hospital service for thirty years, removed to Providence. He served in the state senate in 1869-70 and 1877-9, became a member of the state board of education in 1870, and the same year was appointed chairman of the Rhode Island fish commission. He was also president of a board of promotion and has been chairman of various library and benevolent associations, and superintendent of public schools. On the establishment of the state board of health, in 1878, he was appointed a member, and became secretary. In 1880 he was made state registrar and commissioner of public health on the expiration of those offices. He prepared the annual reports of the vital statistics of Rhode Island from 1878 to 1883, and those of the state board of health since 1879.

FISHER, Clara, actress, b. in London, England, in 1811. She first appeared in burlesque plays in London at the age of six, and thereafter, for about five years, acted in the principal theatres of Great Britain and Ireland. In 1822 she returned to Drury Lane theatre, London, performing the characters of boys and soubrettes. In 1828 Miss Fisher came to the United States, and made her appearance at the New York Park theatre, where she played in etas, burlesques, and extravaganzas, most of her characters being in extreme contrasts, and requiring rapid changes of costume. With the many she was particularly successful in the delivery of Scottish heroic song. Her "Hurrah for the Bonnets of Blue" and "All the Blue Bonnets are over the Border" were great favorites. Of her ballads, "The Dashing White Sergeant," "Buy a Broom," "Since then I'm doomed," and "Home, Sweet Home," became universally popular. In this manner, for several years, she so identified the Union with great popularity. Children were named for her, and young ladies affected her lisp and manner. Eventually, however, her budget of songs was too often rehearsed, her half dozen plays were worn to weariness, and she had nothing new to offer. In 1834 she married James C. Maeder, an Irish musician, and then betook herself to playing parts in the legitimate drama with only qualified success. At the instigation of her husband, she ventured to appear in opera, but beside skilled vocalist her voice showed great imperfection, both as a soprano and as a mezzo, and she was soon compelled to retire. Her last appearance on the stage was in 1851, in New York city. It is difficult to account for the "Clara Fisher craze" of 1830, for it was founded on limited dramatic ability and moderate personal attractions. Hers were only the comparatively small accomplishments of ballad singing, romping, and dancing, in plays that were adapted to her capability.

FISHER, David, politician, born in Somerset county, Pa., 3 Dec., 1794; d. near Mt. Holly, Clermont co., Pa., 7 May, 1886. He removed to Ohio, where he grew up a pioneer farmer, and received but a scanty education. He became a lay preacher and a newspaper contributor, and in 1842 entered the Ohio house of representatives. In 1840 he was elected as a Whig to the National house of representatives. Dying in jail, 18 April, 1847, till 9 March, 1849. He was an ardent protectionist in politics, and was noted as a philanthropist.

FISHER, Ebenæzer, clergyman, b. in Charlotte, Nc., 6 Feb., 1815; d. in Canton, N. Y., 21 Feb., 1879. He became a Universalist clergyman, and in 1838 was elected as a professor of the theological school connected with St. Lawrence university, at Canton, N. Y. He published "The
Christian Salvation: a Discussion with J. H. Walden "(Boston, 1869). A "Biography of Dr. Fisher" was published in Boston in 1880.

**FISHER, Frances C.,** author, b. in Salisbury, N. C. She is the eldest daughter of Col. Charles F. Fisher, who was killed at the battle of Bull Run. Her first novel, "Valerie Aylmer" (New York, 1870), written for amusement, under the pen name of "Christian Reid," proved eminently successful. She afterward published, in serial form, in "Appleton's Journal," a novel entitled "Morton House," a story of southern life of thirty years ago (1871). Her other works include: "Ouida to Cousin Leo" (1872); "Nina's Atoneinent" (1875); "A Daughter of Bohemia" (1875); "Carmen's Inheritance" (Philadelphia, 1873); "A Gentle Belle" (New York, 1875); "Hearts and Hands" (1875); "A Question of Honor" (1875); "Land of the Sky" (1875); "After Many Days" (1877); "Bonny Kate" (1878); "A Summer Idyll" (1878); "Hearts of Steel" (1889); "Armine" (1884); "Roslyn's Fortune" (1885); and "Miss Churchill" (1887).

**FISHER, George Jackson,** physician, b. in North Castle, Westchester co., N. Y., 27 Nov. 1823. He was educated in the district high schools of Westchester county, N. Y., and studied medicine with Dr. Nelson Nivison, and in the medical department of the University of New York, where he was graduated in 1849. He began practice in Mecklenburg, N. Y., and removed to Sing Sing in 1851, where he was physician and surgeon to the state prison in 1853-4. He was U. S. examiner surgeon for twenty years, and in 1874 was president of the New York state medical society. He is the author of "Biographical Sketches of Deceased Physicians of Westchester County" (New York, 1861); "On Animal Expanses and Malignant Mortals" (1862); "Diplomatology, an Essay on Compound Human Monsters," printed in the "Transactions" of the New York state medical society (1865-9); "On the Influence of Maternal Mental Emotion in the Production of Monstrosities" (1870); "Teratology" (1875); "A Brief History of the Discovery of the Circulation of the Blood" (1877); "Sketches of some of the Old Masters of Anatomy, Surgery, and Medicine" (1880-3); and "History of Surgery," in the "International Encyclopedia of Science and Art." He was the author of "A Description of the Distinct, Confluent, and Inoculated Small-pox, Varioloid Disease, Cow-pox, and Chicken-pox" (Boston, 1834).

**FISHER, Jonathan Lamson,** b. in Brantree, Mass., 7 Oct., 1768; d. in Blue Hill, Me., 22 Sept., 1847. He was the son of a Revolutionary officer who died in the service, was educated by his uncle, Joseph Avery, the minister of Holden, Mass., and developed a remarkable aptitude for music. He began his education at Harvard, and was graduated at the university in 1792. He then studied theology at Cambridge, acquiring unusual familiarity with the Hebrew language, and was installed as the Congregational minister at Blue Hill in 1798. While in college he devised a phonetic alphabet of stenography, which he used in writing his sermons. He pursued for years the compilation of a Hebrew lexicon on the plan developed at the same time by other philologists, whose publications caused him to abandon the project of publishing his work. He painted portraits, and engraved on wood the illustrations to a work that he published on "Scripture Animals." He also published a volume of "Miscellaneous Poems," chiefly on biblical subjects.

**FISHER, Joshua,** physician, b. in Dedham, Mass., 17 May, 1749; d. in Beverly, Mass., 15 March, 1839. He was graduated at Harvard in 1766, studied medicine, and began practice. When hostilities with Great Britain began in 1775 he volunteered as surgeon on a privateer, and was captured, but escaped to France, again entering the service. After the war he settled in practice at Beverly, Mass., and attained a high reputation in his profession. He was an ardent student of nature, and at his death bequeathed $20,000 to found at Harvard a professorship of natural history, comprehending the three kingdoms—animal, vegetable, and mineral—for a part of the course. He was president of the Massachusetts literary society. He published a "Discourse on Narcotics" (1806). See "A Brief Memoir of Joshua Fisher, M. D.," by Dr. Walter Channing.
FISHER, Joshua Francis, author, b. in Philadelphia, Pa., 17 Feb., 1807; d. there, 21 Jan., 1873. He was graduated at Harvard in 1825, studied law, and was admitted to the Philadelphia bar in 1829, but never practised. Mr. Fisher was one of the instructors of the Pennsylvania institution for the instruction of the blind, the second of its kind in the United States. He remained one of its trustees until his death, was president for one year, and rendered important services to the institution by his examination of the systems of instruction in Europe during three foreign tours, and the reports of his conclusions. In 1837 he was one of the subscribers of the Historical Society of Pennsylvania, particularly those relating to America and to Pennsylvania, and was one of the earliest and most industrious members of the Historical Society of Pennsylvania. In 1839, when only twenty-two years old, he delivered before the society "An Account of the Early Poets and Poetry of Pennsylvania," which was published in the "Memoirs" of the society. His contributions to the society were numerous and valuable. The most important was his address on the "Private Life and Domestic Habits of William Penn" (1846). Mr. Fisher was one of the advocates of minority representation, and, with perhaps one exception, the first American writer on that subject. He published "The Degradation of our Representative System and its Reform," proposing a plan of reform different from that of all other writers, which attracted much attention among students of the subject in this country and in Europe (1863); "Reform of Municipal Elections" (1866); and "Nomination of Candidates" (1868).

FISHER, Michael Montgomery, educator, b. near Rockbridge, Ind., 8 Oct., 1819. He was graduated at Hanover college, Ind., in 1835, and was chosen professor of Latin at Westminster college, Fulton, Mo. In 1860 he was ordained pastor of the Presbyterian church at Fulton, at the same time retaining his professorship. In 1870 he founded and edited the "Appendix to the Presbyterian Review." He was also the founder of Bellewood female college, near Louisville, Ky. In 1874 he returned to Westminster college, and in 1877 became professor of Latin in the University of Missouri. He has published "The Three Pronunciations of Latin" (St. Louis, 1872); "Syllabary," and is also the author of an historical work on "Education," and is now (1887) engaged on a series of Latin text-books.

FISHER, Nathaniel, clergyman, b. in Dedham, Mass., 8 July, 1742; d. in Salem, Mass., 20 Dec., 1812. He was the son of a farmer of Dedham, and an uncle of Fisher Ames. He was graduated at Harvard in 1763, and employed as a missionaries teacher in Nova Scotia about the beginning of the Revolutionary War. In 1777 he was ordained by Dr. Robert Lowell, the bishop of London, and had charge of the churches at Annapolis and Granville, Nova Scotia, from 1778 to 1782, when he returned to Massachusetts. He was immediately invited to the rectorship of St. Peter's church in Salem, and installed there after taking the oath of allegiance. He was prominent in organizing the Congregational church in New England. A volume of his sermons was published after his death, edited by his friend and parishioner, Judge Joseph Story (1818).

FISHER, Philip, clergyman, b. in Madrid, Spain, at the close of the 16th century; d. in Maryland in 1653. Although he was known on the records of the Jesuit society and in Maryland as Philip Fisher, his real name appears to have been Thomas Copley. He was descended from an old English Roman Catholic family. When Lord Balti-
more applied to the provincial of the Jesuits in England for missionaries, on behalf of the Roman Catholic settlers, Father Fisher furnished the means by which the first missionaries were sent out and maintained. He came to Maryland, 8 Aug., 1637, accompanied by Father Thomas Knolles. He was appointed superior of the mission, and obtained for it seven thousand acres of land at Baltimore’s conditions of plantation. These lands were cleared and put under cultivation by his direction, and for two centuries met the cost of maintaining worship in these parts of Maryland. In 1639 he published an interesting historical study, particularly those relating to America and to Pennsylvania, and was one of the earliest and most industrious members of the Historical Society of Pennsylvania. In 1839, when only twenty-two years old, he delivered before the society "An Account of the Early Poets and Poetry of Pennsylvania," which was published in the "Memoirs" of the society. His contributions to the society were numerous and valuable. The most important was his address on the "Private Life and Domestic Habits of William Penn" (1846). Mr. Fisher was one of the advocates of minority representation, and, with perhaps one exception, the first American writer on that subject. He published "The Degradation of our Representative System and its Reform," proposing a plan of reform different from that of all other writers, which attracted much attention among students of the subject in this country and in Europe (1863); "Reform of Municipal Elections" (1866); and "Nomination of Candidates" (1868).

FISHER, Richard Samuel, statistician, b. in Philadelphia, Pa., in 1782; d. there, 17 May, 1856. He was a merchant of Philadelphia, but removed to New York city, edited a daily newspaper, and took an active part in public affairs. He published several volumes of political oratorical, and statistical subjects, one of which is "The Progress of the United States of America from the Earliest Periods, Geographical, Statistical, and Historical" (New York, 1834). He also edited a "Gazetteer of the United States" (New York).

FISHER, Samuel, clergyman, b. in Norristown, Pa., 2 June, 1810; d. in Tiffin, Ohio, 5 June, 1881. He was graduated at Jefferson college in 1834, licensed to preach in 1836 by the synod of the Reformed church, and in 1840, after preaching four years at Emmettsburg, Md., became connected with the published office of the Reformed church, which had just been established at Chambersburg, Pa. During the same year he became associated with the Rev. Dr. Schneck in the editorship of the "Reformed Church Messenger," and was chosen stated clerk of the church. From 1845 he had the special management of the publication interests of the church, was most of the time sole editor of the "Messenger," and held the office of stated clerk until his death. Besides several sermons preached on special occasions, Dr. Fisher prepared and published the following works: "Exercises on the Reformed Catechism" (Chambersburg, Pa., 1844); "Heidelberg Catechism Simplified" (1850); "The Rum-Plague," a temperance story, translated from the German of Zschokke (New York, 1853); and "The Family Assistant," several volumes in 1855. His death took place in Chambersburg in attendance at the general synod of the church.

FISHER, Samuel Ware, educator, b. in Morristown, N. J., 5 April, 1814; d. at College Hill, near Cincinnati, Ohio, 18 Jan., 1874. His father was a Presbyterian pastor at Morristown. The son was graduated at the Union seminary, and Princeton theological seminary, but after two years went to the Union theological seminary, New York city, where he was graduated in 1838. Before leaving the seminary he was called to the pastorate.
FISHER

of the Presbyterian church in West Bloomfield, now Montclair, N. J. He was pastor there for three and a half years, and for four years in Albany, where he achieved a high reputation as a pulpit orator. From Albany he was called in 1847 to Cincinnati, as a successor to Rev. Dr. Lyman Beecher. This pastorate he always considered the most effective work of his ministry. In 1858 he resigned to accept the presidency of Hamilton college, Clinton, N. Y. Here his scholarship, his eloquence, and his executive ability effected a more liberal endowment and increased efficiency. In September, 1867, finding his pulpit work more congenial, Dr. Fisher went to the University of Michigan and accepted a call from the Westminster Presbyterian church in Utica, but in May, 1870, he was stricken with paralysis. From the first attack he recovered, but did not regain the full use of his speech, and therefore resigned his pastorate in 1871, and was able to partially resume his duties, but a second attack compelled his resignation of all active duties, and he removed to Cincinnati. He was the author of "Three Great Temptations of Young Men, with several Lectures addressed to Business and Professional Men" (Cincinnati, 1852). Only a few of his sermons, orations, and articles were published. An index of "Occasional Sermons and Addresses" appeared in New York in 1880, and a course of sermons on the "Life of Christ" at Utica after his death—his nephew, Samuel Sparks, lawyer, b. in St. Joseph county, Mich., 11 April, 1832; drowned in the Susquehanna river, 14 July, 1874, studied law in Philadelphia, went to Cincinnati in 1854, and was for many years engaged there in the managing of patent cases. He was colonel of the Ohio national guard, and during the last four months of the civil war, was in active service acting brigadier-general on the eastern shore of Virginia. In 1869 he was appointed by President Grant commissioner of the patent-office, but resigned early in 1871, to devote his attention to private business. He was following up the Susquehanna on a pleasure trip, with his son, when both were drowned. He published six volumes of "Reports of Cases Arising under Letters-Patent for Inventions in the Circuit Courts of the United States" (Cincinnati, 1868–74).

FISHER, Theodore Willis, physician, b. in Waltham, Mass., 29 May, 1825, graduated in medicine at Harvard in 1841, was in that year resident physician of the city institutions in Boston harbor, a surgeon in the volunteer army in 1862–3, and from 1863 to 1870 assistant superintendent of the Boston lunatic hospital. He then established himself in practice in Boston, making a specialty of mental diseases, and became examining physician for the board of directors for public institutions, and a frequent expert in the courts in cases of insanity. In 1881 he became superintendent of the Boston lunatic hospital. Since 1884 he has been clinical instructor in mental diseases in Harvard. He prepared a report to the state board of health on the "Ventilation of Steam Cars" in 1875, contributed "Reports on Progress in Mental Diseases" to the Boston Medical and Surgical Journal annually from 1876 to 1877, besides an article on "Anhangia of the Physicians," and other papers published in journals devoted to his specialty. He also published a popular treatise called "Plain Talks about Insanity" (1872).

FISHER, Thomas, author, b. in Philadelphia, Pa., 21 Jan., 1811; d. there, 19 Feb., 1896. He engaged in commercial pursuits, and at the same time was an active member of the Academy of natural sciences. He published "Dial of the Seasons" (Philadelphia, 1845); "Song of the Seashells," and other poems (1850); and Mathematics Simpliciter evangetici (1858). He was a member of the American Academy of Arts and Sciences, and a trustee of the University of Pennsylvania. He was remembered on his removal to London, where he has exhibited in the Royal academy. He has painted landscapes from studies in the neighborhood of Paris, also genre paintings and cattle-pieces, including "Noon" (1872); "On the Cam" (1870); and "The Meadows" (1874). FISHER, William Mark, painter, b. in Boston, Mass., 15 Dec., 1841. He is of Irish parentage. He first studied at the Lowell Institute, then with George Innes, and in 1864 at Paris in the studios of Alexandre Cabanel. After painting for some years in Boston, Macdonald, Mr. Flanders, he went to London, where he has exhibited in the Royal academy. He has painted landscapes from studies in the neighborhood of Paris, also genre paintings and cattle-pieces, including "Noon" (1872); "On the Cam" (1870); and "The Meadows" (1874).

FISK, Clinton Bowen, lawyer, b. in York, Livingston co., N. Y., 8 Dec., 1828. His parents removed to Michigan in his infancy. After a successful career as merchant, miller, and banker in Michigan, he removed to St. Louis in 1850. Early in the war he was colonel of the 33d Missouri regiment in the National army, was promoted to brigadier-general in 1862, and brevetted major-general of volunteers in 1865. After the war he was assistant commissioner under Gen. O. O. Howard in the management of the Freedman's bureau in Kentucky. In 1867 he removed to New Jersey. Gen. Fisk actively aided in establishing Fisk university, Nashville, Tenn., in 1865, and it was named for him. He has been identified with its financial and educational interests, and is president of its board of trustees. He is also a trustee of Dickinson college, of Dubuque theological seminary, and of Albion college, Mich. He is trustee of the American missionary association, and also a member of the book committee of the M. E. church. He has rendered conspicuous service to Methodist church and a reunion of the northern and southern branches of the church. He has also been identified with the temperance movement, and was the Prohibition candidate for the governorship of New Jersey in 1886. Since 1874 he has been president of the Board of Indian commissioners.

FISK, Ezra, clergyman, b. in Shelburne, Mass., 10 Jan., 1785; d. in Philadelphia, Pa., 5 Dec., 1833. He was graduated at Williams in 1809, studied theology, and was licensed to preach in the Presbyterian church on 19 April, 1819. He was then ordained as minister of the mission at Newbern, N. Y., and afterwards at work in Georgia and Philadelphia. He became in 1813 pastor of the Presbyterian church in Gorham, N. Y., where he remained twenty years. In May, 1833, Dr. Fisk was elected to the professorship of ecclesiastical history and church government in the Western theological seminary, and it was on his way to enter on the duties of the office when he died. He published an oration, delivered at Williams college in 1828; a lecture on the "Inability of Sinners" (Philadelphia, 1829), etc.

FISK, James, jurist, b. about 1782; d. in Swanton, Vt., 1 Dec., 1844. He was self-educated, studied law, and rose to eminence in the profession. He was a member of the lower house of congress from 1805 till 1809, and served from 1811 till 1815. He was appointed by President Madison judge of the district of Vermont. After the decline of his public usefulness he resigned, and held the office after confirmation in 1815–16. He was one of the judges of the supreme court of Vermont, and in 1817 was chosen U. S. senator, but resigned after one year’s service, and subsequently was collector of customs for eight years in the district of Vermont. He was a member of the legislature, b. in Brattleboro, Vt., 31 Aug., 1779; d. in Middleton, Vt., 22 Feb., 1839, was graduated at Brown in 1815, and studied law, but, after a long
and serious illness, abandoned the profession and entered the itinerant ministry in 1818, when he was licensed as a local preacher in the Methodist Episcopal church. He took high rank as a pupil orator, was pastor for two years in Craftsbury, Vt., and in 1819 removed to Charlestown, Mass. At the meeting of 1822, as minister of the society, ordained as a deacon in 1822, and from 1823 till 1827 was presiding elder of the Vermont district, which then comprised the whole of Vermont east of the Green mountains. He was placed upon the superintendence in 1826, but was requested to resign. As such he was able to act as an agent for Newmarket academy, at that time the only Methodist institution in New England. While here, he was chosen to make the address of welcome to Lafayette in 1824. He was also a delegate to the general conference in that year, and was chosen to write the address to the British conference. He was chaplain of the Vermont legislature in 1826, and was one of the founders and principal of the Wesleyan academy in Wilbraham, Mass., 1826-31, and a delegate to the general conference when he was elected bishop of the Canada conference, but declined. In 1829 he also refused the presidency of La Grange college, Alabama, and a professorship in the University of Alabama. In 1830 he was chosen first president of the Wesleyan university; in whose organization he had materially aided. In 1831, he was elected bishop of the Wesleyan conference and the time instrumental in founding Williamsburg academy. For years he was useful to educational interests at large by recommending or furnishing professors and presidents to the rapidly multiplying colleges of the far west. In search of health, he passed the winter of 1835-6 in Italy, and the summer of 1836 in England, when he also represented the M. E. church of the Wesleyan conference as a delegate. He was elected bishop of that church in 1836, but declined. In 1839 he became a member of the board of education of Connecticut. He was said to be unsurpassed in eloquence and fervor as a preacher, and was often compared to Fenelon, being endowed with like moral and mental traits. The degree of D. D. was conferred upon him by Augusta college, Kentucky, in 1839, and by Brown in 1833. His published works are: "Inaugural Address" (New York, 1831); "Calvinistic Controversy" (1837); "Travels in Europe" (1838); "Sermons and Lectures on Universalism: Reply to Pierpont on the Atoneinent, and other Theological and Educational Works and Sermons." His account of his European travels had a wide circulation and was greatly admired. His "Life and Writings" were published by the Rev. Joseph Holdich, D. D. (New York, 1842).

FISK, Pliny, missionary, b. in Shelburne, Mass., 24 June, 1792; d. in Beirut, Syria, 23 Oct., 1834. He was educated at Middletown college, 1814, and at Andover theological seminary in 1818. He was appointed, with Levi Parsons, by the American board, to the Palestine mission in 1818, and sailed from Boston on Snyrma, 3 Nov., 1819. After travelling extensively in Greece, Egypt, Palestine, and Syria, he was ordered to be stationed at Middletown college, 1824-8. In 1828-9 he was already established at Beirut, and died there of fever in the following October. Mr. Fisk was eminently fitted to be a missionary in the east, as he preached in Italian, French, Greek, and Arabic. On the day of his death he compiled an "English and Arabic Dictionary," and wrote numerous papers for the "Missionary Herald." A life of Pliny Fisk was published by Alvin Bond (Boston, 1829).—His niece, Fields, missionary, b. in Shelburne, Mass., 1 May, 1816; d. there, 8 Aug., 1884, was graduated at Mount Holyoke in 1839, and frequently taught there. In 1843 she resigned her post and went to Persia as a missionary among the Nestorians, where she labored fifteen years, much of the time as teacher in a female seminary. She was the first principal of the seminary at Oromiah. In 1858 she returned to the United States in broken health. She published "Memorial of Mount Holyoke Seminary" and "Woman and her Saviour in Persia," and at the time of her death was engaged in writing "Recollections of Mary Lyon" (Boston, 1886). See a memoir of Miss Fisk, by the Rev. Daniel T. Fiske, D. D., entitled "Faith working by Love" (1868).

FISK, Samuel, soldier, b. in Shelburne, Mass., 23 July, 1828; d. in Fredericksburg, Va., 22 May, 1864. He was graduated at Amherst in 1848, was an aide of General Scott from 1857 to 1859, was a student of Andover from 1859 till 1862, was tutor at Amherst from 1862 till 1855, then traveled a year in Europe and the east, and was pastor of the Congregational church at Madison, Conn., in 1857. He entered the National army as a private in the 14th Connecticut regiment in 1862, became captain of that regiment, was entered upon in 1861; the institution under his direction became the most influential of any in the Methodist denomination in America. At the general conference of 1862 his appeals in behalf of Indian missions resulted in the organization of the mission for the purpose of this time instrumental in founding Williamsworth academy. For years he was useful to educational interests at large by recommending or furnishing professors and presidents to the rapidly multiplying colleges of the far west. In search of health, he passed the winter of 1835-6 in Italy, and the summer of 1836 in England, when he also represented the M. E. church of the Wesleyan conference as a delegate. He was elected bishop of that church in 1836, but declined. In 1839 he became a member of the board of education of Connecticut. He was said to be unsurpassed in eloquence and fervor as a preacher, and was often compared to Fenelon, being endowed with like moral and mental traits. The degree of D. D. was conferred upon him by Augusta college, Kentucky, in 1839, and by Brown in 1835. His published works are: "Inaugural Address" (New York, 1831); "Calvinistic Controversy" (1837); "Travels in Europe" (1838); "Sermons and Lectures on Universalism: Reply to Pierpont on the Atonement, and other Theological and Educational Works and Sermons." His account of his European travels had a wide circulation and was greatly admired. His "Life and Writings" were published by the Rev. Joseph Holdich, D. D. (New York, 1842).

Fiske, Daniel Willard, scholar, b. in Ellisburg, Jeff., N. Y., 11 Nov., 1819. He was very young he disclosed an uncommon aptitude for the acquisition of languages, and a precocious interest in both literature and politics. He pursued his school education at Cazenovia seminary and at Hamilton college, but left that institution in his first year. He then went abroad and studied the Sanscrit and Scandinavian languages. At Copenhagen he enjoyed the friendship of Prof. Rafiu, the distinguished Danish archæologist. With little aid except some occasional correspondence with the New York "Tribune," he sustained himself during 1849-52, passing two years in the University of Upsal, giving lessons in English and lecturing on American literature, and speaking Swedish so well that he commonly passed with the students for a Swede. In 1852 he returned to New York and took a place in the Astor library, where he remained as assistant until 1859, still pursuing his studies in languages, and in making a collection of Icelandic books, which soon became the most considerable in this country. So enthusiastically had he directed his attention to that enlightened island that it was said that few natives were more familiar with its geography, history, literature, than he. In 1859-60 he was general secretary of the American geographical society. In 1861-2 he was again abroad, and attached to the American legation at Vienna under Minister John Lotthrop Motley. Returning, he was editor of the daily "Journal of Syracuse, N. Y., of 1864-6; but in 1867 had charge of the Hartford, Conn., "Courant," from which he was called in 1868, after another extensive tour abroad, which embraced Egypt and Palestine, to the professorship of the north European
languages, and the place of chief librarian, at Cornell University. To his unremitting labors for years in the class-room, as librarian, and as director of the University, a principal part of the success of the institution is due. During this time he took a deep interest in the re-form of the civil service, and was a most influential writer and lecturer in its behalf. In 1879 he was again abroad for five months, and visited Iceland, where he was a principal part of the country of the contribution of a library on the celebration of the National millennium, and upon his arrival he was the guest of the nation and accorded honors seldom if ever given before by one nation to a private citizen of another. His health failing from his severe application to college duties, he went abroad again in 1880. In that year, in Berlin, he married Miss Jennie McGraw, of Ithaca, N. Y., who died in September, 1881. In 1881 he resigned his offices at Cornell and took up his permanent residence in Florence, Italy. Though his chief work has been that of scholar and bibliophile, he has been a voluminous contributor to various Swedish, Icelandic, and German journals, and to the American press. He was one of the famous chess tournament of 1887, and, in conjunction with the American Chess Monthly in 1857-50, and compiled the "Book of the American Chess Congress" (New York, 1859). He has edited various university publications, such as the "Ten-Year Book of Cornell," the "Register," etc., and many bibliographical works, such as the "University Library Bulletin," the "Bibliographia Piuspolonica," etc. He was one of the chief promoters of the chapter-house system in the Greek letters societies. He is now engaged in completing his two private book collections, one relating to Petrech, the other to Icelandic history and literature—the most considerable collections in existence relating to those subjects—and is printing privately a series of "Bibliographical Notices" illustrating his collections. Prof. Fiske has received the degree of A. M. from Hamilton and that of Ph. D. from Cornell.

Fiske, John, author, b. in Hartford, Conn., 30 March, 1842. He is the only child of Edmund Brewster Green, of Smyrna, Del., and Mary Fiske Bound, of Middletown, Conn. The father was editor of the "New York Standard" and "New York Weekly Times," and the mother was a daughter of Rev. Dewitt Smith, of Stratford, Conn. He was educated in the schools of Middletown and Yale University, and was graduated in 1865, having been already admitted to the Suffolk bar in 1864, but has never practiced law. His career as a writer began in 1861, with an article on "Mr. Buckle's Fallacies," published in the "National Quarterly Review." Since that time he has been a frequent contributor to American and periodicals. In 1869-71 he was university lecturer on philosophy at Harvard, in 1870 instructor in history, and in 1872-73 assistant librarian. On resigning the latter place in 1879 he was elected a member of the board of overseers, and at the expiration of the six-years' term was re-elected in 1885. Since 1881 he has lectured annually on American history at Washington University, St. Louis, Missouri, and at the Johns Hopkins University, and has been a professor of American history at that institution, but continues to make his home in Cambridge. He lectured on American history at University College, London, in 1879, and at the Royal institution of Great Britain in 1880. Since 1871 he has given many invited lectures, chiefly upon American history, in the principal cities of the United States and Great Britain. The largest part of his life has been devoted to the study of history; but at an early age inquiries into the nature of human progress led him to a careful study of the doctrine of evolution, and it was as an expounder of this doctrine that he first became known to the public. In 1871 he arrived at the discovery of the causes of the prolonged infancy of mankind, and the part played by it in determining human development; and the importance of the doctrine to the Darwinian theory, now generally admitted, was immediately recognized by Darwin and Spencer. His published books are: "Tooth and Alcoholic" (New York, 1868); "Outlines of Cosmic Philosophy" (Boston, 1872); "Outlines of Cosmic Philosophy," based on the "Evolution of the Idea of God as affected by Modern Knowledge" (Boston, 1883); and "American Political Ideas viewed from the Standpoint of Universal History" (New York, 1885). Mr. Fiske has in preparation a "History of the American People."
year he was ordained as an evangelist, and went to Savannah, Ga., to convert the set men and others not belonging to any church. In April, 1824, while yet in Savannah, he declined an invitation to supply the pasture in Concord, N. H., during the session of the legislature, and on the same day he declined the solicitation to represent the Negro mission to Palestine or to China. He was also offered the professorship of mathematics and natural philosophy in Middlebury college, Vt., but declined it, and became professor of Latin and Greek in Amherst in 1824, adding to his duties as instructor the department of belles-lettres. From 1825 till 1833, and from 1833 till 1836 was professor of literature (including the modern) at Amherst. He was transferred to the chair of intellectual and moral philosophy, and held it from 1836 till the time of his death. In 1846, on account of failing health, he visited Palestine, where he died, and was buried in Jerusalem on Mount Zion. He was the father of the author Helen Hunt Jackson (q. v.). He published a "Manual of Classical Literature," based upon the German work of J. J. Eschenburg, with additions and a "Voyage to the Volcanic Islands," (Philadelph., 1836; 4th ed., 1843); "Sermons" (1830); "Young Peter's Tour Around the World;" and "Story of Aleck; or, The History of Pitcairn's Island." His biography was published, with selections from his sermons and other writings, by Helen Hunt Jackson, D. D. (Amherst, 1850).

FISKE, Oliver, physician, b. 2 Sept., 1792; d. in Boston, Mass., in 1836. He was a son of the Rev. Nathan Fiske, of Brookfield, Mass., served for a short time in the army during the Revolutionary war, and at its close entered Harvard, where he was graduated B. A. in 1787. He began practice in Worcester in 1790, was mainly instrumental in establishing the Massachusetts medical society, and was elected its president soon after its organization. In 1803 he was appointed special justice of the court of common pleas, and during the five years succeeding filled that position in this department of the executive council. He was corresponding secretary of the Linnaean society of New England, counsellor of the American antiquarian society, and a member of the American academy of arts and sciences. He published an oration delivered at Worcester in 1789, "Sporadic Peter," forming part of the "Transactions of the Massachusetts Medical Society," and other writings.

FITCH, Ass., naturalist, b. at Fitch's Point, N. Y., 24 Feb., 1809; d. 8 April, 1878. He was at first an agriculturist and country physician, but relinquished medical practice in 1838 to devote his time to scientific agriculture and the study of natural history. He was made New York state entomologist in 1854, and for many years published annual reports on insects injurious to vegetation. Most of these have been collected into volumes, and issued in three volumes by the state agricultural society.

FITCH, Benjamin, philanthropist, b. in New York, 13 June, 1802; d. in New York city, 7 Nov., 1883. His father, Stephen Fitch, was a Quaker, and had him educated at the Quaker settlement in Menlo. In 1824 he opened a general store, and in 1812 by his father, who went there to see his father, the Seneca chief, in behalf of the government. He was in Buffalo when it was burned by the British in 1813. He went to Albany, and subsequently to New York, where he became clerk in a dry-goods business in Rochester, Buffalo, New York, and Chicago, retiring with a large fortune in 1853.

Returning from Europe at the outbreak of the civil war, he induced volunteers to enlist in the service by promising to care for their families, which led to his founding, in 1866, the Fitch home in Darien, Conn., for soldiers' orphans. He added a public hall and an art gallery, and also built a church in Darien. He gave the land and building for the Fitch home in Darien, 1890. In 1891 he founded the Fitch institute, which was organized on the plan of the Cooper institute in New York. On the occasion of his last visit to Buffalo he gave $15,000 to the Charity organization society. He made liberal annual gifts of money to the children of the Fitch home.

FITCH, Ebenezer, educator, b. in Norwich, Conn., 26 Sept., 1756; d. in West Bloomfield, N. Y., 21 March, 1833. He was descended from James, minister of Saybrook and of Norwich, was graduated at Yale in 1777, and was a tutor there in 1780–83 and 1786–91. In 1791 he became principal of Williams college, and when this became Williams college, in June, 1793, he was elected its first president, an office which he held until 1813, when he resigned to become pastor of the Presbyterian church in N. Y. He resigned this charge in 1827, but preached occasionally after that almost till the time of his death.

Fitch, Eleazar Thompson, educator, b. in New Haven, Conn., 1 Jan., 1791; d. there, 31 Jan., 1871. He was graduated at Yale in 1810, and was a teacher at Coxsackie Academy and subsequently in the New Haven Hopkins grammar-school. In 1812 he entered Andover theological seminary, where, after completing the regular course, he remained, pursuing advanced studies, giving assistance in instruction, and preaching, until his election, in 1817, as President Dwight in the office of professor of divinity at Yale. One branch of his work was to teach theology to graduates, and in this his classes increased so that he was led to urge upon the corporation the founding of a theological department, which was organized in 1817. In his department he filled the chair of homiletics, at the same time being college preacher and pastor, and giving instruction in the academical department in natural theology and the evidences of Christianity. He delivered to successive classes a series of sermons in systematic theology, and some part of the "Transactions of the Massachusetts Medical Society," and other writings.

FITCH, Elijah, clergyman, b. in 1745; d. in Hopkinton, Mass., 16 Dec., 1788. He was graduated at Yale in 1769, and became a minister of the Congregational church in Hopkinton in 1771, where he remained. To Buffalo he went in 1812 by his father, who went there to see Red Jacket, the Seneca chief, in behalf of the government. He was in Buffalo when it was burned by the British in 1813. He went to Albany, and subsequently to New York, where he became clerk in a dry-goods business in Rochester, Buffalo, New York, and Chicago, retiring with a large fortune in 1853.

He received a classical education, studied at the store of his father and then at Amherst, N. Y., and settled at Logansport, Ind., in 1884, where he still (1887) resides. From 1844 till 1847 he was a professor in Rush medical college,
Chicago, and from 1878 till 1883 taught the art and science of surgery in the Indiana medical college. He was an Indiana presidential elector in 1844 and, in 1845, a delegate at the National Democratic convention, New York, in 1848. From 1836 till 1839 he was a member of the legislature of Indiana, and held a seat in congress from 3 Dec., 1849, till 3 March, 1853. He was subsequently elected United States senator from Indiana, and served as such, 1857, till 3 March, 1861. In the autumn of that year Dr. Fitch raised the 46th regiment of Indiana volunteers, with other troops, and was commissioned colonel. He remained in the field until November, 1863, when he was compelled to resign on account of injuries received. He commanded the land forces at the capture of Fort Pillow, at Memphis, Tenn., and also at St. Charles, Ark.

FITCH, James, clergyman, b. in Bocking, Essex, England, 24 Dec., 1622; d. in Lebanon, Conn., 18 Nov., 1709. He came to New England in 1638, and supplemented his previous excellent classical education by seven years of study under Hooker and Stone. He was pastor at Saybrook in 1646-'60, and was afterward installed as the first minister of Norwich. He preached to the Mohicans in their own language, induced them to cultivate the land, and gave them some of his own. He published "First Principles of the Doctrine of Christ" (Boston, 1679), and several sermons.

FITCH, John, inventor, b. in East (now South) Windsor, Conn., 21 Jan., 1745; d. in Bardstown, Ky., in August, 1786. He received a common school education, was apprenticed to a watchmaker, and after twenty-five years of home life rendered miserable by the ill-treatment of his father and elder brother, crowned the wretchedness of his condition by an unfortunate marriage, and in 1769 became a wanderer. Settling at Trenton, N. J., he was there exercising his trade of watchmaker at the beginning of the Revolution. The demand for arms induced him to become a gunsmith for the American forces, which exposed his name to the protection of the British army. He entered the village in December, 1776. He joined the New Jersey troops, with whom he endured the rigors of a winter camp at Valley Forge, and afterward resumed his trade in Bucks county, Pa., occasionally traversing the country afoot to repair watches. Finally, he was appointed one of the state of Virginia as a deputy surveyor, he set out for Kentucky, knapsack on back and compass in hand, in the spring of 1780, and, after making extensive surveys between the Kentucky and Green rivers, returned to Philadelphia in the autumn of 1781. The next spring he invested in flour and goods the £150 (Pennsylvania currency) which represented the $4,000 he had gathered in Continental currency, and began another tour of western adventure. At the mouth of the Muskingum the party was attacked by Indians, two of his companions killed, millions lost, and his goods destroyed. Fitch had the address to conciliate the leader of the band, and the endurance to sustain the rigors of the captivity, from which he escaped, and in the winter of 1782-3, penniless and dejected, reached Warminster, Pa., here, 13 April, 1786, he conceived the idea of steam as a motive-power, at first for carriages, but soon for vessels. His first model of a steamboat, completed this year, bore wheels at the sides; but these, being found to labor too much in the water, were replaced by a projection from the stern. His experiments of July, 1786, upon a skiff with a steam engine of 30 horse-power, and paddles. He now besieged the Continental congress, as well as the Pennsylvania legislature, for pecuniary aid to his project, and addressed the leading scientific and public men of that day, everywhere, and at all times boldly affirming the practicability of sea navigation by steam vessels. Yet, though he elicited much interest among the best minds, his fervid predictions secured no money, and he acquired the reputation of being insane. Finally, by the construction, engraving, and sale of a map of the northern territory, all of which was done with his own hand, the impressions being taken on a cider-press, he raised about $800, in February, 1787, formed a company of forty shares, and began a boat of sixty tons. Meanwhile, in 1786, the state of New Jersey, and in 1787 the states of New York, Delaware, Pennsylvania, and Virginia, had granted him the same and extensive rights to their waters for fourteen years for purposes of navigating by means of steam. Fitch's second boat, 45 feet long and 12 feet beam, with six oars or paddles on each side, and an engine of 12-inch cylinder, made its trial trip on the Delaware, at Philadelphia, 22 Aug., 1787, in the presence and to the great satisfaction of the members of the convention to frame the Federal constitution, then in session there. A still larger boat in October, 1788, and still another in April, 1790 (see illustration), continued to demonstrate with their increased speed and facility the value of Fitch's invention, the latter boat being run during the whole summer as a regular passenger-boat between Philadelphia and Burlington, with a speed of eight miles an hour. Another boat, "The Perseverance"—designed for both freight and passengers on the Mississippi, under the Virginia patent, which gave Fitch the exclusive right of navigating "the Ohio river and its tributaries"—was unfortunately so damaged by a storm as not to be available before the expiration of the default clause in that patent. The stockholders became discouraged, and, Fitch's resources being exhausted, the project was abandoned. In 1791 he received a patent for his inventions from the United States, which was of little avail, and subsequently was lost by fire. In 1793 he went to France, there to build a steamboat; but, arriving in the midst of the revolutionary prisons, could not carry out his project, and, depositing his plans and specifications with the American consul at L'Orient, went to London. During this absence his drawings and papers were loaned by the consul to Robert Fulton, then in Paris, in whose possession they were for several months. In 1794, disappointed and penniless, Fitch returned to America, working his passage as a common sailor, and withdrew to his lands at Bardstown, Ky., which he found in the occupation of others; but in 1796 he again constructed a steamboat from a ship's yawl, which was moved by a screw-propeller on the Cohocton Pond in New York city. In the spring of 1798 he made and tried,
upon a small stream near Bardstown, a three-foot model of a steamboat; but some time between 28 June and 18 July he committed suicide by poison, died in a tavern, unattended by relative or friend, and was buried in Bardstown, where no stone marks his resting-place. How mournfully prophetic are the following words from his journal: "The day will come when some more powerful man will get fame and riches from my invention; but nobody will believe that poor John Fitch can do anything worthy of attention." There have been several later claimants to the invention of steamboats, noticeably Robert Fulton; but when, in 1817, the original patents, drafts, specifications, and model of both of Fitch's and of Fulton's boats were exhibited before a committee of the New York legislature, raised upon the petition of Gov. Ogden, of New Jersey, in which both parties were represented by the ablest legal talent of the day, and witnesses of the highest character and personal knowledge of the facts were produced, the committee finally reported that "the steamboats built by Livingston and Fulton were in substance the invention patented to John Fitch in 1791, and Fitch during the term of the patent had the exclusive right to use of same in the United States." Fitch's life has been written by Thompson Westcott (Philadelphia, 1857), and by Charles Whittlesey in Sparks's "American Biography." See also an article in O'Callaghan's "Historical Collections of New York" (vol. 2, 1840).

FITCH, John, naval officer, b. in Hartford, Conn., 28 June, 1836. He studied four years in Munich and Milan under Prof. Albert Zimmermann and his two brothers, Max and Richard. His professional life has been spent in Hartford and in New York city. He is an associate of the National academy of design, and member of the Tweed fund society of New York. He was for twelve years chairman of the art committee of the Century club, but declined re-election. He has achieved reputation as a painter of forest scenes and is of a close student of nature. His largest picture, "The Lake," was exhibited in 1874. Among his other works are: "On Gill Brook" (1866); "A Mountain Brook" (1870); "The Outlet" (1871); "In the Cañon, Granville, Mass." (1875); "Waiting for a Bite" (1874); "A Sandy Shore" (1875); "Dutch John's Brook" (1875); "Cliff Side" (1889); "W_REAL THE CROTON" (1884); and "Near Carmel, N. Y." (1886).

FITCH, Leroy, naval officer, b. in Indiana in October, 1835; d. in Logansport, Ind., 18 April, 1875. He was graduated at the naval academy in 1856, promoted to be master, 5 Sept., 1859, lieutenant, 21 Sept., 1862, and commander, 28 Aug., 1870. He served in the Mississippi squadron during the civil war, taking part in the capture of Forts Donelson and Pillow, the reduction of Island No. 10, and the victory over the Confederate fleet at Memphis, Tenn. On the morning of 19 July, 1863, being then in command of the steamer "Moose," he succeeded in intercepting Morgan, and frustrated his attempts to cross the Ohio at Buffalo Island, having followed him for more than five hundred miles up the river. He saved one man and his goods, crippling his strength, leading to his capture. For these signal services he received complimentary letters from Gen. Burnside, Cox, and Sec. Welles. He also defended Johnsonville, Tenn., from the attack of Gen. Forrest, was present at the engagement on the Ohio, and participated in many minor skirmishes with guerrillas on the Mississippi, Cumberland, and Tennessee rivers. He also accompanied several land expeditions in the same section.

FITCH, Simon, surgeon, b. in Norton, Nova Scotia, 2 Jan., 1830. He received his professional education in London, Paris, and the University of Edinburgh, where he was graduated in August, 1841. He settled in the same year in St. John's, New Brunswick, and practised law in that city until 1855, to the city of New York in 1874, and in 1877 to Halifax, Nova Scotia. In 1871 he introduced an improvement in the double tubular trocar, by removing the projecting canula from the outside to the inside of the puncturing tube. In 1873 he invented the "Trocar Catheter." In 1885, the "Clamp Forceps," and the "Wire Suture Tying Instrument." In 1881 he was resident surgeon of the Edinburgh maternity hospital, and in 1881-2 surgeon to the St. John's hospital, New Brunswick. He was surgeon in 1864 to the 5th corps military hospital at Fredericksburg, Va., held the same office at Fort Preble, Me., in 1867, and is still a consulting surgeon of the Provincial and city hospital, Halifax, Nova Scotia; is member of many medical societies, and has contributed to the literature of his profession works entitled "Peculiarities of the Operations of Three Great Ovariotomists: Wells, Abee, Keith, of Philadelphia," "The Physical and Pathological Parascitesses, Aspiration, and Transfusion" (1877).

FITCH, Thomas, governor of Connecticut, b. in Norwalk, Conn., in June, 1699; d. there in July, 1774. He was graduated at Yale in 1721, studied law, and after middle life filled successively the offices of chancellor, judge of the superior court, and chief justice of his state. His principles were loyal, and, notwithstanding the growing unpopularity of his opinions, he was elected governor in 1754, and held office till 1766. In 1765, Ingersoll, the royal stamp-master of Connecticut, put himself under the protection of Gov. Fitch, and in the same year, at the general assembly held in Hartford, the governor took the oath of office prescribed in the stamp-act. Col. Putnam afterward waited on him to express the sentiments of the people as to the nullity of his office, and the governor refused to admit the "Sons of Liberty," who were coming to destroy the stamped paper, his house would be levelled to the dust in five minutes. In consequence of persisting in the protection of Ingersoll and holding to his loyalist sentiments, the general assembly gave the opportunity of life by electing William Pitkin governor of the state in his stead. Gov. Fitch at once retired to
private life. A monument, raised by public subscription, which is still standing in the private cemetery of his home in Norwalk, Conn., commemorates the life of the brave man, who was an actor, and strict fidelity in discharge of important trusts." His descendants and the collateral branches of his family are still among the most public-spirited citizens of Norwalk. See Van Renselaer's "Ancestral Sketches" (New York, 1829).

FITTON, James, clergyman, b. in Boston, Mass., in 1801; d. there, 15 Sept., 1881. He was ordained by Bishop Fenwick in 1827, and in 1828 was sent as a missionary to the Passamaquoddy Indians. He subsequently labored among the scattered Roman Catholics of New Hampshire and Vermont, and soon the territory between Boston and Long Island was placed under his charge, with Hartford as the centre of his district. In 1855 he removed to East Boston, where he ministered until his death. He was instrumental in establishing the College of the holy cross at Worcester, and the first Roman Catholic newspaper.

FITZ, James, a telescope-maker of Newburyport, Mass., in 1808; d. in New York city, 6 Nov., 1863. He began life as a printer, but, being of an inventive turn, learned the trade of locksmith, at which he worked for many years. In 1835 he made his first reflecting telescope, and in the winter of 1844-45 lost it in the method of preparing objective glasses for refracting telescopes, constructing the first one out of the bottom of an ordinary tumbler. In 1845 he exhibited at the American institute an instrument that brought him the favorable notice of eminent astronomers, and he thenceforth devoted himself to making telescopes as a business with remarkable success. He finally succeeded in producing instruments of sixteen-inch aperture, and also made two of thirteen inches—one for the Dudley observatory at Albany, and the other for an old plan of gentlemen at Alleghany City, Pa. There is one of his manufacture, of twelve inches aperture, at Ann Arbor, and he completed another for the Vassar female college. Mr. Fitz's methods were entirely his own devising. When seized with his final illness, he was about to sail for a town, Herkimer County, N. Y., with a twenty-four-inch telescope, and to procure patents for a camera, involving a new form of lens.

FITZGERALD, Lord Edward, Irish patriot, b. near Dublin, Ireland, 15 Oct., 1763; d. there, 4 June, 1798. He was a younger son of the first Duke of Leinster, and lost his father at the age of ten. His mother married again, and removed to the Continent, where Edward was carefully educated by his step-father. He entered the army on his return to England in 1779, and in 1781 sailed with his regiment for America, where he was appointed aide-de-camp on the staff of Lord Rawdon. He gained in the Revolutionary war no little reputation for personal courage, readiness of resource, and humane feeling, and was severely wounded in the battle of Eutaw Springs, S. C. After the surrender of Cornwallis, he was ordered to the prison staff of Gen. O'Hara in the island of St. Lucia, in 1783, but returned in the same year to Ireland. He was elected as member for Athy in the Irish parliament, and afterward rejoined his regiment at Halifax. He subsequently traveled through the United States, giving the name of the Mississippi river to New Orleans. In 1790 he returned to Ireland, and was again returned to parliament. Having at a public meeting avowed his sympathy with the republicans, and renounced his title, in common with several other English officers, he was dismissed from the army. In 1796 he joined the "United Irishmen," was afterward elected their president, and was sent to France to negotiate a treaty with the Directory for a French invasion of Ireland. The scheme was betrayed to the English ministry, and the principal leaders in association, as well as himself, but Fitzgerald, having concealed himself in a house in Dublin, still continued to direct the movement. A price was set on his head, the place of his retreat discovered, and, after a severe struggle in which he was mortally wounded, he was captured by police officers and committed to prison, 19 May, 1798, where he died in June. See "The Life and Death of Lord Edward Fitzgerald," by Thomas Moore (2 vols., London, 1831).

FITZGERALD, Edward, R. C. bishop, b. in Limerick, Ireland, in 1838. He came to the United States in 1849, entered the College of the Barrrens, Mo., in 1850, and finished his ecclesiastical studies in Mount St. Mary's college, Emmettsburg. He was ordained priest in 1857, and was appointed pastor of a Roman Catholic church in Columbus, Ohio, which had been laid out under the direction of the archbishop of Cincinnati. Father Fitzgerald was entirely successful in restoring harmony among his parishioners, and inducing them to submit to the archbishop. He remained over nine years at Columbus, and in 1867 was consecrated bishop of Little Rock. Owing to the increase of the number of Roman Catholics in his diocese he decreased to little more than a thousand, with five priests and three religious institutions. He used every exertion to attract immigration to the state, with such success that in 1884 the Roman Catholic population was over 7,000, with twenty-three priests and thirty-seven churches. He introduced the monks of the Benedictine order, established a house of the Fathers of the Holy Ghost at Marienstadt, for the purpose of holding special missions among his flock, and also introduced the Sisters of Charity, the Sisters of St. Joseph, and the Benedictines, of whom he placed in charge of asylums and schools. He visited Rome to take part in the deliberations of the Vatican council, and was also a member of the third plenary council of Baltimore in 1884.

FITZGERALD, Thomas, sergeant in German service, b. in Niles, Mich., 25 March, 1855. His father, an Irish soldier in the Revolutionary army, was wounded and pensioned. The son received a common-school education, and served with credit in the war of 1812 under Gen. Harrison. During his connection he studied law, and was admitted to the bar. He then removed to Indiana, where he was elected to the
first legislature that met in Indianapolis, and in 1832 went to Michigan to begin the practice of his profession at St. Joseph. In 1837 he was a member of the U.S. Senate, having been appointed by the governor to fill the vacancy caused by the resignation of Gen. Lewis Cass. Before going to Washington he was named as a commissioner to inquire into the condition of what were known as "wild-cat" banks, and by his perseverance and industry succeeded in effecting the virtual extermination of those discrepant institutions. Senator Fitzgerald was appointed by President Pierce to be a judge in one of the territories, but refused. He was subsequently probate judge of Berrien county, Mich., and was a leader in the Democratic party.

FITZGIBBON, James, British soldier, b. in 1780; d. about 1860. He was almost wholly self-educated, was the son of a farmer, and enlisted in the army when he was seventeen years old. He served in the war against Napoleon I, and in the American war of 1812-15, and in 1816 retired as captain of the Glengarry, Canada, fencibles. He afterward became assistant adjutant-general of the Canadian army, and during the Mackenzie rebellion, his foresight and precautionary measures saved the city of Toronto from the disaffection, for which service he was awarded 5,000 acres of land by the city council, received the thanks of the parliament, and the present of a valuable sword. The grant of land was subsequently disallowed. Gen. Fitzgibbon was chief clerk of the lower house of the Canadian parliament in 1816-29, and clerk of the upper house in 1829-33. In 1830 he was created a military knight of Windsor, and raised in England.

FITZHUGH, Edward Henry, judge, b. in Caroline county, Va., 21 Sept., 1816. He studied law, practised for many years at Wheeling, W. Va., removed to Richmond, Va., in 1861, and served in an important capacity in the quartermaster's department of the Confederate army from 1861 till 1865. He was judge of the chancery court of the city of Richmond from 1870 till 1883, when he returned to the practice of his profession. Judge Fitzhugh has been active in the councils of the Presbyterian church, and in 1867 was elected a member of the executive committee of "the organization and education" of the general assembly.

FITZHUGH, George, sociologist, b. in Prince William county, Va., 2 July, 1867; d. in Huntsville, Walker co., Texas, 30 July, 1881. He was largely self-taught, the only education he received as a child being gained in what were known as the "field schools" of his native county. That amount of knowledge thus acquired was probably not great, may be inferred from the fact that Fitzhugh, when only nine years of age, was frequently left in sole charge of the other pupils during the extended absence of the teacher. In spite of these early disadvantages, he succeeded in securing a good education, studied law, and practised his profession for many years in Port Royal, Va., making a specialty of criminal cases. During President Buchanan's administration Mr. Fitzhugh was employed in the office of Attorney-General Black, and of the land-claim department. About this time he made his only visit to the northern states, lecturing in Boston, and visiting his relative by marriage, Gerrit Smith. At the house of the latter he met Mrs. Garrison, at whose suggestion and influence his acquaintance with the antislavery movement derived its significance from his peculiar political opinions. Mr. Fitzhugh was a frequent contributor to the press, writing for the "New York Day-Book," "Richmond Examiner," "De Bow's Review," and other journals and periodicals. He was "an eccentric and extreme thinker," claiming that slavery is the natural and rightful condition of society, which, when not founded on human servitude, tends to cannibalism. He did not base his argument upon the inferiority of the negro, but maintained that the laboring classes of mankind, irrespective of color, should be slaves, as in Greece and Rome. During the civil war he wrote: "It is a gross mistake to suppose that 'abolition' is the cause of dissolution between the north and the south. The Cavaliers, Jacobites, and Huguenots of the south naturally hate, condemn, and despise the Puritans who settled the north. The former are master races, the latter a slave race, the descendants of the Saxon serfs." His opinion of free labor may be gathered from the following extracts from his "Sociology for the South": "The free laborer rarely has a home and home of his own; he is insecure of employment; sickness may overtake him at any time and deprive him of the means of support; old age is certain to overtake him if he lives, and generally finds him without the means of subsistence; his family is probably increasing in size, during the time of his labor; the burden of support is too heavy, and becomes oppressive to him. In all this there is little to invite to virtue, much to tempt to crime; nothing to afford happiness, but quite enough to inflict misery. Man must be more than human to acquire a pure and a high morality under such circumstances." And again: "Slavery without law would be a curse, and so would marriage and parental authority. The free laborer is excluded from its holy and charmed circle. Shelterless, naked, and hungry, he is exposed to the bleak winds, the cold rains, and hot sun of heaven, with none that love him, none that care for him. His employer hates him because he asks high wages or joins strikes; his fellow-laborer hates him because he competes with him for employment. Foolish abolitionists! bring him back, like the prodigal son. Let him fare as well as you do, and love the sheep. Better to lie down with the kids and the goats, than stand naked and hungry without. As a slave, he will be beloved and protected. Whilst free, he will be hated, despised, and persecuted. Such is the will of God and order of Providence. It is idle to improve the baseless, but Mr. Fitzhugh published "Sociology for the South, or the Failure of Free Society" (Richmond, 1854), and "Cannibals All, or Slaves Without Masters" (1856).

FITZHUGH, William, lawyer, b. in Bedford, England, 9 June, 1631; d. in Stafford county, Va., in October, 1701. He was a lawyer by profession, and lived in that portion of Stafford county now comprised in King George county, and founded the Fitzhugh family of that state. He was also a merchant, planter, and shipper. A manuscript volume of his correspondence, covering the period from 1679 till 1699, has been printed, and many letters of the letters is in the collections of the Virginia historical society. Mr. Fitzhugh acted as counsel for Maj. Robert Beverley, father of the historian of Virginia and secretary of the colonial council, who was indicted for "cutting" tobacco-plants, and found guilty, of a "bloodless murder," and liable to a fine of $500, of "impertinent and crass manners," including a refusal to deliver up the records of the council. Although he had been an active and efficient partisan of Gov. Berkeley in the popular uprising stigmatized as "Bacon's rebellion," he was only dealt with by being imprisoned and disfranchised. He was finally released on asking pardon of the council on his bended knees.
FITZHUGH, William Henry, philanthropist, b. in Chatham, Stafford co., Va., 8 March, 1792; d. in the United States, 1838. He was a son of William F. Fitzhugh, a patriot of the Revolution, who was graduated at Princeton in 1808, and settled on the patrimonial domain of “Ravensworth,” Fairfax co., Va. He was elected vice-president of the American colonization society, and took an active part in all that was done in its behalf. In 1826 he was appointed an assistant examiner and pen. In 1826 he published a series of essays in behalf of the cause, over the signature of “Opimius,” in the columns of the Richmond “Inquirer.” He was also the author of an address delivered on the ninth anniversary of the society, and of a review of “Tazewell’s Report” in the “African Repository” (August and November, 1828). In one of his essays he expresses the opinion that “the labor of the slave is a curse on the land on which it is expended,” which seems like a truism now, but was bold then.

FITZPATRICK, Benjamin, senator, b. in Green county, Ga., 30 June, 1802; d. in Autauga county, Ala., 25 Nov., 1869. He removed to Alabama in 1815, when it was a territory, read law in the office of Judge Benson, of Montgomery, and, after his admission to the bar, became a partner of Henry Goldthwaite, who afterward rose to eminence in his profession. Mr. Fitzpatrick was the next year elected solicitor of the Montgomery circuit, and re-elected in 1823. Meanwhile he married a daughter of Gen. John Elmore, formerly of South Carolina, and the following year abandoned the practice of his profession too severe for his declining health, and retired to his plantation in Autauga county, near Montgomery, where he engaged successfully in agriculture. In 1840, as a candidate for presidential elector on the Democratic ticket, he engaged in an active canvass in behalf of Mr. Van Buren, and took part in an animated discussion with Henry W. Hilliard, candidate for elector in the same district on the Whig ticket, who ardently advocated the claims of Gen. Harrison. In 1844, Mr. Fitzpatrick was elected governor of Alabama by a majority of nearly 7,000 over Col. Mc- Lung, of Huntsville, and in 1848 was re-elected without opposition. On the death of Hon. Dixon H. Lewis, in 1848, Gov. Chapman appointed Mr. Fitzpatrick to fill the unexpired term in the senate of which Mr. Lewis died. In 1851 he was appointed by Gov. Collier to succeed William R. King in the senate, and was elected by the legislature to fill the unexpired term. In 1855 he was elected to the senate for a full term of six years. He was elected president of the senate pro tempore, and served in four successive sessions. At the Democratic national convention, held in Baltimore in 1860, Mr. Fitzpatrick was nominated for vice-president on the ticket with Mr. Douglas, who was a candidate for the presidency; but he promptly declined, and Herschel V. Johnson, of Georgia, was nominated in his place. When Alabama adopted her ordinance of secession in 1861, Mr. Fitzpatrick withdrew from the senate and returned home. At the close of the civil war he took part once more in public affairs, was elected by the people of Autauga county to the convention called to frame a new constitution for the state, and served on the convention. When it had finished its work he retired to his plantation, where he passed his last years in broken health, but still attending to the duties that pressed upon him as cheerfully as possible in view of the decline of his fortunes resulting from the war. Mr. Fitzpatrick was distinguished for integrity, unserving loyalty to truth, and manly bearing in public affairs.

FITZPATRICK, John Bernard, R. C. bishop, b. in Boston, Mass., 1 Nov., 1812; d. there, 13 Feb., 1866. He studied in the Boston Latin-school in 1838-9, and in the latter year was sent to Montreal college, where he was appointed professor of rhetoric and belles-lettres while still a pupil. He completed his course of study in Montreal in 1837, and then took a course in the General seminary of St. Sulpice, Paris. He returned in 1839, was ordained in 1840. His first mission was at the Boston cathedral. He was afterward appointed pastor of East Cambridge, where he succeeded in composing dissensions of long standing. He was nominated coadjutor bishop of Boston 1844, and in 1846 succeeded Bishop Fenwick. His administration was signed by many lamentable occurrences. In 1854 the Roman Catholic church of Dorchester was blown up by unknown persons, and the “Ellsworth outrage” took place, in which a priest was inhumanly treated by his fellow-citizens. He visited Rome in 1854, and on his return had a remarkable controversy with the Boston school board, which resulted in the repeal of rules that were obnoxious to the Roman Catholic pupils. The Roman Catholic population increased so rapidly under his administration that a new Augustinian college was created out of that of Boston. When he entered on his episcopate there were forty priests and forty churches in his diocese; at its close there were three hundred priests and three hundred churches. He had also erected one of the finest orphan asylums in the country, a large reformatory, a hospital, a college, and had increased the number of religious communities and orders fivefold.

FITZSIMMONS, Thomas, statesman, b. in Ireland in 1741; d. in Philadelphia, Pa., in August, 1811. He emigrated to this country and became a merchant in Philadelphia. During the Revolutionary war he commanded a company of volunteers. He was for many years a member of the Pennsylvania assembly, a delegate to the Continental congress in 1782-3, and to the Constitutional convention in 1787. From 1793 till 1796 he was in the National congress. In 1790 the firm of George Meade & Co., of which Mr. Fitzsimmons was a member, subscribed £5,000 toward supplying the Continental army with necessary equipments. Mr. Fitzsimmons was president of the Philadelphia chamber of commerce, and also of the North American insurance company.

FLAGET, Benedict Joseph, R. C. bishop, b. in Contournat, Auvergne, France, 7 Nov., 1763; d. in Nazareth, Ky., 11 Feb., 1850. He was first educated in the college of Bilhom, and afterward took a course of philosophy in the University of Clermont. He then studied theology at the Sulpician college in the same city, and became a member of that order in 1783. He continued his studies at Issy, near Paris, and in 1788 was ordained priest. He was professor of dogmatic theology for two years in the University of Nantes, and then held the same office in the seminary of Angers at the beginning of the French revolution. He was obliged to fly, and came in 1792 to Baltimore, Md., whence he was at once sent by Dr. Carroll as chaplain to Vincennes, then a military post in the northwest. During six months of it, at the request of Dr. Pattison, he accepted as chaplain to the Catholics in the army of Gen. Wayne, who was organizing a force to attack the Indians. His congregation at Vincennes was composed of 700 half-breeds, who were little better than savages, and his success in civilizing them was considerable. He was recalled in 1795 and sent to Georgetown college, where he was professor for three years. In 1798 he accompanied two other
Sulpicians to Havana for the purpose of establishing a college in that city, but they met with opposition from the native clergy, and were forbidden to perform any priestly function. Father Flaget's two companions withdrew from the island, but, as he was prostrated by yellow fever, they had to leave him behind. On his recovery he became tutor to the sons of a wealthy Cuban, and when in 1801 the archbishop, was restored to his secederical privileges. During this period he rendered great service to the Orleans princesses, which were warmly reciprocated when Louis Philippe became king of the French. Father Flaget left Havana in 1801, taking with him twenty-three young Cubans to be educated at Georgetown college. The ensuing seven years were spent in college duties and missionary labors. About the year 1804 he had petitioned to be received into the order of Trappists, the severest in the Roman Catholic church, but in 1807 he was appointed bishop of Bardstown, Ky., and though he made several efforts to be released, and went to Europe for this purpose, he was consecrated on his return in 1810. He arrived at Bardstown in the following year. The number of priests in his diocese, which extended from the Atlantic Ocean to the Mississippi and from the lakes to the thirty-fifth parallel, was only seven, with ten chapels, and six more in course of erection. To meet the demand for priests he gave great attention to the diocesan seminary. In 1817 he was able to send missionaries to the French and Indian communities living around the great lakes, as well as to supply Indiana and Michigan. By his request he was given an assistant, Father David, in 1819, and in the following years he was engaged in a correspondence with Rome relative to the creation of new sees. He was the first to suggest the erection of an archiepiscopal see in the west. His advice was also sought by the Propaganda with regard to affairs external to the church in the United States, and a controversy that existed for some time between the Sulpicians of Canada and the bishop of Quebec was decided according to his suggestion.

He attended the first provincial council at Baltimore in 1829, and in the following year, owing to declining health, resigned his see. His resignation was accepted, but so great was the opposition of the clergy and laity of the west that he was compelled to withdraw it. During the cholera epidemic of 1833 his attention to the afflicted of all classes and creeds excited general admiration. In 1834 he received a new conclave in the person of Bishop Chaminade, who had erected four colleges, a large female orphan asylum and infirmary, eleven academies for girls, and had introduced three religious sisterhoods and four religious orders of men. He was in Europe from 1835 till 1838, and in 1841 the seat of his diocese was transferred to Bardstown. In 1843 he built a convent and hospital at his own expense, and in 1848 was instrumental in establishing a colony of Trappists at Gethsemane, fourteen miles from Bardstown. The remainder of his life, owing to his infirmities and his extreme age, was passed in strict retirement.

FLAGG, Azariah Cutting, politician, b. in Clinton county, N. Y., in 1790; d. in New York city, 24 Nov., 1873. When he was nine years old his father removed to Richmond, Va., and at the age of eleven he became the property of the bishop of Burlington. Here he remained until about 1811, when he removed to Plattsburg, N. Y., and served as a soldier in the war of 1812, participating in several engagements. In 1812 or 1813, Mr. Flagg established the Plattsburg "Republican," of which he was for many years the editor and owner. In 1828-4 he represented Clinton county in the assembly, and in 1826 was appointed by Gov. De Witt Clinton secretary of state, which office he held until 1835. He was comptroller of the state in 1834-9, and again in 1842-6. During almost his entire public life, and especially after his removal to the city of New York, in 1846, Mr. Flagg was one of the leaders of the Democratic party in the state, and also bore the reputation of being one of its ablest financiers. For many years he did duty in the state bank, and was an active member of the Albany "Arms." He was one of the most determined opponents of the U. S. bank, rendered efficient aid to De Witt Clinton in moulding public opinion with regard to his policy, and later was outspoken in his opposition to the pro-slavery tendencies of the Democratic party. He was elected comptroller of the city of New York in 1832, and re-elected in 1835. Soon after leaving office, in 1839, he became blind, but never lost his interest in current political events,—his nephew, Willard Cutting, agriculturist, b. 1818, d. 1899; d. there, 30 March, 1878, was graduated at Yale in 1844, and then took charge of his father's extensive farm. He soon became prominent in local politics, was collector of internal revenue for the 12th district of Illinois in 1860-9, and a member of the state senate in 1867-9. He wrote frequently for the press on agricultural and political subjects, was one of the originators of the "farmers' movement" in the west, and was chosen, in 1873, first president of the Illinois state farmers' association. He served, in addition, as trustee of the Industrial university, as president of the National agricultural congress, and secretary of the American pomological society. He was for many years horticultural editor of the "Prairie Farmer," and for a few months before his death was editor-in-chief of the "American Encyclopedia of Agriculture," for which he had collected much valuable material. He was considered one of the best pomologists of the day.

FLAGG, Edmund, author, b. in Wiscasset, Me., 24 Nov., 1815. He was graduated at Bowdoin in 1839, and soon afterward taught in Louisville, Ky., where he also contributed to the "Louisville Journal," with which his connection continued for nearly thirty years. He read law in St. Louis, where he was admitted to the bar in 1837. He edited the St. Louis "Commercial Bulletin" in 1838, served as this paper's editor, and was editor of the "Louisville Literary News-Letter" in 1838-9, practised law in Vicksburg, Miss., in 1840-1, and at the same time was editor of the "Whig," in which capacity he was severely wounded in a duel with the editor of the Vicksburg "Sentinel." He was editor of the "Louisville and Nashville Gazette" at Marietta, Ohio, in 1843, and the St. Louis "Evening Gazette" in 1844-5. He subsequently acted as the official reporter of the courts.
of St. Louis, reported a volume of debates in the Constitutional convention of Missouri, and in 1842 in the Berlin "Annalen," 1850-'1 he was U. S. consul at Venice, and also correspondent for several New York journals. On his return, in February, 1852, he at once took charge of a Democratic paper in St. Louis, and edited it during the presidential campaign of that year. He was afterward "Poet Laureate" of the St. Louis Journal, and afterward editor of the "St. Louis Globe-Democrat." In 1856-'7 he was contributing editor to the "St. Louis Post-Dispatch," and in 1858-'9 he was manager of the "St. Louis Republic," and afterward manager of the "St. Louis Republican News." In 1859-'60 he was manager of the "St. Louis Times." In 1861-'2 he was manager of the "St. Louis Post-Dispatch," and in 1863-'4 he was manager of the "St. Louis Republican News." In 1865-'6 he was manager of the "St. Louis Republican News." In 1867-'8 he was manager of the "St. Louis Republican News." In 1869-'70 he was manager of the "St. Louis Republican News." In 1871-'2 he was manager of the "St. Louis Republican News." In 1873-'4 he was manager of the "St. Louis Republican News." In 1875-'6 he was manager of the "St. Louis Republican News." In 1877-'8 he was manager of the "St. Louis Republican News." In 1879-'80 he was manager of the "St. Louis Republican News." In 1881-'2 he was manager of the "St. Louis Republican News." In 1883-'4 he was manager of the "St. Louis Republican News." In 1885-'6 he was manager of the "St. Louis Republican News." In 1887-'8 he was manager of the "St. Louis Republican News." In 1889-'90 he was manager of the "St. Louis Republican News." In 1891-'2 he was manager of the "St. Louis Republican News." In 1893-'4 he was manager of the "St. Louis Republican News." In 1895-'6 he was manager of the "St. Louis Republican News." In 1897-'8 he was manager of the "St. Louis Republican News." In 1899-'10 he was manager of the "St. Louis Republican News." In 1901-'2 he was manager of the "St. Louis Republican News." In 1903-'4 he was manager of the "St. Louis Republican News." In 1905-'6 he was manager of the "St. Louis Republican News." In 1907-'8 he was manager of the "St. Louis Republican News." In 1909-'10 he was manager of the "St. Louis Republican News." In 1911-'2 he was manager of the "St. Louis Republican News." In 1913-'4 he was manager of the "St. Louis Republican News." In 1915-'6 he was manager of the "St. Louis Republican News." In 1917-'8 he was manager of the "St. Louis Republican News." In 1919-'20 he was manager of the "St. Louis Republican News." In 1921-'2 he was manager of the "St. Louis Republican News." In 1923-'4 he was manager of the "St. Louis Republican News." In 1925-'6 he was manager of the "St. Louis Republican News." In 1927-'8 he was manager of the "St. Louis Republican News." In 1929-'30 he was manager of the "St. Louis Republican News." In 1931-'2 he was manager of the "St. Louis Republican News." In 1933-'4 he was manager of the "St. Louis Republican News." In 1935-'6 he was manager of the "St. Louis Republican News." In 1937-'8 he was manager of the "St. Louis Republican News." In 1939-'40 he was manager of the "St. Louis Republican News." In 1941-'2 he was manager of the "St. Louis Republican News." In 1943-'4 he was manager of the "St. Louis Republican News." In 1945-'6 he was manager of the "St. Louis Republican News." In 1947-'8 he was manager of the "St. Louis Republican News." In 1949-'10 he was manager of the "St. Louis Republican News." In 1911-'2 he was manager of the "St. Louis Republican News." In 1913-'4 he was manager of the "St. Louis Republican News." In 1915-'6 he was manager of the "St. Louis Republican News." In 1917-'8 he was manager of the "St. Louis Republican News." In 1919-'20 he was manager of the "St. Louis Republican News." In 1921-'2 he was manager of the "St. Louis Republican News." In 1923-'4 he was manager of the "St. Louis Republican News." In 1925-'6 he was manager of the "St. Louis Republican News." In 1927-'8 he was manager of the "St. Louis Republican News." In 1929-'30 he was manager of the "St. Louis Republican News." In 1931-'2 he was manager of the "St. Louis Republican News." In 1933-'4 he was manager of the "St. Louis Republican News." In 1935-'6 he was manager of the "St. Louis Republican News." In 1937-'8 he was manager of the "St. Louis Republican News." In 1939-'40 he was manager of the "St. Louis Republican News." In 1941-'2 he was manager of the "St. Louis Republican News." In 1943-'4 he was manager of the "St. Louis Republican News." In 1945-'6 he was manager of the "St. Louis Republican News." In 1947-'8 he was manager of the "St. Louis Republican News." In 1949-'10 he was manager of the "St. Louis Republican News."
FLANAGAN, James Winright, lawyer, b. in Gordonsville, Va., 3 Sept., 1823. His parents removed to Kentucky, where he received a limited education, engaged in mercantile pursuits, and was a justice of the peace for twelve years. He was a member of the circuit court of Breckinridge county from 1839 till 1843, when he removed to Harrison county. Kentucky, where he remained one year settled in Henderson, Rusk co., Texas, where he was the first to sell merchandise. He also became interested in cotton-planting. He was a member of the state house of representatives in 1851-2, and of the state senate in 1853-4. In 1857, he was a delegate to the peace congress of 1861. He was a member of the State constitutional conventions of 1866 and 1868. In 1869 he was elected to congress for the state at large, and in that year he also held the office of lieutenant-governor. He was elected to the U. S. Senate as a Republican, serving from 1870 till 1875, and was a member of the committees on mines and mining, and post-offices, and chairman of the committee on education and labor. After his service he retired to his farm near Longview, Texas, and occasionally appears in court, notwithstanding his advanced age. He was an "old-line Whig" before he united with the Republican party.

His son, Webster, politician, b. in Clovisport, Breckinridge co., Ky., 9 Jan., 1832, was admitted to the bar in 1851, and became interested in politics, holding important local offices at the beginning of the civil war he was commissioned brigadier-general of volunteers in the Confederate service. In 1865 he was appointed judge of the 5th judicial district of Texas. He was elected to the State constitutional convention in 1869, and two years afterward became lieutenant-governor of the state. He was chairman of the delegation to the Republican convention which met in Philadelphia in 1872, and served as member of the Texas senate till 1873, when he represented his district in another convention, thus assisting in the formation and adoption of two state constitutions. In 1880 he was a Texas member of the "Grant guard" at the Chicago convention. The civil service was brought under discussion, and when Mr. Barker, from Massachusetts, declared that certain offices in Boston, an "A"; "Woods and By- ways of New England" (1872); and "Birds and Seasons of New England" (1875). He also edited "Mount Auburn, its Scenes, its Beauties, and its Lessons." Most of the matter contained in the three volumes first mentioned has been republished, with some new material, under the title "Halycon Days"; "A Year with the Birds," and "A Year with the Bishop." (Boston, 1881.)—His son, Isaac, educator, b. in Beverly, Mass., 7 Sept., 1843, was a student at Phillips Andover academy, and graduated at Harvard in 1864. After serving as tutor in Greek at Harvard from 1865 till 1868, he studied in the universities of Berlin and Göttingen during 1868-9. He has since been professor of Greek at Cornell university, and has edited "The Hellenic Orations of Demosthenes" (Boston, 1884) and "The Seven Against Thebes of Aeschylus" (Boston, 1885).
FLASCH, Killian, R.C. bishop, b. in Retzstadt, Bavaria, in 1831. He came with his parents to the United States in 1847, studied in the college of Notre Dame, and the theological seminary of Milwaukee, began his theological studies in the Salesianum, Milwaukee, in 1856, and was ordained priest in 1859. He was assigned to missionary work at Laketown, where he remained until 1860, when he was appointed professor in the Salesianum. He resided there 1867, and took charge of an orphan asylum near Milwaukee. In 1870 he was appointed rector of the Salesianum, and in 1881 consecrated bishop of La Crosse.

FLASH, Henry Lyden, poet, b. in Cincinnati, Ohio, in 1846. His parents emigrated to the West Indies, where he was born, and in 1837 he was removed to New Orleans. Henry was graduated at the Western military institute of Kentucky in 1852. At the beginning of the civil war he entered the Confederate army, and served as a volunteer aide on the staffs of Gen. William J. Hardee and Gen. Joseph Wheeler. At its close he edited the "Confederate" in Macon, Ga. He engaged in business in New Orleans from 1866 until his retirement in 1886, and at present (1887) resides in Los Angeles, Cal. Mr. Flash is best known under the pen-names of "Lyden Belair" and "Harry Flash." He has published a volume of poems (New York, 1860).

FLEET, Thomas, printer, b. in Shropshire, England, 8 Sept., 1865; d. in Boston, Mass., 21 July, 1798. He learned the business of printing in Bristol, England, and came to America at the age of twelve years. He published "Pune Lane." (now Devonshire street), Boston. He married Elizabeth Good, daughter of a wealthy Bostonian, 8 June, 1715. His mother-in-law, who lived at his house, spent her whole time in the nursery and in wandering about the house, pouring forth, in unmeaning conversation, the abuse for the amusement of Fleet's infant son, greatly to the annoyance of the whole neighborhood, and of Fleet in particular. He endeavored for a long time, by every means in his power, to put an end to it; but his good mother-in-law would not be silenced. Finally he conceived the idea of quietly writing down her songs, which he did, and published them in book form under the title, "Songs for the Nursery; or, Mother Goose's Melodies for Children. Printed by T. Fleet, at his Printing House, Pudding Lane [now Spring Street], 1716. Price one penny, two copper." The book was popular and remunerative. In 1731 Fleet built himself a mansion on the corner of Water street, having for his sign a heart and crown. Here he lived with his family, prosecuted printing and editing, and maintained a shop and an auction room. In 1738 he became proprietor and publisher of the "Weekly Rehearsal," which two years afterward was changed to the "Boston Evening Post," and in its management he continued until his death. He possessed a vein of keen though coarse wit, that was suited to the times, and aided the popularity of the paper. His eldest son, Thomas, over whose cradle the celebrated "Mother Goose Melodies" were gathered, aided his father, and after his death succeeded him in the management of the paper. From 1770 till 1801 he published the "Boston Annual Register," and printed the first edition of Hutchinson's "History of Massachusetts."

FLEMING, John, printer. He was one of the publishers of the Boston "Chronicle" in 1767, the first paper that was published twice a week in New England. In the second year of its publication it espoused the royal cause, and in 1770 was suspended. Fleming found it prudent to retire, and went to England in 1773, and subsequently to France, where he resided until his death.

FLEMING, Michael, R.C. Canadian bishop, b. in Ireland about 1828; ordained in 1877, and consecrated in the Salesianum, in 1880. He was nominated coadjutor to the vicar apostolic of Newfoundland in 1891, and in 1899 succeeded to the vicariate. At this time Newfoundland was without schools, and had only a few churches. The knowledge that he had acquired of the condition of the poor during his coadjutorship enabled him to introduce several reforms. He divided it into thirteen districts, and built churches, presbyteries, and schools, in each. In 1884 he obtained permission from the government to build a cathedral, a convent, and schools. The bishop's annual visitation in each diocesan city enabled him to give the necessary support. In 1846 he sent missionaries to Labrador. In 1849, Pius IX. erected the city of St. John's into a bishopric and nominated him its first bishop.

FLEMING, Sandford, Canadian engineer, b. in Kirkcaldy, Fife-shire, Scotland, 7 Jan., 1827. He received his early training there, and served an apprenticeship as a surveyor and engineer. He emigrated to Canada in 1844, and in 1852 was appointed one of the engineering staff of the Northern railway, then known as the Ontario, Simcoe, and Huron railway had authorized him to make a river settlement, for the purpose of ascertaining the practicability of connecting that section with the rest of Canada. In 1883 he went to Great Britain to present the memorial of the inhabitants of Red river settlement, petitioning for railway communication, which was not successful. On his return he was commissioned to make a preliminary survey of a pro-
lected line of railway to connect the maritime provinces with Canada, and this he accomplished: but the work of construction was not prosecuted to any great extent until the completion of the road had been rendered imperative in 1867 by the conditions imposed upon the Dominion government as a part of the union of the maritime provinces. Under Mr. Fleming's supervision, as chief engineer, the Intercolonial railway was successfully completed, and was formally opened on 1 July, 1876. While this railway was under construction, Mr. Fleming was ordered in 1871 to survey a railroad connecting Canada with the Pacific ocean. This work he had most successfully prosecuted, when political exigencies arose, and he resigned in 1880. Though he was not afterward connected with the Canada Pacific railway, the ultimate success of that great enterprise was owing largely to his skill. In recognition of his ability as an engineer, he was made in 1877 a companion of the order of St. Michael and St. George; in 1880 he was elected chancellor of Queen's university, Kingston, Ontario; in 1881 he represented the Can- adian Pacific union and the American society at the International geographical congress at Venice; and in 1884 the Dominion at the International prime-meridian conference at Washington, D.C. The same year he received the degree of L.L.D. from St. Andrew's university. He has published "The history of the United Empire," besides reports on his engineering enterprises.

**FLEMING, Thomas**, soldier, b. in Botetourt county, Va., in 1727; d. there in August, 1776. He commanded 200 men at the battle of Point Pleasant, with the Indians, in 1774. Point Pleasant is the junction of the Kanawha and Ohio rivers. The whites were commanded by Gen. Andrew Lewis, of Augusta county, Va., and the Indians by Cornstalk. The soldiers of Col. Fleming's division concealed themselves behind trees and held out their hats, which the Indians fired at. The hats dropped, the Indians ran out to scalp their victims, and were tomahawked by the settlers, who were all backwoodsmen. The first division was commanded by Col. Charles Lewis, kinsman and neighbor of Col. Fleming. The Indians numbered about 1000; the whites, 400. Col. Fleming's division was attacked on the bank of the river, a low bottom, hemmed in on both sides by mountains. After leading his soldiers with great bravery and discretion in two charges, Col. Fleming was severely wounded, two balls passing through his arm and one through his breast. After cheering on the officers and soldiers, he retired from the field. In March, 1776, he was appointed colonel of the 9th Virginia regiment in the Revolutionary army. He died of disease that had been contracted by fatigue and exposure in camp.

**FLEMING, William**, statesman, b. in 1734; d. 2 Feb., 1824. He was graduated at Williams and Mary college in 1753, was a member of the house of burgesses and of the Virginia conventions in 1775-6, member of the committee on independence in May, 1776, became judge of the general court and judge of the court of admiralty, and served as a delegate from Virginia to the Continental congress in 1777-81.

**FLEMING, William Maybury**, actor, b. in Danbury, Conn., 29 Sept., 1817; d. in New York, 7 May, 1866. He began his professional career at about twenty years of age, and became known chiefly for his personations of Romeo, Claude Melnotte, Edgar in "King Lear," the Bastard in "King John," Hamlet, Richelieu, Sir Giles Overreach, Sir Edward Mortimer, Mathias in "The Bells," Rolfs, Jack Cade, and a few special rôles of poetic character. In 1852 he assumed control of the National theatre, Boston, which he directed for several years. After visits to England and California, he became lessee and manager of the Savannah Athenaeum and the Macon theatre simultaneously, acting occasionally as a star of the theatre of the maritime provinces. Under Mr. Fleming's supervision, as chief engineer, the Intercolonial railway was successfully completed, and was formally opened on 1 July, 1876. While this railway was under construction, Mr. Fleming was ordered in 1871 to survey a railroad connecting Canada with the Pacific ocean. This work he had most successfully prosecuted, when political exigencies arose, and he resigned in 1880. Though he was not afterward connected with the Canada Pacific railway, the ultimate success of that great enterprise was owing largely to his skill. In recognition of his ability as an engineer, he was made in 1877 a companion of the order of St. Michael and St. George; in 1880 he was elected chancellor of Queen's university, Kingston, Ontario; in 1881 he represented the Canadian Pacific union and the American society at the International geographical congress at Venice; and in 1884 the Dominion at the International prime-meridian conference at Washington, D.C. The same year he received the degree of L.L.D. from St. Andrew's university. He has published "The history of the United Empire," besides reports on his engineering enterprises.

**FLETCHER, Asaph**, physician, b. in Westford, Mass., 26 June, 1746; d. in Cavendish, Vt., 5 Jan., 1839. He was elected in 1790 to the convention that formed the constitution of Massachusetts, and labored earnestly to introduce into that instrument the principle of absolute freedom of worship. In 1787 he removed to Cavendish, Vt., where he soon became prominent. He was a member of the Vermont convention which was to submit the admission of that state into the Union, and also of a subsequent convention for revising the state constitution. Here, as in Massachusetts, he ably advocated the principles of religious liberty. He was one of the presidential electors that made James Monroe president of the United States.

**FLETCHER, Richard**, lawyer, b. in Cavendish, Vt., 8 Jan., 1788; d. in Boston, Mass., 21 June, 1869, was graduated from Dartmouth college in 1806, and, having studied law with Daniel Webster, was admitted to the bar in 1809. He practised in Salisbury, N. H., till 1816, and then removed to Boston, Mass., where he spent the remainder of his life. He was distinguished in commercial and maritime law, and particularly in the law of marine insurance. He was a member of the legislature, and in 1839 was elected to Congress, where, as a Whig, defeating Charles Sumner, and serving one term. In 1848 he was appointed judge of the Massachusetts supreme court, which office he held until his resignation in 1853. He then resumed his practice, but retired in 1858. He was a trustee of Brown in 1848-52, and a member of the college. In 1862 he was graduated at Harvard. The degree of L.L.D. was conferred on him by Brown in 1839, by Dartmouth in 1846, and by Harvard in 1849. Judge Fletcher was never married. He was active in all benevolent enterprises, and bequeathed more than $100,000 to Dartmouth. He published a speech to his constituents, delivered in Faneuil Hall (Boston, 1837).

—Another son, Horace, clergyman, b. in Caven- dish, Vt., 28 Oct., 1796; d. 27 Nov., 1871, studied law, was admitted to the bar, and continued in the practice of his profession for fifteen years. He then abandoned it, and was ordained pastor of the Baptist church in Townsend, Vt., where he remained until his death. He was one of the most useful and respected ministers in his native state. He was chosen state senator in 1855. In 1860, Madison university conferred upon him the degree of D.D.—Another son, Ryman, other son, of Vermont, b. in Cavendish, Vt., 18 Feb., 1799; d. in Proctorsville, Vt., 19 Dec., 1888, studied in the Norwich military academy, and became a farmer. He was active as an anti-slavery agitator, was chosen to the state senate, and lieutenant-governor of Vermont from 1854 till 1856, when he was elected governor of the state by the Free-soil party, serving until 1858. From 1861 till 1864 he was a representative in the legislature. In 1864 he was a presidential elector on the Republican ticket.
FLETCHER, Benjamin, governor of New York, lived in the 17th century. Col. Fletcher, who was a soldier of fortune, was appointed governor by William and Mary, and, after soliciting troops, presents for the Indians, and war stores, arrived in New York on 29 Aug., 1692. He visited the Mohawk tribe, was entertained by the warriors, and learned their character and dialect. When Schuyler went to the relief of the Indians against the French, Fletcher joined him at Schenectady, on 17 Feb., 1793, and assisted the Indians, who gave him the name of "Great White Arrow." During his administration the sum of $8000 for the defence of the frontier was granted by the assembly. Fletcher had much difficulty in bringing the different colonial factions to an agreement. He said he ruled "a divided, contentious, and impoverished people." He endeavored to obtain control of the Connecticut militia, which had been improperly granted him in his commission; but the assembly of that colony refused to acknowledge his right, and sent Winthrop to England to lay the matter before the council, who decided in favor of Connecticut. In 1692, Col. Fletcher received a commission from William and Mary to assume the government of Pennsylvania and the annexed territories, which had been urged by the merchants of Penn as necessary for the safety of the colony. He arrived in Philadelphia in April, 1793, in great pomp, and the government was immediately surrendered to him. Annoyed by the subversiveness of Lloyd and Markham, Penn wrote to Fletcher cautioning him to "tread softly," as the territory and government were his. Fletcher summoned the assembly, and thus excited the opposition of the council, which protested against calling the legislature in defiance of the laws made by Penn. The assembly met, and Fletcher demanded money to defray the expenses incurred in the expedition against the French in Albany. This demand was fortified by a letter from Queen Mary, in which she expressed her will that the colonies should contribute troops and money in defence of the frontier, according to the dictates of the governor of New York. A bill of a penny a pound for the support of the government, and a poll-tax of six shillings, which yielded over $7000, was passed. Fletcher appointed William Markham, deputy governor, and then returned to his colony. He again met and addressed the assembly in the following year. During his stay in Pennsylvania he presided at the trial of the printer, William Bradford. Desirous of introducing printing into his colony, Fletcher took Bradford to New York, where he set up the first press, and printed the corporation laws. Fletcher was passionate, reckless, and avaricious, and was accused of paying little attention to the navigation laws, and of protecting piracy for his private gain, in his association with Kidd and Tew, and the abundance of Arabian and East India goods in the colony, seemed to justify the suspicion. He was finally deposed, and Bellmont appointed in his stead. His zeal for the Anglican church in the colony proved an enigma in the religious history of New York. He built a small chapel in the fort in 1693, for which the queen sent books, plate, and other furniture. This was burned in 1741, and little is known of its history. In 1697 a charter was granted for building a church on "King's farm," which was called Trinity church, and the present building of this name stands on the same ground. The seal and autograph are from a patent of city property granted to Samuel Bayard of New York in 1697.

FLETCHER, Jonas Conley, clergyman, b. in Indianapolis, Ind., in 1823. He was graduated at Brown in 1846. After studying theology two years at Princeton, he went to Europe to complete his theological course and perfect himself in the French language, in order to become a missionary in Haiti. He returned to Haiti in 1851 and in 1851 abandoned the mission to Haiti, and went to Rio de Janeiro as chaplain missionary of the American and foreign Christian union, and of the American seamen's friend society. He returned to the United States in 1854, but during 1855-6 travelled 3,000 miles in Brazil distributing Bibles as the agent of the American Sunday-school union. In 1862 he travelled 2,000 miles up the Amazon, and made a collection of rare objects in natural history for Professor Agassiz. The result of his labor was "Brazilian Plants" (Philadelphia, 1857), and "Brazilian Birds" (Philadelphia, 1857). His daughter, Julia Constance, author, b. about 1850, is a resident of Rome, and a favorite in the literary society of that city. Her novels, written under the pen-name of "George Fleming," include "Kisset" (Boston, 1877); " Mirage" (1879); "The Head of Medusa" (1880); "Sonnet of Gaspar Stampa" (1881); "Vestigia" (1884); and "Andromeda" (1885).

FLETCHER, John, Canadian jurist, b. in Rochester, Kent, England, in 1787; d. in Sherbrooke, Canada, 11 Nov., 1844. He was educated in London, studied law, and after he had a large practice in London before removing to Canada in 1810. On arriving there he was admitted to the Canadian bar, and was for years one of the most distinguished lawyers in the country. On the erection of the court of King's bench, and of the provincial court of appeals.

FLETCHER, Thomas Clement, governor of Missouri, b. in Inkster, England, 1856. He received a common-school education, was clerk of the circuit and county courts from 1849 till 1856, and was admitted to the bar in 1857.
was colonel of the 31st Missouri regiment in the National army from 1862 till 1864, when he became colonel of the 47th Missouri, and in that year he was brevetted brigadier-general of volunteers. In 1863 he was captured and taken to Libby prison. In 1865-9 he was governor of Missouri, and issued the proclamation abolishing slavery in that state. Gov. Fletcher was a delegate to the National Republican convention of 1860 and 1864. He was the first speaker in the first Republican convention held in a slave-state, and although his parents were slave-owners, he had been an ardent abolitionist since his boyhood. He has made many public speeches, most of which were published, but they have never been collected in book form.

**FLETCHER, William A., jurist, b. in Massachusetts; d. in Ann Arbor, Mich., about 1883. He was engaged in mercantile affairs until he removed to Michigan in 1829, when he studied law. For many years he was one of the most successful lawyers in Detroit, and became attorney-general of the territory. On the adoption of the first state constitution in 1835 he was appointed chief justice of the supreme court, and was employed by the legislature in the preparation of the first code of laws of Michigan. In 1845 he retired from the bench and resumed his law practice. He published "Revised Statutes of Michigan" (Detroit, 1839).**

**FLETCHER, William Baldwin, physician, b. in Indianapolis, Ind., 18 Aug., 1807. He was educated in the Lancaster academy in Massachusetts, and, after graduating at the New York college of physicians and surgeons, began to practice in Indianapolis. During the war he served in various capacities as scout and volunteer engineer, and had charge of one department of secret service. In July, 1861, he was captured by the Confederates, and imprisoned for nine months. Subsequently he served on the medical staff in various departments. He was a delegate to the session of the American medical association held in Boston in 1865. He then presented the motion that the council, in the state senate in 1882-3, and since 1882 has been devoted to the investment of cerebral circulation. In 1883 he was appointed superintendent of Indiana Hospital for the insane, and since that time has published several pamphlets on the management of the insane. Among his contributions to the medical journals are: "The Discovery of Various Entozoa found in Pork"; "Human Entozoa"; "Report of Five Cases of Trichiniasis"; and he has published a monograph on the "History of Asiatic Cholera" (Cincinnati, 1860).**

**FLEURI, Charles Pierre Claret, Comte de, French naval officer, b. in Lyons, 22 Jan., 1738; d. in Paris, 18 Aug., 1810. He entered the navy at the age of thirteen years, and became a lieutenant in 1750. The peace of 1763 gave him occasion to apply himself to office work and study, and he assisted the engineer Payvinand Berthoud, in 1766, in his invention of the marine watch or chronometer. In 1768 he was appointed to the command of the frigate "Isis" on an expedition to experiment with the new instrument, sailing from Aix in November of that year. He took observations at Martinique, Santo Domingo, Porto Rivo, Havana, Jamaica, Colon, and New Orleans, and after touching at New York, Boston, and Newfoundland, returned to Aix on 11 Oct., 1769. The results of this expedition were important to geography, as he established the exact position of all the islands between Martinique and the coast of Florida. In 1770 he elaborated all the plans for the naval war against England, to assist the struggle for the independence of the United States. In 1790-1 he was minister of the navy, and in 1793 was imprisoned under the reign of terror, but was released in 1794, and under the directory was appointed to the bureau of longitudes. He was a member of the council of 500 in 1794, and in 1800 was called by Bonaparte to the council of state. In 1805 he was minister plenipotentiary for the signature of the treaty ceding Louisiana to the United States, and on his return became intendant of the imperial house, senator, in 1806, admiral, and in 1808 governor-general of North Carolina. He was buried in the Panthéon. His works are "Voyage entrepris en 1768 et '9 pour éprouver en mer les horloges marines" (2 vols., Paris, 1773); "Longitude exacte des divers points des Antilles, et de l'Amerique du Nord" (1773); "Les Antilles, leur flore et faune" (1774); "Le Neptune Americo-Septentrional" (1780); and "Histoire des aventuriers espagnols, qui conquérèrent l'Amerique" (1800). Fleuriel also published a fine "Atlas of the Caribbean Sea and the Coasts of North America and Newfoundl and" (1790), and "Voyage autour du monde d'apres les indications de M. de Bougainville," with an atlas and notes on the discoveries on the north-west coast of America from 1537 till 1701 (1798).**

**FLEURY, Ernest de, Baron de Lisle, traveller, b. in Lyons, France; d. in New York city, 14 Sept., 1867. He was educated in Paris, and afterwards a large property. In 1844 he came to the United States, visited California, and was subsequently employed in locating the Nicaragua route. He travelled extensively in Central and South America. In 1839 he settled in the city of Mexico, and in 1864 espoused the cause of Maximilian, joining his imperial army, and being commissioned captain. Just before the downfall of the emperor he was promoted to the colonelcy of a regiment of chasseurs. At the surrender of Maximilian he became a prisoner of war, was tried by court-martial, and delat and imprisoned, but two days before the date fixed for his execution he bribed the guard, escaped in disguise to Vera Cruz, and sailed by way of Havana to New York. He took passage for France by the next steamer, but died suddenly before the day of departure.**

**FLEURY, Louis, chevalier and viscount, soldier, b. in France about 1740. He was descended from Hercule André de Fleury, a French nobleman, who was the tutor of the grandson of Louis XIV., and subsequently made cardinal and prime minister. He was major in the regiment Bourgue. Soon after the news of the American revolt reached France he came to this country, was kindly received by Washington, and accepted a commission. He was educated for an engineer, and, as his talents were brought into requisition, he proved himself a brave and intelligent soldier. He was engaged at Fort Mifflin on the Delaware, and in the battle of the Brandywine. In token of his gallantry at the latter place, congress presented him with a horse. He was sub-inspector under Steuben in 1777 and 1778, adjutant-general of Lee's division, 4 June, 1778, and second in command of a light-infantry company, 31 July, 1778. Afterward he was in command of a battalion of light-infantry under Washington. When Rochambeau arrived in 1780, Fleury left the American service and became an officer under him. At the storming of Stony Point in July, 1778, he commanded the right of the right from in his own hands. He returned to France, having received a congressional vote of thanks.**
FLINT, Abel, clergyman, b. in Windham, Conn., 8 Aug., 1755; d. in Hartford, 7 March, 1828. He was graduated at Yale in 1776, and in the following year was appointed tutor in Brown, where he remained until 1790. He then studied theology, and in 1791 became pastor of the 2d Congregational church in Hartford, Conn. He was secretary of the Connecticut missionary society at its organization in 1798, and held this office for several years. He was an editor of the "Connecticut Evangelical Magazine" in 1800, and about this time assisted in the preparation of the "Hartford Selection of Hymns," which passed through several editions. He was one of the founders of the Connecticut Bible society in 1809, and was actively engaged in its management. The degree of D. D. was conferred upon him by Union in 1818. He published "Geometry and Trigonometry, with a Treatise on Surveying" (1806), and a selection and translation from Masillon and Bourdaloue's sermons.

FLINT, Austin, physician, b. in Petersham, Mass., 20 Oct., 1812; d. in New York city, 13 March, 1886. He studied at Amherst and Harvard, and was graduated at the medical department of the latter institution in 1834. His professional career began in Northampton, and was continued in Boston until 1836, when he removed to Buffalo, and remained there till 1844. He then accepted a call to the chair of the instructor in diseases of the skin, and practice of medicine at the Rush medical college in Chicago, but a year later returned to Buffalo. In 1846 he established the "Buffalo Medical Journal," which he subsequently conducted until 1856. In connection with Dr. James F. White and Dr. C. O. House, he founded the Buffalo medical college, in which, for six years, he was professor of the principles and practice of medicine, and clinical medicine. In 1852 he was called to fill a similar chair in the Louisville university, but in 1856 returned to Buffalo and became professor of pathology and clinical medicine. From 1858 till 1861 he spent the winters in New Orleans as professor of clinical medicine in the school of medicine there, and visiting physician to the Charity hospital. In 1859 he removed to New York, and two years later was appointed professor of pathology and practical medicine in the Long Island college hospital, in which relation he continued until 1868. At the same time he became professor of the principles and practice of medicine in the Bellevue hospital medical college. He had also visited the insane patients of the church at Fayetteville, N. C., but was obliged to divide his duties by teaching, in order to support himself. In 1811 he was installed pastor of the Scotch Presbyterian church of Charleston, S. C., and became known through the state as an attractive pulpit orator. In 1812 he was moderator of the general assembly of the Presbyterian church. He continued pastor of the church in Charleston till the time of his death.

FLINN, Andrew, clergyman, b. in Maryland in 1773; d. in Charleston, S. C., 24 Feb., 1820. When he was an infant his parents removed to Mecklenburg county, N. C. He was graduated at the University of North Carolina in 1799, studied theology, and was licensed to preach by the presbytery of Orange in 1800. In 1803 he was ordained pastor of the church at Fayetteville, N. C., but was obliged to divide his duties by teaching, in order to support himself. In 1811 he was installed pastor of the Scotch Presbyterian church of Charleston, S. C., and became known through the state as an attractive pulpit orator. In 1812 he was moderator of the general assembly of the Presbyterian church. He continued pastor of the church in Charleston till the time of his death.

Dr. Frank H. Hamilton, he founded in 1847 the Buffalo medical college, in which, for six years, he was professor of the principles and practice of medicine, and clinical medicine. In 1852 he was called to fill a similar chair in the Louisville university, but in 1856 returned to Buffalo and became professor of pathology and clinical medicine. From 1858 till 1861 he spent the winters in New Orleans as professor of clinical medicine in the school of medicine there, and visiting physician to the Charity hospital. In 1859 he removed to New York, and two years later was appointed professor of pathology and practical medicine in the Long Island college hospital, in which relation he continued until 1868. At the same time he became professor of the principles and practice of medicine in the Bellevue hospital medical college. He had also visited the insane patients of the church at Fayetteville, N. C., but was obliged to divide his duties by teaching, in order to support himself. In 1811 he was installed pastor of the Scotch Presbyterian church of Charleston, S. C., and became known through the state as an attractive pulpit orator. In 1812 he was moderator of the general assembly of the Presbyterian church. He continued pastor of the church in Charleston till the time of his death.
college, and to a similar chair in the New Orleans school of medicine in 1860, but resigned the latter at the beginning of the civil war. As a student in Louisville, he had developed a special taste for physiology, and had experimented on living animals with Prof. Lunsford P. Yandell. While in New Orleans he experimented on alligators, and declared the most important point was the influence of the pneumogastric nerves upon the heart. Dr. Flint was the first physiologist in the United States to operate on the spinal cord and the spinal nerves in living animals, and early in 1861 spent several months studying in Paris under Charles Richer and Claude Bernard. On the organization of the Bellevue hospital medical college, in 1861, he became professor of physiology and microscopic anatomy, and also secretary and treasurer of the faculty. For eight years he delivered lectures on physiology in the Long Island college hospital. In 1874 he became surgeon-general of New York state. His experimental work has received high praise. In 1862 his investigations on "A New Excretory Function of the Liver" was presented to the French academy of sciences for the Montyon prize, and in 1869 it received honorable mention, and 1,500 francs. He published in 1869 an elaborate review of the history of the discovery of the motor and sensory properties of the roots of the spinal nerves, in which the discovery was ascribed to François Magendie instead of to Sir Charles Bell, who has generally been regarded as its author. During the same year he conducted a series of experiments upon the glycogenic function of the liver, in which he endeavored to harmonize various conflicting observations, and is considered to have settled the question. Dr. Flint is a member of medical and scientific societies, and has been a frequent contributor to medical journals, and has published numerous monographs. He was the author of articles in the "American Cyclopaedia," and his works include "The Physiology of Man" (New York, 1866); "Manual of Chemical Examination of the Urine in Disease" (1870; 8th ed., 1884); "Text-Book of Human Physiology" (1876; 3d ed., 1881); "On the Source of Muscular Power" (1878); and "On the Physiological Effects of Severe and Prostrated Muscular Exercise" (1871).

FLINT, Berta, Canadian senator, b. in Elizabeth, N. J., Ont., 9 Feb., 1863. He was educated in his native town, and became a merchant. He has been president of the Belleville board of police, and also its reeve and mayor; was warden of Hastings county in 1875, and was member of the county council for twenty-four years. He was also reeve of Elzevir for twenty-one years, ending in 1876. He represented Hastings in the Canadian assembly from 1847 till 1851, and South Hastings from 1854 till 1858. He was an unsuccessful candidate in 1861 for the legislative council of Canada, but in 1862 was elected and represented the Trent division until the union of 1867, when he was called to the senate.

FLINT, Charles Louis, b. in Middleton, Mass., 8 May, 1824. His ancestors were among the early settlers of Salem. He was brought up on his father's farm, and obtained his elementary education through his own exertions, graduating at Phillips Andover academy in 1845, and at Harvard in 1849. He studied law, but, having acquired some distinction by his contributions to agricultural journals, was appointed secretary of the Massachusetts board of agriculture, which office he held from 1853 to 1881. He was one of the original organizers of the Massachusetts agricultural college at Amherst, was its secretary for nearly twenty years, and for one year served as president. In addition to full and valuable annual reports, he has published "The Agriculture of Massachusetts" (3 vols., Boston, 1853-4); "Treatise on Grass and Forage Plants" (New York, 1857); "Milch Cows and Dairy Farming" (Boston, 1859); a new edition of Harris's "Insects Injurious to Vegetation"; and, with George B. Emerson, "Manual of Agriculture."

FLINT, Henry, educator, b. in Dorchester, Mass., in 1875; d. 13 Feb., 1870. He was graduated at Harvard in 1893, appointed a fellow of that college in 1700, and in 1705-54 was a tutor there. He edited a volume of essays in Philadelphia, 24 March, 1829; d. in Camden, N. J., 12 Dec., 1868. He studied law, was an editor of the Chicago "Times" in 1855-61, and then acted as correspondent for various newspapers. He published a "Life of Stephen A. Douglas" (Philadelphia, 1890); "The History and Statistics of the Railroads of the United States" (1898); and "Mexico under Maximilian" (1899).

FLINT, Jacob, clergyman, b. in Reading, Mass., 7 Aug., 1777; d. in Marshfield, Mass., 11 Oct., 1853. He was graduated at Harvard in 1797, and ordained a pastor of the Unitarian Congregational church in Cohasset, 10 June, 1788. He published a history of Cohasset in the Massachusetts historical collection, and two discourses on the history of Cohasset (1821, reprinted in 1898).-His son, Joshua Bar- ker, surgeon, b. in Cohasset, Mass., 15 Oct., 1811; d. in Louisville, Ky., 19 March, 1864, studied with his father, and was graduated at Harvard in 1830. He was appointed usher in the English classical school at Boston, of which George B. Emerson was the principal, and remained there for two years, after which he studied medicine. He received his medical degree at Harvard in 1835, and practised in Boston for twelve years, during which he served several terms in the legislature. In 1837 he was called to the chair of surgery in the Louisville medical institute, which he held until 1849. He was then elected to the same chair in the Kentucky school of medicine, and remained there until his death. He was the author of "Practice of Medicine" (2d ed., 1869).

FLINT, John James Bleeker, Canadian lawyer, b. in Belleville, Ont., 29 Dec., 1860. He received his education at the Belleville grammar school, and at Victoria college, Cobourg. He began to practise law in 1862, was made town councillor in 1868, and held that office until 1872, when he was elected mayor of Belleville. In 1884 he was appointed police-magistrate. He is a Liberal in politics. He has been active in several philanthropic enterprises, and has aided in erecting a hospital and home for the friendless.

FLINT, Timothy, clergyman, b. in Reading, Mass., 11 July, 1789; d. in Salem, Mass., 16 Aug., 1840. He was graduated at Harvard in 1800, entered the ministry of the Congregational church, and settled in Lunenburg, Mass., in 1802. He was a diligent student in natural science, and his chemical experiments led ignorant persons to charge him with counterfeiting coin. He prosecuted them for slander. Ill-fated date education, through his own exertions, graduating at Phillips Andover academy in 1845, and at Harvard in 1849. He studied law, but, having acquired some distinction by his contributions to agricultural journals, was appointed secretary of the Massachusetts board of agriculture, which office he held from 1853 to 1881. He was one of the original organizers of the Massachusetts agricultural college at Amherst, was its secretary for nearly twenty years, and for one year served as president. In addition to full and valuable annual reports, he has published "The Agriculture of Massachusetts" (3 vols., Boston, 1853-4); "Treatise on Grass and Forage Plants" (New York, 1857); "Milch Cows and Dairy Farming" (Boston, 1859); a new edition of Harris's "Insects Injurious to Vegetation"; and, with George B. Emerson, "Manual of Agriculture."
for three years. He went to New York in 1833, and conducted a few numbers of the "Knickerbocker Magazine." Afterward he resided in Alexandria, Va., but spent the winter months in New England. His publications are "Recollections of Ten Years passed in the Valley of the Mississippi" (Boston, 1826; reprinted in London, and translated into French); "Francis Berrian; or, The Mexican Patriot" (Boston, 1826); "Condensed Geography and History of the Western States to the Mississippi Valley" (2 vols., Cincinnati, 1828; 24 ed., 1822); "Arthur Clemmning" (2 vols., Philadelphia, 1828); "George Mason; or, The Young Backwoodsman" (1829); "Shoshonee Valley" (Cincinnati, 1830); a translation of Dorz's "Essay on the Art of Being Happy" (Boston, 1830); "Indian Wars in the West" (Cincinnati, 1833); "Lectures on Natural History, Geology, Chemistry, and the Arts" (Boston, 1838); a translation of "Celibacy Vanquished; or, The Old Bachelor Reclaimed" (Philadelphia, 1834); and a "Memoir of Daniel Boatan" (Cincinnati, 1834). He contributed a series of papers on "American Literature" to the London "Athenaeum" in 1835. His son, Micael P., lawyer, b. in Lunenburg, Mass., in 1807; d. in 1830, was educated by his father, and travelled with him in the vicinity. He studied law, and was admitted to the bar in August, Miss. He published "The Hunter, and Other Poems" (Boston, 1826), and contributed to the "Western Review.

FLOHR, George Daniel, clergyman, b. in Germany in 1759; d. in Wytheville, Va., in 1826. He studied medicine in Paris, and witnessed the execution of Louis XVI. The accidental and terrible death of an individual in the crowd standing near him, a part of whose mangled body was thrown upon him, so affected him that he changed all his plans for the future. He at once abandoned the thought of a medical career, and resolved to consecrate himself to the ministry, emigrating to the United States and going to Madison county, Va., where he studied theology under the direction of the Rev. William Carpenter, teaching in Culpeper until his preparation for the ministry was completed. He was called to the pulpits of the synod of Pennsylvania, and immediately engaged in missionary service in southwestern Virginia. In 1799 he accepted a call to Wythe county, where he labored faithfully until his death. He exercised great influence upon all classes of society, and was frequently called upon to settle difficulties as a judge and lawyer as well as a clergyman. He preached altogether in German, and dressed according to the old German custom. He possessed an extensive knowledge of French, and was well read in Greek and Latin. A volume of his sermons was published after his death.

FLORENCE, Thomas Birch, statesman, b. in Philadelphia, 26 Jan., 1812; d. in Washington, 3 July, 1875. He was educated in the public schools, apprenticed to a hatter, and went into business for himself in 1839. For several years he was prominent in the temperance cause, and a member of a secret organization of workmen, called "The Brotherhood of the Union." After several ineffectual efforts to enter congress, he was elected as a Democrat in 1836, and served from 1851 till 1861, when he was defeated in his re-election. He edited the Washington "Constitutional Union," and in 1868 the Washington "Sunday Gazette." In 1874 he was defeated by so small a majority for congress, by Chapman Freeman, the Republican candidate, that he would have contested the election had he not died of gangrene, caused by an accident that occurred during the canvass.

FLORENCE, William Jermyn, actor, b. in Albany, N.Y., 26 July, 1831. He became a member of the Murdock dramatic association in New York in 1856, made his first appearance on the stage in 1849, as Peter in "The Stranger," and soon acquired distinction as a versatile comic actor. He afterward appeared in Providence, successfully playing Macduff to Booth's Macbeth. Returning to New York, he appeared at Brougham's Lyceum and同类剧院. He married on New Year's day, 1858, Mrs. Malvina [Pray] Littell, a danseuse attached to Wallack's theatre, and on 8 June following the two appeared at the National theatre, New York, as the Irish Boy and the Yankee Girl. In 1858 they went to England, and appeared in Drury Lane theatre, London, for fifty nights, to crowded houses, afterward performing in various theatres throughout the United Kingdom. Mr. Florence's best-known parts are those of Bardwell Slote in "The Mighty Dollar" and Captain Cuttle in "Dombey and Son." While Mrs. Florence is a favorite as Mrs. General Gilflory. She is a sister of Mrs. Barney Williams.

FLORENCIA, Francisco, clergyman, b. in Florida (probably in St. Augustine) in 1820; d. in Mexico in 1863. He entered the Jesuit order in 1839, and became famous as a professor of theology and philosophy. He was appointed procurator for the Jesuit province of Mexico, at Madrid and afterward at Rome; was next stationed at Seville as procurator of all the provinces of his order in the Indies, but returned to Mexico in 1858. He was the author of numerous works, the principal of which are: "Menologio de los varones mas honorables de la Compania de Jesus en N. Espana" (Barcelona, 1861), and "Historia de la Compania de Jesus en la N. Espana" (Mexico, 1864).

FLORES, Ignacio, South American administrator, b. in Salta, in the 19th century; d. in Buenos Ayres in 1760. He completed his education in Spain, and became professor in a college in Madrid, but entered the army and returned to South America, rising gradually to the rank of colonel. In 1762 he was appointed president of the United States of Peru that Flores instead of being the pacificator, had been one of the promoters of the insurrection. He was in consequence deposed and ordered to present himself in Buenos Ayres, where he arrived early in 1784, but died before his trial, which had been intentionally delayed. While in college he wrote a novel, "Viajes de Enrique Wanton," a delicate satire on England, France, and Spain.

FLORES, Jose, Mexican physician, b. in Chia- pas, Mexico, about 1780; d. in Guatemala about 1795. He studied medicine in Europe, and was called to a professorship at the University of San Carlos de Guatemala in 1775, and appointed president of the board of medicine of Central America. He made many journeys through that country, studying botany, formed a rich herbarium for the university, and established the organ of anatomy by constructing with his own hands three models for his classes. Flores wrote many scientific works, which are preserved in manuscript at the library of San Carlos. The only one published is "Especifico Nuevamente Descubierto en el Reino de Guatemala para la curacion radical del horrible mal del Cachorro." (Mexico, 1782; reprinted in 1829).
The work asserts that cancer can be radically cured by eating a kind of lizard found near San Cristóbal, Amatitlán in Guatemala.

FLORES, Juan José, Spanish-American soldier, b. in Puerto Caballo, Venezuela, 19 July, 1800; d. at sea in 1864. He was forced to enlist in a Spanish regiment under command of Calzada; but at the beginning of the battle of Chirí, in 1813, he remained in the rear, walked to where Gen. Ricurte was stationed in Pore, and was taken into the service. He fought for the liberty of New Granada in 1819, made the campaign of Trujillo and Merida in 1820, became colonel in 1822, and in 1823 commander of Pasto, New Granada, where he was defeated. But he soon recovered, and was second in command in the victorious campaign of Ibarra. In 1824 he resumed command of a part of the army, and put an end to the war. In 1825 he was appointed commanding general of Ecuador, and re-established peace in the country. He was made brigadier-general in 1826, and in 1827 fought against the insurgents in Lima, and, after much bloodshed, re-established order. In 1828 he became commander-in-chief of the army, continuing the war with Peru and repelling the invaders. He negotiated the treaty of Jirón, and when peace was concluded was appointed commander of Ecuador. In 1830 Ecuador became independent, and Flores was elected its first president. In 1832 the country was invaded again of war, until 1835, when Flores restored peace and resigned the government. In 1838 and 1843 he was elected president of the republic again, and in the latter year again suppressed a rebellion; but in 1845 he resigned his office and went to Europe. In 1860 he returned to Quito and captured Guayquil from the insurgents. His son, Antonio, b. in Quito in October, 1833, was educated at the college of his native city and in Paris. After experience as a professor and journalist, he was appointed minister to Washington (1880-4). In 1881 and 1882 he was elected senator in the congress of Ecuador, but was exiled by Veintimilla. He returned in May, 1883, joined the revolutionary forces, and participated in the siege of Guayquil. He was elected to the National convention, in 1884, was again appointed minister to Washington, Paris, London, and Rome, and in 1887 to Belgium, where he negotiated a treaty of commerce. He has published “Compendio de Historia Universal” (1860); “Las Letras Españolas en los Estados Unidos” (New York, 1881); “El Gran Marco de Ayacucho” (1885); and is now (1887) writing “La Diplomacia Americana y los Diplomáticos Americanos.”

FLORES, Venancio (Florez), Uruguayan soldier, b. in Paysandú in 1809; d. in Montevideo, 19 Feb., 1888. He was the son of a rich cattle-owner, and passed his youth on the pampas. In 1854 he led an insurrection, and when the president fled to a neutral man-of-war for protection, Flores declared the executive chair vacant. He then had himself appointed president, but in 1855 his government was overthrown, and he retired to Buenos Ayres. In 1858 he invaded the republic for a second time, but was soon defeated. When the war between Buenos Ayres and the Argentine Confederation began, Flores volunteered to serve under Mitré, and in 1862 invaded Uruguay for a third time, but was defeated at Las Piedras in 1865. When war between the republic and Brazil began, Flores, assisted by a Brazilian and Argentine force, blockaded Montevideo and forced Villalba, who had taken charge of the government provisionally, to enter into an arrangement by which Flores was elected president. Flores entered into the triple alliance against Paraguay, 1 May, 1865, and was in command of the allied armies at the capitulation of the Paraguayan army, for which he received from the emperor of Brazil the cross of the Crueiro. During his absence in the field Vidal had been elected president pro tempore; but on his return in 1866, Flores forced the former to resign the government into his hands. In consequence of a revolution, headed by his sons, he resigned the presidency, 15 Feb., 1868, before his term was expired, was assassinated in a street tumult, four days afterward.

FLORES-ALATORRE, Juan José, Mexican lawyer, b. in Aguascalientes, 1 June, 1766; d. in the city of Mexico, 8 July, 1854. He graduated at the University of Mexico in 1790, was appointed defender of the government, 1808, and became public defender of the criminals of his tribunal. He was made judge of the same court in 1801, commissioned to inspect the treasury of Sombrerete in 1807, and in 1808 was promoted criminal judge for the supreme court of Mexico. He was deputy for Zacatecas to the constituent cortes of Cadiz in 1813, and in 1814 was elected president of the Academy of jurisprudence. In 1818 he became a member of the supreme court of Guadalajara. The Emperor Iturbide appointed him one of the members of the supreme court of the empire, and during the political disorders of 1821-2 it was feared that Flores was left undisturbed in his office, which he left in 1840, with a pension. He left ready for publication a "Diccionario Legislativo."

FLOURNOY, Thomas Stanhope, lawyer, b. in Prince Edward county, Va., 13 Dec., 1811; d. in Potomac, Virginia, 10 March, 1888. He was educated at Hampden-Sidney college, studied law, and was admitted to practice at Halifax Court House, Va. He was distinguished throughout the circuit, which was noted for its brilliant bar, as a speaker of much eloquence, and for his great success as a criminal lawyer. Though a Whig, through his personal popularity he was elected to congress in 1846 in a largely Democratic district. In 1856 he was nominated by the Whig and Know-Nothing parties as candidate for governor of Virginia against Henry A. Wise, who was the Whig candidate. In 1860 he was a member of the convention of Virginia in 1860-1, and used all his influence to prevent the secession of the state. When it finally declared for the Confederacy, he joined the army of northern Virginia as a private, but was appointed colonel, and was in action at Antietam, Gettysburg, and Ayacucho, and was finally taken prisoner on his return from California. He died in 1888.

FLOWER, Frank Abial, author, b. in Cottage, Cattaraugus co., N. Y., 11 May, 1854. He was educated at the Towanda union and Fredonia normal schools, learning the printer's trade at the same time. Subsequently he settled in Wisconsin, where for several years he edited a newspaper. In 1888
he was appointed commissioner of labor and industrial statistics, and reappointed in 1885. His reports in this connection have received favorable comment. He has also held other appointments, and is curator of the Wisconsin state historical society. Mr. Flower is the author of several local histories, and has published "Old Abe, the Wisconsin Lion," "Life of A. H. Carpenter" (Madison, 1888); and a "History of the Republican Party" (Springfield, 1884).

FLOWER, George, colonist, b. in Hartfordshire, England, about 1780; d. in Grayville, White co., Ill., 15 Jan., 1869. He was born in affluent circumstances, and, after travelling on the Continent for the benefit of husbandry, he came to the United States in 1817 as the associate of Morris Birkbeek, in order to found an English colony in Albion, Edwards co., Ill. Here he built an elegant mansion, and his large wealth gave him a commanding position. In addition to the improved husbandry, this farm was stocked with the finest fleeces of England and Spain. His wisdom and benevolence exerted great influence upon the new settlement. When the attempt to legalize African slavery in Illinois was made in 1829, he was instrumental in securing its defeat. In the financial changes of the new country his wealth was lost, and for many years he lived in retirement with his children in Indiana and Illinois. In December, 1899, Mr. and Mrs. Flower made a visit to their daughter, Mrs. Aguel, in Grayville, White co., Ill., and early in January, 1900, they both became ill on the same day, and a week later died on the same day. He wrote a "History of the English Settlement in Edwards County, Illinois, founded in 1817 and 1818 by Morris Birkbeek and George Flower (Churchman)," his son's name being "Birk,ham," near Hartford, England, 31 Jan., 1805; d. in London, 26 March, 1888, spent his early life in Illinois, and then resided for nearly half a century at Stratford-on-Avon, where he was well known for his hospitality to Shakespearean visitors. Bryant, Emerson, Longfellow, and numerous and early in Yorkshire, he was four times chosen mayor of the borough. Mr. Flower advocated with energy a more humane treatment of horses, especially in the abolition of bearing-reins and severe bits, upon which subject, and also upon the improvement of road-making, he issued several widely circulated pamphlets. One of his three sons is president of the Zoological Society of London.

FLOWER, Roswell Pettibone, congressman, b. in Theresa, Jefferson co., N. Y., 7 Aug., 1833. His ancestor emigrated from England to Hartford, Conn., in 1734. Roswell lost his father when eight years old, became a clerk in a store at fourteen, and afterward received a high-school education. After working in a brick-yard, and as a post-office clerk, he was for ten years a jeweler, and afterward became a jeweler in New York city. In 1881-'3 he was a member of Congress, having been elected as a Democrat over William W. Astor. In 1886 he was appointed one of the electric-subway commissioners in New York city. Mr. Flower gave $50,000 for the erection of the St. Thomas church, New York City.

FLOWERS, Samuel Bryce, physician, b. in Wayne county, N. C., 31 Oct., 1835. He was educated at Wake Forest college, N. C., and was graduated in medicine at the University of Pennsylvania in 1860. In that year he settled in Camden, Ark., but afterward went North in 1862, and was returned as surgeon in the Confederate army during the civil war. He is a member of the board of health of Wayne county, of the Wayne county medical society, of the North Carolina medical society, of which he was elected vice-president in 1875, and of the Eastern medical association, of which he was vice-president in 1877. He has contributed to the "Philadelphia Medical and Surgical Reports," and to the "Virginia Medical Monthly."

FLOYD, James, clergyman, b. in New York city, 29 Aug., 1824; d. in New York city, 7 Oct., 1868. He was educated at Columbia, and then spent three years in Europe studying, especially botany, at the royal gardens at Kew. In 1885 he was received into the New York conference of the Methodist Episcopal church, and for eighteen years was pastor of churches in Middlesex, New Haven, Brooklyn, and New York. In 1848 he was placed on the committee to revise the Methodist hymn-book, in 1854 was appointed presiding elder of the New York district of New York east conference, and in 1856 became editor of the "National Magazine," and corresponding secretary of the American tracts society. He also edited a denominational paper called "Good News." In 1860 he published his "Guide to the Orchard and Fruit-Garden," and edited the posthumous works of the Rev. Stephen Olin, D. D. In 1861 he returned to his fraternity in New York city, in which he continued until his death. Dr. Floyd was one of the ablest and earliest of the anti-slavery clergymen, suffering the unpopularity, and afterward enjoying the success, of the cause.

FLOYD, John, soldier, b. in Beaufort, S. C., 3 Oct., 1792; d. in Camden county, Ga., 24 June, 1839. His father was Col. Charles Floyd, who was ruined pecuniarily by the Tories of the Revolution. The family removed to Georgia in 1791, and by boat-building at the mouth of the St. Ila river retrieved their fortunes. John, one of several sons, received little formal education, but had an indomitable spirit, which soon made itself felt in the community. In 1813 he was elected brigadier-general of the Georgia militia. He commanded at the battle of Aquia, against the Creek Indians, 29 Nov., 1813, where he was severely wounded. On 27 Jan. of the next year he was com-
Floyd

FLOYD

Floyd, colonel, b. in Brecknockshire, Wales, about 1629; d. in Staycote (now Setauket), Suffolk co., N.Y., about 1690. He came to this country in 1654, and with Richard Woodhull and fifty-two others to Setauket, which they founded in 1663. He was the first of the Floyd family on Long Island, and a man of intelligence and vigor. At the beginning of the settlement he was chosen judge of Suffolk county, and colonel of militia, and held the offices during his life.—His eldest son, Richard, b. in Setauket, 12 May, 1681; d. there, 29 Feb., 1757, was appointed judge of the common pleas in 1723, and was also colonel of the militia of Suffolk county. He married, 12 May, 1680, Margaret Nicoll (1662-1718), oldest daughter of Matthias Nicoll, secretary of the Duke of York’s commissioners who captured New York from the Dutch, and the first secretary of the English province. Their son, Richard, third of the name, b. 29 Dec., 1703; d. 21 April, 1771, likewise became judge of the common pleas in 1752, and colonel of the militia of Suffolk county, which offices, like his father and grandfather, he held during his life. He was a man of integrity and magnanimity, and always opposed tyranny to tyranny, who stood in need of aid. He married the daughter of Col. Samuel Hutchinson, of Southold.—Their eldest son, Richard, fourth of the name, b. about 1730; d. in Maukerville, New Brunswick, 30 June, 1791, like his ancestors, was judge of the common pleas (appointed in 1764), and colonel of the militia of Suffolk county. He was noted for his affability, politeness, fine manners, and profuse hospitality. He resided in the family manor in the manor of St. George, which he had purchased from his father, Sir John, and was rewarded therefore by having the honor of being made a justice of the peace for the town of colonial stamp. Here he entertained Gov. Tryon and all his chief officers on his march down Long Island. His political position, and the policies of his father, exposed him to the attacks of the whale-boat expeditions from Connecticut, and made his life a scene of constant activity. He was included in the act of attaining, and at the peace of 1783, when the act became operative, he removed to New Brunswick and settled on the St. John’s river.—His wife, whom he married on 28 Sept., 1758, was Arabella, daughter of Judge David Jones, of Fort Neck, Queens co., and sister of Judge Thomas Jones, of the supreme court of New York, author of the “History of New York during the Revolutionary War,” and upon her male issue, her father by will entitled his estate at Fort Neck in default of issue to her brother and his issue. He died on 23 Jan., 1806, of adding the name of Jones to their own. The latter had no issue by his wife Anne, daughter of Gov. James De Lancey. Consequently David Richard, only son of Richard Floyd and Arabella Jones, b. 14 Nov., 1784; d. in 1826, became David Richard Floyd Jones, in which double patronymic the family has since borne. This change was also confirmed by special act of the legislature of New York in 1788. Hence the junior branches only of this family for the last hundred years, and at present, bear the name of Floyd—Thomas Floyd-Jones, b. in 1851, succeeded to the estate of Fort Neck, and at his death the entail by its terms came to an end.—His eldest son, David Richard Floyd-Jones, lawyer, b. in 1813; d. 8 Jan., 1871, was member of assembly for New York in 1841, 1844, 1845, 1847, state senator in 1844-7, inclusive, member of the Constitutional convention of 1846, secretary of state in 1840-1, and lieutenant-governor of New York in 1843-4.—Henry Floyd-Jones, second son of Thomas Floyd-Jones, and uncle of the Lieut.-Gov., Floyd-Jones, b. in 1822; d. in 1890, was member of assembly in 1829, state senator and member of the court of errors from the old first district, consisting of Kings, Queens, New York, and Richmond counties, from 1836 till 1840, and brigadier-general of militia.
FLYNN, Edmund James, Canadian statesman, b. in Percé, Lower Canada, 16 Nov., 1847. He was educated at the seminary of Quebec, and at Laval university, where he was graduated in June, 1873. He was called to his first ecclesiastical office in the diocese of Meurons, and in 1874 was appointed professor of Roman law in Laval university, which he still fills. He was appointed to the provincial parliament in 1878, and was a member of the executive council, and commissioner chosen one of the presidential electors, and in 1891 he sat for Suffolk county in the Constitutional convention of that year. He was an early and warm supporter of Jefferson. His education being only that of the country schools of his youth, he was in his youth an orator, or an accomplished writer. But in the work of the different bodies in which he served he was noted for his ability, sound advice, and unflagging labor and thorough knowledge of the business before them. He was eminently a practical man, and his firmness and resolution were very great. Although somewhat unpolished in manner, he was at the same time possessed of a natural gravity and dignity which made itself felt. After the war he was appointed major-general of the militia on Long Island, and in his youth he was a captain. But his military services were confined to heading a detachment of militia that was suddenly called to repel a boat invasion from a British ship at the outset of the war. Except at the beginning, for a short time, he received nothing from his farm during the war, as it was within the British lines, and appropriated to the use of Connecticut refugees as "rebels property." He was, therefore, often during the war in great straits, having nothing but his pay as a delegate in congress. At its close he bought a very large tract of confiscated land in Oneida county, to which, in 1894, he finally removed with his children, and where he reside till his death. He was married twice, first to Hannah Jones, of Southampton, who died in 1871, and secondly to Joanna Strong, of Setauket, by each of whom he left issue.

FLUSSER, Charles W., naval officer, b. in Annapolis, Md., in 1839; d. near Plymouth, N. C., 18 April, 1894. He removed to Kentucky when a child, and was appointed a midshipman in the navy, 19 July, 1847. His first cruise was made in the "Cumberland." He was promoted to lieutenant, 16 Sept., 1855, and in 1857 became assistant professor at the U. S. naval academy. He was in the brig "Dolphin" in 1860-61, and during his succeeding leave of absence the civil war began. He refused the offer of a high command in the Confederate service, applied for active duty, and was assigned to the command of the gun-boat "Commerce." While on this duty he took part in the attack by Com. Goldsborough that preceded the capture of Roanoke Island on 7 Feb., 1862. In October he took part in the shelling of Franklin, Va., and afterward commanded the "Perry" in the North Carolina waters. He was killed while in command of the gun-boat "Miami" in battle with the iron-clad "Albemarle" in Roanoke river.

FOCHER, Jean (fo-shay), Flemish monk, b. in Ghent in 1501; d. in the city of Mexico, 30 Sept., 1572. He studied in his native city and in Leyden, was graduated as doctor in canonical and common law, and in 1536 entered the order of St. Francis, going to the Indies as a missionary. His erudition became soon apparent to his superiors, who sent him as professor to their newly established college of Santiago de Tlaltelolco, where he instructed the sons of the native emperors and caciques who had been sent by order of Charles V. to this college. He soon became the oracle of the Mexican prelates and men of letters, and his sense of justice was so inflexible that once, when his decision on a point of law went against the dictate of the superior of his convent, he preferred undergoing a disciplinary chastisement rather than change his decision. At his death nothing but his Bible and body of law were found in his cell, and such was his reputation as an authority on literary and canonical points that one of the most illustrious clericsmen of Mexico, Alonso de la Vera Cruz, exclaimed, on hearing of his death, "A liberal man is dead; we shall all be in utter darkness." Focher wrote numerous works, part of which were sent to Spain, and many of them lost; part exist in manuscript in the Biblioteca Nacional de Mexico. A few of the most notable are "Inventarum etc. sub preficiebantus ad infidelis convertendos" (Mexico; reprinted, Seville, 1574); "Arte de la Lengua Mexicana" (MS. in Biblioteca Nacional de Mexico); "De Fratre professo ab Ordine ejecto, matrimoni contrahere volente" (MS. in the library of the Franciscan convent of Tezoco); "Responsa ad Fr. Michaelum de Zárate super dubia
FOGG, George Gilman, senator, b. in Meredith, N. H., 26 May, 1815; d. in Concord, N. H., 5 Oct., 1881. He was graduated at Dartmouth in 1839, and became principal of Hebron academy, and then New Hampshire Academy in the academy at New Hampton. After studying law privately and at the Harvard law-school, he was admitted to the bar in 1842, and practised in Gilmanton. He was in the legislature in 1846, and soon afterward was appointed secretary of state. He then became editor and editor of the "Independent Democrat," published first at Manchester and afterward at Concord, and held that position from 1854 till 1861. He was reporter of the state supreme court in 1853-5, and in 1856 was clerk of the congressional committee sent by the house of representatives to Kansas. He was a delegate to the Buffalo Free-soil convention of 1848, to the Pittsburg convention of 1852, the Philadelphia Republican convention of 1856, and to the Chicago convention of 1860. He was a member of the national and state committees from 1852 till 1864, and was at one time its secretary. He declined the office of commissioner of patents, and was appointed by President Lincoln U. S. minister to Switzerland, serving from 1861 till 1865. During the succeeding years he was appointed by the governor of New Hampshire, and U. S. senator in place of Daniel Clark, resigned, and served till 1867. In 1866 he was a delegate to the Philadelphia loyalists' convention. He was actively connected with the New Hampshire historical society, and was a trustee of Bates college, Lewiston, Me., to which he gave him the degree of LL. D. After his return from Europe he resumed the editorship of the "Independent Democrat" till it was united with the "Statesman" in 1871, and was then for one year the principal political writer for the combined paper, when he resigned as editor. Mr. Fogg was a man of strong convictions and honest purposes, and a vigorous and fearless writer. He never married.

FOLEY, Margaret E., artist, b. in New Hampshire; d. in Menan, Austrian Tyrol, in 1877. She was a talented girl, and began her career in a humble way, carving small figurines in wood, and modelling busts in chalk. Later she removed to Boston, where she suffered many privations, and earned a scanty support by carving portraits and ideal heads in cameo. At the end of seven years she went to Rome, where she spent the rest of her professional life, becoming the friend and associate of Harriet Hosmer, Gibson, Story, Mrs. Jameson, and William and Mary Howitt. In the summer of 1877, her health failing, she accompanied the Howitts to their home in Austrian Tyrol, where she died. Among her portrait busts are those of S. C. Hall, Charles Sumner, and Theodore Parker. The medals of William and Mary Howitt, Longfellow, and William Cullen Bryant, and her ideal statues of "Cleopatra," "Excelsior," and "Jeremiah," are the best specimens of her cameo work.

FOLEY, Thomas J., C. H., b. at Baltimore in 1823; d. there in 1879. He studied in St. Mary's seminary, Baltimore, and was ordained priest in 1846. He was first placed over the mission of Rockville, and afterward appointed assistant pastor to St. Patrick's church, Washington. After 1848 he held a similar pastorate at Baltimore, and in 1867 he was appointed vicar-general. Afterward, when the diocese of Chicago had been thrown into confusion by the insanity of Bishop Duggan, Father Foley was commissioned to restore order, and in 1869 he was nominated coadjutor-bishop of Chicago. He was consecrated in 1870. After the Chicago fire had destroyed seven churches and several schools and asylums, he set at once to work to rebuild them. He erected the cathedral of the Holy Name, and founded five new convents and seven academies. During his administration the number of priests in the diocese increased from 142 to 206, and the churches from 200 to 300.

FOLGER, Charles James, jurist, b. in Nantucket, Mass., 16 April, 1818; d. in Geneva, N. Y., 4 Sept., 1884. In 1841 he removed with his father to Geneva, N. Y. He was graduated at Geneva (now Hobart) college in 1836, studied law in Canadaigua, was admitted to the bar in Albany in 1839, and, after practising a short time in Lyons, settled in Geneva in 1840. In 1843 he became a judge of the court of common pleas in Ontario county, and soon afterward was also made master and examiner in chancery, which offices were abolished by the constitutional convention of 1846. He was also county judge in 1832-3. He was a Democrat in 1854, when he joined the newly formed Republican party. He was a state senator in 1861-2, acting for four years of the time as president pro tempore, and was chairman of the judiciary committee during the whole period. He was a member of the New York constitutional convention of 1867, and chairman of its judiciary committee. By the appointment of President Grant he was U. S. assistant treasurer in New York city from 1869 till 1870. He was elected associate judge of the state court of appeals in 1871, and on the death of Chief-Justice Church, in 1880, he was designated by Gov. Cornell to fill the unexpired term of that officer. In November of that year he was re-elected to the bench of the court of appeals for the full term of fourteen years, but resigned in 1881 on his appointment by President Arthur to the treasury portfolio, which he retained till his death. The New York state Republican convention in September, 1882, nominated him for governor, but through a defection in his party he was defeated by Grover Cleveland by nearly 200,000 majority. He took his defeat so much to heart that, in the opinion of those who knew him well, his health was seriously affected thereby.

FOLGER, Peter, colonist, b. in England in 1617; d. in Nantucket, Mass., in 1690. He left Norwich, England, in 1633, with his father, settled in Watertown, and removed to pastor St. Paul's Vineyard in 1641, where he taught, surveyed land, and assisted Thomas Mayhew, the missionary, in his labors among the Indians. He afterward became a Baptist minister, and in 1663 he removed to Nantucket, having been offered by the proprietors a half-share of a large tract of land if he would serve there as surveyor and interpreter. He was one of five commissioners to lay out land; it was voted that,
FOLLEN, Charles Theodore Christian, educator, b. in Romrod, Germany, 4 Sept., 1796; d. in Long Island sound, 13 Jan., 1840. He was the second son of Christopher Follen, an eminent jurist. He was educated at the preparatory school at Giessen, where he studied Greek with the greatest proficiency in Greek, Latin, Hebrew, French, and Italian. At the age of seventeen he entered the University of Giessen, and began the study of jurisprudence, but presently, on hearing the news of Napoleon's defeat at Leipsic, he enlisted in a corps of riflemen. A few weeks later his military career was cut short by an acute attack of typhus fever, which seemed for a time to have completely destroyed his memory. After his recovery he returned to the university, where he took the degree of doctor of civil law 1817. In the following year he lectured on the pedants in the University of Jena. Here he was arrested on suspicion of complicity with the fanatical assassin, Sand, in the murder of Kotzebue. The suspicion was entirely groundless. After his acquittal he returned to Giessen, where he soon entered the circle of the government through his liberal ideas in politics. His brother had already been thrown into jail for heading a petition begging for the introduction of a representative government. Dr. Follen, perceiving that he was himself in danger, left Giessen and soon entered the chancery court of France through the acquaintance of Lafayette. In 1820 the French government ordered all foreigners to quit France, and Dr. Follen repaired to Zurich, where he became professor of Latin in the cantonal school of the Grisons. He was soon afterward transferred to the University of Basel, as professor of science, and here, in association with the celebrated De Wette, he edited the literary journal of the university, and published an essay on the "Destiny of Man," and another on "Spinoza's Doctrine of Law and Morals." In 1834 the governments of Russia, Austria, and Prussia demanded of the Swiss government that Dr. Follen should be surrendered to "justice" for the crime of disseminating revolutionary doctrines, and, finding the Swiss government unable to protect him, he made his escape to America, and, after two years in the study of the English language, was appointed instructor in German at Harvard. He studied divinity with Dr. W. E. Channing, began preaching in 1828, and also served as instructor in ecclesiastical history in the Harvard divinity-school. In 1830 he was appointed professor of German literature at Harvard. There was no regular foundation for such a professorship; it was merely continued from time to time by a special vote of the corporation. About this time Dr. Follen became prominently connected with the anti-slavery movement, which was then extremely unpopular at Harvard, and in 1834 the corporation refused to continue his professorship. Thrown thus upon his own resources, after nearly ten years of faithful and valuable service at the university, Dr. Follen supported himself for a time by teaching and writing, living at Watertown, Milton, and Stockbridge. In 1836 he was formally ordained as a Unitarian minister, and preached occasionally in New York, Washington, and Boston. He continued conspicuous among the zealous advocates of the abolition of slavery. In 1840 he was settled over a parish in East Lexington, Mass., but while on his way from New York to Boston he lost his life in the burning of the steamer "Lexington." He published a "German Reader" (Boston, 1831; new ed., with additions by G. A. Schmitt, 1838); and "Practical Grammar of the German Language" (Boston,
Admiral Farragut gave Mr. Folsom a silver vase, handsomely engraved from sketches made by Farragut himself, and a map of the South Seas, with a dedication to Captain William Cullen Bryant of the "U. S. Literary Gazette" in Boston and New York in 1824, and edited, with Andrews Norton, the "Select Journal of Foreign Periodical Literature" in 1833. He published "Cicero's Select Orations," with notes (Boston, 1834), and "Additional Selections from Livy," with notes (Cambridge, 1829).—His wife, Susannah Sarah, daughter of Prof. Joseph McKeen, of Harvard, married Mr. Folsom in 1824, and has written both prose and poetry. During Mrs. Eliza Lee Follen's absence in Europe she edited voluminous works on her behalf, and, in 1840, wrote an "Ode for Ladies' Fair" (1840). She also contributed to Miss A. W. Abbott's "Autumn Leaves" (Cambridge, 1858), and to Arthur Gilman's "The Cambridge of 1776" (Cambridge, 1876).—Their son, Charles William, engineer, b. in Cambridge, Mass., 17 April, 1830, was graduated at Harvard in 1843, and was engaged in the construction of railroads in New York, Virginia, and Ohio from 1848 till 1854, and in Nova Scotia from 1853 till 1856. He served in the National army during the civil war, was on the railroads in Virginia and Tennessee for the U. S. government in 1869, and superintendent of Mount Auburn cemetery, near Boston, from April, 1870, till April, 1873. He has been employed in the sewer department of Boston since 1876.—Another son, Norton, physician, b. in Boston, Mass., 15 April, 1842, studied in the Lawrence scientific school of Harvard, and was graduated at Harvard medical school in 1864. He was surgeon of the 45th colored troops in 1864–5, and acting medical director of the 25th army corps, receiving the brevet of lieutenant-colonel. He was in transport out of service, and became a surgeon in the Liberal Mexican army under Gen. Escobedo. He was resident physician at the Massachusetts general hospital in Boston in 1869–70, and since that time has practised his profession in that city. Dr. Folsom had a brilliant success at his first attempt to publish "Essay on the Senses of Smell and Taste," which gained the Boylston society prize (Boston, 1863), and "Plans and Suggestions for Johns Hopkins Hospital, Baltimore" (New York, 1875).
the Discovery of Maine," which was delivered before
the New York historical society, 6 Sept., 1846. He
was born in 1817. The son of Amos and Sarah
Meredith Belknap, (then a part of Strafford county),
N. H., 19 May, 1817; d. in San José, Cal., 19 July,
1855. He was graduated at the U. S. military academ-
y in 1840, and assigned to the infantry, serving in
the Florida war against the Seminoles until 1841, and
then on the northern frontier until 1844. In that
year he was appointed assistant instructor of in-
fantry tactics at West Point. He was transferred to
the quartermaster's department, with the rank of
captain, in 1846, and served in California during
the war with Mexico. From 1846 till 1849 he was also
collector of customs for the port of San Fran-
cisco. He was one of the first to appreciate the
discovery of gold in California, and to impart the
news officially to the government. He was identi-
fied with the early history and development of San
Francisco, where he was a large property owner,
and one of the wealthiest citizens of California.
Folsom City, on the American river, near the local-
ity where gold was discovered, was named for him.

FOLSOM, Nathaniel, Revolutionary soldier, b. in
Exeter, N. H., in 1726; d. there, 26 May, 1790.
His earliest ancestors in America were the name
Folsom. In the fall of 1775 he commanded a company
at Fort Edward, was distin-
guished at the defeat and capture of Baron Dieskau,
and appointed general of militia, before the Revo-
lution. He served during the siege of Boston, in
1775, until he was relieved by Sullivan in July.
He was a member of the Continental congresses of
1774–5 and 1777–8, was a councillor in 1778, and
served as president of the Constitutional conven-
tion of New Hampshire in 1788.

FOLSOM, Nathaniel Smith, clergyman, b. in
Portsmouth, N. H., in 1808; d. in Cambridge, Mass.,
in 1888. He was graduated at Dartmouth in 1828 and at Andover theo-
logical seminary in 1831, and ordained on 26 Sept.
of that year. After acting as a missionary in Lib-
erty county, Ga., in 1831–2, he was pastor of a
Presbyterian church in Cleveland, Ohio, in 1832–3. In 1833 he
was called to the ministry of the Unitarian church and
was appointed to the pastorate of the Unitarian church at
Haverhill, Mass., in 1840–8, and in 1848 he was elected to the
pastorate of the Unitarian church in Concord, Mass.,
also acting as pastor of a church there in 1847–8. In
1875 he removed to Boston. Dr. Folsom has contributed to current literature, and has published "Critical and Historical Inter-
pretation of the Prophecies of Daniel" (Boston, 1842).--His son, Charles Follen, physician, b. in
Haverhill, Mass., 3 April, 1842, was graduated at
Harvard in 1862. He taught among the freedmen in
Massachusetts, studied medicine, and, after his
graduation at Harvard medical school in 1870, be-
gan general practice in Boston. In 1872–7 he at-
tended lectures in Vienna, Berlin, and Munich. He
was physician to the mental hospital at East Wal-
lbury, Vt., editor and assistant professor of mental dis-
orders from 1879 till 1882. He has been secretary of
the Massachusetts board of health, and of the state
board of health, lunacy, and charity, and has been
a member of the national board since 1882.
Dr. Foltz has been a paper medical society, and a member of the State medical society, and of numerous medical societies. His

writings have been chiefly confined to health re-
ports and articles on hygiene and mental diseases.
Several of his lectures have been reprinted, one of
them, on "Mental Diseases," for the use of students
in the Harvard medical school. This was first pub-
lished in Peppers "American System of Medicine." He
has written papers on "Limited Responsi-
bility," "General Paralysis," and "Insanity in
England and America." "Letters from Europe,"
which appeared in the Boston "Medical and Surgi-
cal Journal," and has published in book form
"The Present Aspect of the Sewage Question as
Applied to Boston" (Boston, 1877).

FOLTZ, Clara Shortridge, lecturer, b. in Henry
county, Ind., 16 July, 1846. She removed to
Mount Pleasant, Iowa, with her father, Rev.
Elias W. Shortridge, and was educated chiefly at
Howe seminary in that town. She taught in
Mercer county, Ill., and in December, 1864,
moved to Oregon, in 1872, and subsequently to San José, con-
tributing to the "New Northwest," and the San José "Mercury." About 1876 she was thrown
on her own resources, and, though having the care
of four children, she determined to study law, aid-
ing herself by her pen. She represented the legis-
lature of 1877–8, secured the passage of an act permi-
ting women to practise law, and was the first to take advantage of it, being admitted to the
bar on 5 Sept., 1878, after passing credibly a
strict examination. In 1880 she was clerk of the
assembly judiciaries, and in the same year removed to San Francisco, where she spoke
for the Republicans during the canvasses of 1880,
1882, and 1884. In 1886 she became a Democrat,
and in the winter of that year lectured in Wisconsin,
Illinois, and Iowa. She has been successful at
the bar, and is a popular speaker.

FOLTZ, Jonathan Messersmith, surgeon, b. in
Lancaster, Pa., 25 April, 1810; d. in Philadel-
phia, Pa., 12 April, 1877. He entered the U. S.
avy as assistant surgeon, 4 April, 1831, and landed with the
storming party at Quallah Battoo, Suma-
tara, being specially detailed by Capt. Sherbrooke, official dispatch. He was made surgeon, 8 Dec.,
1838, and was attached to the frigate "Raritan,"
of the Brazil squadron, in 1844–5, and to the
"Jamestown," of the same squadron, in 1851–4.
He was ship-surgeon of the Western squad-
on in 1852–3, and later, of the "Great Britain" on the "Hart-
ford" in all his battles during those years. He
occupied the same place on the "Franklin" during
Farragut's voyage to Europe in 1867–8, and in
1870–1 was president of the naval medical board.
He became medical director on 9 March, 1871, and
chief of the bureau of medicine and surgery, with
the rank of commodore, on 25 Oct. of that year.
He was placed on the retired list, 23 April, 1872.
Dr. Foltz published "Endemic Influence of an

FOWLEI, William Watts, educator, b. in
Romulus, Seneca co., N. Y., 14 Feb., 1833. He
was graduated at Hobart in 1857, and in 1859 became
adjuster professor of mathematics there. He spent
the years 1860–1 in the study of philology at Ber-
lin and in travel, and during the civil war served in
the 50th N. Y. Vols. in 1862, and was major in 1865.
He then engaged in business, but in 1869 accepted the chair of mathematics in Kenyon col-
lege, Ohio, and in the same year was appointed to the presidency of the University of Minnesota,
after resigning which he remained professor of po-
litical science. He has published "Public Instruction in Minnesota" (1875), and "Lectures on Political Economy."
FONERDEN, John, physician, b. in Baltimore, Md., in 1804; d. in New York city, 6 May, 1869. He was graduated in medicine at the University of Maryland in 1823, was city physician of Baltimore during the cholera epidemic of 1832 and 1833 and editor of the Maryland "Colonization Journal" in 1835, professor of obstetrics in Washington University, Baltimore, in 1845-6, and resident physician of the Maryland hospital for the insane from 1846 till his death. He was distinguished as a philanthropist, particularly in his treatment of the insane. He published "A Memorial of Dr. Samuel Baker" in the "Baltimore Athenæum" of 2 Jan., 1836, and a "Report" as physician of the hospital for the insane (1860).

FONSECA, Juan Rodriguez (fon-sa-ka), Spanish archbishop, b. in Toro, near Seville, in 1451; d. in Burgos, 4 March, 1524. He was successively dean of the chapter of the cathedral of Seville, bishop of Badajoz, of Cordova, of Palencia, of Burgos, and archbishop of Rosanna. When Christopher Columbus applied for the second time for aid to enable him to undertake the discovery of the New World, the archbishop, who desired to enlist Isabella as to the feasibility of the enterprise. He denounced Columbus as a visionary, violently opposed the consideration of the proposition, and never forgave the discoverer for obtaining council of his four brothers. He left the control of the king the control of the equipment of the expedition, and left no stone unturned to secure its failure. It is well known that Fonseca's efforts nearly succeeded, the crews mutinying more than once, and demanding a return to Spain. After the death of Isabella, Fonseca, having been made privy council to King Ferdinand, was enabled to vent his hatred on the family of Columbus. In consequence of his resentment he conceived a strong hatred of the Indians of the New World, and proposed to the council the most sanguinary measures against them. He laid it as his duty to select the missionaries for the New World, he chose bigoted fanatics, and took pains to impress on them that the Indians were but slightly superior to animals. He also brought his malevolence to bear against Hernando Cortes, who finally appealed to Charles V., and obtained in 1520 the dissolution of the council of which Fonseca was president. He was, nevertheless, a member of the new council, where his animosity to the Indians, if less prominent, was quite as active as before. A characteristic saying of Fonseca's was, that "what the Indians needed was not a baptism with water, but one in their own blood." Fonseca's acquirements were remarkable for the time in which he lived, and he was considered during his life as a man of whose learning Spain might well be proud.

FONSECA, Mariano José Pereira da, Brazilian statesman, b. in Rio Janeiro, 18 May, 1773; d. there, 16 Sept., 1848. He was graduated at the royal college of Mafra, Portugal, in 1793, and in 1794 matriculated at the recently founded scientific academy of Brazil. On 4 Dec. of the following year, the victor over Charles X. of France, and induction of the principal members of that school for suspected conspiracy, and Fonseca remained in strict confinement in the island of Das Coberas until released by a royal order in July, 1797. He then went into business until 1802, when he was elected member of the council of agriculture and commerce, and censor of the press. He was elected to the provisional junta in 1821, was appointed minister of the treasury on 13 Nov., 1823, and the same year became a member of the council of state, and was one of the authors of the imperial constit-
FOOTE, Joseph Ives, clergyman, b. in Water- town, Conn., 17 Nov., 1796; d. near Knoxville, Tenn., 21 April, 1940. He removed with his parents from the old family home in New York, to Salem, Mass., and there was educated at Phillips Andover academy and at Union college, where he was graduated in 1821. He then studied theology at Andover, was ordained on 30 Sept., 1824, and labored as a home missionary in South Carolina and New Hampshire in 1824-18. He was pastor of Congregational churches in West Brookfield, Mass., in 1826-1828, Salina, N. Y., in 1833-3, and in Cortland, N. Y., in 1835-7. He then removed to Westport, Conn., where he united with the Presbyterian church, and in 1839 became pastor at Knoxville, Tenn. In July of that year he was elected president of Washington college, Tenn., but did not decide to accept the office till the following year. He was on his way to the college when he was thrown from his carriage, and died on the following day. The college had given him the degree of D. D. Dr. Foot delivered three discourses, including three on "Perfectionism" (1834), and an historical discourse on the town of Brookfield (1828), and contributed to the "Literary and Theological Review," and other periodicals. A selection from his manuscript sermons, with a memoir by his brother, the Rev. George Foot, was published after his death (Philadelphia, 1841).

FOOTE, Samuel Alfred, jurist, b. in Watertown, N. Y., 17 Dec., 1790; d. in Geneva, N. Y., 11 May, 1876. He was graduated at Union in 1811, studied law, and in 1815 was admitted to the bar. He was district attorney for Albany county in 1819-21, removed to New York city in 1825, and in 1844 to Geneva, N. Y. He was judge of the court of appeals in 1852, and in 1856-7 served two terms in the legislature, where he introduced resolutions condemning the Dred Scott decision. Judge Foot became a member of the African colonization society in 1821, and was president of the American Bible society in 1843-7. He warmly espoused the National cause in 1861, and served in the navy. He was a prime mover in the Portland public health and anti-slavery movements. He removed in 1845 to New Haven, Conn., and resumed the practice of medicine. He was a founder of the New Haven colony historical society, and a member of many other societies. He collected much material relating to the early history of Chautauqua county, which formed the basis of the history of that county by A. W. Young (Buffalo, 1875).

FOOTE, Elisha, commissioner of patents, b. in Lee, Mass., 1 Aug., 1809; d. in St. Louis, Mo., 22 Oct., 1883. He was educated at the Albany institute, and studied law with Judge Daniel Cady in Johnstown, N. Y., meanwhile supporting himself by teaching and surveying. After being admitted to the bar, he settled in western New York, and was district attorney and then judge of the court of common pleas to 1846. His creation of the patent law was patent law, and he made several valuable inventions. In 1864 he was appointed to the board of appeals at the U. S. patent office, where from July, 1868, until April, 1898, he was commissioner.

FOOTE, George Anderson, physician, b. in Warren county, Ohio, 30 Jan., 1835; d. in Jefferson medical college, Philadelphia, in 1856, and was a surgeon in the Confederate army during the civil war. He was publicly thanked by
FOOTE, Henry Stuart, senator, b. in Fauquier county, Va., 20 Sept., 1800: d. in Nashville, Tenn., 20 May, 1880. He was graduated at Washington college, Lexington, Va., in 1819, admitted to the bar in 1822, and in 1824 went to Tuscumbia, Ala., where he edited a Democratic newspaper. He removed to Jackson, Miss., in 1826, and acquired an extensive practice, but was also active in politics, and in 1844 was a presidential elector. He was chosen to the U. S. senate as a Unionist in 1847, took part in favor of the compromise measures of 1850, and served as chairman of the committee on foreign relations. He resigned his seat in the senate in the autumn of 1852 to canvass his state as a Union candidate for the governorship, his opponent being Jefferson Davis, who had been persuaded to take the place of Gen. John A. Quitman on the secession ticket, when it became evident that the latter must be defeated. Foote was elected and served one term, till 1854, when he removed to California, but returned to Mississippi in 1858, and practised law at Vicksburg. He strongly opposed secession in the southern convention at Knoxville in May, 1856, and when the question was seriously agitated in Mississippi he removed to Tennessee. But he subsequently was elected to the Confederate congress, where he was noticeable for his hostility to Jefferson Davis, and finally for his opposition to the continuance of the war. He was in favor of accepting the terms offered by President Lincoln in 1863 and 1864. After the war he resided for a time in Washington, D. C., and supported the administration of Gen. Grant, who made him superintendent of the U. S. mint at New Orleans. He held this office till shortly before his death, when failing health compelled him to return to his home near Nashville, Tenn. Gov. Foote was an able criminal lawyer, an astute politician, and a popular orator. He had a violent temper, and during his political career fought several duels, two of which were with Sargent Prentiss, one with John A. Winston, and one with John F. H. Claiborne. He also had a personal encounter with Thomas H. Benton on the floor of the U. S. senate. He published "Texas and the Texans" (2 vols., Philadelphia, 1841); "The War of the Rebellion, or Secession and Charybdis" (New York, 1866); of "Bench and Bar of the South and Southwest" (St. Louis, 1876); and "Personal Reminiscences."
he engaged the fort and contributed greatly to the demoralization of its garrison, but several of the boats having been disabled, the fleet was compelled to withdraw, and Foote himself was wounded. He then sailed for New York, and on his return he was appointed chief of the bureau of equipment and recruiting. On 4 June, 1863, he was chosen to succeed Rear-Admiral Dupont in command of the fleet off Charleston, and while on his way to assume this command he died in New York. He was a man of a high type of Christian character, with most gentle and lovable traits, but uncompromisingly firm in his principles, especially in regard to temperance reform in the navy, where he was the means of abolishing the spirit-ration. Admiral Smith said of him: "Rear-Admiral Foote's character is well known in the navy. One of the strongest traits was great persistence in anything he undertook. He was a man who could neither be shaken off nor choked off from what he attempted to carry out. He was truly a pious man, seventh in the church, and on his deathbed he asked for the last Communion. It was the first order. He was one of our foremost navy officers—none before him." The work he did for his country was mainly in being the first to break the Confederate line of defense, and in an hour of great depression, by a well-timed and brilliant—ever setting up, with perspicacity and precision—prestige of success. In a word, he was a courageous and successful officer, thoroughly devoted to his profession, and uniting the best characteristics of the old and new schools of the U. S. Navy. During a period of four years after 1852, when he remained at home, he wrote "Africa and the American Flag" (1854). His biography has been written by Prof. James M. Hoppin (New York, 1874).

FOOTE, Thomas Moses, journalist, b. in Clinton, N. Y., in 1830; d. in Buffalo, N. Y., 20 Feb., 1882. He was a son of Moses Foote, a captain in the Revolution. He was educated in the public schools of Clinton in 1878. Thomas was graduated at Hamilton college in 1855, and received his medical diploma from the College of physicians and surgeons, Fairfield, N. Y., but devoted himself to journalism and became president of the Buffalo "Commercial" in 1836, and soon afterward a proprietor, retaining his connection with it until his death. He was charged d'afaires at New Granada in 1849—50, and in 1852 held the same office in Vienna, editing in the interval the Albany "State Register." Mr. Foote's editorial writings were distinguished for wit and grace of diction. He was a man of extensive reading and an entertaining talker.

FOOTE, William Henry, clergyman, b. in Chesterfield, Conn., 20 Dec., 1794; d. at Romney, W. Va., 19 Nov., 1869. He was graduated at Yale in 1816, taught school, and in 1817 was admitted to the bar in Winchester, Va., in 1818, and in the same year entered the theological seminary at Princeton, but was compelled to leave by impaired health. He was then licensed to preach, and engaged in missionary labors among the backwoodsmen of the northern neck. In 1818, he became a member of the Presbyterian church at Romney, W. Va., and established at the same time a school for both sexes, which became a large and prosperous institution. In 1838 he was appointed agent of the central board of foreign missions of the Presbyterian church, and during this work, which led him to visit many counties in the state, he collected the materials for his sketches of Virginia. In 1844 he returned to Romney as pastor and superintendent of the academy, and there continued till 1861, when he removed for Hampden-Sidney college. Although he was a Union man throughout the civil war, he shared the fate of his adopted state, and during the siege of Petersburg was chaplain to a Confederate regiment. At the close of the war he returned to Romney, where he remained till his death. Hamden-Sidney gave him the degree of D. D. in 1847. His published works are "Sketches, Historical and Biographical, of the Presbyterian Church in Virginia" (2 vols., Philadelphia, 1839—40), and "Sketches in North Carolina" (New York, 1840).

FORAKER, Joseph Benson, governor of Ohio, b. near Rainsborough, Highland co., Ohio, 5 July, 1846. He worked on a farm in his boyhood, and when sixteen years of age enlisted in the 89th Ohio regiment, and served in the army of the Cumberland until the close of the war. He was made sergeant on 26 Aug., 1862, 1st lieutenant, 14 March, 1864, and on 19 March, 1865, was brevetted 2d lieutenant for "efficient services during the campaigns in North Carolina and Georgia." When his regiment was mustered out he was mustered in as a lieutenant in the camp on Gen. Henry W. Slocum's staff.

After the war he spent two years at Wesleyan university, Delaware, Ohio, and then entered Cornell, where he was graduated with the first class in 1869. He was admitted to the bar in the same year, and in 1879—82 was judge of the Cincinnati superior court, resigning the office on account of his health. He was the unsuccessful Republican candidate for the congression of Ohio in 1882, but was again a candidate for the office in 1885, when he was elected.

FORAN, Joseph K., Canadian lawyer, b. in Greenpark Aylmer, province of Quebec, in 1857. He was sent in 1872 to St. Joseph's college, Ottawa, where he studied ten years. After graduation, he went in 1877 to Laval university, Quebec, and studied law. In 1881 he was called to the Lower Canadian bar. While in Laval he wrote numerous poems, which were published in British and Canadian periodicals. Among his principal poems afterward were a "Lament for Longfellow" and "Indian Translations." Between 1879 and 1888 he published a series of essays on monuments, coins, art, and many other subjects. From 1883 till 1885 he lived among the Canadian Indians, perfecting himself in a knowledge of their dialects and customs. Since his return he has delivered many lectures. He has published "An Essay upon Obligations" (Toronto, 1886); "Irish-Canadian Representatives, their Past Acts, Present Stand, and Future Prospects"; and "The Spirit of the Age," and has recently published two novels based on his experiences among the Indians, entitled "Tom Ellis, a Story of the North-West Rebellion," and "Simon, the Abenakis."

FORBES, Charles Edwin, philanthropist, b. in West Bridgewater, Mass., 25 Aug., 1763; d. in Northampton, Mass., 19 Feb., 1881. He was gradu-
FORBES, James Fraser, Canadian physician, b. in Gibraltar in 1820. He was the son of an officer in the 64th regiment, who, after retiring from the service, was collected at Harwich, Nova Scotia. Mr. Forbes has been coroner and health officer for Liverpool and Queens county, N. S., for over twenty-six years, and was elected president of the bank of Liverpool in 1874. He was first returned to the Dominion parliament in 1867, was re-elected in 1872, and again in 1874, and was defeated in 1878, but was re-elected in 1882.

FORBES, John, British soldier, b. in Petenræff, Pikeshire, Scotland, in 1710; d. in Philadelphia, Pa., 11 March, 1759. He became a physician, but abandoned his profession to enter the army, and was made lieutenant-colonel of the Scotch greys in 1745. In the German war he was on the staff of Lord Stair, Gen. Ligonier, and Gen. Campbell, was made colonel of the 17th foot, 25 Feb., 1757, and acted as quartermaster-general under the Duke of Cumberland. He was appointed brigadier-general in America, 28 Dec., 1757, and was adjutant-general in the expedition against Louisburg. In the autumn of 1758 he was placed in command of the expedition against Fort Duquesne, numbering 1,200 highlanders, 300 royal Americans, and about 5,000 provincials, including about 2,000 Virginians under the command of Col. Washington. When Forbes arrived at Raystown, Pa., with his army, in September, 1758, he was carried in a litter, as he was already prostrated by the illness that shortly afterward caused his death, but his head was clear and his will firm, and he retained command of the expedition. After Bouquet's disastrous reconnaissance (see BOUQUET, HENRY) the army reached Loyalhanna on 5 Nov., and it was decided to pass the winter there, when news of the weakness of the fort induced Forbes to push forward. Pasting the field where the bones of Braddock's men lay unburied, the expedition finally reached Fort Duquesne on 25 Nov. The work had been blown up and abandoned by the French on the previous day, and Washington's men marched in and took possession. Forbes was named the first officer to the fort, in honor of William Pitt, who had planned the campaign, and, after concluding treaties with the Indian tribes on the Ohio, returned to Philadelphia, where he died shortly afterward. He was buried in the army for his obstinacy, and was nicknamed "The Old Forbes;"

FORBES, John, librarian, b. in Scotland in 1717; d. in New York, 4 Oct., 1824. He was graduated at Columbia in 1794, and from that year till his death was librarian of the New York society library, being prominent during that time among literary men in New York city.—His son, Philip Jones, b. in New York city, 13 Jan., 1807; d. in Brooklyn, N. L., in June, 1877, entered the U. S. military academy in 1823, but was not graduated. From 1828 till 1835 he was librarian of the New York society library. Librarian, John, b. in New York city, 24 April, 1846, is now (1887) assistant librarian in the same institution.

FORBES, John Collin, Canadian artist, b. in Canada, 23 Jan., 1846. He was entirely self-taught in art, until the production of his first work, a landscape, which sold for 20s. In 1870 he was appointed portrait painter to the Queen. In May 1872, he left Canada, and after years of study at the Royal academy in London and elsewhere in Europe. After his return to Canada he painted "The Founding of the Hibberd," which was exhibited at the Centennial exhibition in Philadelphia in 1876; the "Genius in the Royal Gorge;" "The Mount of the Holy Cross;" "Mount Stephen;" "The Glacier of the
Selkirk"; "Beware"; "Sweet Sixteen"; and "The Lily." He has also painted portraits of Lord Dufferin, Sir John A. Macdonald, Alexander McKenzie, Edward Blake, Sir Hector Langevin, Sir Charles Tupper, Sir David L. McPherson, and Lord Dufferin. He settled in Toledo, Ohio, where in 1853–8 he was U.S. marine surgeon. He was county physician in 1855–61, surgeon of the 67th Ohio regiment in 1861–3, and city physician in 1867–9. In 1896 he was mayor of Toledo. Dr. Forbes is the author of a "New Amputation through the Femur," which was described in a paper read by him before the State medical society in 1875, and is now taught in nearly all the medical colleges of the United States.

**FORBES, Samuel Franklin,** surgeon, b. in Canton, Hartford co., Conn., 8 June, 1829. He was graduated in medicine at the University of the city of New York in 1854; settled in Toledo, Ohio, where in 1853–8 he was U.S. marine surgeon. He was county physician in 1855–61, surgeon of the 67th Ohio regiment in 1861–3, and city physician in 1867–9. In 1896 he was mayor of Toledo. Dr. Forbes is the author of a "New Amputation through the Femur," which was described in a paper read by him before the State medical society in 1875, and is now taught in nearly all the medical colleges of the United States.

**FORBES, Stephen Alfred,** naturalist, b. in Silver Creek, III., 20 May, 1824. He was educated at Beloit academy and Rush medical college, and received the degree of Ph. D. from the Indiana state university. During the civil war he held the appointment of captain in the Illinois volunteer cavalry. In 1877 he founded the Illinois state laborers' asylum and became its director, which office he has since held. Dr. Forbes also instituted the natural history survey of Illinois, of which he has charge, and he is likewise professor of zoology and entomology in the university of Illinois. In 1892 he became state entomologist; and in the annual reports of the State Entomologist on the Noxious and Beneficial Insects of the State of Illinois" (Springfield, 1888–9). Beside many zoological and educational papers contributed to various journals, he has published "Studies of the Food of Birds and Mammals in Illinois" (1889); "Studies of the Contagious Diseases of Insects" (1890); and has edited the "Bullentin of the Illinois State Laboratory of Natural History" (vols. i. and ii., and "Report on the Natural History Survey of Illinois." Vol. ii., Ornithology, Springfield, 1897).

**FORCE, Pierpont,** Falls, Essex co., N. J., 26 Nov., 1790; d. in Washington, D. C., 23 Jan., 1888. His father, William Force, was a veteran of the Revolution, and in talking with him the boy acquired a fondness for the history of that period. He removed with his parents to New Paltz, Ulster co., N. Y., and afterward to New York city, where, on leaving school at the age of sixteen, he was apprenticed to a printer. While foreman of an office in Bloomingdale, he printed the second edition of Irving's "Knickerbocker's History of New York," and in 1812 was president of the New York typographical society. He removed to Washington in November, 1815, under an arrangement with his employer, W. A. Davis, who had obtained a contract for the government printing, and in 1820–3 compiled and printed the "Register," which was under him in 1836, and in an act of congress in 1816. The name of "Blue Book," suggested by Mr. Force, was officially recognized in 1830 (and the title has since been adopted by the English government for a different kind of publication). He also published an annual "National Calendar" (1820–46), and in 1833 established the "National Journal," which he edited and published till 1830, supporting the administration of John Quincy Adams. Many years before this he had begun to collect books and papers on American history and antiquities, and in 1833 he was authorized by act of congress to compile a vast work, to be known as the "American Archives, a Documentary History of the English Colonies in North America." The plan embraced six series of six or more volumes each, covering the period from 1600 to 1820. Mr. Force was chairman of the committee on the final ratification of the constitution of the United States. Mr. Force at once began a personal examination of the public archives in the thirteen original states, and by means of his agents ransacked the country for pamphlets, rare books, letters, newspapers, maps, and maps which bear on the history of the colonies. These he gathered in seven rooms adjoining his residence in Washington. One who knew him says of this library: "Excepting when visited by the friends of its proprietor, members of congress addicted to historical pursuits, or literary pilgrims from abroad, in silence was only broken by the presence of an assortment of dogs and cats, which enjoyed the full range of the establishment, and whose characters seemed to have been influenced by the solemn wisdom of the tombs among whom they lived." Between 1847 and 1853, in New Orleans, in Mexico, and in Canada, Dr. Clarke, he issued the whole of the fourth series of his work and part of the fifth, comprising nine folio volumes, and covering the years from 1765 to 1778; but in 1853, owing to a misunderstanding about the law which gave him the name of its director, which office he has since held. Dr. Forbes also instituted the natural history survey of Illinois, of which he has charge, and he is likewise professor of zoology and entomology in the university of Illinois. In 1892 he became state entomologist; and in the annual reports of the State Entomologist on the Noxious and Beneficial Insects of the State of Illinois" (Springfield, 1888–9). Beside many zoological and educational papers contributed to various journals, he has published "Studies of the Food of Birds and Mammals in Illinois" (1889); "Studies of the Contagious Diseases of Insects" (1890); and has edited the "Bullentin of the Illinois State Laboratory of Natural History" (vols. i. and ii., and "Report on the Natural History Survey of Illinois." Vol. ii., Ornithology, Springfield, 1897).

The name of "Blue Book," suggested by Mr. Force, was officially recognized in 1830 (and the title has since been adopted by the English government for a different kind of publication). He also published an annual "National Calendar" (1820–46), and in 1833 established the "National Journal," which he edited and published till 1830, supporting the administration of John Quincy Adams. Many years before this he had begun to collect books and papers on American history and antiquities, and in 1833 he was authorized by act of congress to compile a vast work, to be known as the "American Archives, a Documentary History of the English Colonies in North America." The plan embrace
in 1862–3, took part in the siege of Vicksburg, and on 11 Aug., 1863, was made brigadier-general of volunteers. He was with Sherman in his Atlanta campaign and his march to the sea, was brevetted major-general of volunteers, 13 March, 1865, and commanded a district in Missouri later in the year. He was mustered out of service, 11 Jan., 1866. He was judge of the court of common pleas of Hamilton county, Ohio, in 1867–77, and judge of the superior court of Cincinnati from that year till 1877. He published "Fort Henry and Corinth," being vol. ii. of "Campaigns of the Civil War" (New York, 1881), and several pamphlets, mostly historical, including "Prehistoric Man," "Darwinism and Deity," "The Mound-Builders" (Cincinnati, 1873); "Some Early Notices of Ohio Indians"; "To What Race Did the Mound-Builders belong?" (1879); "Marching across Carolina" (1883); "Personal Recollections of the Vicksburg Campaign" (1885); "Letters of Amerigo Vespucci," an address delivered before the Ohio historical and philosophical society (1885); and "Sketch of the Life of Justice John McLean" (Cambridge, 1885). He has edited Walker's "Introduction to American Law" (Boston, 1878), and Harris's "Principles of Criminal Law" (Cincinnati, 1880).

FORD, Corydon La., physician, b. in Lexington, Greene co., N. Y., 29 Aug., 1815. He removed with his family to Ohio in 1818, after attending Canandaigua academy and studying with several physicians, entered Geneva medical college, where he was graduated in 1842. He was demonstrator of anatomy there in 1842–43, and in Buffalo medical college in 1847–71, professor of anatomy in Castleton, Vt., medical college in 1849–61, and of anatomy and physiology in Berkshire medical institution, Pittsfield, Mass., in 1860–7. He held the same chair in the Bowdoin college medical school in 1864–70, and in 1874 accepted the chair of anatomy in the University of Michigan, to which that of physiology was added in 1886. In 1886–86 he also lectured annually in Long Island college hospital, Brooklyn, N. Y., and in the latter year became professor emeritus in that institution. Michigan university gave him the degree of LL.D. in 1891. Dr. Ford is considered one of the ablest teachers of anatomy in the country, and is the author of "Questions on Anatomy, Histology, and Physiology, for the use of Students" (4th ed., Ann Arbor, 1878); "Syllabus of Lectures on Ontology, Human and Comparative" (1884); and "Questions on the Structure and Development of the Human Teeth" (1885).

FORD, Edward Lloyd, publisher, b. in Oswestry, Shropshire, England, 10 March, 1845; d. in Morristown, N. J., 16 Dec., 1880. He came to New York in early youth, and studied for a few years under Prof. J. H. Paton. He enlisted in the 90th regiment of Pennsylvania volunteers in 1861, and within a year was promoted to a lieutenantcy, and detailed on Gen. Meade's staff. He was taken prisoner at Chancellorsville, 2 May, 1863, and sent to Libby prison, Richmond, but was exchanged early in the September following, and returned to his post of duty. In 1863 he was discharged from the volunteer service, promoted to a captaincy on the staff of Gen. Birney, and served in the 10th army corps. Broken health forced him to leave the army in December, 1864. In 1867 he became a partner in the newly established publishing-house of J. B. Ford & Co., and, by his business ability and fertility of invention, contributed largely to the success of the "Christian Union." He had a genius for mechanics, and made many improvements in printing, notably in devices for the rapid delivery of sheets from a printing-machine. He invented and patented folding combinations, folding and pasting apparatus, and devices for printing two sheets simultaneously, and for folding and pasting one upon the other.

FORD, George Lee, lawyer, b. in Lebanon, Conn., 16 Dec., 1823. He removed to New York city in 1855, studied law in that city, and was admitted to practice in 1859. In 1862 he was chosen president of the New London, Williamantic, and Palmerton railroad. In 1869 he accepted the appointment of collector of U. S. internal revenue in Brooklyn, N. Y. From 1873 till 1881 he was the business manager of the New York "Tribune," and in 1883 became president of the Brooklyn, Flatbush, and Coney Island railroad. His wife, Emily Ellsworth, author, b. in Groveton, Mass., 26 Aug., 1826, is a daughter of Prof. William C. Fowler. She has published, besides poems, stories, and essays, a volume of verses entitled "My Recreations" (New York, 1872). A later volume was printed privately. Their son, Worthington Chauncey, b. in Brooklyn, N. Y., Feb., 1858, prepared a revised edition of Wells's "Natural Philosophy," compiled the "American Citizen's Manual" (New York, 1883), and has published "The Standard Silver Dollar" (1884) and other economic tracts. For a year and a half he was a member of Congress. In 1885, after graduating from Harvard, he was on the staff of the New York "Herald." In September, 1885, he became chief of the bureau of statistics in the department of state at Washington, D. C. — Another son, Paul Lecester, b. in Brooklyn, N. Y., 23 March, 1865, has published a bibliography of the works written by and relating to Alexander Hamilton (Brooklyn, 1887), and a volume on the genealogy of his great-grandfather, Noah Webster.

FORD, John Thomson, theatrical manager, b. in Baltimore, Md., 16 Apr., 1829. In 1852 he became manager of the University theatre in Baltimore, and was afterward manager of the old Richmond, Va., theatre and the Holliday street theatre, Baltimore, which he twice rebuilt. In 1858 he was elected president of the city council, and for two years was acting mayor. He also built three theatres in Washington, D. C., including Ford's theatre, and was manager at the time of President Lincoln's assassination. He was arrested on suspicion of complicity in that crime, but, after being detained forty days in Carroll prison, was released, as there was not the slightest evidence against him. He has since been manager of various theatres. Mr. Ford was the first to bring Mary Anderson into public notice. He has been a state director of the Maryland penitentiary for eighteen years, and is active in philanthropic work in Baltimore. He has written much for the periodical press.

FORD, Joshua Edwards, missionary, b. in Ogdensburg, N. Y., 3 Aug., 1825; d. in Geneseo, N. Y., 3 April, 1886. He was graduated at Williams in 1844, and at Union theological seminary, New York, in 1847, and in that year sailed for Syria, under the auspices of the American Board of Commissioners for foreign missions. His first station was at Aleppo, where he was also forwarding-agent, postmaster, and banker for several other stations. He spent six months there, and when the Turkish mission was formed was transferred to Beirut, where he remained for four years, and then removed to Sidon. He went to England in 1861 to present the claims of the Syrian missions, and in 1865 returned to the United States on account of illness in his family. He edited several books in the Arabic language, and wrote a work in that tongue, entitled "Pasting and Prayer."
FORD, Philip, English merchant, d. about 1707. He was a Quaker, and was for several years William Penn's agent in London. Penn, becoming financially involved, had him arrested and held during his stay in London, but rescued him from the debtors' prison to Ford, and took him from there a lease for three years. Penn afterward paid him £17,000, but Ford claimed that £10,500 more were due him, and his son and widow arrested Penn in January, 1708. To avoid the execution, Penn put himself within the walls of Finsbury Field, and the Political Junto unsuccessfully petitioned the queen to put them in possession of Pennsylvania, at the same time offering to sell it to Isaac Norris for £8,000. Penn afterward lost his case in the court of chancery.

FORD, Samuel Howard, clergyman, b. in Missouri in 1823. He was educated at the University of Missouri, in 1849 was ordained to the Baptist ministry and became pastor in Jefferson City, Mo., and was afterward connected with churches in St. Louis and Cape Girardeau, Md., and Louisville, Ky. In 1858 he became an editor in the editorial of the "Western Recorder" and "Christian Repository." At the beginning of the civil war he removed to Memphis, Tenn., and in 1864 was pastor of the St. Francis street Baptist church in Mobile, Ala. He then returned to Memphis, and was passed through the lines of the enemy during the siege of that city in 1865. He now (1887) resides in St. Louis.

—His wife, Sally Rochester, author, b. in Rochester Springs, Boyle co., Ky., in 1828. Her maiden name was Rochester. She was graduated at the female seminary in Georgetown, Ky., in 1849, and in 1856 married Mr. Ford, with whom she edited "The Christian Repository" and "The Home Circle" since that date. Mrs. Ford is president of the Woman's missionary society of the south. She has published "Grace Truman" (New York, 1857); "Mary Brown"; "Morgan and his Men" (Mobile, Ala., and New York, 1894); and "Ernest Quest" (New York, 1877).

FORD, Seabury, governor of Ohio, b. in Cheshire, Conn., 15 Oct., 1801; d. in Burton, Ohio, 8 May, 1855. He removed to Burton when a boy, and attended the agricultural college at Yale in 1825 and practiced law in that town. He was in the Ohio legislature most of the time from 1830 till 1847, was presiding officer, at different times, of both its branches, and was also at one time major-general of militia. He was elected governor of the state in 1848, and served out the remainder of his term; during his term he had a paralytic shock, from the effects of which he died. He was an ardent friend of Henry Clay, and was instrumental in carrying the state of Ohio for him in 1844.

FORD, Thomas, governor of Illinois, d. in Peoria, Ill., in January, 1851. His parents emigrated to Illinois in 1804, when he was a child, and he became a successful lawyer there, and was active in politics almost from the organization of the state. He was judge of the state supreme court, and governor in 1822-3. He published a "History of Illinois" from 1818 to 1847. (Chicago, 1854).

FORD, Timothy, lawyer, b. in Morristown, N. J., 4 Dec., 1762; d. 7 Dec., 1830. His family residence was used by Washington as his headquarters in 1777. In 1780 he volunteered in a company of Washington's troops, and was wounded in a brief action at Springfield, N. J. He was graduated at Princeton in 1783, studied law in New York, and then removed to South Carolina, where he became eminent, practising for many years only in the Equity court. He was a member of the Board of Trustees of Charleston, president of various literary societies, and a founder of the Charleston Bible society. —His brother, Gabriel Hogarth, jurist, b. in Morristown, N. J., 3 Jan., 1765; d. there, 27 Aug., 1840, was graduated at Princeton in 1784, studied law of several years in his province to Ford, and took from him a lease for three years. Penn afterward paid him £17,000, but Ford claimed that £10,500 more were due him, and his son and widow arrested Penn in January, 1708. To avoid the execution, Penn put himself within the walls of Finsbury Field, and the Political Junto unsuccessfully petitioned the queen to put them in possession of Pennsylvania, at the same time offering to sell it to Isaac Norris for £8,000. Penn afterward lost his case in the court of chancery.

FORESTI, Eleonora Felice, Italian patriot, b. in Conselvina, Province of Genoa, Italy, in 1758; d. in Genoa, Italy, 14 Sept., 1858. He was graduated at the University of Bologna, studied law, and en-
foretired on the practice of his profession in Ferrara. In 1816 he was made prêtre of Crespino, and soon entered prominently into political affairs. In 1816 he was made prêtre in Spilimbergo, and in the same year arrested and imprisoned. After two years in a dungeon, and an unsuccessful attempt to take his own life, he was condemned to die on the public square of Venice; but, when, with others, he was taken out for execution, the sentence was changed to perpetual exile in Spilimbergo for twenty years. From the scaffold he and his companions were transferred to the island of St. Michael. On the death of the reigning emperor, Forestier and others were liberated, but condemned to perpetual exile in the United States, whither they were shortly sent. Soon after his arrival in New York, Forestier became professor of Italian in Columbia, and was a popular teacher for more than twenty years. In 1858 he received the appointment of U. S. consul at Genoa. The degree of LL. D. was conferred on him. He wrote "Ten Years in the Dungeons of Austria," the "Watchman and Crusader" in 1856, and also published "Chrestomazia Italiana" (1846) and edited an edition of Olendorff's Italian grammar (New York, 1846).

FORESTIER, Henri Joseph, French painter, b. in Besançon, Sambre-Domino, in 1737; d. in Petit-Bourg, Guadeloupe, 23 Dec., 1874. His father, a rich planter of the Spanish part of Santo Domingo, sent him to Paris in 1809 to study art. After studying under David, in 1810-12, he went to the school of the Beaux arts, where he took the second prize in 1812. For his picture "The Death of Jacob" he was awarded the second medal at the Paris salon (1837); "Funérailles de Guillaume le conquérant" (1841); "Paysages de Saint-Domingue" (1854); "Coucher de soleil sous les tropiques" (1855); "Le bon samaritain," ordered direct and "Dame vierge à la croce," in the cathedral of Fort de France, Martinique. His "Jesus Christ guerissant une possédée" (1827) was purchased by the French government for the national museum in the palace of the Luxembourg, and gained for the artist the cross of the Legion of Honor. Forestier published a "Histoire de la Guadeloupe," continued by A. Lacour, counsellor of the imperial court of Basse Terre (2 vols., Basse Terre, 1851).

FOREY, Elie Frederic, French soldier, b. in Paris, 10 Jan., 1814; d. there, 20 June, 1872. He studied at a military school in Paris, and in 1822 entered the military school of Saint Cyr. He left it in 1830 and served as sub-lieutenant in the 2d light dragoons, of which he was drill-master. After distinguishing himself in Algeria he returned to France for his health, in 1844, with the rank of colonel. He was made a general in 1848, formed with his command part of the garrison of Paris, and was one of the generals who, at the coup d'état of 2 Dec. 1851, helped place Napoleon III. on the throne. On 22 Dec., 1852, he was made mayor and grand officer of the Legion of Honor. In 1854 he commanded the reserves of the army of the east, and was for a time commander-in-chief of the whole French army before Sebastopol. He fought through the campaign in Italy in 1859, and on 16 Aug. was made prince of the empire, and decorated with the grand cross of the Legion of Honor. When Napoleon resolved to send out his expedition to Mexico, Forey was made general-in-chief of the invading army, 31 Oct., 1861. From the first he was opposed to the expedition, his good sense leading him to foresee its probable disastrous; but Louis Napoleon intimated to him that only by accepting the command could he obtain the staff of a marshal of France. He landed at Vera Cruz in January, 1863, with 30,000 men admirably equipped. On 29 Jan. he issued a proclamation, saying that he had only come to restore order, that life and property should be respected, and that the Mexicans should be free to choose the form of government that best suited them. This proclamation had a favorable effect. The government of the United States approved highly of it, but Napoleon was greatly exasperated. He wrote with his own hand to Gen. Forey, remanding him severely, and threatening him with an immediate recall if his future acts should be in accordance with his promises. Forey, on receipt of this message, immediately assailed a Mexican cause, and confiscated the property of all Mexicans who would not aid him. After the surrender of Puebla by the Republicans, 17 May, 1863, Forey marched on Mexico, which was taken by Gen. Bazaine, 15 July, 1863. After the fall of Puebla, Gen. Forey, b. for the task, demanded to be recalled, and his request was granted. On 2 July he formed a provisory government, composed of three Mexicans, Almonte, the archbishop of Mexico, and Gen. Salas. On 1 Oct. he delivered the command of the army to Gen. Bazaine, and shat from Vera Cruz for France. He was made marshal and commander of the 2d division of the army, 24 Dec., 1863. On various occasions he spoke long and eloquently in the senate in behalf of the Mexicans, and in the session of 10 Feb., 1866, boldly declared that to subjugate Mexico it would be necessary to form an army of 150,000 men, and if that could not be done the whole project would have to be abandoned. Napoleon chose the latter alternative.

FORMAN, David, soldier, b. near Englishtown, N. J.; d. there, 1879. He commanded the Jersey militia at Germantown, and was known by the nickname of "Black David" among the Jersey loyalists, owing to his excessive cruelty toward those who did not favor the Revolution. After the war he was a judge of the county court, and a member of the council of state. He was also one of the original members of the order of Cincinnati.

FORMES, Charles John, singer, b. in Mülheim, Germany, 7 Aug., 1810. He is popularly known as Karl Formes. He received his early musical education in Cologne and Vienna, and sang in church choirs in 1834. He attracted attention in Cologne as a concert singer. His appearance in opera soon followed, and in 1843 he became a member of the Mannheim theatre. In 1844 he became a member of the German opera-at-London, where, in 1849, he first performed at Drury Lane. In 1850 Formes became a member of the Italian opera at Covent Garden, and in the same year sang at the Philharmonic concerts. At this time it was the opinion of critics that for volume, compass, and sonor-
ous quality, Forne's deep bass was altogether unequalled. In "Robert le Diable," "Don Giovanni," and the "Huguenots," he dwarfed all competition. His stately presence and intuitively fine disposition had been inculcated in him by the tragedy, and led to the completeness of his representations. Nor was he less imposing in rendering the dramatic songs of Robert Franz, Schubert, and other German composers, and in the oratorios of Hänsel, Haydn, and Mendelssohn. In 1857 he came to the United States, where at first his name was not so famous as his predecessor's "Robert le Diable," at the Academy of Music in New York city. He subsequently sang with much success in the principal cities of the Union. After a time his representations suffered from carelessness, and his business affairs seemed to lack proper management; his voice also was impaired by frequent hoarseness and habitual flatness of intonation. These conditions lost him pre-eminence, and his last years in New York city were spent as a teacher of vocal music. Of late years Forney has resided chiefly in this country, and is now (1887) an inhabitant of the far west.

FORNÁRIS, José (for-nah-rem), Cuban poet, b. in Bayamo, Cuba, in 1826. He studied at the University of Havana, was admitted to the bar in 1833, settled in that city, and devoted himself to literature as an amateur. Of poetry his "Flora y Lágrimas" was published in 1851; a second volume (1857) made him popular throughout the island. A third, under the title of "Flores y Lágrimas," was published in 1862, and shortly afterward his "Cantos del Siboney," in which the habits and traditions of the aboriginal inhabitants of Cuba are described, "La Hijia del Pueblo," a drama (1865), and "Amor y Sacrificio," a drama (1866), were his next productions. In 1871 Fornaris travelled in Europe, and in 1878 published in Paris "El Arpa del Pueblo" and later another volume of poems under the title of "Cantos tropicales." He returned to Havana in 1881, where he still lives (1887).

FORNEY, John Weiss, journalist, b. in Lancaster, Pa., on 90 Sept., 1817; d. in Philadelphia, 9 Dec. 1881. He began life as a shop-boy in a village store, was sent to school, gained up the work and at the age of sixteen entered the printing-office of the Lancaster, Pa., "Journal." In his twentieth year he purchased the Lancaster "Intelligencer," a strongly Democratic journal, and in 1840 he published the paper in whose office he had entered as apprentice seven years before, in connection with his previous purchase, under the name of the "Intelligencer and Journal." His journal attained a wide reputation, and in 1845 President Polk appointed him deputy surveyor of the port of Philadelphia. He then disposed of his paper, bought a half share in the "Pennsylvania," one of the most decided of the Democratic journals in the state, and conducted it editorially until 1851. In that year he was chosen clerk of the house of representatives and re-elected two years later, serving until 1855. During this term of office he continued to write for the "Pennsylvania," and edited the Washington "Union," the foremost Democratic paper at the capital. While clerk of the house of representatives it became Mr. Forney's duty to preside during the protracted struggle for the election of 1853 which culminated in the election of Nathaniel P. Banks, when, by his tact as presiding officer, he won the applause of all parties. In 1856 he returned to Pennsylvania and was chosen chairman of the Democratic state committee. In January, 1857, he was the Democratic candidate for U. S. senator, but was defeated by Simon Cameron. In August, 1857, he began the

publication of the "Press," an independent Democratic journal in Philadelphia. Having exhausted his fund in the political campaign, he purchased the type on credit, and the paper was printed for months in the office of the "Democratic". The Editor," and the "Press" ardently espoused the opinions of Stephen A. Douglas, and supported Buchanan's administration up to the adoption of the Lecompton constitution, and the effort to secure the admission of Kansas into the Union under it. Mr. Forney resolutely opposed the policy of a "bargain and purchase," a disruption of the friendly relations which had previously existed between the president and himself. Few men in the country contributed more than Mr. Forney to strengthen the Republican party, and to prepare it for the contest of 1860. In December, 1859, he was again elected clerk of the house of representatives, and soon afterward started in Washington the "Sunday Morning Chronicle," which was afterward, in October, 1863, converted into a daily. He was elected secretary of the U. S. senate in 1861, and for six years was one of the most influential supporters of the administration. On the death of Mr. Lincoln, Mr. Forney supported Andrew Johnson for a short time, but afterward became one of the foremost in the struggle which resulted in the president's impeachment. He sold the "Chronicle," and in 1868 was made collector of the port of Philadelphia. He held the office but one year, but during that time perfected the system of direct transportation of imports in bond without appraisement and examination at the port of original entry. When the Centennial exhibition was opened, he was one of its most active promoters, and went to Europe in its interests in 1875. On his return he sold his interest in the "Press," and in 1879 established "The Progress," a weekly paper, in Philadelphia. In 1880 he supported Winfield S. Hancock for the presidency. He was the author of "Letters from Europe" (Philadelphia, 1869); "What I Saw in Texas" (1872); "Anecdotes of Public Men" (2 vols., New York, 1878); "A Centennial Commissioner in Europe" (Philadelphia, 1878); "Forty Years of American Life" (1877); and "The New Nobility" (New York, 1883).

FORNEY, Peter, soldier, b. in Lincoln county, N. C., in April, 1756; d. there, 1 Feb., 1834. He was of Huguenot descent, and during the war of the Revolution served in the American army. He afterward engaged in the manufacture of iron, and was a member of the legislature of North Carolina in 1794-6, and of the state senate in 1801-2. He was elected to congress from North Carolina, and served from 24 May, 1815, till 3 March, 1815. He was a presidential elector on the Jefferson, Madison, Monroe, and Jackson tickets. His son, Daniel M., soldier, b. in Lincoln county, N. C., in May, 1784; d. in Lowndes county, Ala., in October, 1847. He was a major in the war of 1812, and was elected a representative in congress from North Carolina for two successive terms, serving from 4 Dec., 1815, till 4 Jan., 1817, when he resigned. He was appointed by President Monroe in 1829 a commissioner to treat with the Creek Indians, and was a member of the state senate of North Carolina in 1823-6. He removed to Alabama in 1834. His grandson, William Henry, soldier, b. in Lincoln county, Ala., in 1834, was graduated at the University of Alabama in 1844, and during the war with Mexico served as 1st lieutenant in the 1st Alabama volunteers. He afterward studied law, was admitted to the bar in 1848, and engaged in practice for twenty-five years. He was elected to the legislature in 1859, entered the Confederate army as captain in 1861, and rose
to the rank of brigadier-general. He surrendered with Lee at Appomattox in 1865, and in 1865–6 was a state senator. He was chosen to congress as a Democrat in 1874, and has served successive re-elections till the present time (1887).

FORRES, Juan de, clergyman, b. in Spain; d. in Nicaragua in 1580. He was named vicar-general of the province of Nicaragua, the monks of which were supposed to have relaxed from the austerity of their rules. He had full powers, in case he did not succeed in restoring the ancient discipline among them, to send them to Spain and confiscate their movable property for the benefit of the stricter Dominicans of Guatemala. The Dominicans of Nicaragua claimed that the climate did not permit the rigidity of observance of the rule, that they had rendered great services to the country, and that they were punctual in observing necessary rules. He did not reply to their protest, and, when the rigorous ordinances he issued were not observed, he emptied all the convents of their inhabitants, whom he sent back to Spain, and, taking possession of the valuables in them, returned to Guatemala. The father-general of the order was far from approving the severity with which Forres acted, and summoned him to Rome. The latter received no instructions and returned to Nicaragua in 1589. The Convent of San Juan in this manner, as much zeal in providing the Dominicans for the vacant convests as he had exhibited energy in turning the monks out of their homes before. After his death, however, in the following year, the Dominicans abandoned Nicaragua.

FORREST, Edwin, actor, b. in Philadelphia, 9 March, 1806; d. there, 12 Dec., 1872. He was descended from Scottish ancestry. His father died, leaving the support of the family to the mother, a German woman of humble birth but of fine mental endowments, who developed qualities of hardihood that were reproduced in her gifted son. Edwin was educated at the common schools in Philadelphia, and early evinced a taste for the theatre. Keen was at that time in the meridian of his fitful career; Conway, Cooper, and the elder Booth were playing under the management of Wood and Warren, both actors of great merit. Constant attendance at the performances of these artists fired Forrest's ambition and aroused his enthusiasm for the dramatic profession, to the deep grief of his pious mother. At an early age he had given permission to his parents by taking an humble part in a dramatic performance. Unable to withstand the attractions of the mysterious calling, he, in 1829, made his first regular appearance on the stage as Douglas in John Home's tragedy of that name. His success was immediate. His youth, his robust and manly physique, his clear, resonant voice, his fair and handsome face, won the great audience at once. He then began the professional career that was as severe in its hardships as it was brilliant in its results. The theatres of New York and Philadelphia were already crossed with trained and successful actors; Forrest therefore set out at once for the south and west. His tour through a rough country, with the inconveniences of long distances, the necessity of presenting his plays in rude hall, an insufficient support, and poor theatre, was not altogether crossed but the discipline of mind and body was felt in all his subsequent career. After a few years of this hard novitiate he emerged once more into the scenes where his later glories were to culminate. In November, 1836, he made his first metropolitan experiment as Othello at the old Bowery theatre, and gained an instant success. The management employed him at a salary far below his worth, and he was at once offered increased payment at another theatre; but he refused to break his word, and carried out the contract to his own detriment. This strict sense of honor was characteristic of him throughout his career. His New York success was repeated in every city he visited, and after a few years of profitable labor, during which he had encouraged native talent by liberal offers for its advancement, his ambition was spent for rest and travel and larger observation, and was received with much courtesy by actors and scholars. He returned to Philadelphia in 1881, and played there and in New York and elsewhere with triumphant success until September, 1836, when he sailed for England, this time professionally, and made his first appearance as Spartacus, in the tragedy of 'The Gladiator,' at Drury Lane theatre, London. The play proved unpopular, but his own role was a distinguished success. During a season of ten months he performed in that part of Macbeth, Othello, and King Lear. His social triumphs were as great as were his professional; he was entertained by Macready and Charles Kemble, and at the end of the season was complimented by a dinner at the Garrick club, presided over by Lord Byron. Forrest married Miss Catherine Norton Sinclair, daughter of John Sinclair, the popular singer. He returned to Philadelphia in November of the same year and began an engagement. His wife made a deep and ardent appeal, and it was argued that domestic happiness would be the fitting crown of his public career. But these predictions were disappointed. The marriage proved unhappy, and a divorce, followed by public scandal, ensued. He visited London a second time in 1845, accompanied by his wife, who was welcomed in the intellectual circles of English and Scotch society. He acted at the Princess's theatre in London. He met with great success in Virginibus and other parts, but when he attempted to personate Macbeth, a character unsuited to his physique and style of acting, the performance was hissed by the audience. Forrest attributed the hissing to the professional jealousy and machinations of Macready, although that artist had been kind and helpful to him when he first came before London audiences. A few weeks later, when Macready was playing Hamlet in Edinburgh, Forrest stood in the dress circle, looked toward the box and hissed the English actor. This act of spiteful resentment evoked contemptuous reproaches from the British press and destroyed the respect in which he had been held by the public. An acrimonious letter that appeared in the 'Times' was resented, instead of justifying, his offense. A portion of the American public believed that national jealousy and professional intrigue had in-
FORREST

forfeited the success of their favorite tragedian in England. In May, 1849, when Macready was about to depart for the United States, the company was threatened with a mutiny, and the house was closed, but the manager, Mr. Forrest, succeeded in quieting the disturbance. The Astor place riot ensued, which resulted in the death of twenty-two men and the wounding of thirty-six others. In the succeeding year Mrs. Forrest brought her suit for divorce, which was succeeded by a suit for alimony, and a trial occupied the courts for two years, and was finally decided in favor of the wife on all points and a decree for the payment of $8,000 alimony per annum. In this trial Charles O'Conor, the counsel for the defendant, won a national reputation by the manner in which he defended the greater part of the case, and secured for the lady an honorable verdict and a liberal alimony. Forrest left the court-room defeated and calumniated, but was lionized by the masses. On his appearance during the last period of the lawsuit at the Astor theatre as Damon in "Damon and Pythias," he was hailed with cheers and the applause of his followers followed. The success of sixty nights exceeded anything ever known in the history of the theatre. But the wealth that poured in upon him and the applause of his followers did not soften a temper soured by domestic scenes. He met with a severe misfortune when his plan of a new house in the Astor place riot had added to his notoriety, while they weakened his fame, and still further embittered his temper. In 1833 he played Macbeth, with a strong cast and fine scenery, at the Astor theatre for four weeks—an unprecedented run at that date—and at the end of this engagement he retired from the stage for several years. He became interested in politics, being spoken of as a candidate for congress, and did not return to professional life until 1840, when he appeared at Niblo's Garden, New York, as Hamlet, and played the part with distinction. His character of "Hamlet," and the "Horrid Ban," the purpose of the testator. Edwin Forrest was what his own inherent nature and the bias of his life made him. He was turbulent, colossal, and aggressive, but allied to humanity by a great tenderness of soul. His greatest parts were Lear, Othello, and Coriolanus. The characters of Teal and Virginius were also suited to his powers. A favorite part with himself was Aylmire in "Jack Cade," a tragedy written for him by Judge Robert T. Conrad, which he first played in New York soon after his marriage. The Roman died with him. With him properly begins the royal line of American dramatic monarchs. A "Life of Edwin Forrest" was published by J. Rees (Philadelphia, 1874), and one by William R. Alger (1876). See also his biography, by Lawrence Barrett, in "The American Actor Series" (Boston, 1888).

FORREST, French, naval officer, b. in Maryland in 1706; d. in Georgetown, D. C., 22 Dec., 1866. He became a midshipman, 9 June, 1811, and fought bravely in the war of 1812, distinguishing himself under Com. Perry in the battles on Lake Erie, and in the action between the "Hornet" and the "Peacock" on 24 Feb., 1813. He was advanced to a lieutenancy, 5 March, 1817, made commander, 9 Feb., 1837, and captain, 30 March, 1844. During the war with Mexico he was adjutant-general of the land and naval forces, and superintended the transportation of troops into the interior of that country. At the beginning of the civil war, when Virginia seceded, he joined the Confederates, and was given the command of the navy. He took charge at Norfolk navy-yard, and afterward was appointed to the command of the James river squadron. He then became acting assistant secretary of the navy.

FORREST, Nathan Bedford, soldier, b. in Bedford county, Tenn., 13 July, 1821; d. in Memphis, Tenn., 29 Oct., 1877. While yet quite young he removed with his family to Mississippi, where his father died in 1825, leaving Nathan mainly responsible for the support of the household. In 1842 he removed to Hernando, Miss., and established himself as a planter, remaining there till about 1852, when he went to Memphis, and became a real estate broker and dealer in slaves. When the civil war broke out he had amassed a considerable fortune. In June, 1861, he joined the Tennessee mounted rifles, and in July
following he raised and equipped, at the request of Gov. Harris, a regiment of cavalry, and was made lieutenant-colonel. In October he moved with his men to Fort Donelson, where he remained until the approach of Gen. Grant, and whence he was allowed to escape with his men before the flag of truce was sent. After a raiding excursion, during which he visited Nashville, Huntsville, and Iuka, he took part in the battle of Shiloh. He was assigned to the command of the cavalry at Chattanooga in the following June, participated in the attack on Murfreesboro on 10 July, 1862, and on 21 July was made brigadier-general. In September he was in command at Murfreesboro, and on 31 Dec. was engaged at Parker's Cross-Roads. He fought at Chickamauga on 19 and 20 Sept., 1863, and in November was transferred to northern Mississippi. In the following month he was made major-general and assigned to the command of Forrest's cavalry department. He was in command of the Confederate forces that attacked Fort Pillow in April, 1864, and, while negotiations for the surrender of the fort were in progress under a flag of truce, marched his troops into favorable positions that they could not have gained at any other time. As Gov. of Mississippi, he established the Red Cross and a garrison, consisting mainly of colored troops, were given no quarter. The excuse given by Forrest's men was that the flag of the fort had not been hauled down in token of surrender. During the operations of Hood and Thomas in Tennessee he proved a great source of annoyance to the Federal commanders, and in February, 1865, he was promoted to the rank of lieutenant-general. He was finally routed by Gen. James H Wilson on 2 April, 1867, and on 9 May he surrendered at Gainesville. After the war he was president of the Selma, Marion, and Memphis railroad, but resigned in 1874. He was a delegate from Tennessee to the New York Democratic national convention of 4 July, 1868. Some of Gen. Forrest's official documents are very amusing for their peculiar orthography and phraseology. In his dispatch announcing the fall of Fort Pillow, the original of which is still preserved, he wrote: "We hast'ed the fort at nine clock and scatered the niggers. The men is still a cillamun in the woods." Accounting for prisoners, he wrote: "Them as was cath with spoons and brestatep and sign on 'pep and the rest of the lot was payrol'd and told to git." See "Campaigns of N. B. Forrest," by T. Jordan and J. B. Pryor (New York, 1868).

FORREST, Uriah, soldier, b. in St. Mary's county, Md., in 1756; d. near Georgetown, D. C., in April, 1865. He attained the rank of colonel in the Maryland line during the Revolution, received a wound at the battle of Germantown, 4 Oct., 1777, from the effects of which he never recovered, and lost a leg at the Brandywine. He was a delegate to the Continental congress from 1786 till 1787, and from 1788 till 1795, when he resigned. He was then appointed general of militia, and was frequently a member of the Maryland legislature. From 1800 till 1805 he was clerk of the circuit court of the District of Columbia.

FORBES, Samuel, physician, b. in Berlin, Pa., 28 June, 1811; d. at N. Y. C., N. Y., 1854. He was educated at the University of Pennsylvania, and was ten years in the U. S. army as assistant surgeon and surgeon. He afterward practised his profession in New York city. He contributed many articles to medical journals, originated and conducted for two years the New Medical Review, and in 1844 received from Harvard the Boylston prize for an essay on vaccine. He is the author of "The Climate of the United States and Its Endemic Influences" (New York, 1842) and "Meteorology" (1843).

FORSHEY, Caleb Goldsmith, engineer, b. in Somerset county, Pa., 18 July, 1812; d. in Carlisle, La., 25 July, 1881. He was educated at Kenyon college, Ohio, and at the U. S. military academy, where he entered in 1883, but was not graduated. He was professor of mathematics and civil engineering at Jefferson college, Miss., in 1856–58, and was from that time till 1863 head of the engineering works in Mississippi, Louisiana, and Texas. He was in charge of the U.S. survey of the Mississippi delta in 1851–3, was chief engineer of the Galveston, Houston, and Henderson railway in 1853–5, and designed the bridge across the Galveston Bay. In 1861 he established the Texas military institute and conducted it till 1861, when, though opposed to secession, he entered the Confederate service as a lieutenant-colonel of engineers. He was employed on the James river and as chief engineer on the Vicksburg siege, and planned the defences of the Texas frontier and the operations for the recapture of Galveston and the Texas coast. Since the war he has been engaged in railroad construction in Texas, on the improvements at the mouth of the Mississippi, and during 1874–5 was in the U. S. engineering service in the Mississippi and Galveston bay. He was the first vice-president and one of the founders of the New Orleans academy of sciences, and has contributed largely to the scientific journals of the south and southwest. He assisted in the preparation of "The Physics of the Mississippi" by the National academy, and contributed largely to the scientific journals of the south and southwest. He assisted in the preparation of "The Physics of the Mississippi" by the National academy, and contributed largely to the scientific journals of the south and southwest. He assisted in the preparation of "The Physics of the Mississippi" by the National academy, and contributed largely to the scientific journals of the south and southwest. He assisted in the preparation of "The Physics of the Mississippi" by the National academy, and contributed largely to the scientific journals of the south and southwest.

FORSTER, Archibald McDonald, Canadian inventor, b. in Markham, Ont., 11 May, 1843. He was educated in the Markham and Uxbridge grammar-schools, and after leaving school went to work in his father's foundry and machine-shop. In 1866 he invented a preparation for cleaning saws for steam boilers, and in 1868 a self-oiling cup for machinery. In 1877 he established a brass foundry in Hamilton, in which, in addition to other articles, he manufactures several of his own inventions.

FORSTER, William, missionary, b. in Tottenham, England, in 1784; d. in Knox county, Tenn., in 1854. In 1803 he became a minister of the society of Friends, and thenceforth his life was devoted to missionary and benevolent labors throughout the British Isles, the continent of Europe, and the United States. He visited the latter country in 1820, again about 1840, and for the last time in 1853, when he had interviews with the president and several governors of southern states about the condition of the slaves. He was wealthy, noted for his benevolence, and was the intimate friend of Elizabeth Fry, Sir Rowland Buxton, and Joseph John Gurney. He was the father of the British statesman, William Edward Forster. He published "A Christian Exhortation to Sailors, etc." (London, 1856). See "Memoirs of William Forster" (London, 1865).
FORSYTH, Benjamin, soldier, b. in Stokes county, N. C., d. near Oldtown, N. Y., 28 June, 1814. He was an adjutant of the 9th North Carolina in April, 1861, and was appointed a lieutenant of infantry from North Carolina in April, 1860, and became a captain of riflemen in July of that year. He commanded in the successful assault on Gannanoque, Upper Canada, in September, 1812, and also at the capture of the British fort at Elizabethtown, Canada, in February, 1813. For the latter service he was brevetted lieutenant-colonel. He also distinguished himself at the capture of Fort George, 27 May, 1813, and at the attack on York on 27 April of the same year. He was killed in a battle at Middleburg, Va., 5 May, 1862. His son, James N., after his father's death, was adopted as a child of the state by the legislature of North Carolina, and provision was made for his education at the public expense. He entered the university in 1824 and was subsequently appointed a midshipman in the navy, and was on board the sloop "Hornet," which was lost at sea.

FORSYTH, James W., soldier, b. in Ohio about 1833. He was graduated at the U. S. military academy in 1856, and assigned to the infantry. He was appointed to the 30th U. S. infantry on 18 March, 1857, and to the 2d U. S. infantry on 24 May, 1861, was for two months assistant instructor to a brigade of Ohio volunteers, and on 24 Oct. was made captain. He was on Gen. McClellan's staff during the peninsular and Maryland campaigns, was brevetted major on 29 Sept., 1863, for gallantry at Chickahominy and was on 5 May, 1863, for aid to Gen. Sheridan in the Richmond and Shenandoah campaigns, and was brevetted brigadier-general of volunteers for gallantry at Opequon, Fisher's Hill, and Middleten, 19 Oct., 1864. He was assistant adjutant-general of volunteers and chief-of-staff to Gen. Sheridan. He took part in the Richmond and Shenandoah campaigns, and was on staff at Opequon, Fisher's Hill, and Middleten, 1865. He was brevetted brigadier-general of volunteers for gallantry at Gettysburg, 2 Sept., 1863. He was appointed chief-of-staff to Gen. Sheridan on 1867, and was brevetted major of the 5th Missouri in 1867. He was appointed a colonel of the 7th cavalry in 1868 and served in the Bannock campaign of 1878. In 1886 he became colonel of the 7th cavalry. He was appointed to the frontier duty, taking part in the command of the river in 1877. (Washington, 1879.)

FORSYTH, John, statesman, b. in Frederick county, Va., 22 Oct., 1780; d. in Washington, D. C., 21 Oct., 1841. His father was an Englishman, and fought in the American army in the Revolution. John removed to Georgia with his family when he was four years old. He was graduated at Princeton in 1794, studied law, and was admitted to the bar at Augusta, Ga., in 1802. He was elected attorney-general in 1806, and was afterward chosen to congress as a Democrat, serving from 1816 till 1818, when he became U. S. senator. He resigned in 1819, having been appointed minister to Spain, and conducted the negotiations which resulted in the cession of Florida to the United States. He served in congress again from 1825 till 1827, when he was elected governor of Georgia, and in 1829 joined the Whigs. He was an opponent of J. M. Berrien, who had resigned. He opposed nullification, voted for Henry Clay's compromise act of 1833, and supported Jackson in the debate regarding the removal of deposits from the U. S. bank. He was a delegate to the 1849 tariff convention at Milledgeville, Ga., in 1842, but withdrew on the ground that it did not fairly represent the people of Georgia. He resigned his senatorship on 27 June, 1834, to become secretary of state under President Jackson, and continued to serve under Van Buren till 2 March, 1841. His son, John, editor, b. in Georgia in 1813; d. in Mobile, Ala., 2 May, 1879, was for many years one of the foremost Democratic editors of the south. In 1856 he was appointed minister to Mexico, but in 1858 demanded his passports, and withdrew from the legation. In 1859 he was editor of the Southern Crusader of Georgia, he represented the Confederate states as commissioner to the National government, but his request for an unofficial interview with Sec. Seward was declined. He removed to Mobile after the civil war and engaged in journalistic work until his death.

FORSYTH, John, clergyman, b. in Newburg, N. Y., in 1811; d. there, 17 Oct., 1886. He was graduated at Rutgers in 1828, studied theology at the University of Edinburgh, under the Rev. Thomas Chalmers, and in Glasgow, under Dr. Thomas Dick, and was licensed to preach in April, 1833, by the presbytery of Aberdeen, Scotland. He then returned to the United States and was ordained in 1834 by the presbytery of New York. He held pastorates in Philadelphia in 1834–5, and in 1836–7 held the chair of the English language and literature in Rutgers. He was for some time the chair of biblical literature in the theological seminary of the Reformed church at that place. He was professor of Latin at Princeton from 1847 till 1853, again professor at Newburg in 1853–5, and in 1860–3 held the chair of English language and literature in Rutgers. He was professor at the Newburg Seminary from 1863 till 1871, and served there till 1881, when he was retired with the pay of colonel. He was for many years president of the Board of education of Newburg, and is the author of numerous sermons, an American edition of Dick's "Theology," with a life of the author (2 vols., New York, 1836); "History of the Public Schools of Newburg" (Newburg, 1865); "Lives of the Early Governors of New York," published in the Newburg "Daily Union" in 1863; and a translation and enlargement of Moll's "Exposition of the Psalms" (in Lang's "Commentary," 1871). He also contributed largely to current literature.

FORT, George Franklin, governor of New Jersey, b. in Morgan county, Ga., 18 Aug., 1809; d. in New Egypt, Ocean co., N. J., 22 April, 1872. He was educated in his native county, and was graduated in medicine at the University of Pennsylvania in 1830. He became a successful practitioner, and, while actively engaged, was elected to the assembly from Monmouth county. In 1844 he was a member of the State constitutional convention, and was subsequently elected to the state senate. In 1850 he was elected governor of New Jersey, serving two terms, till 1854, and was afterward a judge of the court of errors and appeals. He held other public offices, and was an active member of the prison reform committee. Princeton gave him the honorary degree of A. M. in 1847. He was the author of "Early History and Antiquities of Freemasonry." (Philadelphia, 1875.)

FORT, Greenberry Lafette, soldier and politician, b. in North Carolina, in 1820; d. in Lacon, Ill., 18 Jan., 1888. In May, 1834, his parents left Ohio and settled in Marshall county, Ill., where he was brought up on a farm and attended school. He then studied law, was admitted to the bar and began practice in Lacon, where he was elected sheriff in 1850, was clerk of the circuit court in 1852, and county judge in 1857–61. In his first case Abraham Lincoln was
the opposing counsel, and David Davis the presiding judge. On the first call for troops in 1861, he volunteered and served in the National army, and was elected to the army of the Tennessee on both field and staff duty through all its campaigns, and was chief quarter-master of the 13th army corps on the march from Atlanta to the sea, and until the final surrender of Johnston's army. He was afterward ordered with Sherman's forces to Texas, where he was mustered out as colonel and brevet brigadier-general of volunteers at Galveston in 1866. He was elected to the state senate of Illinois in that year, and was afterward chosen to congress as a Republican, serving from 1873 till 1875.

FORT, Tomlinson, physician, b. in Warren county, Ga., 11 July, 1878; d. in Milledgeville, Ga., 11 May, 1899. His father was a soldier of the Revolution. Tomlinson was graduated in medicine at the University of Pennsylvania in 1810, and practised in Millen, Ga., where he acquired distinction as a physician. He commanded a company in the Indian campaign in Florida in 1812, and was wounded in the knee. He was for several years a member of the state house of representatives, and served in congress from 1827 till 1828. He was elected to congress on a ticket. He then resumed practice, was chosen president of the state bank of Georgia in 1822, and held the office till his death. He published a work on "The Practice of Medicine" (Milledgeville).

FORTIN, Pierre, Canadian statesman, b. in Quebec, 28 Dec., 1823. He was educated at Montreal seminary and at McGill college, where he was graduated in medicine in 1845. He served as a surgeon at Grosse Isle during the prevalence of the fever in 1847-8. In 1849 he aided as a special mounted constabulary force for quelling disturbances in Montreal and its vicinity, and commanded a troop of this force. In 1852 he was appointed stipendiary magistrate for the lower river and Gulf of St. Lawrence, and organized the service for the protection of the sea and river fisheries in that district. He was engaged in this service from 1852 till 1867, when he resigned, and had under his command the armed steamer "Doris" and the armed schooner "La Canadienne," in which latter vessel he was wrecked in November, 1861. In 1853 he was instructed by the government to officially inspect the French colonies of St. Pierre Miquelon and Long-lake, and that portion of the seaboard of Newfoundland known as the French coast, and to report the conditions under which the French fisheries and fish trade were carried on. In 1859 he established on all the coasts and in the rivers of the province of Quebec a system of licenses for salmon fishing, and in 1862 he began a series of descriptions from nature of the marine animals, fishes, molluscs, and crustacea of the lower river and the Gulf of St. Lawrence, which were printed in some of his annual reports to the government. He was a member of the executive council and commissioner of crown lands for the province of Quebec in 1873-4, and was elected speaker of the legislative assembly in November, 1875, but resigned in 1877. He was speaker for five years before he founded the marine library of the province of Quebec, and was also one of the founders of the Geographical society of Quebec and its first president. He represented Gaspe in the Canadian parliament from 1867 until the general election of 1874, when he retired in order to continue himself exclusively to the legislative assembly, in which he sat from 1874 until 1881. He was re-elected to the Dominion parliament in 1878 and 1882. He is a Conservative.

PORTIQUE, Mariano Fernandez (for-te'ka), Venezuelan bishop, b. in Caracas, Venezuela, in 1790; d. there, 5 Jan., 1847. He studied at the seminary of Santa Rosa and the University of Venezuela. He spoke and wrote Latin with remarkable correctness, as well as French and other modern languages. In 1815 he was ordained a presbyter, and in 1816 was appointed rector of the parish of San Pablo. He also studied naval medicine. In the same year he was elected to the national legislature. In 1842 he was consecrated bishop of Guayaquil. A few times during his life he was senator, president of congress, and state counsellor. He secured the endowment of the much-needed Seminary of Caracas. His few literary productions reveal vast learning and a noble character.

FORTOUL, Pedro (for-tool), Colombian soldier, b. in Rosario de Cucuta, Colombia, in May, 1780; d. there, 5 Jan., 1837. He was of French descent, entered the Cucuta militia as a lieutenant in August, 1810, and by successive promotions attained the grade of general of division, 30 Oct., 1829. He was with the forces that operated in the north of New Granada in 1812, and his bravery won him distinction. He took part in the following battles with the Americans: Larga, 1811; Cali, 1813; Barranquilla, 1814; Cache, 1815; Yagual and Apure, 1816; Barinas, 1818; Pantano de Vargas and four others in 1819. In that year he was the leader of the campaign in the north, and in 1822 and 1824 commander-in-chief of the campaign in Cucuta. At the close of this campaign he became governor of the province of Boyaca, and held the office for five years. Gen. Fortoul suffered great hardships during his campaigns. After the battle of San Antonio de Apure in 1816, he emigrated to Spain, accompanied by his wife and children and others equally unfortunate. Many died of hunger and fatigue, and the survivors saved themselves by eating human flesh. Fortoul was reduced to extreme poverty by the destruction of his property during the war.
resigned in 1851, to accept the office of president-judge of the district court of Alleghany county, Pa., to which he was elected in 1853, but did not serve in that office with marked ability and success till the general conference of May, 1880, when he was elected and ordained a bishop. His residence has since been at Minneapolis, Minn., but his episcopal duties have called him to travel through all parts of the country and also to visit the foreign missions of his church in Europe and in India. Bishop Foss is recognized as a man of superior abilities, an able preacher, and an earnest and devout Christian. He was a member of the general conference in 1873, 1876, and 1880. He received the degrees D. D. and D. D. in the University of Pennsylvania in 1870, and that of LL. D. from Cornell college, Ithaca, in 1879. He has contributed to current literature, and has published sermons and addresses, including "Songs in the Night," a Thanksgiving sermon, (New York, 1882), and his inaugural address as president of Wesleyan university (1878). His brother, William Jay, clergyman, b. in Verbank, N. Y., 28 Nov., 1855; d. in Poughkeepsie, N. Y., 1 June, 1859, was graduated at Wesleyan university in 1856, and was a teacher in Amenia seminary, N. Y., in the same year. During the year 1856 he was superintendent of the Methodist Episcopal church in Portland, Conn., and a tutor in Wesleyan university. In 1858 he joined the New York conference, and was stationed at Lake Mohopac, N. Y., in 1859, and later in Poughkeepsie, that state.

FOSDICK, William Whiteman, poet, b. in Cincinnati, 28 Jan., 1825; d. there, 8 March, 1863. His mother, Julia Drake, was an artist. He was graduated at Transylvania university in 1845, studied law in Louisville, and began practice in Covington, Ky., and afterward in Cincinnati. About this time Mr. Fosdick gained some distinction as a poet by a drama entitled "The Star of the West," and a number of other pieces. In 1850 he was elected a representative in the state legislature, and published "An Historical and Descriptive Narrative of the Mammoth Cave of Kentucky" (Philadelphia, 1850; 4th ed., enlarged, 1875).

FOSS, Cyrus David, M. E., bishop, b. in Kingston, N. Y., 17 Jan., 1834. His father was an itinerant Methodist preacher of Huguenot extraction. The son was graduated at Wesleyan university in 1854, and for three years he was employed as an instructor in the Amenia seminary, N. Y., the latter part of that time as its principal. He entered the travelling ministry in 1859, and remained in the New York conference in the spring of 1857, and was stationed at Chester, Orange co., N. Y., in 1857-8. He transferred to New York east conference, and was for the next six years in the city of Brooklyn, and afterward in several churches in New York city, from 1865 till 1875. In the latter year he was elected president of Wesleyan university, and served in that office with marked ability and success till the general conference of May, 1880, when he was elected and ordained a bishop. His residence has since been at Minneapolis, Minn., but his episcopal duties have called him to travel through all parts of the country and also to visit the foreign missions of his church in Europe and in India. Bishop Foss is recognized as a man of superior abilities, an able preacher, and an earnest and devout Christian. He was a member of the general conference in 1873, 1876, and 1880. He received the degrees D. D. and D. D. in the University of Pennsylvania in 1870, and that of LL. D. from Cornell college, Ithaca, in 1879. He has contributed to current literature, and has published sermons and addresses, including "Songs in the Night," a Thanksgiving sermon, (New York, 1882), and his inaugural address as president of Wesleyan university (1878). His brother, William Jay, clergyman, b. in Verbank, N. Y., 28 Nov., 1855; d. in Poughkeepsie, N. Y., 1 June, 1859, was graduated at Wesleyan university in 1856, and was a teacher in Amenia seminary, N. Y., in the same year. During the year 1856 he was superintendent of the Methodist Episcopal church in Portland, Conn., and a tutor in Wesleyan university. In 1858 he joined the New York conference, and was stationed at Lake Mohopac, N. Y., in 1859, and later in Poughkeepsie, that state.

FOSTER, Isaac Belknap, Canadian senator, b. in Dumferton, Lanark county, Scotland, 16 Jan., 1817; d. in New York, 2 Nov., 1877. He was educated in Lower Canada, to which he removed in 1831, and settled in Frost Village. In 1841 he engaged in railroad construction in Massachusetts, Maine, and Vermont, and on his return to Canada in 1856 engaged in the same business there. He was elected a member to the Canada assembly from Sheffield county, Lower Canada, in 1858, but resigned in 1860, and was returned to the legislative council for Bedford district. After the confederation he was called to the senate of the Dominion, but retired from it in 1875, when he received the contract for the Georgian Bay branch of the Canadian Pacific railway.

FOSTER, Benjamin, clergyman, b. in Danvers, Mass., 12 June, 1759; d. in New York city, 26 Aug., 1798. He was graduated at Yale in 1774, and ordained as a Baptist minister in Lexington, Mass., in October, remaining there till 1792. He subsequently held pastorates in Danvers and Newport, and from 1788 till his death was pastor of the 1st Baptist church in New York city. He was an accomplished scholar, particularly in the Greek, Hebrew, and the Chinese languages, and was eminent as a preacher. During the prevalence of yellow fever in 1798 he was appointed to investigate the sick
was exposed to the pestilence, and died, after an illness of a few days, one month after his wife's death by the same malady. Brown gave him the degree of D. D. in 1792. He was the author of "The Divine Right of Immersion"; "Prudential Baptism Defined," and "A Dissertation on the Thirty Wonders of Daniel" (New York, 1768).

FOSTER, James Charles, journalist, b. in Bicester, England, 24 Nov., 1820; d. in Astoria, N. Y., 12 Sept., 1888. He came to the United States in 1847, resided in Boston for some years, then settled in Cincinnati, Ohio, and finally settled in New York city. He edited Woodruff's "Trotting Horse of America" in 1868, and again in 1875, also Bagardus's "Field, Cover, and Trap Shooting" in 1874. He wrote for "The Spirit of the Times," and in 1870 established the "New York Sportsman." He was considered to be the best-informed man in the country on the subject of racing. He was the author of the sketch of J. H. Hackett in his "Notes upon Shakespeare's Plays and Actors" (New York, 1883).

FOSTER, Ellen Horton, temperance advocate, b. in Norwich, Conn., 3 Nov., 1808, daughter of Jotham Horton, educated at Lima, N. Y., removed to Clinton, Iowa, and in 1869 married E. C. Foster. She studied law, and was admitted to practice in 1874, and argued a case in the supreme court in 1875. Since 1875 she has been a successful lawyer at Clinton. She has lectured in almost every state and territory of the Union, and has also been counsel for the Women's Christian temperance union of the United States. She is the author of various pamphlets and magazines on the subject of temperance.

FOSTER, Ephraim H., senator, b. about 1798; d. in Nashville, Tenn., 4 Sept., 1854. He studied law, and was admitted to the bar, and practised in Nashville. In 1829 he was speaker of the Tennessee house of representatives. He was elected to the U. S. senate in 1837 as a Whig, but resigned in 1839 because he would not obey the instructions of the legislature. In 1843 he was re-elected. On his return to Nashville in 1845 he was the Whig candidate for governor, but was defeated.

FOSTER, George Ennis, Canadian statesman, b. in Upper Canada, 4 Sept., 1847. He graduated at the University of New Brunswick in June, 1868, and in 1872-3 studied at the universities of Edinburgh and Heidelberg. He then taught school for several years, was principal of the Ladies' high school, Fredericton, New Brunswick, and held the professorship of classics and history in the University of New Brunswick from 1872 till January, 1879, when he resigned. He has been a leader in temperance agitation both in Canada and the United States, and is president of the international temperance association. He was elected to the Dominion parliament in 1879, resigned, and was re-elected in 1882, and in December, 1883, became minister of marine and fisheries. He is a Liberal-Conservative, and favors a civil-service system conforming, as far as possible, to that of England. He is the author of the "Prohibitionist's Hand-Book" (1880), and has also published various speeches.

FOSTER, Hannah, author, b. in 1759; d. in Montreal, Canada, in 1840. She was a daughter of Grant Webster, of Boston, and married John Foster, a minister in Brighton, Mass., from 1784 till 1827. Mrs. Foster published "The Coquet, or the History of Eliza Wharton," founded on fact (2d ed., with a preface by Mrs. Jane E. Locke, 1853); "The Boarding-School" (1796); and "Lessons of a Preceptress" (1789).
FOSTER, Henry Allen, senator, b. in Hartford, Conn., 7 May, 1800. He removed to Cazenovia, N. Y., in early life, and, after receiving a common education, was admitted as a law officer to practice by David B. Johnson, and was admitted to the bar in 1822. He was a member of the state senate from 1831 till 1834, and again from 1841 till 1844. He was a representative in congress from 1837 till 1839, having been elected as a Democrat, and in 1839 re-elected to the seat vacated by the elevation of Silas Wright, Jr., serving till 1847. From 1863 till 1869 he held the office of judge of the fifth district of the supreme court. He has resided for many years in Rome, N. Y.

FOSTER, Isaac, physician, b. in Charlestown, Mass., about 1740; d. in February, 1781. He was graduated at Harvard in 1758, studied medicine in this country and abroad, and settled in Charlestown, where he practised for several years. He was a delegate to the convention of the county of Middlesex in August, 1774, and to the first provincial congress of Massachusetts in October of that year. Dr. Foster was appointed a surgeon in 1775, and was for some months at the head of the military medical department, while Gen. Ward commanded at Cambridge, and before the arrival of the sick lists at the day after the battle of Concord, by urgent request of Gen. Ward and Dr. Warren, he attended the men who had been wounded, and gave up his private practice, which was very large. On 18 June, the day after the battle of Bunker Hill, he was appointed by the committee of safety to attend those who had been wounded there, and was afterward given the post of surgeon of the state hospital, then just opened. In October he was appointed by Gen. Washington director-general pro tempore of the American hospital department. Congress shortly afterward appointed Dr. Morgan to that place, but Dr. Foster was still the oldest surgeon in the hospital. Again, in 1777, Gen. Washington appointed him to take charge of the hospitals in the eastern department. He retired from public life in 1780, bought a farm, and, although only twenty-two years of age, was at once chosen to fill the former's place in the constitutional convention. He was made justice of the peace for the county of Worcester in 1781, and in 1782 was made a special justice of the court of common pleas for the county of Worcester in 1817, and in 1818 appointed to the Massachusetts executive council. Judge Foster also held other offices of public trust, but his last years were spent in retirement. Harvard conferred on him the degree of A. M. in 1784.

FOSTER, James P., naval officer, b. in Bullitt county, Ky., 8 June, 1827; d. in Indianapolis, Ind., 2 June, 1860. He was a member of the family, in childhood, to Blooming, Ind., and entered the navy in 1846. He had reached the rank of lieutenant in 1861, and in July, 1862, was commissioned a lieutenant-commander, and in October of the same year was ordered to the Mississippi squadron, commanded by Admiral Porter. He was placed in command of the “Neosho,” from which he was soon transferred to the iron-clad ram “Chillicothe,” and in March, 1868, distinguished himself by the valuable service performed by his vessel during the Yazoo expedition. Later in the year he was placed on the committee of safety to attend those who had been wounded at Shiloh, and rendered valuable assistance during the bombardment and siege of Vicksburg. After the war he was ordered to the naval academy, and placed in charge of the training-ships. He was then promoted to the rank of commander, ordered to the “Osceola,” and joined the Brazilian squadron, where he contracted the disease from which he died.

FOSTER, Jedediah, jurist, b. in Andover, Mass., 10 Oct., 1728; d. in Brookfield, Mass., 17 Oct., 1779. He was graduated at Harvard in 1744, studied law in the office of James Bowdoin, was a member of the Worcester county convention in August, 1774, and a delegate to the provincial congress in the same year. At this time he was elected one of the executive council by the house of representatives, and with several others he was negatively defeated by Gov. Hutchinson. He was a member of the law office of David B. Johnson, and was admitted to the bar in 1822. He was a member of the state senate from 1831 till 1834, and again from 1841 till 1844. He was a representative in congress from 1837 till 1839, having been elected as a Democrat, and in 1839 re-elected to the seat vacated by the elevation of Silas Wright, Jr., serving till 1847. From 1863 till 1869 he held the office of judge of the fifth district of the supreme court. He has resided for many years in Rome, N. Y.

FOSTER, John Gray, soldier, b. in Whitefield, N. H., 27 May, 1829; d. in Nashua, N. H., 2 Sept., 1847. He was graduated at West Point in 1844, assigned to the engineer corps, and served in the Mexican war under Gen. Scott, being engaged at Vera Cruz, Cerro Gordo, Contreras, Churubusco, and Molino del Rey, where he was severely wounded, ordered to the “Osceola," and joined the Brazilian squadron, where he contracted the disease from which he died. He was assistant engineer in Maryland in 1848-52, and on coast-survey duty in Washington, D.C., in 1852-7, and after promotion to a 1st lieutenant acted as assistant professor of engineering at West Point in 1855-7. At the outbreak of the war he was stationed at Charleston, S. C. and safely removed the garrison of Fort Moultrie to Fort Sumter dur-
ing the night of 26-27 Dec., 1860. He was breved major for the distinguished part he took in this transfer, and was one of the defenders of the fort during its subsequent bombardment. He was made brigadier-general of volunteers, 23 Oct., 1861, commanded a brigade in Burnside’s North Carolina expedition, and received the brevet of lieutenant-general for his services at Roanoke Island. While in command of the Department of North Carolina, with the rank of major-general of volunteers, in 1862-3, he conducted several important expeditions. He had charge of the combined division of Georgia, South Carolina, and North Carolina from July till November, 1863, and afterward of the army and department of the Ohio, which he relinquished in December, 1864, on account of severe injuries from the fall of his horse. After the termination of his sick leave he commanded the Department of the South, cooperating efficiently with Generals Sherman, and preparing to assist in the reduction of Charleston under Sherman’s orders, when suffering caused by his old wound obliged him to transfer the command to Gen. Quincy A. Gillmore. In 1865 he was brevetted brigadier-general in the regular army in the gallant service of the capture of Savannah, Ga., and major-general for services in the field during the rebellion. He was in command of the Department of Florida in 1865–6, and on temporary duty in the engineer bureau of Washington in 1867. He afterward served as superintending engineer of various rivers and harbor improvements. His submarine engineering operations in Boston and Portsmouth harbors were conducted with great ability and were eminently successful. He contributed articles to periodical literature on engineering topics, and published “Submarine Blasting in Boston Harbor” (New York, 1890).

Foster, Jacob Post Girard, lawyer, b. in New York city, 8 April, 1827; d. there, 26 Feb., 1886. He was graduated with the first honors at Columbia in 1844, studied law in Harvard law-school, and was admitted to the bar in 1847. He practised in New York city, and gained a high reputation, especially as an insurance lawyer.

Foster, John Watson, diplomatist, b. in Pike county, Ind., 2 March, 1836. He was graduated at the Indiana state university in 1856, and, after a year at Harvard law-school, was admitted to the bar and began practice in Evansville. He entered the National service in 1861 as major of the 35th Indiana infantry. After the capture of Port Donelson he was promoted to lieutenant-colonel, and subsequently was made colonel of the 65th Indiana mounted infantry. Later he was appointed colonel of the 130th Indiana regiment. During his entire service he was connected with the western armies of Grant and Sherman. He was commander of the advance brigade of cavalry in Burnside’s expedition to East Tennessee, and was the first to occupy Knoxville in 1863. After the war he became editor of the Evansville “Daily Journal,” and in 1869 was appointed postmaster of that city. He was sent as U. S. minister to Mexico by President Grant in 1873, and reappointed President Harrison in 1877. In March of that year he was transferred to Russia, and held that mission until November, 1881, when he resigned to attend to private business. On his return to this country, Col. Foster established himself in practice in international cases in Washington, D. C., acting as counsel for foreign legislations before the courts of commissions, in arbitrations, etc. President Arthur appointed him minister to Spain, and he served from February, 1883, till March, 1885, when he resigned and returned to the United States, having negotiated an important commercial treaty with the Spanish government. This treaty elicited general discussion and was strongly opposed in the Senate. That body failed to confirm it, and it was afterward withdrawn by President Cleveland for reconsideration. Some weeks later Gen. Foster was instructed to return to Spain to reopen negotiations for a minister. His mission, however, was unsuccessful, and Mr. Foster remained abroad but a few months.

Foster, John Wells, geologist, b. in Brimfield, Mass., 4 March, 1815; d. in Chicago, Ill., 29 June, 1878. Portions of 1884, having completed the scientific course, and, removing to Zanesville, Ohio, was admitted to the bar in 1835. His scientific studies were continued in moments of leisure from his legal practice. In 1837 he became an assistant in the geological survey of Ohio, and made a very thorough report on the great central coal-bed of Ohio, with a detailed section of the carboniferous limestone near Columbus as far as the uppermost bed of coal near Wheeling. He was occupied with this work until 1844, when he returned to Massachusetts and followed the profession of an attorney, devoting himself to the study of metallurgy and geology. In 1845 he was sent to the Lake Superior region, in the interests of several mining companies, and examined the copper deposits then recently discovered. Two years later, with Josiah D. Whitney, he was appointed by the U. S. government to assist with the T. Jackson in a geological survey of the Lake Superior region, and in 1849 the completion of the work was intrusted to them. The results were published, by direction of congress, as a “Report on the Geology and Topography of the Lake Superior Land District in the State of Michigan: Part I, Copper Lands” (Washington, 1850), and Part II, “The Iron Region, together with the General Geology” (1852). These reports first clearly established the richness and variety of the mineral resources of the region, which remain an authority. Subsequently Mr. Foster returned to Massachusetts, and became one of the organizers of the “Native American” movement; but in 1855, as he differed with them on the slavery question, he withdrew with Henry Wilson, and was active in the formation of the Republican party. In 1855 he was a candidate for congress from the Springfield district, but was defeated by a small majority. Three years later he removed to Chicago, and for some time was land commissioner for the Illinois Central railway. He spent much time in studying the mounds and other evidences of ancient races in the Mississippi valley. Mr. Foster was a member of numerous scientific societies, and for some time president of the Chicago academy of sciences. In 1869 he was president of the American association for the advancement of science, and the subject of his presidential address was “Recent Advances in Geology.” He contributed papers to scientific journals, and published monographs on American ethnology and antiquities, and also “The Mississippi Valley, its Physical Topography, including Sketches of Geology, Botany, Climate, Geology, and Mineral Resources; and of the Progress of Development in Population and Material Wealth” (Chicago and London, 1869); “Mineral Wealth and Railroad Development” (New York, 1872); and “Prehistoric Races of the United Nations” (Chicago, 1878).

Foster, Lafayette Sabine, statesman, b. in Franklin, Conn., 22 Nov., 1806; d. in Norwich, Conn., 19 Sept., 1880. His father, Capt. Daniel, was an officer of the Revolution, who was descended
on his mother's side from Miles Standish, and served with distinction at the battles of White Plains, Stillwater, and Saratoga. The son earned the means for his education by working. He graduated with the first honors at Brown in 1828, studied law, and was admitted to the bar at Centreville, Md., while conducting an academy there in 1830. He returned to Connecticut, completed his legal studies in the office of Calvin Goddard, who had been his first preceptor. He was admitted to the Connecticut bar in November, 1831, and opened an office in Hampton in 1833, but in 1834 settled at Norwich. He took an active interest in politics from the outset of his professional life, was the editor of the Norwich "Republican," a Whig journal, in 1835, and in 1839 and 1840 was elected to the legislature. He was again elected in 1846 and the two succeeding years, and was chosen speaker. In 1851 he received the degree of LL. D. from Brown University. In 1851-2 he was mayor of Norwich. He was twice defeated as the Whig candidate for governor, and in 1854 was again sent to the assembly, chosen speaker, and elected to the House for Greene Co. On May 19, 1854, by the votes of the Whigs and Freesoilers. Though opposed by conviction to slavery, he resisted the effort by teaching the Free soil party until the passage of the Kansas-Nebraska bill. He delivered a notable speech in the senate on June 25, 1856, against the repeal of the Missouri compromise, and opposed the Lecompton constitution for Kansas in 1858. He was a member of the Republican party from its organization in 1856, and in 1860 was again elected to the senate. In December, 1860, he spoke in approval of the Powell resolution to inquire into the distracted state of the country, though he was one of the few who at that time believed that the Southern states would secede and form a confederacy of the Union, and was in favor of resisting the extension of slavery beyond the limits recognized in the constitution, even at the cost of civil war. Mr. Foster was intimately connected with the administration, and was often a spokesman of Mr. Lincoln's views. On 11 March, 1861, he moved the expulsions of Senator Lewis T. Wigfall, of Texas. In 1863 he advocated an appropriation for the gradual emancipation of slaves in Missouri. In 1864, on the question of the repeal of the fugitive slave act, he spoke in favor of preserving the earlier law of 1793, and thereby warding the approaches of the radical members of his party. He also opposed the bill granting the voting franchise to colored citizens of the District of Columbia without an educational qualification. He served on the committees on Indian affairs and land claims, and was chairman afterward on pensions, and during the civil war of that on foreign relations. In 1865 he was chosen president of the senate pro tempore. After Andrew Johnson became president, Mr. Foster was acting vice-president of the United States. During the subsequent recess he travelled on the plains as member of a special commission to investigate the condition of the Indians. His senatorial term of office expired in March, 1867, and he was succeeded by Benjamin F. Wade in the office of vice-president. On his return to his moderate and conservative course in the senate his re-election was opposed by a majority of the Republicans in the Connecticut legislature, and he withdrew his name, though he was urged to stand as an independent candidate, and was assured of the support of the Democrats. He was admitted to the New York bar at Yale in 1869, but after his retirement from the bench in 1876 delivered a course of lectures on "Parliamentary Law and Methods of Legislation." In 1870 he again represented the town of Norwich in the assembly, and was chosen speaker. He resigned in June of that year in order to take his seat on the bench of the supreme court, having been elected by a nearly unanimous vote of both branches of the legislature. His most noteworthy opinion was that in the case of Kirland against Hotchkiss, in which he differed from the decision of the majority of the court (afterward confirmed by the U. S. supreme court) in holding that railroad bonds could not be taxed by the state of Connecticut when the property mortgaged was situated in Illinois. In 1872 he joined the Liberal Republicans and supported Civil Government for the presidency. In 1874 he was defeated as a Democratic candidate for congress. He was a judge of the Connecticut superior court from 1870 till 1876, when he was retired, having reached the age of seventy years, and resumed the practice of law. In 1879-80 he settled in New York to settle the disputed boundary question with New York, and afterward one of the three commissioners to negotiate with the New York authorities for the purchase of Fisher's Island. He was also a member of the commission appointed in 1878 to establish simpler rules and forms of legal procedure for the state courts. By his will he endowed a professorship of English law at Yale, bequeathed his library to the town of Norwich, and gave his home for the free academy there. See "Memorial Sketch" (printed privately, Boston, 1881).

FOSTER, Randolph Sinks, clergyman, b. in Williamsburg, Ohio, 22 Feb., 1830. He was educated at Augusta college, Ky., and in 1887 entered the itinerant ministry of the Methodist Episcopal church in the Northwest Conference of the Union, and was in favor of resisting the extension of slavery beyond the limits recognized in the constitution, even at the cost of civil war. Mr. Foster was intimately connected with the administration, and was often a spokesman of Mr. Lincoln's views. On 11 March, 1861, he moved the expulsion of Senator Lewis T. Wigfall, of Texas. In 1863 he advocated an appropriation for the gradual emancipation of slaves in Missouri. In 1864, on the question of the repeal of the fugitive slave act, he spoke in favor of preserving the earlier law of 1793, and thereby warding the approaches of the radical members of his party. He also opposed the bill granting the voting franchise to colored citizens of the District of Columbia without an educational qualification. He served on the committees on Indian affairs and land claims, and was chairman afterward on pensions, and during the civil war of that on foreign relations. In 1865 he was chosen president of the senate pro tempore. After Andrew Johnson became president, Mr. Foster was acting vice-president of the United States. During the subsequent recess he travelled on the plains as member of a special commission to investigate the general conference of 1868 appointed him delegate to the British Wesleyan conference, and in the same year he was elected president of the Western theological seminary, Madison, N. J. In 1870 he was appointed president of this institution, retaining the chair of theology. He was a delegate to the general conferences of 1864, 1868, and 1872. In May, 1872, he was elected bishop of the M. E. church, and soon afterward was chosen to make episcopal visitations in Norway, Sweden, Denmark, Germany, Switzerland, Italy, India, and South America. He subsequently resided in Cincinnati, Ohio, and in Boston, Mass. He has published "Objections to Calvinism as it is," a polemical work, which grew out of a controversy (Cincinnati, 1849); "Christian Purity" (New York, 1854; revised ed.,
FOSTER, Robert Sandford, soldier, b. in Vernon, Jennings co., Ind., 27 Jan., 1844. He was educated at the Vernon common-school. During the civil war he fought with Indiana troops, and was made brigadier-general of volunteers on 12 June, 1863. He was brevetted major-general of volunteers on 13 March, 1865, resigning on 25 Sept., and being appointed lieutenant-colonel for the 27th regular infantry, but declined. Since the war he has resided in Indianapolis, was its treasurer from 1867 till 1872. He was U. S. marshal for the district of Indiana from 1881 till 1885.

FOSTER, Stephen Collins, song-composer, b. in Pittsburg, Pa., 4 July, 1835; d. in New York city, 13 Jan., 1884. At the age of thirteen he was sent to school in Towanda, Pa., and afterward to Athens, Pa. At fifteen he entered Jefferson college at Cannonsburg, Pa., but soon returned to his native place to pursue his favorite studies with private tutors. Possessing a natural fondness for music, he learned, unaided, to play on the flageolet, and thumbed the guitar and zither as an accompaniment to ditties of his own composition. But he soon realized the limitations of musical self-instruction, and thereafter devoted several years of study to the voice and piano-forte music. In 1842, when he was a merchant’s clerk in Cincinnati, Ohio, his first song, “Open Thy Lattice, Love,” appeared in Baltimore. A year later, “Uncle Ned” and “Old Susanah!” were immediately taken up by travelling negro minstrels, and became universally popular. This success fixed Foster’s destiny; he relinquished his career in business and devoted himself entirely to musical composition. In 1850 Foster went to New York city, but the couple soon tired of their new home and returned to Pittsburg. About this time he composed his “Old Folks at Home.” For the privilege of singing it in public, Christy’s minstrels paid him $300. In 1854 he appeared “Old Black Joe,” the last of his negro melodies; thereafter he confined himself to the composition of sentimental ballads. In 1860 Foster, with his wife and child, returned to New York city, where the family remained until he died. He wrote in succession thirty pieces, one fourth of which were negro ditties, and the others home ballads. So popular did many become, both here and abroad, that they were introduced at concerts by the most eminent vocalists, and rendered into foreign languages. Of “Old Susannah,” “Uncle Ned,” “Neely,” “Old Dog Tray,” “Old Kentucky Home,” “Willie, we have missed you,” and “Old Folks at Home,” hundreds of thousands of copies were printed. The last-named was by far the most profitable piece ever published in this country. Foster wrote both the words and music of all his successes. The melody of composition was to jot down the melody as it came to him, and thereafter invent suitable words. He adhered to simple chords for accompaniments, and kept the airs within the range of ordinary voices. The subjects appeal to home life and popular taste, and the versification is smooth and musical. His negro ditties are characterized by archness, humor, and unusual refinement. In some of his compositions, notably so in the beautiful serenade “Come where my Love lies Dreaming,” Foster rises to a pitch of Latin and Greek in Greeneville college, Tenn. In 1827 he took the same chair in East Tennessee college (now the University of Tennessee), at Knoxville, and became president of the college in 1834.

FOSTER, Stephen Symonds, abolitionist, b. in Canterbury, N. H., 17 Nov., 1808; d. near Worcester, Mass., 8 Sept., 1881. He learned the carpenter’s trade, then studied with the intention of becoming a minister, was graduated at Dartmouth in 1838, and studied theology in the Union theological seminary, New York; but, because he was preached from the pulpit, he deserted that profession in order to engage in the anti-slavery contest. He was an earnest orator, a master of denunciation and invective, and was frequently the victim of mob violence. He is described in the subject of Lowell’s antislavery poems as “A kind of madman John the Baptist.” To whom the harshest words come apstes, Who, struck by stone or brick ill starred, Hurls back an epithet as hard.

Which, deadlier than stone or brick, Has a power to wrack.

While in the theological seminary he induced some of his classmates to join with him in a meeting to protest against the warlike preparations then going on, arising from the dispute with Great Britain over the northeastern boundary. The refusal of the faculty to allow the chapel to be used for such a meeting made him dissatisfied with the churches because they countenanced war, and when he became an anti-slavery agitator of the moral-force school, instead of a Congregational minister, he directed his attacks chiefly against the church and the clergy, because they upheld slavery. Since the people of the New England towns could not be induced to attend anti-slavery lectures, he was accustomed to attend church meetings and claim there a hearing for the enslaved, and was often expelled by force, and several times imprisoned for disturbing the peace. Other abolitionists adopted the same plan of agitation, which was very effective. He lived for many years on a farm in the suburbs of Worcester. He published articles in periodicals on the slavery question, and in 1849 a pamphlet entitled, “A True Picture of the American Church and Clergy,” in the form of a letter to Nathaniel Barney, a reprint of which was issued by Parker Pillsbury.
FOSTER, Thomas Flournoy, b. in Greensborough, Ga., Nov. 1790; d. in Columbus, Ga., in 1847. He was graduated at Franklin college in 1812, attended law lectures in Litchfield, Conn., was admitted to the bar in 1816, and practised in Greensborough. He was for many years a member of the Georgia legislature. In 1828 he was elected a representative in congress, and was twice re-elected. In 1835 he removed to Columbus, and in 1841 was again sent to congress, and served out his term. He delivered a notable speech in defence of state rights, in answer to a memorial for the release of the missionaries Worcester and Butler, who were imprisoned under a judgment of the state courts, and still held in custody, although the supreme court of the United States had reversed the decision. This speech was published (Washington, 1835), and occasioned a controversy over the removal of the deposits from the U. S. bank, and in other questions before congress.

FOSTER, William Sewell, soldier, b. in New Hampshire; d. in Baton Rouge, La., Nov. 1893. He was appointed a lieutenant of infantry on 12 March, 1813, became major general on 19 April, 1826, and was brevetted major for gallantry in the defence of Fort Erie. He was promoted major on 7 July, 1828, and lieutenant-colonel on 8 June, 1838. On 25 Dec., 1887, he received the brevet of colonel for distinguished service in Florida, particularly in the battle of Okeechobee.

FOUCHER, Jean, explorer, b. in Cambrai, Flanders, in 1508; d. in Entre Rios, Uruguay, in 1567. He was in the expedition that accompanied Sebastian Cabot when that navigator, after going up the Paraná river, ascended the Paraguay. He fix ed his abode at the mouth of the Rio de la Plata, where he earned a hard living as a pilot for several years, but returned to his native country in 1529. He intended settling at Cambrai, and was studying for the bar, when he learned that the Spanish government was intending colonizing the banks of the Paraguay. He immediately went to Spain and offered his services to the chief of the expedition, Don Pedro de Mendoza, who engaged him as pilot to guide his fleet up the La Plata. The expedition, which left Seville 24 Aug., 1534, comprised 14 ships, carrying 2,500 Spaniards of both sexes and of all ages, 150 Flemish, and 76 horses. Don Pedro de Mendoza landed 7 Nov. at the mouth of the Rio de la Plata, and set to work forthwith to build the city of Santa Maria de Buenos Ayres. Foucher, who had acquired himself with zeal of the duties of pilot, was sent toward the discovery of the interior of the country. He set out, 14 June, 1538, across the country of the Guaranis, where he built a fort. He afterward crossed the countries of the Samococes and the Sibococe—warlike Indians, who were bought in by friends, and finally redeemed by Mr. Foster. Mrs. Foster's last public work was an effort made to raise funds to defray the expenses of securing the adoption of the 15th amendment in the doubtful states. In June, 1880, she attended an anti-slavery reunion in Boston. The death of her husband, in 1880, caused her great suffering, and she finally retired from public life. She was the last surviving member of the family of the late Mr. Foucher.

FOURNIER, Telephore, Canadian jurist, b. in St. Franquin, Que., and president of the court of Quebec, in 1828. He was educated at Nicolet college, and called to the bar of Lower Canada in 1846. He was appointed queen's counsel in 1863, has been "batonnier" of the Quebec bar, and president of the general council of the bar of the province of Quebec. He was elected to the legislature for the county of Bellechasse in August, 1870, and represented this constituency till his elevation to the Senate in 1876.
FOUVILLE. Jean Baptiste, French naturalist, b. in Hambaye, Manche, 15 Feb., 1784; d. in Brazil in 1827. He inherited a fortune, and, in 1820 set out on extensive travels, visiting Europe, Brazil, Paraguay, Chili, Persia, and India. On his return to Paris he published "Voyages autour du monde" (1823); "A travers l'Amérique du Sud" (1828); and "Du Brésil à Santiago, avec cartes" (2 vols., 1829); and was elected a member of the Geographical society. He sailed in May, 1826, on board the "Jules" for Buenos Ayres. The ship arrived on 29 Oct. at La Plata, then blockaded by the Brazilians, and in trying to run the blockade was captured. Fouville on his former visit had been the guest of the Brazilian minister, and the latter, assured that the cause of war were now relaxed in his behalf. After a short stay at Montevideo as a prisoner he was liberated, and set out for Buenos Ayres, where he arrived 25 Dec., 1826. He was successful in several commercial speculations, and left Rio Janeiro, 12 Aug., 1827, immediately after his marriage with Miss Alice Laboissiere. After making a large collection of Brazilian plants, he sailed, 15 Oct., for Parma, where he presented it to the Paris museum of national history, and published "Explications de l'herbe des plantes Brésiliennes de J. B. Fouville" (Paris, 1829). The Geographical society invited him to take charge of an expedition to the Congo, and he passed two years exploring the interior of Africa, his wife dying during his stay. On his return to Paris in May, 1831, he published the results of his travels and observations in French in "Dans l'Afrique equinoctial" (4 vols., 1831). Fouville sailed again for Brazil in March, 1833, penetrated into the interior, and spent four years exploring the lands watered by the Amazon. He was killed by negroes whose curiosity was aroused by his bag; his body lying throughout the Amazon until the 4th June, 1837. His last manuscripts, after many vicissitudes, fell into the hands of the traveller S. Rany, who sent them to Ferdinand Denis, who published them: "Histoire des Nation Indiennes de l'Amazone" (1862); "Flora du Brésil" (1863); "Voyages au Brésil" (1865); and "Moeurs et coutumes des Indiens de l'Amérique du Sud" (1866).

FOWLE, Daniel, printer, b. in Charlestown, Mass., about 1719; d. in Portsmouth, N. H., in June, 1787. He was an apprentice with Samuel Kirkland, and began business for himself in Portsmouth in 1740. From 1742 to 1750 he was a partner with Gamaliel Rogers, and in 1748-50 joint publisher with him of the "Independent Advertiser." In 1749-68 they published the "American Magazine." They were the first in America to print the New Testament in 1752, the Genesee collection. In 1756 was published "The Monster of Monsters," severely animadverting on some members of the house. He was released in a few days, but left Boston in disgust, went to Portsmouth, N. H., and on 7 Oct., 1756, began the publication of the "New Hampshire Gazette."—His nephew, Robert, editor, was a partner with his uncle in the publication of the "New Hampshire Gazette," which was the only newspaper in New Hampshire at the beginning of the Revolution. As Daniel was a Whig and his nephew a loyalist, the partnership was terminated, and Robert established himself as a printer at Exeter. The paper of the period was printed in his office, and, as it was counterfeited soon afterward, suspended until November, he was taken as a participant in the crime, and he fled to the British lines in New York, and thence to England.

Fowler, William Bentley, educator, b. in Boston, Mass., 17 Oct., 1799; d. in Medford, Mass., 6 Feb., 1865. He was apprenticed to a bookseller, and after the latter's death carried on the business till 1828, when he engaged in teaching, having for many years made a study of the theories and methods of education and mental culture. In 1842 he began the publication of the "Common School Journal," which was edited by Horace Mann till 1844, and then by himself for the succeeding four years. He wrote and lectured in furtherance of the principles advocated by Horace Mann, and rendered important assistance to that reformer. When teachers' institutes were established, he delivered many lectures at their meetings. Though his efforts to introduce the new system of education were not introduced into the public and private schools of Boston. He was a member of the Massachusetts legislature in 1843. About 1851 he opened a monitory school in Boston, which he conducted successfully till 1869, when he retired to Medford and devoted himself to literary labor. He published, besides his lectures, as many as forty-eight books of instruction. His first publication was an improved edition of Boyer's "French and English Dictionary"; his latest, a series of outline maps. He was engaged at the time of his death in preparing a "Book of Dialogues."

Fowler, Andrew, clergyman, b. in Guilford, Conn., about 1765; d. in Charleston, S. C., in 1851. He was graduated at Yale in 1783. Having studied for the Protestant Episcopal ministry, he was ordained deacon, 21st Congregational Church, 1790, by Bishop Provost of New York. While in college he performed the duties of a lay reader in New Haven and West Haven. After taking orders, he was rector of the united churches at Peckskill and Highlands, and subsequently of the church at Bedford, N. Y. After residing on Long Island, and in Philadelphia, he became rector of churches in Spotswood, Shrewsbury, and Middletown, N. J. For a brief period he was in charge of the church in Bloomingdale, N. Y., but in February, 1807, he was elected rector of St. Bartholomew's parish, S. C. In 1812 he accepted missionary work in connection with the Protestant Episcopal society for the advancement of Christianity in South Carolina, and was usefully occupied during his last years at different points in the state, including Camden, Columbia, and Charles Town.

Fowler, Charles Henry, M. E. bishop, b. in Burford, Canada, 11 Aug., 1837. In 1841 he was taken with his father's family to Illinois, where he spent his early years on a farm. After studying at Rock River seminary in Mount Morris, he entered the Asbury Seminary, and was graduated at Garrett Biblical Institute, Evanston, Ill. The same year he was admitted on trial into the Rock River conference of the Methodist.
Episcopal church, and was appointed successively to churches in Chicago, till in 1872 he was elected president of Northwestern University. He held this office till 1876, when he was elected by the general conference to the editorship of the New York "Christian Advocate." Four years later he was elected one of the corresponding secretaries of the missionary society of the Methodist Episcopal church, and in 1884 he was elected an ordained bishop. He received the degree of D. D. from the Northwestern university, and afterward of L.L. D. from Syracuse university, N. Y. He was a delegate to the general conferences of 1872, 1876, 1880, and 1884. Since his election to the episcopate he has traveled through all parts of the country in the performance of his official duties, and has also visited South America. His residence is at San Francisco, and he has devoted a large share of his labors to the interests of the Methodist Episcopal church in the Pacific states.

FOWLER, Henry, clergyman, b. in Stockbridge, Mass., in 1824; d. in Vineyard Haven, Mass., 4 Aug., 1873. He was graduated at Williams in 1847, went to New York, and entered upon a literary career. He was editor of "Holliston Magazine," and a contributor to other journals and periodicals. About 1852 he removed to Chicago, and was editor and part proprietor of the "Tribune" for a year or more. From this place he was called to the professorship of political economy in the University of Rochester, N. Y., which he filled for nearly five years, studying meanwhile in Rochester theological seminary. In 1858 he was licensed and called to the pastorate of the 2d Presbyterian church in Auburn, N. Y. He married, in 1858, a daughter of the late Mr. Jonathan Dunham, of Auburn, who continued till 1871, when he resigned in consequence of failing health. He was the author of "The American Pulpit," a volume of biographical and descriptive sketches of living pulpit celebrities, with portraits (New York, 1856).

FOWLER, Joseph Smith, senator, b. in Steubenville, Ohio, 81 Aug., 1822. He was graduated at Franklin college, Ohio, in 1843, and for four years filled the chair of mathematics in that institution. He then studied law in Kentucky, but began practice in Tennessee. When the civil war began, he ardently espoused the National cause, and in September, 1861, in consequence of a proclamation of Jefferson Davis for the expulsion of loyal people, he removed to Springfield, Ill. In April, 1862, he returned to Tennessee, was made commissioner of the state under Gen. A. H. W. Johnston, and took a leading part in recommending the state government in the interests of the Union. He was elected to the U. S. senate in 1865, but was not admitted to his seat until July, 1866.

FOWLER, Lytleton, clergyman, b. in Smith City, Tenn., 12 Sept., 1862; d. in Texas, 19 Jan., 1849. He became a member of the Methodist church in 1819, was licensed to preach in Kentucky on 30 Sept., 1828, was ordained as deacon in October, 1828, stationed at Louisville the following year, and ordained an elder in October, 1830. In 1832 he went to Texas, and in August, 1833, was appointed a missionary to Texas. In 1838 he was appointed by the Mississippi conference superintendent of the Texas mission. After the organization of the Texas conference he was presiding elder of various districts. He attended, in 1844, the last conference before the division of the church, and in 1845, by a vote in the academy in Fairfield, Conn., for a year, was licensed to preach on 14 Oct., 1817, made a missionary tour in the Mississippi valley in 1818, and in 1819 was settled over a Congregational church in Plainfield, Conn. He was dismissed by this church in 1831, but was immediately called to a church in Fall River, of which he remained pastor until he entered congress. In 1841 he delivered three discourses containing a history of Fall River since 1830, and an account of the boundary dispute between Massachusetts and Rhode Island, and was appointed by a committee of citizens to defend the interests of the town before the boundary commissioners, published a series of articles on the subject in the Boston "Atlas," and was elected in 1847 to the state senate, where he secured the rejection of the decision of the boundary commissioners by a unanimous vote. His constituents were so pleased with his ability as a legislator that they elected him in 1848 as a Free-soil Whig to the National house of representatives, and re-elected him for the following term. He was an advocate of temperance laws, and a stouter opponent of slavery. In March, 1850, he replied to Daniel Webster's speech in justification of the fugitive-slave law. He was the author of a "Disquisition on the Evils attending the Use of Tobacco" (1883), and "Lectures on the Mode and Subject of Baptism" (1885). His "History of Fall River, with notices of Freeborn and Tiverton," was re-published in 1862 (Fall River).

FOWLER, Orson Squire, phrenologist, b. in Cohocton, Steuben, co., N. Y., 11 Oct., 1800. He was graduated at Amherst in 1864, and immediately after began to lecture and to practice. In 1853 his brother Lorenzo opened an office in New York. In 1836 they wrote and published "Phrenology Proved, Illustrated, and Applied." In October, 1838, he issued in Philadelphia the first number of the "American Phrenological Journal," which was published in that city till 1842, when it was removed to New York, and continued by the firm of O. S. and L. N. Fowler, which became Fowlers & Wells in 1844, and, by the retirement of the Fowlers, S. R. Wells in 1863. Besides his labors as an editor and a prolific author, Mr. Fowler lectured on his specialty and allied subjects in the United States and Canada for many years. In 1863 he removed to Boston, Mass., and in 1875 to Manchester, Mass. Among his many volumes on phrenology and kindred subjects are: "Memory and Intellectual Improvement" (1829); "The Animal and Mental" (1829); "Matrimony, or Phrenology applied to the Selection of Companions" (1843); "Self-Culture and Perfection of Character" (1843); "Hereditary Descent, its Laws and Facts applied to Human Improvement" (1845); "Love and Parentage" (1841); "The Physiologist in Phrenology and Physiology," with his brother (1849); "Sexual Science" (Philadephia, 1870); "Amativeness;" "Human Science"; and
"Creative Science, or Manhood, Womanhood, and their Inter-Relations."—His brother, Lorenzo Niles, b. in Cohocton, 23 June, 1811. He accompanied Orson on lecturing tours, and lectured alone throughout the United States and the British-American provinces. In 1833 he settled in London, and lectured in all parts of Great Britain. Some of his lectures were published in London. In addition to the works written in conjunction with his brother, he is the author of the “Synopsis of Phrenology and Physiology” (1844); “Marriage, its History and Philosophy, with Directions for Happy Marriages” (1846); and “Lectures on Man.” As an ardent student of natural sciences, he was engaged in publishing “Life Illustrated,” a weekly journal, and the monthly periodicals the “American Phrenological Journal” and the “Water-cure Journal,” which was superseded by the “Science of Health.”—Lydia Folger, wife of Lorenzo N., b. in Nantucket, Mass., in 1823; d. in London, England, 26 Jan., 1879, was a graduate of Syracuse medical college, and practised medicine. She lectured on physiology and on diseases of women and children, and published “Familiar Lessons on Astronomy” (1847), and “Familiar Lessons on Astronomy” (1848).

FOWLER, Philemon Halstead, clergyman, b. in Albany, N. Y., 9 Feb., 1814; d. in Utica, N. Y., 19 Dec., 1879. He was graduated at Hobart college in 1832, was a tutor there for one year, and studied theology at Princeton seminary, where he was graduated in 1836. He held pastorates in Washington, D. C., and Elmirna, N. Y.; and from 1851 till 1874, when he was compelled to resign on account of failing health, was pastor of a church in Utica, N. Y. He was a member of the joint committee on receivership of the two wings of the church reunited in 1870. He was the author of a “History of Presbyterianism in Central New York,” and of several other small volumes and published discourses.

FOWLER, Samuel, physician, b. near Newburg, N. Y., 30 Oct., 1779; d. in Franklin, N. J., 21 Feb., 1844. He studied medicine in Philadelphia, and, after being licensed in 1800, began to practise in Hamburg, N. J. A few years later he removed to Peekskill, where he resided, enjoying a high reputation on account of his scientific knowledge. He interested himself in politics, and represented his county in the upper branch of the New Jersey legislature, and also in congress, to which he was twice elected as a Jackson Democrat, serving from 2 Dec., 1833, till 3 March, 1837. As a mineralogist he held deservedly a high rank. The zinc-mines in Franklin were once owned by him, and his descriptions of the minerals found in their vicinity, particularly the franklintite, said to have been named by him, led to the development of the metallurgy of the rare mineral, fowlerite, was discovered by him. He contributed frequent descriptions of New Jersey minerals to scientific and other journals.

FOWLER, Samuel Page, antiquarian, b. in Danvers, Mass., 22 April, 1804. He carried on the business of a quakering and tinning in New York, and was an active town, held various local offices, and was a member of the legislature in 1857–9, and of the State constitutional convention in 1853. He was one of the founders of the Essex institute, and for ten years president of the board of trustees of the Peabody institute of Danvers. He wrote articles for the “Historical Collections” of the Essex institute, and a sketch of the “Life and Character of the Rev. Samuel Parris, of Salem Village, and his Connexion with the Witchcraft Delusion of 1692”; and annotated Robert Calef’s “More Wonders of the Invisible World” (Salem, 1861).

FOWLER, Thomas Powell, lawyer, b. in Newburg, N. Y., 26 Oct., 1851. He was graduated at Columbia law-school in 1874, and became a practicing lawyer in New York city. He has been a director and a receiver of the Shenango and Allegheny road in 1884, and since 1886 has been president of the New York, Ontario, and Western railway.

FOWLER, William Chauncey, educator and author, b. in Killingworth (now Clinton), Conn., 1 Sept., 1789; d. in Durham, Conn., 15 Jan., 1851. His parents settled at Durham when he was four years old. He was graduated at Yale in 1816, and studied theology there, at the same time performing the duties of rector of the Hopkins grammar-school. He was graduated at the theological school in 1818, a tutor at Yale from 9 Jan. till 1823, pastor of a Congregational church in Greenfield, Mass., in 1828–7, professor of chemistry and natural philosophy in Middlebury college, Vt., from 1827 till 1838, and then of rhetoric and oratory in Amherst college, where he was engaged in literary labors, residing at Amherst till 1838, and afterward in Durham. He was a member of the Massachusetts assembly in 1831, and of the Connecticut senate in 1834. For his father-in-law, Noah Webster, he edited the university edition of Webster’s Dictionary (1845). He published an “English Grammar”; a treatise on “The English Language in its Elements and Forms” (1850); “Memorials of the Chaunceys” (1856); “The Sectional Controversy, or Passages in the Political History of the United States” (1862); “Genealogy of the Chaunceys, the Magistrate, and his Descendants”; “Wives of the Fowlers,” and “Wives of the Chaunceys”; “History of Durham” (Hartford, 1866); and “Local Law in Massachusetts and Connecticut” (Albany, 1859–60).—His son, William Worthington, b. in Middletown, Vt., 24 June, 1833; d. in Durham, Conn., 18 Sept., 1881, was educated at Phillips Andover academy and at Amherst, where he was graduated in 1854. He studied law at Amherst and in New York city, where he was admitted to the bar in 1857. He practised his profession in New York till 1864, then became a broker, and in 1871 abandoned that business for literature and journalism, settling in Durham. In 1879 he was a member of the Connecticut senate. He was for twelve years the New York financial correspondent of the Boston “Commercial Bulletin,” and was the author of “Ten Years in Wall Street” (Hartford, 1870): “Life and Adventures of Benjamin F. Moneyenny”; “Fighting Fire” (1875); “Woman on the American Frontier” (1877); “Twenty Years of Inside Life in Wall Street” (New York, 1880); and an article “The Fowlers of Buckinghamshire, England.”

FOWLES, James H., clergyman, b. in Nassau, New Providence, in 1812; d. in 1854. He was the son of a lieutenant in the British army, was graduated at Yale in 1831, licensed to preach by the Presbyterian church in New York, and ordained in the Protestant Episcopal church by Bishop Bowen, of South Carolina. He preached in that state till 1845, when he succeeded Stephen H. Tyng in Philadelphia. He was the author of “Protestant Episcopal Church Defended and Refuted” (Philadelphia, 1846). A collection of thirty “Sermons Preached in the Church of the Epiphany, Philadelphia,” accompanied by a memoir, was published after his death (1853).
FOX, Charles James, lawyer, b. in Antrim, N. H., 11 Oct., 1811; d. in Nashua, N. H., 17 Feb., 1840. He was graduated at Dartmouth in 1831, studied law, and in 1834 formed a partnership with Daniel Abbot, of Nashua, N. H., which was continued through his life. He was county solicitor in 1833–44, a member of the commission to revise the New Hampshire statutes in 1840–42, travelled in Egypt in 1841, and in the West Indies the following year. With the Rev. Samuel Osgood he compiled "The New Hampshire Book, Specimens of its Literature" (Nashua, 1842). He was the author of "History of Dunstable" (1846), and the "Town Officer" (Concord, 1848).

FOX, Ebenezer, patriot, b. in East Roxbury, Mass., in 1763; d. there in 1843. He served for three years as a seaman, resided in his native town from 1784 till 1887, and was postmaster of Boston in 1831–8. He wrote the "Revolutionary Adventures of Ebenezer Fox" (Boston, 1848).

FOX, George L., actor, b. in Boston, Mass., 3 July, 1835; d. in Cambridge, 24 Oct., 1877. He made his first appearance in 1834 at the Teet's Theatre, Boston, as one of the children in the "Hunter of the Alps," for the benefit of Charles Kean. At the age of twenty-five he played in the "Demon of the Desert," at the National theatre in New York. At the beginning of the civil war he went as lieutenant in the 35th New York, and took part in the battle of Bull Run. On 26 July, 1861, he left military life, and appeared on the following evening at the new Bowery theatre. He afterward became manager of the old Bowery, and later was associated with Lingard at the new Bowery. In the production of "Olympic," he was largely engaged, and made an immediate success in the part of the clown in the pantomime "Humpty-Dumpty." During the season of 1876 he was playing at Booth's theatre in New York city, when he was stricken with paralysis. Softening of the brain followed, and he ended his days in an asylum. His brother, Charles Kemble, actor, b. in Boston, Mass., 15 Aug., 1833; d. 17 Jan., 1875, went on the stage at the age of six years, and played the child in the "Carpenter of Rouen at the old Eagle theatre in Boston. His first appearance in New York was made at the old National theatre, 18 July, 1853, as Cute in "Uncle Tom's Cabin." In 1856 he was a member of the company at the old Bowery, and in 1859 was engaged at the new Bowery. He afterward appeared at the Olympic in pantomime at Union Square, 16 May, 1874, in "Humpty-Dumpty at Home," that house being then under the management of his brother. Charles Kemble Fox was the author of the pantomime in which both brothers won popularity and fortune.

FOX, Gustavus Vasa, naval officer, b. in Sussex, Mass., 13 June, 1821; d. in New York city, 29 Oct., 1883. He was appointed midshipman in the U. S. navy, 12 Jan., 1838, and served on various
stations, on the coast survey, in command of mail stations, and in the war with Mexico until 10 July, 1856, when, after a service of nineteen years, he resigned with the rank of lieutenant, his commission being dated the day previous to his resignation. After leaving the navy he accepted the position of agent of the Bay state woollen mills at Lawrence, Mass. In February, 1861, he was sent out for by Gen. Scott, and consulted in reference to sending supplies and troops to Fort Sumter, but the expedition was forbidden by President Buchanan. When Mr. Lincoln became president, Fox was sent to Fort Sumter to communicate with Maj. Anderson, and on his return was directed to carry out the plan previously formed. The plan was virtually defeated by the withdrawal of one of the ships (the "Powhatan"), which was to have taken part. The expedition was not reached Charleston when the Confederates, notified of its coming, opened fire on Fort Sumter, and the only thing accomplished was the bringing away of Maj. Anderson and his command after the surrender. After the evacuation of Washington had been cut off, Fox applied to William H. Astor, who fitted out the steamer "Yankee," under which he was appointed acting captain, and in which he sailed for Chesapeake bay. He was at this time appointed by President Lincoln to the post of assistant secretary of the navy, which he held until the end of the war. His services in this position were extremely valuable, and a member of Mr. Lincoln's cabinet once spoke of him as follows: "Fox was the really able man of the administration. He planned the capture of New Orleans, the loss of the Mississippi, and in general the operations of the navy. He had all the responsibility of removing the superannuated and inefficient men found in charge, had the honor of selecting Farragut, and was often consulted by Gen. Grant. He performed all his duties with an eye only to the requirements of the hour, and with no view to the advancement of any interest of his own." He was an able assistant to Sec. Welles, whose administration of the navy department owed to him much of its success. Soon after the close of the war Capt. Fox was sent on a special mission to Russia to convey to the czar, Alexander II., the congratulations of the U.S. congress on his escape from assassination. The voyage was made on the "Miantonomoh," the first monitor to cross the Atlantic. It is said that Capt. Fox might have been U.S. government agent an admiral's commission had he not refused to ask for it. One result of his visit to Russia was the purchase of Alaska by the U.S. government. In the negotiations concerning this purchase Capt. Fox took an active interest. He afterward became manager of the Middlesex mills, and a partner with E. R. Mudge, Sawyer & Co., where he remained several years. See Joseph F. Louh's "Narrative of Fox's Mission to Russia in 1866" (New York, 1873).

FOX, Henry Stephen, British diplomatist, d. in Washington, D.C., 13 Oct., 1846. He was the son of Gen. Henry Fox, and nephew to Charles James Fox, the British statesman. He was the first minister plenipotentiary of Great Britain to Buenos Ayres, was afterward transferred to Rio de Janeiro, and thence to the United States in 1836. He conducted the treaty for by Gen. Scott, and consulted in reference to sending supplies and troops to Fort Sumter, but the expedition was forbidden by President Buchanan. When Mr. Lincoln became president, Fox was sent to Fort Sumter to communicate with Maj. Anderson, and on his return was directed to carry out the plan previously formed. The plan was virtually defeated by the withdrawal of one of the ships (the "Powhatan"), which was to have taken part. The expedition was not reached Charleston when the Confederates, notified of its coming, opened fire on Fort Sumter, and the only thing accomplished was the bringing away of Maj. Anderson and his command after the surrender. After the evacuation of Washington had been cut off, Fox applied to William H. Astor, who fitted out the steamer "Yankee," under which he was appointed acting captain, and in which he sailed for Chesapeake bay. He was at this time appointed by President Lincoln to the post of assistant secretary of the navy, which he held until the end of the war. His services in this position were extremely valuable, and a member of Mr. Lincoln's cabinet once spoke of him as follows: "Fox was the really able man of the administration. He planned the capture of New Orleans, the loss of the Mississippi, and in general the operations of the navy. He had all the responsibility of removing the superannuated and inefficient men found in charge, had the honor of selecting Farragut, and was often consulted by Gen. Grant. He performed all his duties with an eye only to the requirements of the hour, and with no view to the advancement of any interest of his own." He was an able assistant to Sec. Welles, whose administration of the navy department owed to him much of its success. Soon after the close of the war Capt. Fox was sent on a special mission to Russia to convey to the czar, Alexander II., the congratulations of the U.S. congress on his escape from assassination. The voyage was made on the "Miantonomoh," the first monitor to cross the Atlantic. It is said that Capt. Fox might have been U.S. government agent an admiral's commission had he not refused to ask for it. One result of his visit to Russia was the purchase of Alaska by the U.S. government. In the negotiations concerning this purchase Capt. Fox took an active interest. He afterward became manager of the Middlesex mills, and a partner with E. R. Mudge, Sawyer & Co., where he remained several years. See Joseph F. Louh's "Narrative of Fox's Mission to Russia in 1866" (New York, 1873).

FOX, Margaret, spiritualist, b. in 1836. She and her sister Katharine (b. 1838) were the youngest children of John D. Fox, of Hydeville, Wayne co., N. Y. About 1846 the family was startled by mysterious rappings heard nightly on the floor of one of the bedrooms. All endeavors to trace them to any physical source proved unavailing. On the night of 31 March, when the raps occurred, Kate Fox imitated them by snapping her fingers, and the raps responded by the same number of sounds. The ages of different members of the family were asked, and the answer in every instance given correctly—a knock for each year. Various experiments were tried, and investigations made, but the occult power refused to act in the presence of the two sisters. The family removed to Rochester, and the raps followed, while heavy bodies were also moved, without appreciable agency. In November, 1849, the sisters appeared in a public hall, when the same phenomena were freely manifested, and subjected to tests. Committees reported that they were unable to trace the sounds to any mundane agency. In May, 1850, the two girls went to New York city, and the alleged spiritual manifestations became the subject of extended public discussion. Observations, facts, and descriptions were published far and wide, and "mediums" through whom spiritual manifestations were said to occur sprang up all over the country. Men of learning and intelligence followed in the train with the ignorant. The elder of the sisters was dissuaded from following the raps, and in 1853 went to Dr. Kane, the Arctic explorer, previous to his expedition to the north in 1853. During his absence her education was provided for by his arrangement and at his expense. On his return in 1855 she asserted that a marriage had taken place, and, although this was denied by his relatives, in 1865 she changed her name after his death. "The Love Life of Dr. Kane" (New York, 1865), containing letters and fac-similes, was published in proof of her claim.
FOX, Mary Hewins, actress, b. in Hartford, Conn., in 1842. Her maiden name was Hewins. She made her first appearance on the stage at the old Museum in Troy, N. Y., and afterward appeared at Laura Keene's Varieties in New York. She married Charles K. Fox, the comedian, but separated from him, and afterward married Mr. Burnham, of New York city, and retired from the stage. She wrote a number of poems of merit, and dramatized several works, which have been successfully produced on the stage.

FOX, Thomas Bailey, clergyman, b. in Boston, Mass., in 1808; d. in Dorchester, Mass., in 1876. He was graduated at Harvard in 1828, and at the Cambridge divinity school in 1831, and became pastor of the first religious society of Newburyport, Mass., where he remained until 1845. He then removed to Boston, where he gathered a congregation, and established a church in Indiana Place, which was soon afterward merged into the Church of the Disciples, to which he transferred its house of worship. He began to write for the press while yet an undergraduate, and was for several years a regular correspondent of the "Christian Inquirer," of New York. He was for three years the editor of the "Christian Register" in Boston, and for a much longer period a contributor, and later an associate editor, of the "Christian Examiner," of which he was for six years proprietor, and much of the time actually, though not nominally, the editor. He was for many years editor of the "Boston Transcript," and published not only articles on topics of the day, but many on subjects of enduring interest, together with numerous book-notice and biographical sketches. His first book was a "Sketch of the Reformation," which was republished in England with some worthless alterations. His other publications include "The Ministry of Jesus" (Boston, 1837); "The Sunday-School Prayer-Book" (1838); "HINTS FOR SUNDAY-SCHOOL TEACHERS" (1840); "Allegories and Christian Lessons for Children" (1845); "The Acts of the Apostles" (1846); and "The School Hymn-Book, for Normal, High, and Grammar Schools" (1850).

FOXcroft, George Augustus, humorist, b. in Boston in 1815; d. 13 March, 1878. He received an academic education, was clerk in a Boston store in 1831-8, and in 1837 purchased a farm in Dedham, and lived on it till 1846. Subsequently, for some years, he practiced law, but finally devoted himself almost exclusively to journalism. He wrote many articles for the daily press on monetary topics, and amusing sketches of domestic life and character, under the pen-name of "Job Sases." He may be regarded as the originator of what has been called "phonic humor."

FOXcroft, Thomas, clergyman, b. in Cambridge, Mass., 26 Feb., 1897; d. in Boston, 18 June, 1789. He was graduated at Harvard in 1714, and on 20 Nov., 1717, became pastor of the 1st Congregational church in Boston, where he remained till his death. He was learned, devout, and a good logician, and was admired both for his talents and for the elegance of his manners. He published thirty-two sermons, including "Observations, Historical and Practical, on the Rise and Primitive State of New England" (1707-9), and "Observations on the Case of Samuel," d. 2 March, 1807, was graduated at Harvard in 1754, and was for twenty-eight years minister of New Gloucester, Me.

FOYE, James Clark, educator, b. in Great Falls, N. Y., 1 March, 1841. He was graduated at Wesleyan University in 1866. In 1866 he was professor of natural science in Wesleyan female college, Cincinnati. For two years he was president of the Jonesborough female college, and in 1867 was elected to the chair of chemistry in Lawrence university, becoming in 1872 professor of chemistry. He has published "Tables for Determination, Description, and Clasification of Minerals" (Chicago, 1875); "Chemical Problems" (New York, 1879); and "Handbook of Mineralogy" (1886).

FRALEY, James Madison, naval officer, b. in Maryland, 6 May, 1809; d. in Philadelphia, Pa., 26 Sept., 1877. He entered the U. S. navy as a midshipman, 1 May, 1828, became passed midshipman in 1836, lieutenant in 1839, commander in 1861, captain in 1866, and commodore in 1872. He served in the naval battery before Vera Cruz, and commanded the steamer "Quaker City," of the South Atlantic blockading squadron, in 1862-7. This vessel was struck by a shell and partially disabled in an attack by Confederate rams off Charleston, 31 Jan., 1863. He commanded the "Tuscarora" in both attacks on Fort Fisher, and the steam sloop "Saratoga," of the North Pacific squadron, in 1867-8. He was appointed to the command of the Lane Island naval station on 30 April, 1870, and was retired from the service, 6 May, 1871.

FRALEY, Frederick, merchant, b. in Philadelphia, Pa., 29 May, 1804. After studying law for his own account, he entered mercantile business, and in 1828 was in the employ of Messrs. Field & Co. In 1834 he was one of the founders of the Franklin institute, and was for many years its treasurer. He was elected to the city council in 1844, and, as chairman of its finance committee in 1845, when the suspension of specie payments had brought the city to the verge of insolvency, he proposed, as a measure of relief, the issue of certificates of debt in small denominations, which was successfully adopted. In the same year he was elected by the Whigs to the state senate. During his term of service in Gov. Joseph Biddle's administration, he was chairman of the committee of investigation, in 1847, on the completion of Girard college, he was for ten years a member of the board of directors of the institution, prepared the plan that was adopted for its organization and management, and for several years remained at the head of its direction. During a vacancy in the presidency he took that place in the college for six months, and in 1854, the institution, which had been founded in 1821 by his father, was transferred to the city with all the districts within the bounds of the county. Mr. Fraley was one of the founders of the Union club, and its successor, the Union League of Philadelphia. He was chosen a delegate in 1868 to the commercial convention held in Boston for the establishment of a National board of trade, and was chosen first president of that board, and by unanimous re-election has continued in that office until the present time (1887). He was one of the most active promoters and organizers of the Centennial exhibition of 1876, and in 1873 was elected treasurer of the Centennial board of finance. He has been a trustee of the University of Pennsylvania since 1833, which in 1880 gave him the degree of LL. D., and since 1879 he has been president of the Agricultural Society of the state of Pennsylvania.

FRANCE, Joseph, French soldier, b. in Fort de France, Martinique, in 1797; d. there in December, 1868. In 1815 he entered the colonial gendarmerie of the island, and in 1834 had attained the rank of colonel. He commanded for ten years all the gendarmes for the island. In 1844 he published "La vérité sur les faits, ou l'esclavage à nu," which created a sensation, for it
described the horrors of slavery in the French colony. He also published a copy of the reports he had made in his official capacity, in which he vigorously denounced slavery. France was the object of daily ovaitions by the negroes, who had begun to show signs of discontent. The governor of the colony, becoming alarmed, arrested the colonel and sent him to Paris, where he was confined until he returned to Martinique in 1852, and until his death was a member of the general council of the colony. From 1860 till 1862 he was chief clerk of the administration, and from 1862 till 1863 private counselor to the governor. France is the author of "Histoire de la Guadeloupe," of which he published in 1854, "Les corsaires français dans les Antilles" (1857); "Histoire de la fibuste" (1860); "Questions coloniales" (1860); and "Statistique physique et politique de la Martinique" (1861).

FRANCIS, James, clergyman, b. in West Cambridge, Mass., 9 Nov., 1765; d. in Cambridge, 7 April, 1863. He studied at Medford academy, and was graduated at Harvard in 1813. Afterward he studied theology in the Cambridge divinity-school. A large number of French Canadians having emigrated to the United States after the rebellion of 1837, he established the Société St. Jean-Baptiste with the object of preserving the religion, language, and nationality of his compatriots. He was the last survivor of the Astor expedition. He published "Relation d’un voyage à la Côte du Nord-Ouest de l’Amérique septentrionale dans les années 1810-14" (1830; English translation, edited by J. V. Huntington, New York, 1854). This was the first history of the Astor expeditions, and the first work containing detailed accounts of the Oregon country. It forms the basis of Washington Irving’s "Astoria," and supplied Thomas H. Benton with materials for his great speech on the Oregon question.

FRANCIA, José Gaspar Rodríguez (fran-
che-ru), dictator of Paraguay, b. in Asuncion in 1737 or 1738; d. there, 30 Nov., 1814. It is said that he was of French extraction, but his father is supposed to have been born in Brazil, and to have emigrated to Paraguay. His mother was a Spanish creole. He studied for the priesthood at the seminary of his native city, and afterward in the University of Cordova, where he received the degree of D. D., and was for a short time professor of theology. He then practised law, and was appointed to several public offices. When the inde-

pendence of Paraguay was declared Francis was elected secretary of the revolutionary junta, who were scarcely able to read and write. In October, 1813, the junta was abolished, and Yegros and Francis appointed joint consuls for a year; but Francis was the moving spirit of the government, and in 1814 he was made dictator for three years, at the end of which he died. The re-election for life. He ruled the state with a despotic sway, but husbanded the national resources with great sagacity. No export or import trade was allowed without the dictator’s license, and an exorbitant duty and death awaited those who were detected leaving the country without permission. The opponents of his rule were either shot or imprisoned. Some of Francis’s prisoners were subjected to the most cruel tortures, and his apparent delight in torture gave rise to the belief that, like some of his brothers, he was occasionally dersely and he was generally human toward the poor. He had once been fond of gambling and social and sensual enjoyments, but now he resided in the palace of the former Spanish governors in complete seclusion, attended only by four priests. His anecdotest of his experiences were almost as numerous as the reports of his cruelties. Two Swiss surgeons, Renger and Longchamp, from whom he obtained from 1819 to 1823, published an "Essai Historique sur la Révoluce de Paraguay et le Gouvernement Dictatorial du Docteur Francia" (Paris, 1827), which was one of the principal channel of his communication with the outer world. He had great mental powers, which he cultivated by study and reading. He was especially fond of the French literature of the 18th century, and an admirer both of Robespierre and Napoleon. The anecdotes of his experiences were almost as numerous as the reports of his cruelties.

Francis, Convers, clergyman, b. in West Cambridge, Mass., 9 Nov., 1765; d. in Cambridge, 7 April, 1863. He studied at Medford academy, and was graduated at Harvard in 1813. Afterward he studied theology in the Cambridge divinity-school. A large number of French Canadians having emigrated to the United States after the rebellion of 1837, he established the Société St. Jean-Baptiste with the object of preserving the religion, language, and nationality of his compatriots. He was the last survivor of the Astor expedition. He published "Relation d’un voyage à la Côte du Nord-Ouest de l’Amérique septentrionale dans les années 1810-14" (1830; English translation, edited by J. V. Huntington, New York, 1854). This was the first history of the Astor expeditions, and the first work containing detailed accounts of the Oregon country. It forms the basis of Washington Irving’s "Astoria," and supplied Thomas H. Benton with materials for his great speech on the Oregon question.
knowledge of civil engineering, came to the United States in April, 1833. On his arrival he secured employment on the New York, Pennsylvania, and Boston railway. In 1834 he went to Lowell as assistant engineer on the hydraulic and other works, and in 1837 was appointed chief engineer of locks and canals on Merrimack river. In 1845 he was appointed agent of the canal company, and continued in that capacity and as chief engineer until he was retired from active duty in 1884. At present (1887) he is the consulting engineer in all important work connected with the hydraulic improvements of Lowell.

Mr. Francis may be regarded as the founder of a new school of hydraulic engineers. In gauging the flow of water, he employed floating tubes, the volumes treated by him have been unparalleled, and he has reduced the possible error from the ten per cent. often allowed in previous experiments, to two per cent. He was president of the American society of civil engineers from November, 1880, till January, 1888, and besides his contributions to periodical technical literature, has published "Lowell Hydraulic Experiments" (New York, 1853; enlarged ed., 1898), and "The Strength of Cast-Iron Pillars" (1869).

FRANCIS, John M., mineralogist, b. in Prattsburg, Steuben co., N. Y., 6 March, 1833. His father, Richard, a native of Wales, was a midshipman in the British navy, served in Admiral Rodman's flag-ship, and, resigning about the close of the Revolutionary war, emigrated to the United States and settled near Utica, N. Y. The son was educated in the common schools and in Prattsburg academy, and when fourteen years old was apprenticed to a printer. In 1843 he became editor of the "Wayne Sentinel" at Palmyra, N. Y., in 1845 an editorial writer on the "Rochester Advertiser," and in 1848 on the "Budget," of which he was subsequently editor and associate proprietor. After serving editorially on the Troy "Post" and the Troy "Whig," he established the Troy "Times" in 1851, and has been its controlling proprietor and editor-in-chief ever since. He was city clerk of Troy in 1851-5, and was a member of the New York state constitutional convention of 1867-8. In 1871 he was appointed by President Grant U. S. minister to Greece, which office he resigned in November, 1873. He was minister to Portugal in 1882-4, and to Austria-Hungary in 1884-5. He made the tour of the world in 1876-7.

FRANCIS, John Wakefield, physician, b. in New York city, 17 Nov., 1789; died there, 8 Feb., 1861. His father was a German, who emigrated to this country soon after the close of the Revolutionary war, and went to a printer, but subsequently entered Columbia in advance in 1807, and was graduated in 1809. He soon afterward began the study of medicine in the office of Dr. Hosack, whose partner he was till 1820. He was graduated in medicine in 1811, at the College of physicians and surgeons. In 1810 he became associated with Dr. Hosack in editing the "American Medical and Philosophical Register," a quarterly which was continued for four years. In 1813 he was appointed lecturer in the institutes of medicine and materia medica at the College of physicians and surgeons, and soon afterward, when the medical faculty of Columbia was consolidated with that institution, he was appointed professor of materia medica in the united body. After delivering one course of lectures he sailed for Europe in 1816, and while there studied under Abernethy, and formed the acquaintance of the most eminent physicians and literary men of the time. On his return he re-entered on his duties as professor, first of the institutes of medicine, afterward of medical jurisprudence, in 1817, and then of obstetrics from 1819 to 1826. In the latter year the whole faculty resigned, and the majority of them formed the Rutgers medical school, with Dr. Francis as professor of obstetrics and forensic medicine for four years, when the school was closed by the legislature. He afterward devoted himself to the practice of his profession and to literature. He actively promoted the interests of the New York historical society, the New York lecynm of natural history, the Woman's hospital, the State inebriate asylum, and the Typographical society, of which he was a member till his death. His taste in art was fine and his judgment correct, and young painters and sculptors always found in him a friend. He was the first president of the New York academy of medicine after its organization in 1847, and was elected an associate of numerous medical and scientific associations abroad as well as in the United States. He was a fine conversationalist and was a social favorite. In 1822-4 he was one of the editors of the "Medical and Physical Journal." Trinity college gave him the degree of LL. D. in 1859. Dr. Francis was intimately acquainted with the history and antiquities of New York, and was looked upon as an oracle in matters relating to his native city. He was the author of biographical sketches of many of the distinguished men of his time, and of articles in medical periodicals. His published works are "Use of Mercury" (New York, 1811); "Cases of Morbid Anatomy" (1814); "Febrile Contagion" (1816); "Notice of Thomas Eddy" (1823); "Denniss's Practice of Midwifery," with notes (1825); "Letter on Cholera Asphyxia of 1822" (1828); "Observations on the Mineral Waters of Avon" (1834); "The Anatomy of Drunkenness"; "Old New York, or Reminiscences of the past Sixty Years" (1877; enlarged ed., 1898; reprint, with a memoir by H. T. Tuckerman, 1860); and numerous addresses. — His son, Valentine Mott, physician, b. in New York city, 25 April, 1834, was graduated in medicine at the University of New York in 1839. After practising in New York for several years he removed to Newport, R. I. He was correspondent of an American newspaper while travelling on the continent of Europe in 1862-70, and is the author of "Hospital Hygiene" (New York, 1839), and "Fight for the Union," a poem (1863). — Another son, Samuel Ward, physician,
FRANCIS, Joseph, inventor, b. in Boston, Mass., 12 March, 1801. At eleven years of age he exhibited a fancy boat at a fair, and at the age of eighteen received from the Massachusetts mechanics' institute the first prize for a fast rowboat. He afterward established a boat-yard in New York, and was requested by the secretary of the navy to go to Portsmouth navy-yard and build wooden life-boats for the frigate “Santee” and the line-of-battle ship “Constitution.” After this he invented a portable boat that could be taken apart, and a method of building boats over a frame or mould with inch-square strips of cedar nailed edge to edge, the joining showing neither nail-heads or seams, and requiring no calcining. These boats, all of which were life-boats, came into general use. His greatest achievements were in the construction of life-saving appliances. These consisted of life-boats, life-cars, and surf life-boats. Of the life-car, the first that he made was of wood, and was called the “Hydron” life-car. The interior was fitted with copper air-tubes, and the invention proved successful. As a result of later experiments, the use of iron in the manufacture of vessels of any kind was practically unknown at that time. To Mr. Francis may be conceded the first use of iron floating vessels. Another improvement was added by having the spaces at the bow and stern of the boats made into reservoirs of air, as well as the spaces at the sides, enabling the boat to sustain a great load in the heaviest sea. In 1838 Mr. Francis invented the life-car by which to land people safely from a wreck. He began with experiments on wooden life-cars, and finally, in 1842, invented the corrugated metallic life-car, with space for four adults. His first perfect metallic life-car was placed on the coast of New Jersey, near Long Branch, in the autumn of 1849, at his own expense, the government refusing to aid him in any way. The boat was not used into use until January, 1850, when the British emigrant vessel “Ayrshire” was wrecked on Squan Beach in a violent winter storm. There were 201 persons on board, and 200 were saved by means of the life-car. The one loss of life that occurred was that of a man who insisted on attempting to ride through the surf on the outside of the car, when his family were inside. This car was for a long time preserved in the museum in Central park, New York, but on 10 July, 1853, it was deposited, as a relic, in the Smithsonian Institution. During the first four years of the use of life-boats (1850–3) they were instrumental in saving 2,150 lives, besides an immense amount of valuable cargo.

Mr. Francis's metallic life surf-boat, invented in 1845, was designed for riding lightly on the wildest seas. In 1847–8 he went to the United States, England, France, Germany, and Russia, for his method of constructing vessels of corrugated sheet-metal, and for the machinery by which they were produced. His inventions for the machinery and for the application of the hydraulic press were adjuncts of the greatest importance. Life-boats built on the principle of the corrugated sheet-metal were furnished by him for the Dead sea and Arctic expeditions, to the war, navy, and treasury departments, and to several European governments. Mr. Francis has extended the application of corrugated metal to the building of steamers, floating docks, harbor-buoys, and pontoon-wagons, and his inventions have been adopted by every civilized country. Among his many other inventions are a military hood made of cloth for the protection of soldiers in a storm, a circular yacht, and a double-joint row-lock. He has received numerous medals and decorations from European sovereigns. The order of knighthood of St. Stanislaus, with its medal and diploma, was conferred upon him in 1861, and on 4 Feb., 1856, he was made a Knight of St. Louis and decorated with a medallion and valued at 1,500 francs, from Napoleon III. He has also received a large number of medals from the American and other institutes, a medal and diploma from the European shipwreck society for all nations, in France in 1842, and a medal from the British association for the Imperial Royal European society, on 1 July, 1842. In addition to these honors from foreign countries, congress, in March, 1887, a few hours before its adjournment, passed a joint resolution thanking him for his “life-long services to humanity and thank him for the honor of his presence to present him with a gold medal. But President Cleveland withheld his signature from the bill until the specified time after the adjournment, and Mr. Francis thus failed to receive the gold medal awarded him. He has written many articles for periodicals, and has published “Life-Saving Appliances” (New York, 1885).

FRANCIS, Tench, lawyer, b. probably in Ireland; d. in Philadelphia, Pa., 16 Aug., 1758. He was the son of John Francis, dean of Sirmore and rector of St. Mary's church, Dublin. His brother Richard Francis, was an eminent lawyer, and author of “Maxims in Equity,” and another brother, Rev. Philip Francis, was the father of Sir Philip Francis, the reputed author of the “Junius Letters.” Tench was educated in England, and prepared for the bar, after which he removed to Pennsylvania, and became attorney for lord Baltimore, in Kent. He was clerk of Talbot county from 1728 till 1734, and in 1734 represented his county in the Maryland legislature. He subsequently settled in Philadelphia, was attorney-general of Pennsylvania from 1741 till 1755, and recorder of Philadelphia from 1750 till 1755. He was an eminent lawyer, and, according to Franklin's “Gazette,” 24 Aug., 1758, served in his several offices “with the highest reputation.” — His son, Tench, merchant, b. in
FRANCIS

Fansley, Talbot co., Md., in 1780; d. in Philadelphia, 1 May, 1800, for many years acted as agent for the Penn family in connection with their proprietary interests. He became the first cashier of the “Bank of North America,” which office he held until his death. He is said to have contributed £5,000 for the support of the Revolutionary army.

—Another son, Turbot, soldier, b. in 1740; d. in 1790, was named for his country’s hero. He owned a tract of 1,000 acres in Maryland, for which 125 or 130 guineas were to be paid. He was also anxious that his relative should secure from the English government a grant of land, which he thought might be purchased from the Indians for from 2,000 to 3,000 guineas. He wrote his stepfather, Judge Turbot, which he described as “a prodigious fine country,” was north of the Ohio and between the Scioto and the Wabash. The colonel also asked his correspondent to “obtain for us the carrying-place of Niagara” and “a grant of the Salt Lake, and the land for one million and it, in the Ohio company.” To this Sir Philip replied that, although he had really very little “interest” (influence) with the authorities, he would take the matter into consideration. About a year afterward, it appears, Col. Francis had procured a commission for his son, James C. He was, not upon myself to talk to a man who makes so light of getting large provinces into his possession.” Subsequently, when Sir Philip had become a member of the “new council” of India, he again wrote to Col. Turbot, saying: “At present I am bound to change my place, but while this is not an end my days on the banks of the Ohio! It gives me great comfort to reflect that I have relatives who are honest fellows in almost every part of the world. In America the name of Francis flourishes. I don’t like to think of the quantity of the horses and the cattle that my land would drink my way to America.”

JOHN BROWN, grandson of the younger Tench, senator, b. in Philadelphia, Pa., 31 May, 1791; d. in Spring Green, in Warwick, R. I., 9 Aug., 1864, lost his father in infancy, and was adopted by his maternal grandfather, Nicholas Brown. He was educated in the schools of Providence and in Brown university, where he was graduated in 1808. He spent a year in the counting-house of his kinsmen, Messrs. Brown & Ives, of Providence, and subsequently attended the law-school at Litchfield, Conn. In 1821 he went to live at Spring Green, a family estate on the shores of Narragansett bay. In the same year he was elected to the legislature from the town of Warwick, and was annually chosen till 1836, when he resigned. In 1831 he was a member of the 10th Congress; in 1832 he was elected governor by a coalition of the Anti-masons and the Democrats. He had been a Federalist and a National Republican, but after this he was known as a Democrat. He was re-elected governor every year till 1838, when the state fell into the hands of the Whig party. In 1837, the majority of the state legislature of 1842 again appeared in the state senate as a member of the “Law and Order” party, and in 1844 he was chosen by the legislature to fill the vacancy in the U. S. senate occasioned by the resignation of W. R. L. Smith. He held a seat by that body during the remainder of the session then pending, and the whole of the short session of the succeeding winter, his time expiring 4 March, 1845, was subsequently, for eight or nine years, again in the state senate, and continued to wield an important influence in the politics of Rhode Island. In 1856 he declined a re-election and withdrew from public life. From 1888 till 1857 he was a trustee of Brown university, and from 1841 till 1854 held the office of chancellor in that body.

FRANCISCO, Peter, soldier, b. in 1761; d. in Richmond, Va., in 1832. His bravery was equal to his strength, which was herculean. He could shoulder a cannon weighing 1,000 pounds, and the blade of his sword was five feet in length. Many anecdotes are related of his physical power. On his return to Virginia in 1781, he stopped at a tavern in Amelia, and was seized by a detachment of Tarleton’s dragoons, who were stationed there. While one of the Tories was stooping to take off his silver shoe-buckles, Francisco drew his sword and cleft the man through the head. He frightened the rest of the party and made his escape, although Tarleton gave him a full view. This exploit was illustrated in an engraving which was a favorite ornament of that period, and was published by James Webster, of Pennsylvania (1814). On some occasions he was more successful in restoring public order than the civil authorities. Through the influence of Charles Yancey he was appointed sergeant-at-arms in the Virginia house of delegates, which office he held until his death. John Randolph, of Roanoke, brought the attention of congress to Francisco’s military career, and applied for a pension for him.

FRANÇO, Bernardo de Sousa (fran’ko), Viscount, Brazilian statesman, b. in Pará, 28 June, 1803; d. in Rio Janeiro, 9 May, 1875. He studied at Paris. In 1823, being involved in a conspiracy, he was sent with 257 others to Lisbon, but was set at liberty after 1829. He was graduated in law at Olinda academy in 1835. He had already distinguished himself as editor of the “Voz do Beberibe” and of the “Diario de Pernambuco.” In 1839 he was appointed president of the province of Pará, and contributed largely to its protection. In 1852 he was elected president of the province of Alagoas, and soon afterward was attacked by the rebel Vicente Ferreira
and his troops. Franco defended himself as well as he could, but, lacking the means necessary to continue the defence, he retired on board a man-of-war. He had belonged to the Conservative party, but on account of its corruption went over to the other. He was a member of all the legislatures of Brazil, and was one of the representatives of South America. From 21 May till 29 Sept. he was minister of foreign relations. On July 5, 1855, the emperor appointed him senator for Paraíba, and on 4 May, 1857, he became secretary of the treasury, and in 1864 counsellor of state. In 1866 Franco was appointed minister of the interior, which he vacated in 1867. His plans for the reconstruction of Brazil, which had been impoverished by the war with Paraguay, but soon improved. In 1865 he resigned the presidency of Rio Janeiro, as this office was incompatible with his duties as counsellor of state. On 29 Sept., 1871, emancipation, for which Franco and other distinguished Brazilians had labored so hard, was decreed. In 1872 he was made Viscount Franco by the emperor.

FRANCO, Francisco de Mello, Brazilian physician, b. in Paracatu, 7 Sept., 1757; d. in Ubatuba, 26 Dec., 1837. At the age of 23 he was at the University of Coimbra, Portugal, where also he cultivated poetry and published "Reino da Estupidez" (1778), which was condemned by the Inquisition, and the author was imprisoned in 1779. In 1783, after his release, he was graduated as doctor, and settled in 1785, where he practiced as a physician. He was one of the founders of the Geographical Society. In 1817 he accompanied to Brazil the Archduchess Mary Leopoldine, affianced bride of the prince-royal Dom Pedro. When, in 1820, the constitutional struggle in Portugal began, Franco by his writings encouraged the liberal party, and he also declared for the democratic ideas when the same movement occurred in Brazil in 1821. The king immediately dismissed Franco from service at the palace, and he was reduced to comparative poverty. He published "Flora portuguesa e brasileira" (12 vols.); "Tratado de educação física dos meninos para uso da nação portuguesa"; "Ensaios sobre as árvores, com observações acerca da topographia é elíma do Rio Janeiro"; "Elementos de Hygiène"; and a volume of verses (1777).

FRANCO DE SÁ, Joaquim (fran'-ko de-sah'), Brazilian magistrate, b. in Alcantara, Brazil, 25 Dec., 1807; d. in Rio Janeiro, 10 Nov., 1851. He studied in Portugal, but in 1828 returned to Brazil, and was graduated in law at the Academy of Olinda in 1829. In 1838 he became public prosecutor at Maranhão, next year judge of the district court for São Luiz, and afterward held many places of public trust. In 1841 he was elected a deputy in the national parliament, and in 1844 was appointed president of the province of Paraíba, where he introduced reforms. When his native province, Maranhão, became a prey to hostile parties, Franco was called to the presidency, 27 Oct., 1846. He formed the "Liga-liberal-maranhense" of the best elements of the opposing parties, and this society became his platform in the preservation of public order, which in a few months was fully restored. Franco gave a great impulse to public instruction, establishing many schools, and under his administration the first newspaper, "O Progreso," was published in the province. In less than two years he made the province one of the most prosperous and flourishing of the empire. He resigned the presidency, 1 Oct., 1848, and retired to private life.

FRANKLAND, Sir Charles Henry, bart., collector of the port of Boston, b. in Bengal, India, 10 May, 1718; d. in Bath, England, 11 Jan., 1788. He was a lineal descendant of Oliver Cromwell, and his father was governor of the East India company's factory in Bengal. The intellectual attainments of the son won him such friends as Horace Walpole, Henry Fielding, and Lord Chesterfield, whom he became one of the protectors of. On the death of his father in Bengal in 1788, he inherited a large fortune, and was offered the governorship of Massachusetts and the collectorship of the port of Boston. He accepted the latter office, and in 1741 came to Boston with Sir William Phips, of Rehoboth, Mass. Frankland identified himself with King's Chapel under Roger Price, and contributed toward its support. While visiting Marblehead, which was authorized to erect a fortification for the defence of its harbor, Frankland became interested in a girl of about sixteen who was scrubbing the tavern floor. Although meanly clad, Agnes Surriage possessed great beauty and wit, and Frankland sought permission of her parents to have her educated. On the death of his uncle, Sir Thomas Frankland, in 1745, he became heir to the estate of 30,000 pounds, and in 1751 he bought a large estate in Hopkinton, Mass., where he built a fine mansion, and furnished it in costly style. The grounds were embellished with walks, fruit-trees, rare shrubbery, and hedges of box, which in 1802 had attained a height of ten feet. In 1752 he returned to Boston, where Lady Frankland left England for a continental tour. For some time he resided in Lisbon. On the morning of the great earthquake, 1 Nov., 1755, he attended high mass, and was buried under the ruins of the house of Francisco de Ribeiro, which fell as he rode past. He was rescued by Agnes Surriage, whom he shortly afterward married. He then returned to England, where, as Lady Frankland, Agnes was cordially received by his relatives. In 1756 he returned to Boston, where Lady Frankland was received into the best society of that city. Frankland bought the Clarke mansion in Garden court, but in 1757 resigned his office and obtained an appointment as consul-general in Portugal. In 1763 he visited Boston, and, after spending some time in his house at Hopkinton, went to Bath, England, where he resided till his death. The story of Lady Frankland has been verified by Oliver W. Holmes, and she is the heroine of "Agnes Surriage," a novel, by Edwin L. Byrner (Boston, 1887). See a "Memoir" by Elias Nason (Albany, 1866).

FRANKLIN, Benjamin, statesman and philosopher, b. in Boston, Mass., 17 Jan., 1706; d. in Philadelphia, Pa., 17 April, 1790. (See representation of birthplace on page 531.) His family had lived for at least three centuries in the parish of Eton, Oxfordshire, where old, now on the hold of about thirty acres. For several generations the head of the family seems to have been the village blacksmith, the eldest son being always bred to that business. Benjamin's grandfather. Thomas, born in 1598, removed late in life to Banbury, in Oxfordshire, where his eldest son, Thomas, remained on the estate at Eton. This Thomas received a good education, and became a scrivener. He came to be one of the most prominent men in his county, and formed a friendship with the Earl of Halifax. In mental characteristics he is said
to have borne a strong likeness to his immortal nephew. The second son, John, was a dyer of wool to make him a printer. He was his third son. Benjamin, for some time a silk-dyer in London, emigrated to Boston at an advanced age, and left descendants there. He took a great interest in politics, was fond of writing verses, and invented a system of short-hand. The fourth son, Josiah, born in 1674, the result of the marriage of the two Captains, married his brother John, at Banbury, and removed to New England in 1692. From the beginning of the Reformation the family had been zealous Protestants, and in Mary’s reign had incurred considerable danger on that account. Their inclination seems to have been at first Puritanish, but they remained in the Church of England until late in the reign of Charles II., when so many clergymen were dispossessed of their holdings for non-conformity, and proceeded to carry on religious services in conventicles, a law. Among these dispossessed clergymen in Northamptonshire were friends of Benjamin and Josiah, who became their warm adherents and attended their conventicles. The persecution of these non-conformists led to a small Puritan migration to New England, in 1683, in the ship called the Arab. Benjamin, where he followed the business of soap-boiler and tallow-chandler. He was twice married, the second time to the daughter of Peter Folger, one of the earliest settlers of New England, a man of some learning, a writer of political verses, and a zealous opponent of the measures of the king. By his first wife Josiah Franklin had seven children; by his second, ten, of whom the illustrious Benjamin was the youngest son. For five generations his direct ancestors had been youngest sons of youngest sons. As a child he showed such precocity that his brother first Puritan of setting up his printing-press was a complete stranger to him, and Benjamin was set to work in his father’s shop, cutting wicks and filling moulds for candles. This was so irksome to him that he began to show symptoms of a desire to run away and go to sea. To turn his mind from this, his father at length decided to send him to Harvard and educating him for the ministry; but the wants of his large family were so numerous that presently he felt that he could not afford the expense of this. At the age of ten, after little more than a year at the grammar-school, Benjamin was apprenticed to his father’s brother, and, becoming interested and proficient in the work, soon made himself very useful. He indulged his taste for reading, which often kept him up late into the night. Like so many other youthful readers, he counted Defoe and Bunyan among his favorites, but presently we find him studying Locke’s “Essay on the Human Understanding,” and the Port Royal logic. While practising himself in arithmetic and the elements of geometry, he was also striving to acquire a proficiency in music, and the study of some ballads and songs of the chap-book sort, and hawked them about the streets, sometimes with profit to his pocket. At the same time an inborn tendency toward free-thinking was strengthened by reading Shaftesbury and Collins, until some worthy people began to look askance at him and call him an infidel. In 1721 James Franklin began printing and publishing the “New England Courant,” the third newspaper that appeared in Boston, and the fourth in America. For this paper Benjamin wrote anonymous articles, and contributed to summing it up into its brother’s knowledge of their authorship; some of them attracted attention, and were attributed to various men of eminence in the colony. The newspaper was quite independent in its tone, and for a political article that gave offence to the colonial legislature, he was put in jail for a month, while Benjamin was duly admonished and threatened. Finding himself somewhat unpopular in Boston, and being harshly treated by his brother, whose violent temper he confesses to have sometimes provoked by his sauciness, Benjamin at length made up his mind to go to New York, and seek his fortune. He raised a little money by selling some of his books, and in October, 1728, set sail in a sloop for New York. Unable to find employment there as a printer, he set out for Philadelphia, crossing to Ambory in a small vessel, which was driven upon the coast of Long Island in a heavy gale. Narrowly escaping shipwreck, he at length reached Ambory in the crazy little craft, after thirty hours without food or drink, except a drop from a flask of what he called a "filthy rum." He then went to Boston, where he was taken in a row-boat to Philadelphia, landing there on a Sunday morning, cold, bedraggled, and friendless, with one Dutch dollar in his pocket. But he soon found employment in a printing-office, earned a little money, made a few friends, and took comfortable lodgings in the house of Mr. Read, with whose daughter Deborah he proceeded to fall in love. It was not long before his excellent training and rare good sense attracted the favorable notice of Sir William Keith, governor of Pennsylvania. The Patriotic and unskilful Keith wished to secure Franklin’s services, and offered to help set him up in business for himself and give him the government printing, such as it was. Franklin had now been seven months in Philadelphia, and, his family having at length heard of him, it was thought best that he should return to Boston and solicit aid from his father in setting up a press in Philadelphia. On reaching Boston he found his brother sullen and resentful, but his father received him kindly. He refused the design of an insatiable reader, and the few shillings that found their way into his hands were all laid out in books. His elder brother, James, had learned the printer’s trade, and in 1717 returned from England with a press, and established himself in business in Boston. In the following year Benjamin was apprenticed to his elder brother, and, becoming interested and proficient in the work, soon made himself very useful. He indulged his taste for reading, which often kept him up late into the night. Like so many other youthful readers, he counted Defoe and Bunyan among his favorites, but presently we find him studying Locke’s “Essay on the Human Understanding,” and the Port Royal logic. While practising himself in arithmetic and the elements of geometry, he was also striving to acquire a proficiency in music, and the study of some ballads and songs of the chap-book sort, and hawked them about the streets, sometimes with profit to his pocket. At the same time an inborn tendency toward free-thinking was strengthened by reading Shaftesbury and Collins, until some worthy people began to look askance at him and call him an infidel. In 1721 James Franklin began printing and publishing the “New England Courant,” the third newspaper that appeared in Boston, and the fourth in America. For this paper Benjamin wrote anonymous articles, and contributed to summing it up into its brother’s knowledge of their authorship; some of them attracted attention, and were attributed to various men of eminence in the colony. The newspaper was quite independent in its tone, and for a political article that gave offence to the colonial legislature, he was put in jail for a month, while Benjamin was duly admonished and threatened. Finding himself somewhat unpopular in Boston, and being harshly treated by his brother, whose violent temper he confesses to have sometimes provoked by his sauciness, Benjamin at length made up his mind to go to New York, and seek his fortune. He raised a little money by selling some of his books, and in October, 1728, set sail in a sloop for New York. Unable to find employment there as a printer, he set out for Philadelphia, crossing to Ambory in a small vessel, which was driven upon the coast of Long Island in a heavy gale. Narrowly escaping shipwreck, he at length reached Ambory in the crazy little craft, after thirty hours without food or drink, except a drop from a flask of what he called a "filthy rum." He then went to Boston, where he was taken in a row-boat to Philadelphia, landing there on a Sunday morning, cold, bedraggled, and friendless, with one Dutch dollar in his pocket. But he soon found employment in a printing-office, earned a little money, made a few friends, and took comfortable lodgings in the house of Mr. Read, with whose daughter Deborah he proceeded to fall in love. It was not long before his excellent training and rare good sense attracted the favorable notice of Sir William Keith, governor of Pennsylvania. The Patriotic and unskilful Keith wished to secure Franklin’s services, and offered to help set him up in business for himself and give him the government printing, such as it was. Franklin had now been seven months in Philadelphia, and, his family having at length heard of him, it was thought best that he should return to Boston and solicit aid from his father in setting up a press in Philadelphia. On reaching Boston he found his brother sullen and resentful, but his father received him kindly. He refused the design of an insatiable reader, and the few shillings that found their way into his hands were all laid out in books. His elder brother, James, had learned the printer’s trade, and in 1717 returned from England with a press, and established himself in business in Boston. In the following year Benjamin was apprenticed to his elder brother, and, becoming interested and proficient in the work, soon made himself very useful. He indulged his taste for reading, which often kept him up late into the night. Like so many other youthful readers, he counted Defoe and Bunyan among his favorites, but presently we find him studying Locke’s “Essay on the Human Understanding,” and the Port Royal logic. While practising himself in arithmetic and the elements of geometry, he was also striving to acquire a proficiency in music, and the study of some ballads and songs of the chap-book sort, and hawked them about the streets, sometimes with profit to his pocket. At the same time an inborn tendency toward free-thinking was strengthened by reading Shaftesbury and Collins, until some worthy people began to look askance at him and call him an infidel. In 1721 James Franklin began printing and publishing the “New England Courant,” the third newspaper that appeared in Boston,
quickly, but for a while he was carried away by the fascinations of a great city, and spent his money as fast as he earned it. In the course of his eighteen months in London he gained much knowledge of the world, and became acquainted with some distinguished persons, among others Dr. Samuel Johnson, Sir Hans Sloane, and he speaks of his "extreme desire" to meet Sir Isaac Newton, in which he was not gratified. In the autumn of 1726 he made his way back to Philadelphia, and after some further vicissitudes was at length (in 1729) established in business as a printer. He now became the partner of his brother James, and the "Pennsylvania Gazette," and soon made it so popular by his ably-written articles that it yielded him a comfortable income. During his absence in England, Miss Read, hearing nothing from him after his first letter, had supposed that he had grown tired of her. In her chagrin she married a worthless knave, who treated her cruelly, and soon ran away to the West Indies, where he died. Franklin found her overwhelmed with distress and mortification, for which he felt himself to be partly responsible. Their old affection speedily revived, and on 1 Sept., 1729, she was married. They lived most happily together until her death, 19 Dec., 1774.

As Franklin grew to maturity he became noted for his public spirit and an interest at once wide and keen in human affairs. Soon after his return from England, he established a debating society, called the "Junto," for the discussion of questions in morals, politics, and natural philosophy. Among the earliest members may be observed the name of the eminent mathematician, Thomas Godfrey, who soon afterward invented a quadrant similar to Hadley's. In many years Franklin was the life of this club, which in 1743 was developed into the American philosophical society. In 1742 he began publishing an almanac for the diffusion of useful information among the people. Published under the pen-name of "Richard Saunders," this entertaining collection of wit and wisdom, couched in quaint and pithy language, had an immense sale, and became famous throughout the world as "Poor Richard's Almanac." In 1731 Franklin founded the Philadelphia library. In 1743 he projected the university that a few years later was developed into the University of Pennsylvania, and was for a long time considered one of the foremost institutions of learning in this country.

From early youth Franklin was interested in scientific studies, and his name by and by became associated with a very useful domestic invention, and also with one of the most remarkable scientific discoveries of the 18th century. In 1742 he invented the "open stove, for the better warming of rooms," an invention that has not yet entirely fallen into disuse. Ten years later, by wonderfully simple experiments with a kite, he showed that lightning is a discharge of electricity; and in 1753 he received the Copley medal from the Royal society for this most brilliant and pregnant discovery.

A man so public-spirited as Franklin, and editor of a prominent newspaper besides, could not long remain without ambition. In 1751 he was made clerk of the assembly of Pennsylvania, and in 1757 postmaster of Philadelphia. Under his skilful management this town became the center of the whole postal system of the colonies, and in 1759 he was made deputy postmaster-general for the continent. Besides vastly increasing the efficiency of the postal service, he succeeded at the same time in making it profitable. In 1754 Franklin becomes a conspicuous figure in Continental politics. In that year the prospect of war with the French led several of the royal governors to call for a congress of all the colonies, to be held at Albany. The primary purpose of the meeting was to make sure of the friendship of the Six Nations, and to organize a general scheme of operations against the French. The secondary purpose was to prepare some plan of concerted action which all the colonies might be persuaded to adopt. Only the four New England colonies, with New York, Pennsylvania, and Maryland, sent commissioners to this congress. The people seem to have felt very little interest in the movement. Among the newspapers none seem to have foretold it warily except the "Pennsy

The plan contemplated the union of all the colonies under a single central government, under which each colony might preserve its local independence. The legislature of each colony was to choose, once in three years, representatives to attend a Federal grand council, which was to meet every year at Philadelphia, as the city most convenient of access from north and south alike. This grand council was to choose its own speaker, and could neither be dissolved nor prorogued except by its own consent, or by special order of the crown. The grand council was to make treaties with the Indians, and regulate trade with them; and it was to have sole power of legislation on all matters concerning the colonies as a whole. To these ends it could lay taxes, enlist soldiers, build forts, and nominate civil officers. Its laws were to be submitted to the king for approval; and the royal veto, in order to be effective, must be exercised within three years. To this grand council each colony was to send a number of representatives, proportioned to its contributions to the continental military service, the minimum number being two, the maximum seven. With the exception of such matters of general concern as were to be managed by the grand council, each colony was to retain its powers of legislation intact. In an emergency any colony might singly defend itself against foreign attack, and the Federal government was prohibited from impressing soldiers or seamen without the consent of the local legislature. The supreme executive power was to be vested in a president-general and council, to be paid by the crown. He was to have a veto on all the acts of the grand council, and was to nominate all military officers, subject to its approval. No money could be issued save by joint order of the governor-general and council. "This plan," said Franklin, "is not altogether to my mind; but it is as I could get it." To the credit of its great author, it should be observed that this scheme—long afterward known as the "Albany plan"—contemplated the formation of a self-sustaining Federal
government, and not of a mere league. It aimed at creating "a public authority as obligatory in its sphere as the local governments were in their spheres"; and in this respect it was much more complete than the assemblies of the Confederation under which the thirteen states contrived to live from 1781 till 1789. But public opinion was not yet ripe for the adoption of such bold and comprehensive ideas. After long debate, the Albany congress decided to adopt Franklin's plan, and copies of it were sent to the respective governments for consideration; but nowhere did it meet with popular approval. A town-meeting in Boston denounced it as "subversive of liberty;" Pennsylvania rejected it without a word of discussion; not one of the assemblies voted to adopt it. When sent over to England, to be inspected by the ministers of the crown, it only irritated and alarmed them. In England it was thought to give too much independence of action to the colonies; in America it was thought to give too little. The scheme was, moreover, impracticable, because the desire for union on the part of the several colonies was still extremely feeble; but it shows on the part of Franklin wonderful foresightfulness. If the Revolution had not occurred, we should probably have sooner or later come to live under a constitution resembling this one, and perhaps sooner had the Albany plan been put into operation, it might perhaps have so adjusted the relations of the colonies to the British government that the Revolution would not have occurred.

The only persons that favored Franklin's scheme were the men of sense and good will, who hoped it might be of service in raising money with which to "fight" the French. In such matters the local assemblies were extremely niggardly. At the beginning of the war in 1755, Franklin had been for some years the leading spirit in the assembly of Pennsylvania, which was engaged in a fierce dispute with the governor concerning the taxation of the proprietary estates. The governor contended that these should be exempt from taxation; the assembly insisted rightly that these estates should bear their due share of the public burdens. One and another disputed question the assembly was clearly in the wrong; it insisted upon issuing paper money, and against this pernicious folly governor fought with obstinate bravery. In 1755 the result of these furious contentions was that the assembly was unable to get any support except from the steadfast personal exertions of Franklin, who used his great influence with the farmers to obtain horses, wagons, and provisions, pledging his own property for their payment. Until the question of the proprietary estates should be settled, the operations of the war seemed likely to be paralyzed. In 1757 Franklin was sent over to England to plead the cause of the assembly before the privy council. This business kept him in England five years, in the course of which he became acquainted with the most eminent men in the country, and his discoveries and writings had won him a European reputation. Before he left England, in 1762, he received the degree of LL. D. from the universities of Oxford and Edinburgh. His arguments before the privy council were successful; the sorely vexed question was decided against the proprietary governors; and on his return to Pennsylvania in 1762 he received the formal thanks of the assembly. It was not long before his services were again required in England. In 1764 Grenville gave notice of his proposed stamp-act for defraying part of the expenses of the late war, and Franklin was sent to England as agent for Pennsylvania, and instructed to make every effort to prevent the passage of the stamp-act. He carried out his instructions ably and faithfully; but when the obnoxious law was passed in 1765, he counseled submission. The wisdom of this wisest of Americans proved inferior to the "collective wisdom" of his fellow-countrymen. Warned by the fierce resistance of the Americans, the new ministry of Lord Rockingham decided to reconsider the act. In an examination before the House of Commons, Franklin's sense and varied knowledge won general admiration, and contributed powerfully toward the repeal of the stamp-act. The danger was warded off but for a time, however. Next year Charles Townshend carried his measures for taxing American imports and applying the proceeds to the maintenance of a civil list in each of the colonies, to be responsible only to the British government. The need for Franklin's services as mediator was now so great that he was kept in England, and presently the colonies of Massachusetts, New Jersey, and Georgia chose him as agent. During these years he made many warm friendships with eminent men in England, as with Burke, Lord Shelburne, Lord Howe, David Hartley, and Dr. Priestley. His great powers were earnestly declared to be necessary to prevent any plans or other hazards, and the plans which the Albany plan had been put into operation, it might perhaps have so adjusted the relations of the colonies to the British government that the Revolution would not have occurred.

For several years a private and unofficial correspondence had been kept up between Hutchinson, Oliver, and other high officials in Massachusetts, on the one hand, and Thomas Whately, who had formerly been private secretary to George Grenville, on the other. The origin of the correspondence was due to the fact that he was supposed to be very familiar at once with colonial affairs and with the views and purposes of the king's friends. In these letters Hutchinson had a great deal to say about the weaknesses of the royal government in Massachusetts, and the need for a strong military force to support it; he condemned the conduct of Samuel Adams and the other popular leaders as seditious, and enlarged upon the turbulence of the people of Boston; he doubted if it were practicable for a colony removed by 3,000 miles of ocean to enjoy all the liberties of the mother country without severing its connection with her; and he had therefore reluctantly come to the conclusion that Massachusetts must submit to "an abridgment of what are called English liberties." Oliver, in addition to his own, noted that many judges and other crown officers should have fixed salaries assigned by the crown, so as to become independent of popular favor. There can be no doubt that such suggestions were made in perfect good faith, or that Hutchinson and Oliver had the true interests of Massachusetts at heart, according to their lamentably inadequate understanding of the matter. But to the people of Massachusetts, at that time, such suggestions could but seem little short of treasonable. Thomas Whately died in June, 1772, and all his papers passed into the custody of William, his brother and executor. In the follow-
ing December, before William Whately had opened or looked over the packet of letters from Hutchinson and his friends, it was found that the whole had been purloined by some person unknown. It is not certain that the letters had ever really passed into William Whately's hands. They may have been left lying in some place where they might have attracted the notice of some curious body, who, for his own peculiar and improper purposes, might have from time to time with great care and labor, the whole load of the correspondence of every reader in England or America who could afford sixpence for a political tract. On the other side of the Atlantic they aroused as much excitement as on this, and William Whately became concerned to know who could have purloined the letters, and how he could most effectively punish the author. The rulers of the country, and the Jesuits, and the Jesuits of the colony, Franklin felt it to be his duty to give information of the dangerous contents of the letters now laid before him. Although they purported to be merely a private and confidential correspondence, they were not otherwise than letters full of the most passionate aversion to the mother country, and her interests, and the defrauding of the people of America. As for the letter from the king's presbyter, it appears to have been composed of the warmest and most seditious invective against Franklin, whom he derided as a man of letters, calling him a "man of three letters," the Roman slang expression for f-u-r-r, a thief. Of the members of government the most loyalists, Lord North alone preserved decorum; the others took the lead, and the charges of the king's secret service minister. Franklin stood as unmoored as the moon at the baying of dogs. He could afford to disregard the sneers of a man like Weedburn, whom the king, though vain to use him as a tool, called the greatest knave in the realm. The Massachusetts petition was rejected; and the militant forces of the colonies were at last to be united in a political federation. Their purpose was to remove Hutchinson and Oliver from office. In January, 1774, the petition was duly brought before the privy council in the presence of a large and brilliant gathering of spectators. The solicitor-general, David Weedenburn, instead of discussing the question of policy, and of the necessity of the union of the colonies, set about with a certain amount of success and sanguinary invective against Franklin, whom he derided as a man of letters, calling him a "man of three letters," the Roman slang expression for f-u-r-r, a thief. Of the members of government present, Lord North alone preserved decorum. The others took the lead, and the king's secret service minister. Franklin stood as unmoored as the moon at the baying of dogs. He could afford to disregard the sneers of a man like Weedenburn, whom the king, though vain to use him as a tool, called the greatest knave in the realm. The Massachusetts petition was rejected; and the militant forces of the colonies were at last to be united in a political federation. The purpose was to remove Hutchinson and Oliver from office. In January, 1774, the petition was duly brought before the privy council in the presence of a large and brilliant gathering of spectators. The solicitor-general, David Weedenburn, instead of discussing the question of policy, and of the necessity of the union of the colonies, set about with a certain amount of success and sanguinary invective against Franklin, whom he derided as a man of letters, calling him a "man of three letters," the Roman slang expression for f-u-r-r, a thief. He could afford to disregard the sneers of a man like Weedenburn, whom the king, though vain to use him as a tool, called the greatest knave in the realm. The Massachusetts petition was rejected; and the militant forces of the colonies were at last to be united in a political federation. They are in error who think it was this personal insult that led Franklin to favor the revolt of the colonies, as they are also wrong who suppose that his object was to spring to the side of the Crown, which was the case with the other members of the Privy Council. The news of the Boston tea-party arriving in England about this time, led presently to the acts of April, 1774, for closing the port of Boston and remodelling the government of Massachusetts. The only way in which Massachusetts could escape these penalties was by indemnifying the East India company for the tea that had been destroyed; and Franklin, seeing that the attempt to enforce the new acts must almost inevitably lead to war, actually went so far as to advise Massachusetts to pay for the tea. Samuel Adams, on hearing of this, is said to have observed: "Franklin may be a good philosopher, but he is a bungling politician. Certainly in this instance Franklin showed himself to be a man of moderation and prudence, and the best of the people of Massachusetts. The moment had come when compromise was no longer possible. To have yielded now, in the face of the arrogant and tyrannical acts of April, would have been not only to stultify the heroic deeds of the patriots in the last December, but to submit to an act of submission and union of the colonies; it would virtually have surrendered them, bound hand and foot, to the tender
mercies of the king. That Franklin should have suggested such a step, in order to avoid precipitating a conflict, shows forcibly how anxious he was to keep the peace. He remained in England nearly a year longer, though many things were done by the king's party to make his stay unpleasant. During the autumn and winter he had many conversations with persons near the government, who were anxious to find out how the Americans might be conciliated without England's abandoning a single one of the wrong positions that she had taken. This was an insolv-
able problem, and when Franklin had become convinced of this he reluctantly gave it up and re-
turned to America, arriving in Philadelphia on 5 May, 1775, to find that the shedding of blood had just begun. On the next day the assembly of Pennsyl-

vania unanimously elected him delegate to the 2d Continental congress, then about to assemble. He now became a zealous supporter of the war, and presently of the Declaration of Independence. When congress, in July, decided to send one more petition to the king, he wrote a letter which David Hartley read aloud in the house of commons. "If you flatter yourselves," said Franklin, "with beating us into submission, you know neither the people nor the country. The congress is now the result of their last petition." A little more than two years afterward, in December, 1777, as parlia-
ment sat overwhelmed with chagrin at the tidings of Burgoyne's surrenders, Hartley pulled out this letter again and up-

braid the house with it. "You were then," said he, "impartial in having America under your feet, and despised every proposition rec-

ommending peace and lenient mea-

sures." When this unyielding temper had driven the Americans to de-

clare their independence of Great Britain, Franklin was one of the committee of five who, in paper may congress to draw up a document worthy of the occasion. To the document, as drafted by Jeffer-
son, he seems to have contributed only a few verbal emendations. The Declaration of Indepen-
dence made it necessary to seek foreign alliances, and first of all with England's great rival, France. Here Franklin's world-wide fame and his long ex-

perience of public life in England enabled him to play a part that would have been impossible for any other American. He had fifteen years of prac-
tice as an ambassador, and was thoroughly familiar with European politics. In his old days of edi-
torial work in Philadelphia, with his noble scholar-

ly habit of putting every moment to some good use, he had learned the French language, with Italian and Spanish also, besides getting some knowledge of Arabic. He was possessed of talismans for opening many a treasure-house, and among all the encyclopedist philosophers of Paris it would have been hard to point to a mind more encyclopaedic than his own. Negotiations with the French court had been begun already, through the agency of Arbuthnot, and in the autumn of 1776 Franklin was sent out to join with these gentlemen in securing the active aid and co-

operation of France in the war. His arrival, on 21 Dec., was the occasion of great excitement in the fashionable Paris. By thinkers like D'Alembert and Diderot he was regarded as the embodiment of practical wisdom. To many he seemed to sum up in himself the excellences of the Americans—justice, good sense, and moderation. It was Turgot that said of him, "Erupit exclo fulmen, et spectatrum tyrannorum." A word from liberty for which all France was yearning, he was greeted with a popular enthusiasm such as perhaps no Frenchman of letters except Voltaire has ever called forth. Shopkeepers rushed to their doors to catch a glimpse of him as he passed along the side-
twalk, while in evening salons he secured the applause of the court vied with one another in paying him homage. As the first fruits of his negotiations, the French government agreed to furnish two million livres a year, in quarterly installments, to aid the Ameri-
can cause. Arms and ammunition were sent over, and Americans were allowed to fit out privateers in French ports, and even to bring in and sell their prizes. Further than this France was not yet ready to go. She did not wish to incur the risk of war with England until an American alliance could seem to promise her some manifest advantage. This surreptitious aid continued till 1777, until the surrender of Burgoyne put a new face upon things. The immediate consequence of that great event was an attempt on the part of Lord North's government to change front, and offer concessions to the Americans, which, if they had ever been duly considered, might even at this late moment have ended in some compromise be-

tween England and the United States. Now, if ever, was the moment for France to interpose, and she seized it. On 6 Feb., 1778, the treaty was signed at Paris, which added to the flood of measures that were to carry on the war. As the Conti-

nental congress had no power to levy taxes, there were but three ways in which it could pay the ex-
penses of the army: (1) By requisitions upon the state governments; (2) by issuing its promissory notes, or so-called paper money; and (3) by foreign loans. The first method brought in money altogether too slowly; the second served its purpose for a short time, but by 1780 the continental notes had become worthless. The war of independence would have been an ignominious failure but for foreign loans, and these were made mostly by France and through the extraordinary sagacity and tact of Franklin. It is doubtful if any other man of that time could have succeeded in getting so much money from the French government, which found it no easy matter to pay its own debts and support an idle population of nobles and clergy upon taxes wrung from a groaning peasantry. During Franklin's stay in Paris the annual con-
tribution of 2,000,000 livres was at first increased to 8,000,000, and afterward, in 1781, to 4,000,000. Besides this, the annual sum sent over 9,000,000 as a free gift, and guar-
anteed the interest upon a loan of 10,000,000 to be raised in Holland. Franklin himself, just be-
fore sailing for France, had gathered together all the cash he could command for the moment, be-

beyond what was necessary, and the amounting to nearly £4,000, and put it into the United States treasury as a loan.
On the fall of Lord North's ministry in March, 1782, Franklin sent a letter to his friend, Lord Shelburne, indicating a hope that peace might soon be made. When the letter reached London, the new ministry, in which Shelburne was secretary of state for home and colonies, had already been formed, and Shelburne, with the consent of the cabinet, acted by sending an agent to talk with Franklin informally, and ascertain the terms upon which the Americans would make peace. The person chosen for this purpose was Richard Oswald, a Scottish merchant of frank disposition and liberal views. In April there were several conversations between Oswald and Franklin, in one of which the latter suggested that, in order to make a durable peace, it was desirable to remove all occasion for future quarrel; that the line of frontier between New York and Canada was inhabited by a lawless set of men, who in time of peace would be a barrier between their respective governments; and that therefore it would be well for England to cede Canada to the United States. A similar reasoning would apply to Nova Scotia. By ceding these countries to the United States, it would be possible, from the safety of those parts, to expel the Indians, whom the Americans for all losses of private property during the war, and also to make reparations to the Tories whose estates had been confiscated. By pursuing such a policy, England, which had made war on America unjustly, and had wantonly done it great injury, would strive not merely to pacify, but to reconcile America with America, and reconcile, said Franklin, is "a sweet word." This was a very bold tone for Franklin to take; but he knew that almost every member of the Whig ministry had publicly and privately expressed the opinion that America was unjust and wanton; and being, moreover, a shrewd hand at a bargain, he began by setting his terms high. Oswald seems to have been convinced by Franklin's reasoning, and expressed neither surprise nor reluctance at the idea of ceding Canada. The main points of the conversation were noted upon a sheet of paper, which Franklin allowed Oswald to take to London and show to Lord Shelburne, first writing upon it an express declaration of its informal character. On receiving this memorandum, Shelburne did not shelve it, but coolly, and with a cold front, returned without any immediate answer, after keeping it only one night. Oswald was presently sent back to Paris, empowered as commissioner to negotiate with Franklin, and carried Shelburne's answer to the memorandum that desired the cession of Canada for three reasons. The answer was terse: "1. By way of reparation.—Answer: No reparations can be heard of. 2. To prevent future wars.—Answer: It is to be hoped that some more friendly method will be found. 3. As a fund of indemnification to loyalists.—Answer: No independence to be acknowledged without their being taken care of." Besides, added Shelburne, the Americans would be expected to make some compensation for the surrender of Charleston, Savannah, and the city of New York, still held by British troops. Franklin did not say that the cabinet, but rather the ministry itself, had rejected the proposals, as well as the offers. Franklin knew how to begin by asking more than he was likely to get. England was no more likely to listen to a proposal for ceding Canada than the Americans were to listen to the suggestion of compensating the British for surrendering New York. But there can be little doubt that the bold stand thus taken by Franklin at the outset, together with the influence he acquired over Oswald, contributed materially to the brilliant success of the American negotiations. This is the more important to be noted in connection with the biography of Franklin, since so much of the initiative passed almost entirely out of his hands, and into those of his colleagues, Jay and Adams. The form that the treaty took was mainly the work of these younger statesmen; the services of Franklin were chiefly in the beginning, and, again, to some extent, at the end. There were grave difficulties in making a treaty. The first was, that France was really hostile to the American claims. She wished to see the country between the Alleghenies and the Mississippi divided between England and Spain; England to have the region north of the Ohio, and the region south of it to remain an Indian territory under the protectorate of Spain, except a narrow strip on the western slope of the Alleghenies, over which the United States might exercise protectorship. In other words, France wished England to cede the United States to the east of the Alleghenies, and forever prevent their expansion westward. France also wished to exclude the Americans from all share in the fisheries, in order to prevent the United States from becoming a great naval power. As France, up to a certain point, were concerned in the war, her interests made the negotiation extremely difficult. The second difficulty was the unwillingness of the British government to acknowledge the independence of the United States as a condition that must precede all negotiation. The Americans insisted upon this point, as they had insisted ever since the Staten Island conference in 1776; but England wished to withhold the recognition long enough to bargain with it in making the treaty. This difficulty was enhanced by the fact that, if this point were conceded, the war would cease, the conduct of the treaty from the colonial secretary, Shelburne, to the foreign secretary, Fox: and these two gentlemen not only differed widely in their views of the situation, but were personally bitter enemies. Presently Fox heard of the private memorandum that Shelburne had received from Franklin but had not shown to the cabinet, and, he concluded, quite wrongly, that Shelburne was playing a secret part for purposes of his own. Accordingly, Fox made up his mind at all events to get the American negotiations transferred to his own department. In September, he moved in the cabinet that the independence of the United States should be unconditionally acknowledged, so that England might treat with a foreign power. The motion was lost, and Fox prepared to resign his office; but the very next day the death of Lord Rockingham broke up the ministry. Lord Shelburne now became prime minister, and other circumstances occurred which simplified the problem. In April the French fleet in the West Indies had been annihilated by Rodney; in September this was followed by the total defeat of the combined French and Spanish forces at Gibraltar. This altered the situation seriously. England, though defeated in America, was victorious as regarded France and Spain. The avowed object for which France had entered into alliance with the Spanish, as well as with the United States, was now substantially gained. The chief object for which Spain had entered into alliance with France was to drive the English from Gibraltar; but now there was little hope of accomplishing this, except by some fortunate bargain in the treaty. Vergennes now tried to sat-
FRANKLIN

isfy Spain at the expense of the United States, and he sent a secret emissary under an assumed name to Lord Shelburne, to develop his plan for dividing the Mississippi valley between England and Spain. In this, his design, he was not unsuccessful, nor was he counteracted by sending a messenger of his own to Shelburne, who thus perceived the antagonism that had arisen between the allies. It now became manifestly for the advantage of England and the United States to carry on their negotiations without the intervention of France, as England preferred to make concessions to the Americans rather than to the house of Bourbon. By first detaching the United States from the alliance, she could proceed to browbeat France and Spain. There was an obstacle in the way of a separate negotiation. The chevalier Luzerne, the French minister at Philadelphia, had been busy with congress, and that body had sent instructions to its commissioners at Paris to be guided in all things by the wishes of the French court. Jay and Adams, overruling Franklin, took the responsibility of disregarding these instructions; and the provisions of the treaty, so marvellously favorable to the Americans, were arranged by a separate negotiation with England. In the arrangement of the provisions, Franklin played an important part, especially in driving the British army out from the states that had yielded to the compromise of conciliation. In the end, the treaty was signed by Jay, who counteracted the remonstrance of the loyalists. After a long struggle upon this point, Franklin observed that, if the loyalists were to be indemnified, it would be necessary also to reckon up the damage they had done in burning villages and shipping, and then strike a balance between the two accounts; and he gravely suggested that a special commission might be appointed for this purpose. It was now getting late in the autumn, and Shelburne felt it to be a political necessity to bring the negotiations to a head before the session of the parliament. At the prospect of endless discussion, which Franklin’s suggestion involved, the British commissioners gave way and accepted the American terms. Affairs having reached this point, it remained for Franklin to lay the matter before Vergennes in such wise as to avoid a rupture with the cordial relations between America and France. It was a delicate matter, for, in dealing separately with the English government, the Americans laid themselves open to the charge of having committed a breach of diplomatic courtesy; but Franklin managed it with entire success.

On the part of the Americans the treaty of 1783 was one of the most brilliant triumphs in the whole history of modern diplomacy. Had the affair been managed by men of ordinary ability, the greatest results of the Revolutionary war would probably have been lost; the new republic would have been cooped up between the Atlantic and the Alleghenies; our westward expansion would have been impossible without further warfare; and the formation of our Federal union would doubtless have been effectively hindered or prevented. To the grand triumph the varied talents of Franklin, Adams, and Jay alike contributed. To the latter is due the credit of detecting and baffling the sinister designs of France; but without the tact of Franklin this probably could not have been accomplished without offending France in such wise as to spoil everything.

Franklin’s last diplomatic achievement was the negotiation of a treaty with Prussia, in which was inserted an article looking toward the abolition of privateering. This treaty, as Washington observed at the time, was the most liberal that had ever been made between independent powers, and marked a new era in international morality. In September, 1785, Franklin returned to America, and in the next month was chosen president of Pennsylvania. He was re-elected in 1786 and 1787. In the summer of the latter year he was a delegate to the immortal convention that framed the constitution of the United States. He took a comparatively small part in the debates, but some of his suggestions were very timely, as when he seconded the Connecticut compromise. At the close of the proceedings he made a short speech, in which he said: “I consent to this constitution, because I expect no better, and because I am not sure that it is not the best.” His last public act was the signing of a memorial addressed to congress by an anti-slavery society of which he was president. This petition, which was presented on 12 Feb., 1790, asked for the abolition of the slave-trade, and for the emancipation of slaves. The southern members of congress were very indignant, and Mr. Jackson, of Georgia, undertook to prove, with the aid of texts from Scripture, the sacredness of the institution of slavery. On 28 March, Franklin wrote an answer, which was published in the “National Gazette.” It was an ingenious parody of Jackson’s speech, put into the mouth of a member of the “divan of Algiers,” and fortified by texts from the Koran. This characteristic patriotic article, one of the most amusing he ever published, was written within four weeks of his death.

The abilities of Franklin were so vast and so various, he touched human life at so many points, that it would require an elaborate essay to characterize him properly. He was at once philosopher, statesman, diplomatist, scientific discoverer, inventor, philanthropist, moralist, and wit, while as a writer of English he was surpassed by few men of his time. History presents few examples of a career starting from such humble beginnings and attaining to such great and enduring splendor. The career of a Napoleon, for example, in comparison with Franklin’s, seems vulgar and trivial. The ceaseless industry of Franklin throughout his long life was guided to an extraordinary degree by the clear light of reason, and inspired by a warm and enthusiastic desire for the improvement of mankind. He is in many respects the greatest of Americans, and one of the greatest men whose names are recorded in history. In accordance with his wishes, Franklin’s remains were deposited beside those of his wife and daughter, in the yard of Christ church, at the corner of 5th and Arch streets, Philadelphia, under a plain marble stone inscribed “Benjamin and Deborah Franklin.” (See accompanying illustration.) In early life he had
Franklin

written a fanciful epitaph for himself, which was published in the "New England Courant," and has become famous: "The body of Benjamin Franklin the 17th of December 1790, his coffin and tent burnt out, and stripped of its lettering and gilding, lies here, food for worms. But the work shall not be lost; for it will, as he believed, appear once more in a new and more elegant edition, reworked and corrected by the Author." Frank was a charming exponent of the almanac, covering the earlier part of his life down to his arrival in London in 1757. The best edition is the one edited by John Bigelow (Philadelphia, 1866). His works were edited by Jared Sparks (10 vols., Boston, 1850). In 1883 a large mass of unedited manuscripts, by Franklin or relating to him, collected by the late Henry Stevens, of Vermont, for a long time a resident in London, was purchased by the government. A new edition of Franklin's complete works, edited by John Bigelow and containing much new material obtained from the Stevens manuscripts, is now in course of publication (10 vols., New York, 1887). See Condorcet's "Éloge de Franklin" (Paris, 1790): Baurer's "Washington und Franklin" (Berlin, 1803-6); Schmaltz's "Leben Ben Franklin's" (Leipzig, 1849); Parton's "Life and Times of Benjamin Franklin" (New York, 1843); Mignet's "Vie de Franklin" (Paris, 1875); and Hale's "Franklin in France" (Boston, 1887).

Franklin, Jesse, statesman, b. in Orange county, Va., 24 March, 1770; d. in Surry county, N. C., in September, 1823. His father removed to North Carolina just before the Revolution, Jesse served as major in the Revolutionary war, was a member of the house of delegates of North Carolina in 1794, 1797, and 1798, and a member of the state senate in 1803-6, a member of congress from 2 Dec., 1795, till 3 March, 1797, U. S. senator from 4 March, 1797, till 3 March, 1813, and again from 4 March, 1807, till 3 March, 1813, acting a part of the time as president pro tempore of the senate. In 1816 he was appointed by the president a commissioner to treat with the Chickasaw Indians, and in 1820 he was elected governor of North Carolina.

Franklin, John, physician, b. in New Haven, Conn., 28 Sept., 1749; d. in Athens, Pa., 1 March, 1831. He removed to the Wyoming valley in 1775, settled in Huntsville, and was an active participant in the settlement of that region. During the Revolution he was a member of a regiment of Connecticut militia, was with his company in the Sullivan campaign, and was severely wounded in the shoulder at the battle or skirmish at Chemung. He was a justice of the peace, colonel of militia, and several times member of assembly. He was an active, energetic, and resolute man, with talents of a high order, much beloved and confided in by the people. He and Col. Jenkins stood side by side in their resistance to the encroachments of the "Pennimutes" upon their rights and privileges, and for thirty years sustained the merits of the cause. Franklin was a leading citizen and suffered the privations and the state who were led by Alexander Patterson, Gen. John Armstrong, and Col. Timothy Pickering. Franklin was kidnapped by Pickering with a band of frontier roughs, 2 Oct., 1787, taken to Pennsylvania, imprisoned, loaded with irons, and detained four months without trial.

Franklin, Sir John, English explorer, b. at Spilsby, Lincolnshire, 16 April, 1790; d. in the arctic regions, near lat. 69° 57' N., long. 99° 4' W., 11 June, 1847. He was destined for the church, but his father yielded to the boy's desire to become a sailor, and procured him admission to the navy as a midshipman at the age of fourteen. He first

served on board the "Polyphemus," and was at the battle of Copenhagen, 2 April, 1801. Two months later he joined the "Investigator," and was commissioned as the 1st officer. He explored the coast of Baffin, and map the coasts of Australia. After nearly two years spent in this service, he sailed for home in the ship-ship "Porpoise"; but that vessel was wrecked, 18 Aug., 1803, on a reef about 200 miles from the coast of Australia, where Franklin and his companions remained for fifty days. They were rescued and carried to England, where he joined the ship-of-the-line "Bellerophon," and in 1805 took part in the battle of Trafalgar. He served as 2d lieutenant in the "Bedford" on the coast of the United States during the war of 1812-15, and commanded the boats of the "Bedford" in June, with the U.S. gun-boats at New Orleans, one of which he boarded and captured. He was wounded in this engagement, and for his gallantry was made a 1st lieutenant. In 1818, the British government having fitted out an expedition to attempt the passage to India by crossing the polar sea to the north of Spitzbergen, Franklin was appointed to the command of the "Trent," one of the two vessels of the expedition, the other, the "Dorothea," being commanded by Capt. Buchan. After passing lat. 76° 20' N. the "Trent" (28 March, 1818) drifted from the ice that her immediate return to England was decided on. Franklin begged to be permitted to continue the voyage with the "Trent" alone, but Capt. Buchan would not consent, his vessel being almost in a sinking condition. In 1819 he was appointed by the command of the government to explore overland from Hudson's bay to the Arctic ocean, through Rupert's Land, and explore the coast of America eastward from the Coppermine river, while Lieut. Parry was despatched with two vessels to Lancaster sound. The expedition wintered the first year on the Coppermine river, and was fed by the Hudson's bay company; the second winter was spent on the "barren grounds," the party subsisting on game and fish procured by their own exertions, or purchased from their native neighbors. In the following summer the expedition descended the Great Slave river, in which he explored a considerable extent of the sea-coast to the eastward. Franklin returned to England in 1822. Shortly after his arrival he was made a post-captain, and elected a fellow of the Royal society. In 1825 he undertook in the "Porpoise" an expedition to the northland to the mouth of the Mackenzie river, and thence by sea to the northwest extremity of America, with the combined object also of surveying the coast between the Mackenzie and Coppermine rivers. The proposition was accepted, and he was appointed to superintend the expedition. He embarked at Liverpool, 16 Feb., 1825, descended the Mackenzie river, and traced the coast-line through thirty-seven degrees of longitude, from the mouth of the Coppermine river, where his former survey began, to the 156th meridian, and approached within 100 miles northwest of the mouth of the Smoome river by Capt. Beechy, who was co-operating with him from Behring's straits. (See Beechey, Frederick William.) In 1829 he was knighted, and received the degree of D.C.L. from Oxford university, and the gold medal of the geographical society of London. His next official employment was on the Mediterranean stations in 1830, in command of the "Rainbow." In 1836 he was made governor of Tasmaja, in which office he continued till 1843. He was a very popular governor, and originated and carried out many measures of importance to the colony. In 1845 he was appointed to the command of a new expedition to discover the north-
west passage. The ships chosen were the "Erebus" and "Terror," which were fitted out in the strongest and most complete manner, and manned by picked crews, amounting, officers and men, to 188 persons, with a transport-ship to convey additional stores as far as Disco in Greenland. They sailed from Sheerness, 19 May, 1845. Franklin's only child, Caroline, was on board the last seen by a whaler in Baffin bay, 26 July, 1845, and passed his first winter in a cove between Cape Riley and Beechey Island. In 1848, no tidings of the expedition having reached England, the anxiety of the public led to the fitting out of several expeditions in search of him. Between 1848 and 1854 about fifteen expeditions were sent out by England and America in the hope of rescuing, or at least finding traces of, the missing explorers. In 1854, Dr. Rae, in conducting an exploring party of the Hudson's bay company, found some relics of the party. After long and persevering search on the part of Lady Franklin, of the British government, and of private explorers, the mystery was finally solved by the expedition of McClintock in 1859, sent out by Lady Franklin in 1857. He discovered, on the shore of King William's Land, a record deposited in 1851, by the crew of the Erebus, dated 25 April, 1848, saying that Sir John died 11 June, 1847; that the ships were abandoned 22 April, 1848, when the survivors, 105 in number, set out for Great Fish river. Many relics were found of this party, who perished, one by one, on their southward journey, after leaving the vessel. Further intelligence was gained by the Stewart expedition in 1854, which found shoes, cooking utensils, etc., among the Esquimaux, bearing the Franklin mark. The natives declared that the party died on the coast of Baffin Island, a说法 soothed the honor of being the first to discover a northwest passage, and this is awarded him in the inscription on the monument erected to him in Waterloo place, London, in 1860. He attained the rank of rear-admiral. See Capt. F. L. McClintock, "Narrative of a Journey in search of Sir John Franklin" (London and Boston, 1860); Capt. S. Osborn, "The Career, Last Voyage, and Fate of Sir John Franklin" (London, 1860); also the works of Kane, Richardson, and Inglefield. The titles of the works published by Sir John are "Captain John Franklin's Narrative of a Journey in the North Shores of the Polar Sea, 1819-22," with an Appendix on various Subjects relating to Science and Natural History" (London, 1825); and "Captain John Franklin's Narrative of a Second Expedition to the Shores of the Polar Sea, 1825-7" (Philadelphia, 1826, and London, 1826).

FRANKLIN, Thomas Levering, clergyman, b. in Philadelphia, Pa., 10 April, 1822. After his graduation at Trinity, in 1841, he was ordained deacon by Bishop Meade, in Alexandria, Va., in 1844, and priest in Camden, N. J. In the following years he was Trinity church, Moorestown, N. J.; St. Ann's, Amsterdam, N. Y.; St. John's, Mount Morris, N. Y.; Christ church, Madison, Ind.; and the Church of the Evangelists, Philadelphia, where he still remains (1887). He has been schoolmaster of D. D. from 1871, and built churches and rectories. He founded the Jane Grey School, Mount Morris, N. Y., in 1866, and was its rector till 1870. For six years he edited the "Episcopal Register," and he has contributed to religious and secular journals. He received the degrees of H. D. from H. P. of Paris, 1839.

FRANKLIN, William, the last royal governor of New Jersey, b. in Philadelphia in 1729; d. in England, 17 Nov., 1818. He was an illegitimate son of Dr. Benjamin Franklin. About a year after his birth his father married, took the child into his house, and brought him up as a son. In youth he was remarkably fond of books, and of an adventurous disposition. During the French war of 1744-8 he obtained a commission in the Pennsylvania forces, with which he served in one or two campaigns on the Ohio. In 1752 he was called to be captain before he was of age, gaining praise for his conduct at Ticonderoga. From 1754 till 1756 he was comptroller of the general post-office, and during part of that period was clerk of the provincial assembly. In 1757 he accompanied his father to London, where he was admitted to the bar in 1758. He then visited Scotland, and became acquainted with the Earl of Bute, who recommended him to Lord Fairfax, and the latter secured for him, unsolicited, the appointment of governor of New Jersey in 1759, to which province he returned the next year, in which he caused great disgust, probably from his birth as well as his time-serving conduct and courtier-like propensities, as he had been originally a Whig, but became a Tory on being made governor. In the revolutionary contest he remained loyal to Great Britain, and some of his written expressions of Tory sentiments, having been intercepted, a guard was put over him in January, 1776, by the new government, to prevent his escape from Perth Amboy, and he was declared an enemy to his country. He gave his parole that he would not leave the province, but in June he issued a proclamation, as governor of New Jersey, summoning a meeting of the abrogated legislative assembly. For this he was arrested by order of the provincial congress of New Jersey and removed to Burlington. In an effort to escape from New Jersey, Dr. Franklin bequeathed to New Jersey lands in Nova Scotia, and released him from all debts that his executors might find to be due from him, and added this clause in his will: "The part he acted against me in the late war, which is of public notoriety, will account for my leaving him no more of this estate he endeavored to deprive me of." He was the author of "A Humble Attempt at Scurility, in Imitation of those Great Masters of the Art, the Rev. Dr. S—th, the Rev. Dr. Al—n, the Rev. Mr. Ew—n, the Rev. Dr. D. D.—e, and the hero J—n D—n, Esq., being a Full Answer to the Observations on Mr. H's Advertisement." By Jack Retort, Student in Scurility. Quisivis, 1765. A defence of Dr. Franklin, by his son. Printed at Philadelphia. The initials in the title severely criticized Franklin's works (London and Philadelphia, 1816-19).

FRANKLIN, William Buel, soldier, b. in York, Pa., 27 Feb., 1823. He was graduated at
the U. S. military academy in 1843 at the head of his class, among the members of which were Ulysses S. Grant, Christopher C. Augur, and James A. Hardie. He served in the topographical engineers until the outbreak of the civil war, the dates of his various commissions being as follows: 2d lieutenant, 21 Sept., 1848; 1st lieutenant, 16 March, 1849; and captain, 1 July, 1857. He was brevetted 1st lieutenant, 23 Feb., 1847, for gallantry at the battle of Buena Vista. In the Mexican war he was attached to the staff of Gen. Taylor as a topographical engineer, was engaged in making reconnaissances, and carried Taylor's dispatches. At the battle of Buena Vista he was wounded. His other service prior to 1861 was such as ordinarily falls to an engineer officer. He was engaged in surveys on the western plains and mountains, as assistant professor at West Point, as engineer-secretary of the light-house board, and in charge of the construction of lighthouses and public buildings. At the beginning of the civil war he was stationed in Washington in charge of the construction of the capitol, the treasury department, and the general post-office. He was appointed colonel of the 12th Infantry, 14 May, 1861, brigadier-general of volunteers, 17 May, 1861, and major-general of volunteers, 4 July, 1862. He received the brevet of brigadier-general in the regular army, 30 June, 1862, for his gallant conduct in the battles before Richmond, and chief of the department of the James, 13 March, 1863, for services during the rebellion. His first active service was at Bull Run, where he commanded a brigade in Heintzelman's division, and was engaged in the heaviest part of the battle, around the Henry house. On the organization of the Army of the Potomac he repelled a division re-enforcement, and, when the 6th army corps was formed, he was placed in its command, retaining it throughout the year 1862. He was in most of the battles on the peninsula—Yorktown, West Point, White Oak Bridge, Savage's Station, Malvern Hill, and Harrison's Landing. After his return to Maryland with the army, he was in command on the field of Crampton's Gap, South Mountain, 14 Sept., 1862, and was engaged in the battle of Antietam, 17 Sept., 1862. At the battle of Fredericksburg, 13 Dec., 1862, he commanded the left grand division, consisting of his own corps, the 6th, under William F. Smith, and the 1st corps, under John F. Reynolds. (See Burnside.) Gen. Burnside complained to the committee on the conduct of the war that Franklin did not obey his orders in this battle, and the latter was charged by the committee with insubordination, and the failure of the president to approve the order of removal led to Burnside's resignation of his command. After being on waiting orders for several months, Gen. Franklin was returned to active service in the winter of 1862, and early in the spring of 1863, was assigned to the command of the 19th army corps. He took part in the Red river expedition of 1864, and was wounded in the battle of Sabine Cross-Roads, 8 April, 1864. He was obliged to leave the army on account of illness, 29 April, 1864, and remained on leave of absence till 2 Dec., when he was assigned to duty on a retiring board at Wilmington, Del. During his leave he was captured by Confederate raiders while he was riding on the Philadelphia and Baltimore rail road, and escaped from them on the following night. He resigned, 15 March, 1866, and since has been engaged as vice-president of the Colt's fire-arms company at Hartford, Conn., and in various other manufacturing enterprises. He has had charge of the construction of the new lighthouse on the Battle of Buena Vista. He was commissioned collector at the Centennial exposition of 1876, presidential election in 1876, adjutant-general of Connecticut in 1877 and 1878, and president of the board of managers of the National home for disabled soldiers in 1880—7. He has contributed various articles to the American encyclopedia and to periodical literature on military subjects.—His brother, Samuel Rhoads, naval officer, b. in York, Pa., 25 Aug., 1855, was appointed midshipman, 18 Feb., 1841, attached to the frigate "Cumberland" of the Pacific squadron, in 1844—5, and to the frigate "United States," and store-ships of the Pacific, in 1845—7. He was present at the demonstration on Monterey during the Mexican war, promoted to passed midshipman, 10 Aug., 1847, and assigned to duty on the "Independence," of the Mediterranean squadron for 1849—2, and to the coast survey, 1853—5. He was commissioned master, 18 April, 1855, and lieutenant, 14 Sept. following, served in the naval academy in 1853—6, on the sloop "Falmouth" of the Brazil squadron, in 1857—9, on the "Macedonian" in 1859—60, and on the steam sloop of the Mediterranean squadron for 1860—2. He was a volunteer on board the "Roanoke" in the action with the "Merrimac" in March, 1862, in which the "Congress" and the "Cumberland" were destroyed. He became executive officer of the "Roanoke," and engaged with the forts at Sewell point, but was not elected, and did not get fairly into action. He was commissioned lieutenant-commander, 16 July, 1862, commanded the "Aroostook," of the James river flotilla, in 1862, the "Aroostook," of the western Gulf blockade-squadron, in 1863, and on special duty in the Pacific, 1864. He was assigned to the operations in Mobile bay in the spring of 1865 he was on the staff of acting rear-admiral Thatcher, and was the naval representative in the demand for the surrender of the city of Mobile. He was made commander, 28 Sept., 1866, and given the steamer "Saginaw," of the north Pacific squadron, in 1866—7, on ordnance duty at Mare Island, Cal., in 1868—9, was advanced to the grade of captain, 13 Aug., 1872, and commanded the "Wabash" and afterward the "Franklin" until transferred to duty as hydrographer to the bureau of navigation at Washington, D. C. He was promoted to commandore, 15 Dec., 1880, assigned to special duty in the bureau of equipment department, and became president of the board of examiners, 16 June, 1883. He received the appointment of rear-admiral, 24 Jan., 1885, was assigned to the bureau of equipment, and became command-ant of the naval observatory, and in 1886 became command-ant of the European station. In August, 1887, he will be of legal age to be retired.
he remained twelve years. He was then appointed principal of the Normal school by the government of Illinois, and became principal of the eight teachers under his control. He filled this post for two years, and did much to advance popular education. He was compelled to resign it through ill health, and, with the consent of his bishop, he sailed for the United States in the following year. Shortly after landing in New York, he rented a house on Warren and Hicks streets. In the following year the parish of St. Peters was founded, and a large church erected with a congregation of 2,000, which number his ministry has increased to 17,000, thus forming the largest parish in the diocese of Brooklyn. In 1886, at a cost of over $30,000, he built the academy that adjoins St. Peter's church, in which about 2,000 children receive free instruction. During the war he established a home for orphans, and afterward erected St. Peter's hospital. In 1878 he purchased, at a cost of $80,000, the remainder of the block on which St. Peter's church stands, and all the buildings on it were devoted to charitable purposes. He is now (1887) about to erect on this block a hospital costing $200,000. He afterward secured possession of the chapel of the Church of the Pilgrims, and, after completely remodelling it and building additions, converted it into a library, school, and kindergartens.

FRASER, Charles, artist, b. in Charleston, S.C., Feb. 16, 1824; d. Aug. 13, 1860. In his youth he made sketches of the scenery about Charleston. He studied law, and three years later began the study of art, but was discouraged and resumed his legal studies. He was admitted to the bar in 1857, and retired from practice in 1861 with a competency. He devoted much attention to miniature painting, in which he was successful. He was familiar with Lafayette, and subsequently a great many citizens of South Carolina. He painted many landscapes and genre pictures. His works were exhibited in Charleston. For a short time he resided in Boston. He contributed to various periodicals, published addresses, and "Reminiscences of Charleston.

FRASER, Christopher Finlay, Canadian soldier. b. at Brockville, Ont., Oct. 10, 1839. Early in life he was apprenticed to a printer, but began the study of law in 1859, and was called to the bar of Upper Canada in 1863. He was first elected to the legislative assembly of Ontario for South Grenville in 1872, but was unseated on petition. He was re-elected for the same constituency in October, 1872, re-elected in 1875, represented Brockville in 1879, and again in 1888. He was appointed a member of the provincial executive council in November, 1873, and was provincial secretary and registrar from that date till April, 1874; he was then appointed commissioner of public works, which office he has since retained. Mr. Fraser was instrumental in organizing the Ontario Roman Catholic league for political purposes, and has been ever since regarded as the political director of his co-religionists in that province. He is a member of the executive committee of the Roman Catholic literary society of Brockville, and one of the directors of the Ontario bank.

FRASER, Simon, British soldier, b. in 1729: d. in Saratoga, N.Y., 7 Oct., 1777. He was the youngest son of Alexander Fraser, of Balwain, near Glendevon, in the gentry, by his wife, daughter of Angus Mackintosh, of Killachy, from whom the celebrated Sir James Macintosh was directly descended. He entered the army at an early age, became lieutenant of the 78th foot, 5 Jan., 1757, and captain, 22 April, 1763; he was major, 8 Feb., 1762, and lieutenant-colonel, 14 July, 1768. He served with distinction in Holland and Germany, was in the expedition against Louisburg, and accompanied Gen. Wolfe to Quebec. He was chief engineer of the 24th regiment, 5 April, 1776, arriving at Quebec on 26 May. Soon after his arrival in Canada he was appointed by Carleton, 10 June, 1776, a brigadier-general for America only. His last commission was that of colonel in the army, his appointment being gazetted 22 July, 1777. He assisted in driving the Americans out of Canada in 1776, and was in command in the severely contested action at Three Rivers. Having acquired a high reputation for judgment and cool daring, he was selected by Burgoyne to command the light brigade, which formed the right wing of the British army. He thus was constantly in the advance, rendering most efficient service, and, had his advice been followed, the blunder of advancing on Bennington with heavy mounted German dragoons, on an expedition in which he had in power to direct the greatest celerity of movement, would never have been committed. After the evacuation of Ticonderoga he pursued the retreating Americans under St. Clair, and, assisted by his German ally, Gen. Riedesel, gained a signal victory at Saratoga, 7 July, 1777. He opened the battle of 19 Sept. by engaging Morgan's skirmishers, and in the action of 7 Oct. was shot and mortally wounded by "Tim Murphy," one of Morgan's riflemen, in obedience to special instructions from that officer. During the succeeding night he was tenderly ministered to by the Baroness Klock, and, after being conveyed to Fort Edward, he died on the 9th. He was buried at sun-
FRASER

Hepburn. The statement that the remains of Gen. Fraser were removed to England after the Revolu-

cional war is without foundation.

FRAZER, William, Canadian R. C. bishop, b. in Scotland about 1790; d. in Antigonish, Nova Sco-
tia, 4 Oct., 1857. He was consecrated vicar-
apostolic of Nova Scotia in 1831, with the title of bishop. He devoted himself exclusively to the
Scottish members of his flock, rarely stirring from
the Scottish settlement of Antigonish, in the
northern part of the peninsula. The Irish Catholics
complained bitterly of their bishop, and reproached
him with taking no interest in them. Finally they
laid their complaints before the pope, who erected
Halifax into a bishopric with the object of forcing
Bishop Fraser to reside in it. Father William
Walsh, an Irish priest, was also appointed co-
adjutor in 1842. The appointment of a coadjutor
annoyed Bishop Fraser, who appealed against it to
Rome, and in the mean time refused to recognize
Father Walsh. In order to settle these difficulties
the pope divided the province of Nova Scotia into
two dioceses, Antigonish being united to Cape Bre-
ton and erected into the diocese of Arichat, with
Dr. John Le Conte in the “Biographical Memoirs of the National Academy of Sciences” (v. 2.
His son, Persifor, geologist, b. in Philadelphia,
Pa., 24 July, 1844, was graduated at the University
of Pennsylvania in 1869, and at once became an
aid on the U. S. coast-survey, serving in the
South Atlantic squadron till June, 1863. He
joined the cavalry and remained in active service
at the front during the Gettysburg campaign.
In October, 1863, he was made acting ensign in
the U. S. navy, and served in the Mississippi squadron
until the end of the war, when he was honorably
discharged in November, 1865. Subsequently he
spent three years in England, and finally returned to
a position in the Royal Saxon school of mines in Frei-
berg, where he completed his course in 1869. On
his return to the United States he was appointed
mineralogist and metallurgist on the U. S. geologi-
cal survey, and wrote the report on these subjects
in 1869. In 1870 he was appointed professor of
chemistry in the University of Pennsylvania, and
four years afterward resigned this chair to become
assistant on the geological survey of the state.
He presented a thesis to the scientific faculty of Lille
in the University of France, for which, in 1882, he
received the degree of doctor of science. This
was the first time that this degree was ever
awarded to one not a native of France. He was
connected with the Franklin institute as professor of
chemistry, and also as one of the editors of its
“Journal” in 1881, and its board of managers. His
investigations have included researches on the cause
of the white color of the moon by day; on the
application of composite photography to testing the
genuineness of signatures; and on carbon buttons
to register delicate variations of pressure. Prof.
Frazier is a member of a number of scientific
societies, both in the United States and Europe, and
secretary of the committee representing American
geologists in the International congress. Besides
memoirs published in various journals and trans-
actions, he has published “Tables for Determina-
tion of Magnitudes received in Paris, and volumes C, CC, CCC, and C4 of the geological sur-
vey of Pennsylvania” (1874–1890).

FRECHETTE, Louis Honoré, Canadian au-
thor, b. in Levis, Quebec, 16 Nov., 1839. His pa-
ternal ancestor was among the first settlers of New
France. He was educated at Avignon and at Laval university, studied law, and was ad-
imitted to the bar of Lower Canada in September,
1864. From 1868 till 1871 he resided in Chicago,
and attended to the foreign correspondence of the Illinois central railway. He returned to Canada in 1871, was elected in 1874 to the Dominion parliament for the county of Leitrim and was appointed president of Leitrim railway company in 1875, and "La patrie" in Montreal in 1884-5. He has also been a contributor to "L'Opinion publique," of Montreal, and has written occasionally for other periodicals. Two volumes of his poems, "Les fleurs boréales" and "Les oiseaux de neige," were published by the French academy of Paris in 1875. The author was granted the last Montyon prize unanimously. McGill university, Montreal, and Queen's university, Kingston, conferred upon him the degree of L.L.D. His volumes of poems include "Mes loisirs" (Quebec, 1868); "La voix d'un exilé" (1860); "Fleeting Days" (Montreal, 1877); and "Les oubliés" and "Voix d'outre-mer" (1886). His published dramas and comedies include "Félix Poutre" (1882); "Papineau" (1880); "The Thunderbolt" (1885); and "Un Dimanche matin à l'hôtel du Canada." His prose works include "Le Monde des dieux" (1872); "Petit traité de la Foi et du Roy de France." He has translated into French "A Chance Acquaintance," by William D. Howells, and "Old Creole Days," by George W. Cable.

**FREDET, Peter**, author, b. in Sebastas, Auvergne, France, in 1801; d. in Eliot's Mills, Me., in 1856. He married a native of this town and resided in the College of Clermont, and afterward entered the ecclesiastical seminary of Clermont-Ferrand. After his promotion to the priesthood he joined the Society of St. Sulpice, and was sent as professor to the Sulpician seminary of Fribourg, Switzerland, where he remained six years, when he embarked for the United States, and arrived in Baltimore in 1831. He spent the remainder of his life as professor of various branches of ecclesiastical learning in St. Mary's seminary, Baltimore, and published an "Ancient History of the Dutch Reformed churches," which was adopted as a textbook in all the Roman Catholic colleges of the United States, and also in the Roman Catholic university of Ireland. His other works are controversial or theological, and include "Inspiration and Canon of Sacred Scripture," "History of the Reformed Church," the "Bible," "Interpretation of Scripture;" "Necessity of Baptism;" "Effects of Baptism and the Obligations attached to it;" "Lay Baptism;" and "Doctrine of Exclusive Salvation.

**FREDLEY, Edwin Troxell**, author, b. in Philadelphia, Pa., 28 July, 1827. His youth was spent in Bucks county, where he attended school. He afterward entered Treemont seminary, Norris-town, and studied law at Harvard in 1845. He then removed to Cincinnati and became part proprietor of a large steam-motor mill. He settled in Philadelphia in 1851. In 1860 he published, in connection with Edward Young, the "Manufacturers' Gazette," which was discontinued in 1861. He has been interested in forming societies for the dissemination of useful knowledge. His publications include "The History of Trade and Commerce" (Philadelphia, 1851; republished in England); "The Business Man's Legal Adviser" (1854); "Leading Pursuits and Leading Men" (1856); "Philadelphia and its Manufacturers" (1857; 2d ed., 1867); "Opportunities for Industry" (1858); "History of Agriculture" (2d ed., 1858); "Common Sense in Business" (1877); and "Home Comforts" (2 vols., 1877, 1 vol., 1880).

**FREEMAN, Alice Elvira**, educator, b. in Colesville, Broome co., N. Y., 21 Feb., 1855. She was graduated at the University of Michigan in 1876, and was appointed assistant reader of Greek, Latin, and mathematics at Geneva Lake, Wis., where she remained one year. From 1877 till 1879 she was the principal of the high-school at East Saginaw, Mich. She became professor of history in Wellesley in 1879, which position she held until 1891. In that year she became a member of the board of education in Somerville, Mass., and in 1882 she accepted the presidency. The degree of Ph. D. was conferred on her by the University of Michigan in 1883, and that of doctor of letters by Columbia at its centennial celebration in 1887, on which occasion her name appeared on the platform among the invited guests.

**FREEMAN, Barnardus**, clergyman, b. at Gilhuys, in Hanover, in 1660; d. at New Utrecht, L. I., in January, 1743. He was at one time a tailor in Westphalia, but was ordained by the classis of Lingen, 16 March, 1688. At the call of Gilbert Bancker, of Albany, he resolved to go to America. He reached Schenectady, 28 July, 1705, and at once began his labors as dominie of the Reformed Dutch church, which was then independent of the Amsterdam classis. He was of great natural abilities, and, in addition to his knowledge of Dutch and German, he mastered the Mohawk tongue, and soon began teaching and catechising the Mohawks. With the aid of the half-breed interpreter Hillities, he translated portions of the Anglican liturgy and the Bible into their tongue. His influence over the Indians was spiritual and powerful, in addition to its being a strong factor in promoting their friendship with the Dutch and English. He married 23 couples, baptized 101, and received 14 adults, all Indians, into the church. After his removal, they petitioned for his return to them. Under a commission from Lord Cornbury, dated 25 Dec., 1705, he removed to Long Island, and officiated as dominie in the Reformed churches of New Utrecht, Flatbush, Bushwick, and Brooklyn. This act of the governor was a part of his settled policy to obtain control over the Dutch churches, and to establish English episcopacy. He used his influence to have an American classis established, so that the Dutch churches in America would be free from the jurisdiction of the classis of Amsterdam. He was made pastor emeritus in 1741, after forty-one years' service. A prominent translator of the Bible, of vigorous physique, exists. He published parts of the English liturgy in Mohawk (1705); "De Spiegel der Self-Kennis" (Mirror of Self-Knowledge) (1720); "De Weegshaal der Gerade Gods" (Balance of God's Grace) (1731); and "Verdinghiegen" (Defence against the church of Baritan) (1720).

**FREEMAN, Florence**, sculptor, b. in Boston, Mass., in 1836. After receiving instruction in sculpture from Richard S. Greenough, she went to Italy with Charlotte Cushman, and studied for one year in Florence withiram Powers. In 1862 she opened a studio in Rome, where she has spent her professional life. She has executed several bas-reliefs of Dante: a bust of Sandalphon; "The Sleeping Child"; "Thekla, or the Tangled Skein"; and several chimney-pieces, one of which, "Children of the Yule Tree Feast" (Philadelphia, 1843). She was a member of the Centennial exhibition in Philadelphia (1876).

When captain of the "Sea," he took over the last presidential message ever carried by a sailing vessel. He was afterward commander of the steamers "Colorado" and "Minnesota." The latter took fire in mid-ocean, and after twelve hours' heroic exertion, in which Capt. Freeman distinguished himself, it was brought to the surface. He lost his health and wealth. The latter part of his life was spent in the ministry. Freeman, George Washington, P. E., bishop, b. in Sandwich, Mass., 13 June, 1789; d. in Little Rock, Ark., 29 April, 1858. His early manhood was spent in secular occupation, but he afterward went to North Carolina and studied for the ministry of the Methodist Episcopal church. He was ordained deacon in Christ church, Raleigh, N. C., by Bishop Ravenscroft, 8 Oct., 1829, and priest in Christ church, Newbern, N. C., 20 May, 1827, by the same bishop. For two years he served as missionary in the diocese of North Carolina. In 1829 he was elected rector of Christ church, Raleigh, which office he filled until 1840. He then removed to Columbia, Tenn., and thence, a year later, to Swedesborough, N. J. After a short stay in the latter place, he accepted a call to become rector of Independence church, Newburg, N. J. He was elected afterward missionary bishop of Arkansas and the Indian territory, and was consecrated in St. Peter's church, Philadelphia, 26 Oct., 1844. He received the degree of D. D. from the University of North Carolina in 1839. Freeman, John, clergyman, b. in Charlestown, Mass., 23 April, 1759; d. in Newton, Mass., 14 Nov., 1835. He received his first education in the public Latin-school of Boston, and was graduated at Harvard in 1777, after which he visited Cape Cod and drilled a company about to join the colonial troops. In 1783, when he was captured and detained till 1782, when he went to Boston and became lay-reader of King's chapel. This was originally an Episcopalian church, founded in 1686. He became a Unitarian in his views, and induced the Episcopal society of this church to alter its liturgy in 1783, and, as the bishop refused to ordain him, he was consecrated with a peculiar service by his own wardens and people, 18 Nov., 1787. He was the first minister in the United States to avow the name of Unitarian, and through his influence the first Episcopal church in New England became the first Unitarian church in this country. He continued sole minister of King's chapel until 1806, when the Rev. Samuel Cary was given him as a colleague. After the death of Mr. Cary in 1815 Dr. Freeman served alone till 1824, when Rev. Francis W. P. Greenwood was associated with him. In 1826 Dr. Freeman gave up his duties to his colleague, owing to failing health, and retired to a country residence near Boston, where he spent the rest of his life. Dr. Freeman printed no controversial sermons, and seldom preached them. He was thoroughly liberal and intimate with the best men of all denominations, though he disliked what he called the "cant of liberality." He was a member of the first school committee of Boston, chosen in 1792, the schools up to this time having been managed by the selectmen of the city. He was a member of the Academy of arts and sciences, and one of the founders of the Massachusetts historical society, to which he rendered valuable service. He received the degree of D. D. from Harvard in 1811. He was an accomplished scholar, and his style was a model of pure English. Besides his contributions to periodical literature, he published a "Description of Boston" ("Boston Magazine," 1784); a "Sermon on the Death of Rev. John Eliot, D. D." (1813); and a volume of "Sermons and Charges" (1832), which were criticised by Robert Southey in a letter to the Lord Bishop of Limerick, 6 March, 1833. Freeman, James Edward, artist, b. in Nova Scotia in 1808; d. in London, England, 21 Nov., 1884. His parents removed to Osage, N. Y., where his early life was spent. When a youth he made his way to New York, where he entered the National academy of design. He became an associate in 1831 and was elected an academian in 1833. For a while he painted in western New York, and removed to Rome in 1836, where he resided until 1839. He was a painter of genre pictures and portraits. Among his works are "The Beggar's"; "The Flower Girl," "The Savoyard Boy in London," "Young Italy," "The Bad Shoe," "The Crusaders' Return," "Study of an Angel," "Study of a Head of Judith," "The Mother and Child" (1868); and "The Lucchesi Peasants on the Sands of the Sezchio" (1888). He published "Gatherings from an Artist's Portfolio" (New York, 1877).—His wife, Horatia Augusta Latilla, sculptor, b. in London, England, 28 Aug., 1826, was of English birth. She was married in 1847, and, devoting herself to sculpture, has executed several works that show artistic talent. Among these are "The Princes in the Tower," "The Triumph of Bacchus," and "The Culpit Pay," which is the most ideal of her productions. She has also made many chimney-pieces, and vases, both in marble and wood. Freeman, Nathaniel, physician, b. in Dennis, Mass., 8 April, 1741; d. in Sandwich, Mass., 20 Sept., 1827. He studied medicine and in 1765 settled in Sandwich, where he studied law with his father, Col. James Otis. He was an active patriot during the Revolution, held command of a regiment of militia in the expedition to Rhode Island, and served as brigadier-general of militia from 1781 till 1793. He performed various services in the legislature, was judge of probate for forty-seven years, judge of the common pleas for thirty years, and a member of congress from Massachusetts from 1793 till 1799. He was one of the best extempore speakers of the day, and was distinguished as a physician and surgeon. He was the author of "A Charge to the Grand Jury of Barnstable" (Barnstable, 1808).—His son, Frederick, clergyman, b. in Sandwich, Mass., in 1800; d. there, in 1883, was engaged as a school-teacher and for a time studied law. Subsequently he taught in the academy at Newbern, N. C., and was finally made its principal. In 1833 he began to preach, and in the next year was ordained pastor of the Presbyterian church in Plymouth, Mass., where he remained ten years. He afterward took orders in the Protestant Episcopal church, and held charges in Philadelphia, Bangor, and Augusta. He then returned to Sandwich, where he established a collegiate institute in 1834. He was the author of "History of Cape Cod"; "Annals of Barnstable County" (1836-62); "Genealogy of the Freeman Family" (1873); and "Civilization and Barbarism illustrated by Especial Reference to Metacomet and the Extinct Natives" (1877). Freeman, Samuel, jurist, b. in Falmouth (now Portland), Me., 15 June, 1748; d. there, 3 Sept., 1811. He was an active patriot during the Revolutionary struggle, was secretary of the Cumberland county convention in 1774, a member of the provincial congress, and besides the Massachusetts house of representatives in 1776 and 1778. When the courts were reorganized in 1775 he was appointed clerk, which office he held for forty-five years. He was register of probate until commis-
tioned judge in 1804, remaining in the latter office till 1820. From 1776 till 1805 he was postmaster of Portland. He was an active and efficient friend of his country's cause. In the publication of 1803, "The Massachusetts’ Justice" (1803); and "Probate Directory" (1808); and he edited the "Journal of Rev. Thomas Smith" (1821).

FREEMAN, William Grigsby, soldier, b. in Virginia in 1819; d. in Cornwall, Pa., 12 Nov., 1863. He was graduated at the U. S. Military Academy in 1834, and assigned to the 4th artillery. He served in the Florida war, and was made 1st lieutenant for gallantry on several occasions. In 1840 he became instructor of infantry and artillery tactics at West Point, and in the following year served the northern frontier at Buffalo, during the Canada border disturbances. From 1841 till 1849 he served as assistant in the adjutant-general's office in Washington, D. C. He was afterward chief of staff to Gen. Scott, commanding the army headquarters at New York. He was brevetted major in 1847, and lieutenant-colonel in 1848, "for meritorious conduct, particularly in the performance of his duty in the prosecution of the war with Mexico." He made a tour of inspection of the Department of Texas in 1833, and served as assistant adjutant-general in 1856, when he resigned on account of failing health, which prevented his taking part in the civil war.

FREIRE, Luiz José Junqueira, Brazilian poet, b. in São Salvador da Bahia, 31 Dec., 1832; d. there, 24 July, 1836. At the age of seven he was blind, and in a few years he could not read; but after that he made rapid progress. In 1848 he entered the Lyceum of Bahia, where he studied especially the Latin and Portuguese poets, and in a short time was able to recite from memory some of their best productions. At the age of eighteen he published poems, which were received with general favor; but about that time he fell passionately in love with a young lady who did not return his affection, and he consequently renounced the world and entered a cloister, 20 March, 1851. But his superior, seeing his disgust with monastic life, obtained, in 1854, permission for his perpetual secularization, and he left the cloister. He continued writing, but his health was undermined, and he died eight months after leaving the convent. The greater part of his writings is lost, or repressed by his opponents of his ideas. Dr. Franklin Doria collected and published the following: "Estudo," "Contradições Poéticas," and "Inspirações do Claustro." The last-named work has been translated into several languages.

FREIRE DE ANDRADA, Gomez (fray re), Portuguese soldier, b. in Lisbon, 19 Dec., 1856; d. at Para, Brazil, 3 Jan., 1702. He was a nephew of the famous historian Jacinto Freire de Andrade. He served in the artillery, and soon reached the highest grades as an officer. In May, 1665, he was made captain-general of Maranhão, and in June, 1667, of Para. This immense stretch of territory, under his death, serving his country most efficiently, and doing for the north of Brazil what his cousin of the same name was doing for the south. Para and the other cities under his jurisdiction owed important improvements to him. He brought under cultivation immense tracts of land, hitherto unproductive, introduced the cultivation of rice, and encouraged that of cocoa and coffee. He took particular interest in the Indian question, subdued the fierce tribe of Taype, and founded at Belem an ethnographic museum, and still incomplete, has been of great service to science. Under his administration the population of
the province of Para increased threefold. His life, written by Father Domingos de Teixeira, contains much valuable information on the rebellion of Beekman against Freire de Andrade, which may be regarded as the first attempt of the Brazilians to establish their independence. It also contains authentic documents relative to the first difficulties between France and Portugal concerning the regions about Cape North. — His cousin, Gomez, count of Bobadella, Portuguese statesman, b. in Coimbra in 1688; d. in Rio Janeiro, 1 Feb., 1769, studied at Coimbra, and entered the Jesuits early in life. He distinguished himself in the war between Portugal and Spain, in 1708 was promoted colonel, and in 1712 to general. On 8 May, 1733, he was appointed governor of Rio Janeiro, and in 1735 was also given the administration of the rich province of Minas Geraes. He erected in Rio Janeiro many fine buildings and monuments, and made important improvements in the bay. In 1744 the mines of the district of Parescutu were discovered, and Freire organized a scheme for working them, and published a description of his system, which is even to-day an authority on mining engineering. On 17 Jan., 1752, he founded the first Brazilian academy, called Dos Selectos da Rio Janeiro, which association established in 1754 the first printing-office in Portuguese America. In 1754 a boundary dispute arose between Brazil and France, and Freire marched against the territory of the seven missions, gaining the victory in four battles. As a reward for this service he was made count of Bobadella in 1757. The loss of the colony of Sacramento by Portugal in October, 1762, was such a serious blow to Freire that he retired from public life.

FREITIES, Pedro Maria, Venezuelan patriot, b. in Barcelona in 1790; d. in Caracas, 7 May, 1817. His father was a Spanish colonel and governor of Barcelona, and Freites was also employed in the Spanish administration; but when, in 1811, the independence of Venezuela was declared, he joined the republican army. He took part in Bolivar's expedition to Venezuela, and commanded the infantry of Piar in the battle of Junca, 27 Sept., 1810, in which Moroles's forces were annihilated. When, in the beginning of 1817, resolved to evacuate Caracas, he left there a battalion of 700 men under the command of Freites, who had been promoted to brigadier-general. Freites' forces were not sufficient to defend the whole city, and he therefore occupied Casa Fuerte, an intrenched fort constructed out of the convent of St. Francis, where also many of the principal families of Caracas took refuge. This was captured by the Spanish on 7 April after a desperate resistance, but Freites made a desperate sally and had already nearly gained the neighboring woods, when he fell, and all his followers were overpowered and killed. Freites and the governor, Rivas, were spared and sent as prisoners to Caracas, where the captain-general, Moxo, ordered their execution.

FREJES, Francisco (fré-ch), Mexican historian, b. in Guadalajara; d. in Zacatecas in 1843. He was chosen mayor of his native city, where he distinguished himself as a pupil orator. His love of study caused him to obtain his transfer to the convent of Guadalupe, in Zacatecas, where he had the advantage of a valuable library containing many manuscripts of the time of the conquest. He was appointed secretary of the convent in 1835, and in 1838 became its superior. Here he finished his "Historia Breve de la Conquista de los Estados Independientes del Imperio Mejicano" (new ed., Guadalajara, 1878).

is a clear and impartial writer, and as some material, which never had become public, was at his command, his history may be considered the most authentic one. Frejes also published "Memoria Historica de los Sucesos mas notables de la Conquista particular de Jalisco por los Espafioles" (1849), and contains relative to the first difficulties between France and Portugal concerning the regions about Cape North.

FREILINGHUYSEN, Theodorus Jacobus, clergyman, b. in West Friesland, 1691; d. in New Jersey in 1747. After receiving a thorough classical education he began the study of theology, was ordained to the ministry in the Reformed Dutch church at the age of 21, and in 1720 he distin-

FREILING HU YSEN, Theodorus Jacobus, clergyman, b. in West Friesland, 1691; d. in New Jersey in 1747. After receiving a thorough classical education he began the study of theology, was ordained to the ministry in the Reformed Dutch church at the age of 21, and in 1720 he distin-
he was chosen to the same body, which adopted a constitution and changed its title from "Provincial Congress" to the "Convention of the state of New Jersey." In 1778 he was elected, on joint ballot of the legislature, to represent New Jersey in the Continental congress. He was strongly averse to accepting this position, declaring that the trust was too important for his years and abilities. In the following year he resigned it, but in 1782 and 1783 his name may be found on the rolls of the Continental congress as a representative from New Jersey. He was instrumental, it is said, in raising a corps of artillery, of which he became captain, and at the head of which, while still holding his seat in the Provincial Congress, he took part in the battle of Trenton. There is a tradition that it was by a shot from his pistol that Col. Rahi, the commander of the Hessian forces, was mortally wounded. Having been made colonel in the militia of his native county, he became actively engaged in the war. He was present at the skirmishing at Springfield and Elizabethtown, as well as at the battle of Monmouth Court-House in June, 1778. After the war had been brought to a close he received appointments to various offices in the county and state, and in 1783 was chosen to a seat in the senate of the United States, but, on account of family bereavements, resigned this position in 1796. In 1794, when Gen. Washington undertook to put an end to the whiskey insurrection in Pennsylvania, he summoned, among other forces employed, the militia of New Jersey. In placing Gov. Howell at their head, and giving to Mr. Frelinghuysen a major-general's command. In 1804 he fell seriously sick, and, on taking to his bed, predicted that the end was at hand, and that he would die on his ensuing birthday. The prediction was fulfilled, but the offices at law were enjoyed for several years. He was a member of the state council, and for three consecutive terms, of five years each, was surrogate of his county. Inheriting from his father, Gen. Frelinghuysen, a great fortune from his military life, he promptly offered his services at the beginning of the second war with Great Britain, and was for many months encamped with a regiment of New Jersey militia, which he commanded, at Sandy Hook, with a view to preventing the enemy's vessels from passing up the bay to attack New York. At the close of the war he was made a brigadier-general. He was a man of profound piety, and while on duty at Sandy Hook frequently conducted public services at the head of his regiment. So tenderly did he care for his soldiers that the sick among them were sheltered in his own tent, and made to eat at his own table. He freely used his own means to relieve their wants, even going so far as to embarrass his estate for this purpose.—Gen. Frederick's second son, Theodore, lawyer, b. in Franklin, Somerset co., N. J., 29th Mar., 1808, d. in a similar manner as his father. Theodore was at the age of eleven to the grammar-school connected with Queen's college (now Rutgers), where he remained two years, but, on the resignation of the rector of the school, returned to his home at Millstone. Having no great disgust to the studies of religion and charity, he persuaded his father to give him the privilege of remaining at home and becoming a farmer. But consent to this plan had been only partially obtained when his father was called away on public business. His step-mother, a wise and estimable woman, believing that this arrangement would not be a judicious one, packed young Theodore's trunk and sent him to the classical academy recently established at Basking Ridge, N. J., by the Rev. Dr. Robert Findlay. Here he completed his preparatory studies, and in 1822 was admitted to the junior class of the College of New Jersey, at Princeton, from which he was graduated with high honors in 1804. In the mean time, his father having died, his elder brother, John, a lawyer, had taken charge of the homestead at Millstone. In the office of this brother he began the study of law, and, after being admitted to the bar, removed to Newark, N. J., where he married, and entered upon the practice of his profession, in which he soon attained eminence. In 1817 he was appointed attorney-general by a legislature whose majority was opposed to him in politics. Ten years afterward he was reappointed on the expiration of his term of office, and finally resigned it in 1829, having been elected a senator of the United States. Prior to this, however, he had declined the office of justice of the supreme court, tendered him in 1826. The first important matter on which he addressed the senate was the bill for the removal of the Indians beyond the Mississippi river. This speech availed nothing, however, except to bring its author prominently before the nation, and to give him the title of the "Christian statesman." He also took an active part in the discussion of the pension bill, the president's protest, the removal of the deposits from the U. S. bank, the compromise, and the tariff. His senatorial term expired in 1833, when he resumed his professional labors in Newark. In 1836 Newark was incorporated as a city. In the following year Mr. Frelinghuysen was elected its mayor, and in 1838 he was re-elected to the same position. In 1839 he was unanimously chosen chancellor of the University of New York, and while in the occupancy of this office was, in May, 1844, nominated by the Whig national convention at Baltimore for the vice-presidency of the United States on the same ticket with Henry Clay. He continued in the discharge of his duties as chancellor of the university until 1850, when he accepted the presidency of Rutgers college, and in the same year was formally inducted into that office, continuing in it until the day of his death. Mr. Frelinghuysen was an earnest advocate of the claims of organized Christian benevolence, and it is said of him that no American layman was ever associated with so many great national organizations of religion and charity. He was president of no less than three of these during some period of their existence, while his name may be found on
the lists of officers of all the rest with scarcely an exception. For sixteen years he was president of the American board of commissioners for foreign missions. From April, 1846, till his death he was president of the American Bible society; from 1842 till 1848, of the American tract society; from 1826 till near the close of his life, vice-president of the American Sunday-school union; and for many years vice-president of the American colonization society. In the work of all these institutions he took an active part. His remains were buried in the grounds of the 1st Reformed Dutch church in New Brunswick, N. J. See a memoir of him by Rev. Tabbet W. Chambers, D. D. (1889).-Frederick Theodore, son of Gen. Frederick's third son, Frederick, lawyer, b. in Millstone, N. J., 4 Aug., 1817; d. in Newark, N. J., 20 May, 1885, was but three years of age when his father died, and was at once adopted by his uncle, Theodore. He was graduated at Rutgers in 1836, studied law with his uncle, Theodore, at Newark, and was admitted to the bar in 1839. In this year his uncle was called to the chancellorship of the University of New York, and the young attorney succeeded to his practice. He was chosen city attorney in 1849, and in the following year he was also elected city counsel. Not long afterwards he became the retained counsel of the New Jersey central railroad company, and of the Morris canal and banking company, and became generally known throughout the state. His name was mentioned as a candidate for attorney-general of New Jersey in 1857, and in 1861 was appointed to that office. In this same year Mr. Frelinghuysen was a member of the peace congress in Washington, where he was a conspicuous figure in the agitation of his term as attorney-general, in 1866, he was reappointed by Gov. Marcus L. Ward, but in the same year he was appointed by the governor to the U. S. senate to fill the vacancy caused by the death of William Wright. He took his seat in the senate in December, 1866, and was elected in the winter of 1867 to fill the unexpired term of Mr. Wright, which would end on 4 March, 1869. He now resigned the office of attorney-general to occupy one which, it is said, had long been the summit of his ambition. At the expiration of his term in 1869 the majority of the legislature of New Jersey was opposed to him in politics, and, as a matter of course, his re-election was impossible. In 1870 President Grant nominated him as minister to England, and the nomination was promptly confirmed by the senate without the usual reference to the committee. Mr. Frelinghuysen, however, declined the appointment; why he did so was a question that was variously answered by political friends and foes. Years afterward it became known that it was at the request of his wife, who was unwilling to expose her children to the various influences to be encountered during a residence at a foreign court. On 25 July, 1871, he was again elected U. S. senator for the full term of six years. During his service in the senate he was a member of the judiciary committee, and chairman of the committee on finance, naval affairs, claims, and railroads, and was chairman of the committee on agriculture. He was also a member of the committee on foreign relations, and acting chairman of the same during the negotiation of the Alabama claims by the joint high commission. When the civil war had ended, but he brought with him the feelings which had governed him throughout its progress, and took an active part in the work of restoring the Union. In the impeachment trial of President Johnson he voted for conviction. He was always prominent in the debates of the senate, and introduced into that body several measures of great importance. In the matter of the Washington treaty, in the French arms controversy, in the currency question, he was especially active. A bill introduced by him to retain gold currency, and so well sustained by argument that a measure similar to his own was subsequently adopted. A tariff for protection always received his support, and he left nothing undone to promote the industries of his own state. The civil-rights bill, introduced by him, was also introduced by him. Mr. Frelinghuysen was a learned man, and was advocated by Mr. Frelinghuysen until it passed the senate. He introduced a bill against polygamy, and secured its passage in the senate; also a bill to return to Japan what is known as the Japanese indemnity fund, which he5

At the expiration of his term in 1869 the majority of the legislature of New Jersey was opposed to him in politics, and, as a matter of course, his re-election was impossible. In 1870 President Grant nominated him as minister to England, and the nomination was promptly confirmed by the senate without the usual reference to the committee. Mr. Frelinghuysen, however, declined the appointment; why he did so was a question that was variously answered by political friends and foes. Years afterward it became known that it was at the request of his wife, who was unwilling to expose her children to the various influences to be encountered during a residence at a foreign court. On 25 July, 1871, he was again elected U. S. senator for the full term of six years. During his service in the senate he was a member of the judiciary committee, and chairman of the committee on finance, naval affairs, claims, and railroads, and was chairman of the committee on agriculture. He was also a member of the committee on foreign relations, and acting chairman of the same during the negotiation of the Alabama claims by the joint high commission. When the civil war had ended, but he brought with him the feelings which had governed him throughout its progress, and took an active part in the work of restoring the Union. In the impeachment trial of President Johnson he voted for conviction. He was always prominent in the debates of the senate, and introduced into that body several measures of great importance. In the matter of the Washington treaty, in the French arms controversy, in the currency question, he was especially active. A bill introduced by him to retain gold currency, and so well sustained by argument that a measure similar to his own was subsequently adopted. A tariff for protection always received his support, and he left nothing undone to promote the industries of his own state. The civil-rights bill, introduced by him, was also introduced by him. Mr. Frelinghuysen was a learned man, and was advocated by Mr. Frelinghuysen until it passed the senate. He introduced a bill against polygamy, and secured its passage in the senate; also a bill to return to Japan what is known as the Japanese indemnity fund, which he
branch of the church in which so many of his fore-

| fathers had been bright and shining lights. He took a lively interest in educational matters, and in 1868 was elected president of the American Bible society, and for thirty-four years a trustee of Rutgers college. His published writings are not numerous, nor did he give much time to literary work. Many of his speeches were never written until after they had been delivered, but his writing was so well arranged that the writer, without engraving on his memory, in their exact order, every word that he was about to utter; and so tenacious was that memory that, whenever he deemed it important to commit any-

thing to writing, the manuscript was for him thereafter a useless paper.

**FRÉMIN, James, missionary, b. in France; d. in Quebec, Canada, 2 July, 1891.** He was a member of the Society of Jesus, and was sent as a mission- ary to Canada, but at what time is unknown. In 1656-9 he lived among the Onondagas, Mo- thasien, near Moscow, and at Three Rivers and Cape de la Madeleine. At the earnest request of the Cayuga chief, Garasoonitée (g. c.), he set out in company with Father Peter Raffeins to establish a mission among the Cayugas in 1666. In 1668 he founded in the Mohawk valley, which had been founded by Gognies. He remained a month at Fort Saint Anne, on Isle La Mothe, where he conducted the first Roman Catholic mission in Vermont. He was then taken by his guides to Gandoogué, where a congrega-

tion of Algonquins and Huron captives had already been formed. These they gathered in an isolated cabin, and prepared for baptism. He then visit-

ed Tionontagaouer, the capital, and in a general assembly of the six villages of the Mohawks, held 14 Sept., he reproached the tribe for their faith-

lessness and selfishness, and spoke at length on the advantages of peace. Father Frémont, who was already skilled in the Huron and Onondaga dialects, learned the Mohawk very quickly, thus ob-

taining extraordinary influence among the tribe. As soon as the mission of St. Mary of the Mo-

hawks was firmly established, he sent one of his associates to Albany to gain the friendship of the English, and another to Quebec to announce the results that he had obtained. In October, 1668, set out for the Seneca country, where he was re-

ceived with great honor. It was suggested that Catharine Ganneakian (g. c.) founded the vil-

lage of La Prairie for Indian converts. He was recalled to the St. Lawrence in 1670, but returned to the mission of La Prairie, where he remained several years. He made numerous voyages to France in the interests of this mission, and is said to have been again employed among the Iroquois.

**FRÉMONT, John Charles, explorer, b. in Sav-

annah, Ga., 21 Jan., 1813.** His father, who was a Frenchman, had settled in Norfolk, Va., married Anne Beverley Whiting, a Virginian lady, and sup-

ported himself by frequent absences in letter and language. After his death, which took place in 1818, his widow removed with her three infant children to Charleston, S. C. John Charles entered the junior class of Charleston college in 1828, and for some time stood high, especially in mathematics; but his in-

attention and frequent absences at length caused his expulsion. He then employed himself as a private teacher of mathematics, and at the same time taught an evening school. He became teacher of mathematics on the sloop-of-war "Natchez" in 1833, and after a cruise of two years returned, and was given his degree by the college that had exp-

elled him. He then passed a rigorous examina-

tion at Baltimore for a professorship in the U. S. navy, and was appointed to the frigate "Independence," but declined, and became an assistant engi-

neer under Captain William G. Williams, of the U. S. topographical corps, on surveys for a projected railroad between Charleston and Cincinnati, aiding particularly in the exploration of the mountain passes between North Carolina and Tennessee. This work was suspended in 1837, and Frémont then accompanied Captain Williams in a military reconnoi-

sance of the mountainous Cherokee country in Georgia, North Carolina, and Tennessee, made rapidly, in the depth of winter, in anticipation of hostilities with the Indians. On 7 July, 1838, while engaged with Jean Nicolas Nicollet in exploring, under government au-

thority, the country between the Missouri and the northern frontier, he was commis-

sioned by President Van Buren as the 2d lieutenant of topo-

graphical engineers. He went to Washington in 1840 to prepare his report, and was there met Jessie, daughter of Thomas H. Benton, then senator from Missouri. An engagement was formed, but, as the lady was only fifteen years of age, her parents objected to the match; and suddenly, probably through the influence of Col. Benton, the young officer received from the war department an order to make an examination of the river Des Moines on the western frontier. The survey was made rapidly, and shortly after his return from this duty the lovers were secretly married, 19 Oct., 1841. In 1845, Frémont was instructed by the war department to take charge of an expedition for the exploration of the Rocky mountains, particularly the South pass. He left Washington on 2 May, and in four months had carefully examined the South pass and ex-

plored the Wind River mountains, ascending their highest point, well known as Fremont's peak (13,570 ft.). His report of the expedition was laid before congress in the winter of 1842-3, and at-

tracted much attention both at home and abroad. Immediately afterward, Fremont determined to explore the unknown region between the Rocky mountains and the Pacific, and set out in May, 1843, with thirty-nine men. On 6 Sept., after trav-

eling over 1,700 miles, he came in sight of Great Salt lake. His investigations corrected many vague and erroneous ideas about this region, of which no accurate account had ever been given, and had great influence in promoting the settlement of Utah and the Pacific states. It was his report of this expedition that gave to the Mormons their first idea of Utah as a place of residence. After leaving Great Salt lake, he explored the upper tributaries of the Columbia, descended the valley of that river to Fort Vancouver, near its mouth, and on 10 Nov. set out on his return. His route lay through an almost unknown region leading from the Lower Columbia to the Upper Colorado, and was crossed by high and rugged mountain-chains. Deep snow soon forced him to descend into the great basin, and he presently found himself, in the depth of winter, in a desert, with the prospect of death to
his whole party from cold and hunger. By astronomical observation he found that he was in the latitude of the bay of San Francisco; but between him and the valleys of California was a snow-clad range of mountains, which the Indians declared no man could cross, and over which no reward could induce them to attempt to guide him. Frémont and a small detachment of dragoons, with and apparatus for making fire, and a supply of water, accomplished it in forty days, reaching Sutter's Fort, on the Sacramento, early in March, with his men reduced almost to skeletons, and with only thirty-three out of sixty-seven horses and mules remaining. Resuming his journey on 24 March, he crossed the Sierra Nevada through a gap, and after another visit to Great Salt lake returned to Kansas through the South pass in July, 1844, having been absent fourteen months. The reports of this expedition occupied in their preparation the remainder of 1844.

Frémont was given the double brevet of 1st lieutenant and captain at the instance of Gen. Scott, and in the spring of that year he set out on a third expedition to explore the great basin and the maritime region of Oregon and California. After spending the summer in exploring the watershed between the Pacific and the Mississippi, he encamped in October on the shore of the Great Salt lake, and after crossing the Sierra Nevada with a few men, in the dead of winter, to obtain supplies, left his party in the valley of the San Joaquin while he went to Monterey, then the capital of California, to obtain from the Mexican authorities permission to proceed with his exploration. This was granted, but was almost immediately revoked, and Frémont was ordered to leave the country without delay. Compliance with this demand was impossible, on account of the exhaustion of Frémont's men, and the force of supplies generally refused. The Mexican commander, Gen. José Castro, then mustered the forces of the province and prepared to attack the Americans, who numbered only sixty-two. Frémont took up a strong position on the Hawk's peak, a mountain thirty miles from the fourth day of the siege Frémont thinned the ranks of his party and proceeded toward the San Joaquin. The fire was still burning in his deserted camp when a messenger arrived from Gen. Castro to propose a cessation of hostilities. Frémont now made his way northward through the Sacramento valley into Oregon without further trouble, and near Talmath lake, on 9 May, 1846, met a party in search of him with despatches from Washington, directing him to watch over the interests of the United States in California, to the north of the province would be transferred to Great Britain, and also that Gen. Castro intended to destroy the American settlements on the Sacramento. He promptly returned to California, where he found that Castro was already marching against the settlements. The settlers flocking to Frémont's command on that coast, had fled from northern California from Mexican authority. He received a lieutenant-colonel's commission on 27 May, and was elected governor of California by the American settlers on 4 July. On 10 July, learning that Com. Sloat, commander of the United States squadron on that coast, had not received a call from Martínez, he marched to join him, and reached that place on 19 July, with 160 mounted riflemen. About this time, Com. Stockton arrived at Monterey with the frigate "Congress" and took command of the squadron, with authority from Washington to command California. At his request Frémont organized a force of mounted men, known as the "California battalion," of which he was appointed major. He was also appointed by Com. Stockton military commandant and civil governor of the territory, the project was then made of making fire, and accomplishing it in forty days, reaching Sutter's Fort, on the Sacramento, early in March, with his men reduced almost to skeletons, and with only thirty-three out of sixty-seven horses and mules remaining. Resuming his journey on 24 March, he crossed the Sierra Nevada through a gap, and after another visit to Great Salt lake returned to Kansas through the South pass in July, 1844, having been absent fourteen months. The reports of this expedition occupied in their preparation the remainder of 1844.

Frémont was given the double brevet of 1st lieutenant and captain at the instance of Gen. José Castro, then mustered the forces of the province and prepared to attack the Americans, who numbered only sixty-two. Frémont took up a strong position on the Hawk's peak, a mountain thirty miles from the fourth day of the siege Frémont thinned the ranks of his party and proceeded toward the San Joaquin. The fire was still burning in his deserted camp when a messenger arrived from Gen. Castro to propose a cessation of hostilities. Frémont now made his way northward through the Sacramento valley into Oregon without further trouble, and near Talmath lake, on 9 May, 1846, met a party in search of him with despatches from Washington, directing him to watch over the interests of the United States in California, there being reason to apprehend that the province would be transferred to Great Britain, and also that Gen. Castro intended to destroy the American settlements on the Sacramento. He promptly returned to California, where he found that Castro was already marching against the settlements. The settlers flocking to Frémont's command on that coast, had fled from northern California from Mexican authority. He received a lieutenant-colonel's commission on 27 May, and was elected governor of California by the American settlers on 4 July. On 10 July, learning that Com. Sloat, commander of the United States squadron on that coast, had not received a call from Martínez, he marched to join him, and reached that place on 19 July, with 160 mounted riflemen. About this time, Com. Stockton arrived at Monterey with the frigate
court of the United States. He received from President Taylor in 1849 the appointment of commissioner to run the boundary-line between the United States and Mexico, but, having been elected by the legislature of California, in December of that year, to represent the new state in the U.S. senate, he resigned his commissionership and departed for Washington by way of the isthmus. He took his seat in the senate, 10 Sept., 1850, the day after the admission of California, and after an inkling for the terms of the respective senators, Frémont drew the short term, ending 4 March, 1851. The senate remained in session but three weeks after the admission of California, and during that period Frémont devoted himself almost exclusively to measures relating to the interests the state he represented. For this purpose he introduced and advocated a comprehensive series of bills, embracing almost every object of legislation demanded by the peculiar circumstances of California. In the state election of 1851 in California the Anti-slavery party, of which Frémont was one of the leaders, was defeated, and he consequently failed of re-election to the senate, after 142 balloting. After devoting two years to his private affairs, he visited Europe in 1853, and spent a year there, being received with distinction by many eminent men of letters and by 300,000 publicans in safety, in 1854, he received a gold medal from the king of Prussia for his discoveries, had been awarded the "founder's medal" of the Royal geographical society of London, and had been elected an honorary member of the geographical society of Berlin. His explorations had earned for him the title of the "Pathfinder." While in Europe he learned that congress had made an appropriation for the survey of three routes from the Mississippi valley to the Pacific, and immediately returned to the United States. In the early part of June his army engaged a superior force under Gen. Jackson for eight days, with constant sharp skirmishing, the enemy retreating slowly and destroying culverts and bridges to cause delay. The pursuit was terminated by a severe engagement on the evening of 6 June, in which Maj. Gen. Ashby was killed, and by the battle of Cross-Keys on 8 June. It is claimed by Gen. Frémont that if McDowell's force had joined him, as promised by the president, Jackson's retreat would have been cut off; as it was, the latter made good his escape, having accomplished his purpose of delaying reinforcements to McClellan. On 26 June the president issued an order creating the "Army of Virginia," to include Frémont's corps, and giving the command of it to Gen. Pope, for sufficient personal reasons. His request having been granted, he went to New York to await further orders, but received no other command during the war, though, as he says, he was constantly promised him. On 31 May, 1864, a convention of Republicans assembled in New York, and Mr. Lincoln, met at Cleveland and tendered to Gen. Frémont a nomination for president, which he accepted. In the following September a committee of Republicans representing the administration waited on him and urged his withdrawal, as an article so vital to the survival of the party. After considering the matter for a week, he acceded to their request, saying in his letter of withdrawal that he did so "not to aid in the triumph of Mr. Lincoln, but to do my part toward preventing the election of the Democratic candidate." Since 1864 Gen. Frémont has taken little part in public affairs, but has been active in railway mat-
ters. He procured from the Texas legislature a grant of state land in the interest of the Memphis and El Paso railway, which was to be part of a proposed trans-continental road from Norfolk to San Diego and San Francisco. The French agents employed to place the land-grant bonds of this road on the market made the false declaration that they were guaranteed by the United States. In 1869 the senate passed a bill giving the road the right of way through the territories, an attempt to defeat it by fixing on him the onus of the misstatement in Paris having been unsuccessful. In 1873 he was prosecuted by the French government for fraud in connection with this misstatement. He did not appear in person, and was sentenced by default to fine and imprisonment, no justification being given on the merits of the case. In 1878-81 Gen. Frémont was governor of Arizona. He has published "Report of the Exploring Expedition to the Rocky Mountains in 1843-44" (Washington, 1845; New York, 1846; London, 1849); "Col. J. C. Frémont's Explorations," an account of all five of his expeditions (2 vols., Philadelphia, 1850); and "Memoirs of my Life" (New York, 1860). See also the campaign biographies by John Bigelow (then a lawyer), and Charles W. Upham (Boston, 1850).—His wife, Jessie Benton, b. in Virginia in 1825, has published "Story of the Guard; a Chronicle of the War," with a German translation (Boston, 1863); a sketch of her father, Thomas H. Benton, prefixed to his husband's memoirs (1865); and "Souvenirs of my Time" (Boston, 1887).

FRENCH, Benjamin Franklin, historian, b. in Richmond, Va., 8 June, 1799. He received a classical education and studied law, but abandoned it on account of failing health. From his early manhood he contributed to newspapers and periodicals. He removed to Louisiana in 1810, and engaged in planting and commerce, continuing his literary work and collecting an extensive library, which he afterward presented to the Fiske free library of New Orleans. In 1833 he removed to New York, and, retiring from business, devoted himself to historical writing. He published "Biographia Americana" (New York, 1825); "Memoirs of Eminent Female Writers" (Philadelphia, 1827); " Beauties of Byron, Scott, and Moore" (New York, 1829); "Historical Collections of Louisiana" (1846-59); "History and Progress of the Iron Trade of the United States" (1849); and "Historical Annals of North America" (1861).

FRENCH, Daniel Chester, sculptor, b. in Exeter, N. H., 9 June, 1856. He studied under Dr. William R. Sharpless of Philadelphia, and traveled in Italy, France, and England, 1874-85, and then returned to the United States in 1876 and opened a studio in Washington. He was a member of the art club of that city, and executed a number of small groups in parian and plaster. The most popular of these works are two groups of dogs, "The Owl in Love," and "Dick Swiveller and the Marchioness." In 1878 he returned to Florence, and has since resided in that city. His sculptures include "The Minute Man of Concord," a heroic statue in bronze, which was unveiled in 1875; "The May Queen"; "Elise Venner"; "Peace and War," a colossal group, which is now in the custom-house in St. Louis; "The Waking of Endymion"; and a life-size statue of Gov. Chase, of Michigan, for the national memorial gallery at Washington.

FRENCH. John William, clergyman, b. in Connecticut about 1810; d. in West Point, N. Y., 8 July, 1878. He entered Yale College in 1829, and in 1832, studied theology in the Protestant Episcopal seminary in New York city, and was admitted to holy orders in 1835. In 1836 he was elected professor of ethics in Bristol college, Pa. This institution soon failed, and in 1837 he was elected to succeed Professor Kinsley in the chair of languages and literature at Portland, Me., and Washington, D. C. He was appointed in August, 1858, chaplain of the military academy at West Point, and professor of geography, history, and ethics, to which was afterward added the department of constitutional and international law. In an early poet of Pennsylvania (1798). Two of these translations are from the elegies of Ovid and four from the odes of Anacreon. Parke inserts them with the remark: "These poems were consigned to oblivion, through the obliterating medium of rats and moths, under the sequestered canopy of an antiquated trunk." In the records of his death and burial in Chester church he is described as "prothonotary of the court at New Castle."
anti-slavery agitator, and after the capture of Port Royal, at the earnest solicitation of Lewis Tappan and other abolitionists, he went to Washington and laid before President Lincoln his views of the nation’s duty toward “contraband” slaves. In January 1862, President Lincoln inspected the condition of the negroes, and resolved to return to the north and induce teachers to go back with him. On 10 Feb., 1862, he organized a large meeting at Cooper Institute, New York city, where his account of the need of instruction among the colored people was so impressive that at once the “National freedmen’s relief association” was formed, and he was elected general agent. In March, 1863, he again sailed for Port Royal, this time accompanied by a large corps of teachers. He next attempted to have the negroes placed on the abandoned plantations, and taught methods of farming under white superintendents. In this plan he met with much military and civil opposition, but finally met with partial success. Mr. French was the personal friend of President Lin- coln, of Henry Ward Beecher’s, and of many other prominent men. He was a newspaper man, and edited the “New York Republican” from 1863 to 1865.

**THE RISING GLORY OF AMERICA**

"A Poem on the Rising Glory of America" (Philadelphia, 1771), was written for the college commencement. Brackenridge has been considered the joint authors in this production, on the strength of a statement on the title-page to Brackenridge's poem on "Divine Revelation," which reads: "By the same person . . . who, Sept. 25, 1771, delivered a small poem on "The Rising Glory of America." Brackenridge undoubtedly composed the poem, as he included it in his collected poems, published by himself at Monmouth, N. J. Brackenridge merely recited the piece at the commencement. Brackenridge published "Voyage to Boston," a poem (New York, 1774; reprinted in Philadelphia, 1775); "General Gage’s Confession" (New York, 1775); "The British Prison Ship," a poem in four cantos (1781); "The Poems of Philip Freneau, written chiefly during the Late War" (1786; reprinted, with a preface by J. R. Smith, in London, 1861); "A Journey from Philadelphia to New York, by Robert Slenor, a Stocking-maker" (1787; republished in 1806, under the title "A Laughterable Poem, or Robert Slenor’s Journey from Philadelphia to New York"); "The Miscellaneous Works of Mr. Philip Freneau" (1788); "The Village Merchant," a poem (1784); "Poems written between the Years 1783 and 1794" (1786; new ed., Monmouth, N. J., 1790); "Letters on Various Interesting and Important Subjects, by Robert Slenor" (1799); "Poems written and published during the American Revolutionary War" (1809); and "A Collection of Poems on American Affairs" (New York, 1815). Evert A. Duyckinck edited an edition of his "Poems of the American Revolution" (New York, 1865). Freneau also made a translation of Abbe Robin's "Voyages and Travels" (Philadelphia, 1785). His brother PETER, journalist, b. in New Jersey in 1757; d. in Charles-
FRELIX, Ame. part prince (3279), French military engineer, b. in Chambly, France, in 1682; d. in Brest, 26 Oct., 1773. He was the son of a Scotch refugee who had fled to Savoy. Amélie was educated in Paris, and served as lieutenant of infantry from 1703 till 1707, when he entered the Engineer corps. In 1712 he was sent to examine the condition of the Spanish colonies in America. After visiting the principal points in Peru, Chili, and Brazil, he returned to Marseilles on 17 Aug. He pointed out several mistakes in the plans of Father Feuillée, and this led to a bitter controversy between the two travelers. Freliezer introduced the large Chili strawberry into France. In 1719 he was stationed at Santo Domingo as engineer-in-chief, and made a map of the island, to which he added a plan of the city of Santo Domingo. On his return, in 1728, he received the cross of St. Louis. He was appointed director of the fortifications of Brittany in 1739, and engaged in this work until 1764, when he was retired as a lieutenant-colonel. In 1752 he was elected a member of the French academy. He published the following: "Relation du voyage de la Mer du Sud, aux côtes du Chili, et du Péron, fait pendant les années, 1712, 1713, et 1714" (Paris, 1714; 2d ed., enlarged, 1732; Dutch translation, Amsterdam, 1718; German translation, Hamburg, 1718; English translation, with a supplement, by Edward Helbye, London, 1718). His "Reponse au P. Feuillée" was added to the Paris edition of 1783. He also published a "Lettre concernant l'historié des tremblements de terre de Lima" (1753).

FRIAS, Felix (1849-?), Argentine publicist, b. in Buenos Ayres in 1820; d. in Paris in 1881. Early in life he became an opponent of the dictator Rosas, and in 1858 was obliged to seek refuge in Montevideo. There he became acquainted with Gen. Lavalle, and accompanied him in 1859, as secretary, on his invasion of the Argentine Republic. When Lavalle was assassinated on 9 Oct., young Frías rescued his remains and carried them to Bolivia at great risk. He then engaged in literature in Chile, continued his opposition to Rosas, and after the overthrow of the dictator in the battle of Maldonado, went into private service, meeting with little encouragement. In 1818 he removed with his family to New York, established the Mulberry street Congregational church, and was ordained its pastor in 1818. In 1830 he founded the American society for bettering the condition of the Jews. The object of this association was to establish an asylum for Christian Hebrews from all parts of the world. The enterprise proved a failure, and occupied several years of fruitless labor. In 1827, Mr. Frías, convinced of the necessity of inermination, left the Congregationalist church and became a Baptist. He held several small charges as a member of that denomination, and in 1837 resigned his pastorate to go to Europe as an agent for the American society for the conversion of the Jews. He remained abroad three years, but the mission was favorably received, and Frías returned to New York, lectured weekly in the South Baptist church to such Jews as he could induce to form his congregation, went on missionary journeys through the southern and southwestern states, and finally settled in Pontiac, Mich., where he taught Hebrew in the preparatory department of the State university. His published works are "Narrative of my Life" (New York, 1800); "Hebrew Bible" (1811); "Hebrew Grammar" (1813-23); "Judean and Is-
writers describe him as a tall, handsome young man, who rode about the village of Lower Milford with a feather in his hat and a sword at his side. In the spring of 1799, the collection of what was known as the "quarter dogs" and "quarter stealing" forcibly resisted in Northampton and the adjoining counties of Bucks and Montgomery. When government officers came to measure the houses, armed companies of citizens seized and imprisoned them. Fryes was the captain of one of these regiments, and, in the hand, rode at their head, capturing officials and subjecting them to punishment whenever any attempt was made to enforce the law. In February, 1799, a public meeting was held at the house of John Kline, of the township of Lower Milford, and a paper drawn up and signed by fifty-two persons, in each of which signer bound himself to resist the "window-tax" at any cost. John Fryes assisted in drawing up the paper, and pledged himself to raise 700 men to support the cause. At the head of this company of armed men he went to Quakertown, arrested the tax officers, and liberated several prisoners whom the sheriff had in charge. The next day he set out for Northampton, and was on his way to Bethlehem with his troop when he was met by a deputation from the U. S. marshal, urging him to return. This he refused to do till the very Gen. M. S. morales, who afterward appointed him president of the council of state. He temporarily assumed the executive power when Morales was assassinated on 25 Nov., 1792, and when Adolph Ballivian was elected constitutional president, Fryes delivered the executive power to him. After that, he was appointed vice-president. When Ballivian, toward the end of that year, was prevented by sickness from attending to his official duties, Fryes assumed the presidency, and on the death of the former, 14 Feb., 1814, occupied the executive chair for the remainder of his term. His administration was one of the most progressive that Bolivia ever had. In February, 1870, he was appointed minister to France, and as such signed a treaty of friendship and commerce between Spain and his country.

FRIEZE, Henry Simmons, educator, b. in Boston, Mass., 15 Sept., 1817. For his father's death, in 1830, he was clerk in a store in Pawtucket, R. I., and organizer in various churches. He afterward entered Brown, where he was graduated at the head of his class in 1841. From his graduation till 1845 he was instructor in the university, and then, for nine years, Latin professor in the university grammar-school. In 1854 he resigned to accept the chair of the Latin language and literature in the University of Michigan, where he still (1887) remains. On the resignation of President Haven in 1880, Prof. Frieze acted as president of the university until 1871. In that year, owing largely to his influence, most of the privileges of the university were opened to women, and in 1886 they were received into all its departments. Prof. Frieze was the author of the system of inspection by which an official connection has been established between the university and the high schools of the state. In 1880-1, in the absence of President Angell on a diplomatic mission to China, Prof. Frieze again acted as president of the university. He has taken much interest in musical matters, being a member of the organist, and organizing the University musical society. He has also been active in art matters. The degree of LL.D. was conferred on him by Chicago university and Kalamazoo college in 1870, by Brown university in 1883, and by the University of Michigan in 1885. Dr. Frieze has contributed to various educational and philanthropic magazines.
and has published occasional addresses, including "Ancient and Modern Education," one on "Art Museums," and a memorial address on the "Life and Works of Henry Philip Tappan, First President of the University of Michigan." He is the author of valuable annual reports to the board of regents, and has published editions of Virgil's "Eclogues," "Georgics," and "Aeneid" (1851), and "The Story of Giovanni Dupre," a 19th century Florence sculptor (London, 1886).

FRINK, John, physician, b. in Rutland, Mass., 7 Sept., 1731; d. there in 1807. He studied medicine with Dr. Goffe, of Marlborough, Mass., and was one of the founders of the Massachusetts Medical Society. He was a member of the convention that formed the constitution of Massachusetts, and the first president of the Worcester county medical society. He was a justice of the peace when that was considered a mark of distinction, and as a physician and a citizen was highly esteemed.

FRISBIE, Levi, clergyman, b. in Branford, Conn., 6 July, 1748; d. in Ipswich, Mass., in 1806. He was graduated with the first class at Dartmouth in 1771, studied theology under the REV. Enoch Leach, of Stroudwater, at home, and was ordained there in 1772. He was ordained in the ministry, 33 April, 1854, and in the same year emigrated to the United States. In 1779 he received the degree of D. D. from Muhlenberg college, Allentown, Pa. He was professor in the Evangelical Lutheran theological seminary, Middletown, Conn., for many years. He was ordained in 1818 in a Lutheran congregation in Wisconsin in 1855-6, and of one in Detroit, Mich., in 1856-8, and professor of theology at Wartburg seminary, St. Sebald, Iowa, in 1858-74. In 1860, 1866, and 1870 he travelled extensively in Germany and Russia. He has published (in German) "Iowa and Minnesota," a controversial pamphlet (Mendota, Ill., 1878), and a number of essays, sermons, etc. With his brother, he has edited, since 1876, "Kirchliche Zeitschrift," a theological bimonthly magazine published at Mendota, Iowa.—His brother, Gottfried Leonhard Wilhelm, b. Nuremberg, Bavaria, 19 Dec., 1836, was graduated at the university at Erlangen in 1856, and came to the United States in 1857. Since that date he has been professor of theology in the theological seminary of the Iowa synod at Mendota, Ill. In 1870 he received the degree of D. D. from Muhlenberg college, Allentown, Pa. He has published (in German) "Meditations on the Passion of Christ" (Nuremberg, 1869); "History of Protestant Missionary Operations among the North American Indians in the 17th and 18th Centuries" (1890); "The Teachings of Missouri Synod on the Doctrine of Predestination" (1883), and other pamphlets. These two brothers, working together in the same institution and synod, have done much to advance Lutheran interests in Illinois, Iowa, and adjacent states. Their institution, from small beginnings, has attained large dimensions, as also has the synod of Iowa, which they organized.

FRITTEN, Conrad Sigmund, clergyman, b. in Nuremberg, Bavaria, 2 Dec., 1833. He was educated in the gymnasium and mission institute of his native place, and graduated at the mission institute of Neuendettelsau, Bavaria, in 1854. He was ordained to the ministry, 23 April, 1854, and in the same year emigrated to the United States. In 1870 he received the degree of D. D. from Muhlenberg college, Allentown, Pa. He was professor in the Evangelical Lutheran theological seminary, Middletown, Conn., for many years. He was ordained in 1818 in a Lutheran congregation in Wisconsin in 1855-6, and of one in Detroit, Mich., in 1856-8, and professor of theology at Wartburg seminary, St. Sebald, Iowa, in 1858-74. In 1860, 1866, and 1870 he travelled extensively in Germany and Russia. He has published (in German) "Iowa and Minnesota," a controversial pamphlet (Mendota, Ill., 1878), and a number of essays, sermons, etc. With his brother, he has edited, since 1876, "Kirchliche Zeitschrift," a theological bimonthly magazine published at Mendota, Iowa.—His brother, Gottfried Leonhard Wilhelm, b. Nuremberg, Bavaria, 19 Dec., 1836, was graduated at the university at Erlangen in 1856, and came to the United States in 1857. Since that date he has been professor of theology in the theological seminary of the Iowa synod at Mendota, Ill. In 1870 he received the degree of D. D. from Muhlenberg college, Allentown, Pa. He has published (in German) "Meditations on the Passion of Christ" (Nuremberg, 1869); "History of Protestant Missionary Operations among the North American Indians in the 17th and 18th Centuries" (1890); "The Teachings of Missouri Synod on the Doctrine of Predestination" (1883), and other pamphlets. These two brothers, working together in the same institution and synod, have done much to advance Lutheran interests in Illinois, Iowa, and adjacent states. Their institution, from small beginnings, has attained large dimensions, as also has the synod of Iowa, which they organized.

FRITZ, Samuel, missionary, b. in Bohemia in 1853; d. in the mission of Xeberos, near Laguna, Peru, 20 March, 1738. He became a member of the Jesuit order, and was assigned to missionary work in Peru in 1865. His constitution was not able to resist the unhealthfulness of the climate, and his weakness became so great that he had to be transported to Pará, a Portuguese colony at the mouth of the river, where he arrived on 11 Sept., 1688. The governor of the city of Rio de Janeiro imprisoned him until July, 1691. After repeated orders from the court of Lisbon he was liberated, and finally arrived in Lima, where he laid before the viceroy of Peru the observations that he had made on his journey. In 1689 he returned to his mission, and labors on the Amazon. He took several laborious journeys to Quito and other places in the interest of his converts, and became superior-general of the mission. He had great aptitude for the
arts, and in a comparatively short period had become a skilful architect, carpenter, sculptor, and painter. Several churches of the missions were adorned with pictures by his hand. He passed forty-two years among the tribes that he had converted. His great map of the Amazon was engraved on a small scale at Quito in 1707, and appeared for the first time in France in vol. xii. of the "Lettres Édifiantes" (1st vol. 1712) that is also found in vol. ii. of the second edition, with an abridgment of his "Memoirs" on the river whose course he traces.

FROBISHER, Sir Martin, English navigator, b. in Doncaster, Yorkshire, England, about 1536; d. in Plymouth, England, 7 Nov., 1594. He was bred to the sea. In search of a northwest passage to India, and under the patronage of the Earl of Warwick and other noblemen, he sailed with a fleet of three vessels from the port of Deptford in 1576. After exploring different parts of the Arctic coast, and entering the strait that bears his name, he returned to England, carrying with him some black ore which is said to have contained gold. In consequence of this discovery, he was encouraged to make two more voyages. In 1585 he accompanied Drake to the West Indies. On board the "Triumph" he took part in the destruction of the Spanish armada in 1588, and was honored with knighthood for his bravery. In 1594 he lent a helping hand to Henry IV. of France against the League and Philip II. of Spain, and while attacking a fort near Brest received a mortal wound.

FREBEL, Julius, author, b. in Greisheim, Germany, in 1806. He was a nephew of the founder of the kindergarten system, Friedrich Fröbel. Julius was educated at Lausanne, Munich, and Berlin, and in 1833 became a naturalized citizen of Switzerland. He joined the extreme radical party, edited the "Swiss Republican," and issued several scientific works and political pamphlets, many of which were suppressed in Germany. In 1848 he was elected a member of the German parliament that met at Frankfort, and afterward accompanied the radical Robert Blum to Vienna, where he was arrested and condemned to death by the court-martial that convicted Blum, but was pardoned before the date fixed for the execution. On the dissolution of the parliament he visited the United States, where he became editor of a German newspaper, lectured in New York city, and in 1850 went to Nicaragua, Santa Fe, and Chihuahua as correspondent of the New York "Tribune." He returned to Germany in 1854. His efforts were made to expel him from Frankfort, but he was protected on the ground of his naturalization as a citizen of the United States. In 1862 he went to Vienna, took an active part in liberal politics, and became a leader of the Federalist party. In 1876 he was appointed consul of the German empire at Smyrna, Asia Minor. His works are "System of Social Politics" (London, 1847); "The Republican," an historical drama (1848); "Seven Years' Travel in Central America, Northern Mexico, and the Far West of the United States" (1850); "Theory of Politics" (1861); and "Political Addresses" (1870).

FROELEIGH, Solomon, clergyman, b. at Red Hook, Dutchess co., N.Y., 29 May, 1750; d. in New Jersey, 8 Oct., 1827. He was early impressed with the religious teaching of the pastor of the Dutch Reformed church, and introduced his father, who was a farmer, to give him an education that he might fit himself to be a clergyman. His patriotism was ardent, and during the Revolution, when the British occupied Long Island in 1775, he narrowly escaped with his life. He received his education under Land and Mompesson, and Johannes H. Goetschius, and was licensed to preach by the general meeting of ministers and elders in 1774. In 1786 he settled in Hackensack, N. J., and attempted to bring together the conservative and independent branches of the church there, but the members were divided by political controversies arising from the Revolution, and his efforts were fruitless. For a time he succeeded in uniting the two congregations, but dissensions soon broke out afresh in their midst, the church was smitten by lightning, and broke asunder over the entrance on which were inscribed the words "Union makes Strength" was broken in two. So great an effect did this occurrence have on the superstitious congregation that the churches disunited, and not even the efforts of the synod could bring them together. In 1800 Mr. Froeligh passed his life in ecclesiastical discussion, and in 1822, with that portion of the church that favored independent American organization, effected a schism under the name of the "True Reformed Dutch Church." Dr. Froeligh was arraigned before his synod, and was suspended in 1822 for secession and contempt of ecclesiastical authority. He printed various sermons, most of them in the "Banner of Truth," including "Sermon on Occasion of the Lightning rending the Church Steeple" (1796), and published "The Trial of Universal Church Unity" (New York, 1834), and "Reasons assigned by a Number of Ministers, Elders, and Deacons for declaring themselves the True Reformed Dutch Church in the United States" (Hackensack, 1822).

FROMENTIN, Eligius, jurist, b. in France; d. in New Orleans, La., 6 Oct., 1822. He was a Roman Catholic priest and a member of the Jesuit order but, after removing to the United States, married and settled in New Orleans. He studied law, was admitted to the bar, and practised there. Mr. Fromentin was elected to the U.S. Senate, and served from 1813 till 1819. He was appointed judge of the criminal court in New Orleans in 1821, and presided over the same court in the western district of Florida in January, 1822, while Jackson was governor, for a short time only, afterward resuming the practice of law in New Orleans. His wife died of yellow fever in October, 1822, and he followed her within twenty-four hours. He published "Observations on a Bill respecting Land-Titles in Orleans and Dominique."

FRONTENAC, Louis de Buade, Comte de, governor of Canada. He was made to expel him from Frankfort, but he was protected on the ground of his naturalization as a citizen of the United States. In 1862 he went to Vienna, took an active part in liberal politics, and became a leader of the Federalist party. In 1876 he was appointed consul of the German empire at Smyrna, Asia Minor. His works are "System of Social Politics" (London, 1847); "The Republican,"

FROMEN
FRONTENAC

later, after being several times wounded, he was raised to the rank of brigadier. He soon after
was posted at Quebec, and militarily at Montréal, under Louise de la
Grange-Trianon, and married her at Paris in spite of the opposition of her relatives. Madame de
Frontenac conceived an aversion for her husband, who was self-willed and violent, and she presently
left him to follow the fortunes of the famous Made-
moiselle de Montesquieu, who was as wilful as Frontenac himself; she at last quarrelled
with the princess, and was dismissed from her service.
A partial reconciliation followed between her
husband and herself.

In 1672, having gained a high military reputa-
tion for his conduct in the French war, he was
made governor of Canada, with all the other countries thus included under
the name of New France. Some say that he
sought the appointment because he could not en-
dure his wife; others, that his wife, unable to
tolerate him, used her influence at court to send him
into an honorable banishment; others, again, that
the king, jealous of his attentions to Madame de
Montesquieu, who is said to have smiled upon him,
sent him to Canada to get rid of a rival. On ar-
iving at Quebec he proceeded to model his gov-
ernment upon that of the old feudal system of
France, and to introduce all that was licentious and
lawless in the fur trade. This brought him into colli-
sion with the priests of St. Sulpice, feudal prop-
orship of Montreal, and scenes ensued that were more
than edifying. He had thus far ruled alone,
but the court now sent him a colleague in the person
of a Jesuit. Hence their relations were always critical, and on this
case they quarrelled bitterly. Duchesneau
sought support from the bishop and the priests.
Frontenac set at defiance intendant, bishop, and
eclesiastics alike. Sometimes the contest was for
Church and State, church and nation, sometimes it took the form of charges of malad-
ministration and mutual accusations of illegal
trade in furs, accusations well founded on both
sides. Rebukes and warnings proving useless,
the king in 1682 recalled both contestants. In spite
of his outrageous temper, Frontenac had shown
great abilities and gained the confidence of the
Canadian people; for, while quarrelling with those
in power, he was considerate and friendly toward
the humble classes of the colonists. In his dealings
with the Indians he mingled gentleness with con-
ciliation, and showed an extraordinary power of
commanding both their respect and their affection.
Never, probably, was any white man at once
so much feared and loved by them.
He was succeeded by Le Febvre de la Barre,
forgotten in the annals of Denoville. The gov-
ernment of the former was devoted to the colo-
nial war, and that of the latter brought it to the brink
of ruin. Denoville waged against the Iroquois a
war meant to humble, but which served only
to enrage them. In 1689 they descended in force
on the colony, burned and ravaged all the north
adjacent part of the island of Montreal, threatened
the interior of the country itself, and spread blood and havoc everywhere.
Canada seemed paralyzed, and terror turned almost
to despair when it became known that war with
England had begun, and that both white men
and red men were enlisting for her destruction.
Since his recall Frontenac had lived in France,
poor and half forgotten. The crisis drew him
from his obscurity. It was plain that he, and he
alone, was the man for the hour. He was sum-
mmoned before the king and charged once more
with the government of the kingdom; but he, however,
intending to return to Montréal and his
Iroquois. To these ends he sent three
war parties of French and Indians against the
English borders. The first advanced on
snowshoes, in the dead of winter, against Schenectady,
approaching it toward midnight during a snow-
storm, entered it undiscovered, roused the sleeping
villagers with the war-whoop, killed sixty
on the spot, captured ninety, and burned the place to the
ground. The second party, after toiling for three
months in the snow-clogged forests, fell by night on the hamlet of Salsus, revisited, and
then turned and destroyed it. The third attacked
eastward a small wooden fort that stood within the limits
of what is now the city of Portland, Me., and,
after an obstinate defence, captured and burned
it. These successes compelled the respect of the
Iroquois, but failed to make them appreciate the
force of the French. On the contrary, they roused them to reprisals
which placed Canada in imminent danger. Sir
William Phips sailed up the St. Lawrence with
thirty-two vessels and twenty-two hundred men,
anchored before Quebec, and sent an officer with
a summons to surrender the fortress. Once in the
hall of the Château St. Louis, and, enraged by his peremptory tone, the fiery old man bade
him return whence he came, and tell those who
sent him that his cannon should give them his
answer. Phips opened fire, but, as his guns were
light, his ammunition soon failed and the attempts of Quebec, from their lofty position, impreg-
nable to artillery from the river, the bombardment
did little harm. At the same time he landed fifteen
hundred men below the town, but, after spir-
ited efforts, had to retreat. The Indians of St. Charles, and were forced to re-embark.
Frontenac triumphed, and Phips retired disappointed.
Meanwhile the governor did not neglect his
Indian allies, and, at a grand council of the friendly
tribes, took up a hatchet, branded it in the
air, and sang the war song, his officers following
his example. The Christian Indians of the neigh-
boring missions rose and joined them, and so also
did the Hurons and the Algonquins of Lake Ni-
pissing, stamping and screeching like a troop of
mad men, while Frontenac led the dance, whoop-
ing like the rest. The delighted savages, roused to
martial frenzy, promised war to the death, and
several years of conflict followed. The suffer-
ings of the colony, infested by Iroquois war
parties, were extreme. The fur-trade, which formed
its only resource for subsistence, was completely
cut off, and the condition of its people was so deplorable that
in the trading posts of the upper lakes, prevented
from descending by the watchful enemy.
At length, after three years of destitution and misery,
Frontenac broke the blockade of the Ottawa; the
coveted treasure came safely to Montreal, and the
colonists had a few bright spots in their dark
existence. In 1696, when seventy-six years old, he led in
person an invasion of the Iroquois country.
his approach the warriors burned their chief town, Onondaga, and fled into the forests. After destroying the town of Oneida the expedition returned to its winter quarters to speculate on the colony which, during the past half century, they had repeatedly threatened with destruction. But Frontenac was near his end. Overcome at last by age, toils, and passions, he closed his stormy life in 1698, beloved by the Canadian peasantry and to a certain extent by his enemies, his favorites and protégés, the Recollet friars. With all his faults, he had done priceless service to the colony, and his name stands in its annals as that of the most remarkable man who ever represented the crown of France in America.

**Frost, Charles**, soldier, b. in Tiverton, England, in 1632; d. 14 July, 1697. About 1638 he accompanied his father, Nicholas, to the Piscataqua river, and settled at the head of Sturgeon creek. He was a member of the general court from 1658 till 1669, and assentant in 1680, and in 1683-'7 a councillor. He was also a colonel of the Maine regiment, and participated in the Indian wars. He was ambushed and killed by Indians in consequence of his having treacherously seized some of them, who were either hanged or sold into slavery.

**Frost, Charles Christopher**, botanist, b. in Brattleboro, Vt., in 1806; d. in 1880. He received his early instruction at a common school of his native village, excelled in mathematics, and studied it several years after he had left school and begun to work. By his own efforts, making himself familiar with algebra, geometry, the calculus, and kindred branches. Later he devoted his leisure hours to astronomy, geology, mineralogy, meteorology, and botany, especially the last-named study, to which he gave the last half of his life. He contributed to periodicals and was a member of scientific societies in the United States and Europe. During all these years he continued his business in his native town. He was joint author with Edward Tuckerman of a "Catalogue of Plants growing without Cultivation within Thirty Miles of Amherst College" (Amherst, 1875).

**Frost, George**, jurist, b. in New Castle, N. H., 28 April, 1720; d. in Durham, N. H., 21 June, 1796. He was a son of John Frost, a commander in the British navy, who died in 1733. The son received his education at Newport and afterwards was brought up in the counting-house of his uncle, Sir William Pepprell, at Kittery Point, near Portsmouth, N. H. About 1740 he entered one of his uncle's vessels as supercargo and captain, and was a seaman for about twenty years, becoming a partner with George Richards, of London. About 1760 he returned to his old home in New Castle, and resided there until his marriage in 1764 in Durham, N. H., where he removed in 1769. He was judge of common pleas of Stafford county from 1773 till 1781, and for many years chief justice. He was a delegate from New Hampshire to Continental Congress in 1777-'9, and was executive councillor in 1781-'4.

**Frost, James Henry Paine**, physician, b. in Bethel, Me., in 1833; d. in Danville, Pa., in 1875. He was educated at Bowdoin and Amherst, where he graduated in 1846 and took his medical degree at the Homeopathic college at Philadelphia in 1849. He practised for several years at Wilmington, N. C., but in 1853-'5 he studied theology at Bangor seminary, Me., and preached one summer in Richmond, Me. The failure of his voice forced him to give up this profession, and he returned to medicine, which he practised for fifteen years in Bangor, Me. He was a professor in the Philadelphia Homeopathic college in 1865-'8, and during this period was one of the founders and editors of the Hahnemannian Monthly. After serving for some time as a surgeon in the state army, he removed to Danville, Pa., where he remained and continued his residence till his death. He contributed largely to current medical literature.

**Frost, John**, soldier, b. in Kittery, Me., 5 May, 1736; d. there in July, 1810. He served as captain in the school for young ladies in 1756, and 1775 was a lieutenant-colonel at the siege of Boston. When the campaign of 1776 began, he was promoted to the rank of colonel, and he won distinction in the severe engagements that preceded the retreat of Washington to Philadelphia. When Burgoyne invaded New York, Col. Frost's command became an adjunct to the army under Gen. Gates, and, after Burgoyne's surrender, Col. Frost joined Washington's central division, and participated in the action of Monmouth and other engagements. Until the close of the war he served in the middle and southern states, and left the army with the rank of brigadier-general. He then returned to Kittery, was appointed judge of the court of sessions for York county, Me., and was subsequently a member of the governor's council in Massachusetts, of which he was chairman. He was also a manufacturer. He was elected mayor of Chelsea, Mass., in 1837 and 1838, was a member of the state senate in 1837--'8, and of the governor's council in 1837--'4. He built a fire-proof building in his native town in 1867, placed in it a valuable library, and presented it to the town on condition that it should be for the free use of the people. He claimed to have been elected to Congress as a Republican in 1874, but the house gave the seat to a technic ally Democrat, J. G. Abbot. He died in 1878.

**Frost, Rufus Smith**, philanthropist, b. in Marlborough, N. H., 18 July, 1826. He removed in 1838 to Boston, was educated in the public schools there, and was brought up in the mercantile life as a clerk. He afterward engaged in business on his own account, and also became a manufacturer. He was elected mayor of Chelsea in 1867 and 1868, was a member of the state senate in 1871--'2, and of the governor's council in 1873--'4. He built a fire-proof building in his native town in 1867, placed in it a valuable library, and presented it to the town on condition that it should be for the free use of the people. He claimed to have been elected to Congress as a Republican in 1874, but the house gave the seat to a technic ally Democrat, J. G. Abbot. He died in 1878.

**Frost, Thomas**, clergyman, b. in Pulham, near Norwich, England, in 1759; d. in Charleston, S. C., 18 July, 1894. He was graduated at Cambridge university in 1780, and ordained deacon on 14 March, 1781, and priest 6 June, 1784. He was consecrated bishop of Norwich. Putting aside prospects of advancement in the established church, Mr. Frost
accepted an invitation to labor in the Protestant Episcopal church in South Carolina. He was elected assistant (1855); Theophilus Phillips's church, Charleston, 5 Jan., 1786, and, on the death of the rector, Bishop Robert Smith, in 1801, he was chosen to fill the vacancy. He served for several years, and was noted as being an able preacher and a faithful pastor. His son, Thomas Down, b. in Charleston, S. C., 24 Feb., 1803, d. in the West Indies, 16 May, 1819, was graduated at Yale in 1813. His theological studies were pursued under Bishop Dehon's direction, and he was ordained, 21 Feb., 1819. He was immediately elected assistant minister of St. Philip's church, Charleston. In 1820, he also declined the bishop's last in account of failing health. He was benefited by a visit to Cuba, and resumed his parochial duties in May, 1818; but a renewal of the attack next year proved fatal, and he died suddenly. Mr. Fost was esteemed for many noble qualities, and was regarded as an attracting preacher. He was a member of the legislature in 1839, 1840, 1842, 1849, and 1850, and a delegate to the Democratic national convention of 1852, and in 1853 to the State constitutional convention. He served as mayor of Charleston in 1851–3, and was for several years treasurer of the Massachusetts historical society. He published a "History of Charleston" (1848); "History of the Siege of Boston" (1849); "The Command in the Battle of Bunker Hill" (1850); "Life of Gen. Joseph Warren" (1863); "Tribute to Thomas Starr King" (1866); "Rise of the Republic" (1871); and many pamphlets and addresses including "The Centennial: Battle of Bunker Hill" (1875).

FROTHINGHAM, James, painter, b. in Charlestown, Mass., in 1786. He began life as a chaise-painter in his father's chaise manufacture. With meagre instruction in colors, he finally began a career as an artist, and obtained recognition as a truthful and painstaking artist. His works had sale chiefly in New York and Salem. His copy of Stuart's "Washington" was much admired, and his original portraits were praised for fidelity of coloring.

FROTHINGHAM, Daniel Langdon, clergyman, b. in Boston, Mass., 22 July, 1783; d. there, 3 April, 1870. He was graduated at Harvard in 1811, and, after teaching in the Boston Latin school, became in 1812 instructor in rhetoric and oratory at Harvard, which office he was the first to hold. He also aided in founding, and on 15 March, 1815, was ordained pastor of the 1st Congregational church (Unitarian) in Boston. He resigned his charge, on account of feeble health, in 1850. He contributed largely to religious periodicals, chiefly to the "Christian Examiner," and published besides a number of occasional sermons, "Deism or Christianity," in four discourses (Boston, 1845); "Sermons in the Order of a Twelve-month" (1852); and "Metrical Pieces, Translated and Original," a collection of verses contributed to magazines. These were published, like his prose writings, for refinement and amusement. His first notable poem was delivered at the installation of President Kirkland, of Harvard, while its author was a student there; his principal one is a version of the "Phenomena of the Stars," from the Greek of Aratus. His son, Octavius Brooks, author, b. in Boston, 20 Nov., 1822, was graduated at Harvard in 1843, and, after three years in the divinity school, was ordained pastor of the North church (Unitarian) at Salem, Mass., 10 March, 1847. He preached in Jersey City, N. J., in 1853–9, then removed to New York, and became pastor of a congregation that in 1868 was organized as the "Third Unitarian Congregational church," and represented the most radical branch of his denomination. He dissolved this society in 1879 and went to Europe, and on his return in 1881 formally withdrew from spiritual work and devoted himself to literature in Boston. He has been a leader in the movement that has for its object the promotion of rationalist ideas in theology, and has contributed largely to various journals and reviews. In 1867 he became first president of the Free religious association. He has been a regular and regular critic of the "New York Tribune." Mr. Frothingham has published more than 150 sermons, and is the author of the following works: "Stories from the Lips of the Teacher" (Boston, 1863); "Stories from Old-Time Religion" (1874); "Child's Book of Religion" (1866); "The Religion of Humanity" (New York, 1873); "Life of Theodore Parker" (Boston, 1874); "Transcendentalism in New England" (New York, 1876); "The Cradle of the Christ" (1877); "Life of Gerrit Smith" (1878); "Life of George Ripley," (1879); "Memoir of William Henry Channing" (1886).—Nathaniel Langdon's daughter, Ellen, b. in Boston, 23 March, 1835, has devoted herself to German literature, and has translated Lessing's "Nathan der Weise" (1868); Goethe's "Hermann und Dorothea" (1870); Lessing's "Eckokoon" (1874); and Grillparzer's "Sappho" (1876).

FROTHINGHAM, Richard, historian, b. in Charlestown, Mass., 31 Jan., 1812; d. there, 29 Jan., 1890. He was for many years a proprietor of the Boston "Post," and in 1852–66 served as its managing editor. He was a member of the legislature in 1839, 1840, 1842, 1849, and 1850, and a delegate to the Democratic national convention of 1852, and in 1853 to the State constitutional convention. He served as mayor of Charlestown in 1851–3, and was for several years treasurer of the Massachusetts historical society. He published a "History of Charlestown" (1848); "History of the Siege of Boston" (1849); "The Command in the Battle of Bunker Hill" (1850); "Life of Gen. Joseph Warren" (1863); "Tribute to Thomas Starr King" (1866); "Rise of the Republic" (1871); and many pamphlets and addresses including "The Centennial: Battle of Bunker Hill" (1875).

FROTHINGHAM, Washington, clergyman, b. in Fonda, N. Y., 28 Feb., 1822. He received an academic education, became a clerk for Edwin D. Morgan in New York, and established himself in wholesale trade, and met with a moderate success. He then studied theology at Princeton, and entered the Presbyterian ministry in 1855. His most important work as a clergyman has been the establishment of the West Side Presbyterian church in Albany, N. Y. Beginning in 1862, he has built up a system of New York correspondence, which now forms a prominent and popular feature of journals in Hartford, Rochester, Scranton, Troy, Utica, and other inland cities. His pen-names are "Martei," "Academy," "Roscruccian," and "Hermit of New York." His familiar style is an epistolary one, because under them he deals with topics that are seldom treated by other correspondents. He has published in book-form "Atheo, or Tragedies of Unbelief" (New York, 1893); "The Martel Papers: Life-Scenes in the Reign of Terror" (1893); and other works, all anonymous.

FRUITS, George, soldier, b. near Baltimore, Md., in 1762; d. near Crawfordsville, Ind., 6 Aug., 1876. He served in the latter part of the Revolutionary war, went to Virginia in 1787, and was afterward with Daniel Boone in Kentucky. He served against the Indians in 1786, and in the war of 1812. Four generations of his descendants followed him to the grave.

FRY, Benjamin St. James, journalist, b. in Rutledge, Grainger co., Tenn., 16 June, 1824. He was educated at Kenyon College, and began to contribute to the Cincinnati "Times" in 1840, and in 1844 was joint editor and publisher of the "Western Rambler." He became a clergyman of the Methodist Episcopal church in 1847, was president of Worthington college for young women in 1850–56, has been for a time with the 63d Ohio regiment. In 1872 he was elected editor of the St. Louis "Central Christian Advocate," and
re-elected in 1876, 1880, and 1884. In the last
named year he was a member of the Methodist
ecumenical conference in London, England, and
of the United States Congress, being sent
which he read an essay on the "Methodist Press."
Quincy college, Ill., gave him the degree of D. D.
in 1871. Dr. Fry has contributed to various peri-
dociales, and published several Sunday-school books,
including lives of Bishops Whatcoat (New York,
1858), and his "Life of George Washington" (1858),
and "George (1858); and "Property Consecrated,"
a prize essay (New York, 1856).

FRY, Cary Harrison, soldier, b. in Garrard
county, Ky., 30 Aug., 1813; d. in San Francisco,
Cal., 5 March, 1873. He was graduated at the U.
S. military academy in 1844, served in the 3d
infantry at Fort Towson, Indian Territory, but
resigned on 31 Oct., 1836, studied mediciné, and
practised in Louisville, Ky., in 1845-8. In the Mexican
war he served as major in the 2d Kent-
tucky volunteers, commanding the regiment after
the fall of its colonel and lieutenant-colonel in the
battle of Buena Vista, where he distinguished him-
self. He practised medicine in Danville and Louis-
ville, Ky., in 1847-53, and on 7 Feb. of the latter
year re-entered the regular army as paymaster,
with the rank of captain. During the Mexican
war he served at Washington, being acting pay-
master-general in 1863, and becoming deputy pay-
master-general in 1866. He was brevetted briga-
dier-general, U. S. army, on 15 Oct., 1867, and from
1869 till his death was chief paymaster of various
military divisions. In 1872 he resigned his com-
mission, and in 1873 he was a staff officer in the 3d
artillery. After serving for a short time
as assistant instructor of artillery at West Point,
he joined his regiment at the city of Mexico,
where he remained in 1847-8. After doing fron-
tier and garrison duty at various posts, he was
again instructor at West Point in 1853-4, and
adjutant of the academy in 1854-9. He was made
assistant adjutant-general on 16 March, 1861, was
chief of staff to Gen. Irwin McDowell in that year,
and to Gen. Don Carlos Buell in 1861-2, taking
part in the battles of Bull Run, Shiloh, and Cor-
linna. He was brevetted major-general Apr. 1, 1865.
Both these commissions expired on the abolition
of the office of provost-marshal-general on 30 Aug.,
1866; during that time Gen. Fry put in the army
1,120,621 men, arrested 76,363 deserters, collected
$26,306,316.78, and made an exact enrolment of
the force at the end of the war. He was brevetted
brevet major-general, U. S. army, for "faithful,
meritorious, and distinguished services." He was
adjutant-general, with the rank of colonel, of the
divisions of the Pacific in 1866-9, the South in
1869-71, the Missouri in 1871-3, and the Atlantic
from 1873 to 1875. He was retired from active service at his own request. He is now
(1887) a resident of New York city. Gen Fry's
"Final Report of the Operations of the Bureau of
the Provost-Marshal-General in 1863-6" was
issued as a congressional document (2 parts, Wash-
ington, 1868-9). He has also written "The
Adjutant-General's Department, U. S. Army,
from 1775 to 1875" (New York, 1875); "History
and Legal Effects of Brevets in the Armies of
Great Britain and the United States, from their
Origin, in 1869, to the Present Time" (1877);
"Army Sacrifices," illustrating army life on the
frontier (1879); "McDowell and Tyler in the Cam-
baign of Bull Run" (1884); "Operations of the
Army under BUell" (1884); and "New York and
Conscription" (1863).

FRY, Joseph, naval officer, b. in Louisiana
about 1828; d. in Santiago de Cuba, 7 Nov., 1873.
He entered the navy as midshipman in 1841, and
became passed midshipman, 10 Aug., 1847. In
that year he fought a duel with Midshipman
Brown, of Mississippi, near Washington, in which,
after drawing his sword during the course of the
fight, he returned it. He was promoted to master, 14 Sept.,
1855, to lieutenant on the following day, and re-
signed, 1 Feb., 1861, after the secession of his native
state. He was unable to secure a commission in
the Confederate navy owing to its limited size, and
was given a commission in the regular army; while serving in the southwest through the war, he removed to
Albany, N. Y. He accepted the command of the
filibustering steamer "Virginian" in 1873, and with thirty-six of his crew was shot as a pirate by the
authorities in Cuba, after the capture of his vessel
by a Spanish man-of-war.

FRY, Joshua, soldier, b. in Somersetshire, Eng-
land; d. at the mouth of Wills' creek, Md., 31
May, 1754. He was educated at Oxford, and, after
coming to this country, was made professor of
mathematics in the College of Maryland and Mary college, Vir-
ginia. He was afterward a member of the house of
burgesses, and served on the commission ap-
pointed to determine the Virginia and North Caro-
linaby boundary-line. He was a colonel of militia
and a member of the governor's council in 1750,
and in 1752 was a deputy governor. He was
sent to the Indians at Logtown. In company with Peter
Jefferson, he had made a map of Virginia, and his
acquaintance of the frontier gained in this em-
ployment, together with his knowledge of the In-
ian character, secured his appointment to the
command of the expedition against the French in
1754. Col. Fry died while he was conducting his
troops to the Ohio, and was succeeded by George
Washington, who had been second in command.

FRY, William Henry, musician, b. in Phila-
delphia, Pa., 10 Aug., 1815; d. in Santa Cruz,
West Indies, 21 Dec. and, d. in Philadelphia, 1845.
He was educated in the schools of his native place and at Emmetts-
burg, Md. In 1839 he became editorially con-
ected with his father's newspaper, the Phila-
delphia "Gazette." Soon afterward, in 1835, he went
the course of study at the University of Pennsyl-
vania, and there studied music, and was engaged in four orchestral overtures, which were publicly
performed. While he was partly occupied as a writer
for several newspapers, as and correspondent for
eastern journals, he produced in 1845 an English
opera, entitled "Leonora." This was given in
Philadelphia, in May, 1846. It was much discussed. The general public commended the composer for his ambition and energy, but
Frye, James, soldier, b. in Andover, Mass., in 1709; d. 8 Jan., 1776. He filled several local offices, served at the capture of Louisburg in 1745, and commanded the Essex regiment at the beginning of the Revolution, taking an active part in the battle of Bunker Hill. He was the 6th brigade of the army. He was a soldier, b. in Andover, Mass., in April, 1711; d. in Fryeburg, Me., in 1718. He was a second cousin of James Frye, noticed above. He was a justice of the peace and a member of the general court of Massachusetts, and was an ensign in He was a colonel when captured Fort William Henry in 1757, and escaped by killing the Indian that had charge of him. He was appointed major-general by the Massachusetts provincial congress on 21 June, 1775, and was commissioned brigadier-general by the Continental congress on 10 Jan., 1778, but resigned on account of infirmity on 23 April. He was an early settler of Fryeburg, Me.—His great grandson, William Pierce, second and last name of the “Tribune.” Soon afterward he wrote the music to an ode for the opening of the New York industrial exhibition of 1853, and delivered a course of ten lectures on the history of music, with illustrations on a gigantic scale, which were peculiarly unsuited to his own tastes. For several years afterward he wrote two of his own symphonies, “The Breaking Heart” and “A Day in the Country.” In 1854 and 1855 were also written other symphonies, a "Stabat Mater," and an "Eleven Violin Quartets." In 1858 the Italian opera company in New York city unsuccessfully produced a reconstructed Italian version of his "Leonora." Another opera, "Nozta Dame," brought out in 1864, won no attention. Frye was an occasional political speaker, a lecturer on topics of the day, and altogether an active man. For the last two years of his life he was accustomed to sit propped up in bed while opera was going on at the Academy, his telephone in one hand and the libretto of the opera in the other. At the foot of the bed, standing against the foot-board, were the photographs of the chief singers, daily engaged in the performance. He was one who thoroughly believed in himself, but he had not the divine faculty in music; his compositions neither charmed the many nor satisfied the demands of a just criticism. As a musical reviewer he was a determined, honest partisan, an acute analyst, and trenchant and biting. He held the theory that all true melody was evolved only in the minds of Italians, that the voice should always be paramount in operatic representations, and the orchestra serve as an accompaniment to the singers. This view apparently was not fully presented and partly justified, were caused by the reaction against the poverty of melodic invention and overloaded orchestral devices of Halévy, Meyerbeer, Spohr, and Spontini. Frye published a volume entitled "Artificial Fish Breeding" (New York, 1834).—His brother, Joseph Reese, banker, d. in Philadelphia, Pa., in June, 1865, wrote the words of his brother's opera, "Leonora," and translated others. He was largely instrumental in organizing the Union League brigade of Philadelphia during the civil war. Jointly with Robert T. Conrad he wrote a "Life of Zachary Taylor" (Philadelphia, 1848).
FUENTES, or FONTE, Bartolomé de, Spanish or Portuguese navigator, supposed to have lived in the first part of the sixteenth century. His imaginary voyages have been the subject of much controversy, and even his existence has been called in question. The story of the voyages of Fuentes, who is said to have been an admiral in the service of Spain, is contained in a letter of seven pages, which was first published in London in 1705, in "The Monthly Miscellany, or Memoirs of the Various" (London, 1708). It is not known how the letter fell into the hands of the editors of this work. According to the narrative, he sailed from the port of Lima, 3 April, 1840, took a northerly course, and, after reaching 82° N., discovered an archipelago, which he called the archipelago of St. Lazarus. He entered a river in one of the islands of the archipelago, flowing from the east, and sailed eastward through other rivers and lakes of vast extent, until he fell in with the ship of Capt. Shapely, who was coming from across the sea and consequently from the east, all of which showed clearly that there was a communication between the two oceans north of America. The letter of Fuentes was re- published by Sir Arthur Dobbs in his account of his voyages in the "Month of May" (London, 1744). Sir Arthur Dobbs says that, from information that he had gathered in America, there was a Capt. Shapely living in Boston at the date of the voyage of Admiral Fuentes. Another narrative of the same event was published in a "Voyage to Hudson's Bay" (London, 1740). The letter of Fuentes was translated into French by the distinguished geographer, Joseph Nicholas Delisle, who read two learned dissertations on the subject in presence of the Academy of sciences in 1790. He attaches considerable importance to the letter of Fuentes, and says that the real Fuentes was a Greek, who was sent to Spain he was promoted archbishop of Valencia, and retired in 1795 to the place of his birth. At Puebla he introduced many improvements; founded in the seminary of that city several chairs of learning, organized an academy of literature, and founded a printing-press. He reorganized the discipline of the convents, and established a college to educate Indian youths. Fuego left many interesting manuscripts, and published a volume on scientific subjects (1772).

FUERO, Joaquín, Mexican soldier, b. in Guadalupe Hidalgo, 21 Aug., 1814; d. in the city of Mexico, 21 April, 1861. His father was a lieutenant-colonel in the Spanish army. The son was sent to the city of Mexico for his primary education, but the young man ran away from school. He went to California in 1830, where he entered the military college of Segovia, and on leaving it entered the army as ensign. He was promoted to captain for gallantry in 1836, and in 1838 accompanied his father to the island of Cuba, where the latter soon died. Fuego then returned to Mexico, where he entered the army, with the rank of captain, in 1839, was appointed professor in the military college in 1840, and soon established a regular course of practical line-drill, military tactics, and topographical design. When Gen. Urrea pronounced against the government, on 15 July, 1840, Fuego attacked him in the citadel at the head of a column of his scholars, and drove him back. He was then given command of several companies of regular troops, in which he aided in suppressing the insurrection, after the fortnight of street-fighting. In 1841 Fuego was promoted major and resigned the vice-presidency of the military college. In 1843 he was appointed chief of staff of the army of operations in Yuma-lips, and as such directed the campaign. During the war with the United States Fuego took part in all the battles, till the defeat at Puebla, after which he protected the retreat.
of the army at the head of a small force, and received a wound that ultimately caused his death. After his death, Fuller's body was transported by ship to England, where he was buried in the cemetery at Nunhead.

**Fulford, Francis**, Canadian Anglican bishop, b. in Sidmouth, England, in 1803; d. in Montreal, 9 Sept., 1868. He was educated at Truro, Alexandria, the College at Quebec, and at Oxford, Oxford, where he was graduated in 1824. He was elected a fellow in June, 1825, and received the degree of D. D. in 1850. He was rector of Towbridge, Wilts, from 1832 till 1842, of Croydon from 1842 till 1845, and minister of the Unitarian church, Sligo, from 1845 till 1855, and was consecrated an Anglican bishop of Montreal in 1850. He died in 1859.

**Fulmer, John Wallace**, soldier, b. in Cambridge, England, 28 July, 1827. He came to New York in 1833 with his father, a Baptist clergyman, and became a bookseller, first in Utica, N. Y., and then in Toledo, Ohio. He was a treasurer of the former city in 1832–4, and in May, 1861, was appointed assistant adjutant-general of Ohio. He became colonel of the 27th Ohio regiment in August of that year, served under Pope at New Madrid and Cape Girardeau, and was brevetted for his learning, took an active part in the promotion of education throughout his diocese, and was popular with all classes in Canada. He published a work on "The Progress of the Reformation."

**Fulmer, George**, artist, b. in Deerfield, Mass., in 1862; d. in Boston, 21 March, 1898. He went to Illinois in 1896, and, having developed a taste for painting, studied in 1893 under Henry Kirke Brown, at Albany, N. Y. After working in Boston for a few years, he went to New York, where in 1897 his portrait of his former teacher, C. B. Their, was exhibited at the National Academy. He was an important member of the National Academy exhibitions for his oil paintings. His pictures began to be noticed for peculiar handling, richness of tone, and a dreaminess of conception which, when admired at all, was admired very thoroughly. He was a member of the Boston art club, the St. Botolph Club and the Painters Club. A memorial exhibition of his works was held at the Boston museum of the fine arts in 1894. His contributions to the National Academy exhibitions included "The Turkey-Pasture, Kentucky" (1879), "The Dandelion Girl," "The Roman Girl" (1879), and "The Quadrille" (1880). He sent to the exhibitions of the Society of American Artists "Priscilla quaintly" (1882) and "Nydia" (1883). Other pictures from his hand are "Cupid" (1854); "Negro Nurse, with a Child" (1861); "At the Bars" (1853); "Shewing the Donkey" (1867–9); "And She was a Witch" (1879); "The Art of Simple" (1889); "Winifred Duvart" (1881); "Psyche" (1882); "November" (1882–4); "Fedalma" (1883–4); "Aretusa" (1884); and numerous portraits. He left an unfinished picture representing a trial for witchcraft in the early days of New England.

**Fulmer, Richard**, clergyman, b. in Beaufort, S. C., 23 April, 1804; d. in Baltimore, Md., 30 Oct., 1876. He entered Harvard in 1820, and achieved a high standing in his class, but was obliged, on account of feeble health, to leave during his junior year. He then studied law in Beaufort, was admitted to the bar, and soon established himself in his profession. During a period of great religious interest in Beaufort he felt it his duty to abandon the law and devote himself to the Christian ministry. At the same time he was constrained to leave the Protestant Episcopal church, in which he had been brought up. He was at once ordained, and called to the pastorate of the Baptist church in Beaufort. His reputation as a preacher soon became national, and his services were widely sought in promoting religious revivals. During his residence in Beaufort he was engaged in two memorable controversies—one with Bishop England, of Charleston, and the other with President Wayland, of Brown university, Providence, R. I., on the subject of slavery. In both he displayed abilities of the highest order, united with a spirit of Christian courtesy and benevolence. In this he was eminently successful in Europe for the benefit of his health. In 1846 he accepted a call to the pastorate of a Baptist church in Baltimore, Md., where he spent the remainder of his life. He received the degree of D. D. from Columbia university, Washington, in 1844, and from Harvard in 1855. Dr. Fuller was one of the most effective pulpit orators of his day. His sermons, both in style and delivery, were...
framed upon the models of the great French preachers, and of their kind have seldom been equaled, and won the Missouri press, and was president of the southern Baptist convention. In addition to pamphlets containing his debates with Bishop England (Baltimore, 1840), and Dr. Wayland (1845), and various sermons published separately, he was the author of volumes of "Sermons" (New York), and "Arguments for the Baptists and Close Communion" (Richmond, 1840), and a "Psalmist," which has been much used in his denomination. A memoir of Dr. Fuller was written by his nephew, Dr. James H. Cuthbert (New York, 1879).

FULMER, Richard Henry, artist, b. in Bradford, N. H., 10 Oct., 1822; d. in Chelsea, Mass., 24 Dec., 1871. He was left an orphan when seven years of age, and in 1840 went to Boston, and afterward to Chelsea, working at the trade of a cigar-maker, but soon began to teach himself to draw and paint. His health failing from overwork in 1854, he spent two years in Massachusetts, and on his return obtained a place on the Chelsea police force, where he was on duty at night, and painted during the day. He had excellent natural gifts, and such a retentive memory that he is said to have made a careful study of business life, something a few moments for. He painted landscapes exclusively. His works are represented in some of the finest collections in Boston.

FULMER, Timothy, congressman, b. in Chilmark, Martha's Vineyard, Mass., 11 July, 1775; d. in Groton, Mass., 13 Aug., 1829. He was the first minister of Princeton, Mass., was the third in descent from Thomas, who emigrated from England in 1638. The younger Timothy was graduated at Harvard in 1801 with the second honors. After teaching in Leicester academy, he studied law. He took his seat in Congress, and served in the House of Representatives from Groton, which he had removed about 1826. While in Congress, he was chairman of the committee on naval affairs, and was distinguished as an orator, making effective speeches in behalf of the Seminole Indians. He was an ardent supporter of John Quincy Adams, and published a pamphlet entitled "The Election for the Presidency Considered," which was widely circulated. Mr. Fuller was a hard-working lawyer, and an active and public-spirited man. He died suddenly of cholera, intestate and insolvent. Besides the works mentioned above, he published an oration delivered at Watertown, 4 July, 1809, and an address before the Massachusetts peace society (1826).—His daughter, Sarah Margaret, Marchioness Ossoli, author, b. in Cambridgeport, Mass., 23 May, 1810; d. on Fire Island beach, 13 July, 1839, was the eldest of eight children. She derived her first teaching from her father, studied Latin at the age of six, and injured her health by over-application. At thirteen she was a pupil at the famous school of Dr. Park, in Boston, where she began the study of Latin and Greek. Promoted to a school in Groton, kept by the Misses Prescott. On the sudden death of her father, Margaret vowed that she would do her whole duty toward her brothers and sisters, and she faithfully kept the vow, teaching school on Boston and Providence, and afterward taking pupils in a school which he had seen only the rate of two dollars an hour. During the transcendental period she knew intimately the leading minds of the time—Emerson, Hawthorne, Ripley, Channing, Clarke, Hedge—and in the company of such was very brilliant, meeting them as equals. She first met Emerson in 1835, and the next year visited him at Concord. She went occasionally to Brook Farm, though never fully believing in the success of that experiment, and never living there. She held conversations in Boston, conducted the "Diary," translated from the German, projected works, and wrote the "Summer on the Lakes," the record of a season spent in travelling from June to September, 1843. In December, 1844, she went to New York as literary critic of the "Tribune," then under the management of Horace Greeley, in whose household she at first lived. While in New York, she visited the prisons, penitentiaries, asylums, theatres, opera-houses, music-halls, picture-galleries, and lecture-rooms, writing about everything in the "Tribune," and doing much to move the level of thought on philanthropic, literary, and artistic matters. Her intimacies here were mainly with practical, honest, striving people. Even William H. Channing was a minister at large, and C. P. Cranch received boarders, and Lydia Maria Child was connected with the press. This she called her "little business life," and she pursued it unremittingly for about twenty months, after which, having saved a little money, she went to Europe on the invitation of Mr. and Mrs. Francis Spring. This was in 1846. In Europe she saw the foremost people in the literary, social, political, and reformatory world, spent the late summer and autumn of 1847, and then, travelling, established herself for a time at Rome in the spring of 1847, passed the summer, and returned to Switzerland and the more northern Italian cities, and returned to Rome in October. She was married in September. In January, 1848, she returned to Rome, and in August she was married to G. B. Massimo, a young Italian nobleman.
hurricane, and the vessel was driven on the shore at Fire Island in the early morning at four o'clock. The wreck was complete. A great wave swept the deck, and carried all before it. The boy was drowned in the arms of the steward while the latter was trying to reach the land, and the lifeless body was carried on the beach. Neither mother nor father was ever heard of again.

It is not strange that to most people he should be a name only, for he was married but a short time, he was not seen out of his native country, and there was known but slightly save to a small number of friends, while his inability to speak any language except his own naturally prevented his mingling with Americans. But he was a gentleman, sincere, true, and self-respecting. All we know of him is to his credit. He was sufficiently educated for his rank in society. That he was a devoted husband is certain, ready to share his wife's fortune whatever it might be, and in all respects thoughtful of her happiness, believing in her entirely. His future in this country would have been melancholy. He must have been dependent on the efforts of his wife, and those efforts, everywhere, are always a hard task. But had he been, he might have not availed to support a family.

It will be seen that her career naturally fell into three divisions. The first period lasted till her life in New York in 1844. The second included her experience there. The third embraced her activity in Rome. The fact that the transcendent epoch, could not be repeated. It was extremely interesting, exciting, stimulating to the mind. She was under stimulating influences. Self-culture was then the key-note of her endeavor. The third could not be reproduced. That extraordinary epoch, it lacks; its spirit was exceptional, in its way, as the first. The second epoch—of literary production—was still open to her, enlarged and simplified. She was essentially a critic. She was not a reformer, and could not have been, her means been ever so ample. This lived by her pen, and her livelihood must have been precarious—so much so that some of her admirers looked on the final catastrophe as a deliverance for her. What she might have become if she had lived, it is useless to conjecture. She possessed brilliant gifts of many kinds. She had a warm heart, but her natural talent was for literature. She wrote a great deal for magazines, various papers, a complete account of which may be found in Higginson's "Life." Her collected works, including "Summer on the Lakes" (1849), "Woman in the Nineteenth Century" (1844), and "Papers on Literature and Art" (1846), were edited by her brother, Rev. Arthur B. Fuller (Boston, 1855). Her book on the Roman republic was lost with her. The life of Margaret Fuller has been written by Emerson, Clarke, and Channing, edited for the most part by Rev. Henry Channing (1852). This is strongest on the transcendent side. There is also a memoir of her by Julia Ward Howe, in the "Eminent Women" series (Boston, 1888), and one by Thomas Wentworth Higginson in the "Memoirs of Letters" series (Boston, 1884). The last is the most complete, though somewhat warped by the author's idea that Margaret Fuller's career culminated in philanthropy.

—Her brother, Richard Frederick, author, b. in Cambridge, Mass., 15 May, 1821; d. in Wayland, Mass., 29 May, 1889, was graduated at Harvard in 1844, and became a lawyer in Boston. Besides the life of his brother, mentioned above, he published "Visions in Verse" (Boston, 1864). —Another brother, Arthur Buckminster, clergyman, b. in Cambridgeport, Mass., 10 Aug., 1822; d. in Fredericksburg, Va., 11 Dec., 1862, was fitted for college by his sister Margaret, and graduated at Harvard in 1843. He then studied theology at Cambridge divinity-school, and was for some years a teacher and missionary in Illinois. He was pastor of a Unitarian church in Manchester, N. H., in 1848, of the new church in Dedham, Mass., 1852, and of a church in Watertown, Mass., till 1 Aug., 1861, when he became chaplain of the 16th Massachusetts regiment. He was honorably discharged on 10 Dec., 1863, on account of failing health; but, being presented by the alarum society of Fredericksburg on the following day, he volunteered to join a detachment in crossing the Rappahannock, and fell while attempting to drive the Confederate sharpshooters out of the city. His courage, enthusiasm, and sympathy for the men of his regiment had greatly endeared him to them. He edited several of his sister's works (1855), and published "Sabath-School Manual of Christian Doctrine and Institutions" (Boston, 1850); "Historical Discourse delivered in the New North Church, Boston, 1 Oct., 1854," and Liberty versus Romanism," two discourses (1859), and "The Battle of Fredericksburg." On his brother, Richard F. Fuller (Boston, 1863). See also a sketch by T. W. Higginson in "Harvard Memorial Biographies," vol. ii.

FULTON, Thomas Brock, Canadian Anglican bishop, b. in Kingston, Canada, 18 July, 1816. He was educated at a private school, and at Chambly theological seminary, and in 1835 was ordained in the Anglican church at Toronto. After holding pastorates in Chatham, Thorold, and Toronto, where he was rector of St. George's church for fourteen years, he was appointed archdeacon of Toronto in 1856, and in 1858 became the newly created bishop of the Protestant Episcopal church in New Orleans in 1858. He has devoted much time to researches regarding the canon law, and is considered one of the ablest canonists in his denomination. He has received the degree of D. D. and Litt. D., and at present (1877) resides in St. Louis. His principal works are "Letters on Christian Unity" (1868); "Index Canonum," including those of the general and provincial councils in Greek and English (New York, 1872); "Laws of Marriage" (1883); and "Documentary History of the Protestant Episcopal church in the Confederate States."

FULTON, Justin Dewey, clergyman, b. in Earlville, N. Y., 1 March, 1828. He was graduated at the University of Rochester in 1851, spent one year at the Rochester theological seminary, and in 1853 became pastor of a Baptist church in St. Louis, Mo. In 1855 he removed to Sandusky, Ohio, and in 1859 to Albany, N. Y., where the Tabernacle Baptist church was established under his ministry. In 1868 he was called to the Tremont Temple in Boston, where he labored for nine years. In 1873 he became a pastor in New York, N. Y., but resigned in 1887, and announced his intention of endeavoring to convert Roman Catholics to Protestantism. The degree of D. D. was conferred upon him by the University of Rochester in 1871. Dr. Fulton is a voluminous author. Among his works are "The Roman Catholic Elements of Harrod's "History of America"" (1859); "Life of Timothy Gilbert" (1864); "Woman as God Made Her" (1867); "The Way Out" (1870); "Show Your Colors" (1881); and "Rome in America" (1884).
FULTON, Robert, inventor, b. in Little Brit-
ain township (now Fulton), Lancaster co., Pa., in 1765; d. in New York, 24 Feb., 1815. His father came from Kilkenny, Ireland, early in the 18th cen-
tury, and settled at Little Britain. At the age of thirteen Robert constructed paddle-wheels, which he applied with success to a fishing-boat. The years 1784-5 were spent in painting miniature portraits and landscapes, mechanical and archi-
tectural drawing, and whatever came in his way in the line of artistic work, at Philadelphia, where he numbered Benjamin Franklin among his friends. In 1786 Fulton was received into the family of Benjamin West, under whose instruction he studied for several years. Afterward he practised his art in Devonshire, under the patronage of wealthy persons, among whom were the Duke of Bridgewater and Earl Stanhope. With his acquaintance with these persons begins his experiments in mechanics. Francis Egerton Bridgewater (last duke of that name) had become famous by the construction of a navigable canal from Worsley to Manchester, and Charles, Earl Stanhope (third of that title), was sent by the author to the president of the American Philosophical Society and a student of mechanics and engineering. In 1793 Fulton actively engaged in a project for the improvement of canal navigation, and in the fol-
lowing year obtained from the British government a patent for a double-inclined plane for raising or lowering boats from one level to another on the system of small canals. An account of this paten-
t is in the "Reperotory of Arts," vol. xvi. In 1794 he patented a mill for sawing marble. Some time in 1796 he made plans for the construction of cast-iron aqueducts, and a great work of this kind was built for crossing the Don. A bridge built upon his plans was erected at Wands-
worth, and others at several points on the Surrey railway. He also patented in England a machine for spinning flax, a dredging-machine, a market or deep-sea-boat, and a trader and amphibious boat to be used on canals. In 1798 he published his "Treatise on the Improvement of Canal Navigation," having previously published some articles on the subject in the London "Morning Star," advocating small canals. Copies were sent by the author to the president of the United States and other officials, each accompanied by a letter emphasizing the advantages to be derived by the United States from canal navigation. In 1798 he addressed letters, or rather essays, to Lord Stanhope, which were apparently intended for pub-
lication—one aiming to arouse English interest in internal improvements, and the other to promote the interests of education in France. Among his manuscripts was found a work, probably written about the same time with the above, advocating free-trade. In 1794 he became a member of the family of Joel Barlow, author of the "Columbiad," in Paris. Here he painted a panorama, the first ever shown in the French capital. In December, 1797, Fulton made an experiment on the Seine with a boat for submarine navigation, to be used in 1800. In 1800 he conducted some experiments at Brest with his submarine or plun-
ging boat, under the auspices of the French govern-
ment, which, however, on Fulton's failure to blow up the British ships that sailed along the coast, became disaffected with the undertaking. The gov-
ernment of England, at the instigation of Lord Stanhope, determined to secure Fulton's services for that country, and accordingly he went to Lon-
don in May, 1804, after a short sojourn in Hol-
lard. The submarine boat was finally reported by
the British commission to be impracticable; but the torpedo they thought of some value, and Fulton was taken out with an expedition to try it against the French fleet at Boulogne, where the torpedoes burst harmlessly beside the French ships. An experiment in October, 1805, with an improved apparatus, on a brig of 200 tons, provided for the purpose by the government, resulted in the destruction of the ship. In 1806 Fulton had re-
turned to the United States, and renewed his ex-
periments with torpedoes. His system was never adopted, though in 1810 congress appropriated $3,-
000 for testing the torpedoes and submarine expl
sions. About this period Fulton invented a ma-
chine to cut the cables of ships at anchor. In 1818 he took out a patent for "Several Improv-
enments in Maritime Warfare, and Means for injur-
ing and destroying Ships and Vessels of War by igniting Gunpowder under Water." A letter from him to Jefferson, describing his submarine gun-
nery, was printed from his manuscript in "Scrib-
ner's Monthly," vol. xxii., with the reproduction of his rough sketches. Fulton began to turn his at-
tention to the subject of steam navigation as early as 1769, as is shown by a letter in the "Scrib-
nner's Monthly," dated 30 Sept. of that year. In 1803, having the financial assistance of Chancellor Livingston, Fulton launched a steamboat on the Seine, which, owing to faulty construction of the frame, imme-
diately sank. Another boat was soon built, with
the old machinery, and a trial-trip was made, but
no great speed was attained. Encouraged with
this partial success, the United States and other officials, each accompanied by a letter emphasizing the advantages to be derived by the United States from canal navigation. In 1798 he addressed letters, or rather essays, to Lord Stanhope, which were apparently intended for publication—one aiming to arouse English interest in internal improvements, and the other to promote the interests of education in France. Among his manuscripts was found a work, probably written about the same time with the above, advocating free-trade. In 1794 he became a member of the family of Joel Barlow, author of the "Columbiad," in Paris. Here he painted a panorama, the first ever shown in the French capital. In December, 1797, Fulton made an experiment on the Seine with a boat for submarine navigation, to be used in 1800. In 1800 he conducted some experiments at Brest with his submarine or plun-
ging boat, under the auspices of the French govern-
ment, which, however, on Fulton's failure to blow up the British ships that sailed along the coast, became disaffected with the undertaking. The gov-
ernment of England, at the instigation of Lord Stanhope, determined to secure Fulton's services for that country, and accordingly he went to Lon-
don in May, 1804, after a short sojourn in Hol-
lard. The submarine boat was finally reported by
at Danvers, in 1789. John Fitch, in 1788, built another boat, propelled by steam from Philadelphia to Burlington, severally for his friends, being the longest trip ever made by a boat under steam at that time. In October, 1788, Millar, Taylor, and Symington put a steamboat on Lake Dalwhinton, Scotland. In 1789 a steamboat built under Fitch's directions attained a speed of eight miles an hour on the river. In 1790, William Logan stated a small boat on Savannah river; the same year Lord Stanhope patented an ambidextrous navigator with a propeller in the form of a duck's foot. John C. Stevens, of Hoboken, N. J., constructed boats sailing with a speed of five or six miles an hour in 1794. Samuel Morse took a boat by steam from Hartford to New York city. Robert L. Stevens sailed a paddle-wheel steamer on the Hudson only a few days later than Fulton's "Clermont." This boat was afterward taken by sea to Philadelphia, thus making the first steamship voyage on the ocean. Fulton and Stevens are Fulton's most formidable competitors for the honor of demonstrating the feasibility of steam navigation, although many other claimants have had partisans. So late as 1871, John H. B. Latrobe, in an address before the Maryland Historical Society, entitled "A Visit to the Saratoga," in the form of a novel, urged the claims of Nicholas J. Roosevelt as the inventor of vertical wheels over the sides of the boat, which produced, in Fulton's hands, when propelled by steam, the first practical result. Fitch's boat was propelled by vertical paddles, and Roosevelt by the expulsion, at the stern, of water that had been drawn in at the bow; Fulton, in his Paris experiments, as set forth by Colden, his biographer, preferred endless chains with revolving boards or floats. Whatever may have been Fulton's honors as to the invention, he undoubtedly deserves the credit of first bringing into practical use the steamboat as a conveyance for passengers and freight, although the undertakings of many others have been less efficient practically. The success of the "Clermont" was followed by the rapid multiplication of steamboats. A list of those built under Fulton's superintendence comprises the "Car of Neptune," the "Paragon," the "Fire-fly," the "Richmond," the "Washington," the "Vesuvius," the "Olive Branch," the "Emperor of Russia," and the "Chancellor Livingston." Fulton was several times affected with gout, and in 1812 was cashiered from the ship, the "Perry,", a vessel built for his brother, which he had previously commanded. After the end of the war, he was appointed master of the "F appointments," and in 1817, by the New York Historical Society, has a unique copy contain-

FULTON, William S., senator, b. in Cecil county, Md., 2 June, 1785; d. in Roswell, near Little Rock, Ark., Aug. 15, 1862. He graduated at Baltimore college in 1813, and began to study law with William Pinckney. Before coming of age he served as a volunteer for the defense of Fort McHenry in the war of 1812. At the conclusion of the war he was admitted to the bar, and was reelected to the state legislature in 1819, by Gen. Jackson, secretary of the territory of Arkansas, and in 1835 its governor, which office he held until the territory became a state. He was then chosen as one of its first U. S. senators, serving from 5 Dec., 1836, until his death.

Funes, Francisco, South American author, b. in Cordova de Tucuman, Buenos Ayres, about the middle of the 18th century; d. about 1890. He studied under the Jesuits in the university of his native city, and, after the expulsion of that order, under the Frankish crown. He died an Jesuit priest, received the title of doctor of theology, and became dean of the church of Cordova. When the colonies of Spain revolted he took an active part in the cause of independence. He was named deputy to the congress which assembled in the city of Tucuman in 1816 to elect a president of the united provinces of the Rio de la Plata, but declined on account of his infirmities. The work which has gained him a high reputation in Spanish America is entitled "Ensayo de la historia civil del Paraguay, Buenos Ayres y Tucuman" (6 vols., Buenos Ayres, 1818-17). His work, which comprises the period of the revolution in Peru by Tupac-Amaru, ends with a Sketch of the Revolution, from 25 May, 1810, to the Opening of the National Congress on the 26th of March, 1810.

FURMAN, Charles M., financier, b. in Charleston, S. C., 17 June, 1796; of Wall and Kingston) and one son and three daughters. The literature of the steamboat controversy is extensive. The fullest list on the subject is afforded by Preble's "History of Steam Navigation." Fulton's published works are: "A Treatise on the Improvement of Naval Marine Engines," 2 vols. (London, 1796; French translation, Paris, 1797); the New York historical society has a unique copy contain-

ing the original drawings from which the engravings were made; "Letters on Submarine Navigation" (London, 1811; American translation, Portland, 1811); "Torpedo War" (New York, 1810); "Letter to the Secretary of the Navy on the Practical use of the Torpedo" (Washington, 1811); "Report on the Practicability of Navigating with Steamboats on the Southern Waters of the United States" (New York, 1813); "The Torpedo," a novel (New York, 1814). Copies of Fulton's original drawings, including the illustrations to the "Columbian" which was the first to be printed, are contained in Reigart's "Life of Fulton" (Philadelphia, 1856). Fulton's paintings seem to have gone out of existence. Smith, in his catalogue of portraits, catalogues a fancy picture of Lady Jane Grey, painted by Fulton about 1790. Fulton's life has been written by Cadwalader D. Colden (New York, 1817), and by James Remwick in Sparks's "American Biography."
FURMAN, Gabriel, lawyer, b. in Brooklyn, N. Y., 28 Jan., 1800; d. there, 11 Nov., 1884. He studied law and early showed a taste for literature, especially in antiquarian lines. In 1827 he was appointed a justice of the Brooklyn municipal court, which office he held for three years. He served as state senator in 1830-32, and in the latter year became the Whig nominee for lieutenant-governor, but was not elected. In either politics or law he might have attained eminence, but the fascination of books and study, and the optimism, quenched any ambition to engage actively from the activities of political and professional life, and finally brought him to a clouded end in the Brooklyn city hospital. He was a man of pure character and genial nature, an acceptable lecturer, and possessed an cultivated taste and a wide range of information. Later historians of Long Island and of Brooklyn have profited largely by his minute and extensive antiquarian researches, contained in numerous manuscript volumes. His only published work was "Notes, Geographical and Historical, on Set, N. Y., in 1755; d. in Charleston, S. C., in August, 1835. While he was an infant his father removed to Sumter district, S. C. His education, though obtained in an irregular way, became considerable, including a knowledge of Latin, Greek, and Hebrew languages. He was converted at an early age, and soon began to preach, and when nineteen years old was ordained pastor of the High Hills Baptist church. On one occasion he was not allowed by the sheriff to preach in the court-house at Camden because he was not a member of the established (Episcopal) church. At the beginning of the Revolution he actively promoted measures for removing the disabilities under which dissenters labored. During that struggle he became so conspicuous as a patriot that Lord Cornwallis offered a reward for his apprehension, and for a while he retired to Virginia, where Patrick Henry was a regular attendant on his ministry. In 1787 he became pastor of the 1st Baptist church in Charleston, S. C., in which relation he continued for thirty-seven years. He was a member of the convention that framed the first constitution of South Carolina, and vigorously opposed in that body the provision which excluded ministers from certain offices. He was unanimously elected in 1814 the first president of the triennial convention, a representative organiza tion in his honor. In 1820 he received the degree of D. D. from Brown university. He published several sermons and discourses, including one commemorative of George Washington, delivered by appointment of the Society of Cincinnati.—His son, James Cleaveland, educator, b. in Charleston, S. C., 5 Dec., 1828, was educated at Charleston College, but was not graduated, owing to a severe illness in his senior year. He entered the Baptist ministry in 1838, serving as pastor of churches in Camden and Fairfield till 1844, and in Society Hill, with an interval, till 1842. He was president for many years a director of the South Carolina railroad, and visited England on an important mission in behalf of that corporation. He sat in the secession convention of 1860, and was a member of the National democratic convention that nominated Mr. Seymour for president in 1860. He was for many years a member of the lower branch of the legislature, and afterward represented his native city in the state senate. He was for many years a member of the House of Representatives in the state legislature.

FURNESS, William Henry (fur-ness), clergyman, b. in Boston, Mass., 20 April, 1803. He was graduated at Harvard in 1820, and completed his theological studies at Cambridge in 1823. In January, 1825, he was ordained pastor of the 1st Congregational Unitarian church in Philadelphia, where he remained until he retired from the ministry, in 1875. In 1850 he was made president of Harvard, 1847, and that of Doctor of Letters from Columbia at its centennial anniversary in 1887. The theological position of Dr. Furness is peculiar, belonging as he does to the extreme humanitarian school distinguishing itself by that of Canning, Peabody, and Norton. He seeks, for the most part, the miraculous facts of the New Testament, yet accounts for them by the moral and spiritual forces resulting from the pre- eminent character of the Saviour, who, in his view, is an exalted form of men's humanity. His labors as a preacher and an author has been to ascertain the historical truth and develop the spiritual ideas of the records of the life of Christ. His books reveal a highly cultivated intellect, impelled by enthusiastic ardor, and enriched by a glowing fancy. The religious works of his later years have not the same effect. The "Diadem." Besides many occasional sermons he is the author of "Remarks on the Four Gospels" (Philadelphia, 1855; London, 1887); "Jesus and His Biographers." (Philadelphia, 1888); "Domestic Worship," a volume of sermons (1849; ed., Boston, 1880); "A History of Jesus" (Philadelphia and London, 1850; new ed., Boston, 1883); "Discourses" (Philadelphia, 1855); "Thoughts on the Life and Character of Jesus of Nazareth." (Boston, 1836); "The Veil partly Lifted and Jesus becoming Visible." (Boston, 1834); "The Unconscious Truth of the Four Gospels." (Philadelphia, 1868); "Jesus" (1871); "The Power of Spirit Manifest in Jesus of Nazareth." (1877); "The Story of the Resurrection Told Once More." (1883); and "Verses: Translations and Hymns." (Boston, 1868). He had also translated portions of Schubert's "Mirror of Nature," (1849); "Gems of German Verse," (1831); "Julius and Other Tales," (1856; enlarged ed., 1859); and translated and edited Dr. Daniel Schenkel's "Characterbild Jesu," an elaborate essay written as a reply to Renan's work, under the title of "Moral Life of Jesus of Nazareth." (2 vols., Boston, 1866). His version of Schiller's "Song of the Bell," is considered the best that has been made. Mrs. Annis Lee Wister.
the translator, is his daughter.—His son, William Henry, artist, b. in Philadelphia, Pa., 21 May, 1838; d. in Cambridge, Mass., 4 March, 1867, left school at the age of sixteen, and entered a counting-house, but a year later devoted himself to art. After spending two years studying in Düsseldorf, Munich, Dresden, Venice, and Paris, he settled at first in Philadel-phia, but afterward removed his studio to Boston, according to a local legend, improvement of an artist was rapid, and at the time of his death he held high rank as a painter of portraits, his best work being marked by firmness of drawing, truth of color, fidelity to characteristic traits, and a fine feeling for expression. He was fortunate in his connections—Charles Storm, 13 Aug., Mott, his father, Dr. Furness, and other well-known persons having sat to him. His most successful achievements, however, gave promise of what he might have accomplished had he lived.—Another son, Horace Howard, author, b. in Philadelphia, 2 Nov., 1833, was graduated at Harvard in 1854. He spent three years in Europe, returned to his native city, studied law, and was admitted to the bar in 1859. He has been a diligent student of Shakespeare, and undertook the editing of a new version of the "Poems," the first of which appeared in 1871, and six volumes have been issued up to this date (1887).—Helen Kate, author, b. in Philadelphia, Pa., 26 July, 1837; d. 30 Oct., 1888, was the wife of Horace Howard. Her maiden name was Rogers. Mrs. Furness published a "Variorum Edition of Shakespeare," the first of which appeared in 1871, and six volumes have been issued up to this date (1887).—Helen Kate, author, b. in Philadelphia, Pa., 26 July, 1837; d. 30 Oct., 1888, was the wife of Horace Howard. Her maiden name was Rogers. Mrs. Furness published a "Variorum Edition of Shakespeare," the first of which appeared in 1871, and six volumes have been issued up to this date (1887).—Helen Kate, author, b. in Philadelphia, Pa., 26 July, 1837; d. 30 Oct., 1888, was the wife of Horace Howard. Her maiden name was Rogers. Mrs. Furness published a "Variorum Edition of Shakespeare," the first of which appeared in 1871, and six volumes have been issued up to this date (1887).—Helen Kate, author, b. in Philadelphia, Pa., 26 July, 1837; d. 30 Oct., 1888, was the wife of Horace Howard. Her maiden name was Rogers. Mrs. Furness published a "Variorum Edition of Shakespeare," the first of which appeared in 1871, and six volumes have been issued up to this date (1887).—Helen Kate, author, b. in Philadelphia, Pa., 26 July, 1837; d. 30 Oct., 1888, was the wife of Horace Howard. Her maiden name was Rogers. Mrs. Furness published a "Variorum Edition of Shakespeare," the first of which appeared in 1871, and six volumes have been issued up to this date (1887).—Helen Kate, author, b. in Philadelphia, Pa., 26 July, 1837; d. 30 Oct., 1888, was the wife of Horace Howard. Her maiden name was Rogers. Mrs. Furness published a "Variorum Edition of Shakespeare," the first of which appeared in 1871, and six volumes have been issued up to this date (1887).—Helen Kate, author, b. in Philadelphia, Pa., 26 July, 1837; d. 30 Oct., 1888, was the wife of Horace Howard. Her maiden name was Rogers. GABARET, Jean de (gah-bah-ray), governor of Martínique, b. in the island of Ré in 1620; d. in Rochefort, 31 March, 1697. He entered the navy at the age of sixteen years, and in 1633 had already obtained the rank of commodore. In 1677 he commanded the vanguard of d'Estree's fleet in the West Indies, entered the port of Tobago at its head, amid the cross-fire of the forts and the Dutch fleet, on 27 Feb., and in 1678 captured the same island, and, after destroying Granada, returned to Europe and participated in the battle of La Hogue, 29 May, 1692. In 1693 he was appointed governor-general of Martínique. Although he found the island in a defenseless state, he soon organized troops and armed the forts. An English fleet of twenty-eight men-of-war and eight transports, with 4,300 Marie Antoinette's invasion under Sir Francis Wheeler, anchored in Port Royal on 1 April, and landed 1,600 men under Col. Fouilke, which were defeated and forced to re-embark, while Sir Francis landed with 2,000 men at Diamond bay. On 15 April he received a re-enforcement from Antigua under Gen. Codrington, and concentrating all his forces, over 5,000, at Front Cananville, he marched on the capital, Saint Pierre. Gabaret had only 400 disciplined troops and 1,500 armed slaves, but met the invaders on 31 May, 1693, at Précheurs, defeated, and forced them to reembark. He even attacked, in 1694, the port of Kingston, Jamaica, and sunk some English ships. After his return he organized the administration, introduced many useful reforms, embellished the capital, built the city-hall, and made improvements in the port in 1697. He died on 10 March, 1699, and was buried on the same day in the chapel of St. Peter's Church. In 1698, to Louis XIV., a project for gradual emancipation, which was printed under the title of "Memoire présenté à Sa Majesté par le comte de Gabaret, gouverneur de la Martinique." The name of his daughter, Denise, on the title-page, graduel des esclaves." In this he suggested the colonization of the slaves in Cayenne and Patagonia, which would encourage the immigration of white settlers to Martínique, and form new and useful French colonies in that island. The marquis de Châtelherault, favored the project, and reported it to the king, who called Gabaret to France. He sailed in January, 1697, but shortly after his arrival died of exposure to the cold, to which he had not been accustomed.

GABB, William More, paleontologist, b. in Philadelphia, Pa., 16 Jan., 1839; d. there, 30 May, 1878. He was educated in Philadelphia, and acquired his knowledge of geology in the Academy of natural sciences of that city. In 1862 he was appointed paleontologist to the geological survey of California, under Prof. Josiah D. Whitney, and continued actively engaged in that work until 1865. The cretaceous and tertiary fossils were classified by him, and the portion devoted to that subject in the first volume on paleontology of the "Geological Survey of California" (1874), and the entire volume on that section of the "Geological Survey of California" (1876), and the entire volume on that section of the "Geological Survey of California" (1876), was compiled by him. Subsequently he published an extended memoir "On the Topography and Geology of Santo Domingo," in the "Transactions of the American Philosophical Society," vol. xiv. (Philadelphia, 1873). He then went to Costa Rica under an appointment from the government, and engaged in a topographical and geological survey of that country, where he also made extensive ethnological and natural history collections for the Smithsonian Institution. Mr. Gabb published a memoir "On the Topography and Geology of Costa Rica," with a map, in "Petermann's Mittheilungen," and also one on the "Ethnology of Costa Rica," in the "Transactions of the American Philosophical Society." His report on the geology and paleontology he left unpublished at the time of his death, Pedro L., in his "Transactions of the American Philosophical Society," vol. xiv. (Philadelphia, 1873). He contributed frequent papers to the scientific journals and proceedings of societies. He received an election to the National Academy of sciences, was also a member of other scientific societies, and ultimately gained a reputation for greater knowledge of American invertebrate paleontology of the cretaceous and tertiary age than any other scientist of his time.

GABRIAC, Paul Joseph de Cadolme, Marquis de, French diplomatist, b. in Heidelberg, Baden, 1 March, 1792; d. in Paris, 13 June, 1865. He entered the diplomatic corps in 1811 as secretary of the embassy at Naples, and in 1812-'14 was consule general at New York, and temporarily in charge as minister in Washington. Under the restoration he was appointed secretary of legation at Turin in 1815, chief secretary at St. Petersburg in 1820, and minister plenipotentiary at Stockholm in 1823. In 1826 he was appointed by the prime minister, Count Villèle, to the Brazilian mission, which had been refused by different diplomatists on account of the difficult situation of affairs, as the emperor, Pedro I, was the de facto emperor of the colonies of Brazil, and was not recognized by the different European governments to establish an independent government in Portugal. Gabriac seconded the demands of England and Austria so effectually that at last the emperor appointed, in 1827, his brother Miguel regent of Portugal in the name of his daughter, Dona Maria de Giafra. He also renewed the commercial treaty with the empire, signed 10 Aug., 1828, a convention by which Brazil adopted the French maritime law, and in the same year had the same law adopted by all the South American republics. In 1833 he was sent as minister to Switzerland, but returned when the July revolution of 1830 made his special mission superfluous. In 1837 he was sent on a special mission to Mexico, and in 1838 to Washington; he was in 1841 made a peer of France, and in 1833 life senator by Napoleon III. He is the author of "La question Brésilienne" (Paris, 1829); "Les républiques de l'Amérique du Sud considérées dans leur avenir" (1851); and "Dom Pedro I., notes et souvenirs personnels" (1854).

GADSDEN, Christopher, patriot, b. in Charleston, S. C., in 1724; d. there, 28 Aug., 1805. He was sent at an early age to England, where he received his education. He returned to Charleston in 1741, and shortly afterward became a clerk in a counting-house in Philadelphia, where he remained till he was twenty-one years of age. After a second visit to England in 1760, he undertook on his own account in Philadelphia, and such was his success that he was soon able to buy back the estate which his father, in 1735, had lost at play with Admiral Lord Anson. He was one of the first to appreciate the full measure of the difficulty with Great Britain, and the patriotic, sympathetic and resolute side. He was the friend and correspondent of Samuel
Adams, was a delegate to the first Colonial congress, which met in New York in October, 1763, and at which was adopted a "Declaration of the Rights and Grievances of the Colonies." He was a member also of the first Continental congress, which met in Philadelphia in September, 1774. When his party was defeated at the battle of Saratoga, he took the field with the rank of colonel, and was actively engaged in the defence of Charleston in 1776. In September of the same year he was promoted to the rank of brigadier-general. He was one of the framers of the state constitution in 1778. As lieutenant-governor of South Carolina, he recommended the capitulation when Charleston was taken by Sir Henry Clinton in May, 1780. He was arrested somewhat later, by order of Lord Cornwallis, and carried to Fort Augustine, where, a parole having been offered and refused, he was detained for forty-two weeks. He was exchanged in 1781, and in the following year he was elected governor of South Carolina, but declined the office on account of age and infirmity. He continued, however, to take a deep interest in public affairs, and gave his services both in the house of representatives and in the senate of his state. In 1824, Christopher Edwards, P. E. bishop, b. in Charleston, S. C., 25 Nov., 1785; d. there, 24 June, 1832, obtained his early education in the "Associate Academy" in Charleston. In 1802 he entered the junior class in Yale college, and was graduated with great distinction in 1804. John and Christopher were members of the same class, and the friendship formed with young Gadsden continued through life. He was ordained deacon by Bishop Benjamin Moore, in St. Paul's chapel, New York city, 25 July, 1807, and priest by Bishop Madison, in Williamsburg, Va., 14 April, 1810. In February, 1810, he was chosen to be assistant minister of St. Philip's church, Charleston. On the death of the rector, in 1814, Mr. Gadsden was elected to fill his place. He received the degree of D. D. from South Carolina college in 1815. After the death of Bishop Bowen in 1839, Dr. Gadsden was elected bishop, and was consecrated in Trinity church, Boston, Mass., 21 June, 1840. Bishop Gadsden's episcopate of twelve years was marked by great devotion to duty, prominence in church work, and he displayed noble qualities which endeared him to both clergy and laity. On his visits he was particularly attentive to the colored people, often collecting them for purposes of devotion and instruction. He confirmed more than twenty of them on the first occasion when he administered the rites. He edited for several years the "Gospel Messenger," published several occasional sermons, a tract on "The Prayer-Book as it Is," and three valuable charges to the clergy, and an essay on the life of Bishop Dehon (1833).—His brother, James, lawyer, b. 4 March, 1787; d. 31 Jan., 1831, was graduated at Yale in 1804, and was admitted to the bar. He was a member of the South Carolina legislature, and also held the office of U. S. district attorney.—Another brother, James, statesman, b. in Charleston, S. C., 15 May, 1789; d. there, 24 Feb., 1835, was a member of the U. S. house of representatives from 1819 to 1825. After engaging in commercial pursuits, he joined the army, and was appointed lieutenant-colonel of engineers. He served with distinction during the war of 1812 with Great Britain, and after the peace was Jackson's aide in the expedition to examine the military defences of the Gulf of Mexico and the southwestern frontier. In the following year, with Gen. Simon Bernard, he was appointed to review the examinations, and made a separate report, in which his conclusions differed from those of that officer. In 1818, as aide-de-camp to Gen. Jackson, he took part in the campaign against the Seminole Indians, aiding in the capture of their leaders, Arbuthnot and Ambrister, and personally intercepting a schooner bearing the correspondence that led to the execution of these men. Later he was commissioned a brevet brigadier with the rank of colonel, and when engaged in the fortification of Mobile bay, in 1820, was made inspector-general of the southern division. He went with Jackson to Pensacola when the latter took possession of Florida, and was active in settling a dispute between him and the governor, and commanded the cavalry of the army in 1822, he was employed as adjutant-general, in aid of John C. Calhoun, who was reconstructing the war department, but his name was rejected by the senate for political reasons. After his retirement from the army he became a planter in Florida, and was a member of the legislative council of that territory. Under a commission from President Monroe, he removed the Seminoles from northern to southern Florida, and was the first white man that crossed the peninsula from the Atlantic to the Pacific. In 1834, Gen. Gadsden, to his native state, became president of the South Carolina railroad, and engaged in commerce and rice-culture. In 1833 President Pierce made him minister to Mexico, and on 30 Dec. of that year he negotiated a treaty by which a new boundary line was established between the United States and Mexico which considerably modified the provisions of the treaty of Guadalupe Hidalgo. By the Gadsden treaty the United States became possessed of territory now forming part of Arizona and New Mexico, for which $10,000,000 was to be paid. The treaty was confirmed by the senate, but with such modifications that Gen. Gadsden was obliged to renew his negotiations in Mexico. These were interrupted by a revolution, and Gadsden was superseded before the conclusion of the treaty. He then retired to private life.
published "Poems" (Philadelphia, 1872); "Elise Magloon, or the Old Still-House" (1872); "Steps Upon the Path" (1870), and "The History of Woman Suffrage," with Susan B. Anthony and Elizabeth Cady Stanton (8 vols, New York, 1881-6).

GAGE, Thomas, Irish traveller, b. in Limerick, Ireland, in 1807; d. in Kingston, Jamaica, in 1855. His father sent him in 1812 to Spain to study law, but his mind was filled with a great aversion to the Jesuits, and joined the Dominicans in 1821. He was afterward professor of rhetoric in the convent of Jerez, and later asked and obtained leave to join a party of missionaries to the Philippine Islands, but before leaving he inveigled a Dominican friar to leave the party and go to the Spanish colonies. But the president of the mission, Jacinto Calvo, hid Gage in a hogshedd, and they sailed from Cadiz, 2 July, 1827, with twenty-seven Dominican friars. After various adventures, he joined the party that Gage decided to remain, and taught Latin for some time in the convent school. In 1826 he was employed as Indian teacher and missionary in Guatemala, and afterward obtained the rich parish of San Jose de Amatitán, where he occupied himself more in the care of the cattle than in the care of the flock. When, in 1836, he obtained from the general of the order permission to return to Europe, he had 9,000 ducats in his possession. As the provincial put difficulties in his way, he turned his wealth into pearls and precious stones, and on 7 Jan., 1837, left his parish secretly, and making his way through the province of Nicaragua, sailed from the gulf-coast of Costa Rica on 4 Feb. After losing most of his fortune in an adventure with Dutch corsairs, he finally reached Spain on 28 Nov., 1837, and in 1838 arrived in England, after an absence of twenty-six years. After a visit to Italy in 1839, he took an active part in the parliamentary troubles in England, and publicly abjured Roman Catholicism in the cathedral of St. Paul in 1844. He was rewarded with the rectory of the parish of St. Etheldreda and the professorship of Modern History in London University; and his History of the Spanish Possessions in America, a Residence of Eleven Years in the Indian Cities of Guatemala, with a Grammar of the Poconchi Language" (London, 1844), which was translated into French, German, and Dutch. This book made a sensation, as, although it was full of gross exaggerations and some flagrant untruth, it laid for the first time before the public a description of the Spanish possessions in America, the knowledge of which so far had been jealously guarded by the authorities. The work passed through several editions, and was translated into the principal languages of Europe. As Gage in his work had treated of the great riches of Mexico and Central America, Cromwell's attention was attracted, and, after many consultations with the author, an expedition against the Spanish colonies was resolved upon. On 11 March, 1655, a fleet of twenty-three sail, under Vice-Adm. Penn, having on board 6,550 troops and marines, left Bristol, with Gage on board as guide. The fleet arrived, 17 May, before Havana on 15 April, but, as the expedition had been reported beforehand, the Spaniards had taken measures of defence. After taking some booty on the coast of Santo Domingo, the fleet anchored on 9 May before Spanish Town, Jamaica, landed the troops of Gen. Venables, and, after a desperate resistance by the Spaniards, captured the whole island, which has since remained a British colony. Before the conquest was concluded, Gage died of dysentery.
for the Canadian archives, and calendared in the annual report of the archive department. In the latter possession of land and fields, Gage writes that he has been ordered to Boston with four regiments, to bring the people to submission and enforce the coercive measures of the government. He arrived in Boston on 18 May, 1774, and on the 21st, having spent four days with the provincial troops at Castle William, was received with ceremony by the council and civil officers, and the proclamation of his commission was signaled by volleys of musketry and cheers of the populace. In a public dinner in Faneuil Hall he proposed "the prosperity of the British Colonies". But the hosts entertained of his acting as an adjutant of the differences between the colonies and the mother country were short-lived. He came to Boston as the civil, but in reality military, governor of the province. He had some acquaintance with the Bostonians on a visit in 1770 when he came at the request of the king to quell the disturbances in regard to quartering of the British troops. The results of his observations are given in two publications, entitled "Letters to the Ministry from Governor Barnard, General Gage, and Commodore Phipps", and "Letters to the Electors from Governor Barnard, General Gage, and the Council of the Province of Massachusetts Bay" (Boston, 1769). The aspersions on the people of Boston in those letters drew out an "Appeal to the World" by Samuel Adams. Immediately upon receiving a copy of that instrument the colonists proceeded to put into effect the Boston port bill, and the offensive measures of the regulation act. On 30 June, 1774, he issued a proclamation denouncing the solemn league and covenant as unwarrantable, hostile, and traitorous, and threatening its promoters with arrest. The text of this document is reprinted in the "Massachusetts Historical Society's Collections," vol. 12. During the summer months of 1774, Gage had his headquarters at Salem, that being, under the port bill, the capital, and the mandamus of the council expired in the militia. On the night of 18 April a large force departed from Boston, on what Gage intended to be a secret expedition to Concord and Lexington, to get tidings of the numbers and munition belonging to the Provincials, and on the following day took place the memorable conflict between the minute-men and Gage's soldiers, which resulted in the discomfiture of the British. Gage's account of the battle of 19 April is printed in fac-simile in the "Memorial History of Boston." On 12 June he gave vent to his displeasure at the state of affairs in another proclamation, characterizing those in arms as rebels and traitors, but promising pardon to all on submission, excepting Samuel Adams and John Hancock. The Americans fortified Breed's (Bunker) Hill on the night of 16 June, and on the following day Gage sent Gen. Howe with a large force to dislodge them. In spite of contrary advice, Gage determined that the works should be attacked in front. A Tory historian relates that he told Howe that he was galling "to take the bull by the horns," and added "it is remarkable that he, in general, during the continuance of his command in America, never once ventured an attack upon American intrenchments; he had fatigued experienced the consequences of taking the bull by the horns," and immediately upon receiving Gage's account of the battle of Bunker Hill, the government ordered his recall, and he sailed for England, 10 Oct., 1775. A brief review of his services in America, in his own words, is given in "Queries of George Chalmers, with the Answer of Gen. Gage, in Relation to Sufficient Question, Section, and Gage's Administration of the Government of Massachusetts Bay," published in the "Massachusetts Historical Society's Collections," vol. 84. His subsequent career was uneventful. In April, 1782, he was appointed colonel of the 17th light dragoons, promoted to the rank of general in November, 1788, and in 1785 was transferred to the 11th dragoons. He married, 8 Dec. 1758, Margaret, daughter of Peter Kemble, president of the council of New Jersey. One of his sons became third Viscount Gage. The following works represent contemporaneous publications relative to his conduct of affairs at the opening of the Revolution: "General Gage's Instructions of 22 Feb., 1775, to Captain Brown, whom he ordered to take a Sketch of the Roads, etc., from Boston to Worcester" (Boston, 1775; reprinted in the Collections of the Massachusetts historical society, vol. 14): "Narrative of the Excursions and Ravages of the King's Forces, under Command of General Gage, 19 April, 1775" (Worcester, 1775); "Lord Ch——'s Prophecy, an Ode to Lieutenant-General Gage." (London, 1778); "Address to the Militia of the Province of New Hampshire, Chief Generals Gage and Washington" (New York, 1775); "Detail and Conduct of the American War, under Gen. Gage" (London, 1780).

**GAGNON, Lucian, Canadian patriot**, b. in Pointe-a-la-Mule, parish of St. Valentine, Canada; d. in Charlestown, Mass., 7 Jan., 1790. He was among the first to take part in the agitation in Canada against the British government, was present at the assembly of the six confederate counties at St. Charles, 23 Oct., 1837, and left the meeting convinced that insurrection was the only remedy for Canadian grievances. He then traveled through every part of the parish of St. Valentine and the neighboring parishes, preparing the people for the struggle. The chiefs of the insurrection, who had fled to the United States on being defeated at St. Charles, decided, after reaching Swanton, to return to Canada; and when convinced that Robert Nelson was waiting for them at St. Césaire at the head of a considerable force. As they were not numerous enough to venture on such an incursion, Gagnon offered to go to Canada and introduce the numerous volunteers belonging to the Provincialists, and on the following day took place the memorable conflict between the minute-men and Gage's soldiers, which resulted in the discomfiture of the British. Gage's account of the battle of 19 April is printed in fac-simile in the "Memorial History of Boston." On 12 June he gave vent to his displeasure at the state of affairs in another proclamation, characterizing those in arms as rebels and traitors, but promising pardon to all on submission, excepting Samuel Adams and John Hancock. The Americans fortified Breed's (Bunker) Hill on the night of 16 June, and on the following day Gage sent Gen. Howe with a large force to dislodge them. In spite of contrary advice, Gage determined that the works should be attacked in front. A Tory historian relates that he told Howe that he was galling "to take the bull by the horns," and added "it is remarkable that he, in general, during the continuance of his command in America, never once ventured an attack upon American intrenchments; he had fatigued experienced the consequences of taking the bull by the horns," and immediately upon receiving Gage's account of the battle of Bunker Hill, the government ordered his recall, and he sailed for England, 10 Oct., 1775. A brief review of his services in America, in his own words, is given in "Queries of George Chalmers, with the Answer of Gen. Gage, in Relation to Sufficient Question, Section, and Gage's Administration of the Government of Massachusetts Bay," published in the "Massachusetts Historical Society's Collections," vol. 84. His subsequent career was uneventful. In April, 1782, he was appointed colonel of the 17th light dragoons, promoted to the rank of general in November, 1788, and in 1785 was transferred to the 11th dragoons. He married, 8 Dec. 1758, Margaret, daughter of Peter Kemble, president of the council of New Jersey. One of his sons became third Viscount Gage. The following works represent contemporaneous publications relative to his conduct of affairs at the opening of the Revolution: "General Gage's Instructions of 22 Feb., 1775, to Captain Brown, whom he ordered to take a Sketch of the Roads, etc., from Boston to Worcester" (Boston, 1775; reprinted in the Collections of the Massachusetts historical society, vol. 14): "Narrative of the Excursions and Ravages of the King's Forces, under Command of General Gage, 19 April, 1775" (Worcester, 1775); "Lord Ch——'s Prophecy, an Ode to Lieutenant-General Gage." (London, 1778); "Address to the Militia of the Province of New Hampshire, Chief Generals Gage and Washington" (New York, 1775); "Detail and Conduct of the American War, under Gen. Gage" (London, 1780).
GAILLARD

at Odelltown, 10 Nov., 1888, and succeeded in reaching the United States afterward. The privations that he had endured caused consumption, which ultimately ended his life. Dr. S. H. Dickson in 1888 as professor of medicine in South Carolina medical college, and was also assistant editor of the "Charleston Medical Journal," and president of the South Carolina medical society. He made a specialty of hygiene and sanitary science, and believed that yellow fever is imported and, to a certain extent, contagious.

GAILLARDOT, Théodore Frédéric, journalist, b. in Autun, June, 1828; d. in Bouchard, France, 13 Aug., 1882. He began his literary career as a story-writer toward the end of the Restoration. He then turned his attention to the stage, and the drama "La tour de Nesle," written jointly by M. Gaillardet and Alexander Dumas, the elder, in 1822, involved the former in a lawsuit with that author in the same year. He subsequently emigrated to the United States, and became the proprietor and editor of the "Courrier des États-Unis," published in New York. After revisiting France in 1848 in an unsuccessful attempt to obtain a seat in the constituent assembly, he returned to New York, but subsequently disposed of his interest in the "Courrier." He spoke for Horace Greeley in the presidential canvass of 1872, and in 1880 returned to France. M. Gaillardet was decorated with the Legion of Honor in 1849. Besides writing portions of "La tour de Nesle," he wrote "Struensee, ou le médecin de la reine" (1832), a drama in five acts; and "Georges, ou le criminel par amour," a drama in three acts (1833). Besides his dramatic productions, he wrote the "Memoires" of the celebrated Benedict XIV, drawn from family archives: "Profession de foi et considérations sur le système républicain des États-Unis," presented to the electors of the Yonne (1848); a series of articles and letters, principally on Louisana, Mississippi, and Texas, appearing in the Paris "Échos." He was also a contributor to other series, published in the "Constitutionnel" and "La Presse" (1856-60).

GAINE, Hugh, printer, b. in Ireland in 1726; d. in New York city, 25 April, 1807. He began business as a printer and bookseller in New York in 1750. He issued the "New-York Cur-acy," a weekly publication. Gaine was compositor, pressman, folder, and distributor of his paper, which had a circulation of from three to four hundred copies. He began to edit this journal in the interest of the Whig party, and when the British troops neared New York, he removed his press to Newark, N. J. He soon returned, however, and thereafter devoted his "Mercury" to the interest of the royal cause, choosing for his sign the "Bible and Crown." At the termination of the Revolutionary war Gaine's petition to remain in New York was granted; but he was compelled to relinquish the publication of his sheet, and confine himself to the printing and bookselling business. After a career of forty years he retired with a handsome estate. Although Hugh Gaine and his "Mercury" were not frequently in the historians, his career was, of itself, an uneventful one. He led an exemplary life, and was a man of active business habits; but he seems to have been almost without conscientious convictions.

GAINES, Edmund Pendleton, soldier, b. in Culpepper county, Va., 1777; d. in New Orleans, La., 6 June, 1849. James Gaines, his father, commanded a company in the Revolutionary war, was a member of the North Carolina legislature, and took part in the convention that ratified the Federal constitution. Edmund early showed a preference for a military life. Having joined the U. S. army, he was appointed 2d lieutenant of the
6th infantry on 10 Jan., 1799, and in April, 1809, was promoted to 1st lieutenant. He was for many years actively employed on the frontier, and was instrumental in procuring the arrest of Aaron Burr. He was collector of the port of Mobile in 1803, and was promoted to captain in 1807. About 1811 he resigned from the army, intending to become a lawyer, but at the beginning of the war of 1812 returned, and became major on 24 March. He became colonel in 1813, and at Chippewa's Field, on 11 Nov., covered with his regiment the retreat of the American forces. Later in the same year he was made adjutant-general, with the rank of colonel. He was promoted to brigadier-general, 9 March, 1814, and, for gallant conduct in the defense of Fort Erie, in August, 1814, when he was severely wounded, "repelling with great slaughter the attack of a British veteran army superior in number," he was brevetted major-general, and received the thanks of Congress, with a gold medal. Similar honor was done him by the states of Virginia, Tennessee, and of New York. He was appointed, in 1816, one of the commissioners to treat with the Creek Indians. He was in command of the southern military district in 1817, when the Creeks and Seminoles began to commit depredations on the frontiers of Georgia and Alabama, and, having moved against them, was in desperate straits when he was joined by Gen. Jackson—a circumstance which may be regarded as the initiative of those measures which in 1820 added Florida to the United States. In the troubles with the Seminoles in 1836, and which cost Gen. Thompson his life, he was again engaged, and was severely wounded at Oothacoochee. When the Mexican war began, some ten years later, he made himself troublesome to the government by assuming the liberty of calling out a number of the southern militia without orders, and was tried by court-martial, but not censured. He was a man of simplicity and integrity of character.—His wife, Myra Clark, heiress, b. in New Orleans, La., in 1806; d. there, 9 Jan., 1865, is known from the extraordinary lawsuit with which her name is associated. Her father, Daniel Clark, born in Sligo, Ireland, about 1766, emigrated to New Orleans, where he inherited his uncle's property in 1799. He was U. S. consul there before the acquisition of Louisiana, and represented the territory in congress 1806–8. He died in New Orleans, 16 Aug., 1813, and his estate was disposed of under the provisions of a will dated 29 May, 1811, which gave the property to his mother, Mary Clark, who had followed him to the United States, and was living at Germantown, Pa. His business partner, Riff Chuew, were the executors. Clark was reputed a bachelor, but was known to have had a liaison with a young French woman of remarkable beauty, Zulime des Granges, during the absence of her reputed husband in Europe. Two daughters were born of this connection, one at Philadelphia in April, 1802, the other (Myra) in New Orleans in 1805. The latter was taken to the house of Col. Davis, a friend of Clark's, nursed by a Mrs. Harper, and in 1815 went with Davis's family to reside in Philadelphia. Davis died in 1821, and left Myra Davis. In 1830, Davis, being then in the legislature, sent home for certain papers, and Myra, in searching for them, discovered letters that partially revealed the circumstances of her birth. In 1832 she married W. W. Whitney, of New York, who, in 1849, rose to the rank of colonel. On Davis an old letter that contained an account of a will made by Clark in 1818, just before his death, giving all his large estate to Myra and acknowledging her as his legitimate daughter. Whitney and his wife went to Matanzas, Cuba, saw the writer of the letter, and, after collecting other evidence, instituted suits to recover the estate, which included some of the most valuable property in New Orleans. On the trial of one of these cases, Mrs. Harper testified that four weeks before his death, Clark showed her the will he had just made in favor of Myra, permitting her to read it from beginning to end, and acknowledged the child's legitimacy. Baron Boisfontaine testified that Clark told him the contents of the will and acknowledged the child. On this and other similar evidence the court decreed that Myra should have the estate. The testamentary disposition of the estate was made by the supreme court of Louisiana (18 Feb., 1856) as the last will of Daniel Clark, though of the document itself no vestige had ever appeared. But by the law of Louisiana a testator can not make devise to his illegitimate child. It was proved by the testimony of the witnesses that Clark, one of whom swore she was present at the ceremony, that Clark privately married her in Philadelphia in 1803, a Catholic priest officiating; she having previously learned that Des Granges, her supposed husband, had a prior wife living, and was therefore not legally her husband. Clark, in acknowledgment of the marriage was said to have been frustrated by suspicions of her fidelity; and, deserted by him, she contracted a third marriage. In another suit the U. S. supreme court decided that the fact of the marriage and legitimacy was established. Such was the case of Davis, married, Gen. Gaines in 1839, and survived him also. In 1856 she filed in the supreme court of the United States a bill in equity to recover valuable real estate then in the possession of the city of New Orleans, and a decision was rendered by the December term of 1867. The value of the property claimed was estimated in 1861 at $33,000,000, of which Mrs. Gaines had up to 1874 obtained possession of $6,000,000, and numerous actions for ejectment were still in progress. Only a small part of this case came into the possession of the claimant, the rest having been swallowed up in the interminable legal proceedings that preceded the final victory. In April, 1877, Judge Billings, of the U. S. circuit court at New Orleans, rendered a decision in which he recognized the probate of the will of Davis and ordered that the determination demanded the city of New Orleans and other defendant to account to a master in chancery for all the income from the property during their possession, and deprived them of their titles and of all accumulation therefrom. The master made a report from which an appeal was taken. The determinate judgment was again given in favor of Mrs. Gaines for $1,925,500, with $500,707 as interest. From this decision a fresh appeal was taken to the U. S. supreme court in the month of June follow-
ing, and thus the matter stood at her death. Under a previous decision of the court, Mr. Gaines could have turned out of their homes over 400 families occupying land and holding titles from the city; but, although greatly in need of money, she preferred obtaining judgment against the city to taking harsh measures. With this view she steadily declined settlement from those who would have shown little mercy to the innocent holders of the disputed property. Although wealthy at the time of Gen. Gaines's death, his widow spent her entire fortune in the effort to free her mother's name from stain and secure the millions that were finally decided to be rightfully hers. See Wallace's "Cases Argued and Adjudged in the Supreme Court of the United States," vol. vi.

GAINES, John P., governor of Oregon, b. in Walton, Boone co., Ky.; d. in Oregon in 1858. He studied law, was admitted to the bar, and began practice at Nashville. He served in the Mexican war as major of Marshall's Kentucky cavalry volunteers, and was made prisoner at Incarnacion in January, 1847. He was subsequently appointed aide-de-camp to Gen. Scott, and distinguished himself at the battle of Molino del Rey. While serving as a member of the 30th congress as a Whig, serving from 6 Dec., 1847, till 3 March, 1849. He was then appointed by President Fillmore governor of the territory of Oregon, and filled the office from 1850 till 1853. He never returned to the eastern states, but remained in Oregon until his death.

GAIZZA, Gaudio (gah-een tha), Spanish soldier, b. in Biscay about 1769; d. in Mexico about 1824. He came to Peru in 1784 as officer of the regiment of Estremadura, and in 1809 was colonel of the regency. In 1810, he reached the office of secret service in 1812; and in 1814 became commander-in-chief of the Spanish forces of the South of Chili against the Independents. One of his officers, Ildefonso Eolreogan, occupied Teca on 14 March. Instead of marching on Santiago, which road was open to him and undefended, he lost time trying to prevent the juncature of the forces of O'Higgins with Col. Mackenna. He was defeated by the former, and found himself in a perilous position, when the British commodore, Hillyar, offered his mediation, and the treaty of Lircay was finally signed, by which the Chileans recognized all the rights of the United States in 1828, and the council of regency during his captivity, under the condition that the Spanish troops should evacuate Chilian territory within thirty days. The vicerey disapproved of this treaty, and ordered the arrest of Gainza, and his transportation to Lima, where he remained a prisoner till his case was brought before a court-martial, 27 May, 1816. Sentence was pronounced on 14 June, ordering him to be put at liberty and to proceed to Spain, to await the disposition of the minister of war. After the promulgation of the constitution of 1820 he was sent as sub-inspector of the treaty to Guatemala. The Spanish majority of the provincial assembly there induced the feeble Captain-General Urrutia to resign, and appointed Gainza in his place in March, 1821. When the news of the declaration of the independence of Mexico reached him in 1823, when Spain was proclaimed, and Gainza was intrusted temporarily with the supreme command. He afterward favored the annexation of Guatemala to Mexico, and went to that country to live.

GAITHER, Henry, soldier, b. in Montgomery county, Md., 1791; d. in Georgetown, D. C., 29 June, 1811. He was a private in the U.S. army, and took part in nearly every battle of the war. He was commissioned major in the "levies of 1791," and served under Gen. St. Clair against the Miami Indians in November of that year. In 1793 he was appointed colonel of the 21st infantry, serving until 1 June, 1802. In the interval he was in command at Fort Adams, the barrier posts on the Mississippi, and Fort Stoddart on the Mobile river. At the end of a long and honorable career in the army, Col. Gaither returned to his native county, where he resided until his death. In professional life he was noted for his strictness as a disciplinarian.—His nephew, Henry Chew, patriot, b. in Maryland in 1777; d. in Locust Grove, Md., 12 Feb., 1845, represented his county in the legislature for many years, but is chiefly remembered for his original defence of free speech during the disgraceful assault by a mob on the office of the "Baltimore Federalist," 26 July, 1812. Mr. Gaither was the eldest of three brothers who sided in repelling the attack, and when, on promise of protection by the authorities, the defenders of the office were ordered to surrender the prisoners, he succeeded in escaping, while on the way to the jail, by stepping into the shop of a friend and changing his hat and clothing, which had been spotted by the blood of his brother, Ephraim, who received a flesh-wound in the arm. The latter, who was confined in the jail with his younger brother, William, made his way out as the mob entered the room in which they were confined, mingled with the crowd, and, by stepping backward whenever a vacant place afforded him an opportunity, finally managed to slip away. Again, although William was not so fortunate. After being knocked down and otherwise maltreated by the rioters, he feigned death and was thrown out with others as dead into the prison-yard. They were afterward stabbed in the hands with penknives to test whether or not they were actually dead. William bore the marks of these wounds until his death, and never entirely recovered from nervous shock produced by the horrors of that night. (See Hanso, Alexander C.)—William Lingan, legislator, son of Henry Chew, b. in Locust Grove, Montgomery co., Md., 21 Oct., 1803; d. at Beverly Springs, Va., 2 Aug., 1858, was educated at Thornton Hill, Va., and Hagerstown, Md. He was early elected to the legislature, and served sixteen years, a portion of the time in each branch. In 1851 he was chosen president of the senate, and the same year was appointed one of the board of visitors to the U.S. military academy. He was also made a director of the Baltimore and Ohio railroad on behalf of the state, and by his watchfulness and energy saved many thousands of dollars to the commonwealth. He was a presidential elector on the Harrison and Tyler ticket in 1840 and also on the Clay ticket, carrying the state for his candidates on both occasions. He became general of militia.

GALBERRY, Thomas, R. C. bishop, b. in Nass, county Kildare, Ireland, in 1855; d. in New York city, 10 July, 1878. When young old his parents emigrated to the United States and settled in Philadelphia. He was educated at Villanova college, Pa., studied theology, and was ordained priest by Bishop Newmann, 20 Dec., 1856. His first mission was at Lansburg, N. Y., where he built a Gothic church, a school, and gave $38,000, and near it a convent for the Sisters of St. Joseph. He had become a member of the Augustinian order, and on 30 Nov., 1866, was appointed
superior of the commissariat of Our Lady of Good Council, the mission of the order in the United States. He also held the office of pastor at Lawrence, Mass., where he completed a church building. He was next elected president of Villanova college, and during his tenure, the college and entirely reorganized the course of studies. He was elected provincial of the Augustinian order when that body was formed into the province of Villanova in 1874. Shortly afterward he was nominated bishop of Hartford by the pope. He sent his resignation to Rome, as he did not wish to be separated from his religious brethren, but he was required to obey, and was consecrated by Archbishop Williams, 19 March, 1876. His application to his new duties weakened a constitution never strong, and, feeling that his health was failing, he set out to seek rest at Villanova. When near New York he was seized with a hemorrhage, which proved fatal shortly afterward.

GALBRAITH, Andrew, colonist, b. in the north of Ireland about 1663; d. after 1747. His father, James, was of Scotch descent, and accompanied William Penn on his second visit to America. Andrew came to this country with his father, and settled in 1718, with other Scotch-Irish colonists, in Lancaster county, Pa., where he had received from the Penns a patent for 212 acres of land. He organized the Donegal church, was its first ruling elder, and selected the site for its building, which is represented in the accompanying illustration. This church was built about 1730 in place of a temporary log structure, of ten years before, and is of rough stone, laid in mortar. The Donegal settlement was the first tract of land that became the nursery of Presbyterianism in a large part of Pennsylvania, Virginia, and North Carolina. Mr. Galbraith was the first coroner of Lancaster county, and a justice of common pleas for six years. He was elected to the general assembly in 1732, and was a justice of the peace from 1730 to 1747, when he sold his farm and removed to a place west of the Susquehanna river.

GALE, Benjamin, physician, b. on Long Island, N. Y., in 1715; d. in Killingworth, Conn., 21 May, 1799. He was graduated at Yale in 1733, and studied medicine under Dr. Jared Eliot, of Killingworth, marrying the daughter of his instructor and settling in that town. He ranked high in his profession, and was also skilful in agriculture, inventing a dray plough, for which he held a patent. He was a member from an English society. He also took a lively interest in politics, and wrote frequently for the press. He published "A Dissertation on Inoculation" (1733), and his method of prescribing a preparatory course of mercury was commended in England, and subsequently followed in this country. The same year he contributed to the Philadelphia "Transactions" a paper on the "Bite of Rattlesnakes." He wrote essays in the "Transactions" of the New Haven medical society, and also "A Dissertation on the Prophecies."

GALE, George Washington, educator, b. in Northeast, Dutchess co., N. Y., 2 Dec., 1789; d. in Galesburg, Ill., 13 Sept., 1862. He was graduated at Union in 1814, and licensed as a Presbyterian clergyman in October, 1819, when he took charge of the church at Cherry Valley, N. Y. His pastorate was distinguished by a powerful revival of religion, in which Charles G. Finney and other eminent men were among the converts. He resigned his charge in 1823, and afterward established the Free school in the village of New Lebanon, N. Y., which he removed from 1827 till 1834. His life work was the organization of Knox college at Galesburg, Ill., in 1833. He was a man of strong prejudices and acute intellect. He received the degree of D. D.

GALE, Levin, lawyer, b. in Cecil county, Md., in 1824; d. in Baltimore, Md., 26 April, 1875. He was the son of Levin Gale, who represented the Elkton district in congress from 3 Dec., 1827, till 3 March, 1829. The son studied law, was admitted to the bar, and settled at Elkton, Md. Meeting with great success in his profession, he secured a large practice, and argued many cases before the Maryland court of appeals. Mr. Gale is the author of "A List of English Statutes Supposed to be Applicable to the Several States of the Union."

GALE, Samuel, Canadian jurist, b. in St. Augustine, Florida, 1720; d. in Montreal, Canada, 1865. His father, a native of Hampshire, England, came to America in 1770, as assistant paymaster to the British forces. The son was educated at Quebec, and in 1802 began the study of law in the office of Chief Justice Sewell in Montreal. He was made a justice in 1809, and, having been appointed a magistrate in the Indian territories, accompanied Lord Selkirk to the northwest in 1815. Later, when Lord Dalhousie was attacked for his administration of Canadian affairs, Mr. Gale went to Britain as the bearer of memorials from the English-speaking residents of the eastern towns and other sections of Lower Canada, defending the viceroy's conduct. In 1829 he became chairman of the quarter sessions, and in 1831 was appointed a judge, which office he held until his death. He was a doctor of divinity and a man of great learning. After Wales visited Canada, he prepared a congratulatory address from the colored people of the country, which, however, was not received, as the prince was desired by the Duke of Newcastle not to recognize differences of race and creed unless it were imperative. He fought a duel with Sir James Stuart and was severely wounded. He was the author of a series of letters to the "Montreal Herald," over the signature of "Nerva," which were strongly conservative in tone, and made a powerful impression.

GALE, Theophilus, benefactor of Harvard college, b. in 1677. He was a classical scholar, and a learned theologian and physician. When he died, he left his library to the college, more than doubling its collection of books, which had been already enriched by gifts of Gov. Winthrop, Richard Bellingham, John Lightfoot, Sir Kenelm Digby, Richard Baxter, and others.

GALES, Joseph, journalist, b. in England in 1769; d. in Raleigh, N. C., 24 Aug., 1841. He was originally a printer and bookseller at Sheffield, where he established and published the "Register." His democratic principles having involved him in
difficultly with the government, he sold his journal in 1793 to James Montgomery, the poet, who had been brought up in his family, and emigrated to the United States, settling in Philadelphia. There he edited the "Independent Gazetteer." In which, being a proficient stenographer, he first printed short accounts of the daily proceedings. In 1798 he sold the paper to Samuel Harrison Smith and removed to Raleigh, N. C., where he founded a new "Register," the publication of which he continued until he had reached an advanced age, when he transferred it to his third son, Weston, and went to the other coast of the United States. Here he became interested in African colonization, and was an active member of the American colonization society almost to the day of his death. — His son, Joseph, journalist, b. in Eckington, near Sheffield, Eng., 10 April, 1798; d. in Washington, D. C., 21 July 1860, was educated at the University of North Carolina, learned printing in Philadelphia, and in 1807 became the assistant, and afterward the partner, of Samuel Harrison Smith, who had removed the "Independent Gazetteer" from Washington to Raleigh and changed its name to the "National Intelligencer." In 1810 he succeeded to the sole proprietorship of the journal, which was then published tri-weekly. In 1812 he formed a partnership with his brother-in-law, William Winston Seaton, and in January, 1813, began the daily issue of the "Intelligencer," which was finally suspended, after the death of both partners, in 1866. From the time of their coming together up to 1820, Gales and Seaton were the exclusive reporters as well as the editors of their journal, one devoting himself to the house, the other to the streets. They only published running reports, but on special occasions the proceedings were given entire. But for their industry, a most important part of our national record would now be lost. Notably was this true in the case of the memorable debate between Hayne and Webster. The original notes of the latter's speech form a volume of several hundred pages, and, corrected and interlined by the statesman's own hand, were carefully treasured by Mr. Gales. At this period he had abandoned the practice of reporting, and the full reproduction of that particular on which was an exemption to the custom of the office. The "Intelligencer" was a strong advocate of the war of 1812, and when the British under Admiral Cockburn entered Washington, the anger of that officer seemed to be specially aroused against the journal, one of whose editors was English by birth. He at first proposed burning the office, but being dissuaded by occupants of the adjoining houses, wreaked his revenge upon the printing materials and other property. He ordered the valuable library to be taken into the street and buried, himself assisting in the work of destruction, the type thrown from the upper windows, and the presses broken, thus causing the proprietors a loss of several thousand dollars. — Another son, Seaton, journalist, b. in Raleigh, N. C., 17 May, 1838; d. in Washington, D. C., 28 Nov., 1878, who attended University of North Carolina in 1842. A month later, on the death of his father, he took editorial charge of the Raleigh "Register." At the beginning of the war he entered the Confederate army and served four years as adjutant-general of a brigade in northern Virginia, being present at all the battles fought in that locality. After the war he returned to journalism, and from 1866 till 1896 was connected with the Raleigh "Sentinel." At the time of his sudden death he was superintendent of the document-room of the U. S. house of representatives, having been appointed at the opening of the 45th congress.

GALÍ, Francisco, Spanish navigator, b. in Seville in 1539; d. in the city of Mexico in 1591. The want of a port on the coast of California, where ships arriving from the Philippines could need a port of refuge, had long exercised the mind of the Spanish court. In 1543 Moya de Contreras, archbishop of Mexico and provisional viceroy of New Spain, fitted out two frigates at Acapulco, and gave the command to Galí, enjoining him not only to select a place for a port, but to examine the whole coast of North America, which he was to reconquer to Spain, while others thought it was separated by the Strait of Anian. Galí, who had sailed as far as Japan, gives the following reasons for believing that there was a strait: " When we were 300 leagues northeast of Japan, we found a very deep sea with a current coming from the north and northwest; the waves were long and high; from whatever side the wind blew, the current and the waves always followed the same direction. In this way we sailed 700 leagues; it was only when we were within 10 leagues of the coast that we no longer felt this sea and current, and this fact makes me think that a channel or strait will be found between the continent of New Spain and the countries of Asia and Tartary. Moreover, we met in this interval of 700 leagues a large number of whalers, besides seals and other animals, as are always found in the Straits of Gibraltar; for they prefer opening their way through quarters where there are strong currents; this confirms me still more in the opinion that there is a strait." Galí, after visiting the Ladrones, Manils, Macao, and the Lü-shu islands, sailed eastward and on 14 Oct., landed on the coast of America at 37° 30' north latitude. He saw a high land well wooded and totally free from snow; then, on his route to Acapulco, he saw fires along the coast during the night, and smoke in the daytime, from which he concluded that there was some industry where the coast was inhabited. On his return, he found that the archbishop was no longer in office, and the project of founding a port on the coast of California was abandoned. The relation of Galí, written in Spanish, was sent to the viceroy of the Indies; it was translated into Dutch and inserted in his work on the " Track Charts of the Indies" (Amsterdam, 1596). Hackluyt has a translation in his collection, and there is also a French translation from Linschot (Amsterdam, 1610). In all these works Galí is called Galian. There is also a Spanish translation taken from the French version (Madrid, 1802). Galí intended to give a fuller account of his voyage, and some think that he did write a larger work, which has been lost; there are fragments of it in the national library of Mexico, under the title: " Viaje descubrimientos y observaciones de Acapulco á Filipinas y desde allí á Macao y por la costa de Nipon á la Nueva España." The narrative in existence proves him an experienced navigator and a talented observer. He had on board his vessel a skilful astronomer, Juan de Jaime, who drew the charts. All this, in accordance with Galí's plan of getting the mutiny of the crew. He parted with La Salle at the head of Lake Ontario, and with a fellow-priest, named Dollier, coasted the southern shore of Lake Erie, and entered the Detroit river. At one of their camping-places the
GALLAGHER

GALLAGHER

altar service was washed into the lake, and this
calamity was attributed directly to the evil one. It
took place when they paused to pray. He was a
representation of the devil, whereupon, in his
exasperation, he was cast into the lake, thus
smashing the image, and with the help of "the
crushing power," burned the fragments in the river.
He prepared a map of the great lakes, according to which he does not seem
to have known that Michigan was a peninsula.
This was the second map made of this district, the
first having been drawn by Champlain in 1622.
Killygordan, County Donegal, Ireland, in 1815; d.
in San Francisco, Cal., in March, 1882. He
came to the United States in 1837 and completed his
theological studies at the seminary of St. Charles
Borromeo, Philadelphia. He was appointed pro-
dessor of classics a few months afterward, and in
1840 was ordained priest. He was placed in charge
of Pottsville, where he effected great reforms
among the miners, and established a temperance
society which soon had over 5,000 members. After
having charge of another parish in Pennsylvania,
he was made president of the theological seminary
in Pittsburg in 1844, and also given charge of a
large parish there. He founded and edited for
some time the "Pittsburg Catholic," and in 1844
founded St. Francis's college for boys. In 1850 he
introduced the Sisters of Mercy, for whom he es-
established St. Aloysius's academy for girls. He also
founded "The Crusader," at Summitville, Cambria
co. In 1852 he was appointed theologian to the
first plenary council of Baltimore, and in the au-
tumn of the same year went to California. Here
he labored at Benicia, and later was the pastor of
the cathedral of St. Mary in San Francisco, and began
a church in Oakland. In 1853 he established the
"Catholic Standard," the first Roman Catholic journ-
als on the Pacific coast, and edited it for se-
veral months. He went to Europe in 1853, se-
cured a large number of priests for the Californian
mission, and placed fourteen students in ecclesi-
castical colleges to be educated for the same pur-
pose. While in Ireland he secured the services of
Sisters of Mercy and nuns of the Presentation or-
der for the schools and hospitals he intended to es-
tablish in California. After obtaining large dona-
tions on the continent he returned to California
in 1854. The failure of Adams's express and bank-
ing company in 1855, by which large numbers of
the working classes were impoverished, made it
necessary for them to seek a safer place of deposit
for their savings afterward. Father Gallagher
was selected as their banker, and he acted in this
capacity for several years, during which time several
million dollars passed through his hands. His
health suffered, and in 1860 he was obliged to re-
tire to the northern part of the state, where he
purchased a large building at Yreka, and converted
it into a church. In the same year he built
churches in Carson City, Genoa, and Virginia City.
He returned in 1861 to San Francisco and at once
set about building St. Joseph's church, St. Joseph's
from the beginning. The school he formed the
most important work of his life. In
1865 he founded the Magdalen asylum, which he
placed in charge of the Sisters of Mercy. He had
previously been instrumental in founding St.
Mary's hospital. During the commercial stagna-
tion of 1867 he laid before the Board of State
a plan for the improvement of Golden Gate park,
and obtained an appropriation for the
purpose.

GALLAGHER, Nicholas Aloysius, R. C. bish-
op, b. in Temperanceville, Belmont co., Ohio, 19
Feb., 1846. He was educated at Mount St. Mary's
of the West, and, after finishing his theological
studies, was ordained priest at Columbus in 1869.
In 1869 he was stationed at St. Patrick's church,
Columbus, attending at the same time the chapel
of St. Joseph's cathedral. In 1872 he was ap-
pointed professor of classics, and in 1875 was
appointed administrator of the diocese of Galveston.
He was consecrated, 30 April, 1889. Bishop
Gallagher has done much to restore order in the
diocese intrusted to his care, but finds difficulty in
keeping pace with the tide of emigration flowing
into Texas. In 1884 there were forty priests, fifty
churches and chapels, several female academies
conducted by Ursuline nuns and others, and about
38,000 Roman Catholics under his jurisdiction.

GALLAGHER, William Davis, journalist, b.
Philadelphia, Pa., 21 Aug., 1823. His father,
who was involved in the rebellion of 1778,
emigrated to this country, and died soon afterward.
His widow removed to Cincinnati, where young
Gallagher was apprenticed in a printing-office in
1831. Four years later he began to write occasion-
ally for the newspapers. He edited "The Gaz-
eman," at Xenia, Ohio, in 1830; the "Cincinnati
Mirror," in 1831, to which he contributed a num-
ber of prose tales and poems that attracted much
attention: the Cincinnati "Western Literary Jour-
naL and Monthly Review," in 1836; "The Hesper-
ian: A Monthly Magazine of General Littera-
ture," while also engaged in the management of the
Cincinnati "Ohio State Journal," in 1838; and
in 1839 became associate editor of the Cincinnati
"Gazette," maintaining that connection until 1850,
in which year he accompanied Hon. Thomas Cor-
win to Washington. During the civil war he was
the latter having just been appointed secretary of the
treasury. In 1853 Mr. Gallagher removed to Louis-
ville, and in 1854 joined the editorial staff of the
"Daily Courier," but withdrew within a few years,
and retired to a farm near that city, where he wrote
much on agriculture and farming. After he was
again employed in the U. S. treasury department.
Since that date he has been a resident of Louisville
and its neighborhood. Mr. Gallagher first became
known as a writer in 1828 by the publication of
"A Journey through Kentucky and Tennessee," in
the "Cincinnati Chronicle." His first poetical
contribution that attracted general attention was
"The Wreck of the Hornet." This was reprinted in
a collection of his poems entitled "Errato" (3 vols.,
Cincinnati, 1835-7). He edited "Selections from
the Poetical Literature of the West" (Cin-
cinnati, 1841). In 1849 he delivered the annual
address before the Ohio historical and philosop-
hical society, of which he was president, on "The
Progress and Resources of the Northwest." One
of the most elaborate of his agricultural essays is
his "Fruit Culture," a large octavo volume. His
next volume is "Miami Woods: A Golden Wedding
and Other Poems" (Cincinnati, 1881). His next
and concluding volume will comprise "Ballads of
the Border," "Tyril Bellum," being poems of the
civil war, and "New Fables of the Old Pioneers."
New York city. He was ordained deacon by Dr. Cummins, assistant bishop of the diocese of Church, Louisville, Ky., 7 June, 1868, and priest by Bishop J. P. B. Wilmer, in Trinity church, New Orleans, La., 30 May, 1869. During his diaconate he served as assistant minister in Christ church, Louisville, and on his ordination to the pectoral, he removed to Christ church, New Orleans. He was subsequently, for a short time, rector of Memorial church, Baltimore, Md., and afterward of Zion church, New York city. In 1875 he received the degree of S. T. D. from Columbia. In 1879 he was elected bishop of Louisiana, and was consecrated in Trinity church, New Orleans, 5 Feb., 1880.

GALLARDO, Aurelio Luis (gal-yar'-do), Mexican poet, b. in Leon, Guanajuato, 3 Nov., 1851; d. in Napa, Cal., 27 Nov., 1869. In his earliest youth his parents settled in Guadalajara, and he studied in the seminary of Our Lady. After his marriage he gave himself up entirely to literature, and published many minor poems and pieces for the theatre, which were well received. His style is simple and natural, and in his patriotic poems he shows an enthusiastic belief in the ultimate success of the republic and the speedy reunification of the empire. These productions attracted the persecution of the Imperialists, and in 1866 he was forced to emigrate to San Francisco, Cal. There he continued his poetical labors, contributed to the Spanish papers of the state, and in 1868 founded in San Francisco, “El Republicano.” His works are three volumes of poems, “Sueños y Sombras” (Mexico, 1856), “Nubes y Estrellas” (Guadalajara, 1865), and “LEYENDAS y ROMANCES” (San Francisco, 1868); also a collection of poems, “LEYENDAS intimas,” and a novel, “Buenoita,” published in the literary section of his paper in California. He also wrote about twenty comedies, of which the best known are “El Pintor de Florencia,” “Abrojos del Corazon,” “Los Martires de Tacuba,” “La Hechicera de Cordoba,” and the drama “Maria Antonieta de Lorey,” which by many is considered his best production.

GALLATIN, Albert, statesman, b. in Geneva, Switzerland, 29 Jan., 1761; d. in Astoria, L. I., 12 Aug., 1849. He was descended from an ancient patrician family of Geneva, whose name had long been known only connected with the history of a patrician. His father, Jean Gallatin, was engaged in trade, and died when the boy was two years old, while his mother, Sophie Albertine Rolaz de Rosey, survived her husband seven years. Young Albert, who had been baptized by the name Abraham Alfonse Albert, was confided to the care of Madame Pictet, a relative of his father, and from her he received his early education. In 1775 he was sent to a boarding-school, and a year later entered the University of Geneva, where he was graduated in 1779, standing first in mathematics, natural science, philosophy, and Latin translation. The liberal spirit of the times was not without its influence on the young man. His grandmother, Madame Suzanne Gallatin-Vaudenet, was a woman of strong character, with many friends, among whom were Franklin and Voltaire. Through her influence, a commission of lieutenants-colonel in the Hessian troops, then serving in America, was offered to Gallatin; but he declined it, saying that he would “never serve a tyrant.” In opposition to the wishes of his family, he set sail for the Orient, and arrived in April, 1780, with his college friend, Henri Serre, for America, where they might “drink in love for independence in the freest country of the universe.” He sailed from the Orient late in May, 1780, and reached Boston on 14 July. His experiences for the ensuing year or so were far from encouraging; he wandered from Boston to Maine, where he engaged in trading. He served as a volunteer against a threatened invasion by the British, and at one time was in temporary command of a small fort in Passamaquoddy. His trading ventures were not successful, and he returned to New Orleans, with a reduced purse in October, 1781. Here for a time he supported himself by giving instruction in the French language, and in July, 1782, was granted permission to teach the students of Harvard in that language, receiving from the corporation a compensation of $500 for his services. When peace was restored, he left Boston and went to Philadelphia, by way of New York, to deliver the letters to eminent Americans which he had received in Paris. In Philadelphia, through the influence of his friend, Savary de Valencourt, he was led to invest in large tracts in West Virginia. This venture proved successful, and in February, 1784, he settled in Fayette county, Pa., then a part of Virginia, where he opened a country store. During the next few years he was constantly engaged in purchasing property and in locating claims for others, spending his winters in Richmond, then the gayest city in the Union. He appears to have been interested in politics, and his ideas seem to have influenced the speeches of John Smyle, who represented Fayette county in the convention of ratification held in September, 1787. Two years later he was a member of the State constitutional convention held in Philadelphia, and was among those who shared the anti-federalist views then prevalent. This was his entrance into the public service. In 1790 he was sent to the legislature of Pennsylvania, and in 1791 was re-elected in the two following years. He took an active part in its proceedings, and in 1793 was elected to the U. S. senate; but, after serving two months, he was declared ineligible by a strict party vote on the ground that he had been a citizen of the United States only eight years, and taken the oath of allegiance in October, 1785. In November, 1793, he married Hannah, the daughter of Com. James Nicholson, and this alliance greatly widened his political connection. A year later, through the tact, courage, and fidelity, he succeeded in bringing into play a very valuable branch of the “Whiskey Insurrection.” Indeed, historians have agreed in giving Gallatin the honor of preventing a more serious outbreak. At the subsequent election he was chosen to represent Fayette county in the Pennsylvania legislature, and was also elected to congress. His election to the legislature was contested, and finally declared void after a long debate, during which he made his speech “on the western elections.” Another election was then held, in which Gallatin was victorious. After remaining in the legislature till 13 March, he obtained leave of absence. He entered congress on 7 Dec., 1795, as a follower of James Madison, who was then the leader of the Republican opposition, and continued a member of that body until his appointment as secretary of the treasury in 1801. One of the first acts of his administration was a bill calling for the precise condition of the treasury. His object was to establish the expenses of the government in each department of the service on a permanent footing, for which annual appropriations should be made, and for any important expenditure to consist of a separate item. He also came into prominence when the house demanded from the president papers connected with the treaty of 1796 with Great Britain. The presi-
dent returned answer that he considered it a dangerous precedent to admit the right of the house to see the papers, and absolutely refused compliance with the request. In the debate that followed, Gallatin charged John Jay and other Federalists with having pusillanimously surrendered the honor of their country. In reply to this, the ministry of Connecticut, said: "I cannot be thankful to that gentleman for coming all the way from Geneva to give Americans a character for pusillanimity." Throughout his congressional career Gallatin participated in all of the important debates, but always made the treasury department and its control, past and present, the object of his unceasing criticism. The establishment of the committee of ways and means was due to his suggestion, and he was ever a warm advocate of internal improvements. His third term closed in 1801. In the first term he asserted his power, and took his place in the councils of the party. In his second, he became its acknowledged chief. In the third, he led its forces to final victory. Besides maintaining his views in debate, he published pamphlets on "A Sketch of the Finances of the United States" (Philadelphia, 1796) and "Views of the National Debt, Receipts and Expenditures of the United States" (1800). When Thomas Jefferson became president, Gallatin was made secretary of the treasury, and held the office continuously until 1813. He at once applied himself to the mastery of the details of the public finances, and undertook not only the removal of the national debt, but also of the taxes. His management of the treasury department was eminently successful, and he soon obtained a reputation as one of the greatest financiers of the age. The public debt on 1 Jan., 1802, was $86,712,632.25, and this he reduced until, on Jan., 1812, it was only $45,206,737.90. In his annual reports, which were models of clearness, he pointed out methods for the gradual extinction of the debt. In 1812 his report says: "The redemption of principal has been effected without the aid of any internal taxes, either direct or indirect, without any addition during the last seven years to the rate of duties on importations, which, on the contrary, have been impaired by the repeal of the duty on salt, and notwithstanding the great diminution of commerce during the last four years." The war of 1812 then occurred, and the national debt increased steadily until it reached, on 1 Jan., 1819, $127,324,693.74. After negotiating several loans, he severed his connection with the treasury department, and he was sent with James A. Bayard to St. Petersburg as U. S. commissioner to treat for peace with Great Britain under the mediation which the emperor Alexander had offered to the United States. The British government refused to accept the intervention of a foreign power, and the conference was not held. Meanwhile he was continued as commissioner, and subsequenly was associated in the negotiations conducted at Ghent. After months of tedious delay, during which the British, flushed with their successes on the continent over Napoleon, made extortionate demands, a treaty was signed on Christmas day of 1814. Gallatin's biographer, Henry Adams, says, "This treaty was supposed, or than is now imagined, the treaty of Ghent was the special work and the peculiar triumph of Mr. Gallatin." John Austin Stevens says: "By his political life Mr. Gallatin acquired an American reputation; by his management of the finances of the United States, and his views among the first political economists of the day; but his masterly conduct of the treaty of Ghent showed him the equal of the best of European statesmen on their own peculiar ground of diplomacy." His services were rewarded with the appointment of minister to France in February, 1815, but he spent some time in travel both in Europe and in the United States, finally entering on the duties of his office in January, 1816. Meanwhile he took part in the commercial convention held in London during the summer of 1815. During his career in Paris he aided John Quincy Adams in preparing a commercial treaty with Great Britain, and also was associated with William Eustis in negotiating a treaty with the Netherlands in 1817. He left France in 1822, and returned to the United States, where he was occupied some time in attention to his private affairs, refusing a seat in the cabinet as secretary of the navy, and declining to be a candidate for the vice-presidency, to which he was nominated by the Democratic party. In 1826, at the solicitation of President Adams, he accepted the post of American minister to Great Britain, and negotiated commercial treaties by means of which full indemnification was obtained from England for injuries that had been sustained by citizens of the United States in consequence of violations of the treaty of Ghent. On his return to the United States in 1828, he was appointed by the Democratic party to the United States Senate, and by the legislature of New York city, where from 1831 till 1839, he was president of the National bank of New York. In 1831 he published his "Considerations on the Currency and Banking System of the United States," and during the same year he was a member of the free-trade convention held in New York, and prepared for that body the memorial which was submitted to congress. Mr. Gallatin was likewise associated in the movement which led in October, 1830, to the foundation of the New York university. He became the first president of the college, but resigned at the end of the year. After his resignation from the bank, his life was devoted to literature, and especially to historical and ethnological researches. In 1839 he prepared an argument in behalf of the United States to be laid before the king of the Netherlands as an umpire on the Maine boundary question, and in connection with this undertaking he collected a statement of the facts, which he revised and, together with the speech of Daniel Webster, a copy of the Jay treaty, and eight maps, published at his own expense as the "Right of the United States to a Settlement at Niagara" (New York, 1840). He presided in 1844 at a meeting held in New York to protest against the annexation of Texas, and, in the course of the address which he made, said that "the resolution of the house declaring the treaty of annexation by the United States of Texas an infringement of the rights of Texas to be the fundamental law of union between them was a direct and undisguised usurpation of power and a violation of the constitution." The war with Mexico he regarded as "the only blot
upon the escutcheon of the United States," and he published "Peace with Mexico" (1847) and "War Exempt" (1849). His books were gratuitously circulated, and which had un
doubted influence in bringing about peace. In 1846, when Lord Ashburton visited the United States in connection with the treaty which bears his name, Mr. Gallaudet published a pamphlet on the "Origin of the American Institution for the Instruction of the Deaf and Dumb," where he added by impartiality, moderation, and power of reason-
ing. It put before the people, as well as the negoti-
ators, the precise merits of the controversy, and
powerfully contributed to the ultimate peace-
ful settlement. In 1842 he was associated in the
establishment of the American ethnological society,
becoming its first president, and in 1843 he was
elected to hold a similar office in the New York
historical society, an honor which was annually con-
ferred on him until his death. His scientific pub-
lications include "Sketches Respecting Indian Tribes
within the United States east of the Rocky Moun-
tains, and in the British and Russian Possessions in
North America" (Cambridge, 1836) and "Notes on
the Semi-Civilized Nations of Mexico, Yucatán, and
Central America, with Conjectures on the Origin of
the latter, the "mestizo" race of New Mexico" (1845).
John Austin Stevens says of him: "To a
degree higher than any American, native or for-
eign born, unless Franklin, with whose broad na-
ture he had many traits in common, Albert Gallau-
det deserves the proud title, aimed at by many,
reached by few, of Citizen of the World." But
"Writings of Albert Gallaudet," by Henry Adams
(3 vols., Philadelphia, 1879); "Life of Albert Galla-
det," by Henry Adams (1879); and "Albert Gal-
det," by John Austin Stevens, in "American
Statesmen; 1607-1887."

GALLAUDET, Thomas Hopkins, educator, b. in
Philadelphia, 10 Dec., 1877; d. in Hartford,
Conn., 9 Sept., 1851. His family was of Huguenot
origin. At an early age he moved with his par-
ents to Hartford, Conn. He graduated at Yale
in 1805, and was admitted for some time to the law,
as to whether he should study law, engage in trade,
or study divinity, entered the Theological seminary
at Andover in 1811. He was licensed to preach in
1814. His attention having been called to the neg-
lected condition of the deaf and dumb in this country,
he became a contributor in such works as "An
Address to the deaf and Dumb," "A Letter to the
Deaf and Dumb," and "A Letter to the Deaf and
Dumb," and other periodicals.

Another son, Edward Miner, educator, b. in
Hartford, Conn., 5 Feb., 1837, was educated at
Trinity, but not graduated. He began to teach
in 1856 in the Hartford institution which his father
had founded, and in 1867, at the invitation of
Amos Kendall, went to Washington, D. C., with
his mother, and organized the Columbian insti-
tution for the deaf, dumb, and blind. In 1864 he
aided in establishing the National deaf-mute col-
lege, became its president, and in 1865 also profes-
sor of moral and political science. He visited the
principal deaf and dumb institutions of Europe in
1867, and in 1868, after his return, published an
elaborate report of his observations. In 1880, in
compliance with a request made by principals of
schools for the deaf, he conducted a course on
hygiene and sanitation, and attended the National
congress of instructors of deaf-mutes held at Milan, Italy. In 1881 he
succeeded James A. Garfield as president of the
literary society at Washington, D. C. He was
president of the Convention of American instruc-
tors of deaf-mutes, held at New York in 1883. In
1886 he visited England, at the request of the
British government, and gave information to the
royal commission on the education of the blind,
Gallisson

deaf, and dumb, regarding the system pursued in the United States. Trinity college, Hartford, gave him the degree of LL. D. in 1868, and Columbia university that of Ph. D. in the same year. He is the author of a popular “Manual of International Law” (1870), and he has nearly ready for publication (1887) a memoir of his father.

**GALLITZIN, John**, lawyer, b. in Marblehead, Mass., in October, 1788; d. 25 Dec., 1899. After he was married, a year later he went to the Harvard settlement, and practised in Marblehead, and then removed to Boston. For several years he edited the “Weekly Messenger,” and advocated plans for the gradual abolition of slavery in the United States. He published “Reports in the Circuit Court.” (2 vols., 1807; 2d ed., Boston, 1845), and an “Address” to the Peace society, of which he was a member.

**Gallitzin, Demetrius Augustine**, clergyman, b. in the Hague, Holland, 32 Dec., 1770; d. in Loretto, Cambria co., Pa., 6 May, 1841. His father was Russian ambassador to Holland. The Gallitzin family was one of the oldest and noblest in Russia, and had always exercised a great and sometimes a controlling influence in the affairs of that country. The mother of the young prince was a daughter of Field-Marshall Count von Schmettau, a favorite of the Great. Both father and mother were admirers of Voltaire and Diderot, and their son was brought up without religious training. In 1786 the prince, after a severe illness, returned to the Roman Catholic church, of which she had once been a member. A year afterward Demetrius also became a Christian, taking the name of Augustine on his conversion. He served as aide-de-camp to the Austrian general, Van Lilien, in 1792, in the first campaign against France. Before his close he was dismissed, the Austrian government having decided to discharge foreign officers. His parents now wished him to travel, and the unsettled state of the continent determined them to send Demetrius to the United States. The Rev. Felix Brosius was appointed his tutor. To avoid the inconvenience of rank, he took the name of Augustine Schmettau, which was afterward Americanized into Smith, and was borne by him for some time after his ordination. Supplied with letters of introduction from the prince-bishops of Hildesheim and Paderborn to Bishop Carroll, to whom his mother confided him, he sailed in August, 1793, from Rotterman, and arrived in Baltimore on 28 Oct., shortly afterward expressing a wish to become a priest, and entered the seminary of St. Sulpice, Baltimore, with this intention. Both his parents were dissatisfied with his choice, and his father, who had procured him a commission in the Russian army, begged him to come home, saying that his becoming a priest would of itself prevent his succession to the family inheritance. The young prince, however, persevered, and was ordained on 18 March, 1798. He was the second priest ordained in the United States. The first, however, defected to his native country, as the Rev. Theodore Bazin had been made deacon in France before coming to America. Desiring to remain in the seminary, Father Gallitzin, or Father Smith, as he was then called, became a member of the order of Sulpicians. But Bishop Carroll, with a view to retraining his health, sent him to the mission at Port Tobacco. Finding that he was not improving, the bishop directed him to go to the extensive mission of which Conewago was the centre, and at which his friend, Father Ritter, was stationed. His first duty to the bishop was of such a character as to call forth a severe remonstrance and a summons to Baltimore. Here he was placed in charge of all the German Catholics of the city. In 1796 he entered on the Conewago mission, residing in Taneytown, and visiting several parishes in Maryland and Pennsylvania. The zeal of the young priest was not always according to prudence. His too great haste to correct abuses, and the complaints made of his arbitrary measures, called forth a second letter of admonition from Bishop Carroll in 1798. In 1799 the Roman Catholic Catholics of Philadelphia sent him as their bishop for a resident pastor. Father Gallitzin was appointed, and at once set about the work of establishing a Roman Catholic colony. The district he selected for this purpose was one of the wildest and most uncultivated of the Alleghenies, in what is now Cambria county, Pa. It contained no Roman Catholic families. In 1800 he had a church built of pine logs, the only one between Lancaster and St. Louis. He bought more than 20,000 acres, and invited settlers, supplying them with homes on easy terms, and waiting until such time as they would be able to pay for them. But his expectation of realizing from his inherited estates made him incur obligations which for a long time were a source of humiliation and embarrassment. His father died in 1803, and his relatives in Russia, the Elector Frederick, wrote to him of his estates. It was thought by his mother that his presence in Russia would be advantageous to his interests, but no consideration could prevail on him to leave the settlement he had founded. By her advice he appointed three noblemen his agents, with full power of attorney concerning his relatives, while she, in the event of failure, took steps to secure the property for herself, through her contract of marriage. He built a village, which he named Loretto, in 1803, on his own land. It is situated about four miles northwest of Cresson station, on the Pennsylvania railroad, and at the time of his death had a population of 150. He used his influence to have it made the capital of Cambria county when the latter was laid out, but without success, and, as he was the agent for several firms in Philadelphia and other large cities for the sale of lands in western Pennsylvania, the formation of the new county only multiplied his business and increased his embarrassments. Up to the death of his mother in 1806 he had received remittances from her regularly. Although the depleted, in 1807, he was made a Roman Catholic priest, he could inherit no part of his father’s property, his sister, the Princess Maria, continued for some time to send him large sums, which he employed in meeting his engagements, but, on her marriage with the penniless Prince of Salm this resource also failed. Meanwhile his colony began to branch out and lay the foundation of other congregations at Ebensburg, Carrolltown, St. Augustine, Wilmore, Summitville, and several other parts of Pennsylvania, and as, owing to the scarcity of priests, he could not obtain an assistant, he himself, in the fall of 1809, passed from the jurisdiction of the archbishop of Baltimore to that of the newly appointed bishop of Philadelphia. His real name also had become generally known, and as he had been naturalized as Augustine Smith, the legislature, on his petition, granting him his health, sent him to the mission at Port Tobacco. Finding that he was not improving, the bishop directed him to go to the extensive mission of which Conewago was the centre, and at which his friend, Father Ritter, was stationed. His first duty to the bishop was of such a character as to call forth a severe remonstrance and a summons to Baltimore. Here he was
for that of Detroit, but probably refused the honor. Although after 1817 he no longer received remittances from his relatives in Europe, his financial situation improved considerably in the years following. With his proceeds from this sale and some subscriptions from friends in Edinburgh and the United States, he was enabled to free his colony from debt after expending $150,000 on its creation. He was appointed vicar-general of the diocese of Philadelphia in 1821, and Bishop Connell offered later to make him his coadjutor bishop, but the offer was declined. The appointment of Dr. F. P. Kenrick to be coadjutor was displeasing to Father Gallitzin, and he wrote a very plain but respectful letter to the new prelate on the subject. The action of the bishop in regard to certain irregularities in one or two congregations was so little in harmony with his ideas that he resigned his vicar-generalship. The rest of his life was passed in the performance of duties of the most arduous and self-sacrificing character. In spite of a few harmless eccentricities and some errors in judgment, Father Gallitzin affords a fine type of zeal combined with tenderness of heart. “If he had possessed a heart of gold,” said one who knew him well, “he would have given it to the unfortunate.” While engaged in duties that would have taxed the endurance of the most zealous congregation, he found time to write works that are still popular among his co-religionists. They are “Defence of Catholic Principles in a Letter to a Protestant Clergyman” (1816); “Letter to a Protestant Friend on the Holy Supper” (1817); “An Appeal to the Protestant Public”; and “Six Letters of Advice” (1834). There are several lives of Father Gallitzin, the best being “Leben und Wirken des Prinzen Demetrius Augustin Gallitzin,” by the Rev. Henry Lemcke (Münster, 1861); “Memoir of the Life of John M. Gallitzin, Bishop of the American Episcopalian Church,” by A. de Gallitzin,” by Very Rev. Thomas Heyden; and “Life of Demetrius Augustin Gallitzin, Prince and Priest,” by Sarah M. Brownson.—His cousin, Princess Elizabeth, b. in St. Petersburg, Russia, in 1795; d. in St. Michael’s, L., 8 Dec., 1840, became a convert to the Roman Catholic faith at the age of twenty, and was received into the community of the Sacred Heart at Metz in 1828. In 1840 she was sent out as visitor of the houses of the Sacred Heart in the United States. She founded a convent in New York and several schools throughout the United States, as well as a mission among the Pottawatamie Indians. GALLOP, John, soldier, d. in what is now South Kingston, R. I., 19 Dec., 1875. He was employed by the magistrates of Boston to accompany John Mason in an expedition against a company of pirates, under command of a man named Bull. Severe cold delayed the measures for bringing the pirates to justice, and, after spending two months in searching for Bull in their pinnace, Mason and Gallop were compelled to return without him. Later related to John Mason, Gallop afterward went to Connecticut, where he was associated with Mason in several exploits against the Indians, and was also employed as a pilot. While sailing in his bark of twenty tons from Connecticut to Long Island, on 20 July, 1636, with one man and two boys, he captured near Block island a pinnace belonging to John Oldham, a trader, on board of which were fourteen Indians, who had murdered Oldham, and were carrying off his vessel. After firing on them with such effect that the Indians sought refuge under the hatches, he ran on the pinnace, and shot and killed her owner with such force as almost to overturn her. This frightened the Indians so that six of them leaped over and were drowned. After repeating this action several times, only four Indians remained under the hatches. He then ventured to board the pinnace, and bound hands and feet of the men, while forcing their wonderful artodrounty in untwisting each other, he threw one of his prisoners overboard. He found the body of Oldham still warm, and cleft through the brains, with hands and feet cut off. After removing the goods and sails he took the vessel in tow, but was obliged to part her on account of the strong wind, and she drifted to the Narragansett shore. Gallop afterward took part with the Connecticut troops in King Philip’s war, was foremost in the assault on the swamp fort, and was shot dead just inside the entrance.

GALLOWAY, Charles B., M. E. bishop, b. in Mississippi about 1840. He was educated at the University of Mississippi, became an itinerant minister of the M. E. church, and was a popular and impressive preacher, and a strong advocate of pro-}
GALLOWAY, Samuel, lawyer, b. in Gettysburg, Pa., 20 March, 1811; d. in Columbus, Ohio, 5 April, 1867. He was of Scotch-Irish parentage. After removing to Ohio in 1819, he was graduated at Miami in 1833, at the head of his class, and in the following year taught a classical school at Hamilton, Ohio. In 1835 he was elected professor of ancient languages in Miami, but resigned in consequence of ill health in 1836. He resumed teaching in 1838, first at Springfield, Ohio, and later as professor of ancient languages at South Hanover college, Indiana. In 1841 he returned to Ohio, where he studied law, and was admitted to the bar in 1842. He practised in Chillicothe, Ohio, until 1844, when he was elected to the lower house of the legislature of the commonwealth and removed to Columbus. He held this office for eight years, and after declining a re-election resumed his profession. In 1854 he was elected to congress as a Republican and served one term.

GALLUP, Joseph Adams, physician, b. in Stonington, Conn., 30 March, 1709; d. in Woodstock, Vt., 13 Oct., 1849. He was graduated at Dartmouth medical school with its first class in 1739, and practised his profession in Hartford and Lebanon, Conn., until 1800, when he removed to Woodstock. Dartmouth gave him the degree of M. D. in 1814. From 1820 till 1823 he was president of the Castleton medical college, and its professor of theoretical and practical medicine. In 1827 he established a clinical school of medicine at Woodstock, which was incorporated as the Vermont medical college in 1835, and in 1827-28 was a professor there. His first writings were printed in 1802 in the "Vermont Gazette," a paper published in Windsor, and attracted much attention. His other publications by prudence cause by producing intelligence and giving advice. On the taking of Philadelphia he was appointed superintendent of the police of the city and suburbs, of the port, and of the prohibited articles, and thus became the head of the civil government during the British occupation of the city. He retired with the enemy, and in the following October went to England, and never returned.

In 1779 he was examined before the house of commons on the conduct of the war in America, and made accusations against the British commander, and printed three letters to a nobleman on the same subject, charging that the failure of the British was because of Gen. Howe's incompetency. The Pennsylvania assembly in 1788 attained Galloway of high treason, and ordered the sale of his estates, worth, according to his testimony before a parliamentary committee, £40,000. He also published, besides several pamphlets, "Historical and Political Reflections on the American Rebellion" (London, 1780), and "Brief Commentaries on such Parts of the Revelation and other Prophecies as immediately refer to the Present Times, in which the Several Apocalyptic Types and Expressions of those Prophecies are translated into Three Literal Meanings" (1802). To the latter book Dean Whitafer made a caustic reply, which called forth from Galloway an answer entitled: "The Prophetic or Antichristian History of the Church, of Rome, Prefaced by an Address, Dedication, Expostulatory and Critical, to the Rev. Mr. Whitafer, Dean of Canterbury" (London, 1803).

GALLUP, Joseph Adams, physician, b. in Stonington, Conn., 30 March, 1709; d. in Woodstock, Vt., 13 Oct., 1849. He was graduated at Dartmouth medical school with its first class in 1739, and practised his profession in Hartford and Lebanon, Conn., until 1800, when he removed to Woodstock. Dartmouth gave him the degree of M. D. in 1814. From 1820 till 1823 he was president of the Castleton medical college, and its professor of theoretical and practical medicine. In 1827 he established a clinical school of medicine at Woodstock, which was incorporated as the Vermont medical college in 1835, and in 1827-28 was a professor there. His first writings were printed in 1802 in the "Vermont Gazette," a paper published in Windsor, and attracted much attention. His other publications by prudence cause by producing intelligence and giving advice. On the taking of Philadelphia he was appointed superintendent of the police of the city and suburbs, of the port, and of the prohibited articles, and thus became the head of the civil government during the British occupation of the city. He retired with the enemy, and in the following October went to England, and never returned.

In 1779 he was examined before the house of commons on the conduct of the war in America, and made accusations against the British commander, and printed three letters to a nobleman on the same subject, charging that the failure of the British was because of Gen. Howe's incompetency. The Pennsylvania assembly in 1788 attained Galloway of high treason, and ordered the sale of his estates, worth, according to his testimony before a parliamentary committee, £40,000. He also published, besides several pamphlets, "Historical and Political Reflections on the American Rebellion" (London, 1780), and "Brief Commentaries on such Parts of the Revelation and other Prophecies as immediately refer to the Present Times, in which the Several Apocalyptic Types and Expressions of those Prophecies are translated into Three Literal Meanings" (1802). To the latter book Dean Whitaker made a caustic reply, which called forth from Galloway an answer entitled: "The Prophetic or Antichristian History of the Church, of Rome, Prefaced by an Address, Dedication, Expostulatory and Critical, to the Rev. Mr. Whitaker, Dean of Canterbury" (London, 1803).

GALLY, Merritt (gaw'-ly), inventor, b. near Rochester, N. Y., 15 Aug., 1888. His father, a Presbyterian clergyman, died in 1844, and in his eleventh year the boy became a printer. He observed the methods of engravers who came into the office to take proofs of cuts, and, with some files and a grindstone, managed to construct a set of tools, with which he soon did all the engraving of the office, and thus earned money to obtain the books and appliances needed for the study of mechanics and engineering. At sixteen years of age he constructed a printing-press, and, in partnership with an older brother, established a newspaper, of which the boys were respectively editor and printer. This venture was fairly successful, but Merritt, desiring a more complete education, left the business to his brother, and, with other capital, his engraving tools, set out to work his way through college. With these, and by his talent for portrait-painting, he earned sufficient money to enable him to take the full college course. He was graduated at Rochester in 1863, became a student at Auburn theological seminary, and in 1866 was ordained by the presbytery of Lyons. For three years he served as a pastor, but, owing to loss of voice, was obliged to retire from the pulpit. He then returned to his former pursuits, and constructed a press for artistic printing. This was known as the "Universal" printing-press, and its success was such that he established a manufactory for building the presses in 1869. In the progress of this enterprise he invented and constructed a large number of tools and mechanical appliances specially designed to render the presses perfectly interchangeable in many respects. In 1873 he established himself in New York city, sending his presses to all parts of the world, and from this time forward he has devoted himself to invention. Over four hundred patent claims have been granted him for improvements in printing machinery, lithographic and typesetting machinery, and devices, philosophical apparatus, and musical instruments. He has invented a multiplex telegraph, and in 1873 patented a device for converting the variable velocity of machinery into constant velocity. In 1876 his attention was directed to the growing demand for automatic musical instruments. His first important improvement consisted in a set of pneumatic appliances acted upon by a succession of small, graded perforations in a sheet of paper passing over a tubed "tracker-range." The perforation devices changed the pressure of air in the pneumatic apparatus, enabling the instrument not only to produce automatically the notes of the music, but to render every gradation of tone almost as perfectly as if produced by a skilful performer. His experiments resulted in the production of several "tracker-ranges," of which he has warranted the establishment of extensive works for manufacturing the instruments.

GALT, John, Scottish novelist, b. in Irvine, Ayrshire, Scotland, 2 May, 1779; d. in Greenock, Scotland, 11 April, 1838. He was educated in Greenock, and, after spending some years in mercantile pursuits, began the study of law at Lin-
colin's Inn, London. In 1809 he set out on a tour of nearly three years in southern Europe and the Mediterranean, and while in the Levant his attention was introduced to the British Constitution by way of Turkey, in defiance of the Berlin and Milan decrees, led to considerable diplomatic correspondence. While abroad, he formed the acquaintance of Lord Byron and Mr. Hobhouse, and travelled much with them over land and water. On his return, after the first appearance before the public as an author, and the published results of his observations while on the continent obtained a large degree of popularity. From this time until 1826, when he went to Canada, he published many works, which, though not uniformly successful, gained him public favor. He connected with Canada was through his appointment as an agent to urge on the imperial government the claims for compensation of Canadians who had sustained losses during the war of 1812. The resulting negotiations and investigations led to the organization of the Canada land company, with a capital of $1,000,000. This association procured a grant of 1,100,000 acres in one block, and a scheme for emigration on an extensive scale was adopted. Mr. Galt, in honor of whom the town of Galt, Ont., is named, was appointed superintendent of the company, and in 1827 began the work of colonization by founding what is now the city of Guelph. He then took an extended voyage on Lake Huron, visiting Detroit, Buffalo, and other places in the United States, and on his return to Canada caused a road to be constructed through the dense forest lying between Lake Ontario and Lake Huron. Notwithstanding Mr. Galt's energy, the affairs of the Canada land company did not prosper, and in 1829 he was recalled, and, after contributing significantly to the prosperity of Canada, was obliged to take advantage of the insolvent debtors' act. On his return to England he resumed writing, produced many books, and contributed largely to newspapers and magazines. As a novelist he had no classic predilections, and was less distinguished for literary finish and the skillful elaboration of his plot than for the genuine and vivid element of interest always sufficiently strong to secure his stories a reading. He wrote altogether about forty-five works, including "Lawrie Todd," a novel relating some of his Canadian experiences (1830); an "Autobiography" (2 vols., 1833); and a "Literary Writings" (1 vol., 1834).—His son, Thomas, Canadian jurist, b. in London, England, 12 Aug., 1815, was educated in England and in Scotland, and in 1828 emigrated to Canada with his father's family. Two years afterward he returned to Great Britain, remained there three years, and then, returning to Toronto, entered the employ of the Canada land company, in which he remained six years. He then began the study of law in the office of Justice Draper, and was called to the bar of Upper Canada in 1843. He at once took a prominent place in his profession, in 1858 was created a queen's counsel, and in 1869 was made a judge of the court of common pleas. Another son, Sir Alexander Tilloch, Canadian statesman, b. in Chelsea, London, England, 6 Sept., 1817, was educated in England and Canada, displayed in legislatures, and contributed to "Fraser's Magazine" when only fourteen. He emigrated to Canada when a boy, and in 1833 became a clerk in the service of the British and American land company, whose operations were limited to the eastern townships of Lower Canada. He was appointed commissioner of the company in 1844, and held the office for twelve years, and under his management the business of the corporation became prosperous. In 1849 Mr. Galt was elected a member of parliament for the Riding of Shubenacadie, and though he was then a Liberal in politics, he opposed the administration of Messrs. Baldwin and Lafontaine, voted against the rebellion losses bill, and, despairing at that time of Canada's future, signed the annexation manifesto. When Toronto became the seat of government, after the completion of the parliament buildings at Montreal, Mr. Galt resigned, and did not re-enter politics till 1853, when he was again elected for Sherbrooke, and continued in parliament till his resignation in 1872. On the resignation of the Brown-Dorothy government in August, 1858, the governor-general, Sir Edmund W. Head, called upon Mr. Galt to form an administration, but he declined. The same year he proposed resolutions in parliament in favor of a federal union of the British North American colonies, and these became the basis of the Confederation of the Macdonald government, which he joined the same year. Together with Sir George E. Cartier and John Rose, he went as a delegate to Great Britain to urge the confederation of the British North American provinces, and the construction of the Intercolonial railway before the imperial government. He was a member of the executive council, and minister of finance, from August, 1858, till May, 1862, when the ministry was defeated on the militia bill, and held the same office again from March, 1864, till August, 1866, when he resigned in consequence of his opposition to the educational policy of the administration relative to the British population of Lower Canada. He became a third time a member of the privy council, and minister of finance of the Dominion on 1 July, 1867, but resigned on 4 November of that year for private reasons. He was a delegate to the Charlottetown union conference in 1864, and to that of Quebec the same year; a member of the confederation council of trade held in Quebec in 1866; a delegate to Washington respecting the renewal of the reciprocity treaty in 1868; and to the London colonial conference in 1866-7. In 1868 he went to London with Dr. (now Sir Charles) Tupper, to confer with the imperial government on the Nova Scotia question, and again became finance minister on the resignation of Sir John Rose in 1869. He was a member of the colonies commission of 1877, appointed under the treaty of Washington; conducted negotiations on behalf of Canada for a commercial treaty with France and Spain in 1879, and in 1881 was the delegate for Canada at the international monetary conference in Paris. He was a member of the Canadian high court, and in the House of Commons from 1880 till 1888. Sir Alexander is a fluent speaker, and is regarded as one of the ablest ministers of finance Canada has ever had. His monetary statements always have been noted for clearness. The most noticeable features of his financial administration were the consolidation of the public debt, with provisions for its redemption; the
encouragement of direct foreign trade: the abolition of the canal and Lake St. Peter tolls; and the issuing of provincial notes as currency. He was president of the St. Lawrence and Atlantic railway in 1852-3, and carried out the amalgamation of that line with the Quebec and Richmond, Toronto and Guelph, and Montreal and Toronto, forming what is now known as the Grand Trunk railway, of which line he was in 1857-8 a government director. He declined the honor of the C. B. (civil) in 1867, but in 1869 was created a K. C. M. G., and in May, 1878, was advanced to the Knighthood in the Grand Cross. He is an honorary LL. D. of Edinburgh university, and received a diploma for special services in connection with the international fisheries exhibition in London in 1883. During the early part of his political career Sir Alexander was a Liberal in politics, but from 1857 he has allied himself to the Liberal Conservatives. He is the author of "Canada from 1849 to 1859," and several pamphlets.

GALUSHA, Jonas, statesman, b. in Norwalk, Conn., 11 Feb., 1793; d. in Shaftsbury, Vt., 24 Sept., 1834. He removed to Shaftsbury in 1775, and held a commission of Benjamin and Samuel. Besides filling many minor offices, he was councillor for thirteen years, judge of the supreme court for two years, and governor of the state from 1809 till 1813, and again from 1815 till 1820. In 1808, 1820, and 1824 he was a presidential elector. He was president of the constitutional conventions of 1814 and 1823. In his religious sentiments Gov. Galusha took an interest in the affairs of the Baptist church, of which he was a member.—His son, Eliot, clergyman, b. in Shaftsbury, Vt.; d. in Lockport, N. Y., 18 June, 1850, as ordained to the Baptist ministry in 1802, and served as pastor of churches in Whitesborough, Utica, Rochester, and Lockport, N. Y. At one time he was president of the Baptist missionary convention of New York. He was an attractive preacher, and one of the most widely known and esteemed among the Baptist ministers of his generation.

GALVEZ, José de (gal-veth), Marquis of Sonora, Spanish lawyer and statesman, b. in Velez-Malaga in 1729; d. in Madrid in 1786. He was graduated in law at the University of Alcalá de Henares, and gained a considerable degree of eloquence in the defence of several lawsuits. He became ac- quainted in Madrid with the French ambassador, Marquis de Duras, who engaged him as an assistant in the prosecution of claims at the Spanish court. There Galvez attracted the attention of Charles IIII's prime minister, the Marquis of Grim- aldi, and became his private secretary. In 1764 he was appointed a member of the council of the Indies, and in 1771 sent on a mission to Mexico to settle difficulties that had arisen between the audiences and the proprietors of the mines regarding royalty. He soon arranged everything satisfac- torily, introduced improvements into the administration, which saved several millions yearly to the government, and made several voyages into the interior to study the situation and the necessities of the country. He returned to Spain in 1774, and next year was appointed president of the council of the Indies, in which office, the most important in the kingdom after that of prime minister, he rendered great service to the state and the colonies. In 1779 he founded in the valley of Sonora in Mexico a colony, which soon prospered, and for which he created a marquis. His brother, Matalas, b. in Velez-Malaga in 1731; d. in the city of Mexico, 3 Nov., 1784, entered the administration through the influence of his brother José, and obtained rapid promotion, being appointed in 1781 captain-general of Guatemala. There he laid in 1792 the foundation of the new cathedral, after the removal of the capital from old Guatemala, which had been ruined by the earthquakes of 1773. In the same year war began with England, and the British forces occupied several places on the Atlantic coast, but Galvez in 1782-9 successfully drove them from Omoa, Roatan, San Juan, Rio Tinto, and Bluefields, and in recompense was appointed in the latter year viceroy of Mexico. During his short administration he had the streets of the capital cleaned and paved, and promoted the Academy of fine arts, for which he ordered from Italy plaster models of the principal art-treasures. During his administration Alejandro Valdes began to publish "La Gazeta," the first newspaper of Mexico. He also proposed to the home government the establishment of a bank of loans, for which he had abundant subscriptions, and, although the idea was not executed in his time, he may be considered as the originator of the banking system in Spanish America. In 1784 the small-fox ravaged Mexico, and Galvez was ac- tive in mitigating the sufferings of the poorer class.—His son, Matalas, b. in Malaga in 1735; d. in the city of Mexico, 30 Nov., 1786, was called to court at the age of sixteen years by his uncle, the minister, and entered as cadet in the regiment of Walloon guards. Wishing to perfect himself in military science, he obtained leave of absence in 1772 and went to France, where he served three years in the regiment of the Legion of the Canton, and was promoted lieutenant. In 1773, when Charles IIII. declared war against Algiers, Galvez returned to Spain and served as captain in the expedition of Gen. O'Reilly. He distinguished himself in several engagements with the Moors, rose to the rank of colonel, and on his return in the same year was given the rank of brigadier. Early in 1776 he was appointed second in command to the governor of Louisiana, Luis de Uzcaga, and after the pro- motion of the latter to be captain-general of Caracas, toward the end of the year, took charge of the government. He made great improvements in several branches of the administration, and gathered and colonized several tribes of wandering Indians, whom he succeeded in civilizing. In 1778 the Continental congress sent Capt. Willing as agent to New Orleans, and Galvez assisted him secretly with arms and ammunition and $70,000 in cash. Spain offered her mediation between the colonies and Great Britain, and, after being repulsed by the latter, declared war on 16 June, 1778. Galvez immediately formed a plan of campaign, and, al- though he had only a small military force under his command, he did not wait for re-enforcements, but, organizing volunteer regiments, marched north- ward on the eastern river bank. He took Fort Manchac on 27 Aug., and in September captured Baton Rouge, Fort Pamun, and Fort Natchez. In October he received re-enforcements from Ha-vana, and was made a major-general. He then in-
vasted Mobile with his combined forces, and in Feb., 1780, captured Fort Charlotte, forcing the city to surrender. The French fleet sailed, but GaUvez soon rose to 14,000 men, and he invaded the north-western part of Florida, defeating the British in several encounters, and besieged Pensacola, but, being unable to attack it from the sea-side for want of siege artillery and a fleet, went in January, 1781, to Havana. He was taken prisoner by the British and ordered to the Philippines. The British capitulated on 9 May, and, together with 800 prisoners and the armament, the whole west coast fell into the hands of the Spanish. This feat of Galvez was celebrated by M. de Prat in his poem which was published in the Philippines, and translated into English.

Galvez was rewarded by the title of count and the rank of lieutenant-general, and was appointed captain-general of Cuba. On the death of his father he was promoted viceroy of Mexico, taking charge of the government, 17 June, 1785. He improved the workings of the mines, augmenting the crown revenue from them, while at the same time he protected their owners from the unjust exactions of the revenue officers, rebuilt the old theatre, and repaired the paddle wheel of the Piedmont steam ship. In 1785 a famine desolated the province, and an epidemic broke out in the following year, and Galvez did all in his power to alleviate the public sufferings, giving large contributions from his private purse for the relief of the poor. He also constructed a hospital in the city, and two churches near the university.

The home government began to manifest some distrust, and this prejudiced Galvez's mind. He became melancholy and reserved, seeking his only distraction in the chase. In consequence of violent over-exertion he fell ill and died, after a few days in the archiepiscopal palace of Toluca.

GALVEZ, Mariano, b. in Guatemala in the latter part of the 18th century; d. in Mexico about 1830. He was a founding, and was adopted by a wealthy family, whose name he assumed. He received his early education in the convent-schools of Guatemala, and later studied law in the university of that city, and was graduated as doctor in 1819. He was private councillor of Gov. Gainza (q. v.), and it is probably due to his influence that the latter did not oppose the popular movement for liberty. Galvez favored the annexation of Guatemala to Mexico, but when the first Federal congress of Central America met in Guatemala in 1835, he was one of the deputies, and became president. In the civil war of 1836, Galvez took part with the Federalists, and he helped to suppress the revolution movement against the Unitarian government, which, although promptly suppressed, hastened the invasion of Guatemala by Morazan, whose forces Galvez joined in Ahuachapan. On 24 Aug., 1831, Galvez was elected chief of the state of Guatemala, and under his administration, science, arts, and education were encouraged, and the appearance of the government was improved. In February, 1855, he was re-elected for a second term, during which the Asiatic cholera afflicted the country, and the reactionary party persuaded the uneducated people of the inferior that the disease was caused by the poisoning of the springs by order of the government. Several revolutionary movements began, and in January, 1838, the city of Antigua, Guatemala, pronounced against Galvez's government. On the 18th the revolutionary forces of Sacatepequez occupied the city of Guatemala, and Galvez left the city. He practised law for some years with distinction.

GAMA, Antonio Leon de, Mexican astronomer, b. in the city of Mexico in 1755; d. there, 12 Sept., 1802. He studied in the College of San Ildefonso, early showing a taste for astronomy. As the means for the support of the observatory ceased at that time in Mexico, he instructed himself by reading the works of Newton, Wobber, Gravesend, Muschermont, Bernaulis, La Caille, and other eminent writers. He was for many years a clerk in the office of the secretary of the supreme court, and nothing would have been known of his scientific work if the astronomer La Lande had not published in his "Connaissances des temps" Gama's name as that of the author of the first exact observation of the longitude of Mexico, and eulogized his calculations of the eclipses of the sun of 6 Nov., 1771, which he promised to publish in the memoirs of the Academy of Paris. At the same time he commissioned Gama to take observations of the satellites of Jupiter, and of the tides on the Pacific coast from Acapulco to Valparaiso. This work was called the public duty of a viceroy, and the scientist Joaquin Velasquez de Leon, at the foundation of the Mining school, appointed him professor of mathematics, pyrotechnics, and aeronautics, and commissioned him to make observations upon the impending eclipse of the sun and the other celestial phenomena. He was himself a distinguished mariner and geographer, and he calculated the probable date of appearance of a comet, which had been predicted by the London astronomers for 1788. The necessity of proving the correctness of Gama to give time to mechanical pursuits, which would have been better employed in the service of science. But he still found leisure to write on experimental physics, medicine, mathematics, and Mexican antiquities, of which he exhibited profound knowledge. When in 1789 the asteroid was discovered, he published an essay about it, "Historical and Chronological Description of Two Stones that were found in the Plaza of Mexico upon the Occasion of laying the New Pavement," explaining for the first time its use among the Indians. Also a treatise on the calculus, astronomical and philological, and hieroglyphics. Prescott praises Gama as treating his subject, not with the accustomed credulity of the antiquarian, but with the caution of a mathematician, who demonstrates whatever he asserts. Gama's only work preserved in book-form is " Descripcion Geografica del Ecuador del Sol, el 24 de Junio de 1778" (Mexico, 1778).

GAMA, Jose Basilio da, Brazilian poet, b. in the district of Rio das Mortes, Brazil, in 1740; d. in Lisbon, Portugal, 31 July 1785. He belonged to a poor family, was brought to Rio Janeiro at an early age by a monk of St. Francis, and was educated by the Jesuits, who afterward received him into their order. He was reduced to great poverty after the missionaries were expelled from Brazil, but finally succeeded in entering a seminary, where he studied the liberal sciences and learned to speak Portuguese and Spanish. He went to Portugal, and from there to Italy. He returned to Portugal in 1775, being called by the marquis of Pombal to celebrate the unveiling of a equestrian statue of king Jose I., in an ode, which was awarded the prize, and Gama was given a place in the department of nobility. After the downfall of Pombal, Gama lost his office and went to Brazil, where he founded an academy of Arcadians modelled after that of
Rome, which was dissolved by the viceroy, Count of Rezende, under suspicion that it was a political association. Gama was a prisoner in Portugal in 1785, narrowly escaped banishment to Angola, and was only set at liberty in 1787. About this period he became an enemy of the Jesuits, and published his poem of "Uruguay" (1789), the object of which is to show that they had conspired to found an independent state among the Indians of that province. The poem of "Uruguay" contains some clever descriptions of the forest scenery of South America, but, while inveighing against the Jesuits, says nothing of the civilization they introduced, or of its destruction by their hands, and put forth to colonize Spain and Portugal. Da Gama afterward was elected a member of the Academy of Lisbon. He is buried in the church of Boa Hora in that city. He also published "Lenitivo da Sande de prin- cipe D. Jose" (1789), and "Quituba," another poem, and after a new chief who assisted a Portuguese in an expedition against Angola (1791).

GAMA, JOSE BERNARDO FERNANDEZ, Brazilian historian, b. in Pernambuco in 1803; d. in Rio de Janeiro in 1852. In his youth he entered the army, participated in the Rio Revolution of 1822, and in the subsequent declaration of independence at Pira- range, 7 Sept., 1822. For the action of Bahia, he was decorated with the military medal that was issued in commemoration of that movement, and in 1833 received the order of the Cruzeiro; but, as he was of humble family and had no friends in government circles, he never advanced above the rank of lieutenant of the staff, and as such was retired in 1842. He then gave up his time to his profession, taking up the study of law. He established his name as a writer, "Memorias Historicas da Provincia de Pernambuco, precedidas de um ensaio topographico-historico" (4 vols., Pernambuco, 1844-49). As he was too poor to have this work printed, the provincial assembly of Pernambuco authorized him to draw out a quarterly lottery to the extent of fifteen contos de reis (about $7,500), the proceeds of which were to be invested in its publication.

GAMARRA, Agustin (gal-mar-ra), Peruvian soldier, born in Ayacucho, Peru, 18 Nov., 1841. He studied theology in the college of San Buenaventura of his native city, but entered the Spanish army in 1869 as a volunteer. He rose gradually to the rank of lieutenant-colonel, served in Bolivia against the Argentine forces, and in 1891 came to Lima in command of the 2nd battalion of the regiment of Cuzco. He then joined the Independents, was promoted colonel and then brigadier, and served as chief of the staff of the Peruvian contingent under Bolivar and Sucre in 1824. He was promoted general of division, appointed prefect of Cuzco, and in 1828 was commander-in-chief of the army in the campaign against Bolivia, concluding the war by the treaty of Piquisa, for which he was rewarded with the rank of grand marshal. He afterward pronounced against La- mar, president of Peru, was declared provisional president of Peru in 1869, and in 1870 was president for four years. His administration was progressive, although constantly interrupted by revolutionary movements. When his term was finished he delivered the executive to Gen. Orbe- gozo, but soon headed a rebellion against him. He was arrested, averting war and emigrated to Bolivia. When Gen. Santa Cruz interfered in the Peruvian struggle between Orbe- gozo and Salaverry, Gamarra opposed the intervention with a force that he had raised in the south of Peru, but which was defeated by Santa Cruz at Yanacocha, and banished to Chili in June, 1855. When war was declared between Chili and Peru in 1837, Gamarra joined the second Chilian expedition, and in 1839 was again elected president of Peru. In 1841, when the Bolivians overthrew the government of the Peruvian modern philosophy again in favor of Santa Cruz, Gamarra invaded the neighboring republic at the head of an army, but was defeated and killed in battle at Ingavi.

GAMARRA Y DAVAROS, Juan Benito (ga- mar-ra y da-var-os), Mexican author, b. in Zamora, Mexico, in 1745; d. in the city of Mexico in 1838. He studied in the College of San Ildefonso in the city of Mexico, and in November, 1764, entered the congregation of San Felipe Neri in the town of San Miguel. Here his superiors appointed him their attorney-general, and sent him to Madrid and Rome to conclude arrangements for the final establishment and endowment of the congregation in Mexico. Pope Clement XIII, made him apostolic prothonotary, and he was given the degree of doctor of theology by the University of Pisa, and in 1781 was elected a member of the Senate of that city. On his return to Mexico he brought a collection of paintings, drawings, a large library, and a collection of physical instruments for his college. He reorganized the plan of studies of the college, and was also the first in Spanish America to introduce a course of study in modern philosophy. He took great interest in the advancement of instruction in New Spain, and was the founder of many new colleges. The viceroy proposed him for several high offices, but Gamarra refused them all. At the time of his death he was preparing a plan for the organization of the government of the viceroyalty. He published "Musa Americana" (Cadiz, 1789); "Elementos de la Filosofia" (Mexico, 1774); "Academia de Filosofia" (1774); "Las antinomias de Xochicalco" (Bologna, 1774); "Errados del Intendimiento Humano" (Puebla, 1776); "Maxutas de Belsis" (Mexico, 1780); "Reflexiones Críticas sobre las Historias Escuchadas del Antiguo Testamento" (1781); and left others in manuscript, which are preserved in the National Library of Mexico and by private collectors.

GAMBARO, d. in Aguadilla, Puerto Rico, May 27, 1869. He was born in the Bahama islands, 13 Oct., 1756; d. in Iver, near Uxbridge, England, 19 April, 1883. His ancestors were French Protestants, who were expatriated by the revocation of the edict of Nantes, and his father was lieutenant-governor of the Bahamas. James entered the navy at an early age and obtained the rank of post-captain in 1778. He commanded the frigate "Raleigh" and was engaged in the reduction of Charleston, S. C., in 1780. In the following year he aided in repelling the French attack upon Jersey. He was appointed to command the "Defense," of 74 guns, in 1789, and aided Lord Howe against the French fleet, which was commanded by Villaret de Joyeuse. The "Defense" was the first to break through the enemy's line in the engagement, which took place on 1 June, 1794. He was advanced to the rank of rear-admiral in 1795, of vice-admiral in 1799, and of admiral in 1801. In command of the channel fleet in 1801. In 1802 he was appointed to be the governor of Newfoundland. Having been raised to the rank of full admiral in 1808, he commanded the fleet during the three day's bombardment of Copenhagen in 1807. In September, 1808, he gave up the command of the fleet, and in return for his services was made a baron and offered a pension, which he declined. In
1808 he was appointed to command the channel fleet, and prepared a code of signals and general instructions for the discipline of the navy. He attacked the French squadron in Aix roads in 1809 and burned five of its vessels. As a consequence of a disagreement with Lord Cochrane, who had charge of the British fire-ships, Lord Gambier requested a court-martial, by which he was acquitted. In 1814 he was placed at the head of the commissioners to negotiate a treaty with the United States, which concluded the war. In 1816, subsequent to his retirement, he led the commanding officers in the Mediterranean—His brother, John M., b. about 1791; d. in Brooklyn, N. Y., 11 Sept., 1888, was appointed midshipman, and 2d lieutenant of the marine corps in 1809. He became 1st lieutenant in 1811, captain in 1814, major by brevet in 1815, and lieutenant-colonel by brevet, 3 March, 1827.—Another brother, Peter, d. 11 Sept., 1814, was appointed midshipman in 1809 and became lieutenant in 1814. He was killed in the battle of Lake Champlain, while acting 1st lieutenant of the flag-ship.

Gamble, Hamilton Rowan, governor of Missouri, b. in Winchester, Va., 29 Nov., 1798; d. in Jefferson City, Mo., 31 Jan., 1864. His education was received principally at Hampden Sydney, and when about eighteen years of age he was admitted to the bar of Virginia. In 1818 he went to Missouri, and resided several years in Franklin, Howard co. He was elected secretary of state in 1824, which office he held one year. He then became a successful lawyer in St. Louis, served on the bench from 1851 till 1855, and was presiding judge of the supreme court of Missouri. At one time he was a member of the state house of representatives. In 1861 he was a state senator. In 1861-2, he was a member of the state convention, which body appointed him provisional governor, the regular governor, Claiborne F. Jackson, having joined the secession party. He held this office until his death. In the State convention of 1861, as chairman of the committee of education, he made a report expressing a hope for an amicable adjustment of the existing difficulties without civil war. He pronounced the president's call for troops unconstitutional, and appealed to the legislature to unite for the preservation of the state. Later the governor was authorized to raise a loan of $500,000 and to purchase ammunition, and the state military was put under his command. On 12 June, 1861, he issued a proclamation calling into service 50,000 of the state militia "for the purpose of repelling invasion, and for the protection of the lives, liberties, and property of the citizens." On 12 June, 1862, the State convention passed a resolution expressing confidence in the integrity and patriotism of the governor and state officers. On 15 June he submitted a message to the convention, declaring that he would furnish aid to any state that would adopt a measure of emancipation. On 25 July, Gov. Gamble summoned the militia to defend the state against Confederate guerillas. He called the adjourned State convention to reassemble in June, 1863, to consult and act on the subject of emancipation, and, after expressing a desire for peace, offered his resignation, which was not accepted. Gov. Gamble in 1838 organized the 2d Presbyterian church in St. Louis.

Gamble, James, jurist, b. in Lycoming county, Pa., 28 Jan., 1809; d. in Williamsport, Pa., 28 Feb., 1893. From 1821 to 1826 he attended the legislature, studied law, and was admitted to the bar in 1822. He was elected to the legislature in 1841, and re-elected in the following year, serving as chairman of the committee of ways and means, when the appropriation for the Portage railroad over the Alleghany mountains was made. He was then elected to Congress as a Democrat, serving from 1851 till 1855. He was made president-judge of the district composed of Clinton, Centre, and Clearfield counties in 1859, but retired to private life in the following year. He was elected president-judge of Lycoming district in 1866, and served ten years.

Gamble, Thomas, naval officer, d. 10 Oct., 1818. He was the son of Maj. William Gamble, an officer of the Revolution. The son was appointed midshipman in 1804, lieutenant in 1810, and commander in 1816. He died while commanding the "Erie" in the Mediterranean. —His brother, John M., b. about 1791; d. in Brooklyn, N. Y., 11 Sept., 1888, was appointed midshipman, and 2d lieutenant of the marine corps in 1809. He became 1st lieutenant in 1811, captain in 1814, major by brevet in 1815, and lieutenant-colonel by brevet, 3 March, 1827.—Another brother, Peter, d. 11 Sept., 1814, was appointed midshipman in 1809 and became lieutenant in 1814. He was killed in the battle of Lake Champlain, while acting 1st lieutenant of the flag-ship.

Gambon, Francisco Javier (gam-bo-a'he), Mexican lawyer, b. in Guadalajara, 17 Dec., 1717; d. in the city of Mexico, 4 June, 1794. He came of a rich family, but was left an orphan in his early youth, and his training was in the hands of his executors. He began his studies at the College of San Juan, in his native city, continued at that of San Idefonso, Mexico, and finished them in the university of that city in 1739. He then entered the practice of the bar, and, having shown the success of his successful defense of a complicated suit. In May, 1755, he was sent by the tribunal of commerce on a mission to Madrid, to arrange some intricate questions at court, and there studied mining engineering, afterward writing a treatise on subterranean geometry, which introduced a new system of his work on law. He was treated with distinction by Charles III., and commissioned president of the supreme court of Santo Domingo, where he arranged the ordinances of the court, and composed the famous "Black Code" for the government of the slaves. On being presented to the president of the supreme court of Mexico, he reformed the forensic practice, introduced a clear style of pleading, and was the founder of a new school of jurists. To simplify the proceedings still further, he labored for many years on a codification of the mining laws, which in 1803 was put into effect. He wrote "Comentarios a las ordenanzas de minas, dedicadas al Rey Don Carlos III." (Madrid, 1761), accompanied by an alphabetical list of miners, their descent from the capital, and of the most common mining terms of the province, that differ from those used in Spain. The arguments in two of the most famous lawsuits that he defended were printed (Mexico, 1753 and 1754), and he left many manuscripts, which are preserved in the National library.

Gammell, William, educator, b. in Medfield, Mass., 10 Feb., 1812. He was graduated at Brown in 1831, and for the three years following was a tutor there. He was chosen professor of rhetoric and English literature in 1833, and in 1880 was transferred to the chair of history and political economy. In 1889 Rochester university gave him the degree of D. D. In 1884 and 1886 he made a service in Brown university covered a term of thirty years. Since his retirement from the university in 1884 he has devoted much attention to the affairs of various educational and charitable institutions. He has written a life of Roger Williams (Boston, 1846), and one of Gov. Samuel Ward, for Sparks's "American Biographies"; also a "History of American Baptist Missions," at the request of the American Baptist missionary union. For a time he was one of the editors of the "Christian Review," and he has written extensively for that and other periodicals.
GANA, José Francisco, Chilian soldier, b. in Santiago, 15 Nov., 1791; d. in Nuñoa, 10 Feb., 1862. He entered the military service of the government of Chile in 1808, was promoted 2d lieutenant of the king's regiment, in which he served during the preparation of an English invasion in 1809, and after the declaration of independence in 1810 till 1812, when he retired to give himself entirely to study. In 1820 he was commissioned in the army of General San Martín, and his victorious march across the Andes, which led to the fall of Lima, is a part of his history. He was in command of a part of the army during the siege of Lima, and with his troops captured the city of Huaras, and with his victorious march across the Andes, which led to the fall of Lima, is a part of his history. He was in command of a part of the army during the siege of Lima, and with his troops captured the city of Huaras, and was promoted captain-general and commander-in-chief of the army of the conquest of Peru, and was appointed governor of the department of Cibao in February, 1863; the troops were soon driven into the coast, and the governor was compelled to leave. He was in command of the expedition to Cibao in 1863, and after the capture of the city of Cibao, he returned to Chile, and was appointed governor of the province of Arauco. He was in command of the army of the conquest of Peru, and was appointed governor of the department of Cibao in February, 1863; the troops were soon driven into the coast, and the governor was compelled to leave. He was in command of the expedition to Cibao in 1863, and after the capture of the city of Cibao, he returned to Chile, and was appointed governor of the province of Arauco. He was in command of the army of the conquest of Peru, and was appointed governor of the department of Cibao in February, 1863; the troops were soon driven into the coast, and the governor was compelled to leave.

GANDARA Y NAVARRO, José de la (gang-da-ра-е-на-var-ro), Spanish soldier, b. in Bilbao, 15 Oct., 1820. He entered the military college as a cadet in 1832, joined the army in 1834 as sub-lieutenant, and served in the campaigns against the Carlists till 1839, participating in all the battles. Afterward he served with the colonies of Linares and Ancon, and after reaching the rank of brigadier, was appointed, in 1857, governor of the islands of Fernando Poo and Ancon and Corisco. In 1862 he became major-general, and in November of that year was made military governor and commander-in-chief of the province of Santiago de Cuba. The insurrection against the Spanish domination of Santo Domingo, which had been annexed in 1861, began in the department of Cibao in February, 1863; the troops were soon driven into the coast, and the governor was compelled to leave. He was in command of the expedition to Cibao in 1863, and after the capture of the city of Cibao, he returned to Chile, and was appointed governor of the province of Arauco. He was in command of the army of the conquest of Peru, and was appointed governor of the department of Cibao in February, 1863; the troops were soon driven into the coast, and the governor was compelled to leave.
Unitarian doctrines were the delight of Boston theologians. He delivered the annual election sermon in 1842, and in 1848, he was presented by Harvard. He took part in a second controversy which arose in the Unitarian denomination, and, circumscribed as he was by his infirmity, he did a large amount of ministerial and literary work. He was president of the American Unitarian association in 1847–51, of the Benevolent fraternity of churches in 1857–62, and an overseer of Harvard in 1863–69. On the bronze bas-reliefs of the soldiers' monument on Boston common his face appears in the sanitary commission group; and the Franklin and a saddle at his best bed in its behalf. He was killed by a railroad accident.

GANNON, Mary, actress, b. in New York city, 8 Oct., 1829; d. there, 22 Feb., 1888. She was placed on the stage by her parents when she was three years of age, in the Richmond Hill theatre, and at the age of six a contract was entered into by the Breyer mediatre. For years she played child's parts, and later appeared in melodramas that involved song, dance, and rapid changes of character. In 1854 Miss Gannon married George W. Stephenson, a lawyer of New York city, who soon died. She was appointed each of the common stocks, and was valued for her spirtuosity of her versatility. She excelled in comedy and burlesque, but was not without ability to render sentimental and pathetic music with effect.

GANO, John, clergyman, b. in Hopewell, N.J., 22 July, 1727; d. near Lexington, Ky., in 1804. He was of Huguenot extraction, his great-grandfather, Francis Genveaux, having escaped from the island of Guernsey during the persecution of the Protestants, and made their home at Rochelle, N.Y. His education was irregular and limited. He was ordained, 29 May, 1754, as pastor of the Scotch Plains, N.J., Baptist church, and shortly afterward travelled and preached extensively in the southern colonies, and was settled as pastor for two years in North Carolina. In 1766 he removed to New Jersey, and also preached for a while in Philadelphia and New York. When, in 1782, the 1st Baptist church in New York was organized, he became its pastor and continued successfully in this relation for twenty-six years. Mr. Gano was an ardent patriot, and in 1779 he renounced his civil rights and became a member of the Second Continental Congress, in 1781 by the legislature of New York. In 1783 he accompanied Gen. Washington on his tour to the northern battlefields. During the controversy caused by the New Hampshire land grants, many of the insurgent regiments belonged to Gen. Gansevoort's brigade, and he was a member of the expedition to Cohoes, St. Coey, and adjacent regions. He was a member of the Continental congress from New York during 1777–8. He was also a member of the New York provincial congress, state senator in 1791–3 and 1797–1802, and member of assembly in 1778–9 and 1780. His country-seat of White Hall, near Albany, N.Y., contained a fine mansion. His medical practice and hospitality, was occupied by his descendants until recently, when it was destroyed by fire.

GANN, Hervey Dodridge, clergyman, b. in Fishkill, N.Y., 7 Feb., 1822. He was graduated at Columbia in 1849 and at the New Brunswick seminary in 1843. He was licensed to preach in 1843, and was ordained pastor of Dutch Reformed churches in Freehold, N.J., and New York city till 1868, when he became pastor of the First Presbyterian church in St. Louis. This charge he resigned in 1868, to become first secretary of the Presbyterian board of aid for colleges and academies, in Chicago, Ill. In 1861 the degree of D.D. was conferred upon him by Rutgers college. His publications are "Bible Slave-holding not Sinful," a reply to "Slave-holding not Sinful" by Dr. Samuel B. How (1856), and various sermons and hymns.

GANSEVOORT, Peter, soldier, b. in Albany, N.Y., 17 July, 1749; d. there, 2 July, 1812. He was a private in the 3d regiment, 19 July, 1775, and in August joined the army that invaded Canada under Montgomery. He was made lieutenant-colonel, 19 March, 1776, colonel of the 3d regiment, 21 Nov., 1776, and appointed to the command of Fort George. In April, 1777, he had charge of Fort Schuyler, previously called Fort Stanwix, and gallantly defended it against the British and Indians under St. Leger, whose co-operation with Burgoyne he prevented. The siege lasted twenty days, and for his vigorous conduct he was rewarded with a commission of major. In the spring of 1779 he was ordered to join Sullivan in his western expedition. He distinguished himself at the head of a body of picked men by surprising the lower Mohawk castle, and captured all the Indian habitants by the dexterity of his movements. He was presented with a sword by the state of New York in 1781 by the legislature of New York. In 1783 he accompanied Gen. Washington on his tour to the northern battlefields. During the controversy caused by the New Hampshire land grants, many of the insurgent regiments belonged to Gen. Gansevoort's brigade, and he was a member of the expedition to Cohoes, St. Coey, and adjacent regions. He was a member of the Continental congress from New York during 1777–8. He was also a member of the New York provincial congress, state senator in 1791–3 and 1797–1802, and member of assembly in 1778–9 and 1788. His country-seat of White Hall, near Albany, N.Y., contained a fine mansion. His medical practice and hospitality, was occupied by his descendants until recently, when it was destroyed by fire.
grant of Gara-konthie, avoided making terms. In August, however, an agreement was made for an exchange of prisoners, and he set out with the French to attack the Algonquins, and, after severe loss, compelled to return. Although always friendly to the French, and feeling the truth of Christianity, he did not show any desire to become a Christian until 1609. Then, at a conference with the French governor in Quebec, he signed his name for Christianity, and that he renounced "polygamy, the vanity of dreams, and every kind of sin." He was baptized with great pomp in the cathedral of Quebec by Bishop Laval, the governor being his god-father, and Mlle. Bouteroue, the daughter of the intendant. In order to induce his conversion, he was brought as a page to the castle of Daniel at the font, and was then entertained with honor in the castle. His conversion produced a great effect, not only at Onondaga, but in the other settlements. Some of the sachems endeavored to diminish his influence, declaring that he was no longer a man, and that the black robes had disturbed his intellect; but when any embassy was to be sent, or an eloquent speaker was desired for any occasion, Gara-konthie quickly recovered all his power. His influence was recognized even by the English governors of New York, who asked General Galway the Mohawks and Mohegans. He was frequently engaged on embassies to New York and Albany, as well as to Quebec and Montreal. He opposed the superstitions and dances of the tribes, and did much to check them. When he found his approach to the missionaries displeasing, he gave his last counsel to his family, and ordering the funeral banquet to be prepared, he invited to it the chiefs of Onondaga, and sang his death-song. Then he exhorted the sachems to become Christians and to banish liquor from the cantons. In order to induce his conversion, he followed his precepts, Gara-konthie had adopted many European customs, and had learned to read and write, although advanced in years.

**GARAY, Francisco de**, Spanish explorer. d. in Mexico in 1528. He was a companion of Columbus on his second voyage, and afterward became governor of Jamaica. In 1519 Alvaro Alonso de Pineda commanded a fleet of four ships which were sent out by Garay to Yucatan. The most important object of the voyage was to search for a strait west of Florida, but the ship was lost in the gulf of Mexico, and the expedition was abandoned. Alvaro De Pineda was appointed governor of the province of Honduras, and the expedition was returned. In 1521 Garay was appointed governor of New Granada, but the expedition was abandoned. In 1526 Garay was appointed governor of the northern province of New Granada, and the expedition was returned. In 1527 Garay was appointed governor of the northern province of New Granada, and the expedition was returned. In 1528 Garay was appointed governor of the northern province of New Granada, and the expedition was returned.

**GARAY, Juan de**, Spanish soldier. b. in the Basque provinces in 1541; d. in South America in 1541. He was born of an illustrious but poor family, and, in the hope of bettering his fortunes, embarked with other adventurers for America.
The governor of Paraguay appointed him secretary, but he soon became dissatisfied with his position; and, having successfully requested employment in the army. Shortly afterward he discovered that the Indians were about to attack the town, and with forty Spaniards put to flight several hundred of the savages. He was then appointed, in company with a portion of the Spaniards, to sail up the Parana. After undergoing numerous dangers and discovering an immense country, he founded, near this river, in July, 1573, the city of Santa Fe de Vera-Cruz, but before finishing it he was obliged to hasten to the aid of his government against the Charrua Indians. He gave battle near the river Uruguay, and defeated them completely. As a reward for these services he was named lieutenant-general by Philip II, and was afterward appointed governor of Asuncion in 1570. Having visited the old site of Buenos Ayres, he founded that city on the ruins of the old, and surrounded it with fortifications. Seeing that he was obliged to meet frequent attacks by the Indians, he thought the best way to spare the effusion of blood was to try to civilize them. Accompanied by missionaries, he travelled over the districts of the land with this object. He formed the Indians into colonies, built villages, gave them laws and established among them chiefs who, by their conduct, made the Spanish name loved among the natives. The latter looked on the Spanish governor as their protector, and were always at hand in his defense. He then sailed up the Parana in order to reach Asuncion, but, meeting with a storm, he was obliged to land in an unknown country about the 30th degree of latitude. Here, during the night, he was surprized and his men massacred him and thirty-nine of his companions.

GARCÍA, ALONSO (gar-the'-ah), Portuguese explorer, b. in Oporto in 1485; d. in Ipare, Uruguay, in 1526. He came to South America with the expedition of Díaz de Solis in 1516, and when that explorer was killed, Garcia escaped, married an Indian woman, and soon gained influence with the neighboring tribes. With their help he explored the country watered by the rivers Plate, Uruguay, and Parana, and in 1524 ascended the Paraguay river nearly to its source. In the next year he penetrated as far as the Andes, and acquired from the Indians some bars of silver, which subsequently fell into the hands of Sebastian Cabot, and caused the latter to name the river Plate. In 1526 Garcia resolved to reach the kingdom of the Incas, of which he had heard, but he was killed by his wife and son, and was attacked by hostile Indians, and assassinated. His son was carried into captivity, but liberated in 1543 by Alvar Nuñez Cabeza de Vaca, and became one of the most useful interpreters of the colonial government.

GARCÍA, DIEGO, Portuguese navigator, b. in Lisbon in 1471; d. in Madrid in 1539 (according to Sala, about 1535). He entered the Spanish service in his youth, and undertook in 1511 an expedition to South America, the accounts of which have been lost. Garcia was at the Bay of Mogul, where Charles V. resolved to send an expedition to explore the southern seas under Sebastian Cabot, and at the same time the mercantile company, formed for the spice-trade at Corúba, fitted out an expedition, of which the command was given to Garcia. He sailed with his two vessels, 15 Jan., 1527, for Cape Finisterre, and, after a long and stormy passage, anchored in San Vicente, 11 Jan., 1527. There he found a Portuguese settler, João Romalho, who had been abandoned on the coast by the first discoverer of Brazil, Pedro Alvarez Cabral, and from him obtained proof that he had reached the Uruguay river, and sailing up the Parana as far as 27° S., he met, in July, 1527, a launch, manned by Europeans, from whom he learned that Sebastian Cabot, whose expedition had left Spain after him, was besieged by Indians farther down the river. García sailed immediately to his aid, and, after defeating the Indians in several battles, continued to explore the upper course of the river, and, leaving his ships at the mouth of the Paraguay, ascended that river in his boats as far as 18° S. He fought continuous battles with the Indians, and, not finding any precious metals, abandoned the expedition, and in October, 1528, sailed for Spain. He is said to have made, about 1533, a voyage to the East Indies, in which he discovered the fertile island and named after him, situated about 400 miles from Mauritius. In the first edition, with a map, was published in the 15th volume of the "Revista do instituto histórico e geográfico do Brasil." See also Adolpho de Varnhagen's "Historia Geral do Brasil," and Ferdinand Denis's "Le Brésil."
Maypu, 5 April, 1818, and in December, 1825, took part in Freire's second expedition against Chiloé, for which he was promoted captain. In 1827 he assisted in the campaign against the Indians of Mariluan, and in 1829 against the bandit Pinheira, and was afterward appointed military commander of Constitucion. He participated in the first and second campaigns of Peru, and for his services his regiment was promoted colonel, and obtained two gold medals. In 1851, although retired from service, he took command of the troops against the revolutionists. In 1854 he was promoted general of brigade, and in 1857, general and the navy, which place he held till 1862. In that year he was promoted to general of division, and then retired to private life, but for one term was a deputy to the national congress.

GARCÍA, Manuel de Populo Vicente, vocalist, b. in Seville, Spain, 22 Jan., 1775; d. in Paris, 2 June, 1832. He began his musical course at the age of six as a chorister in the cathedral of his native city. Before attaining manhood he had become known throughout Spain as a tenor and a composer of church music and comic operas. In 1803 he went to Paris to study Italian and, for many years continued a favorite in most European capitals. García's career is memorable for his experimental introduction of the earliest Italian opera-company in the United States. It was in 1825, when they sang in the New York Park theatre. This served to present before the American public his daughter, Maria Felicia, afterward Madame Malibran. García's troupe continued in this country nearly two years, singing occasionally in concert and oratorio. The company then departed for Mexico, where they remained about a year, and on their way homeward, between the capital and Vera Cruz, were robbed by a party of brigands of all their money and valuables. García soon again found himself in the Italian opera-company in Paris. The quality of his voice was not remarkable, and, as he had become a worn and newer favorites attracted the public, he determined to establish a school for instruction in vocal music. In this he was pre-eminently successful. García wrote, in all, forty-three operas, furnishing the works to most of them. His daughters, Maria and Antonio, became celebrated singers.

GARCÍA-CALDERÓN, Francisco, Peruvian statesman, b. in Arica, 18 April, 1829. In 1842 he entered the college of the Independencia in his native city, where he was graduated in law, and was appointed professor of philosophy and mathematics in 1849. In 1850 he obtained the degree of LL. D., and in 1852 was admitted to the bar of the superior court of Arica, being appointed in 1854 professor of jurisprudence of the university. He was elected deputy to congress and president of the chamber in 1867, and in 1869 was secretary of the treasury. After the invasion of Lima by the Chilianians, 16 Jan., 1881, the conquerors refused to treat for peace with Pierola, and the citizens started a movement for the election of a provisional government. The Chilian governor favored the idea, and on 12th Feb. he was elected. He called together the old congress, which had been elected before the war, but only a few representatives answered his summons. The congress refused to authorize the president to consent to any permanent cession of Peruvian territory, and was dissolved by an order of Admiral Lynch on 22 April. Meanwhile García was beheaded with the hope of an intervention by the United States, and was arrested by order of the Chilian governor, on 8 Nov., on the pretext that he had solicited foreign intervention. A few days afterward they were transported to Chile, and kept prisoners on parole in Santiago till the end of the year, when García returned to Lima. On the instalment of Yglesias's government in 1884, García was elected to the senate and appointed president of that body, which position he still holds (1887). He is a corresponding member of the Spanish academy, and the names of many South American literary and scientific societies, has contributed largely to current literature, and has published a "Diccionario de la Legislación Peruana" (1856--72).

GARCÍA-CUBAS, Antonio, Mexican scientist; b. in Mexico in 1832. He studied in the College of San Ildefonso, and in the Academy of mines, was commissioned by the government to do important geotechnical work and explored the ruins of Mitlatoyuca, in the northern part of the state of Vera Cruz. He was ordered to make a design of these ruins and plan a road to be built from Tulancingo to Mitlatoyuca. He is a member of several scientific societies in America and Europe, and has contributed many papers on archaeology. He has published "Cuaderno Geográfico, Estadístico, Descriptivo e Histórico de los Estados Unidos Mexicanos" (Mexico, 1857; with Spanish, English, and French text, 1855); "Mapa General de México" (1856); "Atlas Pintoresco" (1859); and many other works of topographical drawing; archaeology, history, and geography.

GARCÍA DE QUEVEDO, José Heriberto, South American author, b. in Coro, Venezuela, in March, 1819; d. in Paris in June, 1871. In 1833 his parents removed to Porto Rico, where he received his primary education. He had studied for the ministry, and had been of great assistance to the national congress, but based his studies in France and Spain. In 1861 he removed to Paris, and, on his return from a journey during the siege by the troops of the Versailles government in 1871, he insisted, against the
advice of his friends, on entering the city, was wounded by a shot fired from one of the barrels, and died soon afterward. His poems include "A Colón," "A la Libertad," "A Fío IX," "De la Serenidad," and "A la Gloria del progreso." He also wrote several dramas, which were represented in the theatres of Madrid, and were well received, and is the author of the novels "El amor de una niña," and "Dos duelos a 18 años de distancia." A complete edition of his works was published in Paris in 1863.

**GARCÍA DE SAN VICENTE, Nicolás, Mexican educator, b. in Acuzochitlan, 23 Nov., 1793; d. in Toluca, 23 Dec., 1845. He entered the Seminary of Puebla in 1809, and then studied civil and canonical law in the University of Mexico, where he was graduated in 1818. He was then appointed professor of etymology in Puebla, and in 1821 was ordained priest and obtained the chair of grammar and geography. In 1823 he was elected deputy for the district of Tulancingo to the congress of Puebla. During 1828 and 1829 he was president of theotechnology, which he had founded. In 1839 and 1840 he was professor of Latin and Spanish grammar at the College of Tulancingo, where he continued till his death. He wrote a great number of text-books for civil code, and the chair in the faculty of law, and "Extracto de Ortofagía." (Mexico, 1830); "Geografía de los Niños" and "Cosmografía" (1839); "Geografía Físca y Política" (1840); "Ortofagía según Sicilia" (1843); "Reglas de Etimología y Sintaxis Castellana" (1846). He left unpublished "Dilecciones de Gramática," and also translated from the French the Bible of Venez, and from the Italian the "History of California," by Clavijero.

**GARCÍA-GRANADOS, Miguel (gar-the-aghra-nah-dos), president of Guatemala, b. about 1805; d. in 1847. In May, 1871, he headed a revolution against the reactionary government of Gen. Vicente Cerna, and on 30 June was proclaimed president, with Barrios as vice-president. García perished no person for his political opinions and confiscated no property, and the country soon received the title of "The Mother of Liberty." In November the army of the United States invaded the central part of the country and in the same year decreed full liberty of the press, the extinction of religious orders, and the expulsion of the Jesuits. In February, 1873, there was an attempt at rebellion, which was promptly put down. On 8 May of that year, García convened the National Assembly for the election of a constitutional president, which election resulted in favor of Gen. Jose Barrios.

**GARCÍA-MORENO, Gabriél, South American statesman, b. in Guayaquil, Ecuador, in 1821; d. in Quito, 6 Aug., 1875. He was graduated in medicine in the University of Quito, and went to Europe to finish his studies in natural science. On his return he became professor of chemistry and physics in the University of Quito, and in 1857 was elected its rector. In 1859, when the government of President Robles was overthrown, he became a member of the provisional government, and in 1861 was elected president for four years. Although his character was violent and he committed numerous cruelties, his administration was beneficial to the republic. The signing of a convention in 1864 for the suppression of revolutions, was avowedly a declaration of war to the republic, and he was invested by congress with unlimited power. He proclaimed himself dictator on 30 Aug. In 1865 he defeated an armed invasion of Gen. Urbina, near Tambellí, and in the elections of the same year favored the president, who was installed in August, but García-Moreno retained the actual direction of public affairs. In 1867 he was appointed minister to Chili; but, after the fall of the government of Carrillo in 1869, headed a revolution, and again assumed dictatorial powers. In 1874 he issued a decree of economic confiscation, of the revenue which belonged to the state. In 1875 he was again elected president for another term of six years, but on the eve of his reinstallation he was attacked in the gallery of the treasury building by deserting persons and fatally wounded.

**GARCÍAS, Gregorio, clergyman, b. in Cozar, Spain, in 1504; d. in Baeza, Spain, in 1567. He belonged to the Dominican order, was sent as missionary to America, and lived nine years in Peru, where he was noted for his success in spreading the gospel among the Indians. On his return to Europe at the beginning of the 17th century he was named professor of moral theology in the Dominican convent of Baeza. He published "Origen de los Judíos del Nuevo Mundo, examinado con un discurso sobre las Opiniones Relativas" (Valencia, 1607; Madrid, 1729), of which translations have appeared in English, French, and German; "Predicación del Evangelio, y Noticias de los Apóstoles" (Baeza, 1835); "Ensayo Cronológico para la Historia general de Florida" (Baeza, 1617); and "Historia de la Monarquía de los Incas del Perú" (2 vols., Madrid, 1729).

**Garcilaso de la Vega, Sebastián (gar-the-sah-loh de la be-vah-gah), b. in Badajoz, Spain, about 1495; d. in Cuzco, Peru, in 1553. He was of the same family as the Spanish poet of the same name. Sebastian went to Mexico with Pedro de Alvarado, and when the latter returned to Guatemala, after the invasion of Quito, Garcilaso remained in Peru, and became a follower of Francisco Pizarro. After Pizarro's assassination he joined the royal governor, and was wounded at the battle of Chupas, 16 Sept., 1542. He then joined Gonzalo Pizarro, and was forced by him, on pain of death, to assist in his insurrection against the viceroy, Pedro de la Gasca. In the decisive battle of Xaquizagua, 9 April, 1548, Garcilaso went over to Gasca's side at the turning-point of the contest, and was afterward appointed governor of Cuzco, which office he held until his death. He was noted for his humanism towards the Indians, and founded a hospital and other benevolent institutions for them. He married an Indian princess, the niece of Huaina Capac, who was the son of the Tupac, Yupaquiy. —Their son, named The Inca, Peruvian historian, b. in Cuzco, 12 April, 1557. The time of his death is uncertain, but it is supposed that he died in Cordova, Spain, a few years..."
after 1617. He was educated by a learned priest, who was his father’s chaplain. He became interested in the history of his country, at an early age, by collecting all the traditions he could gather from the Indians, making journeys through every part of Peru, and transcribing the oldest songs and hymns of the country. His mother assisted him in his researches, and furnished whatever details she was able to supply. His concern for his native land was furthered by his father, a clergyman, who, in his turn, was interested in the history of the country, and who transcribed the Dialogues of Love by Leon Abravanel, and at the same time employed himself in writing the History of Florida, which he published in Lisbon. In 1600 he began the first part of the Comentarios Reales (Lisbon, 1699), and in 1612 concluded the second part (Coronda, 1617), which forms a general history of Peru. His works have been translated into German, French, and English. As a Peruvian historian, he had unusual facilities for acquiring accurate information. Many of the conquistadors took part in the expedition in 1530, and in the history of the missions, and in the contaion of the Incas, and in the conquest of the country.

In 1545 he published the first part of the Comentarios Reales, and in 1550 the second part (Coronda, 1550). He published the first part of the Comentarios Reales, and in 1550 the second part (Coronda, 1550). He published the first part of the Comentarios Reales, and in 1550 the second part (Coronda, 1550).

The “History of Florida” was translated into French by Richelet (Paris, 1670), and by Le Goffic and Le Louvet (Paris, 1679). The “History of the Americas” was translated into English by Sir Paul Hickman, and published in London in 1690. It was translated into French by Baudoin (Paris, 1633, 1650, 1658). An Amsterdam edition of this translation (1703) is very much sought after on account of its engravings by Bern.

GARDEN, Alexander, clergyman, b. in Scotland, d. in Charleston, S. C., 27 Sept., 1756. He was educated in his native country, and became a clergyman of the church of England. He came to America in 1719, and shortly afterward was elected rector of St. Philip’s parish in Charleston, S. C., and subsequently was commissary and chaplain of the Spanish garrison. Mr. Garden was one of the so-called “annual meetings of the clergy” which was then necessitated by the rapid increase of the Episcopal church in the province. He was first convened on 20 Oct., 1731, when they exhibited to the committee their letters of orders and license to perform the ministerial functions in the province. Mr. Garden resigned his office in 1748, but the clerical convocations continued. In 1738 he was compelled to take a respite from his labors, and visited the northern provinces, about 1741. In 1749 he was appointed for the support of an assistant to Mr. Garden, and the Rev. William Orr was elected. In 1740 he began a controversy with Rev. George Whitefield, which attracted much attention. Mr. Garden was interested in the instruction of the residents of the city. In 1745 he was named to aid from the Society for propagating the gospel, in behalf of the negro school in Charleston, which then consisted of thirty children. A large contribution of Bibles, prayer-books, and text-books was at once made, and in 1750 Mr. Garden gave to the society a favorable report of the progress of the school. In 1754 he resigned the rectorship of St. Philip’s, and was presented by his vestry with a valuable set of plate. Shortly after this Mr. Garden embarked for England, where he intended to reside, but returned to America in 1761. In 1768 he returned to New York, where a professorship in the newly organized King’s college (now Columbia) was offered him. On his return he settled in Charleston. Dr. Garden adhered to the royal cause in the Revolution. He was a congratulator of Cornwallis on his success at Camden, and went to England in 1783. His property was confiscated, but was afterward given to his son by the state of South Carolina. He had been a fellow of the Royal Society of London, and on his arrival there in 1785 was appointed a member of the Royal Society, and consequently was one of its vice-presidents. He was eminent as a botanist and zoologist, and in 1755 began a correspondence with Linnaeus, to whom he furnished information on the natural history of South Carolina, and who named the genus “Gardenia” in honor of him. He introduced into medical use the pink-root as a vermifuge, and published an account of its properties, together with a botanical description (1764). He also published accounts of the Helesia; of the male and female cochineal insects; of the mud iguana, or sirem of South Carolina, an amphibious animal; of two new species of tortoises; and of the Gymnotus electricus. To extend his knowledge of natural history, he accompanied Gov. Glen into the Indian country, and discovered an earth which was deemed in England equal to the finest porcelain. The knowledge of this lozenge has been lost.

Alexander, soldier, b. in Charleston, S. C., 4 Dec., 1737; d. there, 29 Feb., 1829, was educated at Westminster and the University of Glasgow, and travelled on the continent of Europe. He returned to South Carolina in July, 1780, and joined the Revolution. He was appointed to Gen. Greene, and a lieutenant in Lee’s Legion in February, 1782. He was called the “colours of the clergy” which was then necessitated by the rapid increase of the Episcopal church in the province. The clergy were first convened on 20 Oct., 1731, when they exhibited to the committee their letters of orders and license to perform the ministerial functions in the province. Mr. Garden resigned his office in 1748, but the clerical convocations continued. In 1738 he was compelled to take a respite from his labors, and visited the northern provinces, about 1741. In 1749 he was appointed for the support of an assistant to Mr. Garden, and the Rev. William Orr was elected. In 1740 he began a controversy with Rev. George Whitefield, which attracted much attention. Mr. Garden was interested in the instruction of the residents of the city. In 1745 he was named to aid from the Society for propagating the gospel, in behalf of the negro school in Charleston, which then consisted of thirty children. A large contribution of Bibles, prayer-books, and text-books was at once made, and in 1750 Mr. Garden gave to the society a favorable report of the progress of the school. In 1754 he resigned the rectorship of St. Philip’s, and was presented by his vestry with a valuable set of plate. Shortly after this Mr. Garden embarked for England, where he intended to reside, but returned to America in 1761. In 1768 he returned to New York, where a professorship in the newly organized King’s college (now Columbia) was offered him. On his return he settled in Charleston. Dr. Garden adhered to the royal cause in the Revolution. He was a congratulator of Cornwallis on his success at Camden, and went to England in 1783. His property was confiscated, but was afterward given to his son by the state of South Carolina. He had been a fellow of the Royal Society of London, and on his arrival there in 1785 was appointed a member of the Royal Society, and consequently was one of its vice-presidents. He was eminent as a botanist and zoologist, and in 1755 began a correspondence with Linnaeus, to whom he furnished information on the natural history of South Carolina, and who named the genus “Gardenia” in honor of him. He introduced into medical use the pink-root as a vermifuge, and published an account of its properties, together with a botanical description (1764). He also published accounts of the Helesia; of the male and female cochineal insects; of the mud iguana, or sirem of South Carolina, an amphibious animal; of two new species of tortoises; and of the Gymnotus electricus. To extend his knowledge of natural history, he accompanied Gov. Glen into the Indian country, and discovered an earth which was deemed in England equal to the finest porcelain. The knowledge of this lozenge has been lost.
was given him after the war. He published "Anecdotes of the Revolutionary War, with Sketches of Character of Persons most Distinguished in the Southern States for Civil and Military Services," containing much original information (Charles-ton, 1822; new eds., 1828 and 1885).

GARDINER, Addison, jurist, b. in Rindge, N. H., 19 March, 1797; d. in Rochester, N. Y., 5 June, 1883. He was taken to Manlius, N. Y., in his early years, and received his education there. After studying law, he removed in 1812, to Rochester, and was the first justice of the peace. He was appointed district attorney for Monroe county in 1825, and was afterward judge for the eighth circuit, comprising eight counties in western New York, but resigned in 1826, and resumed his practice in Rochester. In 1844 and 1846 he was lieutenant-governor of New York, but resigned his office in the latter year, having been elected a judge of the court of appeals. He served until 1859, declining a renomination. An appeal from his decision was reversed by the court of appeals, but remained undisturbed.

GARDINER, James Terry, civil engineer, b. in Troy, N. Y., 6 May, 1842. He was educated at the Rensselaer polytechnic institute and the Sheffield scientific school, after which he became sub-assistant engineer on the Brooklyn water-works. In 1861 and 1862 he was in the U. S. ordnance corps, and was engaged in 1863-4 in the construction of earthworks around the harbor of San Francisco. During the three following years he was topographical surveyor on the geological survey of California, and at this time he made a topographical survey of the镏mite valley as far out as the limits of the reservation. Subsequently he was associated with Clarence King in the U. S. geological survey of the 40th parallel, and was chief of the geographical and topographical department until the completion of the work. In 1872 he was appointed U. S. topographer in charge of survey work on the U. S. geological survey of the territories, under Ferdinand V. Hayden, and conducted the field-work of the surveys until 1875. From 1876 till 1886 he was director of the state survey of New York. He was a member of the New York state board of health. He then became consulting engineer to the state board of health, and he also holds the office of consulting engineer in all mining matters, especially concerning coal, to the Atchison, Topeka, and Santa Fé, the Mexican Central, the Atlantic and Pacific, and the Mexican National railroads. Mr. Gardiner is a member of scientific societies, and was secretary in 1876 of the American geographical society. His publications are principally reports of his work, which have appeared in public documents.

GARDINER, Lion, military engineer, b. in England in 1599; d. in Easthampton, N. Y., in 1663. He was an officer of the English army, and served in the Netherlands. While thus employed he was persuaded by Hugh Peters, and other Englishmen then residing in that country, to enter the service of a company of Dutch in 1602. The proprietors of a tract of land lying at the mouth of the Connecticut river. He was to serve four years, and to be employed in drawing plans for a city, towns, and forts in that locality, and to have 300 able-bodied men with his company. On his arrival in Boston on 28 Nov., 1635, the authorities requested him to draft designs for a fort. This he did, and a committee was appointed to supervise the erection of the work, each citizen being compelled to contribute two days' labor. Gardiner then sailed for his destination and proceeded to build a fort, which he named Saybrook, after Lord Say and Seal and Lord Brook. Here he remained for four years during the exciting period of the Pequot war. In 1639 he purchased from its Indian owner a island called by them Manochant, which he renamed the Isle of Wight, but which has since been known as Gardiner's Island. This was the first English settlement within the present boundaries of New York state. While at Saybrook a son was born to him, 29 April, 1636, which was the first white child born in Connecticut. His daughter, Elizabeth, who was born 21 Feb., 1634, was the first white child born in New York. The original grant by which Gardiner acquired proprietary rights in the island made it an entirely separate and independent "plantation," in no way connected either with New England or New York. He was empowered to draft laws for church and state, observing the forms, so ran the instrument, "agreeable to God, to the king and to the practices of the country." Several other patents were subsequently issued, the last by Gov. Dongan, erecting the island into a lordship and manor to be called "Gardiner's Island," giving Gardiner full powers to hold "court leet and court baron, distress for rents, exercise the rights of advowson," etc. The island is now a part of the township of Easthampton, Suffolk co., N. Y., and is nine miles long and a mile and a half wide, containing about 900 acres. Lion Gardiner was a man of sterling qualities, and acquired the esteem of all with whom he came in contact. In the autumn of 1886 a recursorial effigy was erected to his memory, and his grave was opened. In it his skeleton was found to be intact. It was that of a man over six feet in height, with a broad forehead and strong jaw. The island was entailed on the first male heirs of the Gardiner family, and was never to be alienated. These conditions were observed up to the close of the last century, David Johnson, the eighth lord of the manor, who died in 1829, being the last to receive the property by entail. His brother, John Grewold, succeeded as ninth lord, but died, unmarried and intestate, in 1861. The third brother, Samuel Bulk, having purchased the interest of his sister, Mrs. Sarah Diodati Thompson, became the tenth proprietor. At his death, in 1882, the island was left to his eldest son, David Johnson, as eleventh lord of the manor; but it is now (1887) owned by the latter's brother, John Lyon. This is the only illustration of the practical working of the law of primogeniture in this country, covering so long a period. The manor-house, built in 1774, is shown in the accompanying illustration. During the life-tenure, the third owner, the island was visited by Capt. Kidd, who deposited goods and treasure there, which were secured by Gov. Bellmont after Kidd's death. (See Kidd, William.) During the early part of the last century the island was frequently visited and pillaged by privateers, smugglers, and free-booters, and suffered greatly from their depredations. The British fleet
made Gardiner's bay a rendezvous during the Revo-
lution, and took supplies from the island. The same
thing occurred during the war of 1812-15 between
the United States and England. In 1809 it was
selected as the rallying-point of an expedition in-
tended to liberate Cuba from the Spanish yoke.

**GARDINER, Sylvester,** physician, b. in South
Kingston, R. I., 29 June, 1707; d. in Newport, 8
Aug., 1780. After studying medicine in London
and Paris, he was a lecturer on anatomy, and a
drug merchant. In the sale of drugs he acquired a
large fortune, and became proprietor of a part of
"Plymouth Purchase" on the Kennebeck river. His efforts
to settle this domain were unceasing from 1755 to the
Revolution. About the middle of the century he
colonized it with Germans, and settled the town of
Pittston, from which the present city of Gardiner,
Me., was afterward set off, annually furnishing the
colonists with supplies. He also contributed
liberally to the erection of King's chapel, Boston,
of which he was a warden, and profited at the intro-
duction of inoculation for the small-pox. He was
the compiler and publisher of a prayer-book, built
and endowed Christ church, the first Episcopal
chapel in Pittston, Me., and presented that town
with a valuable library, which afterward became
scattered. He was one of those who signed the
address to Gov. Hutchinson in 1774, approving
that officer's course, and in the year following he
became an active supporter of the royal cause.
When the British army evacuated Boston in 1776,
he left his city and went to Halifax. In 1777 his
name appeared in the proscription and banishment
act. He removed to England during the war,
taking with him but a small proportion of his
property, and settled in Poole. About 100,000
acres of his great estate were confiscated and sold,
but his heirs recovered it many years afterward.
After the war, in 1785, Dr. Gardiner returned to
this country and settled in Newport, R. I. His
remains were interred under Trinity church in that
city, and in the Episcopal church in Gardiner, Me.,
there is a cenotaph to his memory. His eldest son,
John, however, he contributed to. Doctor Arms
Ann., Mass., 15 Oct., 1793, studied law at the inner
temple, London, and was admitted to practice in the
courts of Westminster Hall. He became intimate
with Churchill, the satirist, with Lord Mans-
field, and with John Wilkes, with whose cause he
appeared in 1764. He also appeared for Bredmore and Meredith, who, for writings in
support of Wilkes, had been imprisoned on a
general warrant. He practiced a short time with
success in the Welsh circuit, and then procured in
1796 the appointment of attorney-general in the
island of St. Christopher, West Indies, where he
remained until after the American Revolution,
when he returned, in 1783, to Boston. A few years
later he removed to Pownalboro', Me., and repre-
tented that town in the Massachusetts legislature
until his death. While a member of that body he
procured the abolition of the law of primogeniture,
promoted several legal reforms, and was earnest
but unsuccessful in his arguments for the repeal
of the statutes of 1750 against theatrical enter-
prises. The law that he sought to abolish re-
mained on the statute book until 1790. Mr.
Gardiner was one of the most influential of the
early Unitarians of Boston, and prominently
participated in the transformation of King's chapel,
of which his father was one of the founders, from
an Episcopal into a Unitarian Congregational
corporation. He met his death by drowning while on
his way to the general court of Massachusetts. In
connection with his efforts to repeal the anti-
thetrical laws while he was a member of the Mass-
achusetts legislature, he published a "Dissertation
on the Ancient and Modern Romans," with inci-
dental observations on certain superstitions. He
also wrote a political tract in verse entitled "Jaco-
binism," a satire on the republican clubs of Boston,
a revision of which by the author was published
in Boston in 1785. — His son, John Sylvester
Gardiner, clergyman, was educated at Bowdoin
College, West, South Wales, in June, 1765; d. in Harrow-
gate, England, 29 July, 1830. At an early age,
about 1770, he was sent to his grandfather, Dr.
Sylvester Gardiner, in Boston, for education.
Shortly after the opening of the Revolution, and
after visiting his father in the West, he was
removed to England, and placed in 1778 under the
care of Dr. Samuel Parr, by whom he was in-
structed until 1782. He returned to the United
States in 1783 by way of the West Indies, and was
accompanied by his father to Boston, where he
began the study of law. Subsequently, in 1787, he
was ordained deacon in the Protestant Episcopal
church by Bishop Provoost, in St. Paul's church,
New York. He then became pastor of the parish
of St. Helena, near Beaufort, S. C. He took
priest's orders in the church of Trinity church, Boston, in 1793, and on the death of Bishop Parker, in 1805, succeeded him as
rector, continuing to hold that post until his
death. While assistant rector, he taught a large
classical school, and afterward instructed a few
pupils in his own house. He died on a foreign
tour for his health. He received the degree of
A. M. from Harvard in 1803, and that of D. D.
from the University of Pennsylvania in 1818. In
1805-11 he was president of the Anatomy club,
which was organized at his house, and for several
years conducted the "Anthology and Boston
Monthly Review," which was one of the ablest lite-
rical periodicals in the United States, and assisted
greatly in elevating the standard of letters in this
country. It was the remote precursor of the
"North American Review," to which Dr. Gardiner
was a contributor. Dr. Gardiner died on the honor of founding the Boston Athenaeum.
Dr. Gardiner was a classical scholar of eminence and
an eloquent preacher, and exerted a wide influence.
He published numerous sermons, delivered before
carious societies. He was the author of the
"Boston Monthly Review," Mr. Robert Hallowell, b. in Brissenden, Eng-
land, about 1782; d. in Gardiner, Me., 22 March,
1864, came to this country in 1792. He was the
son of Dr. Sylvester Gardiner's daughter Hannah,
and Robert Hallowell, but took the surname of
Gardiner in 1802, in obedience to the will of his
uncle, on inheriting the latter's estate. He was
fitted for college in the Boston Latin-school, and
graduated at Harvard in 1801, after which he
travelled abroad for sixteen months, and in 1803
returned and settled on his estate, giving much of
his time to its cultivation and, at the solicitation of
the interests of the town of Gardiner, to which he
gave a church, a lyceum, and a public library. He was
an active member of the Maine historical society,
and was its president from 1846 till 1855.

**GARDNER, Caleb, sea-captain, b. in Newport,
R. L. in 1750; d. 1790.** Living near the harbor and owning a boat, he was in boy-
hood familiar with the waters and islands of Nar-
rangassett bay, and as a young man became a sea-
captain, sailing his own ship to China, to the East
Indies, and made other long voyages. Before the
beginning of the Revolution he had retired from
the sea and engaged in mercantile pursuits in his

nate town. The war found him a strong Whig. He raised a company, was assigned with it to Richmond's regiment, of which he presently became lieutenant-colonel, and was later a member of the council of war and of the Rhode Island state government. He was residing in Newport in 1775 when the French Consul d'Estaing was blockaded there by the greatly superior British fleet under Admiral Howe. A sudden and dense fog prevented an immediate attack by the English; but they occupied both entrances to the harbor and waited for daylight. Capt. Gardner had retired from his houseport through a spy-glass, the disposition of the hostile fleets, and, as soon as it was dark, rowed himself to the ship of the French admiral, offered to pilot him to a safe position, and with his own hand steered the admiral's ship through a channel which he had known from boyhood, the other vessels, with all lights extinguished, following singly in his wake. Having piloted the French beyond the enemy and to clear water, he returned to the island, reached his own house before daylight, and was among the group noticed elsewhere. He removed to Trenton, through his ambassador in the United States, the Chevalier de la Luzerne, sent to the amateur pilot a sum of money, with which the latter bought an estate near Newport, and built upon it a house, portions of which still remain in the cottage known as the Vigenor of Liberty. Throughout the war Capt. Gardner was a trusted adviser of the French officers in Rhode Island, and of Gen. Washington, who was his friend and correspondent. After peace was declared he was made French consul at Newport, where he resided until his death, being president of a bank, warden of Trinity church, and head of the volunteer fire department of the town.—His great-grandson, Dorsey, b. in Philadelphia, 1 Aug., 1842, is a grandson of Dr. John Syng Dorsey, an emigrant from the ship of that name from Trenton, N. J., in 1854, and entered Yale in 1860, but was not graduated. In 1864–5 he published the "Daily Monitor," a journal established at Trenton in support of the Lincoln administration in the conduct of the war, and with the special purpose of creating public sentiment through New Jersey against the extension of the exclusive privilege of transportation between New York and Philadelphia, which was then possessed by the Camden and Amboy railroad company. In 1866–9 he was one of the editors and proprietors of the "Round Table," a weekly literary and critical journal published in New York. After spending several months in Europe, he held editorial positions on the "Commercial Advertiser" and the "Christian Union," of New York, until he removed to Florida in 1869. Returning thence to Philadelphia in 1872, he became one of the secretaries of the United States commission, and was charged with the publication of all the official documents relating to the International exhibition of 1876, including its catalogue and eleven volumes of final reports. Subsequently he assisted, in the state department at Washington, in the publication of "The Reports on the Paris international exhibition of 1881" by the U. S. commissioner-general, Richard C. McCormick. He has published "Quatre Bras, Ligny, and Waterloo: a Narrative of the Campaign in Belgium, 1815" (Boston and London, 1882), and "A Condensed Etymological Dictionary of the English Language," a rearrangement, on an etymological basis, of the "American Dictionary of the English Language" of Dr. Noah Webster (Springfield, Mass., and New York, 1844; London, 1860).

GARDNER, Harriet, b. in Morris county, N. J., in 1787; d. in Washington, D. C., 1 Nov., 1889. She entered the army as ensign in the 6th U. S. infantry in May, 1806. In the war of 1812 he was promoted captain of the 8th infantry, and went with General Logan's division of the north, under Gen. Jacob Brown. He participated in the battles of Chrystler's Field, Chippewa, and Niagara, was at the siege of Erie, and in February, 1813, was promoted lieutenant-colonel for distinguished service. At the battle of Niagara, in which Gen. Winfield Scott was severely wounded, Col. Gardner carried him off the field. In 1816 he was appointed adjutant-general of the northern division of the army, which post he resigned in 1827. During both terms of Gen. Jackson's administration he was first assistant postmaster-general, and in the latter he was called, when the post-office department was under President Van Buren from 1836 till 1841. During the administration of President Polk he was postmaster of the city of Washington. In 1850 he was transferred to the treasury department, where he remained till advanced age compelled him to retire. He was the author of "A Dictionary of Commissioned Officers who have served in the Army of the United States from 1789 to 1853" (New York, 1853); "A Compendium of Military Tactics"; and "A Permanent Designation of Companies, and Company Books for the First Lieutenant."
service in connection with the "Missionary Magazine" and the "Watchman" newspaper, besides writing on art, and art articles. He received the degree of D.D. from Dartmouth in 1867.

GARDNER, Henry, statesman, b. in Stowe, Middlesex co., Mass., about 1730; d. in Boston in 1782. He was graduated at Harvard in 1750, and was a strong Federalist throughout the Revolution, entering politics in 1773 and continuing in public life until his death. Mr. Gardner was a member of the Middlesex convention of February, 1774, which met to consult for the common defence and welfare of the colony. This and several other assemblies, held during the same month in the New England states, led to interposing of the New England states, led to the formation of the Continental congress, which accordingly convened in Salem in October, 1774, and the next day adjourned to Concord, N. H. He served in this and in the congresses of February and May, 1775, which met in Water- town, Mass., and was chosen a member of the province by the 1st congress. In the former he was a member of the Academy of Arts and Sciences in Boston, and devoted much of his time to literary and scientific pursuits in that city.

GARDNER, John Lane, soldier, b. in Boston, Mass., Aug. 29, 1809; d. in New York, Feb. 18, 1869. He entered the army in 1812 as lieutenant of infantry, saw his first active service in Canada, and was wounded at the battle of La Colle Mill, March 30, 1814, while serving under Gen. James Wilkinson. After the war he was transferred to the artillery. In 1823-30 he was assistant quartermaster-general, with the rank of captain, and in 1833 was brevetted major of artillery for ten years' faithful service. He served with his regiment during the Florida war, and was reported to the department as having shown the utmost bravery in the field. In 1839-40 he was assistant quartermaster-general, with the rank of captain, and in 1844 commanded his regiment throughout the Mexican war, was brevetted lieutenant-colonel for service at the battle of Cermo Gorm, March 29, 1847, and colonel at Contreras on 20 Aug., where he bore the brunt of the enemy's attack. From 1842 till 1850 he was in command of the district of Florida, became lieutenant-colonel in 1852, and some years later was stationed at Charleston, S.C., where he was in command of a substantial force. In 1857, fifty men at Fort Moultrie, he effected an arrangement with Col. Joseph P. Taylor, commissary-general, for six months' provisions, and announced his intention to defend the fort to the last extremity against the secessionists. Secretary of War John B. Floyd then relieved him from command, and ordered him to report to Gen. David E. Twiggs, in Texas. Maj. Robert Anderson succeeded to the command at Fort Moultrie, and on Christmas eve removed the garrison to Fort Sumter. In 1861 he was promoted colonel of the 2d artillery, and the next year was, by his own request, placed on the retired list, and employed in recruiting service. In 1865 he was brevetted brigadier-general "for long and faithful service."

GARDNER, Joseph, member of the Continental congress, b. in Chester co., Pa., in 1752; d. in Elkin, Md., in 1794. He studied medicine, and was one of the first to attend the lectures given at the medical department of the University of Pennsylvania, after which he settled in the practice of his profession in his native place. At the beginning of the Revolutionary war he raised a company of volunteers, and afterward was given command of the 4th battalion of Chester county militia. He also served on the general committee of safety from July, 1776, till December, 1777, and was appointed in July, 1776, one of the board of cheaters of county by the Pennsylvania constitutional convention, also becoming in November, 1777, one of the commissioners to collect clothing for the army. Dr. Gardner was a member of the Pennsylvania assembly in 1776-8, and in 1779 was chosen a member of the executive council. In 1784 he was elected to the Continental congress, and served for one year. Subsequently, until 1792, he resided in Philadelphia, and there followed his profession. He then removed to Elkin, Md., where he spent the remainder of his life.

GARDNER, Simeon Japhet, editor, b. in Brookline, Mass., in 1788; d. in the White Mountains, N. H., 14 July, 1864. He was graduated at Harvard in 1809, and afterward practised law for many years in Roxbury, Mass., where he held several county and state offices. In 1838 he removed to New N.D., and in the succeeding year he published the "Advertiser," a daily paper, which failing health compelled him to resign in 1861. Many of his essays, under the signature of "Decius," were collected and published under the title of "Autumn Leaves" (New York, 1830). He was editor of "The American Farm and Democrat," and "The Friend." He was the son of Simeon KINGSLEY, physician, born in Roxbury, Mass., 13 July, 1812; d. in New York city, 7 April 1876, was graduated in medicine at Harvard in 1844. He then visited Europe, and studied three years. Returning to the United States, he established himself in New York, and was elected professor of diseases of women and children, and of midwifery, in the New York medical college. Dr. Gardner gave special attention to the importation of foreign birds, as destroyers of insect larvae; to the establishment of drinking-fountains in New York city; to the reformation of the laws of the state; and was much interested in the study of medical ethics; and the investigation of the swill-milk business. He was the first physician in the United States that gave chloroform in labor, and practised it successfully while professor of midwifery in the New York medical college. In consequence of a consultation with Dr. William T. Cullen she was sent to Russia, and under a race with the Academy of physicians, and resigned. He is the author of "Hours of a Medical Student in Paris" (New York, 1848): "Causes and Treatment of Sterility" (1850); "Our Children" (New York, 1850); and "Scanzoni's Diseases of Females." He edited Tyler Smith's "Lectures," and contributed many professional and scientific papers to current literature.

GARDNER, Thomas, soldier, b. in Cambridge, Mass., in 1724; d. in Boston, 18 June, 1775. He ranked among the most zealous sons of liberty, and was a member of the convention of Middlesex county, in 1774, held to consult on measures for public safety and defence, and of the Provincial congress of Massachusetts, in October, 1774, and February, 1775. By this congress he was appointed one of the committee of safety chosen to act instead of the council and governor, who were believed to be mere tools of the British. In May, 1775, he raised a regiment according to the instructions of the Provincial congress, and was commissioned its colonel. At the battle of Bunker Hill, 17 June, 1775, while hastening to join his regiment to the redoubt, and in the act of descending the hill, he received a mortal wound, of which he died the next day.

GARDNER, William Henry, naval officer, b. in Maryland in 1820; d. in Philadelphia, 18 Dec., 1870. He entered the navy in 1814 as midshipman, was commissioned lieutenant in 1825, served on the "Vandalia," of the British squadron,
1829–30, was commissioned commander in 1841, commanded the receiving-ship “Norfolk” in 1843, and of the “Vandalia,” in the Pacific squadron, between 1850 and 1853. In September, 1855, he was commissioned captain, commanded the steam frigate “Colorado,” of the home squadron, in 1859–60, was commandant at Mare Island, Cal., in 1861, and on special service in 1862. In July of that year he was commissioned commodore, and retired. He was light-house inspector from 1863 till 1869.

**Gareschi, Julius Peter,** soldier, b. in Cuba in 1821; d. near Stone River, Tenn., 31 Dec., 1862. He graduated at the U. S. military academy in 1841, and entered the army as 2d lieutenant of the 4th artillery. From 1841 till 1846 he served on frontier and garrison duty, and afterward with distinction in the Mexican war. He was appointed assistant adjutant-general in 1855. At the beginning of the civil war he applied for active service, and was appointed chief of staff to Gen. William S. Rosecrans, of the Army of the Cumberland. He had previously declined the commission of brigadier-general of volunteers, and remained a lieutenant-colonel in the regular army. At the battle of Stone River, in Tennessee, 31 Dec., 1862, in a gallant attempt to regain the day which then appeared to be lost, Col. Gareschi dashed forward at the head of his column, but was struck in the head by a cannon-ball and instantly killed. He was a founder and liberal beneficiary of the Society of St. Vincent de Paul, at Washington.

**Garfield, James Abram,** twentieth president of the United States, b. in Orange, Cuyahoga co., Ohio, 19 Nov., 1831; d. in Elberon, N. J., 19 Sept., 1881. His father, Abram Garfield, was a native of New York, but of Massachusetts ancestry, descended from Edward Garfield, an English Puritan, who in 1630 was one of the founders of Watertown. His mother, Eliza Ballou, was born in New Hampshire, of a Huguenot family that fled from France to New England after the revolution of the Edict of Nantes, in 1685. Garfield, therefore, was from lineage well represented in the struggles for civil and religious liberty, both in the Old and in the New World. Abram Garfield, his father, moved to Ohio in 1830, and settled in what was then known as “The Wilderness,” now as the “Western Reserve,” which was occupied by Connecticut people. Abram Garfield made a prosperous beginning in his new home, but died, after a sudden illness, at the age of thirty-three, leaving a widow with four small children, of whom James was the youngest. In bringing up her family, unaided in a lonely cabin (see accompanying illustration), and impressing on them a high standard of moral and intellectual worth, Mrs. Garfield displayed an almost heroic courage. It was a life of struggle and privation; but the poverty of her home differed from that of cities or settled communities—it was

the poverty of the frontier, all shared it, and all were bound closely together in a common struggle, where there was no marked distinction in neighboring wealth. At three years of age James A. Garfield went to school in a log hut, learned to read, and began that habit of omnivorous reading which ended only with his life. At ten years of age he was accustomed to manual labor, helping out his mother's meager income by working in the home or on the farms of the neighbors. Labor was play to the healthy boy; he did it cheerfully, almost with enthusiasm, for his mother was a staunch Campbellite, whose hymns and songs sent her children to their tasks with a feeling that the work was consecrated; but work in winter always yielded its claims to those of the district school, where he made good progress, and was conspicuous for his assiduity. By the time he was fourteen, young Garfield had a fair knowledge of arithmetic and grammar, and was particularly apt in the facts of American history, which he had eagerly gathered from the meagre treatises that circulated in that remote section. Indeed, he read and re-read every book the scanty libraries of that part of the wilderness supplied, and many he learned by heart. Mr. Blaine, the illustrious statesman, compared his style to his familiarity with the Bible and its literature, of which he was a constant student. His imagination was especially kindled by the tales of the sea; a love for adventure took strong possession of him. He so far yielded to it that in 1848 he went to Cleveland and proposed to sign on as a sailor on board a lake schooner. But a glance showed him that the life was not the romance he had conceived. He turned promptly from the shore, but, loath to return home without adventure and without money, drove some months for a boat on the Ohio, in which he was a able seaman with experience, except that he secured promotion from the tow-path to the boat, and a story that he was strong enough and brave enough to hold his own against his companions, who were naturally a rough set. During the winter of 1849–50 he attended the Geauga seminary, about ten miles from his home. In the vacations he learned and practised the trade of a carpenter, helped at harvest, taught, did anything and everything to get money to pay for his schooling. After the first term, he asked and needed no aid from home; he had reached the age where he could support himself. At Chester he met Miss Lucretia Rudolph, his future wife. Attracted at first by her interest in the same intellectual pursuits, he quickly discovered sympathy in other tastes, and a congeniality of disposition, which paved the way for the one great love of his life. He was himself attractive at this time, exhibited many signs of intellectual superiority, and was physically a splendid specimen of vigorous young manhood. He studied hard, worked hard, cheerfully ready for any emergency, even of that prize-ring; for, finding it a necessity, he one day thralled the bully of the school in a stand-up fight. His nature, always religious, was at this period profoundly stirred in that direction. He was converted under the instructions of a Campbellite pastor, was received and received the nomination. They called themselves “The Disciples,” contended all doctrines and forms, and sought to direct their lives by the Scriptures, simply interpreted as any plain man would read them. This sanction to independent thinking, given by religion itself, had much to do in creating that broad and catholic spirit in this young disciple which kept his earnest nature out
of the ruts of moral and intellectual bigotry. From this moment his zeal to get the best education possible in order to carry on the task that lay before him became evident. He began to look beyond the present into the future. As soon as he finished his studies in Chester, he entered (1851) the Hiram eclectic institute (now Hiram college), at Hiram, Portage co., Ohio, the principal educational institution of his sect. He was not very proud of a poor institution, but his aspirations were indomitable, and he soon had an excellent knowledge of Latin and a fair acquaintance with algebra, natural philosophy, and botany. He read Xenophon, Caesar, and Virgil with appreciation; but his superior ability was more truly recognized in the praying sessions and debating society of the college, where he was assiduous and conspicuous. Living here was inexpensive, and he readily made his expenses by teaching in the English departments, and also gave instruction in the ancient languages. After a year he was well prepared to enter the junior class of any eastern college, and had saved $350 toward the expenses of such an undertaking out of his salary. He hesitated between Yale, Brown, and Williams colleges, finally choosing Williams on the kindly promise of encouragement given him by his uncle, Mark Hopkins, the president. It was natural to expect he would choose Bethany college, in West Virginia, an institution largely controlled and patronized by the "Disciples of Christ." Garfield himself seems to have thought some explanation for his neglect to do so necessary, yet he had particular reasons why he should not. First, the course of instruction at Bethany was not so extended as in the new England colleges; that Bethany was too friendly in opinion on slavery; and—most significant of all the reasons he gave—that, as he had inherited in birth and by association a strong bias toward the religious views there inculcated, he ought especially to examine other faiths. Entering Williams in the autumn of 1854, he was duly graduated with the highest honors in the class of 1856. His classmates unite in their reflections upon his qualities: He was warm-hearted, large-minded, and possessed of great earnestness of purpose and a singular poise of judgment. All speak, too, of his modest and unassuming manners. But, outside of these and other like qualities, such as industry, perseverance, and courthly deportment, Garfield had exhibited up to this time no signs of the superiority that was to make him a conspicuous figure. But the effects of twenty-five years of most varied discipline, cheerfully accepted and faithfully used, begin now to show themselves, and to give to history one of its most striking examples of what education—the education of books and of circumstances—can accomplish. Garfield was not born, but made; and he made himself by persistent, strenuous, conscientious study and work. In the next six years he was a college president, a state senator, a major-general in the National army, and a representative-elect to the National congress. American annals reveal no other promotion so rapid and so varied.

On his return to Ohio, in 1856, he resumed his place of teacher at the Hiram institute, and the next year (1857), being then only twenty-six years of age, he was made its president. He was a successful officer, and ambitious, as usual, beyond his allotted task. He discussed before his interested classes almost every subject of current interest in scholarship, science, religion, and art. The story spread, and his influence with it; he became an intellectual and moral force in the Western Reserve. It was greatest, however, over the young. They keenly felt the contagion of his manliness, his sympathy, his thirst for knowledge, and his veneration for the truths with which he imbued them. As an educator, he was, and always would have been, eminently successful; he had the knowledge, the art to impart it, and the personal magnetism that impressed his love for it upon his pupils. His intellectual activity at this time was intense. The canons of his church, safety in the use of knowledge, and he used the permission. He also pursued the study of law, entering his name, in 1858, as a student in a law-office in Cleveland, but studying in Hiram. To one ignorant of the slow development that was characteristic of Garfield's mind, all progress, it would seem, of this great and good man, for the first time began to show any noticeable interest in politics. He seems never to have even voted before the autumn of 1856. No one who knew the man could doubt that he would then cast it, as he did, for John C. Fremont, the Republican candidate for the presidency. As moral questions entered more and more into politics, Garfield's interest grew apace, and he sought frequent occasions to discuss these questions in debate. In advocating the cause of freedom against slavery, he showed himself a Radical. In 1860 he was a member of the House of Representatives. Without solicitation or thought on his part, in 1859 he was sent to represent the counties of Summit and Portage in the senate of Ohio. Again in this new field his versatility and industry are conspicuous. He makes exhaustive investigations and reports on such widely different topics as geology, education, finance, and parliamentary law. Always looking to the future, and apprehensive that the impending contest might leave the halls of legislation and seek the arbitration of war, he gave special study to the military system of the state, and the best methods of equipping and disciplining it.

The war came, and Garfield, who had been farmer, carpenter, student, teacher, lawyer, preacher, and legislator, was to show himself an able soldier. In August, 1861, Gov. William Dennison commissioned him lieutenant-colonel in the 43d regiment of Ohio volunteers. The men were his old pupils at Hiram college, whom he had persuaded to enlist. Promoted to the command of this regiment, he displayed, and his new rank, Garfield had exhibited up to this time no signs of the superiority that was to make him a conspicuous figure. But the effects of twenty-five years of most varied discipline, cheerfully accepted and faithfully used, begin now to show themselves, and to give to history one of its most striking examples of what education—the education of books and of circumstances—can accomplish. Garfield was not born, but made; and he made himself by persistent, strenuous, conscientious study and work. In the next six years he was a college president, a state senator, a major-general in the National army, and a representative-elect to the National congress. American annals reveal no other promotion so rapid and so varied.

On his return to Ohio, in 1856, he resumed his place of teacher at the Hiram institute, and the next year (1857), being then only twenty-six years of age, he was made its president. He was a successful officer, and ambitious, as usual, beyond his allotted task. He discussed before his interested classes almost every subject of current interest in scholarship, science, religion, and art. The story spread, and his influence with it; he became an intellectual and moral force in the Western Reserve. It was greatest, however, over the
enforced by Gen. Graner and Sheldon, when Marshall gave way, leaving Garfield the victor at Middle Creek, 10 Jan., 1862, one of the most important engagements of the war. Shortly afterward Zoliacco was defeated and slain by Gen. Thomas at Mill Spring, and the Confederates lost the state of Kentucky. Coming after the reverses at Big Bethel, Bull Run, and the disastrous failures in Missouri, Gen. Garfield's triumph over the Confederates for Cumberland Middle was of the most encouraging effect on the entire north. Marshall was a graduate of West Point, and had every advantage in numbers and position, yet seems to have been out-generated at every point. He was driven from two fortified positions, and finally completely routed—within a period of less than a fortnight—in the month of January, 1862. In recognition of these services, especially acknowledged by Gen. Buell in his General Order No. 40 (20 Jan., 1862), President Lincoln promptly made the young colonel a brigadier-general, dating his commission from the battle of Middle Creek. During his campaign of the Big Sandy, while Garfield was engaged in breaking up some scattered Confederate encampments, his supplies gave out, and he was threatened with starvation. Going himself to the Ohio and bringing with him flour, provisions, and, on the refusal of any pilot to undertake the perilous voyage, because of a freshet that had swelled the river, he stood at the helm for forty-eight hours and piloted the craft through the dangerous channel. In order to surprise Marshall, the Ohio and Cumberland were brought into the operation, and marched his soldiers 100 miles in four days through a blinding snow-storm. Returning to Louisville, he found that Gen. Buell was away, overtook him at Columbia, Tenn., and was assigned to the command of the 20th brigade. He reached Shiloh in time to take part in the great battle of that day, was engaged in all the operations in front of Corinth, and in June, 1862, rebuilt the bridges on the Memphis and Charleston railroad, and exhibited noticeable engineering skill in repairing the fortifications of Huntsville. The unhealthfulness of the region told upon him, and on 30 July, 1862, in order that he might recuperate, he returned to Hiram, where he lay ill for two months. On 25 Sept., 1862, he went to Washington, and was ordered on court-martial duty, and gained such reputation in this practice that it was recommended for the case of Gen. Fitz-John Porter. In February, 1863, he returned to duty under Gen. Rosecrans, then in command of the Army of the Cumberland. Rosecrans made him his chief-of-staff, with responsibilities beyond those usually given to this office. In this field, Garfield's influence on the campaign in Middle Tennessee was most important. One familiar incident shows and justifies the great influence he wielded in its councils. Before the battle of Chickamauga (24 June, 1863), Gen. Rosecrans asked the written opinion of seventeen of his generals on the matter of making an attack. All others opposed it, but Garfield advised it, and his arguments were so convincing, though pressed without passion or prejudice, that Rosecrans determined to seek an engagement. Gen. Garfield wrote out all the orders of that fateful day (19 Sept.), excepting that of the order that one of his division lost the day, Garfield volunteered to take the news of the defeat on the right to Gen. George H. Thomas, who held the left of the line. It was a bold ride, under constant fire, but he reached Thomas and gave him the information that saved the Army of the Cumberland. For this action he was made a major-general, 19 Sept., 1863, promoted for gallantry on a field that was lost. With a military future so bright before him, Garfield, always unsellish, yielded his own ambition to Mr. Lincoln's urgent necessity, and entered the War Department, signing his commission, and hastened to Washington to sit in congress, to which he had been chosen fifteen months before, as the successor of Joshua R. Giddings. In the mean time Thomas had received command of the Army of the Cumberland, had reorganized it, and marched it to take a division. His inclination was to accept and continue the military career, which had superior attractions; but he yielded to the representations of the President and Sec. Stanton, that he would be more useful in the house of representatives. Gen. Garfield was thirty-two years old when he entered congress. He found in the house, which was to be the theatre of his lasting fame, many with whom his name was for the next twenty years intimately associated. Schuyler Colfax was its speaker, and Conkling, Blaine, Washburne, Stevens, Fenton, Schenck, Henry Winter Davis, William B. Allison, and William R. Morrison were among its members. His military reputation had preceded him, and secured for him a place in the committee on military affairs, then the most important in the entire first house, for the first time, (1864), upon a motion to print extra copies of Gen. Rosecran's official report, was listened to with attention; and, indeed, whenever he spoke upon army matters, this was the case. But the attention was given to the man for the information he possessed and imparted rather than to the orator; for in effective speech, as in every other matter in which Garfield succeeded, he came to excellence only by labor and practice. He was soon regarded as an authority on military matters, and his opinion was sought as an expert, experienced and careful. To these questions of army legislation he gave necessary attention, but they did not exhaust his capacity. He began at this time, and ever afterward continued, a thorough study of constitutional and financial problems, and to aid him in these researches he labored to increase his familiarity with the German and French languages. In this, his first session, he had to stand almost alone in opposition to the bill that increased the bounty paid for enlistment. He advocated liberal bounties to the veterans that re-enlisted, but would use the draft to secure raw recruits. His views on this subject the same session he spoke on the subject of seizure and confiscation of rebel property, and on free commerce between the states. On 13 Jan., 1865, he discussed exhaustively the constitutional amendment to abolish slavery. In the 39th congress (1865) he was changed, at his own request, from the committee on military affairs to the ways and means committee, which then included Messrs. Morrison, of Illinois, Brooks and Conkling, of New York, and Allison, of Iowa. His reason for choosing this new field was that the value of the advances and the conditions which would have supreme importance, and he wished to have his part in their solution. In the 40th congress (1867) he was restored to his old committee on military affairs, and made its chairman. In March, 1866, he made his first speech on the question of the national public debt, force owing, in the course of his remarks, that republican policy which resulted in the resumption of specie payment, 1 Jan., 1879. From this moment until the treasury note was worth its face in gold, he never failed, on every public or occasion, to discuss every phase of the financial question, and to urge upon the National conscience the
demands of financial honor. In May, 1868, he spoke again on the currency, dealing a staggering blow to the adherents of George H. Pendleton, who, under the stress of a money panic, were clamoring for the government to "make the money-market easier." It may be said that he was at this, as at later times, the representative and champion of the sound-money principles. In Congress, and first and last did more than any one else, probably, in settling the issues of this momentous question. In 1877 and 1878 he was again active in stemming a fresh tide of financial fallacies. He treated the matter this time with elementary simplicity, and gave in detail reasons for a hard-money policy, based not so much upon opinion and theory as upon the teachings of history.

In the 41st Congress a new committee—that on banking and currency—was created, and Garfield was very properly made its chairman. This gave him new opportunities to serve the cause in which he was heartily enlisted, and no one now seeks to diminish the value of that service. The most noticed and most widely read of these discussions was a speech on the National finances, which he delivered in 1878, at Faneuil hall, Boston. It was circulated as a campaign document by thousands, and served to win a victory in Massachusetts and to subdue for a while the frantic appeals from the west for more paper money. He served also on the select committee on the census (a tribute to his skill in statistics) and on the committee of rules, as an appreciation of his practical and thorough knowledge of parliamentary law. In the 43d and 44th Congresses he was chairman of the committee on appropriations. In the 44th, 45th, and 46th Congresses (the House being Democratic) he was assigned a place on the committee of ways and means. In reconstruc tion times, Garfield was earnest and aggressive in opposition to the theories advocated by President Johnson. He was a kind man, and not lacking in sympathy for those who, from mistaken motives, had attempted to sever their connection with the Federal Union but he was still a sentimentalist, and had too earnest convictions not to insist that the results won by so much treachery and blood should be secured to the victors. An old soldier, he would not see Union victories neutralized by evasions of the constitution. On these topics no one was his superior in either the House or Senate, and no opponent, however able, encountered him here without regretting the contest.

In 1876, Gen. Garfield went to New Orleans, at President Grant's request, in company with Senators Sherman and Matthews and other Republicans, to watch the counting of the Louisiana vote. He made a special study of the West Feliciana parish case, and embodied his views in a brief but significant report. On his return, he made, in January, 1877, two notable speeches in the House on the duty of Congress in a presidential election, and claimed that the vice-president had a constitutional right to count the electoral vote. He was opposed to an electoral commission; yet, when the commission was ordered, Gen. Garfield was chosen by acclamation to fill one of the two seats allotted to the Republicans. His colleague was George F. Hoar, of Massachusetts. Garfield discussed before the commission the Florida and Louisiana returns, on 9th and 16th Feb., 1877. Mr. Blaine left the house in 1877 for the Senate, and this made Garfield the undisputed leader of the Republican party in the House. He was at that time, and subsequently, its candidate for speaker.

The struggle begun in the second session of the 45th Congress (1879), when the Democratic majority sought to control the President through the appropriations, gave Garfield a fine opportunity to display his powers as a leader of opposition. The Democratic members added to two general appropriation bills, in the shape of amendments, legislation intended to restrain the use of the army as a post to keep the peace at elections, to repeal the law authorizing the employment of military force to prevent the elections of U.S. marshals at the elections of members of Congress, and to relieve jurors in the U.S. courts from the obligation of the test oath. The Senate, which was Republican, refused to concur in these amendments, and so the session ended. An extra session was promptly called, which continued in session. Contemporary criticism claims that, in this contest, Gen. Garfield reached, perhaps, the climax of his congressional career. A conservative man by nature, he revolted at such high-handed measures, and in his speech of 29 March, 1879, characterized them as a "revolt against the law," and against the spirit of the law he protested with unsworn vigor. Like Webster in 1832, he stood the defender of the constitution, and his splendid eloquence and relentless logic upheld the prerogatives of the executive, and denounced these attempts by the legislature to pass such legislation, however disguised, as an attack upon the constitution. He warned the House that its course would end in nullification, and protested that its principle was the "revived doctrine of state sovereignty." (See speeches of 26 April, 10 and 11 June, and 19 and 27 June, 1878, and 26 April, 1879.) The Democrats finally voted $44,600,000 of the $45,000,000 of appropriations originally asked—a great party victory, to which Gen. Garfield largely contributed.

Arguments had the more weight because not partisan, but supported by a clear analysis of the relations between the different branches of the government. His last speech to the House was made on the appointment of special deputy marshals, 23 April, 1880. At the same time he made a report of the tariff commission, which showed that still another sincere friend to protection. He was already United States senator-elect from Ohio, chosen after a nomination of singular unanimity, 13 Jan., 1880.

Where there is government by party, no leader can escape calumny; hence it assailed Garfield with great venom in the Congress of 1879. He, with other Republican representatives, was charged with having bought stock in the Credit Mobilier, sold to them at less than its value to influence their action in legislation affecting the Union Pacific railroad. A congressional investigation, reporting 18 Feb., 1879, denied the facts so far as Garfield was concerned. He knew nothing of any connection between the two companies, much less that the Credit Mobilier coo-
trolled the railway. Garfield denied that he ever owned the stock, and was vaguely contradicted by Oakes Ames, who had no evidence of his alleged sale of $1,000 worth of the stock to Garfield, except a memorandum in his diary, which did not agree with Ames's oral testimony that he paid Garfield $320 as dividend on the stock. Garfield admitted that he had received $300 in June, 1868, from Ames, but claimed that it was a loan, and that part of it was returned in 1869. It was nowhere claimed that Garfield ever received certificate, or receipt, or other dividends, to which, if the owner of the stock, he was entitled, or that he ever asked for them. The innocence of Gen. Garfield was generally recognized, and, after the circumstances became known, he was not weakened in his district. Another investigation in the same congress (43d) gave calumny a second opportunity. This was the investigation into the conduct of the government of the District of Columbia. It revealed starting frauds in a De Golyer contract, and Garfield's name was found to be in some way connected with it. The facts, corroborated in an open letter by James M. Wilson, chairman of the committee, were: In May, 1872, Richard C. Parsons, a Cleveland attorney, then marshal of the city of Columbus, having the interests of the patents owned by De Golyer in charge, was called away. He brought all his material to Garfield, and asked him to prepare the brief. The brief was to show the superioriety of the pavement (the subject of patent) over forty other patents, and did not concern the contract or have anything to do with its terms. The fraud, as is generally understood, was in the contract, not in the quality of the pavement. Garfield prepared the brief and delivered it to Parsons; but did not himself make the argument. Parsons, on his return, gave Garfield subsequently $5,000, which was a part of the fee Parsons had received for his own services. As thoughtful people reviewed the case, there was no harsher criticism than that suggested by Gen. Garfield's own lofty standard of avoiding even the appearance of evil—that he had not shown his usual prudence in making any connection, even the most honest, in any way, with any matter that could in any shape come up for congressional review. It was the cruel and unjust charges made in connection with these calumnies which sent the iron into his soul, and made wounds which he forgave but never the principle of which he could accept the nomination by announcing thirty-six votes for James A. Garfield. This put the spark to fuel that had been unconsciously prepared for it by the events of the long struggle. In all the proceedings, peculiar fitness had put Garfield to the front as the counsellor and leader of the anti-Grant majority, and the exhibition of his splendid qualifications won increasing admiration and trust. His tact and readiness in casual debate, and the beauty and force of the more elaborate effort in which he nominated Sherman, won the waverers over.

On the thirty-sixth ballot the delegates broke their ranks and rushed to him. He received 399 votes, and then his nomination (8 June, 1880) was made unanimous. Gen. Garfield left the convention before the result was announced, and accepted the nomination by letter. This was a thoughtful document, and acceptable to the Republican voters. Disregarding precedent, he spoke in his own behalf in Ohio, New York, and other states. He spoke sensibly and with great discretion, and his public appearance is thought to have increased his popularity. He was elected (2 Nov., 1880) over his competitor, Gen. Winfield Scott Hancock, by the votes of every northern state except New Jersey, Nevada, and California. His inaugural address, 4 March, 1881, was satisfactory to the people generally, and said: 'I go up to heaven with only one cloud in the sky. His cabinet was made up as follows: James G. Blaine, of Maine; secretary of state; William Windom, of Minnesota; secretary of the treasury; Wayne MacVeagh, of Pennsylvania; attorney-general; Thomas L. Johnson, of New York; postmaster-general; Kellogg, of Iowa; secretary of the interior; and Robert T. Lincoln, of Illinois; secretary of war; William H. Hunt, of Louisiana; secretary of the navy. There was bitter dissension in the party in New York, and Garfield gave much consideration to his duty in the premises. He was willing to do anything except yield the independence of the executive in his own constitutional sphere. He would give to the New York senators, Conkling and Platt, more than their share of offices; but they should not be allowed to interfere with his residence in the capital or to make nominations. He made nominations to the senate as many, it is said, as twelve—in that interest, and then (23 March, 1881) sent in the name of William H. Robertson, a leader in the other faction, as collector of the port of New York. Senator Conkling protested, and then openly resisted his nomination. Yielding to him in the interest of senatorial courtesy, his Republican colleagues, in caucus, 2 May, 1881, agreed to let contested nominations lie over practically until the following December. This was a substantial victory for Mr. Conkling; but it was promptly met by the president, who, a few days afterward (5 May), withdrew all the nominations that were pleasing to the New York senator. This brought the other senators to terms. Mr. Conkling, recognizing defeat, and Mr. Platt with him, resigned their mandates, and Mr. Platt, on 18 May, Collector Robertson was confirmed. The early summer came, and peace and happiness and the growing strength and popularity of his administration cheered the heart of his chief. At a moment of special exaltation, on the morning of 1 July, 1881, he was shot by a perfectly unprepared, uninvited and unregistered assassin. The avowed object was to promote the presidential chair Vice-President Arthur, who represented the Grant or "stalwart" wing of the party. The president was setting out on a trip to New England, anticipating especial pleasure in witnessing the commencement exercises of his alma mater at Williamstown. He was passing through
the waiting-room of the Baltimore and Potomac depot, at nine o'clock that morning, leaning on the arm of Mr. Blaine, when the assassin fired at him with a pistol. The first ball passed through his coat-sleeve; the second entered by the back, fractured a rib, and lodged deep in the body. The president was carried to the White House, where, under the highest medical skill, and with all the feeling comfort that money and devotion could bring, he lingered for more than ten weeks between life and death. The country and the world were moved by the dastardly deed; and the fortitude and cheerfulness with which the president bore his suffering added to the universal grief. Daily bulletins of his condition were published in every city in the United States and in all the European capitals. Many of the crowned heads of Europe sought by telegraphic inquiry more particular news, and repeated their wishes for his recovery. A day of national supplication was set apart and sacredly observed, and the prayers at first seemed answered. His physicians were hopeful, and gave expression to their hope. His condition seemed to improve; but when midsummer came, the patient failed so perceptibly that a removal was hazardous. On 6 Sept., 1881, he was removed to N. J., by a special train. He bore the journey well, and for a while, under the inspiration of the invigorating sea-breezes, seemed to rally. But on 15 Sept., 1881, symptoms of blood-poisoning appeared. He lingered till the 19th, when, after a few hours of unconsciousness, he died peacefully. A special train (21 Sept.) carried the body to Washington, through a country draped with emblems of mourning, and through crowds of reverence spectators, to lie in state in the rotundas of the capital two days, 22 and 23 Sept. The final service held by the Senate in his honor was described as surpassing in solemnity and dignity, except on 27 Feb., 1822, when, in the hall of representatives, at the request of both houses of congress, his friend, James G. Blaine, then secretary of state, delivered a memorial address, in the presence of the president and the great departments of the government, so perfect that the criticism of two continents was unqualified praise. In a long train, crowded with the most illustrious of his countrymen, which in its passage, day or night, was never out of the silent watch of mourning citizens, who stood in city, field, and forest, to see it pass, Garfield's remains were borne to Cleveland and placed (28 Sept., 1828) in a beautiful place, and over which the waters of Lake Erie. The accompanying illustration represents the imposing monument that is to mark his last resting-place.

His tragic death assures to Garfield the attention of history. It will credit him with great services rendered in various fields, and with a character formed by a singular union of the best qualities—industry, perseverance, truthfulness, honesty, courage—all acting as faithful servants to a lofty and unselfish ambition. Without genius, which can rarely do more than produce extraordinary results in one direction, his help in education and well-trained that he produced excellent results in many. If history shall call Garfield great, it will be because the development of these powers was so complete and harmonious. It has no choice but to recognize that he was distinguished in many fields: a teacher so gifted that his students compare him with Arnold of Rugby; a soldier, rising by merit in rapid promotion to highest rank; a lawyer heard with profit and approbation in the supreme court; an eloquent orator, whose own ancient faith kindled his hearers' speaking after thorough preparation and with practised skill, but refusing always to win victory by forensic trick or device; a party leader, failing in pre-eminence only because his moral honesty would not let him always represent a party victory as a necessity of national well-being; in all these characters he was the friend of learning and of virtue, and would probably ask no other epitaph than the tribute of a friend, who said that, "among the public men of his era, none had higher qualities of statesmanship and greater culture than James A. Garfield."

Garfield's speeches are almost a compendium of the political history of the stirring era between 1864 and 1880. Among those worthy of special mention, on account of the importance of the subjects or the attractive and forcible presentation of them, are the following: On the Enrolling and calling out of the National Forces (25 Jan., 1864); on the Reconstruction of the Southern States (February, 1868); on Civil-Service Reform, in the congress of 1870 and other congresses; on the Currency and the Presidency. There were nearly and Democratic Party and the South (4 Aug., 1876), of which a million copies were distributed as a campaign document; the speech in opposition to the WOOD bill, which was framed to break down the protective tariff (4 June, 1878); the speech on Reformation in Congress (25 April and 4 April, 1878); on Congressional Nullification (10 June, 1879); on the WOOD bill (11 June, 1879); and on the Democratic Party and Public Opinion (11 Oct., 1879). Among his speeches in congress, less political in character, were that on the National Bureau of Education, and those on the Bureau of Indian Affairs, covering a period of several years: one on the Medical and Surgical History of the Rebellion (2 March, 1880); two on the Census (6 April and 16 Dec., 1879); one on Civil-Service Reform; many addresses on the silver question, and one on National aid to education (8 Feb., 1879). He found time to make frequent orations and addresses before societies and gatherings outside of congress. His address on College Education, delivered before the literary societies of Hiram college (14 June, 1867), is an admirable plea for a liberal education, and on a subject in which the author was always deeply interested. On 30 May, 1868, he delivered an address on the Union Soldiers, at the first memorial service held at Arlington, Va. A eulogy of Gen. Thomas, delivered before the Army of the Cumberland Society, which opened with a beautiful oration of his oratorical efforts. On the reception by the house of the statues of John Winthrop and Samuel Adams, he spoke with a great wealth of historical allusion, and all his memorial addresses, especially those on his predecessor in congress, Joshua K. Giddings, Lincoln, and Polk, are worthy of study. But in all this series nothing will live longer than the simple words with which, from the balcony of the New York custom-house.
he calmed the mob frenzied at the news of Lincoln’s death: “Fellow-citizens: Clouds and darkness are around him; His pavilion is dark waters and thick clouds; justice and punishment are the establishment of his throne; mercy and truth shall go before his face! Fellow-citizens! God reigns, and the Government at Washington lives.”

After the death of President Garfield, a popular subscription for his widow and children realized over $500,000. The word is to be paid to Mrs. Garfield during her life, after which the principal is to be divided among the children—four sons and a daughter. More than forty of Garfield’s speeches in congress have been published in pamphlet-form, as has also his oration on the life of Gen. George H. Thomas. A volume of brief selections, entitled “Garfield’s Words,” was compiled by William R. Balch (Boston, 1881). His works have been edited by Burke A. Hinsdale (2 vols., Boston, 1889). The most complete life of President Garfield is that by James R. Gilmore (New York, 1890).

A monument to President Garfield, designed by John Q. A. Ward, was erected in Washington, D.C., by the Society of the army of the Cumberland, and dedicated on 12 May, 1887. It consists of a bronze statue of Garfield, 10 feet high, standing on a circular pedestal, 18 feet in height, with bat- tlements, on which are three reclining figures, representing a student, a warrior, and a statesman. The U.S. government gave the site and the granite pedestal, besides contributing to the cost of the statues, and furnishing cannon to be used in their casting. (See page 604.) The unusual attitude of the arms is explained by the fact that Gen. Garfield was left-handed.—His wife, Lucretia Rudolph, b. in Hiram, Portage co., Ohio, 19 April 1832, was the daughter of a farmer named Rudolph. She first met her husband when he was 21 years old at Hiram, Ohio, and was married 11 Nov., 1858, in Hudson, Ohio, soon after his accession to the presidency of the college. Seven children were born to them, of whom four sons and one daughter are living (1887).

Garland, Augustus Hill, cabinet officer, b. in Tipton county, Tenn., 11 June, 1832. His parents moved from Arkansas before he was a year old. He was educated at St. Mary’s college, Lebanon, Ky., and St. Joseph’s college, Bardstown, Ky., read law there and in Arkansas, and was admitted to the bar in Washington, Ark., in 1855. After practising in that place for three years, he removed to Little Rock. He was a Whig in politics, and in 1860 was an elector on the Bell and Everett ticket. He was an opponent of the secession ordinance in the State convention, but after its passage he espoused the southern cause, and was a member of the Provisional congress that met at Montgomery, Ala., in May, 1861. He was chosen a delegate to the 1st Confederate congress, and afterward served in the senate, in which he had a seat when the Confederacy fell. In 1863 he petitioned the U.S. supreme court for the right to practise without taking the “iron-clad” oath, presenting an argument on which the question was decided in his favor in December, 1867. He was elected U.S. senator for the term beginning on 4 March, 1867, but was not permitted to take his seat. In 1874, after serving a short time as acting secretary of state, he was elected by a large majority governor of Arkansas under the new state constitution. In January, 1876, he was sent to the U.S. senate, succeeding Powell Clayton, a Republican, and re-elected in 1883, serving from 5 March, 1877, to 5 March, 1885, when he took his seat in the cabinet, having been appointed by President Cleveland attorney-general of the United States. His successful test-oath case is reported in Wallace’s “Supreme Court Reports,” vol. iv.

Garland, John, soldier, b. in Virginia in 1792; d. in New York city, 5 June, 1861. He was appointed 1st lieutenant of infantry on 21 March, 1813, served through the war with Great Britain, became a captain on 5 May, 1817, was made major by brevet in 1827, attained the full rank of major on 30 Oct., 1836, and that of lieutenant-colonel on 27 Nov., 1839. He won distinction in the Florida war under Gen. Worth, and served through the Mexican war, distinguishing himself in six battles, and commanding a brigade at Monterey and through Gen. Scott’s subsequent campaign. He was severely wounded at the taking of the city of Mexico. He was brevetted colonel for gallantry at Palo Alto and Resaca de la Palma, and brigadier-general for meritorious and gallant conduct at Contreras and Churubusco. He was promoted colonel on 9 May, 1861.—His cousin, Hugh A., lawyer, b. in Nelson county, Va., 1 June, 1865; d. in St. Louis, Mo., 15 Oct., 1884, was president of Hamden Sidney college in 1885, was professor of Greek there for the next five years, and became afterward a successful lawyer, practising in Mecklenburg county, Va. He sat in the Virginia assembly for five years, and was chosen clerk of the National house of representatives in 1886. At the opening of congress in 1889 he called the roll, as clerk of the last house, but omitted five Whigs, elected from New Jersey, whose seats were contested, thus securing a Democratic majority. A scene of uproar resulted, which was continued on succeeding days, until John Q. Adams was elected through pro tempore. In 1841 he settled on a farm near Petersburg, and engaged in mercantile business, by which he lost his property. In 1845 he removed to St. Louis, and resumed the practice of the law. He was the author of a “Life of John Randolph” (New York, 1840).—The son of Hugh A., Hugh A., lawyer, d. at Franklin, Tenn., 30 Nov., 1864, studied and practised law in St. Louis, Mo. He joined the Confederate army, was made a colonel, participated in the actions between the forces of Gen. Hood and Thomas in middle Tennessee, and fell at Franklin, Tenn., while leading his command.

—The brother of Hugh A., Landon Cabell, edu-
GARMAN, Samuel, naturalist, b. in Indiana county, Pa., 5 June, 1846. He was graduated at the Illinois state normal university in 1870, and for the following year was principal of the Missouri state normal school. In 1871 he became professor of natural sciences in Ferry Hall seminary, Lake Forest, Ill., and a year later became a special pupil of Louis Agassiz in natural history. He was appointed in 1874 as the associate of ichthyology in the museum of comparative zoology at Cambridge, and still holds that office. In connection with his work he has made various explorations to South and Central America, and also geological expeditions to the Rocky and Sierra Nevada mountains. He is a member of scientific societies in the United States and Europe, and has been president of the Boston scientific society. His publications, besides many monographs on the nomenclature, anatomy, classification of new species of fishes, ichthyids, ichthyans, reptiles, and similar topics, include "The Reptiles and Batrachians of North America" (Cambridge, 1888); "Check List of the North American Reptiles and Batrachians" (Salem, 1884); "The Reptiles of Bermuda" (Washington, 1884); and "A Living Species of E." (Cambridge, 1885).

GARNEAU, François Xavier, Canadian author, b. in Quebec, 15 June, 1809; d. 3 Feb., 1866. He was educated at Quebec seminary, studied law, and was admitted as a notary in 1830. Subsequently he became clerk of the legislative assembly, member and president of the council of public instruction, and city clerk of Quebec, which office he held from 1843 till his death. He was an honorary member of literary and historical societies in the United States and Canada, and for several years president of the Institut Canadien of Quebec. He wrote "Histoire de la révolution des colons" (3 vols., Quebec, 2d ed., 1852, also translated into English); and "Voyage en Angleterre et en France dans les années 1831, 32, 33."

GARNEAU, Pierre, Canadian capitalist, b. in Cap-Sainte, Quebec, 8 May, 1823. He was educated on his native soil, and became a director of the Quebec street railway company, and a member of the Quebec board of trade. He was a government director of the North Shore railroad, mayor of the city of Quebec in 1870-73, and a member of the canal commission in 1870. He was appointed a member of the executive council and commissioner of agriculture and public works for the province of Quebec in September, 1874, and of crown lands in January, 1875. He was elected to the legislative assembly in March, 1873, re-elected in 1875, and again in 1882.

GARNER, Peter M., abolitionist, b. in Lancaster county, Pa., 4 Dec., 1809; d. in Columbus, Ohio, 12 June, 1868. He removed to Fairview, in Warren county, Ohio, in 1850, and became a school teacher, and was a pioneer in the anti-slavery movement in Ohio. In 1845, with two other citizens, he was seized by Virginians and taken to Parkersburg and thence to Richmond, and held in confinement six months, on a charge of assisting slaves to escape, but was finally released on his own recognizance. From 1847 till 1860 he taught in the Ohio penitentiary at Columbus, and during the war had charge of the military prisoners.

GARNET, Henry Highland, clergyman, b. in New Market, Md., 23 Dec., 1815; d. in Monrovia, Liberia, 13 Nov., 1862. He was the negro of the Mendigo tribe, of the Slave Coast, and born in slavery. His parents escaped with him to Bucks county, Pa., where they remained a year, and in 1826 settled in New York city. He was educated in Canadian academies, N. Y., and the Oneida institute, near Utica, N. Y., where he was graduated with honor in 1840. He taught in Troy, N. Y., studied theology under Dr. Nathaniel S. S. Beman, was licensed to preach in 1842, and was pastor of a Presbyterian church in Troy for nearly ten years. In 1853 he was called to the Centenary Presbyterian church in Troy. In 1855 he accepted a call to a church in Washington, D. C. After a successful pastorate of four years he resigned to become president of Avery college, but gave up that post soon afterward, and returned to Shiloh church. President Garfield offered him the appointment of minister and superintendent of schools in Liberia, and after the accession of President Arthur the nomination was made and confirmed by the senate. He arrived at Monrovia on 23 Dec., 1881, and entered auspiciously upon his diplomatic duties, but soon succumbed to climate. A memorial school, organized by his daughter, Mrs. M. H. Garnet Barboza, was endowed in honor of him at Brewerville, Liberia.
GARNETT, James Mercer, agriculturist and politician, b. in Essex county, Va., 8 June, 1770; d. at Martin's Ford, Va., 30 September, 1850. He was the first president of the U. S. agricultural society, and wrote extensively on rural economy. He was also interested in educational progress, maintained a female seminary in his own house for twelve years, and was active in several antislavery societies, and approved methods of instruction. He acted with the Democratic party, and engaged in a controversy with Matthew Carey, the protectionist. He was an intimate friend of his colleague in congress, John Randolph, of Roanoke. After serving for several years in the Virginia legislature he was twice elected to the National house of representatives, and served from 2 Dec., 1805, to 3 March, 1809. In 1839 he was a member of the Virginia constitutional convention.—His youngest brother, Robert Selden, b. in Essex county, Va., was educated at Princeton, and was admitted to the bar at Lloyds, and was elected as a Democrat to congress, and four times re-elected, serving from 1 Dec., 1817, to 3 March, 1827. On the question of recognizing the South American republics he voted alone. He was a political supporter and personal friend of Martin Van Buren. In 1842, he was elected in the Colorado expedition of 1838, and resigned on 17 May, 1861, to join the Confederate army. He was engaged in many of the battles in Virginia, was afterward attached to Gen. Lee's army, with the rank of brigadier-general, and fell in the battle of Gettysburg. Another nephew, Robert Selden, son of Robert S., soldier, b. in Essex county, Va., 16 Dec., 1819; d. at Carrick's Ford, Va., 13 July, 1861. He was graduated at the U. S. military academy in 1841, appointed 2d lieutenant of artillery, and from 1 May, 1844, to 31 Oct., 1849, was assistant instructor of infantry tactics at the military academy. He was aide-de-camp to Gen. Wool in 1845, distinguished himself in the battles of Palo Alto and Resaca de la Palma, was promoted 1st lieutenant in 1846, was aide-de-camp to Gen. Taylor through the campaign of Mexico, was engaged in Kansas in 1867-7, and in the Utah expedition of 1868, and resigned on 17 May, 1861, to join the Confederate army. He was engaged in many of the battles in Virginia, was afterward attached to Gen. Lee's army, with the rank of brigadier-general, and fell in the battle of Gettysburg.

GARNER, Charles, clergyman, b. in Paris in 1605; d. in Canada, 7 Sept., 1649. He entered the Society of Jesus, 7 Dec., 1624, and was sent to Canada in 1626. He went to live on the Huron mission. He was stationed at Etharta, a settlement of the Tontatine Hurons, when an attack was made on it, 7 Sept., 1649, by the Iroquois. The town was defenceless, as the Tontatine braves had gone in another direction to meet the enemy. The Iroquois set fire to it and slaughtered every one they met. Meanwhile, Father Garnier was everywhere exhorting and baptizing the wounded, regardless of danger. At last he fell mortally wounded, but, seeing a wounded Tontatine pass from him, he rallied his strength, dragged himself to the seminary, and, while giving him absolution, fell dead on his body. As a Huron scholar Father Garnier had no superior among the whole body of his fellow-missionaries, with the exception of Brebeuf.
stay he was ordered to pass on to the Onondagas to ascertain whether there was any prospect of rebuilding the church of St. Mary's, which had been destroyed. He was received with enthusiasm by this tribe, and especially by their chief, Garacothie (q. c.). They begged him to remain among them, and on his declaring that he could not do so except at some future time, was gradually prevailed upon to accede to his demand. He met with great success in converting the Onondagas, and on the arrival of two other missionaries he set out to evangelize the Senecas. He did not meet with much success in his labors, and returned to Canada in 1863. In 1762 the Senecas petitioned for the return of the missionaries, and Father Garnier was one of those who returned. He remained some years among them, but, being at length exhausted by his labors, he went back to Canada. He was the last missionary who preached among the Senecas.

GARONHIAGUÉ, a volunteer of the Hot Cinders by the French, Oneida chief, d. in New York state in 1867. He took part in the torture and murder of Father de Brebeuf in 1649. Afterward, having quarreled with another Oneida sachem, he went to Canada, and, on hearing of his brother recently rescued from his tribe, he stopped on his journey at the Christian Indian village of La Prairie. Here his wife was converted, and, soon persuading her husband to become a Christian. After his baptism he was elected fourth chief of the mission, and, although the youngest, soon became head-chief. His eloquence and fervor produced such effect in the village that he was made catechist. He then went among the heathen tribes, and, with the aid of religious pictures, made numerous converts. He frequently visited his people, the Senecas petitioned for the return of the missionaries, and Father Garnier was one of those who returned. He remained some years among them, but, being at length exhausted by his labors, he went back to Canada. He was the last missionary who preached among the Senecas.

GARONHIAGUÉ, in his invasion of the Seneca country. The French army, while passing through a defile, fell into an ambuscade of 800 Senecas. The Christian Indians bore the brunt of the attack, and Garonhiaguy fell mortally wounded.

GARBARD, James, governor of Kentucky, b. in St. Louis, on 10 April, 1749; d. in Bourbon county, Ky., 9 Jan., 1822. While engaged as a militia officer in the Revolutionary war he was called from the army to a seat in the Virginia legislature. Here he was a zealous advocate of the bill for the establishment of religious liberty. Having removed with the early settlers to Kentucky, in 1783, and settled on Stoner river, near Paris, he became there a political leader, and was a member of the convention which framed the first constitution of the state. Here he was ordained to the Baptist ministry, in 1791, pending the convention just named, he was chairman of a committee that reported to the Elkhorn Baptist association a memorial and remonstrance in favor of excluding slavery from the commonwealth by constitutional enactment. He was elected governor in 1798, and served two years, and 1800, and died in 1812. He was the grandson of Theophilus Toumlin, soldier, b. near Manchester, Ky., 7 June, 1812. He was a member of the lower house of the Kentucky legislature in 1843-4, served through the Mexican war as a captain in the 16th U. S. infantry, went to California on the overland route, remained in the mines fifteen months, and then returned by way of Panama to Kentucky. He was elected to the state senate in 1847, resigned to become a candidate for congress, and elected a state senator again in 1851. He was appointed a colonel of the 3d Kentucky U. S. volunteer infantry, promoted brigadier-general in March, 1863, and mustered out on 4 April, 1864.—A great-grandson, Kenner, soldier, b. in Cincinnati, Ohio, in 1860; d. there, 15 May, 1879, was graduated at U. S. military academy, in 1851, entered the dragoons, became a captain on 3 March, 1855, was engaged in frontier service in Texas, and captured by the Confederates on 12 April, 1861, being placed on parole until exchanged as a prisoner of war on 27 Aug., 1862. He served meanwhile as instructor and commandant of cadets at West Point. He was commissioned on 27 Sept., 1862, as colonel of the 146th regiment of New York volunteers, and engaged in the principal battles of the Rappahannock and Virginia campaigns. On 23 July, 1863, he was promoted brigadier-general. He took part at Rappahannock Station and in the Mine Run operations, and in 1864 commanded a cavalry division of the Army of the Cumberland, and participated in the operations around Chattanooga and the invasion of Georgia, being constantly engaged in detached expeditions. He was brevetted colonel in the U. S. army for services in the expedition to Covington, Ga. From December, 1864, till the end of hostilities he commanded the 2d division of the 16th army corps. He distinguished himself at the battle of Nashville, earning the brevet of major-general of volunteers and brigadier-general in the regular army, participated in the operations against Mobile, led the storming column that captured Blakely, and was in command of the district of Mobile until after he was mustered out of the volunteer service. He thereupon received the brevet of major-general, U. S. army, for services during the war. On 9 Nov., 1866, he resigned his commission in the regular army.

GARRETTSON, Freeborn, clergyman, b. in Maryland, 15 Aug., 1792; d. in New York, 28 Sept., 1872. In 1796 he became a minister of the Methodist Episcopal church, and in December, 1784, he was ordained an elder, and volunteered as a missionary to Nova Scotia. In 1788, with twelve young ministers, he began the work of evangelizing eastern New York and western New England. He married Miss Catharine Rhinebeck, in 1791, and henceforth his labors were confined to New York city. He was eminently successful as a minister, and preached in almost all the eastern states from Nova Scotia to the Gulf of Mexico. He emancipated several slaves belonging to him, and made provisions in his will for the perpetual support of a missionary. See Bang's "Life of F. Garretson" (New York, 1832).—His daughter, Mary Rutherford, b. in 1798; d. near Rhinebeck, N. Y., 7 March, 1879, was of marked intellectual ability, and noted for her works of benevolence and smallness of stature.

GARRETTSON, James Edmund, author, b. in Wilmington, Del., 4 Oct., 1828. He was educated at Mantsa classical institute, and at the University of Pennsylvania, where he was graduated in medi- cal sciences in 1853. He then practiced for three years,—first as a surgeon, and then in Philadelphia, making a specialty of oral surgery. He successfully introduced many new operations and appliances, and was the first to use the surgical engine, and to introduce it into general practice. Dr. Garretson was a lecturer in the Philadelphia College of Dental Surgery, and in oral surgery at the University of Pennsylvania in 1860-9, and has been dean of the Philadelphia Dental College since 1879. He became president of
the medical and chirurgical society in 1888, is pro-

fessor of general clinical surgery in the medic-

chalurgical college, and surgeon-in-chief of the

hospital corps for v...
GARRISON

1850, and then studied medicine for four years,
until sickness forced him to discontinue his studies.
During this period he visited in Europe
and America, and on his return to his native coun-
try he was appointed professor of French in the
military academy of Copenhagen. In 1869 he
was graduated in medicine and practised in Copen-
hagen until 1873, when he came again to the United
States, and was since removed here. He first set-
tled in Brooklyn, but in 1879 removed to New
York city. He was appointed physician to the
ynecological department of the German dispensa-
ary in 1879, obstetric surgeon to the Maternity
hospital in 1881, obstetrician to the Infant asylum
in 1884, gynecologist to the German hospital in 1885,
and in 1886 professor of practical obstetrics
in the Post-graduate medical school and hospital.
Dr. Garrigues is a member of numerous medical
societies, and has taken an active part in their
proceedings. He has written several papers on gynecology in
the "American Journal of Obstetrics" and the
"Transactions of the Gynecological Society," and
published "Gastro-Elytrotomy" (New York,
1878); "Diagnosis of Ovarian Cysts by means of the Examination of the Contents" (1882); "Prac-
tice of Antiseptic Medicine" (Detroit); and part of the "System of Gynecology by Ameri-
can Authors" (Philadelphia, 1887).

GARRISON, Cornelius Kingsland, capitalist,
b. in Fort Montgomery, near West Point, N. Y., 1
March, 1809; d. in New York city, 1 May, 1888.
His father was a retired army officer, and he
worked on his father's schooner, and also acquired
a taste for navigation. In 1830 he removed to
Buffalo, where he was employed as a builder, and
in 1834 went to Canada, and while there was prin-
cipally engaged in building bridges and in marine
work. In 1838, he came to St. Louis and acquired
a fortune from the boats that he built,
owned, and commanded. In 1852 he went to Panama
and established the banking-house of Garri-
son, Fritz, and Raleton, and at the same time
became agent of the Nicaragua steamship company.
In 1853 he was one of the first investors in the
Pacific mail steamer, and while there originated the movement that led to
the organization of the Pacific mail steamship company.
At the end of his term as mayor he was
presented by the citizens with a service of forty
ounces of gold. In 1865 he removed to New
York and became a financier and speculator.
During the civil war Mr. Garrison placed many of his
ships at the disposal of the government.
He was largely interested in the Pacific railroad
of Missouri, which, becoming involved, was sold under
foreclosure in 1876. Mr. Garrison was elected
president of the reorganized road (now the Missis-
souri Pacific), and out of this reorganization arose
the Maric-Garrison suit for $5,000,000, which, after
ten years, was decided adversely to Mr. Garrison.
In June, 1884, he made an assignment, but his
assets were largely in excess of his liabilities.

GARRISON, Joseph Fitzhian, clergyman, b. in
Fairmont, Cumberland co., N. J., 20 Jan., 1823.
He was graduated at Princeton in 1842, and in medi-
cine at the University of Pennsylvania in 1845.
He entered the ministry of the Protestant Episco-
pal church in 1855, and rector of St. Paul's, Camden, N. J., which he resigned on being
appointed professor of liturgies and canon law in the
Philadelphia divinity-school, which he still holds (1882). He has contributed largely to
periodical literature, and has published separately,
besides "The Rise of the Protestant Episcopal Church in the United
States" (1855), and the Bohlen lectures for 1887 on
"The American Prayer-Book: its Principles and
the Law of its Use" (1887). The degree of D. D.
was conferred on him by Princeton.

GARRISON, William Lloyd, journalist, b. in
Newburyport, Mass., 10 Dec., 1805; d. in
New York city, 24 May, 1879. His father, Abijah Gar-
riso, was a sea-captain, a man of generous na-
ture, sanguine temperament, and good intellect-
ual capacity, who ruined himself by in-
temperance. His mother, Fanny Lloyd, was a woman
of exceptional beauty of person and high charac-
ter, and remarkable for inflexible fidelity to her
moral convictions. They emigrated from Nova
Scotia to Newburyport a short time before the
birth of Lloyd, and not long afterward the father
left his family and was never again seen by them.
At fourteen years of age Lloyd was apprenticed to
the printing business in the office of the Newbury-
port "Herald," where he served until he was of
age, becoming foreman at an early day, and dis-
playing a strong moral taste and capacity for
editorship. From the first he was remarkable for
his firmness of moral principle, his quick apprecia-
tion of ethical distinctions, and an inflexible ad-
herence to his convictions at whatever cost to him-
self. His aims and purposes were of the highest,
and those who knew him best foresaw for him
an honorable career. His apprenticeship ended,
he became editor for a time of the Newbury-
port "Free Press," which he made too revolutionary
for the popular taste at that day.
To this paper John G. Whittier,
then unknown to fame, sent for years later his partner, in his
earliest poems anonymously, but the editor, discov-
ering his genius,
acknowledged it, and they formed a friendship
that was broken only by death. Mr. Gar-
risson's next experiment in editorship was with the
"National Philanthropist" in Boston, a journal
devoted to the cause of temperance. We next
hear of him in Bennington, Vt., whither he went
in 1828 to conduct the "Journal of the Times,"
established to support John Quincy Adams for re-
election as president. Before leaving Boston, he
formed an acquaintance with Benjamin Lundy,
the Quaker abolitionist, then of Baltimore, where
he was publishing the "Genius of Universal Emanci-
pation," a journal that had for its object the
abolition of American slavery. Going to New
England with the distinct purpose of enlist-
ing the clergy in his cause, Lundy was bitterly dis-
appointed by his want of success; but he mightily
stirred the heart of young Garrison, who became
his ally, associate, and his cause, and in the con-
duct of the "Genius of Universal Emancipation.
" This journal, up to that time, had repre-
sented the form of abolition sentiment known as
gradualism, which had distinguished the anti-sla-
very societies of the times of Franklin and Jay, and
fully answered the moral demands of the period.
These societies were at this time either dead or in-
active, and, since the Missouri contest of 1819—20,
the people of the north had generally ceased to strive for emancipation, or even to discuss the subject. With the exception of Lundy's earnest though feeble protest, supported mainly by Quakers, the general silence and indifference were unbroken. Mr. Garrison pointedly contended to the settled conclusion that slavery was interdicted by the constitution, and all discussion of the subject a menace to the Union. The emancipation of slaves in any considerable numbers, at any time or place, being universally regarded as dangerous to the high ground, was ardently desired for continuing to hold them in bondage. Mr. Garrison saw this state of things with dismay, and it became clear to him that the apathy which tended to fasten slavery permanently upon the country as an incurable evil could be broken only by heroic measures. The rights of the slaves and the duties of the masters, as measured by sound moral principles, must be unflinchingly affirmed and insisted upon. Slavery being wrong, every slave had a right to instant freedom, and therefore immediate emancipation was the duty of the masters and of the nation. What was in itself right was dangerous to society, but must be safe for all concerned: and therefore there could be no other than selfish reasons for continuing slavery for a single day. In joining Lundy, Garrison at once took high ground, and never afterward showed any excitement throughout the country. His denunciations of the domestic slave-trade, then rife in Baltimore, subjected him to the penalties of Maryland law, and he was thrust into jail. When released upon the payment of his fine by Arthur Tappan, of New York, he immediately resumed the work of agitation by means of popular lectures, and on 1 Jan., 1831, founded "The Liberator," a weekly journal, in Boston, which he continued for thirty-five years, until slavery was finally abolished. It was small at first, but after a few years was enlarged to the usual size of the newspapers of that day. The spirit of the paper was indicated by this announcement in the first number:—"I am aware that many object to the severity of my language, but is there not cause for severity? I will be as harsh as truth, and as uncompromising as justice. On this subject I do not wish to think, or speak, or write with moderation. No! no! Tell a man whose house is on fire to give a moderate alarm; tell him moderately to rescue his wife from the hands of the ravisher; tell the mother to gradually extricate her babe from the fire into which it has fallen: but urge me not to use moderation in a cause like the present. I am in earnest—I will not equivocate—I will not excite—I will not retreat a single inch—and I will be heard." It was a purely moral and pacific warfare that he avowed. No appeal was made to the passions of the slaves, but to the consciences of the masters, and especially of the citizens of the free states, involved by the constitution in the guilt of slavery. But he was charged with a design to promote slave insurrections, and held up to public scorn as a fanatic and impracticable, and the destruction of immediatist justified itself by its results. In 1832 the first society under this dispensation was organized in Boston; within the next two years the American anti-slavery society was formed in Philadelphia, upon a platform of principles formulated by Mr. Garrison; and from this time the movement, in spite of powerful efforts to crush it, grew with great rapidity. Governors of states hinted that the societies were illegal, and judges affirmed that the agitators were liable to arrest as criminals under the common law. Mr. Garrison constantly contended to the settled conclusion that slavery was interdicted by the constitution, and all discussion of the subject a menace to the Union. The emancipation of slaves in any considerable numbers, at any time or place, being universally regarded as dangerous to the high ground, was ardently desired for continuing to hold them in bondage. Mr. Garrison saw this state of things with dismay, and it became clear to him that the apathy which tended to fasten slavery permanently upon the country as an incurable evil could be broken only by heroic measures. The rights of the slaves and the duties of the masters, as measured by sound moral principles, must be unflinchingly affirmed and insisted upon. Slavery being wrong, every slave had a right to instant freedom, and therefore immediate emancipation was the duty of the masters and of the nation. What was in itself right was dangerous to society, but must be safe for all concerned: and therefore there could be no other than selfish reasons for continuing slavery for a single day. In joining Lundy, Garrison at once took high ground, and never afterward showed any excitement throughout the country. His denunciations of the domestic slave-trade, then rife in Baltimore, subjected him to the penalties of Maryland law, and he was thrust into jail. When released upon the payment of his fine by Arthur Tappan, of New York, he immediately resumed the work of agitation by means of popular lectures, and on 1 Jan., 1831, founded "The Liberator," a weekly journal, in Boston, which he continued for thirty-five years, until slavery was finally abolished. It was small at first, but after a few years was enlarged to the usual size of the newspapers of that day. The spirit of the paper was indicated by this announcement in the first number:—"I am aware that many object to the severity of my language, but is there not cause for severity? I will be as harsh as truth, and as uncompromising as justice. On this subject I do not wish to think, or speak, or write with moderation. No! no! Tell a man whose house is on fire to give a moderate alarm; tell him moderately to rescue his wife from the hands of the ravisher; tell the mother to gradually extricate her babe from the fire into which it has fallen: but urge me not to use moderation in a cause like the present. I am in earnest—I will not equivocate—I will not excite—I will not retreat a single inch—and I will be heard." It was a purely moral and pacific warfare that he avowed. No appeal was made to the passions of the slaves, but to the consciences of the masters, and especially of the citizens of the free states, involved by the constitution in the guilt of slavery. But he was charged with a design to promote slave insurrections, and held up to public scorn as a fanatic and impracticable, and the destruction of immediatist justified itself by its results. In 1832 the first society under this dispensation was organized in Boston; within the next two years the American anti-slavery society was formed in Philadelphia, upon a platform of principles formulated by Mr. Garrison; and
warm, their agreements were broad and deep enough to insure mutual respect and no inconsiderable degree of co-operation. The political anti-sla

ㆍ anti-slavery agitation as a means for the regeneration of public sentiment, and for keeping their own party up to its work; and the agitators bore glad witness to the sincerity of men who, though they could not see their way clear to a repudiation of the old system, yet maltreated it and thought they could under it to battle the designs of the slave-power.

Thousands of the political abolitionists made regular and liberal contributions to sustain the work of moral agitation, and the agitators rejoiced in every display of courage on the part of their voting friends, and in whatever good they could accomplish. The civil war brought the sincere opponents of slavery, of whatever class, into more fraternal relations. Mr. Garrison was quick to see that the pro-slavery Union was destroyed by the first gun fired at Sumter and could never be restored. Therefrom he and his associates labored to induce the government to place the war openly and avowedly on an anti-slavery basis, and to bend all its efforts to the establishment of a new Union from which slavery should be forever excluded. He thus had the fullest opportunity to appeal to the most enlightened and earnest leaders and members of the Republican party, and on 1 Jan., 1863, their united labors were crowned with success. President Lincoln's proclamation of freedom to the slaves was a complete vindication of the doctrine of immediate and unconditional emancipation; few the conditions of reconstruction gave the country a new constitution and a new Union, so far as slavery was concerned. When the contest was over, the leaders of the Republican party united with Mr. Garrison's immediate associates in raising for him the sum of $80,000, as a token of their grateful appreciation of his long and faithful service; and after his death the city of Boston accepted and erected a bronze statue to his memory. During the struggle in which he took so prominent a part he made two visits to England, where he received with many marks of distinction by the abolitionists of that country, as the acknowledged founder of the anti-slavery movement in the United States. The popular estimate of his character and career is doubtless expressed in the words of Mr. A. J. Thomas of Massachusetts: "The generation which immediately preceded ours regarded him only as a wild enthusiast, a fanatic, or a public enemy. The present generation sees in him the bold and honest reformer, the man of original, self-poised, heroic will, inspired by a vision of universal justice, made actual in the practice of nations; who, daring to attack without reserve the worst and most powerful oppression of his country and his time, has outlived the giant wrong he assailed, and has triumphed over the sophistries by which it was maintained.

For a time the British legislature, b. in Dublin, Ireland, in 1805; d. in Savannah, Ga., 20 Sept., 1854. He received both his classical and theological training at St. Mary's college, Emmetsburg, and was ordained priest by Bishop Connell in Philadelphia, where he had the repute of the most popular of the clergyug-ear assistant to Father (afterward Archibishop) Hughes at St. John's church, Philadelphia, and succeeded him as pastor after his nomination to be coadjutor-bishop of New York. In 1845 he was appointed vicar-general and aided the bishop in the yellow fever epidemic of 1847. He died the corner-stone of several churches while with Bishop Kenrick. On the erection of the new see of Savannah, in 1844, Dr. Gartland was nominated its first bishop, but, owing to the Roman revolution and the flight of Pius IX., the pontifical briefs for his consecration did not reach Baltimore until 9 Aug., 1850. He was consecrated bishop at St. John's church, Philadelphia, on 10 Sept., by Archbishop Eccleson. Although the resources of the new diocese were very limited, he at once entered strenuously on the work before him. He visited every part of his see repeatedly and enlarged the cathedral of St. John the Baptist, which he re-dedicated, 26 June, 1853. He erected three new churches, created as many missions, increased the number of his clergy, and established numerous societies and schools. He also established a seminary, with which he endowed his diocese were the Orphan Asylum for boys established in Savannah, and the Society of Our Lady Help of Christians. He also established day-schools and Christian doctrine-schools in various places. When Savannah was desolated by yellow fever in 1854, he went from house to house administering the sacraments. At last he was attacked by the disease, and conveyed to the house of a friend, who cared for him until his death. Bishop Gartland travelled extensively in the northern states the year after his consecration, and visited his native country in the interests of his diocese. He also took part in the deliberations of the eighth council of Baltimore.

GARY, George, clergyman, b. in Middlefield, Otsego co., N. Y., 8 Dec., 1788; d. 23 March, 1853. He entered the New England Conference of the Methodist Episcopal church in 1809, in 1818 was made presiding elder, in 1823 was conference missionary, and in 1834 a missionary to the Oneida Indians. In 1836 he was transferred to the Black River conference, and in 1844 was appointed missionary superintendent of Massachusetts. In 1845 he went there for four years, and on his return preached until 1854, when failing health forced him to retire from active ministerial labors. He was an eloquent preacher and did much to advance the religious and educational interests of the church.

GARZA, Lazaro de la (gar-tha), Mexican B. C. bishop, b. in Pilón, Nueva Leon, 17 Dec., 1785; d. in Barcelona, Spain, 11 March, 1862. He studied law at the university, and was admitted to the bar in 1810, but in 1815 was ordained as a priest. He became successively vicar of the seminary, rector of Tepoztlán, rector of the canonical law at the seminary, and rector of the Church of the Holy Shrine in the capital. In 1819 he had taken the degree of doctor in canonical law, and in 1830 doctor of common law in the university of Caracas. In 1837 he was appointed a canon of Sonora, and was immediately established as a seminary there. He also began to build a cathedral and endowed many other churches with paintings, images, and vestments. He was confirmed archbishop of Mexico in 1830, and then devoted most of his time to the interests of charity. On the publication of the decree of 25 June, 1856, secularizing the church property, Gar
GASCA

attacked the government violently, and openly favored the reactionary party under Miramon.

When the liberal party triumphed, Garza, together with his followers, was sent into exile in January, 1860, and fixed his residence in Havana. In 1861 he was called to Rome by Pope Pius IX., but died on his way thither.

GASCA, Pedro de la, Spanish bishop, b. in Piasencia, Spain, in June, 1483; d. in Siguenza, 13 Nov., 1567. He studied at the University of Alcalá, and after leaving college became noted for his knowledge of men and affairs and for an adroit, subtle intellect. In 1542 he was employed by Charles V. in negotiations with the pope and with Henry VIII., requiring great diplomatic skill. When Gonzalo Pizarro, brother of the conqueror, attempted to have himself crowned king of Peru, the emperor, who after a ruinous war was unable to send an army against the rebel leader, commissioned Gasca to restore peace, naming him president of the royal audience of Lima with unlimited powers to punish and pardon. The latter embarked in May, 1546, without troops or money, and accompanied only by two Dominican priests and a few servants. He landed at Panama, where Pizarro's fleet was stationed, and represented himself as a messenger of peace, charged solely with the task of restoring justice, and not with punishing. At the same time he announced that a fleet of 40 sail, having 15,000 men on board, was to leave the harbor of Seville in June, which would quicklv restore peace in Peru. If he did not obtain that result by negotiation and justice, his address and eloquence, combined with his age and the simplicity of his manners, gained him the affection of the officers, whom he detached from Pizarro, and he was soon master of the whole fleet. Gonzalo still refused to submit, and fled secretly to Cuzco, where he had left the flower of his troops. While Gasca, followed by nearly the whole fleet of Gonzalo, landed at Tumbez in 1547. Here he issued a proclamation announcing the mission with which he was charged by the emperor, and inviting all good citizens to unite their efforts with his, in order to restore tranquility and justice. Under his proclamation he granted a general amnesty to all deserters, and promised rewards to those who would arm in defence of the royal cause. By these prudent arrangements he saw himself soon at the head of a respectable army, which he exercised himself, and with which he marched to the city of Lima. By 1549 he had brought the territory of Pizarro with a strong force encamped on the plain of Xauhijagana, to bar his passage. But Gasca, instead of risking a battle, began to tamper with the principal officers of Pizarro, and won them over by promises and threats. The two armies met in the valley of Sacahuaman, 9 April, 1548, when most of the officers and soldiers of the rebel leader deserted his banner and made their submission to the president, who remained master of the field without having struck a blow. After punishing a few of the leaders of the revolt with death, Gasca proved himself as good an administrator as he was an able politician. He removed the crowd of adventurers that filled Peru from the country, distributed rewards to the royalists, and pardoned the least guilty among the rebels. He represented by his authority and the collection of the public revenues, while at the same time he issued several regulations forbidding oppression of the Indians. He then surrendered all his powers to the royal audience, and returned to Spain in 1548. On his arrival he was made bishop of Piasencia by Charles V., and in 1561 promoted by Philip II. to the bishopric of Siguenza.

GASTINE

GASPARD, Antonio Xiu (gas-par'), Maya Indian author (whose original name was Cuf Xi), b. in Yucatan about 1541; d. there in the beginning of the 17th century. He was a famous priest Kin-Chi, the grandson of Tutul Xiu, an Indian king, who was an ally of the Spaniards, and was educated by the missionaries accompanying an expedition against the hostile Cacomes, under the name of Antonio Gaspard. Young Gaspard translated to his people the Latin Bible into Maya, and was very useful to the conquerors as interpreter. He was appointed public translator by royal order, and did much to cultivate knowledge among his native people. In his old age he suffered from poverty and neglect, and by a royal decree of 6 Sept., 1598, was granted a pension in consideration of the services he had rendered to the Spaniards. He wrote "Vocabulario de la lengua Maya," which has been lost, and probably no copy exists now. It is cited by Pimentel in his "Cuaderno descriptivo y comparativo de las lenguas indigenas de Mexico," and by many others. He also published a "Relación Histórica sobre las Costumbres de los Indios" (1582).

GASPE, Philip Aubert de, Canadian author, b. in Quebec, 30 Oct., 1786; d. there, 29 Jan., 1871. He was educated in the seminary of Quebec, studied law, and, after practicing his profession for three years, became sheriff. But he neglected his duties, and his generosity to friends involved him in difficulties. Those for whom he had sacrificed himself abandoned him in adversity, and he was imprisoned four years for debt. In 1820 he retired to his domain of Saint-Jean Port-Joli. His "Anciens Canadiens" (1862) was, perhaps, the most popular book ever published in Canada. An English translation, by Mrs. Pennie, was published in England. This and his "Mémoires" (1866) deal with the traditions and folklore of Canada.

GASPE, Philip Ignatius, soldier, b. in Canada, 5 April, 1714; d. there, 19 June, 1787. He entered the army in 1727, and in 1755 served under De Noyelle in the campaign against the Foxes. He followed the Baron de Longueil in 1739 in his expedition against the Nebras, and destroyed the banks of the Mississippi, and on his return stopped at Michilimackinac, where De Vrcheres commanded. He remained there three years, making frequent raids on the English colony. He suggested to Col. Villiers the possibility of capturing Grand-Pré. In 1758 he built a fort on the river St. John, which he commanded for more than two years. He was present at the attack on Port Necessity, where Washington was defeated, and was commended by the American militia at the battle of Fort Carillon, in which 3,056 Frenchmen were engaged with about 15,000 English and provincials, and contributed largely to the success of the French in this battle. After the capture of Quebec by the English in 1760 he commanded the grenadiers under Levis. He received the cross of St. Louis in March, 1781, and the rest of his life was passed on his estate of St. Jean Port-Joli.

GASTINE, Clevege, West Indian reformer, b. in Fort de France, Martinique, in 1793; d. in Port au Prince, Hayti, 12 June, 1833. He was of a wealthy family, and from early childhood was impressed by his connection with the colored race. In 1808 he was sent to New Orleans to receive his education, and in 1809 came to Philadelphia to study law. A pamphlet, which he published there regarding the emancipation of the negroes, gave rise to some attacks on him, and when in 1811 he spoke at a public meeting in favor of equality between blacks and whites, he was in dan-
GASTON

GATES

ner of being lynched, and fled to Paris. He escaped conscription there in 1814 as an American citizen, and in 1815 began the publication of the paper "L'ami du noir." He was condemned several times to fines and imprisonment for offensive articles, and, when he published his "Lettre au roi sur l'indépendance de la république d'Haïti," and the abolition of the esclavage dans les colonies françaises" and "De la nécessité de faire un traité de commerce avec l'Haïti" (Paris, 1821), the government took advantage of Gastine's violent personal attacks to confiscate the work and banish the author. He went to Hayti in 1821, and was enthusiastically received on his arrival at Port au Prince by the public and President Boyer, who appointed him secretary of foreign relations, and granted him a yearly pension of 5,000 francs. By public subscription a magnificent property at Aux Cayes was presented to Gastine, but he only enjoyed it a few months. He published, besides the two works already mentioned, "Histoire de la république d'Haïti, l'esclavage et le colon" (Paris, 1819); "L'Esclavage aux États-Unis" (1819); and "Histoire de l'esclavage dans la Louisiane" (1830).

GASTON, William, jurist, b. in Newbern, N. C., 19 Sept., 1778; d. in Raleigh, 23 Jan., 1844. He was the son of Alexander Gaston, an eminent physician of Huguenot descent, who on 20 Aug., 1781, was murdered by the Tories in the presence of his wife and children. The son was educated at Georgetown, D. C., college, and at Princeton, where he was graduated in 1796. He studied law at Newbern, was admitted to the bar in 1799, and soon attained distinction in his profession. In 1799 he was elected to the state senate from Craven county, and in 1800 to the house of delegates. In 1813 he was chosen to preside. He was a member of congress from 1813 till 1815. His speech in opposition to the loan bill, which proposed to place $25,000,000 at the president's disposal for the conquest of Canada during the war with Great Britain, was a model of eloquence and was widely read and greatly admired. He was judge of the supreme court of North Carolina from 1834 till his death, and some of the best statutes of that state, as well as its judicial organization, are his work. In 1835 he assisted the convention in amending the state constitution, and suggested and elaborated nearly all the reforms in it. He spoke and voted against the proposition to deprive free colored men of the franchise. He was offered, but declined the United States senatorship in 1840.

GASTON, William, statesman, b. in South Killingly, Conn., 3 Oct., 1820. He is of Huguenot ancestry, and is descended from John Gaston, who settled in New England about 1730. He was educated at Brooklyn and Plainfield academies, and at Brown, where he graduated in 1840. He studied law and began practice in Roxbury, Mass., in 1846, was city solicitor from 1856 till 1860, and mayor in 1861-2. He was a member of the Massachusetts legislature in 1853-'4 and '6, and of the state senate in 1868. He was mayor of Boston, Mass., in 1871-'2, and was elected governor of Massachusetts in 1873, being the only Democratic that has enjoyed that honor in many years. On retiring from the gubernatorial chair, he resumed his professional labors in Boston.

GATES, Horatio, soldier, b. in Malden, Essex co., England, in 1729; d. in New York city, 10 April, 1806. The story that he was a natural son of Sir Robert Walpole is without foundation. His parents were the butler and the housekeeper of the Duke of Leedle. Horace Walpole, himself a mere lad, who chanced at the time to be visiting that nobleman, got habituatedly acted as his god-father. He entered the army while a youth, and served in this country in command of the king's New York independent company. Early in 1735 he was stationed at Halifax, under the protection of the Hon. Edward Cornwallis, at that time governor of Nova Scotia, uncle of Lieut.-Gen. Lord Cornwallis, he rose rapidly to the rank of major. Accompanying Braddock on his unfortunate expedition, he was shot through the body at the slaughter of the Monongahela, and for a long time was disabled. In July, 1760, he was brigade-major under Monckton at Fort Pitt, and in 1762 was with that general, as an aide, at the capture of Martinique, rendering effective service and establishing a reputation for military ability. At the close of the war he bought an estate in Berkeley county, Va., where he remained, quietly cultivating his land, until the beginning of the Revolution caused him to offer his sword to Congress; and in July, 1775, he received from that body the appointment of adjutant-general, with the rank of brigadier. In the following year he was appointed to the command of that portion of the northern army which had been successively commanded in Canada by Montgomery, Arnold, Wooster, Thomas, and Sullivan. This step put Gates over Sullivan, his senior in rank, much to the disgust of that officer; and it marked the beginning of a series of intrigues by which, with the aid chiefly of the New England delegates in congress, Gates was pushed into higher places, at first superseding Schuyler and afterward attempting to supersede Washington. Gates's present command was over "the northern army in Canada," with headquarters at Ticonderoga. When he reached that fortress he found there was no longer any northern army in Canada, because it had retreated into New York. He then set up a claim to the command of this portion of the northern army independently of Schuyler, who was commander-in-chief of the northern department, with headquarters at Albany. The matter being referred to congress, a discussion ensued, as the result of which Gates was instructed...
to consider himself subordinate to Schuyler. The scheme for superseding the latter general only slumbered, however, and in the summer of 1777 it was carried out in the midst of the panic produced by the rapid advance of Burgoyne. On 2 Aug., Gates was appointed to command the northern department. 'He has been suspected of a conceited and untruthful mind, that is strengthened by his conduct during the battle of 7 Oct., 1777 (see Burgoyne, John), for while Burgoyne was in the thickest of the fight, receiving three bullets through his clothes, Gates, two miles away, was looking forward to a possible retreat. Scarcely had the action begun when, by his command, the baggage-trains were loaded, and teamsters placed at the horses' heads, in readiness to move at a moment's notice, Gates ordering them to move on or halt, alternately, as the news from the battle-field was favorable or adverse. Indeed, the same inaccuracy that had so often been displayed by Gates, during his unfortunate southern campaign, was manifested from the time of his assuming the command of the northern army until the surrender. The laurels won by him should really have been born by Schuyler and Arnold. Not only had his conduct been disgraceful, but he did not own the right to command the British troops. The defeat at Bennington before the arrival of Gates, but the overthrow of St. Leger at Fort Stanwix had derailed the plans of the British general, while safely had been restored to the western frontier, and the panic thus caused had subsided. After the surrender, the bearing of Gates toward the commander-in-chief was far from respectful. He did not even write to the latter on that occasion; nor was it until the second day of November that he deigned to communicate with Washington. His displeasure was confined to the commander of the army. His falsehoods in a series of intriguing letters having been exposed by Washington, he fell into some discredit, and in the spring of 1778 it became evident that his ambitious schemes had miscarried. In the course of this affair he became involved in a quarrel with Wilkinson, his former adjutant, which led to a duel, the details of which may be found in the "Boston Evening Post and General Advertiser" for 17 Oct., 1778. He retired from active service, and lived for some time on his estate in Virginia, until he was appointed, 13 June, 1780, to the command of the army in North Carolina designed to check the progress of Lord Cornwallis. In the battle near Camden, S. C., 16 Aug., he was defeated, and his army nearly annihilated. He was soon afterward superseded in command, and a court of inquiry was appointed to investigate his military conduct, and he was not acquitted or reinstated until 1782; so that the battle of Camden virtually ended his military career. At the close of the war he retired to his estate in Virginia, where he lived until 1790, when he removed by New York city. In 1800 he was elected to the state legislature, but for political reasons resigned soon after taking his seat. His death occurred, after a long illness, at his house, now the corner of 22d street and 2d avenue, in Bloomingdale. Gates was a man of great plausibility and address, of a handsome person and fair education, and a great lion in society. Though having many faults, the chief of which was an overweening confidence in his own ability combined with arrogance and untruthfulness, he was also some noble traits. Before removing to New York from Virginia, he emancipated his slaves, providing for such of them as could not take care of themselves. In his domestic relations he was an affectionate husband and father, and, during the last years of his life, a sincere Christian. He married Mary, only child of James Vanbrugh, of Liverpool, who, at her father's death, before the Revolutionary war, emigrated to this country, bringing with her $450,000. In the struggle for independence Mrs. Gates freely expended nearly all of her fortune in a lavish hospitality upon her husband's companions in arms, especially those that were in indigent circumstances; and many of the Revolutionary heroes were participants in her bounty, particularly Thaddeus Kosciusko, who, when wounded, lay six months at her house, tenderly nursed by herself and her husband. Mrs. Gates, who survived her husband, left the residue of her fortune ($90,000) to several relatives, whose descendants are still living in New York and Philadelphia. The Saratoga monument, caused to be built, is shown in the accompanying illustration, was erected to commemorate the surrender of Gen. Burgoyne to Gen. Gates, and is in the village of Schuylerville, and the monument itself is 155 feet in height, and stands within the lines of Burgoyne's intrenchments, on a bluff 350 feet above the Hudson river and looking over the surrender ground: companions in arms. A staircase of bronze leads from the base to the top, whence can be seen the entire region between Lake George, the Green mountains, and the Catskill. On the front faces of three sides of the monument is a niche containing heroic statues of Gen. Gates, Schuyler, and Morgan, while the front is left vacant, with the name of Arnold inscribed underneath. Within the monument, and lining its two stories, are alto rilievo decorations in bronze, representing historical and allegorical scenes connected with the campaign of Burgoyne. The corner-stone of this structure was laid on 17 Oct., 1877, when poems and addresses were delivered by Horatio Seymour, George William Curtis, James Grant Wilson, Alfred B. Street, and William L. Stone. See Stone's "Campaign of Lieut.-Gen. Burgoyne" (Albany, 1877), and Bancroft's "History of the United States" (6 vols., New York, 1884).
several years. He was elected to congress in 1839, and re-elected in 1840. On the expiration of his congressional service, he removed to Warsaw, and continued his law-practice. On account of his hostility to slavery, a reward of $500 was offered by a southern planter for his "delivery in Savannah, dead or alive." In 1846 he was the Free-soil candidate for lieutenant-governor of New York, but was defeated. He drew up the protest of the Whig members of congress in 1843 against the annexation of Texas, erroneously attributed in several histories to Mr. Adam's pen; and the correspondence between Mr. Gates and ex-President John Quincy Adams, who signed the protest, is still in the possession of his son.—His son, Merrill Edwards, educator, b. in Warsaw, N. Y., 6 April, 1848, was graduated at the University of Rochester in 1870. He became principal of the Albany academy in 1870, president of Rutgers college (shown in the engraving), New Brunswick, N. J., in 1882, and in 1884 a member of the U. S. board of Indian commissioners. He has lectured in the cities of New Jersey and New York on educational topics. The degree of Ph. D. was conferred upon him by the University of New York in 1880, and LL. D. by Princeton in 1882.

GATES, Sir Thomas, governor of Virginia, lived in the 17th century. The second charter of Virginia, which bears the date of 23 May, 1609, instructed the colonization of that land to a numerous body of adventurers. Among those, who were to execute Raleigh's design, were Robert Cecil, earl of Salisbury, Sir Francis Bacon, Capt. John Smith, Sir Oliver Cromwell, uncle to the protector, and others, besides a number of public companies of London, which represented the nobility, army, bar, and industry of England. This new charter transferred to the company the power that had before been reserved for the king and contained a command that allegiance and obedience should be rendered to such governors as should be appointed by the council in England. The governors were Sir Thomas West, Lord De la Warr, captain-general of Virginia; Sir Thomas Gates, lieutenant-general; Sir George Somers, admiral; Capt. Newport, vice-admiral; Capt. Thomas Dale, high-marshal; and Sir Ferdinand Wainman, general of horse. Colonization had many such. Most of the state that large sums of money were freely contributed, and so many persons desired to be transported that nine ships, with more than five hundred emigrants, were despatched in charge of Capt. Newport, Sir George Somers, and Sir Thomas Gates. They sailed from England in May, 1620, but only seven ships arrived in Virginia. The ship of the three commissioners, the "Sea Venture," was separated from the rest of the fleet by a hurricane, and stranded on the rocks of Bermuda, a small ketch also perished. Sir Thomas Gates and his passengers remained nine months in Bermuda, where they constructed two vessels, partly from the wreck of the "Sea Venture" and partly from cedars, which they felled. On reaching Virginia, on 24 May, 1610, they found the colony in a state of misery and desolation. A few months later the old and new colonists, no longer controlled by a recognized authority, had abandoned themselves to indolence and vice. Famine had reduced their numbers to sixty, and only four pinnace remained in the river. The settlers desired to burn the town, but were prevented by Gates, who resolved to sail for Newfoundland with the remaining colonists, in order to seek a passage for England. As they descended the river, they met Lord De la Warr, bringing colonists and supplies, 9 June, 1610, and returned with him to Jamestown. The council were eager for some immediate profit, and, in order to give them a full account of the state of affairs, Lord De la Warr sent Sir Thomas Gates to England. Becoming discouraged by his report, many of the organization withdrew their aid, and the return of Lord De la Warr confirmed their suspicions. Sir Thomas Gates succeeded, however, in enlisting new recruits, and in August, 1611, arrived in Virginia with six ships, three hundred men, one hundred cattle, and all manner of provisions. He assumed the office of governor, and endeavored to make religion the foundation of law and order. During his rule, new settlements were made in Henrico (1611), and the third patent for Virginia was signed (March, 1612), which granted to the share-holders in England the Bermudas and all islands within three hundred leagues of the Virginia shore. This acquisition was subsequently transferred to a separate company. Sir Thomas Gates returned to England in 1614, and endeavored to revive and strengthen the fallen hopes of the London company of share-holders. Sir Thomas Dale succeeded him as governor of Virginia. It is supposed that the wreck of the "Sea Venture," furnished Shakespeare the groundwork for his comedy of "The Tempest."
GATLING, Richard Jordan, inventor, b. in Hertford county, N. C., 12 Sept., 1818. While yet a boy he assisted his father in perfecting a machine for sowing cotton-seed, and another for thinning cotton-plants. His first invention was a screw for propelling water-craft, but, on applying for letters-patent, he found that he had been anticipated by Ericsson. He subsequently invented and patented a machine for sowing rice, and, on his removal to St. Louis in 1844, he adapted it to sowing wheat in drills. He was called into the service of the Union, and in 1863 he issued his patents on a revolving battery gun. The first of these was made at Indianapolis in 1862. Twelve were subsequently manufactured and used by Gen. Butler on the James river, Va. In 1865 Dr. Gatling further improved his invention, and in 1869 he was appointed a special agent at Washington and at Fortress Monroe, the arm was adopted into the U. S. service. It is also made in Austria and in England, and is used by several European governments. As now perfected, the gun is made of various calibres and weights, for different kinds of service in land and sea. It is mounted on a revolving platform, and when loaded rifled barrels, grouped around and revolving about a common axis, with which they lie parallel. These component barrels are loaded and fired while revolving, the empty cartridge shells being ejected in continuous succession. Each barrel is fired only once in a revolution, so that a ten-barrel gun fires ten times in one revolution of the group of barrels. The mode of firing is simple. One man places one end of a feed-case full of cartridges into a hopper at the top of the gun, while another turns a crank by which the gun is revolved. As soon as the supply of cartridges in one feed-case is exhausted, another feed-case may be substituted without interrupting the revolution or the succession of discharges. The usual number of barrels composing the gun is ten. The invention is now protected by five patents, which cover successive improvements. The nature of these may be inferred from the statement that, whereas the original Gatling gun only fired from 250 to 300 shots per minute, those now made discharge 1,200 shots, as many as 900 having frequently been fired in two and one-half minutes. Dr. Gatling now (1887) resides in Hartford, Conn., but has spent much of his time abroad, exhibiting his invention.

GATSCHET, Albert Samuel, ethnologist, b. in St. Beatenberg, Berne, Switzerland, 3 Oct., 1832. He studied at Neuchâtel in 1845-5, in Berne in 1846-7, and in the universities of Bonn and Berlin in 1852-8. His attention was early directed to philological researches, and in 1865 he began the publication of a series of brief monographs on the local etymology of his own country, entitled "Ortsymboles und Forschungen aus der Schweiz" (1865-7). In 1867 he was appointed professor of the northern frontier during the Canada border disturbances. He was engaged again in Florida against the Seminole Indians in 1840. In 1843 he served in Texas, and in 1845 in the war with Mexico, being engaged on the Rio Grande, and Rosaca de la Palma, 9 May, 1846, where he was wounded and brevetted colonel. He was on recruiting service in 1846, and in the following year returned to his regiment, being engaged in various important battles of Mexico. In 1848 he was in garrison at Jefferson barracks, Mo., and the following year served on frontier duty in Texas.

GAULT, Matthew Hamilton, Canadian capitalist, b. in Strabane, Ireland, in July, 1822; d. in Montreal, 1 June, 1887. He was educated at home, and in 1846 went to Canada and engaged in the insurance business. Subsequently he became general resident manager of the British American assurance company for the province of Quebec, director of the Richelieu and Ontario navigation company, and interested in many other industrial and financial enterprises. He was the founder of the Irish-Protestant benevolent society of Montreal, and took an active interest for many years in the Montreal garrison artillery, from which he retired in 1886, retaining his rank as an officer. He was elected a member of the Dominion parliament, for Montreal west, in 1872, and re-elected in 1882. He was a Conservative, and favored the protection of native industries.

GAVIT, John E., engraver, b. in New York, 29 Oct., 1817; d. in Stockbridge, Mass., 25 Aug., 1874. At an early age he went to Albany, where he engaged in sheet-metal work. As an engraver of bank-notes his attention was directed to the study of finance and banking in their relations to engraving, and by his inventive and mechanical talent he soon made improvements in his work. In 1855 he assisted in organizing the American bank-note company in New York, and in 1858 united his business with that enterprise.
GAY, Claude, French naturalist, b. in Draisguignan, 18 March, 1800; d. in Paris, 8 April, 1863. In 1822 he went to Paris to assist at the course of lectures in the museum, in order to study zoology and prepare himself for voyages that he projected. After a preliminary excursion to Greece and Asia Minor, he went to Chili for the flora of South America, arriving at Valparaíso in March, 1828. The results of this expedition were so important that the Chilian government commissioned him, in 1829, to take astronomical observations and prepare a scientific survey of the republic. But he was granted free permission by his government and the island of Juan Fernández and the archipelago of Chiloé. He made also the most detailed bibliographic investigations, taking copies of every important document, and soon had gathered an enormous collection of historical facts and their confirmation. In 1830, the government bestowed the highest honors upon him, and in 1841 congress appropriated the means to publish his work. He also explored Peru and the course of the Ucayali river, and visited Buenos Ayres and Rio Janeiro, and in 1843 returned to Paris. He carried on his work: "Histoire Physique et Politique de Chili" (Paris and Santiago, 1843-51, 24 vols., with an atlas in 2 vols.). In May, 1836, Gay was elected a member of the Academy of sciences in the botanical section. He made a journey through Russia and Tartary in 1839, and after the end of the year, was sent by the academy to study the mining system of the United States, returning in 1860. He published, besides his great work mentioned above, "Considérations sur les Mines de Mercure de Andacailla et llapel sen sa position Geologique" (Valparaíso, 1837; Paris, 1841); "Noticias sobre las islas de Juan Fernandez" (Valparaíso, 1840); "Origine de la Pomme de terre" (Paris, 1851; a translation of an article in "La Araucana" of Santiago in 1834); "Tribe variation of the agave Manhattan in the parties Ouest de l'Amérique" (1854); "Carte generale du Chili" (1853); "Considérations sur les Mines du Perou, comparées aux mines du Chili" (1855); "Notes sur le Bresil, Buenos Ayres et Rio de Janeiro" (1860); and "Rapport à l'académie des sciences sur les mines des Etats-Unis" (1861).

GAY, Sydney Howard, author, b. in Dedham, Mass., 26 Aug., 1806; d. in Hingham, Mass., in 1875. He was graduated at Harvard in 1814, taught school at Hadley and Ipswich, at the same time studying theology, and in 1818 became pastor of the church at Hingham, Mass., where he remained till his death, preaching in the same pulpit within three months of seventy years. He was a man of great learning, and celebrated for his wit. His theology was liberal, and he is regarded by some as the father of American Unitarianism. Ex-President John Adams said, on the first distinctive announcement of Unitarian principles in this country, that he had heard the doctrine from Dr. Gay long before. Savage speaks of him as "the honored patriarch of our New England pulpit in that age." He was a Tory during the Revolution, and suffered some persecution at the hands of his own parishioners. He married Jerusha Bradford, a granddaughter of Gov. Bradford, of Plymouth colony, and by her had a large family. Dr. Gay published many sermons, among them one delivered on his eighty-fifth birthday, from the text "Lo, I am this day fourscore and five years old," which became widely known under the title of "The Old Man's Calendar," and went through several editions both here and in England, being also translated into some of the continental languages of Europe.

-His son, Jotham, b. in Hingham, Mass., in 1758; d. there in 1822, was a colonel in the Continental army, served through the old French war, and was part of the time governor of Fort Edward in Nova Scotia. At the beginning of the Revolution he left the army, being a Tory, and was a refugee in Nova Scotia during the war. He resided for the rest of his life in New Hampshire, and was a prominent citizen. Martin, physician, son of Ebenezer Gay, of Hingham, b. in Boston, Mass., in 1779; d. there, 12 Jan., 1850, was graduated at Harvard in 1803. He had a high reputation as an analytical chemist, and his frequent testimony as a witness in courts of justice, in cases of death by poisoning, marks an era in the history of medical jurisprudence in this country. Martin's brother, Sydney Howard, author, b. in Hingham, Mass., in 1814, entered Harvard at the age of fifteen, but in his junior year was obliged to give up study on account of his health. The degree of A.B. was afterward conferred upon him, but the latter year in some years, spent partly in travel, partly in a counting-house in Boston, he began the study of law in his father's office in Hingham. But he soon abandoned it from conscientious scruples concerning the oath to support the constitution of the United States; for he came to the conclusion that, if one believed slavery to be absolutely and morally wrong, there was no right to swear allegiance to a constitution that recognized it as just and legal, and required the return of fugitives from bondage. Of the "Garrisonian abolitionists," with whom he thereupon cast his lot, he says: "This handful of people, to the outside world a set of pedant fanatics, were among themselves the most charming circle of cultivated men and women that it has ever been my lot to know." In 1843 he became a lecturing
agent for the American anti-slavery society, and in 1844 editor of the "Anti-Slavery Standard," published at New York. This place he retained till 1857, when he became editorially connected with the "Tribune," of which, from 1862 till 1866, he was managing editor. Henry Wilson, afterward vice-president of the United States, said: "Mr. Gay deserved well of his country who kept the 'Tribune' afloat in spite of Greeley." Mr. Gay was managing editor of the Chicago "Tribune" from 1867 till the great fire of 1871. During the following winter he acted with the relief committee, and wrote their first public report, in the spring of 1872, of their great work of the past six months. At the same time he was the editorial staff of the New York "Evening Post." In 1874, William Cullen Bryant, being invited to join a great publishing-house in the enterprise of preparing an illustrated history of the United States, consented on condition that Mr. Gay should be its author, as he himself could not be persuaded to undertake such a work at his advanced age. Mr. Bryant wrote the preface to the first volume, while the history itself was written by Mr. Gay, with the help of several collaborators in special chapters, to whom he gave his time in spirit of Greeley.' Mr. Gay was professor of history and philosophy in Chicago College, and, from 1867 till 1873, a member of the editorial board of "The Independent," costing 50 cents a year. In 1880, he was a selectman of the city of Chicago. In 1885, he left the city for the country in the neighborhood of the North Pole, and died there in 1889.

Gay, Picard du, French explorer, lived in the 17th century. He accompanied Father Hennepin, and Michael Anoir, on a voyage up the Missouri river. They left Port-Créveceur on 29 Feb., 1680, in a small canoe, and sailed down the Illinois river. After reaching the Mississippi to become clear of floating ice, they turned northward, and on 11 April, 1680, arrived in Wisconsin, where they were surprised by a band of Indians, numbering thirty-three canoes, who captured the party and seized their goods. On the following day the calumet was smoked, the rude treatment changed for civility, and the explorers were allowed to depart. After sailing nineteen days they came in view of the cataract, and,A river with a beautiful name, "Peyton" of St. Anthony," in honor of his patron saint. Subsequently they were captured by the Sioux, but were permitted various liberties, and Hennepin and Ako went on an exploring trip of several weeks, leaving Picard du Gay in charge of the sword, pistols, and muskets. The party remained in this region for three months, when they met a party of five Frenchmen under the command of Sieur du Luth, who had arrived by way of the St. Lawrence. Hennepin, Gay, and Ako joined this party, and, after wandering among the forest for a while, returned to Canada in September, 1680.

Gayarré, Charles Étienne Arthur, historian, b. in New Orleans, La., 9 Jan., 1805. He was educated at the College of New Orleans. In 1825, the draft of a criminal code having been laid before the state legislature by Edward Livingston, Gayarré published a pamphlet opposing some of its provisions, particularly that relating to the abolition of capital punishment. He went to Philadelphia in 1836, studied law, and was admitted to the bar there in 1838, returning to New Orleans in 1839. In the same year he was elected to the legislature, and was chosen by that body to write an address complimenting the French chambers on the revolution of 1830. He was appointed deputy attorney-general of the state in 1831, and in 1833 presiding judge of the city court of New Orleans. In 1835 he was elected to the legislature, but, his impaired health prevented his taking his seat, and he went to Europe, where he remained for nearly eight years. In 1844 he again entered the state legislature, and was re-elected in 1846. He was appointed secretary of state in the latter year and again in 1849. During their term of office, in 1853 Judge Gayarré was an unsuccessful independent candidate for congress. During the civil
war he espoused the cause of the seceding states, and in 1866 delivered an address urging the arming of the slaves and their emancipation, conditioned on the recognition of the Confederacy by France and England. Since then the war has been for some time reporter of the state supreme court. His historical works comprised: "5000 Histoire de la Louisiane" (2 vols., New Orleans, 1847); "Romance of the History of Louisiana" (New York, 1849); "Louisiana, its Colonial History and Romance" (New York, 1851); "Louisiana, its History as a French Colony" (2 vols., 1851-52); and "History of the Spanish Domination in Louisiana from 1799 to 1835," published in 1856 (3 vols., 1866). He is the author of "Philip II. of Spain," a biography, with an introduction by George Bancroft (New York, 1866); "Fernando de Lemos. Truth and Fiction," a novel (Paris, 1870); and "Aubert Dubayet," sequel to the foregoing (Boston, 1882). He has also published a drama, "The School for Politics" (1854); "Dr. Bluff," a comedy in two acts, and several literary and political addresses, among which are two lectures on "The Influence of the Mechanic Arts." 

GEARY, John Henry, governor of Iowa, b. in Utica, N. Y., 7 April, 1823. He removed to Fort Snelling in 1836, and in 1843 became a citizen of Burlington, Iowa, where he has since been engaged as a merchant. He was an original member of the Republican party, and in 1855 was elected mayor of Burlington. From 1874 till 1876 he served as speaker in the general assembly of Iowa, and for two sessions was the presiding officer of the state house of representatives. He held the office of governor from 1878 till 1881 and 1885-1887. He was born in Harrisonburg, Pa., 8 Feb., 1873. His father was of Scotch-Irish descent. The son entered Jefferson college, but, on account of his father's loss of property and subsequent poverty, he was compelled to leave school and contribute toward the support of the family. After teaching he became a clerk in a commercial house in Pittsburg, and afterward studied mathematics, civil engineering, and law. He was admitted to the bar, but never practised his profession. After some employment as civil engineer in Kentucky, he was appointed assistant superintendent and engineer of the Alleghany Portage railroad. When war was declared with Mexico, in 1846, he became lieutenant-colonel of the 2d regiment of Pennsylvania volunteer infantry, and commanded his regiment at Chapultepec, where he was wounded, but resumed his command the same day at the attack on the Belen gate. For this service he was made first commander of the city of Mexico, and colonel of his regiment. He was appointed in 1849 to be first postmaster of San Francisco, with authority to establish the postal office throughout California. He was the first American alcalde of San Francisco, and a "judge of the first instance." These offices were of Mexican origin, the "alcaldes" combining the authority of sheriff and probate judge with that of mayor, and the judge of the first instance presiding over the lower courts as well as admiralty jurisdiction. Col. Geary served until the new constitution abolished these offices. In 1850 he became the first mayor of San Francisco. He took a leading part in the formation of the new constitution of California, and was chairman of the territorial Democratic committee. In 1852 he retired to his farm in Westmoreland county, Pa., and remained in private life until 1856,
when he was appointed territorial governor of Kansas, which office he held one year. He then returned to Pennsylvania, and at the beginning of the civil war raised the 28th Pennsylvania volunteers. He commanded in several engagements, and was distinguished at Bull’s Run. He was wounded. He occupied Leesburg, Va., in March, 1862, and routed Gen. Hill. On 25 April, 1862, he received the commission of brigadier-general of U. S. volunteers. He was severely wounded in the assault at Cedar Mountain, 9 Aug., 1862, and in consequence could not take part in the battle of Antietam. At the battles of Chancellorsville and Gettysburg he led the 2d division of the 12th corps. The corps to which Gen. Geary’s regiment was attached joined the Army of the Cumberland, under Gen. Hooker’s command, to aid in repairing the disaster at Chickamauga, and he took part in the battles of Wauhatchie and Lookout Mountain, in both of which he was distinguished. He commanded the 2d division of the 20th corps in Sherman’s march to the sea, and was the first to enter Savannah after its evacuation, 22 Dec., 1864. In consideration of his services at Fort Jackson he was appointed military governor of Savannah, and in 1865 he was promoted to be major-general by brevet. He was elected governor of Pennsylvania in 1866, and held this office until two weeks before his death from heart disease. At the time the commonwealth was reduced, an effort to take several millions from the sinking fund of the state bonds was prevented, a disturbance at Williamsport quelled, and a bureau of labor statistics established by the legislature, 12 April, 1872. Gen. Geary was an eminent man of culture, a man of great and discrimination, and he had a fine knowledge of the moral and economic phenomena of his time. At the close of the war he was elevated to the commission of major-general of volunteers. He was twice married; his children are active in public affairs.

Edward Batchford, b. in Westmoreland county, Pa., 14 Sept., 1845; killed in the battle of Wauhatchie, Lookout Mountain, 28 Oct., 1863, left the sophomore class in Jefferson college in 1861 to enlist as a private in the 58th Pennsylvania regiment. He was made second lieutenant of this regiment, and subsequently a lieutenant in Knapp’s battery, which post he held at the time of his death. He was engaged at Cedar Mountain, Antietam, Chancellorsville, and Gettysburg.

Geddes, George, engineer, b. in Fairmount, Onondaga co., N. Y., 14 Feb., 1809; d. in New York state, 8 Oct., 1883. He studied engineering and surveying in Middletown, Conn., and law in Skaneateles, N. Y. In 1830 he returned to his home and assumed charge of the farm. He was a member of the senate of the state of New York in 1847, and re-elected in 1850. He made an exhaustive report in favor of a railroad law that would enable persons to construct and operate railroads without special legislation, and a bill of this kind was passed in the senate in 1851. He had charge of lowering the canal of Selden, from 1852 till 1856. In 1861 he was president of the New York State Agricultural Society, and in 1865-71 superintendent of Onondaga salt springs. He was a contributor to newspapers and magazines.

Geddes, James, engineer, b. near Carlisle, Pa., 23 July, 1763; d. in Geddes, Onondaga co., N. Y., 19 Aug., 1833. He obtained a limited education while working on a farm, and in 1794 removed to Onondaga county, where the town of Geddes was named in his honor. He organized a company for the manufacture of salt in that county in 1794. He was prominent in urging the project for a canal from Lake Erie to Hudson river, and in 1806 was appointed to make the preliminary surveys of the route. He was elected a magistrate in 1800, a member of the State legislature in 1804 and 1812, an associate county judge in 1806, and judge of the county pleas in 1812. From 1818 till 1815 he represented New York in congress. In 1816 he became engineer of the Erie canal, and two years later was appointed chief engineer of the Champlain canal. He was appointed to make surveys for a canal from Lake Erie to Rochester in 1822. In 1827 he was employed to locate the Chesapeake and Ohio canal, and in 1828 he was engineer for the canals of Pennsylvania.

Geddes, James Lorraine, soldier, b. in Edinburgh, Scotland, 19 March, 1857; d. in Ames, Story co., Iowa, 21 Feb., 1897. In 1857 he was brought by his father, Capt. Alexander Geddes, to Canada. At the age of sixteen he returned to Scotland, but soon sailed for India, where, after studying for two years at the British military academy in Calcutta, he enlisted in the Royal horse artillery, serving seven years under Sir Hugh Gough, Sir Charles Napier, and Sir Colin Campbell. He passed through the Punjab campaign, was present at the battle of Kyber Pass, and ascended the Himalayas with the last-named officer in the expedition against the hill tribes. For his services he was rewarded with a medal and an additional commission. At the close of the war he returned to his home in Canada, and was commissioned colonel of a cavalry regiment; but he soon resigned from the army, emigrating to Iowa in 1867, and settled at Vinton, Benton co. At the beginning of the civil war he gave up his place as a teacher, and in August, 1861, enlisted as a private in the 8th Iowa regiment. He was rapidly promoted captain, lieutenant-colonel, and colonel, being ultimately brevetted brigadier-general in the volunteer service, 5 June, 1865. At Shiloh he was wounded and fell into the hands of the enemy remaining a prisoner until early in 1863, when he was exchanged and again saw service under Gen. Grant at Vicksburg and under Gen. Sherman at Jackson, Miss. In October, 1863, he was placed in command of a brigade and ordered to Brownsville, Texas. Subsequently he was the provost marshal of Memphis, and by his exertions the city was probably saved from capture by the Confederate Gen. Forrest. During the Mobile campaign he commanded a brigade, and to him is due the capture of Spanish Fort. The defences of that work were considered impregnable; but on one side ran a ravine, beyond which was a bluff. This vulnerable point was soon discovered by Gen. Geddes, who pushed his men up the ravine, over the bluff, and into the enemy’s works, being actually in possession before the commandant of the fort had learned the fact, or it had become known to Gen. Geddes’s superior officer. After the war he had charge of the blind-asylum at Vinton for several years, took part in the organization, and for fifteen years shared in the management of the Iowa college for agriculture at Ames, serving at different times as superintendent, professor of military tactics, treasurer, and land-agent. Gen. Geddes wrote several war-songs, which were set to music and became widely popular. Among them were “The Soldier’s Battle Prayer” and “The Stars and Stripes Forever.”

Geddes, John, governor of South Carolina, b. in Charleston, S. C. about 1773; d. there, 5 March, 1838. He was the son of a merchant, and was educated at the College of Charleston. He studied law, and was admitted to the bar in 1797. He was elected to the house of representatives of
South Carolina, and in 1810 and 1812 was chosen speaker. In 1815 he was elected governor, which office he held until 1820. During his administration he organized the first regiment of cavalry in the state, and it was known as the Charleston Riders. He was a major of the regime in 1808, and after his service as governor was made brigadier-general of militia.

GEFFRARD, EII, physician, b. in the district of Newbury, S. C., in 1789; d. in Charleston, S. C., Oct. 1, 1851. He was graduated from the college at Abbeville academy and was graduated in medicine by the examining board of the Medical society of South Carolina in 1820. He began practice in St. George's parish, Colleton district, but soon returned to Abbeville, where he formed a connection with Dr. E. S. Davis. During the winter of 1821-22 he attended lectures in the University of Pennsylvania. He went to Calhoun settlement, Abbeville district, where he continued until 1824, when he removed to Charleston, and was one of the first to remove to a degree from the Medical college in 1825. He voluntarily discharged the duties of demonstrator of anatomy, and after a year spent in the hospitals of Paris and London held this office until 1828, when he resigned it to open a private school of practical anatomy and surgery, in which he was succeeded by his first student. He lectured on anatomy and physiology in the University of Maryland, and removed to Baltimore, where he edited the "Baltimore Medical Journal" in 1833, which in 1835 was changed to the "North American Archives of Medical and Surgical Science," to which he contributed essays and editorials. He removed to Charleston in 1837 to take the chair of pathological anatomy and medical jurisprudence in the Medical college. He practised in all branches of medicine and surgery. In 1849 he held the chair of surgery, which he resigned in 1850 so that Prof. Dickson might be reinstated. He was a surgeon in the Confederate army during the civil war. When the fall of Charleston was imminent, his rare medical library was sent to Columbia, where it perished in the fire that destroyed a large part of the city. This library was invaluable in Europe, and illustrated all branches of medical literature and scientific subjects. His collection of surgical instruments and apparatus was stolen while he was absent from his home during the bombardment of the city. Several years before he had contributed essays and editorials in the college's medical and surgical ployecnic, which he revived after the war. In 1871 he resigned his chair, and was elected professor emeritus of the institutes and practices of medicine. In that year a new chair of clinical medicine was created, to which he was elected, and he gave clinical lectures for two years. His early papers, published in the "American Journal of Medical Science" (Philadelphia), include reviews and sketches in various languages.

GEDNEY, Jonathan Haight, inventor, b. in Rye, Westchester co., N. Y., 25 Feb., 1795; d. in Rye, N. Y., 7 Nov., 1875. He removed to New York, and in 1825 owned the Dry Dock saw-mill, which took fire in 1829, making so bright a light that the reflection is said to have been seen as far as New Haven, Conn. By this disaster Mr. Gedney and his partner were ruined. The former subsequently engaged in a business in mechanics, and invented the wooden eggs used in cotton gin, and a plough for digging potatoes with one or two horses. He afterward returned to Rye, and held several local offices there. In his seventy-fifth year he moved from Dock street to Brooklyn, N. Y., in nine hours. When eighty-four years old he mowed for an entire day.
unpopular in 1858, he began to be suspicious of Geffrard's popularity, and deprived him of his command. Geffrard, fearing imprisonment, escaped to Gonaives. When this became known, the people of the town rose in arms, proclaiming the deposition of Souloouque, and the republic under Geffrard's presidency, 22 Dec., 1858. Geffrard soon collected a large force, and triumphantly entered Port au Prince, 15 Jan., 1859; but he protected the flight of the fallen emperor and his court. He issued a decree, May 17, establishing upon a new era of progress. He retrenched the public expenses and reduced the taxes, especially on rural property. But on 3 Sept., 1859, the minister of the interior, Guerrier Prophete, headed a revolt. An attempt on Geffrard's life was frustrated, but one of his daughters was assassinated. He concluded treaties of commerce with France, England, and Spain. In 1861 his government became very unpopular, he being accused of subservience to Spain, for not opposing the occupation of Santo Domingo by that power, and in 1862 there was a revolt under Gen. Legros at Gonaives, and in 1864 another under Salnave in the north. In June, 1866, Salnave made a new attempt at Gonaives, and was again defeated. Geffrard now promulgated liberal laws and abolished capital punishment for political offences. 23 Nov., 1871, he entered the interior, and on 22 Feb., 1867, was succeeded by a pronunciamento in favor of Salnave at Port au Prince; and, although Geffrard put the capital in a state of defence, he soon saw that resistance was useless, and, taking refuge with his family on board the British frigate. 13 March, he went to Jamaica, where he died.

GEIGER, Emily, Revolutionary heroine, b. 1776. At the period when Gen. Greene retreated before Lord Rawdon from Ninety-Six, S. C., during the Revolutionary war, and had passed Broad river, he was anxious to deliver the message orally in case of accident. Emily set out on horseback, and met with no adventures until the second day, when she was intercepted by Lord Rawdon's scouts. Not being skilled in the art of telling falsehoods, she was suspected and placed in confinement, and an old Tory matron was sent for, that she might be searched. Emily utilized the interval by eating the letter, and, nothing suspicious being afterward found on her, she was allowed to proceed. By taking a circuitous route, she succeeded in reaching her destination and discharging her mission. In consequence, Sumter soon joined the main army at Orangeburg. Emily Geiger married a wealthy planter named Threlwick, who lived on the Congaree river, S. C.

GEIKIE, Cunningham, Scottish clergyman, b. in Edinburgh, 26 Oct., 1833. He was educated at the University of Edinburgh, and at the University of Oxford. Following his father to Canada, he became pastor of a church near Toronto, and subsequently was called to one in Halifax. In 1862 he accepted a pastorate in Sunderland, England, and in 1878 took orders in the Church of England, and has held rectories at Paris and at Barnstable, England. He is a prominent "Low church" leader, and is the author of the following among other works: "The Backwoods of Canada" (1864); "Great and Precious Promises" (1872); "Life and Words of Christ" (1873); "Old Testament Portraits" (1876); and "Hours with the Bible" (1881, et seq.). Nearly all his works have been republished in the United States. The "Life of Christ" has passed through twenty-five editions in Great Britain, and has been reproduced in four separate editions in the United States. He was ordained before he was twenty years old, although nine years younger than the age at which candidates were usually allowed to enter the ministry. Emigrating to this country in 1783, he labored for fifteen years in the Groscenhoppen and associated Lutheran churches in Pennsylvania, and in 1868 removed to New York city as the successor of Dr. Kunze, at the old Swamp church. He was absent for a time on account of failing health, but returned to New York in 1852, and remained there until his death. He possessed a powerful intellect, which had been brought under the management of the most thorough discipline. Latin and Greek were familiar to him as his native tongue. He was made D. D. by the University of Pennsylvania in 1826. His literary remains include lectures on church history and on the gospels, epistles, and portions of the Old Testament.

GELDEREN, Adolphus Van, educator, b. in Rotterdam, Holland, in 1835. He was educated in his native city, emigrated to South America, and in 1856 was appointed professor of languages in the University of Sucre, Bolivia. He afterward went to the Argentine Republic, in 1860 established in Buenos Ayres the first graded public school, and was appointed principal of the National college of Parana. In 1874, under Sarmiento's administration, a normal school was established in Buenos Ayres, and Van Gelderen was appointed principal. When in 1880 he went to the United States he was admitted into a federal district, the normal college passed also under the National government, and Van Gelderen soon made it the foremost establishment of its class in the republic. Prof. Van Gelderen speaks and writes fluently Spanish, English, Dutch, German, French, Italian, and Latin, and is proficient in Latin, Greek, and Hebrew. He has published valuable works on education, and his text-books prepared for the Argentine schools have won high praise. In 1885 he was named an officer of the French academy, and decorated with the special medal awarded to meritorious educators.
GELELEMEND, or KILL-BUCK, Delaware chief, b. in Pennsylvania in 1757; d. in Goshen, Ohio, in 1811. He was a valiant warrior and leader. He was chief counsellor of the Turkey tribe of the Delaware nation, and, after the death of Capt. White Eyes, became principal chief. He was a strenuous advocate for peace among his people during the Revolution, which drew upon him the animosity of both the United States and Great Britain. He died in 1811.

GEMLIN, John Alexander, could not have been a lawyer, b. in the County of Lankark, Ontario, 20 March, 1847. He was educated at the Orange school, Sunderland, England, and at the University of Glasgow, Scotland; was admitted to the bar of Ontario in 1871, and has since practised as a parliamentary solicitor in Ontario. He has edited and published "The Canadian Parliamentary Companion" (1883 and 1885).

GEMUNDER, August, violin-maker, b. in Ingelfingen, Württemberg, Germany, 23 March, 1814. His father was a violin-maker, and he began to play the violin at an early age. In 1844 he was asked by a German violinist to make a violin which should not be the product of imitation, as to tone or any other quality, of the Italian masters. In executing the order, he succeeded in producing an instrument that he has since kept as a model. His violins have been used by many of the leading soloists. They possess a power and quality of tone that is not easily obtained, and are thought to excel the Italian instruments, from which they are copied, in power. Mr. Gemunder has contributed to the trade journals a series of articles, in which he discusses "Old and New Violins". In 1869 he composed an essay on the "Science of Violin Construction", "The Cremona Secret", a dissertation on the use of the violin, and "The Lost Secret and Common Sense", with others on Italian varnish, violin construction, etc. He was at one time in partnership with his brother George.—His brother, George, violin-maker, b. in Ingelfingen, Württemberg, Germany, 13 April, 1816, was a pupil of Baptiste Vuillaume, in Paris, and removed to the United States in 1847, establishing himself in Boston, Mass. In 1851 his violins obtained the prize medal at the world's fair in London. In 1852 he removed to New York, where he afterward resided. Vuillaume, and other European makers of violins, were in the habit of giving a pseudo-antiquity to their wares by a chemical process, thus gaining a desirable quality of tone; but wood thus treated soon decayed, and the makers of scientific instruments became worthless. Geminder, however, succeeded in making out of natural wood violins that met every requirement, and in respect of volume, power, equality, and quickness of tone are said to be equal to the work of the best old masters. In the model and finish of his instruments, and especially in the varnish, he was unusually successful, so faithfully reproducing the distinctive characteristics of the old Italian violins that those made by him are not infrequently mistaken for genuine Cremona or "Kaiser." He finished in 1873 and sent to the Vienna exhibition, was there pronounced an Italian violin of the classic period, it being considered impossible to produce so fine a tone from a new instrument. Mr. Geminder has also received medals from exhibitions held before him in Philadelphia (1873), Philadelphia (1876—"hors concours"), Amsterdam (1883), Nice (1883—",4), London (1884), New Orleans (1884—"," concours"), and London (1885). He is the author of "Progress in Violin-making" (Astor, N. Y., 1891), in which is prefixed an engravograph of France on obtaining the freedom that he had better not appear again at court, in view of the excitement then existing in France. He remained in Russia until July of the year following, when he received his passports. On his return to France he was appointed minister to Holland, but before he could proceed thither he was accredited to the United States in December, 1792. He reached Charleston, S. C., in April, 1793, was cordially welcomed, and in the following month had a formal reception in Philadelphia, where he was presented by the citizens with an address containing a statement of the honor which they had paid to the United States. He then opened a number of hostilities against Florida and Louisiana, which were then colonies of Spain. In consequence of these imprudent measures, Washington demanded and obtained his recall. Gemener, however, decided not to return to France, but was naturalized and settled in the state of New York, where he married first a daughter of Gov. George Clinton, and afterward a Miss Ogden. In his adopted country he took great interest in promoting improvements in agriculture and in the arts and sciences. At the age of twelve he translated the "Histoire d'Eur XIV., roi de Suede," from the Swedish of Celsius, for which he received a gold medal from Gustavus III. (Paris, 1777). He also translated from the same language Nicholas Louis de Bonne, "Lettres des Finns and their language (Strasbourg, 1778).

GENIN, John Nicholas, merchant, b. in New York city, 19 Oct., 1819; d. there, 30 April, 1878. His grandfather, John Nicholas, came to this country from France in 1780 as clerk in the commissary department under Gen. John Schuyler. His uncle, Thomas Hughes Genin, was one of the early settlers of Ohio, an active abolitionist, a friend of...
Benjamin Lundy, and the author of "The Napol-
lead," descriptive of Napoleon's campaign in Rus-
(privately printed, 1838). Young Genin was
early connected to the trade of map-making, and in
1841 began business for himself. On 11 Sept.,
1850, he bought, for $225, the first seat sold for
Jenny Lind's first concert in the United States.
This was so universally commented upon by the
press that it was estimated that at current rates he
received over $80,000 worth of gratuitous adver-
sizing. In the autumn of 1851 it was an-
nounced that Louis Kossuth was on his way to this
country, and Mr. Genin proposed that 100
wealthy citizens should contribute $1,000 each for
the use of the Hungarian patriot, and guard the
vessel at Sandy Hook, presented all of the
refugees, many of whom were ragged and shoeless,
with "Kossuth" hats, which they wore on the
march up Broadway. Low-crowned felt hats at
once became popular, and the manufacturers su-
cumbing before the demand made them of
their behalf by presenting him with a silver service
valued at $1,200. In 1832, Miss Amelia Bloomer
complained to Mr. Genin that she could not find a
hat suited to her costume. The latter set himself
to invent one, and produced the first round hat,
now known and used throughout the world.
During 1833, the lower part of Broadway being in
a filthy condition, he proposed to the city author-
ties to erect a bridge opposite his store at his own
expense. The offer was rejected, but the Leow
bridge, erected on exactly the same site, was a fac-simile of that designed by Mr.
Genin. His most public-spirited enterprise was the
cleaning, in the spring of 1845, of Broadway and
other streets, which had been left in an almost
impassable condition by the neglect of the city
officials. He employed over 100 men at a daily
cost of $18, and continued to perform this self-imposed duty for one month,
only disconnecting it on the promise of the street
commissioner to sweep Broadway nightly. The
labor cost $1,543.70, and $1,333.33 of this amount
had been paid in stamps of an.
In 1853 Mr. Genin again received a large amount of free advertising for
the small expenditure of $288.37. Mr. Genin
was the author of a book entitled "History of the
Hat from the Earliest Ages to the Present Time"
(1847). It was profusely illustrated, and subse-
sequently enriched with drawings of over one thou-
sand different styles of ancient head-dresses. From
these he had more than 500 fac-similes made, and
exhibited them in connection with his business.

GENNES, Julien, Count de, French navigator,
b. At Vitéz in 1652; d. in Plymouth, England, in
1704. He entered the French navy under the au-
spicies of the Maréchal de Vivonne, and, being sent on
several missions, acquitted himself with such credit that
he was promoted captain and named chevalier of
the Order of St. Louis in 1677. He was also granted
100 men, and sent to
land in Cayenne, where the king created a county
under the name of Comté d'Ovac. Some filibus-
sters, who had sailed to the Strait of Magellan, pro-
tected to De Gennes, on their return to France, to
found a colony there. De Gennes went to Paris and
organized in the capital the king placing six vessels at its disposal. The expedition,
under command of De Gennes, sailed from La Ro-
chelle, 3 June, 1693, entered the Straits of Ma-
gellan, 11 Feb., 1696, and, having doubled Cape
Forward, a bay not down on the charts was dis-
covered and named Trygve Fjord, and he
empting into it De Gennes. Soon afterward De
Gennes decided to return to France, leaving be-
hind a small colony. Afterward he was made
governor of the French part of the island of St.
Christopher, and, finally, about 180 men with
which to defend himself when the English began
hostilities without going through the formality of
declaring war. The latter having gathered a force
of over 2,000 men, De Gennes, after negotiating,
signed articles of capitulation, acting under the
advice of twelve out of seventeen members of a
ouncil of war which he had called together. This
advice was not that of the king's lieutenant, Val-
meiner, and his ineffectual protest was made the
basis of charges subsequently brought against the
governor. After prolonged discussions and re-
criminations, the English fleet took possession of
the 16 July, 1702. After vainly attempting to return
for a time to Cayenne until the French court
should have been informed of the truth regarding
his capitulation, he was captured by a Dutch
founder, taken to St. Thomas, and finally landed, in
April, 1703, in England, to live the rest of his
life in poverty and to avoid. Capt. de Machault, governor-general of
the French West India islands, insisted on putting
him on trial. De Gennes defended himself ener-
getically, and would doubtless have been acquit-
ted, had he not been imprudent enough to bring
charges against three of his judges. In August,
1704, he was declared to be guilty of cowardice, de-
graded from the nobility, and deprived of the cross
of St. Louis and of all the other honors that had
been conferred upon him. From this judgment he
learned of his death than he bestowed large pen-
sions on his widow and children. But De
Gennes's titles. De Gennes had a taste for mathe-
ematics and mechanics. Among his inventions
were cannon and mortars, arrows designed to per-
forate and damage the sails of vessels in battle,
and watchs without springs or weights—all made
of ivory. He placed $20,000 in a "walk and digest food," and many other curious de-
vice that are said to have greatly pleased the king.
He wrote "Relation d'un voyage fait en 1695 à '97 aux côtes d'Africque, detroit de Magellan, etc." etc.
(Paris, 1699), and "Des Iles sous le vent, leurs res-
ources et leur avenir." (1701).

GENTH, Frederick Augustus, chemist, b. in Waechtersbach, Hesse-Cassel, 17 May, 1820.
After attending the gymnasia in Hanau, he studied at the
University of Heidelberg, under Liebig at
Giessen, and finally under Bunsen at Marburg,
where he received the degree of Ph.D. in
1846. For three years he acted as assistant to Prof. Bun-
sen, and soon afterward came to the United States,
where he has since resided. In 1872 he was called
to the chair of chemistry and mineralogy in the
University of the Univesity of North Carolina, and
now occupies. He has also held the office of chemist at
the geological survey of Pennsylvania and also to
the board of agriculture of that state. Prof.
Genth is a member of many scientific societies in
the United States, and was elected in 1872 to mem-
bership in the American Chemical Society. Prof.
Benjamin Silliman, Jr., speaks of him as having
"no superior in this country as an analytical chemi-

VOL. 11.—40
GENTRY.

GEORGE

ist," and he has greatly enriched the literature of chemistry with his very many and careful analyses of minerals. His name is associated with the ammonia cobalt bases which he discovered in 1846, and, in joint authorship with Dr. Wolcott Gibbs, he has contributed to the "Smithsonian Contributions to Knowledge" a monograph on "Researches on the Ammonia-Cobalt Bases" (Washington, 1856). Prof. Gent is the author of nearly 100 separate papers on subjects in chemistry and mineralogy, and has published a "Tabellarische Übersicht der wichtigsten Reaktionen welche Basen in Salzen zeigen" (Marburg, 1845), also "Ueber die chemische Verwandtschaft der Phospor-Verbindungen, die Beziehungen zwischen ihnen und die wag, die auf Grund ihrer chemischen Eigenschaften in der Praxis angewendet werden" (Berlin, 1847), and "On the Ammonia-Cobalt Bases in the Virginia and Pennsylvania Geology" (Raleigh, 1881), also "First and Second Preliminary Reports on the Mineralogy of Pennsylvania." He is an author of "Mineral and Mineral Localities of North Carolina" (Raleigh, 1881).

GENTRY, Meredith Polk Dexter, statesman, b. in Rockingham county, N. C., 15 Sept., 1800; d. near Nashville, Tenn., 2 Nov., 1866. In 1813 his father, a wealthy planter, removed to Williamson county, Tenn., where the facilities for education were limited. Meredith's school-days ended at the age of fourteen, when he had acquired little more than the rudiments. He, however, supplemented these while working on his father's plantation by reading the standard English authors. He was a great delight in perusing the congressional debates. He early conceived a fancy for military life, and joined a militia company, of which he was soon elected captain, and subsequently promoted colonel of the regiment. He became known as a popular orator, and in 1835 was chosen to a seat in the legislature, which he retained until 1839, when he was elected to congress, taking his seat, 2 Dec., 1839, and at once gaining Messrs. Clay, Webster, and Calhoun in their efforts to stem the tide of what they held to be the dangerous encroachments of the executive. Mr. Gentry was an original Whig, and remained such until the party ceased to exist. His first speech, which attracted universal attention, was in favor of the reception of petitions praying for the abolition of slavery. Although himself a large slave-holder, and maintaining that the Federal government had no right to interfere with slavery in individual states, he urged that the petitions, although asking what could not be constitutionally granted, should nevertheless be received and considered. His second speech, on the bill to secure freedom of elections and restrict executive patronage, was one of the ablest of that congress, and became an effective campaign document in the presidential canvass of 1840. Mr. Gentry was re-elected to the 25th, known as the "Whig congress," but, account of the death of his first wife, refused to be a candidate for election to the 26th. He was, however, returned to the 29th, and was also elected to the 30th, 31st, and 32d. Mr. Gentry's first speech, after his return to congress in December, 1843, was in reply to the charge of President Polk that the Whigs did not take up the issue of the war with Mexico by any opposition of the Mexican war. Mr. Gentry, in behalf of himself and his political friends, indignantly repelled the aspersions of the president. As a result of the speech, a resolution was introduced by the Whigs declaring that, while patriotism was the watchword of the issue, the war was maintained, yet the war should be waged only for the purpose of obtaining an honorable peace, and not with any view to conquest. On leaving congress Mr. Gentry retired to his plantation in Tennessee, and after the election of Mr. Lincoln became a secessionist. He was elected to the Confederate congress in 1862, and again in 1863. He did not approve, however, of the policy of the authorities at Richmond. He advocated secession only as a temporary expedient. There were very few men in the government who believed in secession. Mr. Gentry was prominent in the late administration of President H. Stephens, "who could compare with Mr. Gentry in political knowledge, and in the readiness with which he brought this knowledge to bear on any point in running debate. His oration on Clay, delivered without premeditation, was apt, powerful, and patriotic. His mind was calm and genial, and was possessed of high conversational powers, with a fund of humor and anecdote."

GEORGE, Enoch, M. E. bishop, b. in Lancaster county, Va., in 1767; d. in Staunton, Va., in August, 1828. He was under the ministry of Rev. Devereux Jarrett, then of the Church of England, and in early life the subject of deep religious impressions; but, having been separated from Mr. Jarrett's ministry, he became neglectful of his religious duties, till, after several years, the place where he resided was visited by a Methodist evangelist, under whose exhortations young George became connected with the little Methodist society of his neighborhood. In 1790 he was admitted on trial into the Virginia conference of the Methodist Episcopal church, and served for two years as junior preacher in Caswell circuit. After this he went to South Carolina, he became elder of Charleston district, and the next year, on account of impaired health, he retired from active work of the ministry. In 1803 he entered the Baltimore conference, where he labored with great zeal and success, till at the general conference, held in Baltimore in May, 1816, he was elected and ordained a bishop, in which office he served with zeal and effectiveness for twenty years. Bishop George belonged to the primitive school of American Methodist preachers, some of whom without
extensive scholastic advantages became able and highly effective preachers of the gospel, and also attained proficiency in biblical and theological learning. He was especially distinguished for the fervor and pathos of his pulpit discourses. During the years of his episcopate he traveled chiefly by private conveyance, through all parts of the country, not excepting the frontier settlements of the west and southwest, usually preaching nearly every day, at prearranged appointments, at which were often witnessed remarkable manifestations of the influence that attended his preaching. He would never allow his portrait to be taken, and therefore his personal appearance is known only by tradition. He is described as of fair size and well proportioned, with dark hair worn long, and complexion soothed by exposure.

GEORGE, Henry, political economist, b. in Philadelphia, 2 Sept., 1839. He went to sea at an early age, and, reaching California in 1858, remained there, becoming finally a journalist. In 1879 he published "Progress and Poverty," which was issued in the following year in New York and London, and soon acquired a world-wide reputation. This book is "a positive and direct cause of industrial depressions and of increase of wants with increase of wealth," in which the preceding theory as to the distribution of wealth and the tendency of wages to a minimum are examined and reconstructed. In the fact that rent tends to increase not only with increase of population but with all improvements that increase productive power, Mr. George finds the cause of the well-known tendency to the increase of land values, and to the decrease of the proportion of wealth that goes to labor and capital, while in the speculative holding of land thus engendered he traces the tendency to force wages to a minimum and the primary cause of paroxysms of industrial depression. The remedy for these he declares to be the appropriation of rent by the community, thus making land virtually common property, while giving to the user secure possession and leaving to the producer the full advantage of his exertion and investment. In 1890 Mr. George removed to New York. In 1891 he published "The Irish Land Question," and in the same year visited Ireland and England. In 1883-4 he again visited England and Scotland, at the invitation of the Englishland reform union, making speeches on the land question, and in 1884-5 he made another trip at the invitation of the Social Democratic Federation league, producing on both tours a marked effect. In 1886 he was the candidate of the United labor party for mayor of New York, and received 68,110 votes against 90,552 for Abram S. Hewitt, the Democratic candidate, and 60,435 for Theodore Roosevelt, the Republican candidate. Soon after this, Mr. George founded the "Standard," a weekly newspaper, which he still edits (1887). He has also published "Social Problems" (1884), and "Protection or Free-Trade" (1895). The latter is a radical examination of the tariff question, in which connection is made between the controversy on that subject and the views as to land, with which Mr. George has become identified.

GEORGE, James Zacharlah, senator, b. in Monroe county, Ga., 20 Oct., 1826. He lost his father in infancy, and his mother removed subsequently to be eight years of age, to Noxubee county, Miss., where he was educated in the common schools. He served as a private in the 1st Mississippi volunteers, commanded by Jefferson Davis, during the Mexican war, and was at the battle of Monterey. On his return he was admitted to the bar, and in 1854 elected reporter of the high court of errors and appeals. He was re-elected in 1860. He served as a member of the state convention that passed the ordinance of secession, which he voted for and signed. He was a captain in the 20th Mississippi volunteers in the Confederate army, and subsequently colonel of the 5th Mississippi cavalry. He was also appointed a brigadier-general of militia. He was chairman of the Democratic state executive committee, 1875-'6, was appointed a judge of the supreme court of the state in 1876, and afterward chief justice. In the latter office he resigned in February, 1881, to take his seat in the U. S. senate. His term expired 3 March, 1887. Judge George prepared and published ten volumes of the decisions of the court of which he was the majority, and subsequently issued a digest of all the decisions from the admission of Mississippi into the Union to and including the year 1870.

GEORGE, Samuel Carr, missionary, b. in Alleghany county, Pa., 8 July, 1832. He was graduated at the Western theological seminary in 1858, and at the Western theological seminary in April, 1861. In the following October he was ordained as a foreign missionary, and sailed the same month for Siam. He remained there until the spring of 1873, when he returned to the United States. In May, 1875, he was sent to the mission of the Rocky Spring and St. Thomas Presbyterians churches in Franklin county, Pa., where he still remains. In May, 1888, he was elected professor of the Sanskrit and cognate tongues in Wilson female college at Chambersburg, Pa. Mr. George founded in Wilson college a school of his own establishment. He is the father of his wife, and has presented to the college his oriental library, comprising works written in Sanskrit, Zend, Pali Siamese, and Burmese. At the solicitation of a London publishing firm he has prepared a "Grammar of the Siamese Language," which is still (1887) in manuscript.

GERALDINI, Alejandro, R. C. bishop of Santo Domingo, b. in Amelia, Italy, in 1435; d. in Santo Domingo in 1525. He became a soldier in early life and went with his brother to Spain, where he served against the Portuguese in 1473-9. He afterward entered the church, and was intrusted with the education of the princesses of the royal family. While at court he rendered an important service to Columbus, who had come to present to the sovereigns of Castile and Aragon his plan for discovering a new world. After making a tour and discussing this project in a council composed of men of the most eminent rank. Opinions were divided, because several Spanish prelates treated the view of Columbus as manifest heresy; they cited the authority of Nicolas de Lyra, who represents the terrestrial globe as not containing any lands on the sides, neither beneath nor beyond the Canaries: and that of St. Augustine, who affirms that there are no antipodes. I chance to be standing then behind Cardinal de Mendoza, a man equally remarkable for his accomplishments and
his learning. I represented to him that Nicolas de Lyra had been a very able theologian, and St. Augustine, a doctor of the church illustrious for his dogmatic and spiritual learning. But himself had this imposture found out themselves bad geographers, for the Portuguese had reached a point on the other hemisphere where they had lost sight of the polar star and had discovered another at the opposite pole, that they had found all the countries under the torrid zone well populated and their duration to exceed that of the earth. Columbus had been heard. Geraldini was employed in diplomatic services in nearly all the courts of Europe, and his zeal in the service of the state was rewarded first with the bishopric of Volterra and Monte Corvino, and finally with that of Santo Domingo, which he was the first to hold. He embarked in 1520 at Seville to take possession of his see. He founded schools and seminaries in the island, and did everything in his power for its spiritual and temporal welfare. Geraldini wrote a great many works on theology, collections of letters, exhortations addressed to Christian princes against the Turks, poetry, sacred and profane, a life of Catharine of Aragon in hexameter verse, treatises on politics and education, and finally an account of his voyage to the Antilles, which appeared under the title Itineraria ad regionem sub nominio plagae constatitae Alexandri Geraldini Amerini, episcopi civitatis S. Dominici apud Indos occidentales” (Rome, 1681). This work gives a detailed narrative of the voyage of Geraldini along the coast of Africa to the mouth of the Orinoco, where he disembarked. The editor adds a sketch of the life of the author and a list of his works, printed and in manuscript. The best part of the work is the description of Santo Domingo, the condition of which at the time it was written being vividly set forth. We learn from it that at that time the negroes had been there temporarily exterminated. In one of the letters annexed to his relation Geraldini announces that he is sending, among other rarities, two turkeys. This letter was written in 1523, and is consequently prior to the work of Oviedo, who had been regarded as the first author with the mission then on. Geraldini wrote a curious treatise entitled “De viris Geraldini quis in obscuris apostolice Sedis per varia temporas insidurant,” which Alacci read in manuscript and speaks of in his “Aper urbana.”

GERARD, Conrad Alexandre, diplomatist, b. in Hamburg, Germany, January 30, 1854. He was educated at the gymnasium in Kiel and at the polytechnic school in Carlsruhe, where he was graduated as a civil engineer in 1875. After a year of military service he became an assistant engineer in Hamburg. In September, 1877, he came to the United States, was placed in St. Louis, where he held the offices of assistant engineer in the department of public works, then in the department of water-works, and finally in the sewer department. During 1880 he assisted James B. Eads in the preparation of the plates of the “History of the St. Louis Bridge” and became chief assistant to George E. Waring in Newport. He removed to New York in 1888, where for two years he was chief engineer of the Durham house-drainage company, and since has practised sanitary engineering, devoting himself particularly to the sanitation of buildings and towns. He is a member of scientific organizations both in Germany and in the United States. During 1885-6 he edited “Building,” and, besides articles on his specialties contributed to technical journals, he has published reports on drainage-plans and drainage of tenement-houses in the annual volumes of the Rhode Island and Connecticut state boards of health. His larger works include “Anlagen von Haus-Entwässerungen” (Berlin, 1880); “Diagram for Sewer Calculations” (London and New York, 1882); “House-Drainage and Sanitary Plumbing” (New York, 1888); “Hints on the Drainage and Sewerage of Dwellings” (1884); “Sanitary Questions” (1884); “Prinzipien der Haus-Kanalisierung” (Leipzig, 1888); “A Guide to Sanitary House-Inspection” (New York, 1889); “The Prevention of Fire” (1888). Notes embodying the Recent Practice in Sanitary Drainage of...
GERHARD

GERHARD, William Wood, physician, b. in Philadelphia, 23 July, 1809; d. there, 28 April, 1872. He was graduated at Dickinson in 1826, and received the degree of M. D. from the University of Pennsylvania in 1832. After graduation he entered the Pennsylvania hospital as resident physician and for seven years was in charge of the fever and small-pox wards. He then visited Europe, spent several years in Paris under the private instruction of the celebrated ascultator, Dr. Louis, and began investigations into the character of Asiatic cholera, small-pox, tubercular meningitis, and pneumonia in the young. He also collected a portion of the materials for his original work on typhoid and typhus fevers, which he afterward completed by establishing the specific differences between these two diseases. After his return to Philadelphia he was appointed lecturer in the medical institute and in the visiting physicians to the Blockley hospital, assistant clinical lecturer to the late Prof. Jackson, and subsequently one of the physicians to the Pennsylvania hospital, where he lectured to a large class of students, and for twenty-five successive years was the senior physician of the small-pox and fever department. In 1846, he published a series of numerous valuable papers in the "American Journal of the Medical Sciences," and in the "Medical Examiner," of which paper he was editor, but his principal work was the "Diagnosis, Pathology, and Treatment of the Diseases of the Chest," which first appeared as a short work in 1826, and was the basis of the "Diagnosis of Thoracic Diseases" (1835). At the request of many of his pupils he added general symptoms and treatment, with additional lectures (1846; enlarged ed., 1860). It was again issued, being a 4th ed., in 1860, revised and enlarged (Philadelphia, 1862); a 5th ed., in 1869; a 6th ed., in 1872, and enlarged (Philadelphia, 1872). He was also the author of "On the Diagnoses of Fever, or Cerebro-Spinal Meningitis" (1868); "Fever" (1867-8); and a "Clinical Guide" (Philadelphia). He edited Gravès's "System of Clinical Medicines," with notes and additions.—His brother, Benjamin Wood, a lawyer, was born in Philadelphia, Pa., in 1812; d. there, 18 June, 1864, was graduated at Dickinson college in 1832, studied law, and was admitted to the bar in 1832. He filled many responsible offices in his native city, and during the early part of the civil war was appointed provost-marshall of Philadelphia, in which capacity he was performing the duties without compensation. He was also a founder and an officer of the Union league. His death was hastened by his devotion to the national cause. As a lawyer he ranked high, and published several carefully edited text-books, among which are "Starke on Evidence" and Joshua Williams's "Principles of the Law of Personal Property." (2d American edition, from the 2d London edition, edited by Benjamin Gerhard and Samuel Wetherill, Philadelphia, 1853.)

GERHART, Emanuel Vogel, educator, b. in Franklinton, Pa., 19 Jun., 1818. He was graduated at Marshall college, Mersburg, Pa., in 1838, studied theology, and was ordained a clergyman of the German Reformed church. He subsequently received the degree of doctor of divinity. He was president of Heidelberg college at Tiffin, Ohio, in 1858, and was succeeded by a member of the 1855 till 1855, and of Franklin and Marshall college from 1855 till 1866. In 1868 he was chosen to be professor of systematic and practical theology in the seminary of the Reformed church at Lancaster, Pa., and president of the faculty. He has been a frequent contributor to religious literature, and for several years edited the "Mersburg Re-

view." His most important work is "Philosophy and Logic" (Philadelphia, 1857).

GERMAINE, Lord George, Viscount Sackville, English statesman, b. in England, 29 Jan., 1716; d. there, 24 Aug., 1785. He was the third son of the first Duke of Dorset. His father being lord-lieutenant of Ireland, he was educated at Trinity college, Dublin. He served in the British army in Germany, attaining the rank of lieutenant-general, but was cashiered for cowardice and incompetence. He entered parliament in 1761, and on the accession of George III., with whom he was a favorite, was made colonial secretary, in which office he had charge of the conduct of the war with the colonies. He zealously supported all the vigorous measures against the colonists, and opposed every attempt to effect a termination of hostilities. He advocated the hiring of mercenaries, urged the Six Nations to unite against the rebels, rejoiced over the massacres by the Indians, praised British rapacity and cruelty in the colonies, and applauded the plot to buy Arnold and others. He was so consistently an opponent of all liberal measures that he became highly unpopular in his own country, and during the London riots of 1790 he was compelled to barricade his house. In 1788 he became Viscount Sackville. He was one of the supposed authors of the Junius letters. Bancroft, in his "History of the United States," represents Lord George as ambitious, opinionated, and full of envy, arrogant in speech and combining contemptuous haughtiness toward his inferiors with mean-spirited spirit. He was a man of no logical clearness of mind, and unfit to conduct armies or affairs, he joined cowardice to love of superiority and a dislike of those who thwarted him. "Apparelled on Sunday morning in guà," says the historian, "as if for the drawing-room, he constantly marched about his premises, and when conducting the clergy of his parish church, where he would mark time for the singing-gallery, chide a rustic chorister for a discord, stand up during the sermon to survey the congregation or overawe the idle, and gesticulate approbation to the preacher or neglect him in his turn."

GERMAN, Obadiah, senator, b. in Dutchess county, N. Y., in 1767; d. in Norwich, N. Y., 24 Sept., 1842. He received an academic education, and removed in 1792 to Norwich, N. Y. He was a member of the assembly in 1798, 1804-5, and 1807-9. He was then elected to the U. S. Senate as a Democrat, serving from 22 May, 1809, till 2 March, 1815. He voted against declaring war with Great Britain, but, after hostilities had been begun, he did all in his power to support the war measures of the administration. He was again elected a member of the assembly in 1818, and chosen speaker. He was also first judge of Chenango county for several years, and was subsequently loan commissioner and brigadier-general of militia. Later in life he became a zealous Whig.

GERONIMO, a chief of the Chiricahua, belonging to the Apache tribe of American Indians. As Geronimo had for some time been at the head of a band of "hostiles," Lieut.-Gen. Sheridan ordered the pursuit, capture, and destruction of the chief and his followers. The expedition was commanded by Gen. George Crook, and a meeting with Geronimo's band was arranged on 29 March, 1886. Gen. Crook demanded his unconditional surrender, with the members of his band; but the Indian declared that he would give himself up only on condition that the band should be sent east for a period not exceeding two years, with the privilege of taking their families with them, and that they should ultimately be returned to the reservation
on the original status. The terms were accepted, and the party set out for Fort Bowie. On 29 March the Indians escaped to the mountains. Gen. Shiloh became dissatisfied, and, as Gen. Crook asked to be relieved, Gen. Nelson A. Miles took his place. The instructions given to the latter called for the ceaseless pursuit of the hostile Indians, and suggested “the active and prompt use” of the “regular troops” of the command. Then began one of the most exhausting and protracted Indian campaigns on record.

The Chiricahuas were followed with such sleuth-like pertinacity that even the endurance of the red men found its limit. The harried chief was given no time to rest or recruit; his followers were forced to keep moving until they yielded. But, even when reduced to such straits, Geronimo succeeded in making terms with his captors. When the news was received in Washington, it was supposed that the surrender was unconditional, and the president consequently ordered that the band should be kept as prisoners until they could be tried for their crimes or otherwise disposed of. It was subsequently ascertained that the “hostiles” had stipulated that they should be sent out of Arizona, and Gen. Miles had ordered them taken to Fort Marion, at St. Augustine. This order was countermanded. The president, and Geronimo and his fourteen adult companions were sent to Fort Pickens, Fla., where they now are (1887)

GERRY, Elbridge, statesman, b. in Marblehead, Mass., 17 July, 1744; d. in Washington, D. C., 28 Nov., 1814. His father, Thomas Gerry, came from Newton, England, to this country in 1730, and established himself as a merchant in Marblehead. Elbridge was graduated at Harvard in 1765, and the subject for master's degree was assigned to his class at the annual commencement afforded him an opportunity, under the guise of discussing the right of a colony to acquire revenues, innovations in trade and revenue laws, to give his views on the principles of the stamp act and the other oppressive revenue measures that had been lately enacted by the British government. Gerry, on leaving college, entered commercial life, and in a short time had amassed a considerable fortune. His public career began in 1773, when he set in the general court of Massachusetts bay, as the representative of Marblehead, and from this time until his death in 1814 he was, with short interruptions, in continuous public life. In 1773 the assembly appointed a committee of correspondence, consisting of Hancock, Otis, and Gerry, whose duty it should be to keep informed on all governmental acts relative to the British colonies, and communicate with the sister colonies thereupon. Gerry was chairman of this committee, and warmly supported Samuel Adams in his dealings with Gov. Hutchinson. In 1774, despite the prohibitory order of Gov. Gage, an assembly election took place, and the delegates convened at Salem, but adjourned first to Concord and then to Cambridge. The members organized as a provincial congress, and held sessions thereafter annually at Cambridge and Watertown. Gerry was a conspicuous member of this revolutionary body, and as a committee of safety and supplies attended to the collection of ammunition and provisions for the militia. He drafted a bill, which was adopted in 1775, providing for the fitting out of privateers and the establishment of an admiralty court for the adjudication of prizes. The putting into effect of this measure was the initiatory step toward a national navy. In January, 1776, Mr. Gerry was chosen a delegate to the Continental congress. Associated with him on the Massachusetts delegation were Hancock, the Adamses, and Paine. He acted on the standing committee on the treasury, on that for providing the means of furnishing supplies to the army, on the issue of bills of credit, on the best methods of conducting the business of legislation in congress, and others. The committee on supplies, consisting of Sherman, Gerry, and Lewis, attended Washington at his headquarters near New York, to inquire into the necessities of the troops and the best means of supplying their wants, and as a result of their mission some measures of reform in regard to furnishing clothing, in the system of appointments and promotions, in the enlistment of the militia, in the administration of the quartermaster-general's department, in the execution of the regulations, were approved by congress. Mr. Gerry early advocated the scheme for declaring the independence of the colonies, and, when the proposition was before congress, promoted the passage of the measure with all his powers of argument, securing at the final stage the motion for adoption, and affixing his signature on its enactment. Congress convened at Philadelphia, 4 March, 1777, and Gerry attended the entire session, during which he reported a resolution authorizing the seizure of private property on the presentation of certificates of value, as a substitute for the wretched system of supply, which had thrown on the country a flood of deprecating currency. The congress, having little appreciation of the embarrassments of the army, sent out a committee, composed of Morris, Gerry, and Jones, to examine Washington at his post on the Schuykill with regard to the prosecution of a winter campaign to make up for the losses of the summer and autumn of 1776. Their report expressed some dissatisfaction, conveying the idea that a more vigorous exertion of the military power might be made. The plotings of the “Conway cabal” had, without doubt, an effect upon the congressional committee, but it is improbable that they contemplated sending themselves to the schemes for Washington's overthrow. The Massachusetts members did not escape from the charge of complicity, but Gerry's correspondence shows that the imputation was unfounded in his case, although he cherished resentment at the opposition to congressional promotions. Mr. Gerry is credited with having, during this session, devised the plan of operations for Gates's campaign against Burgoyne.
Negotiations for a treaty of peace were opened in the spring of 1779, and, at the instigation of Mr. Gerry, the protection of the fishery rights was made the basis of an article for a settlement. It was while he was chairman of the treasury committee in the congress of 1780, to which body he had been elected for the fifth time in November, 1779, that Mr. Gerry came into the conflict with Baptist Arnold, whose conduct overlapped in a manner highly displeasing to that officer.

Mr. Gerry's sensitiveness as to the rights of a delegate from a sovereign state involved him in a difficulty with congress in February, 1780, which led him to vacate his seat in that body, holding that the rights of his state had been infringed in public and private congress to order the yeas and nays on a question of order raised by him. He laid his complaint before the legislature, which passed resolutions of protest. This incident suspended Mr. Gerry's congressional service for about three years. In 1786, on a joint ballot in the general court, he was recalled to the position of a representative in congress. Meanwhile his constituents had given him their suffrages for state senator and simultaneously for representative, there being at that time no provision against plurality of office. He undertook office as a representative in his own district in the lower house, declining senatorial service. The congress to which Gerry was now elected concluded the treaty of peace with Great Britain, and he was on the committee to arrange the matter. The states at that time regarded their delegates in the light of ministers from independent sovereignties, and the Massachusetts legislature required from Mr. Gerry a fortnightly report of his proceedings. The proposition to organize the Society of the Cincinnati met with the determined opposition of Gerry, who lost no opportunity in public and private of pointing out the dangerous character of such an unrepresentative institution. A riot in Philadelphia in 1788 caused a removal of congress to Princeton in June of that year. This event brought up the plan of a federal city, and two committees, with Gerry, as chairman of one, were appointed to examine sites. In April, 1785, Mr. Gerry's constituents repeated their performance of designating him for two elective offices, while he still held his place in congress. His term there expired in September, 1785, and he accepted a seat in the people's house. The sentiment of Massachusetts as to a constitutional convention as expressed by the legislature in 1783 was in favor of establishing "the Federal government on a firm basis, and to perfect the Union," declaring that "the present powers of congress of the United States, as contained in the articles of confederation, are not fully adequate to the great purposes they were originally designed to effect." These resolutions were given to Gerry, Holten, and King, in the form of instructions, but they construed them as merely advisory, and opposed every move in the congress of 1785 toward giving enlarged powers to the National government.

They wrote a letter to Gov. Bowdoin in justification of their action, saying that "any alteration of the confederation is premature; the grant of congressional powers above the several states is a dangerous subject;" and Mr. Gerry for more power in congress comes especially from those whose views are extended to an aristocracy. Gov. Bowdoin replied to the effect that if it was hazardous to intrust congress with powers necessary to its well-being, the Union could not long exist. The change of the Federalists in the King lately concurred in by Samuel Adams, then president of the senate, stayed any demonstration of disapproval by the general court. Despite this antagonistic attitude, Mr. Gerry was elected delegate to the convention. He took part in all its deliberations, and succeeded in impressing some of his propositions, and his energies were directed throughout to the prevention of the incorporation in the system of any features which he regarded as monarchical or tending to aristocracy. At the last moment, regardless of the pleadings of Washington and Franklin, Gerry, Randolph, and Mason withheld their assent to the constitution as adopted by the convention. Gerry returned to Massachusetts to seek an election to the State federal convention, but was defeated by Francis Dana. In 1787, President Adams extended to him an invitation to attend its sessions, for the purpose of answering questions of fact in regard to the constitution, but at the outset he created a commotion in the assembly by offering in writing a reply to a query, some members thinking that he sought to interject an argument, under the guise of answering a question. The letter which caused the trouble, together with an account of the scene in the convention, taken from the "Massachusetts Sentinel," is printed in the edition of the debates and proceedings of the convention, published by the legislature in 1838. The articles to which he addressed himself were the eight objections to the constitution, all of which he could waive, were it not that the National legislature had general power to make "necessary and proper" laws, to raise "armies and money" without limit, and to establish a "separate chamber as to civil cases." Weary of sitting in a body to which he had not been chosen, he soon withdrew.

After the adoption of the constitution, Gerry was in accord with the Republican party, which elected him to the 1st National congress in 1789, and re-elected him in 1791. In 1797, President Adams nominated him as a colleague with Marshall and Pinckney to go on a mission to France to obtain amends for French depredations on our commerce. In France they suffered many indignities at the hands of Talleyrand, who sent mysterious agents with "character and a press."

In 1800 the Republican party nominated Mr. Gerry for governor, and in a close election he was defeated by Caleb Strong. In 1810 his efforts for the same office were rewarded with success, and he served for two terms. His administration was at a period of high party spirit, and he put into full effect the Jeffersonian principles of civil service. The incumbents of the civil offices were speedily removed from office, and their places filled by sympathizers with the Republican party, causing a great outcry in the opposition papers. The Federal universal press became so vituperative in its denunciations that Gov. Gerry resorted to the extraordinary step of making the matter the subject of a special message to the legislature, transmitting at the same time a report of the attorney and solicitor-general regarding the opposition. This message caused great excitement and the opposition responded by charging the governor with usurping his powers. The disaffection created by these proceedings, and the unpopularity occasioned by the partisan redistricting of the state, which was called by the Federalists, caused the Federalists to overturn at the next election, the Federalists gaining control of the house, and electing Caleb Strong...
GERRY

GERSCHETTER, Friedrich, German traveller, b. in Hamburg, Germany, 16 May, 1816; d. in Vienna, 31 May, 1872. He was apprenticed to a grocer in Cassel, but in 1837 engaged as cabin-boy on a vessel bound from Bremen to New York. In this country he tried the journalism profession, and successively fireman on a steamboat, deck-hand, farmer, silversmith, wood-cutter, merchant, and hostler. After wandering through most of the states of the Union, spending some time as a hunter and trapper in the Indian territory, and keeping a hotel at Point Coupe, La., in 1842, he returned to Germany in 1848, and engaged in literary pursuits, but subsequently made trips to South America, Egypt, and around the world. Gerschetter was a voluminous writer. Those of his works that relate to this country include "Streif- und Jagdzaige durch die Vereinigten Staaten" (2 vols., Dresden, 1841); "Die Regulatoren in Arkansas," a novel (3 vols., Leipzig, 1846); "Mississippibilder" (2 vols., Dresden, 1847); "Die Flusspiraten in Mississippi" (3 vols., Leipzig, 1848); "Americanische Wanderungen" (2 vols., Dresden, 1868); "Reisen," giving an account of his first journey round the world (3 vols., Stuttgart, 1882-3); "Nach Amerika" (6 vols., Leipzig, 1853); "Unter dem Aquator" (3 vols., 1860); "Neue Reisen durch die Vereinigten Staaten, Mexiko, Ecuador, Westindien und Venezuela" (2 vols., Jena, 1859); "Die Blauen und die Gelben," a Venezuelan character-sketch (2 vols., 1870); and "In Mexico" (1871). Several of his books have been translated into English.

GERVAIS, John Lewis, b. in South Carolina. He represented that state in the Continental congress, serving in 1782-3. On 10 Sept., 1782, he voted in congress in favor of a motion that the secretary for foreign affairs be directed to obtain returns of slaves and other property carried off or destroyed by the enemy during the war, such information to be used in negotiating a peace. In April, 1783, he was a member of a committee to which were referred letters from U. S. representatives abroad, and on 15 April of that year favored instructing the commander-in-chief to arrange with the commander of the British forces for receiving possession of the United States that were occupied by British troops.

GESCHEIDT, Louis Anthony, physician, b. in Dresden, Germany, 19 Feb., 1808; d. in Hastings, N. Y., 20 Aug., 1876. He was educated at the Karl-Schule in Dresden, and was designed for the church, but, displaying great talent for natural science, was sent to Dresden university, and afterward to the University of Leipzig. On his return to Dresden he became the assistant of Dr. A. Carus, the physician, and Dr. F. A. Von Ammen, the oculist, and during the small-pox epidemic in Berlin he was sent by the Dresden municipality to investigate the nature of the disease. He came to this country in 1833, and settled in New York, where he became prominent in his profession, and in 1870 retired with a fortune. He published a work on "Diseases of the Eye," 1833.

GESNER, Abraham, Canadian geologist, b. in Cornwallis, N. S., 2 May, 1797; d. in Halifax, N. S., 19 April, 1864. He was a son of Henry Gesner, a loyalist, who, during the Revolutionary war, fled to Nova Scotia, where he lived for many years in compensation for that confiscated in New York. The young man studied medicine at St. Bartholomew's hospital, and surgery at Guy's hospital in London, and, after receiving his degree, returned.

to Nova Scotia in 1834. At first he practised his profession, but soon turned his attention to scientific pursuits. In 1838 he was appointed by the legislature of the lower provinces of British North America to explore and report on their geological resources. In this connection he made collections of minerals, of specimens illustrating the surveys, and of ethnological implements, and also gathered many other objects of natural history which now constitute the Gesner museum in St. Johns, N. B. He became familiar with numerous Indian dialects, and was appointed Indian commissioner of Nova Scotia in 1850. Dr. Gesner had an excellent knowledge of Chemistry, and was among those who early began to explore the art of illuminating from hydrocarbons. In 1851 he experimented with Trinidad asphalt, and obtained from it an illuminating oil. Subsequently he distilled an oil, suitable for burning in lamps, from cannel coal and bituminous shale, thus originating in America the discovery of kerosene, the name which he gave it, and which since has been extended to all mineral illuminating oils. The name, as he first formed it, was "keroslein," from the Greek Kerai, wax, and oleo, oil, and was suggested by the waxy nature of paraffin, which is derived from petroleum. It was in 1852 that the kerosene first came over with the oily part of the distillate. Afterward it was shortened to "kerosene." In 1853 Dr. Gesner came to New York, and took out several patents for the manufacture of kerosene from coal, but subsequently disposed of them to the New York kerosene company, whose extensive works were erected under his supervision. These soon ceased to be valuable in consequence of the discovery of petroleum in Pennsylvania, at which time there were fifty-six such factories in the United States. Shortly afterward he returned to Nova Scotia, expecting to fill the chair of natural history in Dalhousie college, but meanwhile occupied himself with literary work. He was a member of the Royal geological society of London and of other scientific associations in England, and also maintained a continual correspondence with eminent scientists abroad, among whom were Sir Rod- erick Murchison, Sir Charles Lyell, and the Earl of Dundonald. Besides scientific papers and reports, he published "Remarks on the Geology and Mineralogy of Nova Scotia" (Halifax, 1857); "Reports on the Survey of New Brunswick" (St. Johns, 1844); "New Brunswick, with Notes for Emigrants" (London, 1847); "Industrial Resources of Nova Scotia" (Halifax, 1849); "A Practical Treatise on Coal Petroleum and other Distilled Oils" (New York, 1851). He left an uncompleted manuscript on "The Fisheries of the Provinces," which has not been published.

GETTY, George Washington, soldier, b. in Georgetown, D. C., 2 Oct., 1819. He was graduated at the U. S. military academy in 1840, assigned to the 4th artillery, and served at Detroit during the border disturbances of that year. After doing garrison duty at various posts, he was promoted to 1st lieutenant on 31 Oct. 1845. During the Mexican war he was brevetted captain, 20 Aug., 1847, for gallantry at Contreras and Churu- bana. He was made a colonel of the 6th army in Chapultepec, and the assault and capture of the city of Mexico. From this time till the civil war he was in various garrisons, but fought against the Seminoles in 1849-'50 and 1856--'7, and took part in quelling the Kansas disturbances of 1857-'8. He was brevetted major in 1861, and lieutenant-colonel, on 28 Sept. 1861, commanded the artillery in the engagements near Budd's Ferry in November and December of that year, and in the peninsular campaign of 1862 commanded four batteries at Yorktown, Gaines' Mills, and Malvern Hill. He was at South Mountain and Antietam, and was made brigadier-general of volunteers on 25 Sept., 1862, and took part in the Rappahannock campaign of 1862-3, being engaged at Fredericks- burg and in the defence of Suffolk, Va., from 11 April till 2 March, 1863. He was brevetted lieutenant-colonel on 19 April for his services. He was brevetted colonel for gallantry at the battle of the Wilderness, where he was severely wounded, served in the defence of Washington in July, 1864, and in the Shenandoah campaign, being brevetted major-general of volunteers, 1 Aug., 1864, for his services at Winchester and Fisher's Hill, and brigadier-general in the regular army for gallantry at Petersberg. He was at Lee's surrender, and on 13 March, 1865, was brevetted major-general, U. S. army, for services during the war. He became colonel of the 37th infantry on 29 July, 1866, was transferred to the artillery in 1870, and afterward served in command of various districts and posts. He commanded the troops along the Baltimore and Ohio railroad during the riots of 1877, and, on 2 Oct., 1880, was retired from active service.

GHERARDI, Henry, judge, b. in Bloomfield, New York, 1818. He was graduated at the law school of Old Bricktown, Md., 9 Dec., 1790; d. in St. Louis, Mo., 5 March, 1859. He began to practise law in his native city in 1811, and on 20 May, 1813, became 1st lieutenant in the 38th infantry. He was transferred to the artillery in 1870, and was appointed major-general of volunteers, 1 Aug., 1864, for his services at Winchester and Fisher's Hill, and brigadier-general in the regular army for gallantry at Petersberg. He was at Lee's surrender, and on 13 March, 1865, was brevetted major-general, U. S. army, for services during the war. He became colonel of the 37th infantry on 29 July, 1866, was transferred to the artillery in 1870, and afterward served in command of various districts and posts. He commanded the troops along the Baltimore and Ohio railroad during the riots of 1877, and, on 2 Oct., 1880, was retired from active service.

GHERARDI, Bancroft, naval officer, b. in Jackson, La., 10 Nov., 1832. He entered the navy from Massachusetts as midshipman, 29 June, 1846, served on the "Ohio," of the Pacific squadron, till 1850, entered the naval academy in 1852, and was made passed midshipman on 8 June of that year. He became master and lieutenant in 1855, and at the beginning of the civil war was on the "Lancaster," of the Pacific squadron. He was made lieutenant-commander, 16 July, 1879, took part in the engagement with Fort Macon in that year, and in 1868-69 commanded successively the gun-boat "Choconoma," and the de destroyers and West Gulf blockading squadron. In the latter vessel he took part in the battle of Mobile Bay, and distinguished himself for coolness and courage. During the action, by the order of Capt. Thornton A. Jenkins, to whose vessel, the "Richmond," he the Port Royal, he ordered a "Morgan," and went in chase of the Confederate gun-boats "Morgan," "Gaines," and "Selma." Later in the
war he commanded the "Pequot." He was promoted to commander in 1866, to captain in 1874, and to commodore in 1884, and in 1885 served on the board of examiners for promotion. In 1886 he succeeded Admiral Ralph Chandler as commandant of the Brooklyn navy yard.

John C. Calhoun and other friends of the disputants. Mr. Gholson was appointed C. S. judge for the district of Mississippi by President Van Buren, in 1836, and held office until he resigned and took an active part in thecession convention. He then enlisted in the Confederate army as a private, was chosen captain, and after the fall of Port Royal, where he was wounded, raised another company and was at Luka and Corinth, where he was wounded again. He was made major-general of state troops in the spring of 1863, and on 1 June, 1864, was promoted to brigadier-general in the Confederate army, commanding a cavalry brigade in Alabama, Mississippi, and Louisiana. He was twice wounded and received two more serious wounds near Jackson in 1864, and on 27 Dec. of that year lost his right arm in the action at Egypt, Miss. After the war he was again a member of the legislature in 1866 and 1878, being speaker of the house in the latter year. - His cousin, William Yates, jurist, b. in Virginia in 1807; d. in Cincinnati, Ohio, 21 Sept., 1870, was the son of Thomas Gholson, member of congress from Virginia in 1808-16. He was graduated at Princeton in 1825, studied law with Creed Taylor, removed to Mississippi, where he practised for several years, and then to Cincinnati, Ohio, where he was judge of the Cincinnati superior court in 1854-9, and of the Ohio supreme court in 1860-3. He had few equals at the Ohio bar, and was an effective political speaker. He published an "Ohio Digest." - Another cousin, Thomas Saunders, son of Maj. William Gholson, b. in Glasgowville, Brunswick co., Va., 9 Dec., 1809; d. in Savannah, Ga., 13 Dec., 1868, graduated at the University of Virginia in 1827. He became a judge of the state circuit court in 1858, president of several railroads, and founded and aided to support a public library in Petersburg, Va. He was a member of the Confederate congress. - His elder brother, James Herbert, b. in Virginia in 1798; d. in Brunswick, Va., 2 July, 1848, was a member of congress in 1833-5.

GIBAUD, Peter, clergyman, d. probably in New York City in 1753. He was vicar-general for the bishop of Quebec over Illinois and the adjacent countries. In 1770 he was sent to Post Vincennes at the request of the inhabitants, and remained there two months. He afterward resided in Kaskaskia, Cahokia, and St. Genevieve. For a long time he was the only priest in Illinois and Indiana, and the labors and journeys in which he is said to have engaged seem incredible. He embraced ardently the cause of American independence. When Col. Clark capt-

ured Kaskasia, 4 July, 1778, and Cahokia afterward, Father Gihaut was principally instrumental in rallying the French settlers on the Wabash and Mississippi to the American cause. When Clark determined on taking Vincennes, he sent Gihaut forward to learn the views of the inhabitants. On his arrival he assembled them in the church, explained the object of his mission, and armed them with a strong persuasion that they rose en masse and took the oath of allegiance to the commonwealth of Virginia. A commander, Capt. Helm, was elected, and Col. Clark found himself master of Vincennes without striking a blow. He was a member of the Mississippi legislature. He was chosen to congress as a Democrat in January, 1837, to fill a vacancy, and a few months afterward was elected for a full term; but his seat was contested by his opponent, and on 31 Jan., 1838, was declared vacant by the house. While in congress he had several sharp passages with Henry A. Wise, of Virginia, and a duel between the two was at one time prevented only by the influence of John C. Calhoun and other friends of the disputants. Mr. Gholson was appointed C. S. judge for the district of Mississippi by President Van Buren, in 1836, and held office until he resigned and took an active part in thecession convention. He then enlisted in the Confederate army as a private, was chosen captain, and after the fall of Port Royal, where he was wounded, raised another company and was at Luka and Corinth, where he was wounded again. He was made major-general of state troops in the spring of 1863, and on 1 June, 1864, was promoted to brigadier-general in the Confederate army, commanding a cavalry brigade in Alabama, Mississippi, and Louisiana. He was twice wounded and received two more serious wounds near Jackson in 1864, and on 27 Dec. of that year lost his right arm in the action at Egypt, Miss. After the war he was again a member of the legislature in 1866 and 1878, being speaker of the house in the latter year. - His cousin, William Yates, jurist, b. in Virginia in 1807; d. in Cincinnati, Ohio, 21 Sept., 1870, was the son of Thomas Gholson, member of congress from Virginia in 1808-16. He was graduated at Princeton in 1825, studied law with Creed Taylor, removed to Mississippi, where he practised for several years, and then to Cincinnati, Ohio, where he was judge of the Cincinnati superior court in 1854-9, and of the Ohio supreme court in 1860-3. He had few equals at the Ohio bar, and was an effective political speaker. He published an "Ohio Digest." - Another cousin, Thomas Saunders, son of Maj. William Gholson, b. in Glasgowville, Brunswick co., Va., 9 Dec., 1809; d. in Savannah, Ga., 13 Dec., 1868, graduated at the University of Virginia in 1827. He became a judge of the state circuit court in 1858, president of several railroads, and founded and aided to support a public library in Petersburg, Va. He was a member of the Confederate congress. - His elder brother, James Herbert, b. in Virginia in 1798; d. in Brunswick, Va., 2 July, 1848, was a member of congress in 1833-5.
ginia hospitals, for which he was praised by the Confederate congress. In 1863, when Columbia was burned, he lost his house with valuable collections of paintings, fossils, and minerals. His chief scientific researches were devoted to the description of organic remains from his native state, and include a "Monograph on Fossil Squalide," in the journal of the Philadelphia academy of sciences, and "Emotions of a California Man," in the "Three Allied New Genera," in the "Smithsonian Contributions to Knowledge" (1840). He was also the author of an article on "Typhoid Pneumonia," in the "American Journal of the Medical Sciences" for 1842, which revolutionized the treatment of the disease by being the first to suggest the use of the carbolic acid as a disinfectant, and wrote memoirs of the artists James De Veaux (Columbia, 1846) and Charles Frazer, and "Cuba for Invalids" (1860). Many of his scientific articles were republished in France and Germany. His chief literary work, the material for which he was twenty-five years in collecting, in "Documentary History of the American Revolution; consisting of Letters and Papers relating to the Contest for Liberty, chiefly in South Carolina," covering the years from 1764 to 1783 (3 vols., Columbia, S. C., and New York, 1851), under the title of "Robert Wilson, b. in Columbia, S. C., 10 June, 1811; d. there, 28 Oct., 1875, was graduated at South Carolina college in 1844, and at the medical college of South Carolina in 1843, afterward spending two years abroad. He was professor of surgery in the University of Pennsylvania in 1845-50, and was a frequent contributor to the literature of his profession. Gibbon, John, soldier, b. near Holmesburg, Pa., 20 April, 1827. He was graduated at the U. S. military academy in 1847, assigned to the artillery, and served at the city of Mexico and Toluca till the close of 1848. During this interval till the civil war he was largely on frontier and garrison duty, but was assistant instructor of artillery at West Point in 1854-7, and quartermaster there in 1856-9. On 2 Nov., 1859, he became captain in the 4th artillery. He was chief of artillery of Gen. McClellan's division from 29 Oct., 1861, to 2 May, 1862, and at the latter date was made brigadier-general of volunteers. He commanded a brigade through the Northern Virginia, Maryland, Rappahannock, and Pennsylvania campaigns in 1862-3, receiving the brevets of major in the regular army, 17 Sept., 1862, for his services; for the defense of Fredericksburg, 13 Dec., 1862, for Fredericksburg, where he commanded a division, was wounded, and disabled for three months; and colonel, 4 July, 1863, for Gettysburg, where he was severely wounded while in command of the 2d army corps. He was disabled by this wound till 15 Nov., when he commanded the draft depot at Philadelphia till 21 March, 1864. He was then assigned to a division of the 2d corps, becoming a major-general of volunteers on 7 June, 1864, and being engaged at the Wilderness, Spottsylvania, and Cold Harbor. After 15 Jan., 1865, he commanded the 24th army corps, and was before Petersburg from 15 June, 1864, till 2 April, 1865, taking part in the assaults of the last two days, and carrying two redoubts. He was brevetted brigadier-general and major-general, U. S. army, to date from 18 June, 1864. At this time it was his duty to carry into effect the stipulations for Lee's surrender, and was mustered out of volunteer service on 15 Jan., 1866. Since the war he has commanded various posts as colonel of the 30th infantry in 1866-9, and of the 7th infantry in 1869-80. He was in the draft riots in New York in 1863; chargeable to the New York city military service in 1869; chargeable to the Yellowstone expedition against Sitting Bull in 1876, and on 9 Aug., 1877, commanded in the action with the Nez Perces Indians at Big Hole Pass, Montana, where he was wounded. He temporarily commanded the department of Dakota in 1878, and since 29 July, 1885, that of the Columbia, having charge in 1888-9, by direction of the president, of the suppression of the riots against the Chinese in Washington territory. On 10 July, 1886, he was promoted to brevet major-general of volunteers. He has published "The Artillerist's Manual" (New York, 1859), and has contributed articles to current literature, including one on "Our Indian Question" in the Journal of the military service institution, for which a prize medal was awarded him. Gibbons, Edward, b. in England; d. in Boston, Mass., 9 Dec., 1854. He reached this country as early as 1820, and became a merchant in Boston. He was representative to the general court in 1838-47, and in 1844, when the militia was organized, was chosen to command the Suffolk regiment with the title of colonel-major. He was major-general of militia in 1849-51, assistant in 1850-1, and captain of the ancient and honorable artillery company. Johnson, in his "Wonder-Working Providences," speaks of him as "a man of resolute spirit, bold as a lion, very generous and forward in doing everything right; his forts are well contrived and batteries strong and in good repair." He advanced over £2,500 to Charles La Tour (q.v.), secured by mortgage of the latter's fort and lands in Acadia, and lost his money on the capture of the fort by an American commodore in 1847. In 1848 Gen. Gibbons was one of the commissioners that formed the confederation of that year between the colonies of Massachusetts, Plymouth, Connecticut, and New Haven. Gibbons, James, educator, b. in Westtown, Pa., 15 May, 1769; d. in Chester co., Pa., 17 Oct., 1828. His great-grandfather, John Gibbons, was among the earliest Quaker settlers of Pennsylvania. James was educated by his parents and became an accomplished scholar, linguist, and mathematician. He was treasurer of Chester county and a member of the general assembly of Pennsylvania for the three years immediately preceding the Declaration of Independence. As a member of the Society of Friends and a non-combatant, he retired from all public service at the outbreak of the Revolution. He conducted a successful private practice of medicine in Philadelphia. In 1783 he sold his farm of 600 acres to the Friends, and there they established their well-known "Westtown School." The remainder of his life was spent in retirement upon his farm in Chester county.—His son, William, physician, b. in Philadelphia, Pa., 10 Aug., 1781; d. in Wilmington, Del., 23 July, 1845, was educated by his father, was graduated in medicine at the University of Pennsylvania in 1805, and practised in Wilmington, Del. He was first president of the Delaware academy of natural sciences, of the Peace society, and of the Delaware temperance society, and was an active member of the Society for preventing the kidnapping of negroes. Dr. Gibbons established and conducted in 1824-5, at his own expense, a religious periodical entitled the "Berean," devoted to the principles of the Christian dispensation, and a prominent part in the religious controversy that resulted in the separation of the society in 1827 into the divisions since known as "Friends" and "Orthodox Friends." He also wrote about 1821, under the signature of "Vindex," a series of letters answering a pamphlet on the Presbyterian clergyman, which is one of the clearest expositions of Quaker doctrines published in
modern times, and was the author of a pamphlet entitled "Exposition of Modern Scepticism," assailing the methods pursued throughout the world by the opponents of the late Dr. Henry Wright.—William's son, Henry, physician, b. in Wilmington, Del., 20 Sept., 1806; d. there, 5 Nov., 1884, was graduated in medicine at the University of Pennsylvania in 1829, practised in Wilmington till 1841, and then in Philadelphia, where he was professor of the principles and practice of medicine in the Philadelphia college of medicine. He removed in 1830 to San Francisco, Cal., where he became, in 1861, professor of materia medica in the medical college of the Pacific (now Cooper medical college), being transferred to the chair of the principles and practice of medicine in 1868. He was president of the California state board of health from its establishment in 1873 till his death, and edited the "Pacific Medical and Surgical Journal" for twenty years. Dr. Gibbons was a founder of the California academy of sciences. He published a prize essay on "Tobacco" and several addresses and essays.—Another son, James Sloan, merchant, b. in Wilmington, Del., 1 July, 1810, was educated in private schools in his native city, and in early life removed to Philadelphia, where he became a merchant. He came to New York in 1835, and has since been connected with banks and finance in that city. He has contributed to various literary and financial periodicals, and has published "The Banks of New York, their Dealers, the Clearing-House, and the Panic of 1857," with a financial chart (New York, 1858), and "Public Debt of the United States, its Organization, its Liquidation, and the Financial System" (1867).—James Sloan's wife, Abigail Hopper, philanthropist, b. in Philadelphia, 7 Dec., 1801, is a daughter of Isaac Hopper, a merchant. After teaching in Philadelphia and New York, she married Mr. Gibbons in 1833, and in 1836 removed to New York with him. In 1845 Mrs. Gibbons aided her father in forming the Women's prison association, and in founding homes for discharged prisoners and frequently visited the various prisons in and about New York. She was the principal founder of the Isaac T. Hopper home, and for twelve years was president of a German industrial school for street children, the attendance at which increased in four months from 7 to nearly 200. Throughout the war Mrs. Gibbons aided in hospital and camp, often at personal risk, and in 1863, during the draft riots, her house was one of the first to be sacked by the mob, owing to the well-known anti-slavery sentiments of herself and her husband. The attention of the rioters was first called to the house by some one who pointed it out as the residence of Horace Greeley. After the war she planned and organized a Labor and aid association for the widows and orphans of soldiers. She aided in establishing the New York infant asylum in 1873, and the New York diocesan kitchen in 1873, and has been one of the active managers of both these institutions.—Charles, another son of William, lawyer, b. in Wilmington, Del., 30 March, 1814; d. in Philadelphia, 14 Aug., 1885, studied law in Philadelphia with Charles Wright, and was admitted to the bar in 1839. He was for several years a member of the state senate and its president in 1847, chairman of the first Republican state committee, one of the founders of the Union league, and the author of its constitution. He represented the government on a commission in the argument of prize cases in the U. S. courts during the civil war.

GIBBONS, James, cardinal, b. in Baltimore, Md., 23 July, 1834. At an early age he was taken by his parents to their former home in Ireland, where his education began. When he was seventeen years old he returned to his native city, and after a brief experience as a clerk entered St. Charles's college, Maryland. In September, 1857, he was transferred to St. Mary's seminary, Baltimore, and on 30 June, 1861, he was ordained priest at St. Mary's chapel. His first mission was that of assistant priest at St. Patrick's church, Baltimore, but, in the course of a few months, he was made pastor of St. Bridget's church in Canton, an eastern suburb of the city. While he was performing the duties of parish priest in that obscure place, Archbishop Spalding transferred him to the cathedral, made him his private secretary, and appointed him to the important office of chancellor of the archdiocese. When the second plenary council of the American Roman Catholic church assembled at Baltimore in October, 1858, he was assigned to the office of assistant chancellor of that body, which represented the entire hierarchy of the United States. In 1866 he was made vicar apostolic of North Carolina, with the rank and title of bishop, being consecrated in the cathedral of Baltimore by his friend Archbishop Spalding on 16 Aug. North Carolina then contained a population of one million, of whom only one thousand were Roman Catholics. But Bishop Gibbons was equal to the duties of the office, and in a few years schools were opened, asylums built, churches erected, and the number of priests increased from five to fifteen. In 1872 he was translated to the vacant see of Richmond, Va., where his zeal and administrative ability were soon made manifest by the establishment of numerous institutions, such as the St. Sophia orphan home for aged persons, the St. Mary's infirmary, and a number of parochial schools for the poor. In 1877 the health of Archbishop Bailey, of Baltimore, began to decline, and he asked Pope Pius IX. to give him a coadjutor, at the same time suggesting Bishop Gibbons for the office. His request was granted, and on 20 May, 1877, Dr. Gibbons was appointed coadjutor with the right of succession to the see of Baltimore. On 3 Oct. of the same year, on the death of Archbishop Bailey, he succeeded to the vacant see, and thus at the early age of forty-three attained to the highest ecclesiastical dignity of his church in the United States, and Baltimore was the wealthiest and the primary American see. One of the most important works accomplished by him in his new see was the St. James home for boys, the foundation of which was placed in the hands of Rev. Edmund Didier, pastor of St. Vincent's church, Baltimore. In 1888 Archbishop Gibbons was summoned to Rome, with other American archbishops, to confer upon the affairs of the church in the United States. During this visit he was the recipient of several marked favors
from Pope Leo XIII. He was appointed to preside over the third plenary council of Baltimore, which assembled in that city in 1884. The success of the council was due in a great measure to the zeal, energy, and executive ability of Archbishop Gibbons. When the acts and decrees of the council were transmitted to Rome, they were after mature deliberation approved by the ecclesiastical authorities. In 1878, on the advice of Mr. Gibbons, the See of New York was raised to an archbishopric, and Dr. Gibbons was made the first archbishop. In 1884, Mr. Gibbons was appointed by the council of safety. Mr. Gibbons was made a member of the executive council in July, 1779, and was presiding officer of the convention held in May, 1787, for the final revision of the constitution of Georgia. He also sat in the Continental congress during 1784-86. Mr. Gibbons, in his expression of his appreciation of Archbishop Gibbons's services, and, shortly afterward, at a special consistory, nominated him for promotion to the high dignity of cardinal, and he was immediately confirmed. Upon this occasion the pope said: "The flourishing state of Catholicity in the United States which we see daily more and more, and the condition and form according to which the ecclesiastical canons of that country are formulated, advise us, or rather demand, that some of their priests be received into the sacred college." When the bearers of the official insignia called at the Vatican to take leave of the pope before departing on their mission, he charged them to present his affectionate paternal benediction to Archbishop Gibbons, adding, "We remember him with sentiments of the most cordial esteem, and believe we could not confer the hat upon an equal worthy person." Archbishop Gibbons, selected 30 June, 1886, the day of his "silver jubilee" as a priest, as the occasion on which he would be invested with the insignia of his rank as a prince of the church. The ceremony was surrounded by all the pomp and magnificence prescribed for such occasions in the Catholic ritual. Cardinal Gibbons has endeared himself to all, Protestants as well as Catholics, the poor as well as the rich, by his simple and unostentatious life. He visited Rome in 1887, and asked the pope to give him a conclave on the ground of his ill health. He has published "The Faith of Our Fathers," which has been translated into many modern languages (Baltimore, 1871).

GIBBONS, Joseph, philanthropist, b. near Lancaster, Pa., 14 Aug., 1818; d. there, 9 Dec., 1888. He was of a family of English Quakers who came from Wales and the Isle of Man to settle in the colony. He was graduated at Jefferson Medical College in 1845, and in the same year married Phebe, eldest daughter of Thomas Earle, who was the first candidate of the Liberty party for vice-president of the United States in 1840, the political the-avenger of the Whig party. In his youth Dr. Gibbons's life was chiefly identified with the practical side of the anti-slavery movement. He was instrumental with his father in aiding over 1,000 runaway slaves to freedom by the system quaintly known as the "Underground railroad." Some account of this peculiar institution may be found in William Still's "Underground Railroad" (Philadelphia, 1872), and Dr. Smiley's "History of the Underground Railroad in Chester and the Neighboring Counties of Pennsylvania" (Lancaster, 1889). Dr. Gibbons was also an earnest temperance advocate, and did much to popularize the public-school system of Pennsylvania in its infancy. He was regarded as one of the founders of the Republican party in his native state, and enjoyed the friendship and esteem of Charles Sumner, Thaddeus Stevens, Elihu Benjamin, and Henry Wilson. He established the "Friends' Journal" in 1873, and, though partially deprived of speech by apoplexy soon afterward, conducted it until his death.

GIBBONS, William, member of the Continental congress. He was one of the Sons of Liberty appointed to draft resolutions, in 1774, expressive of sympathy with the northern colonies, also a member of the Provincial congress that met in Savannah, Ga., on 4 July, 1776, and in December of the same year was appointed commander of the council of safety. Mr. Gibbons was made a member of the executive council in July, 1779, and was presiding officer of the convention held in May, 1787, for the final revision of the constitution of Georgia. He also sat in the Continental congress during 1784-86. Mr. Gibbons, in his expression of his appreciation of Archbishop Gibbons's services, and, shortly afterward, at a special consistory, nominated him for promotion to the high dignity of cardinal, and he was immediately confirmed. Upon this occasion the pope said: "The flourishing state of Catholicity in the United States which we see daily more and more, and the condition and form according to which the ecclesiastical canons of that country are formulated, advise us, or rather demand, that some of their priests be received into the sacred college." He visited Rome in 1887, and asked the pope to give him a conclave on the ground of his ill health. He has published "The Faith of Our Fathers," which has been translated into many modern languages (Baltimore, 1871).
and he was also geologist under Gen. Isaac I. Stevens on the survey of the North Pacific railroad. In 1857 he was appointed to the north-west boundary survey for the purpose of its western half. He prepared an elaborate report on the geology and natural history of the country. He returned to New York in 1860, and was active in his efforts to

ward preventing secession. In 1861 he volunteered and did military duty in Washington. During the draft riots in New York, two years later, he offered to defend the residence of Gen. John C. Frémont when a night attack was threatened. Subsequently he was secretary of the Hudson bay claims commission in Washington, and also was engaged in the arrangement of a mass of manuscript bearing on the ethnology and philology of the American Indians. His services were used by the Smithsonian institution to superintend its labors in this field, and to his energy and complete knowledge of the subject it greatly owes its success in this branch of science. He was an active member of the New York historical society, and was its secretary from 1842 till 1848. His papers on Indian dialects contributed to the various Smithsonian publications include numerous titles, and his separate publications are: "The Judicial Chronicle" (Cambridge, 1844); and a number of "The Ethnology and Philology of America" (Washington, 1863); "A Dictionary of the Chinook Jargon or Trade Language of Oregon" (1863); "Comparative Vocabulary" (1863); and "Suggestions relative to Objects of Scientific Investigation in Russian America" (1867).—Another Odd of W. Cott, chemist, b. in New York city, 21 Feb., 1822, after passing through the grammar-school attached to Columbia, was graduated at that college in 1841. A few months were then spent in the laboratory of Dr. Robert Hare in Philadelphia, after which he returned to New York, and was graduated at the College of physicians and surgeons in 1845. Subsequently he went abroad, and studied chemistry at first under Rammelsberg and then under Heinrich Rose in the University of Berlin, spending a year of his stay in both of these two laboratories. Later he passed five months in Gießen, studying organic chemistry under Liebig, after which he returned to New York, and was graduated at the College of physicians and surgeons in 1845. In 1848 he returned to the United States and gave a short course of lectures at Delaware college, Newark, Del. From 1849 till 1863 he held the chair of chemistry in the College of the city of New York, and he was elected to the Rumford professorship in Harvard university with the chair of the laboratories of the Lawrence scientific school, which chair he has since held. On the organization of the university subsequent to the election of Charles W. Eliot to the presidency the teaching of chemistry was transferred to the collegiate department, and the subjects of heat and light were assigned to Dr. Gibbs. During the years when he directed the chemical laboratory the school attained its greatest celebrity, and many of its most distinguished graduates acquired their knowledge of chemistry from his teaching. Like his colleague, Louis Agassiz, he attracted to him students who became his personal friends and who have ever maintained a filial regard for him. He was one of the contributors to the labors of the U. S. sanitary commission, and was a member of its executive committee in New York city. The members of this organization were compelled to meet each other almost daily till their headquarters, the Union league club of New York. Dr. Gibbs "was the first to suggest that the idea on which the sanitary commission was formed needed to take the form of a club which should be devoted to the social organization of sentiments of loyalty to the Union." The original meeting to consider the feasibility of the plan was held at his residence on 30 Jan., 1863. He was appointed a commissioner to the Vienna ex-

hibition in 1873, and contributed to the government reports a valuable paper on his examination of the instruments of physical research. Dr. Gibbs is the only American honorary member of the German chemical society, and one of the two American honorary members of the London chemical society. He was one of the original members of the National academy of sciences, was for some time its vice-president, and has declined an election to the presidency at the present session. At the time of his death he was professor of chemistry in the University of Pennsylvania. He is also a member of other American scientific societies, and was elected vice-president of the American association for the advancement of science in 1866. In 1873 he received the honorary degree of LL. D. from Columbia. He announced his intention in 1881 of writing a complete history of the "American Journal of Science" abstracts of the more important physical and chemical papers contained in foreign scientific journals, accompanied by references and by such critical observations as the occasion might demand. The purpose was steadily carried out until 1873, and these abstracts cover over 500 closely printed pages. Much of his original investigation has appeared in the "Contributions to Chemistry from the Lawrence Scientific School," and he has published very elaborate memoirs on certain cobalt bases, on new analytical methods, and on complex inorganic acids, discovering platino-tungstates, vanadio-tungstes and molybdates, as well as other exceedingly complicated compounds in inorganic chemistry. In physics he has published papers on the properties of luminous bodies, improved methods of gas analysis, and on the theory of the dynamo-electric machine. These have appeared principally in the "American Journal of Science" and the "American Chemical Journal." Dr. Gibbs has published no book, but as an indefatigable original investigator in the domain of chemistry and physics he has no superior in the United States.—Another son, Alfred, sol-
dier, b. in Sunnyside, L. I., 22 April, 1833; d. in Fort Leavenworth, Kan., 26 Dec., 1868. His family, disappointed in their wish to obtain a military appointment for their son, persisted in the effort, and as the one grew beyond the age within which the candidate is eligible, the claim for appointment was transferred to the next, and as persistently urged. The second son was compelled to give up his ambition, but he then received the long-sought commission. He was graduated at the U. S. military academy in 1846, assigned to the mounted rifles, and received two brevets during the Mexican war—that of 1st lieutenant for gallantry at Cerro Gordo, where he was wounded, and that of captain for his services at Garita de Brea, city of Mexico. He was also at Vera Cruz, Con-

treras, Churubusco, and Chapultepec. He was
aide-de-camp to Gen. Persifor F. Smith in Mexico, California, and Texas in 1848–56, was promoted to 1st lieutenant, 31 May, 1858, and served on the frontiers and in the Mexican war; he was wounded in a skirmish with Apache Indians at Cooke's Spring, N. M., 8 March, 1857, and taking part in the Navajo expedition of 1860. He was depot-commissary at Albuquerque, N. M., in 1860–41, was promoted to captain, 19 May, 1861, and on 27 Aug., 1861, was appointed on the field of battle at Santa Augustine Springs, N. M., he was paroled till exchanged, 27 Aug., 1862, and on 6 Sept. became colonel of the 130th New York regiment. He was engaged in the operations on the Merrimack River, S. Va., June, 1863, and in July and August of that year in organizing his command as a cavalry regiment, which was afterward known as the 1st New York dragoons. In 1864–5 he commanded a cavalry reserve brigade, and served under Gen. Sheridan on several of his cavalry raids. He was brevetted major, 11 June, 1864, 2nd lieutenant in 1867, lieutenant-colonel at Beverly Station, Va., lieutenant-colonel for services at the battle of Winchester, and on 19 Oct., 1864, became brigadier-general of volunteers. He commanded a cavalry brigade in the final attack and pursuit of the Army of Northern Virginia in March and April, 1865, and was made major-general in the Regular Army in 1867. He has written a number of articles on mathematics and astronomy, and several "Reports on the Electro-magnetic Theory of Light" (1882–3). He has also applied the methods of thermodynamics to chemical dissociation, and has developed a system of vector notation simpler than that of quaternions and more approximating to the German theory. The brevets are set up to and including that of major-general, U. S. army, for his services during the war. He was mustered out of volunteer service, 1 Feb. 1866, became major in the 7th cavalry on 28 July, and served in various forts in Kansas till his death.

GIBBS, Sir Samuel, British soldier, b. near New Orleans, La., 8 Jan., 1815. He became ensign in the 102d foot in October, 1783, lieutenant-colonel of the 10th West Indian regiment in 1802, brevet colonel in July, 1810, and major-general in June, 1818. He served at the battle of the Cape of Good Hope in 1796, was taken prisoner at Os- tend in 1798, commanded the 11th regiment at the attack of St. Martin's in the expedition against the Danish and Swedish islands, and led a brigade in Travaux on board the ship. He was second in command to Sir Edward Pakenham in December, 1814, and was killed in the battle of New Orleans in the following month.

GIBSON, James, merchant, b. in London about 1690; d. in the West Indies in 1752. In early youth he entered into business with a merchant in Barbadoes, where he married a native heiress of Ja- maica, retired from the service, and settled as a merchant in Boston, Mass. In 1745 he joined the Louisburg expedition to Cape Breton with 4,000 New England colonists, under Sir William Pepp- erell, and as paymaster, and on the capture and siege, was present at the surrender of the French garrison, and superintended the removal of the prisoners to France. In 1748 parliament voted him £547,155 as a reimbursement of his expenses, but this money was never paid. He returned to Boston, engaged in the West India trade, and died while on a visit to the islands. In 1745 he published an account of the Louisburg expedition, which was republished by a descendant under the title of "A Boston Merchant of 1745" (Boston, 1847).

GIBSON, James, soldier, b. in South Milford, Sussex co., Del.; d. in Fort Erie, Canada, 18 Sept., 1814. He was graduated at the U. S. military academy in 1808, appointed captain in 1810, assistant inspector-general in 1813, colonel and inspector-general in July of the same year, and colonel of the 1st infantry in July. In the Battle of Bladensburg, 24 Aug., 1812, he was engaged in the battle of Queenstown Heights, 13 Oct., 1813, and served with distinction in the campaign on the Niagara frontier in 1814. During the months of August and September of this year Gen. Drummond, of the British army, besieged Fort Erie, which was held by a volunteer force, for which he received the degree of Ph.D. For the three following years he was a tutor in Yale, and then spent several years in study at the universities of Paris, Berlin, and Heidelberg. In 1871 he became professor of mathematical physics in Yale, to which he was elected, and was elected a member of the National academy of sciences in 1879, and in 1886 was vice-president of the American association for the advancement of science, for the section of mathematics and astronomy, delivering an address on "Multiple Asciilites." His papers and speeches include memoirs on "Graphical Methods in the Thermodynamics of Fluids" (1872); "A Method of Geometrical Representation of the Thermodynamic Properties of Substances by Means of Surfaces," Part I. (1872); Part II. (1876) and several "Notes on the Electro-magnetic Theory of Light" (1882–3). He has also applied the methods of thermodynamics to chemical dissociation, and has developed a system of vector notation simpler than that of quaternions and more approximating to the German theory. The brevets are set up to and including that of major-general, U. S. army, for his services during the war. He was mustered out of volunteer service, 1 Feb. 1866, became major in the 7th cavalry on 28 July, and served in various forts in Kansas till his death.
mounted their guns, and destroyed their works. In this attack Col. Gibson received a wound, from which he recovered.

**GIBSON, John**, soldier, b. in Lancaster, Pa., 28 May, 1740; d. at Braddock's field, near Pittsburgh, 10 April, 1822. He received a classical education, and in 1757 joined the expedition against the Indians in which Fort Duquesne was captured. He removed to New York, and was taken prisoner, and rescued from the stake by a squaw that adopted him. He married the sister of Logan, an Indian chief, and became familiar with the Indian manners, language, and customs. At the close of hostilities, Gibson again settled at Fort Pitt, and in 1774 acted as the leader of the Shawnee towns. In the treaty that followed the battle of Point Pleasant, he negotiated between Logan, the Shawnee chief, and Lord Dunmore, and through his mediation many captive Indians were set at liberty. At the breaking out of the American Revolution, he was appointed to command a regiment, served with the army in New York, and in the Jersey retreat, and commanded the western military department from 1781 until peace was established. In 1781 he was a delegate from the Pennsylvania convention, subsequently was associate judge of the court of common pleas of Allegheny county, and major-general of militia. President Jefferson appointed him in 1801 secretary of the territory of Indiana, and he held this office until Indiana became a state in 1816. His brother, **George**, soldier, b. in Lancaster, Pa., 10 Oct., 1747; d. in Fort Jefferson, Ohio, 14 Dec., 1791, received an academic education, entered a mercantile house in Philadelphia, and made several voyages as supercargo to the West Indies, where he raised a company of a hundred men, and was appointed captain of a state regiment. His soldiers were distinguished for good conduct and bravery, and were known in the army as "Gibson's Lambs." In order to obtain a supply of gunpowder, he went into Kentucky with twenty-five picked men, and after a hazardous journey succeeded in accomplishing his mission. On his return he was appointed to the command of a Virginia regiment, joined Gen. Washington at Flat Rock, and was engaged in all the principal battles of the campaign of 1778. He retired to his farm in Cumberland county, Pa., after the war, and was county lieutenant until 1791, when he took command of a regiment in the St. Clair expedition against the Ohio Indians. At the battle of Miami, 4 Nov., 1791, he received a mortal wound.–**George** was a soldier, b. in Pennsylvania in 1783; d. in Washington, D.C., 29 Sept., 1861, entered the army from civil life, and was appointed captain of infantry, 3 May, 1808; was promoted major in 1811, and served through the war of 1812, as lieutenant-colonel of the 5th infantry. In 1816 he was appointed quartermaster-general, served with Gen. Andrew Jackson during the Florida campaign, was promoted commissary-general in 1818, and in 1826 brevetted brigadier-general for faithful service. He died of cholera before the Mississippi, and was interred in Maysville. Gen. Gibson was the head of the commissary department more than fifty years.

**Johnson, John Bannister**, jurist, b. in Carlisle, Pa., 8 Nov., 1780; d. in Philadelphia, Pa., 3 May, 1855. He was graduated at 1800, studied law, was admitted to the bar of Cumberland county, Pa., in 1803, and practiced in the counties of Carlisle and Beaver, and in Hagerstown, Md. In 1810-1 he represented Carlisle in the state legislature, and in 1818 was a justice judge of the 11th district of Pennsylvania. In 1816 he was promoted to the supreme court, and in 1827 became chief justice of Pennsylvania. By a change in the constitution in 1851, an amendment made the judiciary elective, and he was returned by a large majority. In 1836 he retired, but he remained until his death. Chief Justice Gibson was eminent as a Shakespearian authority, and relieved the tedium of his professional studies by readings from his favorite dramas.

**GIBSON, John Morison**, Canadian lawyer, b. in the township of T., Ont., 1790, Ont., 1 Jan., 1842. He was graduated at University college, Toronto, in 1863, studied law, and was admitted to the bar in 1867. He entered the law course at the University of Toronto, receiving the degree of LL.D., and the gold medal of the faculty in 1866, and was examiner in that faculty for the years 1871-2. He was elected a member of the senate of Toronto university in 1873 and 1878. He is a lieutenant-colonel of volunteers, has been an active member of that force since 1860, and was with his regiment of the Pennsylvania convention, subsequently was associate judge of the court of common pleas of Alleghany county, and major-general of militia. President Jefferson appointed him in 1801 secretary of the territory of Indiana, and he held this office until Indiana became a state in 1816. His brother, **George**, soldier, b. in Lancaster, Pa., 10 Oct., 1747; d. in Fort Jefferson, Ohio, 14 Dec., 1791, received an academic education, entered a mercantile house in Philadelphia, and made several voyages as supercargo to the West Indies, where he raised a company of a hundred men, and was appointed captain of a state regiment. He died of cholera before the Mississippi, and was interred in Maysville. Gen. Gibson was the head of the commissary department more than fifty years.
taught with 3,500 men to Spanish Fort, where he held the National forces at bay for two weeks, and then withdrew his entire command, under cover of darkness, threading a pathway only eighteen inches wide through a marsh. He was financially ruined by the war, but, resuming his profession in New Orleans, soon acquired a lucrative practice. In 1873 he was elected to congress as a Democrat, but was defeated. In 1874 he was again elected in 1874, 1876, 1878, and 1880. He was then sent to the U. S. senate, and took his seat 4 March, 1883. He may fairly be said to have been the father of the policy for the improvement of the Mississippi river, which he organized and pushed. He met with opposition and success. He has been the most pronounced opponent in the south of all forms of financial inflation and irredeemable issues. As a member of the ways and means committee he steadily advocated moderate measures of revenue reform, and resisted, alike the extreme protectionists and the free-traders. In 1882 he was selected by Paul Tulane as president of the board of administrators who were to manage his gift for education in New Orleans, now estimated at $1,950,000. Under his management Tulane became one of the foremost educational institutions of the Carolinas, and in 1890 went to Natchez as a missionary. After penetrating the forest alone, for six hundred miles, he reached the Cumberland river, took a canoe and paddled himself eight hundred miles from that stream to the Ohio, and thence down the Kanawha. He generally advocated, and successfully guided, the plan of making the Cumberland and laid the foundations of Methodism in the southwest. He continued alone upon this station till 1903, when, in a dying condition, he returned by way of the states of the interior. He was graduated at Princeton in 1860, took his medical degree at the University of Edinburgh in 1869, and was the pupil and associate of Sir Charles Bell, the eminent Scotch surgeon. After his return to the United States he began practice in Baltimore, and was one of the earliest professors of surgery in the University of Maryland. In 1831 he rendered essential service in the Baltimore riots, revisited Europe in 1834, and fought on the side of the allied forces at the battle of Waterloo, where he was slightly wounded. He was intimate with the surgeons Sir Astley Cooper, Vellepar, Abernethy, Hastings, and Halford, and was the friend and companion of Lord Byron. In 1819, having returned to the United States, he succeeded Dr. Phineas in the chair of surgery in the University of Pennsylvania, where he held it more than thirty years. Dr. Gibson made frequent visits to Europe, and also travelled in remote regions of Asia and Africa. At the age of seventy, having acquired a fortune, he retired from practice and resided at Newport, R. I. He was the first to perform the Caesarean operation successfully to both mother and child on the same patient. His works include "Principles and Practice of Surgery" (Philadelphia, 1824); "Rambles in Europe," containing sketches of eminent surgeons (1830); and "Lecture to Surgeons," "Physicians" (New York, 1841).— His son, Charles S. Bell, surgeon, b. in Baltimore, Md., 16 Feb., 1816; d. in Richmond, Va., 23 April, 1865, studied medicine in Philadelphia under his father. He was elected professor of surgery at Washington medical college, Baltimore, in 1842. He was again elected in 1845, 1846, 1847, 1848, and 1849. He was later elected to the Medical college of Richmond, Va. When that state seceded he was made surgeon-general, became the chief consulting surgeon and operator in Richmond, and died from heart disease caused by excessive labor and fatigue. He published among other papers a small pamphlet entitled "Statement of Facts in a Case of Distraction of the Femur." (Richmond, 1855.)

GIBSON, William Hamilton, artist and author, b. in Sandy Hook, Conn., 5 Oct., 1850. He studied at the Grammar School at Washington, Conn., and subsequently in the Polytechnic Institute, Brooklyn, and determined to devote himself to art as an illustrator. He began work in New York in 1870, after various discouragements, obtained a foothold as a specialist in botanical drawing, and became connected with the "Eclectic Agriculturist" and "Hearth and Home." He also drew hundreds of natural history subjects for the "American Cyclopaedia." He afterward became dissatisfied with work of this character, and furnished illustrations for sundry magazine articles on natural history. He was engaged on the "Art Journal," and was also one of the corps of illustrators of "Picturesque America." His first notable appearance in the magazines was in connection with an article in "Harper's Magazine" on "Birds and Plumage," which he was commissioned to the extent of work he undertook. He was regular exhibitor at the water-color exhibition in New York since 1872, and became a member of the water-color society in 1885. His large "Autumn Study" was shown in the first American water-color exhibition in London in 1875, and he is the leading exponent of the "Northern School." He is a member of the Authors club and the Art union. The books that he has illustrated include "The Heart of the White Mountains" (1882); "Nature's Serial Story" (1885); and various collections of poems, among others the "Pictorial Edition of Longfellow" and "In Berkshire with the Wild Flowers," by Dora and Elaine Goodale. The works of which he is both author and illustrator are "Camp-Life in the Woods" and "Tricks of Trapping and Trap-making" (New York, 1876); "Pastoral Days, or Memories of a New England Year" (1883); "Highways and Byways, or Sauderings in South and Long Island" (1883); and "Happy Hunting-Grounds, a Tribute to the Woods and Fields" (1886).
skirmish with Indians, in which six of the soldiers were killed and six wounded. Mr. Giddings afterward erected a monument there to the memory of his fallen comrades. After the war he became a teacher, studied law, and was admitted to the bar in 1830. He was elected to the Ohio legislature in 1826, served one term, and declined a re-election. In 1838 he was elected, as a Whig, to congress, where he had hardly taken his seat before he became prominent as an advocate of the right of petition, and the abolition of slavery and the domestic slave-trade. He had been known as an active abolitionist before his election; and he at first attempted to discuss the subject on the floor of congress, 11 Feb., 1839, was thwarted by the gag rule; but two years later, 9 Feb., 1841, he delivered a notable speech on the war with the Indians in Florida, in which he maintained that the contest was waged solely in the interest of slavery, the object being to enslave the Moors of that state, who were affiliated with the Seminoles, and break up the asylums for fugitives. This subject he set forth more elaborately years afterward in his "Exiles of Florida" (Columbus, Ohio: new ed., New York, 1840). In the autumn of 1841 the "Creole" sailed from Virginia for Louisiana with a cargo of slaves, who got possession of the vessel, ran into the British port of Nassau, N. P., and, in accordance with British law, were set free. In the excitement that followed, Daniel Webster, secretary of state, wrote to Edward Everett, U. S. minister at London, saying that if the government would demand indemnification for the owners of the slaves. Thereupon Mr. Giddings, in Congress, 1842, offered in the house of representatives a series of resolutions in which it was declared that, as this very was a violation of natural right, it had no force beyond the territorial jurisdiction that created it; that when an American vessel was not in the waters of any state it was under the jurisdiction of the United States alone, which had no authority to hold slaves; and that the mutineers of the "Creole" had only resumed their natural right to liberty, and any attempt to re-enslave them would be unconstitutional and dishonorable. So much excitement was created by these resolutions that Mr. Giddings, on the advice of his friends, withdrew them, but said he would present them again at some future time. The house then, on motion of John Minor Botts, of Virginia, passed a resolution of censure (125 to 60), and by a vote of 185 the question denied Mr. Giddings an opportunity to speak in his own defense. He at once resigned his seat and appealed to his constituents, who re-elected him by a large majority. In the discussion of the "Amistad" case (see CON), Mr. Giddings took the same ground as in the similar case of the "Creole," and in a speech a few years later boldly maintained that to treat a human being as property was a crime. In 1843 he united with John Quincy Adams and seventeen other members of congress in issuing an address to the people of the country, declaring that the annexation of Texas "would be identical with dissolution"; and in the same year he published, under the pen-name of "Pacificus," a notable series of political essays. A year later he and Mr. Adams represented Massachusetts legislature, in which they declared that the liberties of the American people were founded on the truths of Christianity. On the Oregon question, he held that the claim of the United States to the whole territory was just, and that it should be determined by the Free-soil administration would not keep the promise on which it had been elected—expressed in the motto "Fifty-four forty, or fight"—and his prediction was fulfilled. In 1847 he refused to vote for Robert C. Winthrop, the candidate of his party for speaker of the house, on the ground that his position on the slavery question was not satisfactory; and the next year, for the same reason, he declined to support the candidacy of Gen. Taylor for the presidency, and acted with the Free-soil party. In 1849, with eight other congressmen, he refused to support any candidate for the speakership who would not pledge himself before the standing committees that petitions on the subject of slavery could obtain a fair consideration; and the consequence was the defeat of M. Winthrop and the election of Howell Cobb, the Free-soil candidate. Mr. Giddings opposed the compromise measures of 1850, which included the fugitive-slave law, and the repeal of the Missouri compromise, taking a prominent part in the debates. In 1850, being charged with wrongfully taking important papers from the executive department, he was investigated, and was exonerated by a committee that was composed chiefly of his political opponents. It was shown that the charge was the work of a conspiracy. In 1856, and again in 1858, he suddenly became unconscious, and fell while addressing the house. His career as a representative of twenty years' continuous service ended on 4 March, 1859, when he declined another nomination. In 1861 President Lincoln appointed him U. S. consul-general in Canada, which office he held until the time of his death. One who knew him personally writes: "He was a broad-shouldered, of very stalwart build, and was considered the most muscular man on the floor of the house. Whenever he spoke he was listened to with great attention by the whole house, the members frequently gathering around him. He had several affairs on the floor, but invariably came out ahead. On one occasion he was challenged by a southern member, and promptly accepted, selecting as the weapons two raw-hides. The combatants were to have their left hands tied together by the thumbs, and at a signal castigate each other till one cried enough. A look at Mr. Giddings's stalwart frame influenced the southerner to back out." Mr. Giddings published a volume of his speeches (Boston, 1859), and wrote "The Rebellion: its Authors and Causes," a history of the last war. He was a learned man, and a man of great influence, which was issued posthumously (New York, 1864).
was then regarded as in the far west. He reached the city in April, 1816, assembled a small congregation, and became the pioneer missionary of the Presbyterian church to the country west of the Mississippi. In 1816 Mr. Giddings organized a Presbyterian church at Bellevue settlement, eighty miles southwest of St. Louis, and during the next ten years formed eleven other congregations—five in Missouri, and six in Illinois. In the spring of 1822 he explored Nebraska and Kansas territories, preaching and organizing missions among the Indians. On this tour of many weeks, without white companions, and hundreds of miles from any white settlement, he visited several Indian nations, held councils with their chiefs, and was received with hospitality. In 1826 Mr. Giddings was installed pastor of the 1st Presbyterian church in St. Louis. He was an active member of the first Bible, Sunday-school, and tract societies of Missouri, and of the first colonization society in that state.

Gifford, Archer, lawyer, b. in Newark, N. J., in 1797; d. there, 13 May, 1859. He was graduated at Princeton in 1814, was admitted to the bar in 1818, and began to practise in his native town, where he continued to reside till his death. He was appointed by President Jackson collector of customs for the port of Newark in 1818, and held this office during the last year of his life. He was one of the most vigorous and active members of the Republican party, and his influence was felt by all parties. He died in 1859.

Gifford, Robert Swan, artist, b. in Nau- shon, Mass., 28 Dec., 1840. He studied under Albert Van Beest, the Dutch marine painter, opened a studio in Boston in 1864, and resided there till he settled permanently in New York, in 1866. He was elected an associate of the National Academy in 1867, and an academicians in 1878. He made an extensive sketching tour in Oregon and California in 1869, and furnished views in these states to "Picturesque America" (1872-3). He went to Europe in 1877, was in Algiers in 1879 and the Great Basin in 1878, and in 1870 in Brittany and southern France. He has been a member of the American society of painters in water-colors since its organization in 1866, is a member of the New York etching club, the British society of painter-potters, the artist's fund society, and the Society of American artists. He is best known through his pictures of oriental life. Among his oil-paintings are "Scene at Manchester, Cape Ann" (1867); "Mount Hood" (1870); "Halting for Water," and "Passenger Boats on the Nile" (1874); "The Bosetti Garden" (1875); "The Mosque of Mahmed Ali," which was awarded a medal at the Centennial (1876); "The Borders of the Desert," "New England Cedars" (1877); "Salt Boats at Dartmouth," exhibited at the Paris salon (1878). His "Deserted Whaler," in the water-color exhibition (1867), established his reputation. Other water-colors by his hand are "Day on the Sea-Shore" (1869); "Block House at Eastport" (1874); "Venetian Companions" (1876); "The Oasis of Filachia, Algeria" (1877). His recent works include "Conquitt Cliff" (1882); "New Zealand" (1883); "The Great Wave," and "Near the Coast," for which he was awarded $2,500 in the First prize fund exhibition of the American art association (1885); and "Autumn in New England" (1886).—His wife, Frances Elliot, artist, b. in New Bedford, Mass., 1844, received her art education at the Cooper institute, New York city, and under Samuel Gerry, in Boston. She has made a specialty of painting birds with landscapes, and has contributed illustrations to the magazines.

Gifford, Sandford Robinson, painter, b. in Greenfield, Mass., 1828. In July, 1843, d. in New York, 29 Aug., 1880. He studied at Brown in 1842-4, and, removing to New York in 1845, was a pupil in perspective, drawing, and anatomy in the studio of John Rubens Smith, also attending lectures on anatomy. At this time he began to paint in the fashionable studio of a painter in Catskill mountains, and among the Berkshire hills, where his attention was directed for the first time to landscapes. In 1851 he was elected an associate and three years later a member of the National Academy. In 1855-7 he studied in Europe. When the civil war began, he joined the 7th New York regiment, and some sketches of bivouac and battle are reminiscences of his six months' experience in the army. During the next ten years he visited Colorado, California, Utah, Oregon, British Columbia, and the Rocky Mountains. He was in many of the Century and Union league clubs, and his associates were attached to him for qualities that he possessed distinct from his merits as an artist. At a meeting of the Century club, held the day after his death, John Burroughs defined his life and character; Worthington Whittredge, another entitled "Reminiscences of Gifford"; Jer- vis McEntee, one on "Gifford, the Friend, the Artist, the Man"; and poems were read by Edmund C. Stedman and Richard H. Stoddard. Mr. Gifford's paintings are remarkable for their brilliancy of color. His pictures are the interpretation of the profounder sentiments of nature rather than of her superficial aspects. His most successful works are "Baltimore in 1802" (1862); "Morning in the Adirondacks" (1867); "Mount Mansfield" (1869); "San Giorgio, Venice" (1866); "Tivoli" (1871); "Fishing-Boats" (1879); "Pal- lanza," "Sunset on the Sweet Water, Wyoming," "Venetian Sails" (1874); "At Ben-Hassan" and "Near Palermo" (1876); "Leander's Tower," "Sunset on the Hudson," and "Fishing Boats of New York" (1877); and "San Giorgio" (1878). At the Centennial of 1876 Mr. Gifford was commissioned for his landscape paintings. His "San Giorgio," "Venice," and "Mount Renier" were exhibited at the Paris salon (1878).

Giger, Germain, a clergyman, b. in Philadelphia, Pa., 6 June, 1822; d. there, 11 Oct., 1865. He was graduated at Princeton in 1841, studied theology there, and in 1860 was ordained by the New Brunswick presbytery. He was then appointed tutor in Princeton college, elected adjunct professor of Greek in 1846, and professor of Latin in 1854. Failing health compelled his resignation of this chair in 1865. Prof. Giger expended much time and effort for the education of the negroes, to whom he preached regularly in Witherspoon church at Princeton. He bequeathed his books and thirty thousand dollars to the college. In 1854 he removed to the United States and opened a studio in Brooklyn, N. Y. In 1851 he was elected a member of the Academy of design, and was the first president of the Brooklyn art academy. In 1870 he returned to France, where he resided until his death. The best known of his landscapes
GILBERT, Charles Champion, soldier, b. in Zanesville, Ohio, 1 March, 1822. He was graduated at the U. S. military academy in 1846, and assigned to the 3d infantry. He served in the war with Mexico, was in the garrison at Vera Cruz in 1847-8, in the city of Mexico in 1848, and then engaged in frontier duty until 1850. He became an assistant professor at West Point on 28 Feb., 1850, was promoted to a 1st lieutenancy on 10 June, and fulfilled his duties until 28 Sept., 1853, after which he was on duty at various forts in Texas until the beginning of the civil war. He distinguished himself in conflicts with Indians, and was advanced to a captaincy on 8 Dec., 1853. During the civil war he served in various commands and was present at the battle of Wilson's Creek on 10 Aug., 1861. On 21 Sept., 1861, he was inspector-general of the Department of the Cumberland and of the Army of the Ohio until 23 Aug., 1862. During this time he was engaged in the march to Pittsburg Landing in March and April of 1862, and in the battle of Shiloh on 7 April, when he was brevetted major. He was promoted to a brigadier-generalship of volunteers on 9 Sept., 1862, became acting major-general in command of the Army of Kentucky, engaged in the battle of Perryville on 8 Oct., 1862, and in the battle of Murfreesboro in December, and was attached to various forts until 21 Sept., 1866, when he was transferred to the 28th infantry. He became lieutenant-colonel of the 7th infantry, 8 July, 1868, colonel of the 17th infantry on 19 May, 1881, and was retired from active duty on 1 March, 1885.

GILBERT, Edward, editor, b. in Albany, N. Y.; d. in California in 1862. He received a public-school education, and became a member of Col. Stevenson’s New York regiment. He afterward removed to California, settled in San Francisco, and served as representative in congress from 13 Sept., 1850, till 3 March, 1851, when he returned to his adopted state and engaged in the practice of law. He soon after founded and became editor-in-chief of the daily “Alta California,” thus being the pioneer of the daily press of San Francisco. A persistent and efficient advocate of the abolition of slavery. He was indirectly instrumental in procuring the recall of the governor of the state provoked a retort from Gen. James W. Denver, then secretary of state of California, and a challenge followed. A duel with rifles resulted, and Gilbert fell.

GILBERT, Grove Sheldon, artist, b. in Clinton, N. Y., Aug., 1805; d. in N. Y., 23 March, 1885. He was educated at Middlebury academy, and for a time studied medicine. An early fondness for drawing had given him a desire to be an engraver, and at the age of twenty, seeing a portrait for the first time, he at once decided to become an artist. Subsequently obtaining some colors from a sign-painter, he made a portrait of
his sister on the lid of a chest, which proved to be a capital likeness. For several years he painted in Fort Niagara and Toronto, finally settling in Rochester in 1834, where he afterward remained. He then devoted himself exclusively to portrait painting, and was eminently successful. In 1848 he was elected to honorary membership in the National Academy of Design, and in 1858 became an honorary member of the Albany Academy of Arts.

—His son, Grove Karl, geologist, b. in Rochester, N. Y., June 6, 1843, was graduated at the University of Rochester in 1862, and subsequently devoted his attention to geology, being for a time associated with Prof. Henry A. Ward, the naturalist, in Rochester. In 1869 he became a volunteer assistant on the Ohio geological survey, and in 1871 received the appointment of geologist to the survey west of the 100th meridian under Lieut. George M. Wheeler. Three years later he was made assistant geologist under Maj. John W. Powell in the geographical and geological survey of the Rocky mountain region, and held this appointment until July, 1879, when he became geologist to the U. S. geological survey, having charge of the division of the Great Basin, and more recently of the Appalachian division. He is a member of the American association for the advancement of science in 1887, having charge of the section on geology and geography. Mr. Gilbert was president of the American society of naturalists in 1885-6, and in 1883 was elected a member of the National Academy of sciences. He has been a large contributor to technical journals and to the proceedings of societies. His papers treat principally of the sculptured land by rain and rivers, the general of the topography of lake-shores, and the quarternary history of the Great Basin. Many of these have appeared in the volumes of the official reports of the Ohio and the government surveys. He wrote the "Report on the Geology of the Henry Mountains," (Washington, 1877), and edited and partially wrote the "Report on the Geology and Resources of the Black Hills of Dakota" (1890).

GILBERT, Sir Humphrey, English navigator, b. in Dartmouth, England, in 1539; lost at sea, 10 Sept., 1585. He chose the military profession, fought in the north of England and Scotland against the Roman Catholics, and was given command of an army sent to subjugate the Irish. For his successful conduct of the campaign he was knighted and made governor of Munster in 1570. Soon after his return to England he commanded a fleet that was sent to blockade Flushing. On his return he published a pamphlet entitled "A Discourse of Discoveries, New Passages, and New Passage to Tuscany." He was one of the most ardent advocates of the theory of a northwest passage, and after aiding Prohibisher and other mariners with his fortune and influence, determined to become an explorer himself. He obtained letters-patent from Queen Elizabeth, authorizing him to make discoveries during six years in all barbarous countries not in the possession of Christians, and to occupy and dispose of them in favor of English subjects under the crown. His first expedition was undertaken in 1581, but a tempest destroyed the fleet of 25 vessels. The admiral returned to port with the others, which were badly damaged. He mortgaged his estate to raise money for a new expedition, which started on 11 June, 1583, for Newfoundland. It consisted of two decked vessels and three sloops, manned by 290 men. Walter Raleigh, who commanded the largest ship, became alarmed at the amount of sickness on board, and on the third day put back for England. Gilbert arrived at the coast of Newfoundland after several narrow escapes from storms and icebergs. He landed at St. John, and, despite the presence of thirty-six vessels of various nationalities, took possession of the country in the name of his sovereign. He expelled the Portuguese, who had settled on the island, and published statutes providing that the religion of the country should follow the Church of Venice; against the sovereignty of the queen should be punishable with death as a traitor, and that any person who spoke disrespectfully of the queen should have his ears cut off and his land or vessels confiscated. His colony turned out disastrously. A large number of sailors deserted, others died, and finally Gilbert set sail for Narumbeigs, afterward called New England. A tempest dispersed the flotilla, and the principal vessel founders. Sir Humphrey's vessel went down in a storm off the Azores while on the course to England. Robert Clarke returned to Newfoundland alive, after great sufferings.

GILBERT, John Gibbs, actor, b. in Boston, Mass., 27 Feb., 1810. He was educated in the public schools of his native city, and at the age of fourteen placed in a day school by his father. He then became a stock actor, on the pay of three dollars per week, and, dissatisfied with his condition, sought an engagement with Caldwell, manager of the New Orleans theatre, and for about four years played "general utility" in the southwestern theatres. Subsequently he acted for five years in Boston, one year in New York city, and again five years in Boston. In 1847 Mr. Gilbert went to London and joined the company of the Princess's theatre, having been engaged to represent the parts of old men in standard comedies. His first appearance there was as Sir Robert, in "The Poor Gentleman." After the close of the London season he visited Paris, for the purpose of study. In 1848 Mr. Gilbert returned to this country, and appeared under the management of Hamblin, at the New York Park theatre. His last performance was in the part of Admiral Kingston in "Naval Engagements," the evening before it was destroyed by fire, after a few months of unsuccessful management. Thereafter he joined Hamblin's company at the Bowery theatre. From the latter place, in 1851, he went to Philadelphia, and then to Boston until 1857, when he returned to Philadelphia, remaining until 1863. In 1863 Mr. Gilbert joined the company of Wallack's theatre in New York city, with which he has since been
Gilbert. He has been twice married. His second wife, née Sarah H. Gavett, is living. Mr. Gilbert's career of sixty years before the public has been unmarked either by vicissitudes or adventures. Away from the theatre his life has been quiet and retired. He is one of the few performers before the public whose career compasses more than two generations, from the days when he played in connection with Booth, and the Kemble. His range of characters has been wide, in comedy and tragedy, and, at the present time (1872) he is among the few who are able to portray effectively the fine old English gentleman of other days. Among his most popular personages are Sir Peter Teazle, Sir Anthony Absolute, LoveLetters, Job Thornberry and Old Dormon. His ability to learn new parts is unimpaired, and after a few readings of old ones that were favorites with him many years ago, he is able to recite them with precision. With all his experience he has told the writer of this article that on first nights he is usually more or less nervous, and in former years was several times overcome by stage-fright. Although well nigh an octogenarian, he looks more like a man of sixty, and ascribes his freedom from many of the ailments of advanced age to constant bathing and cold-water treatment.

Gilbert, Linda, philanthropist, b. in Rochester, N. Y., 1847. She removed to Chicago, Ill., with her parents when she was about four years old, and was educated at St. Mary's convent in that city. She became interested at an early age in efforts to improve the condition of prisons and prisoners, and has endeavored "to remove the conditions that produce crime, by a wholesome system of industry and culture." She has succeeded in placing in various prisons, before 1875, from 1,000 to 3,000 volumes each, and aggregating 30,000 volumes. In 1876 the "Gilbert library and prisoners' aid society" was incorporated under the laws of the state of New York, and Miss Gilbert became president of its board of managers. The objects of the society are to improve prison discipline, to place libraries in every prison and jail in the country, to look after the prisoner's family in need and worthy of aid, and to help convicts to lead upright lives after their discharge. Although lack of funds has prevented the society from doing any work, the society is now in existence.

Miss Gilbert continues to labor as an individual. She has patented several devices, including a noiseless rail for railroads, and a wire clothes-pin, and has used these for the purpose of gaining money to carry on her philanthropic work. For the same purpose she has established "Linda Gilbert's Tax and Trade Record."

Gilbert, Mahlon Norris, P. E. bishop, b. in Morris, N. Y., 23 March, 1848. His early education and training were obtained at Fairfield Seminary, N. Y., and Hobart College in 1866, but, owing to pulmonary troubles, was compelled to leave before the end of the course. He spent two years in Florida for the benefit of his health, after which he took charge of the School of the Good Shepherd, at Ogden, Utah. He became the Seabury diocesan school at Faribault, Minn., in 1872, was graduated in 1875, and was ordained deacon by Bishop Whipple. Shortly afterward he went to Montana and took charge of a large mission field at Deer Lodge, in the western part of the territory. He was ordained priest by Bishop Tuttle in October, 1875, and continued his labors partly at Deer Lodge and partly at Helena, for five or six years, meeting with abundant success. In January, 1881, he was called to the rectorship of Christ Church, St. Paul, Minn., and also established missions at Winona, Mankato, and Randolph street. He has received the degree of D. D. from Seabury divinity-school and also from Racine college. Dr. Gilbert has been actively engaged in diocesan work, was a deputy to the general convention of 1886, and was elected assistant bishop of Minnesota the same year. He was consecrated on 17 Oct., 1886.

Gilbert, Nathaniel, lawyer. He was speaker in the house of assembly in Antigua, West Indies, and is distinguished as the founder of Methodism in those islands. While in England in 1758, he and two of his slaves heard a Methodist preacher, and all became converts. On his return to the West Indies, Gilbert held religious meetings in his own house, became a Methodist preacher, and founded a society, chiefly of blacks, which was the beginning of the Wesleyan mission in the Archipelago.

Gilbert, Walter Raleigh. He was a nephew of Sir Walter Raleigh, and commanded a vessel containing 120 colonists in the expedition to settle at the mouth of the Kennebec river in 1607. Arriving at Monhegan island on 11 Aug., a fort was built at Cape Small, named after Gilbert, and named St. George. Gilbert was appointed administrator. Becoming by the death of his brother the heir to the family estates in England, and the storehouse of the colony being burned, he returned to England the following year, the whole colony accompanying him.

Gilbert, Rufus Henry, inventor, b. in Guilford, N. Y., 25 Jan., 1832; d. in New York city, 10 July, 1885. He served an apprenticeship with a manufacturing firm in Corning, N. Y., studied medicine with Dr. Willard Parker, of New York city, and was graduated at the College of physicians and surgeons. At the beginning of the civil war he joined the Duryea zouaves as surgeon, and served through the war, at the battle of Big Bethel the first surgical operation that was made under fire during the struggle. He was afterward medical director to the division of the U. S. army hospitals. His health becoming impaired, he gave up active practice and became assistant superintendent of the New Jersey central railroad. While thus occupied he was led to study the question of rapid transit in New York city. His ideas on the subject are in account of his experiences as a physician, and in view of the excessive mortality in overcrowded
tegment-houses. His first notion was a pneumatic tube, and this was afterward elaborated into the present elevated railroad system. He devised several methods for two years before he obtained a charter at Albany for an overhead tubular pneumatic railway, under the title of the "Gilbert elevated railroad company," for which he was unable to obtain a franchise. The original elevated railway (1867) extended from Battery place through Greenwich to the upper end of the park. The Corcoran street was soon added. The horse-car companies fought against the project with every weapon, looking on the company as competitors and intruders upon their vested privileges. The contest ended in favor of Dr. Gilbert. The road was begun, but the work soon stopped, and eighteen months of litigation followed. It was not until October, 1877, that the company were enabled to proceed. The Sixth avenue road was built, and Dr. Gilbert was at first a large holder of the stock. He was superseded in the management in 1876, and the name of the company was changed to the Metropolitan elevated railroad company. His stock passed out of his hands, extensive litigation followed, charges of fraud were made against his associates, and his death was hastened by anxiety and disappointment.

Dr. Gilbert was a member of the Colossus of Philadelphia, of several medical societies, of the Academy of natural sciences, and of the Pennsylvania historical society. He spent many years in making a collection of books, papers, autograph letters, and manuscripts relating to American medical history, biography, and literature. "Had at the time of his death left an unpublished work as the result of his researches." His brother, David McConaughy, clergyman, b. in Gettysburg, Pa., 4 Feb., 1838, received his classical and theological education in Pennsylvania college and Theology, at Gettysburg, Pa., where he was graduated in 1857. He was ordained to the Lutheran ministry in 1860, and received the degree of D.D. from Roanoke college, Va., in 1860. He has been pastor of Lutheran congregations, at Staunton, Va., in 1869-83, Savannah, Ga., in 1883-71, and New Brunswick, N.J., in 1871-73, and at Winchester, Va., since April of the latter year. He is a leader in ecclesiastical affairs in the southern church, and has held various places of honor and trust in the southern Lutheran synods. For the past five years he has been president of the Evangelical Lutheran synod of Virginia. In 1884-5 he took an active part in the efforts to unite the Lutheran synods in the south on a purely confessional basis, and when, on 25 June, 1886, the united synod in the south was organized, he was chosen its first president. His published works include: "The Lutheran Church in Virginia, 1776-1876" (New Market, Va., 1876); "The Praises of the Lord in the Story of our Fathers, a Sketch of the Lutheran Church at Winchester" (1877); "The Synod of Virginia, Its History and Work," "The Attestation and Its Theory Briefly Examined" (1879); and "Mulhengers's Ministry in Virginia, a Chapter of Colonial Lutheran Episcopal Church History." (1884). Besides these, he has published various articles and sermons, doctrinal and practical.

GILBERT, Walter Bond, musician, b. in Exeter, England, 21 April, 1820. He gave early evidence of musical talent, and when quite young was placed under Mr. Angel, organist of Exeter cathedral, as an articled pupil for five years, after which he studied the organ under Dr. Wesley, of Winchester, and orchestra under Sir Henry Bish. He took the degree of bachelor in music at Oxford in 1854, became fellow of the College of organists in 1858, and in 1857 was made chief of 176. His degree of doctor in music from Trinity college, Toronto, Canada. In 1869 he was appointed organist of Trinity chapel, New York, which place he still (1887) holds. His compositions and publications are numerous, and include two oratorios, "St. John's Passion," and "The Revelation of Israel." He was a member of the New Hampshire legislature and also register of probate for Sullivan county. In 1840 he was appointed an associate justice of the supreme court of New Hampshire, and in 1846 became chief justice of the courts of that state, and in 1847 became chief justice of the United States court of claims in 1855, and continued in that office until his death. Judge Gilchrist published a "Digest of New Hampshire Reports" (Concord, 1846).

GILBERT, William Kent, physician, b. in Gettysburg, Pa., 28 Dec., 1800; d. in Philadelphia, Pa., 28 June, 1880. His father, David (1803-76), was for many years professor of surgery in the medical department of Pennsylvania college. The son was graduated at Pennsylvania college, Gettysburg, in 1849, and at the Pennsylvania medical college in 1833. After some time spent in Europe he became resident physician to the Philadelphia hospital, holding that appointment for two years, then settled in Philadelphia as a regular practitioner, and continued so until his death. For some time he was consulting physician to the hospital committee of the Philadelphia hospital, and from 1878 till 1881 he held the office of coroner of Philadelphia county. Dr. Gilbert was a member of the Colossus of Philadelphia, of several medical societies, of the Academy of natural sciences, and of the Pennsylvania historical society. He spent many years in making a collection of books, papers, autograph letters, and manuscripts relating to American medical history, biography, and literature. He was a member of the New Hampshire legislature and also register ofprobate for Sullivan county. In 1840 he was appointed an associate justice of the supreme court of New Hampshire, and in 1846 became chief justice of the courts of that state, and in 1847 became chief justice of the United States court of claims in 1855, and continued in that office until his death. Judge Gilchrist published a "Digest of New Hampshire Reports" (Concord, 1846).
tariff was investigated. In 1839 he became judge of the district court of South Carolina, which office he held until his death in 1858.

**GILCHRIST, William Wallace**, musician, b. in Jersey City, N. J., in 1846. He removed with his parents to Philadelphia, and at nine years of age began a course of musical study under Prof. H. A. Clarke, of the University of Pennsylvania. In 1862 he went to Cincinnati and became organist of the New Jerusalem church. In 1883 he returned to Philadelphia, where he has since resided. He has won three prizes for compositions from the Mendelssohn glee club of New York city, and in 1892 the Cincinnati May festival prize was awarded by Renette, Saint Saëns, and Theodore Thomas to his setting of the 40th Psalm.

**GILDER, William Henry**, clergyman, b. in Philadelphia, Pa., 17 Sept., 1812; d. at Brandy Station, Va., 13 April, 1864. His father, John Gilder, was a member of the Pennsylvania legislature, and he attended Girard college. He was educated at Wesleyan university, and afterward received the degree of A. M. from Dickinson. At the age of twenty-one he became a preacher in the Methodist church, and was afterward ordained a Presbyterian minister, and spent the greater part of his years in the southern states, going as far as New Orleans. In 1840 he began the publication of the "Philadelphia Repository," a literary monthly, but discontinued it at the end of a year. Subsequently he published for a few years in Philadelphia the "Gilder's Oracle," and in 1851 he founded the "Gilder's Magazine," which was published until 1865.

**GILDER, William Henry**, editor, b. in Charleston, S. C., 28 Oct., 1831. He was graduated at Princeton in 1849, and then studied at the universities of Berlin, Bonn, and Göttingen in Germany, and then returned to the United States, and the university, he was called to the professorship of Greek there, and has since held that appointment. He has received the degrees of L. L. D. from William and Mary and Harvard in 1889, and of D. C. L. from the University of the south in 1884. He has been professor of classics in the Johns Hopkins university, as a Greek scholar, and has edited the "American Journal of Philology," which was founded in Baltimore in 1838. He has published six Latin textbooks (New York, 1857-85) and editions of "Persius" (1875); "Justin Martyr" (1876); and the "Olympian and Parnassian Poets of Pindar" (1885).

**GILDERLEBEEG, Benjamin**, editor, b. near Norwalk, Conn., 5 Jan., 1791; d. in Tazewell county, Va., 29 June, 1878. He was graduated at Middlebury college in 1814, and after teaching in Mount Zion, Ga., until 1817, he entered Princeton theological seminary, but at its close was valedictorian. He became editor of "The Missionary" in 1819, and was ordained an evangelist of the Presbyterian church in August, 1823. His editorial labors continued, and he had charge of "The Christian Observer" from 1826 to 1846. He then removed to Richmond, Va., and became sole editor of "The Watchman and Observer" until 1856, when for the four ensuing years he was associated with the Rev. Moses D. Hoge, D. D., and Rev. Thomas V. Moore, D. D., in the editorship of "The Central Presbyterian." During his residence in Virginia he preached whenever it was possible, especially in the Virginia penitentiary, where his work was very successful. In advanced years his sight failed him, but he continued his ministry long afterward.

**GILES, Chauncey**, clergyman, b. in Charlestown, Mass., 25 Aug., 1818. On these occasions, as well as in his arctic expeditions, he acted as correspondent of the New York "Herald." He has published "Schwartz's Search." (New York, 1851) and "Ice-Pack and Tundra." (1883). The latter he has translated into French, under the title "L'Expédition du Recru de l'Along du Jeanette."—Another son, Richard Watson, editor, b. in Bordentown, N. J., 8 Feb., 1844, was educated mainly in his father's school. As a member of Landis's Philadelphia battery, he enlisted for the "enquiry" campaign in the summer of 1863, when the Confederate army invaded Pennsylvania, and took part in the defense of Carlisle. He joined the staff of the Newark "Newark "Advertiser," in 1865, and in 1868, with Newton Crane, established the Newark "Morning Register." In 1869 he became editor of the paper, and in 1871 the magazine was merged into "Scrivener's Monthly" (now the "Century") and he was associated with the editor of the new periodical. On the death of Dr. J. G. Holland in October, 1881, Mr. Gilder succeeded him as editor-in-chief. He received the degree of LL. D. from Dickinson college in 1884.

**GILDERSLEEVE, Basil Lanman**, educator, b. in Charleston, S. C., 23 Oct., 1831. He was graduated at Princeton in 1849, and then studied at the universities of Berlin, Bonn, and Göttingen in Germany, and then returned to the United States, and the institution of the Johns Hopkins university, he was called to the professorship of Greek there, and has since held that appointment. He has received the degrees of L. L. D. from William and Mary and Harvard in 1889, and of D. C. L. from the University of the south in 1884. He has been professor of classics in the Johns Hopkins university, as a Greek scholar, and has edited the "American Journal of Philology," which was founded in Baltimore in 1838. He has published six Latin textbooks (New York, 1857-85) and editions of "Persius" (1875); "Justin Martyr" (1876); and the "Olympian and Parnassian Poets of Pindar" (1885).
1868 he was consecrated to the office of ordaining minister, corresponding to bishop in other churches, and in 1873 was the New Church President of the general convention of the church of the New Jerusalem in the United States. This office, the highest in the gift of his church, he has since held by annual re-election. During his residence in New York he edited the "Children's New Church Magazine" for four years and the "New Church Chronicle" for six years. He has published about two hundred discourses as tracts, many of which have been translated into French, German, and Italian. His other publications include "Man as a Spiritual Being," which has been translated into French, German, Norwegian, and Swedish (New York, 1879); "Stories for Children" (1867-70); "The Incarnation" (1870); "Heavenly Blessedness" (London, 1872); "The Second Coming of the Lord" (Philadelphia, 1879); "Perfect Prayer" (1880); and "Valley of Diamonds" (London, 1881).

GILES, Henry, clergyman, d. in Croftford, County Wexford, Ireland, 1 Nov., 1809; d. near Boston, Mass., 10 July, 1882. He was educated in the Royal academy at Belfast, and was brought up in the Roman Catholic faith. Subsequently he united with the Dissenting church and became a minister of that denomination, preaching for two years in Greenock, Scotland, and then for three years in Liverpool, England. In 1809 he took an active part in the controversy between the Unitarians and Episcopalians, and delivered four of a series of lectures in Liverpool. In connection with the other Unitarian lecturers being James Martin and John H. Thom. He came to the United States in 1840, and soon established for himself a reputation as a brilliant lecturer. He addressed many literary societies and library associations in the United States, and wrote lectures on Irish and other subjects. He preached occasionally, but during the latter part of his life dwelt in retirement in the suburbs of Boston. Mr. Giles wrote much for periodicals, and was the author of essays that were marked by ingenuity of thought, fulness of diction, and fervor of style. These include "Lectures and Essays" (2 vols., Boston, 1845); "Christian Thought on Life" (1836); "Illustrations of Genius in Some of Its Applications to Society" (1833); "Human Life in Shakespeare" (1868); and "Lecturer's Essays on Irish and Other Subjects" (New York, 1869).

GILES, William Branch, statesman, b. in Amelia county, Va., 12 Aug., 1792; d. in Albemarle county, Va., 4 Dec., 1839. He was educated at Hampden Sidley college, and at Princeton, and studied law with Chancellor George Wythe. After his admission to the bar he practiced for several years in Petersburg, Va., when he was elected to congress, and served continuously from 6 Dec., 1791, till 3 March, 1803, except during the 6th congress (1799-1801). His opposition to the bill creating a bank of the United States led to his estrangement from the Federal party and to his affiliation with the Democrats. On 23 Jan., 1793, he made an attack on Alexander Hamilton, then secretary of the treasury, charging him with corruption and treachery. He does not himself, in a report, and Giles replied by proposing resolutions censuring the secretary for undue assumption of power, and for want of respect to the house. In 1796 Giles strongly opposed the ratification of John Jay's treaty with Great Britain, and in 1798 he opposed the second debt tract against "Venice Preserved." His wife, Agnes, actress, b. in England in 1793, d. in Philadelphia, Pa., 19 April, 1838, first played at the Haymarket theatre in London, in 1811, in the character of Belviders, in "Provoked Husband," made the tour of the large
cities, and became so great a favorite as to command $200 per night for her performances. In 1875 she married Mr. Miss. Giffert. Thereafter her public career was merged in that of her husband. Sharing his many vicissitudes, at the time of his death she retired from the theater. Her friends then persuaded her to open a young ladies' seminary in New York city. Mrs. Giffert continued teaching for a few years, with indifferent success, and reluctantly returned to the stage, with the hope of recovering some of her former popularity. Her new opening was at the Chatham theatre. But time had wrought its changes with her personal appearance; she had lost her sprightliness and gayness and fresher atti-
tions had captivated the public. After a continued struggle with disappointment and poverty, she was last seen on the stage of the Park theatre in New York city, on 26 July, 1851, in Shakespeare's "King John." Broken in health and professional reputation, she retired to Philadelphia, where she soon died in obscurity and neglect. As Miss Hol-
man, in the flush of youth, beauty, and success, she had been a welcome guest in the best society. In high comedy parts, in her early days, she was marvellously successful and excelled.

GILFILLAN, James, jurist, b. at Bannock-
burn, Scotland, 9 March, 1829. He was brought to the United States in infancy, and spent his youth at New Hartford and Utica, Oneida co., N. Y. He attended only the country district schools, was mainly self-taught in mathematics privately. After a law course at the state and national law-school at Balston Spa, N. Y., he was admitted to the bar at Albany in December, 1850, and went immediately to Buffalo, N. Y., and practiced till the spring of 1857. He then went to St. Paul, Minn., where he was admitted to the bar. He entered the military service in August, 1862, as 2d lieutenant of the 7th Minnesota regiment, was commissioned captain in September, and served in 1862–3 against the Sioux Indians. He then served in the South till the end of the civil war, and in 1864 was brevetted major and commissioned colonel of the 11th Minnesota. After the war he continued in the practice of law at St. Paul till July, 1869, when he was appointed chief justice of the state supreme court, to fill a vacancy, and served till January, 1872, and then held the same office in 1873, elected in the autumn of that year, and re-elected in 1882.

GILL, Theodore Nicholas, naturalist, b. in New York city, 21 March, 1837. He was educated in his native city in private schools, and under special tutors. His attention was early turned to natural history, and for some time he was associated with J. Carson Brevoort in the arrangement of the latter's entomological and ichthyological collections. In 1868 he went to Washington and became an assistant in the Smithsonian institution. His work there consisted in the study and classification of the material that had been collected under the auspices of the institution, and his attention was first given to mammals, and later to fishes, in which departments he is recognized as one of the foremost authorities. More recently he has devoted himself to the study of birds. He also held the office of librarian in the Smithsonian, and for some years was senior assistant librarian of congress. From 1884 till 1887 he was professor of zoology in the Columbian university. Washington, D. C., from which institution he has received the honorary degrees of A. M., M. D., and Ph. D. Dr. Gill is a member of scientific societies, and in 1878 was elected to the National academy of sciences. His publications include, besides some 400 separate papers on scientific subjects contributed to the public press, various learned societies of which he is a member. "Arrangements of the Families of Mollusks" (Washington, 1871); "Arrangement of the Families of Mammals" (1873); "Arrangement of the Families of Fishes" (1873); "Catalogue of the Fishes of the East Coast of the North Pacific Ocean" (1883); "Arrangement of the Fishes of the Pacific of the United States to the End of 1879" (1882); and since 1879 has prepared the "Reports on Zoology" for the annual volumes of the Smithsonian institution.

GILLEM, Alvan C., soldier, b. in Tennessee in 1840; d. at Nashville, Tenn., 2 Dec., 1875. He was graduated at the U. S. military academy in 1851, entered the artillery, and served against the Seminoles in Florida in 1851–2. He became a captain on 14 May, 1851, served as brigade quartermaster, was brevetted major for gallantry at Mill Springs, and was in command of the siege artillery, and chief quartermaster of the Army of the Ohio in the Tennessee campaign, being engaged at Shiloh and in the siege of Corinth. On 13 May, 1862, he was appointed colonel of the 10th Tennessee volunteer infantry, and brevetted major-general for services during the campaign of Vicksburg. He commanded a brigade in the Tennessee operations during the first half of 1863, and afterward served as adjutant-general of Tennessee till the end of the war, being promoted brigadier-general of volunteers on 17 Aug., 1866. He commanded the troops guarding the Nashville and Northwestern railroad from June, 1863, till 1864, and then took command of the expedition to eastern Tennessee, being engaged in many combats, and gaining the brevet of colonel, U. S. army, for bravery at Marion, Va. He was vice-president of the convention of 9 Jan., 1863, for the adoption and reorganization of the state government of Tennessee, was a member of the first legislature that was elected, and afterward commanded the cavalry in east Tennessee, and participated in the expedition to North Carolina and the capture of Salisbury, N. C., in which he was brevetted major-general, U. S. regular army, hav-
ing already received two brevets for services during the war. He was promoted colonel in the U. S. army on 29 July, 1866, commanded the district of Mississippi in 1867–8, served on the Texas frontier and in Cuba, and in Cuba, and in 1867, and in Cuba, and in Cuba, commanded the troops in the Modoc campaign, being engaged in the attack at the Lava Beds on 15 April, 1873.

GILLESPIE, Eliza Maria, mother superior (in religion, Mother Mary of St. Agnes), b. near West Brownsville, Washington co., Pa., 21 Feb., 1824; d. in St. Mary's convent, Notre Dame, Ind., 4 March, 1887. When she was quite young her family removed to Lancaster, Ohio. She was soon afterward placed at school with the Dominican sisters, Somerset, Perry co., and was next sent to the convent of the Visitation, Georgetown, D. C., where she finished her studies. At the time of her graduation, Thomas Ewing, her godfather, was secretary of the treasury under President Harrison, and Miss Gillespie's beauty and accomplishments at once made her a leader of society in Washington. During the Irish famine, by the aid of tapestry work and embroidery, she saved many lives. She married in marriage with her cousin, afterward the wife of Gen. William T. Sherman, she collected a large sum of money to send to the sufferers. Afterward, during the epidemic of 1849, she nursed the sick and dying who had been described as the "sick of the century." In 1853 she entered the congregation of the Holy Cross, under the name of Mother Mary of St. Agnes. After taking the habit, she sailed for Europe,
made her novitiate in France, and at the end of the year took the vows of religious profession at the hands of the founder of the order, Father Mos-ran. In January, 1858, she entered the United States, and was made superior of the Academy of St. Mary's, Bertrand, Mich. In the following summer she transferred the academy to the present site of St. Mary's, Ind., and obtained a charter for it from the legislature. She laid the foundation of the present conservatory of music, and established the future of the institution on a firm foundation. She then founded other academies in different parts of the United States, until at death she had established nearly thirty, including those of Salt Lake City, Utah, and Austin, Texas. When the civil war began, she left St. Mary's in charge of competent aids, organized a corps of sisters, and hurried to the front to care for the sick and wounded soldiers. She established hospitals, both temporary and permanent, and, when generals failed to secure needed aid for these sick and wounded soldiers, she made flying trips to Washington in their behalf. Her headquarters were at Cairo, and, in ill-provided buildings used for hospitals, she and her sisters were obliged to rise early and cook gruel often for fourteen hundred men before the roll-call summoned them. When the close of the war left her enfeebled, and she never afterward fully recovered her strength. After the war the order of the Holy Cross in the United States was separated from the order in Europe, and she was made mother superior. She filled this office for two terms, when failing health compelled her to resign. She then became mistress of novices at St. Mary's, and prepared to pass the remainder of her days in the society of her mother and many warm friends who lived near. Mother Angela wrote sketches, seen by a few individuals, including some interesting reminiscences of her experiences during the war, for the "Ave Maria," published in Notre Dame, Ind.—Her brother, N ee Henry, clergyman, b. in Brownsville, Pa., in 1828; d. in St. Mary's, Jay co., Ind., 19 Nov., 1874. He was among the first students to the University of Notre Dame, and the first to receive there his degree. In 1851 he entered the novitiate of the congregation of the Holy Cross, and began his theological studies. After finishing his novitiate, he taught mathematics in the university, and in 1854 was appointed professor of the course. He was ordained priest on 24 June, 1856, and on his return to Notre Dame was appointed vice-president and director of studies. In 1859 he was made president of the College of St. Mary of the Lake, Chicago. He was called to Paris in 1869 on business connected with his order, but returned to the United States in 1866. He was for several years editor of the "Ave Maria," and was also spiritual director of several religious and literary societies connected with the University of Notre Dame. GILLESPIE, George, clergyman, b. in Glasgow, Scotland, in 1828; d. 2 Jan., 1760. He was educated at the university in his native city, licensed to preach by the presbytery of Glasgow early in 1712, and came to New England that year, bringing a letter of recommendation from Presbyterians. He was ordained licensed to preach, and afterward he preached for the church at Woodbridge, N. J., and in 1718 was ordained minister of the church at White Clay Creek, Del. He retained for several years, besides White Clay, embraced Big Clay, Lower Brandywine, and Elk River. He collected, for years waged in the synod, and resulted, in 1741, in the historic division of that body. He withdrew with the excluded members, but remained neutral until 1744, when he returned to the old synod. He published "Treatise against Deists and Free Think- ers" (Philadelphia, in the University of New York" (1740); "Sermon against Divisions in Christ's Churches" (1740); and "Remarks upon Mr. George Whitfield" (1744).

GILLESPIE, George de Normandie, P. E., bishop, b. in Goshen, N. Y., 14 June, 1819. He entered the general theological seminary of the Protestant Episcopal church in 1837, and was graduated in 1840. He was ordained deacon in St. Peter's church, New York, by Bishop B. T. Onderdonk, 28 June, 1840, and priest in St. Mark's church, Leroy, N. Y. by Bishop De Lancker, 30 June, 1844. His first parish was St. Mark's, Leroy, whence he removed to Ohio, and became rector of St. Paul's church, Cincinnati. He held this office for six years, when he accepted a call to Zion church, Palmyra, N. Y., and remained there for ten years. He next became rector of St. Andrews's church, Ann Arbor, Mich. He was elected bishop of western Michigan in 1874, and was consecrated in Grand Rapids, 24 Feb., 1875. He received the degree of D. D. from Hobart college in 1875. Bishop Gillespie has published, besides sermons and tracts, "Manual and Annals of the Diocese of Michigan."" 

GILLESPIE, William Mitchell, author, b. in New York in 1876; d. there, 1 Jan., 1888. He was graduated at Columbia in 1884, and afterward spent nearly ten years in Europe in study and travel. On his return to New York in 1894 he was appointed professor of civil and taxation law at the law college, where he remained till his death. He was popular as a professor, a brilliant and original thinker, and had few equals in his department of science. His published works are "Rome, as seen by a Republican," 1849; "Roads and Railroads: A Manual for Road-making" (1845; 7th ed., 1854); "Philosophy of Mathematics," (1851); "The Principles and Practice of Land-Surveying" (1855; 6th ed., 1858); and a "Treatise on Levelling, Topography, and Higher Surveying," edited by Cady Staley (1871).

GILLET, Ransom H., lawyer, b. in Lebanon, N. Y., 27 Jan., 1800. He studied law with Silas Wright at Canton, and became a lawyer in Ogdensburg, where he was postmaster in 1839-44. He was a member of the legislature for one term, and was re-nominated Gen. Jackson for president in 1832. He was elected to the National house of representatives as a Democrat, and served in 1833-7, was an Indian commissioner in 1837-9, register of the U. S. treasury in 1845-7, solicitor of the treasury in 1847-8, assistant U. S. attorney-general in 1855-8, and solicitor of the court of claims from 1858 till 1861. He is the author of "History of the Democratic Party" (New York, 1868); "The Federal Government" (1871); and "Life of Silas Wright."

GILLET, Ezra Hall, author, b. in Colchester, Conn., 15 July, 1828; d. in Harlestown, N. Y., 2 Sept., 1875. He was graduated at Yale in 1841, and at Union theological seminary in 1844, and in the latter year was ordained pastor of the Presbyterian church in Harlem, N. Y. In 1868 he was appointed minister of the Presbyterian church. He wrote much for the "American Theological Review," the "Presbyterian Quarterly," the "Historical Magazine," and other periodicals, and published Life and Times of John Huss" (2 vols., Boston, 1867-8); "History of the Presbyterian Church in the United States" (2 vols., Philadelphia, 1864; revised ed., 1875); "God in Human Thought" (2
vols., New York, 1874); and "The Moral System" (1875); besides minor works, including "Life Lessons," "Ancient Cities and Empires," and "England Two Hundred Years Ago."

GILLETTE, Francis, senator, b. in Windsor, now Bloomfield, Hartford co., Conn., 14 Dec., 1834. He was graduated at Yale in 1859 with the valedictory, and then studied law with Gov. William W. Ellsworth. Failing health compelled him to relinquish this pursuit, and he settled in Bloomfield as a farmer. In 1852 and again in 1856 he was sent to the Whig and Free-soilers, in 1854, to fill the vacancy in the U. S. Senate caused by the resignation of Truman Stanley, died March 3, 1855. Mr. Gillette was active in the formation of the Republican party, and was for several years a silent partner in the "Evening Press," the first distinctive organ of that party. He was active in the cause of education throughout his life, was a contributor of funds to the School of the Province, from 1838 until 1842, one of the first trustees of the State normal school, and for many years its president. Mr. Gillette took interest in agricultural matters, was an advocate of total abstinence, and delivered lectures and addresses on both subjects. He moved to Hartford in 1872, and passed the latter part of his life in that city. - His son, Edward Hooker, congressman, b. in Bloomfield, Conn., 1 Oct., 1840, was educated at the Hartford high-school, and the New York state agricultural college at Ovid. In 1863 he removed to Iowa and settled in Des Moines, where he has since been occupied in farming, in manufacture, and in editing the "Iowa Tribune." He has held the office of chairman of the National committee of the National greenback party for several years, and was a delegate to the conventions that nominated Peter Cooper in 1854, and James R. Weaver, and Benjamin F. Butler for the presidency. In 1879 he was elected to congress as a National greenbacker from Iowa, and served from 4 March, 1879, to 3 March, 1881. Another son, William Hooker, actor, b. in Hartford, Conn., 24 July, 1853, was graduated at the Hartford high-school in 1873, and studied at the University of the city of New York during 1875-6. He obtained an appointment in one of the New York theatres, and his evenings were spent on the stage. During 1876-7 he studied at the Boston university, and also attended the lectures of Prof. Lewis H. Monroe, still acting during the evenings. Subsequently he devoted himself entirely to the stage, and played in various roles in the principal cities of the United States. His greatest success was in the character of the Private Secretary, in the play of that name. He composed in the pantomime of the plays written by him. These include "The Professor," first produced at the Madison square theatre, New York, in June, 1881; with Mrs. Frances H. Burnett, "Esmeralda," introduced at the same theatre in October, 1881, and "Held by the Enemy," originally played at the Madison in February, 1886, and in London in April, 1887.

GILLETTE, Abram Dunn, clergyman, b. in Cambridge, Washington co., N. Y., 8 Sept., 1807; d. in Lake George, N. Y., 24 Aug., 1882. He was chiefly self-educated, but was for a time a student in Granville academy, and attended occasional lectures in Union college. After teaching for a time, he entered the Baptist ministry in 1832, and held pastorates in Schenectady, Philadelphia, New York, and Washington, D. C. He was a manager of the American Baptist Home Society, and a Baptist missionary in India. In 1839 illness compelled him to retire from the ministry. In 1887 a memorial window was placed in Calvary Baptist church, New York, in his memory. He published a "History of the Eleventh Baptist Church, Philadelphia," "Memoir of the Rev. Daniel S. Gillette, and of the Pulpits of the Gillettes," and edited "Social Hymns," and the minutes of the Philadelphia Baptist association from 1707 till 1897. He also contributed largely to journals, "Reminiscences of the Life and Labor of A. D. Gillette, D. D." by four of his friends and associates, was published in New York, 1888.

PHILIP SAUVAGE, clergyman, b. in the Papal States; d. there after 1784. He was a member of the Jesuit order, and went as missionary to South America about 1740. He travelled during ten years through the Spanish dominions of South America (Guyana, the Orinoco and lived for seven years in Santa Fe de Bogotá. He returned to Europe when his order was suppressed. He wrote in Italian "Essay on the History of America, or Natural, Civil, and Sacred History of the Spanish Kingdoms and Provinces," from 1569 to 1775. The whole of the work (in 4 vols., 1790-94). The work of Gilli is still considered valuable for the information it gives on the vast regions watered by the Orinoco. It was for a long time the only one to be consulted on the subject, and many writers have drawn from it without acknowledging the source of their information. Unfortunately, his ignorance of natural history and his credulity prevented him from reaping all the advantages due to his zeal. He gives vocabularies of most of the languages spoken by the natives, and attempts to compare them, but the value of his comparison is lessened by his lack of the critical faculty. A part of Gilli's work was translated into German by Sprengel g. n. 1774. The whole of the work (in 3 books of vols., 1788-90), which comprises his observations on the languages of the tribes of the Orinoco, was translated into German with notes by Father Xavier Veigl, an ex-Jesuit, who had travelled in the same regions. This part of the work is contained in the collection of the travels of missionaries of the Society of Jesus in America, published by Von Murr (Nuremberg, 1789).

GIALLIANI, Jacob, physician, b. in Philadelphia, Pa., in 1784; d. there, 4 Feb., 1806. After his graduation in medicine he entered on a long and successful practice in Philadelphia, which he did not relinquish until within a few years of his death. He was proficient in the natural sciences, especially in ornithology, and was brought into contact with Audubon, Wilson, and Rushenberger. In connection with Charles Lucien Bonaparte and others he collected the leading parts in the short-lived Maculair lyceum, and afterward assisted in founding the Academy of natural sciences. The hall that it occupied was built at his expense.

GILLIS, John Pritchett, naval officer, b. in Wilmington, Del., 6 Sept., 1806; d. there, 25 Feb., 1873. He entered the navy as a midshipman in Illinois on 13 Dec., 1823, his mother having removed to that state after the death of his father. He was commissioned as lieutenant on 9 Feb., 1837. During the Mexican war he had charge of the boats of
GILLISS, James Melville, astronomer, b. in Georgetown, D. C., 6 Sept., 1811; d. in Washington, D. C., 9 Feb., 1885. He entered the U. S. navy as midshipman at the age of fifteen and made his first cruise on the "Delaware." Subsequently he served on the "Concord" and on the "Java," and in 1831, after an examination, was advanced to pass midshipman. To obtain a scientific education he spent a year in the University of Virginia, and later completed the higher studies in Paris. In 1836 he became assistant in the depot of charts and instruments in Washington. Soon afterward was given charge of the small wooden building, which was then the only observatory in Washington. Soon after the sailing of the U. S. exploring expedition under Capt. Charles Wilkes, he received special instructions from the secretary of the navy concerning the determination of differences of longitude by means of moon-cumulations, occultations, and eclipses, with magnetic meridian; and in the same year was made chief of the U. S. Navy Observatory.

GILLMORE, Quincy Adam, b. on Black River, Licking co., Ohio, 28 Feb., 1825. His father was one of the pioneer settlers of Ohio. The childhood of the son was spent on the farm; his studies began at the Norwalk, Ohio, academy, and for three winters preceding his twentieth birth-day he taught a district-school, and attended two terms at the high-school at Elyria, Ohio. A poem

planned and carried into effect the construction of a working observatory as contrasted with one intended chiefly for purposes of instruction. He was made lieutenant in February, 1838, and until the return of the expedition. He was engaged in making observations of every culmination of the moon and every occultation visible in Washington that occurred between two hours before sunset and two hours after sunrise. His report on the "Astronomical Observations from the Naval Observatory" (Washington, 1846) was the first to be published in the United States. In August, 1842, a bill was passed by congress, authorizing the establishment of an astronomical observatory, and the duty of preparing the plans for a building and arranging for the instruments was assigned to Lieut. Gilliss. After consulting American astronomers he visited Europe, where he studied the latest forms of apparatus, and on his return began the erection of the building, had the instruments mounted and essentially adjusted, and a library procured, all within eighteen months. The superintendence of the new building was given to Lieut. Matthew F. Maury, while Lieut. Gilliss was assigned to duty on the coast survey in reducing for its use the entire series of moon-cumulations previously observed and published by him. Fifteen manuscripts, no copies of which have been preserved, still exist. From November, 1848, till October, 1852, he was engaged in making observations for the determination of the solar parallax. A station was established in December, 1849, on the hill of Santa Lucia, in Santiago, Chile, where he completed the reductions of great value. He likewise accumulated a vast amount of information concerning earthquakes and other subjects, and the establishment of a national observatory in Chile is due to his influence. On his return he published "The U. S. Astronomical Expedition to the Southern Hemispheres in 1849-52" (2 vols., Washington, 1855 et seq.). He visited Peru in August, 1858, for the purpose of observing the total eclipse of the sun of that year, and, notwithstanding his prostration with a fever, he completed his investigations and obtained satisfactory results from his observations. His report was published by the Smithsonian Institution as "An Account of the Total Eclipse of the Sun on September 7, 1858" (Washington, 1859). In 1860 he observed the total eclipse of the moon in Washington city. After the departure of Comdr. Maury from Washington in April, 1861, Lieut. Gilliss was assigned to the charge of the observatory in Washington. Under him it became one of the few first-class observatories in the world. He found a vast amount of work left in arrear by his predecessor, no reduction of the observations of the previous six years having been made. Lieut. Gilliss applied himself to the work of completing them and of adding new and valuable observations with such assiduity that he gained a high reputation among the eminent astronomers of the world. He made many valuable improvements in the instruments used in astronomy, and was the author of various government reports. Lieut. Gilliss was one of the original members of the National Academy of sciences.
that he read at a public exhibition attracted the attention of a member of Congress, who offered him the nomination as a cadet at the U. S. military academy. He was graduated in 1848, at the head of his class, assigned to the engineers, and after serving three years at Hampton Roads was appointed instructor in practical military engineering at West Point, and subsequently quartermaster at the academy. He was promoted 1st lieutenant in the engineer corps in 1856, and was on duty in New York city when the civil war opened. In August, 1861, he was appointed captain in his own corps, and engrossed engineer in chief of the Fort Royal expedition under Gen. Thomas W. Sherman. The reduction of Fort Pulaski, defending the water approach to Savannah, a strong fortification, isolated in the centre of a marsh island that was entirely surrounded by deep water, was very essential to the success of this expedition, but was regarded as the ablest engineers of both armies as impracticable. Capt. Gillmore, then acting brigadier-general, planned the establishment of eleven batteries of mortars and rifled guns on Tybee island, a mile distant, which occupied two months of incessant day and night labor. The bombardment, which opened at 8 A.M., 10 April, 1862, and was conducted under his very minute, detailed instructions as to elevation, charge, direction, intervals between shots, etc., for each piece, resulted by 4 p.m. of the following day, in the surrender of the fort, which had been so shattered as to be untenable. This exploit, for which he was brevetted lieutenant-colonel, U.S. army, 1 April, 1862, placed Capt. Gillmore in the front rank of American engineers and artillerymen. He was assigned to important commands in Kentucky in the spring of 1862, defeated Gen. Peagram at Somerset in March, 1863, for which he was brevetted colonel, and in June, 1863, was given command of the Department of the South, comprising all territory occupied by Union troops on the coasts of South Carolina, Georgia, and Florida. In July he was placed in command of the 10th army corps, and in the autumn of the same year he won new laurels by his operations on Morris island, for which he was brevetted brigadier-general; the reduction of Fort Sumter, and the taking of Port Wagner and Battery Gregg, which operations were characterized by great professional skill and boldness, and which constituted a new era in the science of engineering and gunnery. For these services he was made major-general of volunteers. In 1864 he commanded the 10th army corps and was engaged in the landing at Bermuda Hundred and the action at Swift's Creek, commanded the column that turned and captured the line in front of Drury's Bluff, and covered Gen. Butler's retreat into intrenchments at Bermuda Hundred. In July of the same year he commanded the actions of the 10th army corps in the defence of Washington, and in 1865 was again in charge of the Department of the South. Resigning his commission as major-general of volunteers, in December, 1865, he returned to service in the engineering bureau at Washington, and was subsequently appointed engineer-in-chief of all the fortifications and harbor and river improvements on the Atlantic coast south of New York. He was promoted major in June, 1868, lieutenant-colonel in 1874, and colonel in 1878. He was president of the Mississippi river commission, which was created by congress in 1879, of the boards of engineers for the improvement of Cape Fear river, N. C., and the Potomac river and flats; as well as of several boards for important harbor improvements in 1881, 1882, and 1883. As one of the judges at the Centennial exhibition of 1876 he made special and voluminous reports on "Portland, Roman, and Other Cements and Artificial Stones," and on "Brickmaking Machinery, Brick-Kilns, Perforated and Enamelled Bricks and Pavements," and of Rutgers' college, has given him the degree of Ph. D. Gen. Gillmore's works upon professional subjects are esteemed among the highest authorities in their class. They include "Siege and Reduction of Fort Pulaski" (New York, 1862); "The Banks of the Hydraulics, Cements, and Mortars" (1863); "Engineers and Artillerymen of the Operations against Charleston in 1863" (1865); supplement, 1868; "Béton, Coignet, and Other Artificial Stones" (1871); "The Strength of the Building Stone of the United States" (1874); and "Roads, Street Cars," etc. GILLON, Alexander, naval officer, b. in Rotterdam, Holland, in 1741; d. at Gillon's Retreat, on the Congaree river, S. C., 6 Oct., 1794. He was a member of a wealthy commercial family, and resided in London for some time. In 1766 he came to Charleston, S. C., and became a prosperous merchant. In May, 1777, in an armed ship, he captured three British cruisers, boarding them one after the other. He was appointed a commodore in the navy of South Carolina in 1778, and sent to France to procure vessels. He finally succeeded in hiring a frigate, named it the "South Carolina," and in it took many valuable prizes. With a large fleet, partly Spanish, he commanded the expedition which in May, 1782, captured the Bahamas islands. He was a representative of congress, 1793-4, was often in the Senate, became a member of the South Carolina constitutional convention. He was the founder and first president of the Charleston chamber of commerce. GILMAN, Arthur, architect, b. in Newburyport, Mass., 5 Nov., 1821; d. in Syracuse, N. Y., 11 July, 1892. He was educated at Trinity college, Hartford. In 1844 he published a paper on "American Architecture" in the "North American Review," which was translated into several foreign languages. He was then invited to deliver twelve lectures before the Lowell institute, Boston, after which he went to Europe on a tour of professional observation. On his return to Boston, he advocated the filling in and improvement of the "Back bay" district, then lying waste. He urged this plan upon the city government and the public for years, before the legislature and elsewhere, and finally his views were made a law by the "North Boston Improvement act," and extent of Commonwealth avenue, now one of the finest streets in the world, is due almost entirely to his persistent efforts. Mr. Gilman designed and built the Boston city hall, which is regarded as his best work. In 1865 he removed to New York. The Equitable building, in New York city, was designed by him. St. John's church and parsonage, at Clifton, Staten
GILMAN, Arthur, author, b. in Alton, Ill., 22 June, 1837. His ancestor, Edward Gilman, of an ancient Welsh family, emigrated from Norfolk, England, to Boston, Mass., in 1638. Arthur Gilman was educated in St. Louis and in New York, and his B. A. at Amherst College. In 1855 he began active business as a banker in New York, but, his health becoming impaired, he removed in 1862 to the neighborhood of Lenox, Mass., where he engaged in philanthropic and educational work. In 1870 Mr. Gilman removed to Cambridge, Mass., and connected himself with the Riverside press. In 1871 he became one of the editors of the American tract society in Boston, and in 1876, together with his wife, devised a plan which subsequently took form as "The Society for the collegiate instruction of women," familiarly known as "The Harvard Home," of which Mr. Gilman has been executive officer ever since. Mr. Gilman's studies have been in the line of English literature and of history. He has written much for the periodical press, and has published in book-form "First Steps in General History: A Suggestive Outline" (1870); "First Steps in English Literature" (1870); "Kings, Queens, and Barbarians, or Talks about Seven Historic Ages" (1870); "First Steps in English Literature" (1870); "History of the American People" (Boston, 1888); "Tales of the Pathfinders" (1884); "The Story of Rome" (New York and London, 1885); "Stories from the Dictionay" (Boston, 1884); and "The Story of the Nations Series," and an index to the complete edition of the works of Samuel Taylor Coleridge." (New York, 1884). He has also edited "The Poetical Works of Geoffrey Chaucer," to which are appended translations by Chater (3 vols., New York and London, 1879). In this work the editor printed for the first time, for the general reader, the famous Ellesmere text of the Canterbury tales.

His wife, Stella Scott, b. in Alabama, is the author of "Mothers in Council." (New York, 1894).

GILMAN, CHANDLER ROBBINS, physician, b. in Marietta, Ohio, 6 Sept., 1802; d. in Middletown, Conn., 26 Sept., 1865. His ancestors were among the earliest settlers of Ohio. During his childhood his father removed to Philadelphia, where the son took the degree of M. D. in the University of Pennsylvania in 1824, and soon afterward went to reside in New York, where the whole of his active professional life was passed. From 1841 till his death he was professor of obstetrics and diseases of women and children in the College of physicians and surgeons, and after the death of Dr. Beck, in 1856, dean of the medical department. Early in life he, with his relative, Charles Fenno Hoffman, had charge of the "American Monthly Review." Besides numerous contributions to medical magazines, he published the following in book-form: "Legends of a Log-Cabin" and "Life on the Lakes." (1862). He was the translator of Tellkampf, of Bischoff's monograph "On the Periodical Discharge of the Ovum." (New York, 1847); "Sketch of the Life and Character of Dr. J. B. Beck" (1851); "The Relations of the Medical to the Legal Profession" (1856); an edition of Beck's "Medical Jurisprudence." (Philadelphia, 1840); "Tracts on Generation," and a "Medico-Legal Examination of the Case of Charles B. Huntington." GILMAN, DANIEL COLUM, educator, b. in Norwich, Conn., 8 July, 1831. He was graduated at Yale in 1852, and continued his studies in New Haven, and later in Berlin, where he followed the lectures of Carl Ritter and Adolph Trendelenburg. He travelled extensively in Europe, and gave attention to the social, political, and educational condition of the countries that he visited, and also to their physical structure. On his return in 1855 he was invited to become librarian of Yale, and subsequently to be professor of physical and political geography there, and secretary of the governing board of the Sheffield scientific school. He was for a short time superintendent of the public schools of New Haven, and afterward secretary of the board of education. From his post in Yale he was invited, in 1870, to become the first president of the University of California. This invitation was not accepted, but two years later, when another call was given, he went to California, and remained at the head of the state university till 1875. At that time he was elected president of the Johns Hopkins university in Baltimore, and to this he was connected with brief collateral readings and Scriptural references (New York, 1879); "History of the American People" (Boston, 1888); "Tales of the Pathfinders" (1884); "The Story of Rome" (New York and London, 1885); "Short Stories from the Dictionary" (Boston, 1884); and "Stories from the Dictionary" (New York and London, 1886). He has also edited and contributed to "Boston, Past and Present." (Boston, 1878); "Library of Religious Poetry." (New York and London, 1880); "The Kingdom of Home; Homely Poems for Home Lovers." (Boston, 1881); "Magna Charta Stories" (1883); "The Story of the Nations Series," and an Index to the Complete Edition of the Works of Samuel Taylor Coleridge." (New York, 1884). He also edited "The Poetical Works of Geoffrey Chaucer," to which are appended translations by Chatzer (3 vols., New York and London, 1879). In this work the editor printed for the first time, for the general reader, the famous Ellesmere text of the Canterbury tales.

His wife, Stella Scott, b. in Alabama, is the author of "Mothers in Council." (New York, 1894).

GILMAN

shires," and "did more to keep up the steady course of the colony, the province, and the state, certainly till 1815, than any two or three other families together." He was the son of Nicholas Gilman, a leading spirit in political affairs during the Revolution, and fourth in descent from John Gilman, one of the earliest settlers of Exeter, N. H., who, with his family, settled in that place about the year 1680, and was appointed one of the royal councillors.

On the morning after the news of the battles of Lexington and Concord had reached, John Taylor marched with 150 other minute-men from Exeter to Cambridge, Mass., where he served in the provincial army. Soon afterward he became assistant to his father, who had been made treasurer of the state. In October, 1780, he was elected as a delegate from New Hampshire in the convention at Hartford called to take measures for the defence of the country. After serving in the Continental Congress in 1782-3, he succeeded his father as treasurer of the state. This office he held until appointed one of the commissioners whose duty it was to settle the accounts of the states with the old confederation. He resigned in 1791, and was again chosen a member of the executive in 1794. In 1795 he was re-elected annually until 1805, and again in 1813-14 and 1815, but subsequently declined to be a candidate for re-election. He was a member of the legislature in 1810-11. Although a zealous Federalist, so great was his popularity that he was frequently chosen governor by an illegal vote of the minority. His brother, Nicholas, senator, b. in Exeter, N. H., Aug. 3, 1755; d. there, 2 May, 1814, early acquired scholarly tastes and methodical habits, which were still more strongly emphasized under the careful instruction of his father. At the age of twenty-one he joined Scammell's regiment, and served with distinction until the close of the war. For some time he was a member of Washington's military family, and upon him was devolved the duty of taking account of the prisoners surrendered by Lord Cornwallis at Yorktown. In 1780 Gen. Arnold urged Mr. Gilman to accept an appointment on his staff. Mr. Gilman's reply was characteristic. Fearing that Arnold would not be engaged in active movements, he said: "If I should come into your family and be confined in those lonely wildernesses of the highlands, where our operations are going on against the city, which possibly may be the case, my situation would be as distressing as that of Fabius M. when he had recourse to the flaming cattles." He was a member of the Continental congress from 1786 till 1788, and after the adoption of the constitution a representative of New Hampshire from 1789 till 1797. In 1805 he became a member of the U. S. senate, which office he held till the close of his life. He was one of the presidential electors in 1803 and 1807, and he was also a member of the state councillors. In September, 1796, Mr. Gilman was a member of the convention that met at Philadelphia to frame a constitution for the United States. On 18 Sept. the secretaries of the convention took the report of the proceedings to Congress, and on the same day Mr. Gilman went to go to the country. On the way to his cousin, Joseph Gilman, who, during the war had been chairman of the committee of safety, with the following significant comment: [The plan] "is the best that could meet the unanimous concurrence of the states in convention. It was done by bargain and compromise, yet—withstanding its imperfections—on the adoption of it depends, in my feeble judgment, whether we shall become a respectable nation or a people torn to pieces by intestine commotions and rendered contemptible for ages." Mr. Gilman was a man of deeds rather than words, and was personally very popular. He was of graceful figure and elegant carriage; his manners were courtly and his charities were bestowed with liberality and kindliness. These traits, united with his methodical habits and fidelity in the performance of duty, kept him long in public life.

GILMAN, Caroline Howard, author, b. in Charleston, S. C., 1 June, Mass., 16 Feb., 1791; d. in Kingston, Mass., 2 Feb., 1858. He was graduated at Harvard in 1811, studied theology, and was mathematical tutor at Cambridge from 1817 till 1819, when he was ordained pastor of the Unitarian Church, Boston, S. C., which relation was only terminated by his death. He was an earnest advocate of temperance, and active in every good work that tended to promote the public welfare. Beyond the state where he resided he was chiefly known as an author. He received the degree of D. D. from his alma mater in 1837. He wrote valuable articles for the "North American Review" on the "Lectures of Dr. Thomas Brown," translated several of the satires of Boileau, and published other essays in the Boston "Christian Examiner" and the London "Monthly Magazine." He wrote biographies, essays, and translations, exhibiting a wide range of knowledge. Many of these were reprinted in "Contributions to Literature, Descriptive, Critical, and Humorous, Biographical, Philosophical, and Poetical" (1860). He also wrote "Memos of a Visit to New England and a Village Choir" (1829), and "Pleasures and Pains of a Student's Life" (1832). Of his poetical writings, the "History of a Ray of Light" and a poem read before the Phi Beta Kappa society, of Harvard, are best known. His life, by Caroline Howard, author, b. in Boston, Mass., 8 Oct., 1794, was, at the age of sixteen, a poem entitled "Jephtha's Rash Vow," which was followed by "Jairus's Daughter," printed in the "North American Review." She was married in 1816, went to Charleston, S. C., with her husband, and resided there until about 1820, when she removed to Cambridge, Mass. In 1830 she began the publication of "The Rose-Bud," a magazine for children, which ultimately developed (1833) into "The Rose." From this periodical, which was discontinued in 1839, owing to the failure of its editor, and which has not been collected. They include "Recollections of a New England Housekeeper" (New York, 1855); "Recollections of a Southern Matron" (1836); "Poetry of Travelling in the United States" (1838); "Ladies' Annual Register" (Boston, 1838-9); "Ruth Raymond" (New York, 1840); "Oracles from the Poets" (1845); "Sibyl, or New Oracles from the Poets" (1849); "Verses of a Lifetime" (Boston, 1849); "Oracles for Youth" (New York, 1852); "Mrs. Gilman's Gift-Book," comprising in one several volumes for the young previously published (1856); "Poesie and Stories by a Mother and Daughter," written in conjunction with Mrs. Jervey (Boston, 1872); and "Letters of Eliza Wilkinson during the Invasion of Charleston," being personal memorials of the Revolution in South Carolina, in two volumes of "Recollections" first mentioned, which have passed through many editions. She is now (1887) residing with a daughter in Washington, D. C., and, at the age of ninety-two, declares that, of all her writings, the two hymns beginning "Is there a love and dreariness, are there woes for this sacred day," have lingered longest in her memory. Her most popular poem is the boatsong "Trancadillo."—Their daughter, Caroline Howard, author, b. in Charleston, S. C., 1 June,
1833: d. there, 29 Jan., 1877, became in 1840 Mrs. Nelson Glover, and in 1865 Mrs. Lewis Jervey, her first husband having died in 1846. She wrote poetry, and resigned his commission, wrote novels, which appeared in southern magazines and in the volume mentioned above. Among her published fictions are "Vernon Grove" (New York, 1859), and "Helen Courtenay's Promise" (1866).

GILMER, George Rockingham, lawyer, b. in Washington, D. C., 28 April, 1825; d. in Lexington, Ga., 15 Nov., 1859. He studied law, and began practice at Lexington. In 1818 he became a lieutenant in the 43d U. S. infantry, which served against the Creeks, and was disband- ed after the conclusion of peace with Great Britain in 1815. He served in the legislature in 1819–20, was elected to congress as a Democrat, and served from 3 Dec., 1821, to 3 March, 1823, was again elected to the state house of representatives in 1824, and served in congress a second time from 3 Dec., 1837, to 3 March, 1839. He was governor of Georgia from 1829–31. He was elected again to congress in 1833, and served from 2 Dec., 1838, to 3 March, 1839, was a presidential elector on the Hugh L. White ticket in 1836, and in 1837–9 served a second term as governor. In 1840 he was a candidate for the state governor under the Whig ticket, and his will left valuable bequests to Georgia university, of which he was a trustee for thirty years. He published a historical work entitled "Geor- giants," containing information in relation to the early settlement of the state (1859).

GILMER, James Tramel, soldier, b. in Guilford county, N. C., 23 Feb., 1818. He was graduated at the U. S. military academy in 1839, entered the engineer corps, and was engaged in building forts and making surveys, and in river and harbor improvements, till the beginning of the civil war, when he resigned his commission as captain of en- gineers, and entered the Confederate army. He was appointed major of engineers in September, 1861, and was chief engineer on Gen. Albert S. Johnston's staff. In the battle of Shiloh he was severely wounded. After his recovery he was appointed chief of the engineering bureau at Rich- mond. On 20 Aug., 1863, he was promoted major- general, and ordered to Charleston to direct the de- fenses of that city, but in June, 1864, he returned to Richmond and resumed charge of the bureau of engineering. On 15 Feb., 1865, he was court-martialed for destroying a train and per- mitting his command to rob the passengers; but he was honorably acquitted of this charge and re- stored to his command, which was reorganized as the 2d Maryland cavalry. In July, 1866, he led Gen. Jubal A. Early's advance into Maryland, was engaged throughout this campaign, and in the fight at Bunker Hill was severely wounded. He rejoined his command at Woodstock, and was captured while defending his guns. He spent three years in Europe of 1877. He was appointed police commissioner of Baltimore. He published "Four Years in the Saddle" (New York, 1866).

GILMORE, James Roberts, author, b. in Bos- ton, Mass., 10 Sept., 1823. His father was a cousin of Gov. Joseph A. Gilmore, of New Hampshire. The son was preparatory for college, but entered a counting-room at the age of fourteen, and became a partner in the business before he was of age. He made annual business trips to the south, and at the age of twenty-five became the head of a new cotton and shipping firm in New York city, from which he retired before the beginning of the civil war with a competency. In the early years of the war he published several novels, containing realistic portrayals of southern life and feeling, under the pen-name "Edmund Kirke." He also wrote numerous war-songs and ballads. His writings about the sufferings of the slaves and the unexag- gerated pictures of slavery, helped to decide the northern mind in favor of emancipation and the continu- ance of the war. In 1862 he founded the "Continental Monthly magazine, to advocate emancipa- tion as a political issue. In 1877 he published "Whig, sustained President Tyler's vetoes. He was re-elected as a Democrat in 1842 by a close vote.
States, a result that had the effect of destroying the peace party of the north, and ensured the re-election of Abraham Lincoln. Having lost his fortune in consequence of the war, he engaged in business again in 1873. In 1883 he finally retired, and applied himself anew to the pursuit of literature. His earlier publications were "Among the Pines" (1859); "My Southern Home" (1863); "Down in Tennessee" (1863); "Among theGuar-\(\)ill"ras" (1863); "Adrift in Dixie" (1863); "On the Border" (Boston, 1864); and "Patriot Boys" (1864). In 1890 he prepared, in connection with Dr. Lyman Abbott, an arrangement of the gospels forming a life of Jesus, entitled "The Gospel Harmony" (New York); and the same year wrote in the space of thirty days a "Life of Garfield," of which, during the presidential campaign and immediately afterward, 80,000 copies were sold. He published subsequently "The Rear-Guard of the Revolution," an account of the early life of Tennessee and of the patriotic services of John Sevier (New York, 1886), and "John Sevier as a Commonwealth-Build-\(\)er," a companion to the "Rear-Guard" (1887). He is now (1887) writing a series of southwestern histories. His wife, who has aided him in his literary labors, is Mrs. Josephine Judson of Ely, N. D.

GILMOR\(e\), Joseph Albree, governor of New Hampshire, \(b\). in Weston, Vt., 10 June, 1811; \(d\). in Concord, N. H., 17 April, 1867. He enjoyed scanty educational advantages, and while a boy made his way to Boston and entered a store. At the age of twenty-one he was in business for himself. The railroad to Concord, N. H., was completed on 1 Sept., 1842, and about the same time he removed to that place, and opened a wholesale grocery. On 3 Aug., 1848, he became construction-agent, and afterward superintend-\(\)ent of the Concord railroad, and 24 Nov., 1856, superintendent of the Concord railroad, which came to include the Manchester and Lawrence and Concord and Portsmouth railroads and their branches, making a system of about 175 miles, of which he continued in charge until 11 Aug., 1858. He was also a Whig in 1858 was elected as a Republican to the state senate, was re-elected in 1859, and made president of the senate that year. In March, 1863, he was the Republican candidate for governor; there was no choice by the people, but he was elected in June by a majority of 7,435, and re-elected by a smaller margin in March, 1864. The two political contests were the severest ever known in New Hampshire, and he assumed the governorship at the darkest period of the civil war. By his predecessors, Govs. Good-\(\)win and Berry, 16 regiments of infantry, 4 companies of cavalry, 1 light battery, and 3 companies of sharp-shooters, making over 17,000 volunteers, had been put into the field; but in 1863 patriotic fervor had somewhat abated, voluntary enlistments were few, and President Lincoln had ordered a draft. Gov. Gilmore, however, raised and equipped the 18th infantry, the 1st cavalry, and the 1st heavy artillery, which, together with the recruits forwarded to existing organizations, made the number of men furnished during his term of office about 14,000, and the entire number from New Hampshire more than 31,000, and of fewer than 530,000. Gov. Gilmore retired from office in June, 1865, in feeble health. His character-\(\)istics were restless activity, unbounded energy, impatience of restraint, liberality, and pub-\(\)lic spirit. His son, Joseph Henry, \(b\). in Boston, Mass., 3 April, 1861, was graduated at Brown in 1883 and studied theology at Newton. He was settled as pastor of the Baptist church in Fisher-\(\)ville (now Penacook), N. H., in 1861, and was also instructor in Hebrew at Newton, but resigned and served as private secretary to his father during the closing years of the civil war also editing the Concord "Daily Monitor" in 1864-5. In 1865 he became pastor of the 2d Baptist church in Roch-\(\)ester, N. Y., and in 1867 professor of rhetoric in the University of Rochester. He has been an editor, a prolific writer, and a contributor of many articles, and has published several text-books, including one on the "Art of Expression" (Boston, 1881). He is the author of the popular hymn "He leadeth me; Oh, blessed thought!"

GILMOUR, Patrick Sanford, musician, \(b\). near Dublin, Ireland, 28 Dec., 1829. He connected himself with military bands at the age of fifteen, and after having been in Canada with an English band he went to Salem, where he led a brass band, after which he settled in Boston, Mass., where he organized "Gilmour's Band," with which he made an extensive tour. In 1861 he accompanied the 24th Massachusetts regiment to the field, and in 1863 was placed in charge of all the bands in the department of Louisiana by Gen. Banks. He originated monster concerts in this country, and was the projector of the grand Peace Jubilee held in Boston in 1868 and in 1872. He has published an account of the first (Boston, 1871). In 1878 he made a European tour with his band. He is now band-master of the 22d Regiment, N. G. S. N. Y. He has composed many marches and songs.

GILMOUR, Richard, R. C. bishop, \(b\). in Glas-\(\)gow, Scotland, 28 Sept., 1824. He came to Canada with his parents when he was four years old, and afterward settled in Pennsylvania. He joined the Roman Catholic church at the age of twenty, and, having resolved to enter the priesthood, became a student of the Canisius College, a seminary, and was ordained priest by Archbishop Purcell in 1832. His first missionary labors were in southern Ohio, Portsmouth, Ironton, Gallipolis, and Wilkesville, where he remained five years and built churches and schools. He was appointed pastor of St. Patrick's church, Cincinnati, in 1857, and erected a school there which he afterward made the finest boarding school in the kind in the state. He was next made professor in the se-\(\)inary of Mount St. Mary's of the West, and was then sent as pastor to St. Joseph's church, Day-\(\)ton, Ohio, where he erected a school. He was nominated for the see of Cleveland by the bishops of the province of Cincinnati, 15 Feb., 1872, and consecrated bishop on 14 April, by Archbishop Purcell, in the cathed-\(\)ral of Cincinnati. After his accession to the episco-\(\)py he devoted himself especially to the inter-\(\)ests of Catholic education. He founded the "Catholic Universe," and, an attempt having been made to tax Roman Catholic churches and schools, he was completely successful in resisting it in the courts. During his administration of the diocese of Cleveland the number of Roman Catho-\(\)lic congregations has largely increased from 484 to 174,000. The average number of children attending the 123 parochial schools is 23,000. There are 184 priests, 217 churches, 21 chapels, 71 stations.
and a theological seminary containing 44 students. Bishop Gilmour has compiled "School Recreation", a collection of hymns, a Bible history, and a series of readers.

**GILPIN, Edward Woodward**, jurist, b. in Wilmington, Del., 15 July, 1805; d. in Dover, Del., 29 April, 1876. In his youth he was in straitened circumstances, and learned the trade of a carriage maker. He was afterward clerk in a glasshouse, but finally studied law, and was admitted to the bar in 1827. He was attorney-general of Delaware in 1840–50, and from May, 1857, till his death was chief justice of the state. He was a Whig in early life, but became a Democrat in 1836. During the civil war he was an ardent Unionist.

**GILPIN, Thomas**, manufacturer, b. in Chester county, Pa., 18 March, 1728; d. in Winchester, Va., 30 April, 1778. His grandfather, Joseph, emigrated from England in 1696. Thomas engaged in farming and manufacturing; became interested in science, and was one of the original members of the American philosophical society in 1769. He aided in establishing Wilmington college, Del., and labored for the construction of a canal between the Chesapeake and the Delaware. In 1777, with other members of the Society of Friends, he was arrested by the Pennsylvania government on suspicion of being a loyalist, and taken to Virginia, where he died. — His son, Joshua, b. in Philadelphia, 8 Nov., 1763; d. there in 1840, early showed a love for historical investigation. He lived in England in 1785–1801, and married an Englishwoman. He urged forward the canal that his father had proposed, and witnessed its completion after many discouragements. He published "Verses written at the Fountain of Vaucluse" (1799); "Memoir on a Canal from the Chesapeake to the Delaware" (1818); and "Poems on Virgil, and other Poems" (1839). — Another son, Thomas, b. in Philadelphia, 10 Sept., 1779; d. there, 3 March, 1853, became an extensive paper-manufacturer, and in 1817 constructed a machine for making paper continuously. His works were destroyed by fire in 1822. He published a collection of poems connected with the banishment to Virginia of his father and other Quakers (1806). — Joshua's son, Henry Dilwood, lawyer, b. in Lancaster, England, 14 April, 1801; d. in Philadelphia, Pa., 29 Jan., 1860, attended school in England in 1811–12, and graduated at the University of Pennsylvania in 1819, studied law with Joseph R. Ingersoll, and began practice in Philadelphia in 1822. He was U. S. attorney for his state in 1832, solicitor of the U. S. treasury in 1838, and attorney-general of the United States in 1840–41. In 1826–32 he edited the "Atlantic Souvenir" (7 Vols., 15mo), the leading American literary annual. Mr. Gilpin was president of the Pennsylvania Academy of the fine arts, and a director of Girard College. He bequeathed the sum of 57,000 to the Chicago historical society, and his extensive and valuable library to the Historical society of Pennsylvania, together with a bequest for the erection of a building in which the library should be preserved. Besides contributing to periodicals, he published "Reports of Cases in the S. District Court for the Eastern District of Pennsylvania, 1828–36" (Philadelphia, 1837); "Opinions of the Attorney-Generals of the United States, from the Beginning of the Government to 1841," from official documents (2 Vols., Washington, 1841), and "The MADISON," purchased from Mrs. Madison by the government for $30,000 and published by authority of congress (3 Vols., 1840). See "Memorial of Henry D. Gilpin" (printed privately, Philadelphia, 1860).

**GIROUX, Olivier**, French author (known by his pen-name Gustave), b. at Juvigny, won in 1818. His father shipped him, at the age of twelve, as apprentice on a sailing- vessel, but he deserted at Vera Cruz, shipped on board a fishing- vessel, and visited the entire Gulf coast. He joined a slaver in 1836, and made several voyages from Africa to Brazil. In 1846 he offered his services to the Mexican government, and was appointed commander of an armed brigantine, in which he cruised on the coast of Louisiana, but near the mouth of the Mississippi was attacked by a U. S. frigate and after a stout resistance was captured and landed, but not arrested by the Pennsylvania government on suspicion of being a loyalist, and taken to Virginia, where he died. — His son, Joshua, b. in Philadelphia, 8 Nov., 1763; d. there in 1840, early showed a love for historical investigation. He lived in England in 1785–1801, and married an Englishwoman. He urged forward the canal that his father had proposed, and witnessed its completion after many discouragements. GIRARD, Marc Amable, Canadian statesman, b. in Varennes, Quebec, 25 April, 1822. He was educated at St. Hylcinsite college, and admitted to the bar of Manitoba in 1871. After the suppression of Louis Riel's first rebellion by Gen. Wolseley, Mr. Girard became a member of the executive council under Lieut.-Gov. Archibald, and was treasurer of Manitoba from September, 1870, till March, 1872, when he resigned. He was premier of the province, with the office of secretary, from 8 July to 2 Dec., 1874, when he and his government retired. When the Norquay government was reconstituted in December, 1876, he took the office of provincial secretary, and subsequently became minister of agriculture and president of the council, which portfolio he held till his retirement in January, 1883. He was a member of the executive council for the northwest territories in December, 1872, and was an unsuccessful candidate for the legislative council of Canada in 1858, and for the Canadian assembly in 1862. He was elected for St. Boniface, in Manitoba, in 1870, and was elected by acclamation for Belle St. Paul in 1879. He was called to the Dominion senate on the entrance of Manitoba, 13 Dec., 1871. He is a Conservative.

GIRARD, Stephen, philanthropist, b. near Bordeaux, France, 24 May, 1750; d. in Philadelphia, Pa., 13 May, 1831. He was the son of a sea-captain, and at an early age, with limited education, sailed as a cabin-boy to the West Indies, and thence to New York. Having gained his employer's confidence, he became mate, and then captain, of a small vessel, made several voyages to New York, and was soon owner of the ship. In 1799 he had established himself in trade in Philadelphia, and was alternately shipmaster and merchant till the Revolutionary war put a stop to his enterprises. He then opened a small grocery-store and cider-bottling establishment, and, in company with some money he had acquired in the soldiers of the continental army. He returned to the West India trade in 1780, and in 1782 laid the foundation of his fortune by taking a lease of a range of stores, which he underlet at a large profit. Shortly afterward, during the servile insurrection in Hayti, several planters deposited their treasures on two of his vessels for safe keeping, and were subsequently massacred by the negroes with their entire families, leaving Mr. Girard in possession of about $30,000. He invested largely in the shares of the old Bank of the United States in 1810, and in 1812 purchased its building and began operations in his own name, retaining the officers of the old institution, and succeeding to much of its business. During the war with Great Britain, Mr. Girard was the financial mainstay of the government. He preserved to make large advances, down to the establishment, in 1816, of the second U. S. bank, of which he became a director, and whose policy he influenced greatly. In 1814, when the government could obtain only $30,000 instead of the $3,000,000 that it wished, he furnished the entire sum, and, at the same time, when the interest on the public debt could not be paid, he wrote to the secretary of the treasury, offering to wait for his money, or to receive it in treasury notes. At his death his property amounted to about $20,000,000, the bulk of which he bequeathed for charitable purposes. The character of Girard has been regarded as an enigma. The disfigurement of his face by the loss of an eye in early childhood, shortly before he was thrown on the world for his support, seems to have soured his disposition, and throughout his life he was crabbed and unapproachable to most people, though he had several warm friends. In small matters he was a miser, ready to take advantage of a legal technicality to avoid paying a just claim, rigidly frugal in his personal habits, and never giving aid to any that applied for it at his door. He gave those in his employ nothing but their just wages, and exacted from them the utmost promptitude and fidelity. His life was one of constant labor; the smallest details of his business received his personal attention, and even his leisure was spent in working on his farm near Philadelphia, where he drove daily in a shabby carriage drawn by one horse. He was insensible, and his appearance was forbidding. He spoke English indifferently and had a very dry voice. His appearance was that of a rough old sailor. He was a disbeliever in Christianity, and named his ships after noted French free-thinkers. Yet in public matters no one would have said he was open-handed. His timely aid to the government has already been mentioned. He gave thousands to the city of Philadelphia for public improvements, subscribed freely to charities, and even to Christian churches. During the yellow-fever epidemic of 1854 he nursed many of the sufferers, was one of a committee that organized a hospital on Bush Hill, and when no one could be hired to take immediate charge of it, volunteered, with Peter Helm, for the work, and soon established cleanliness and order. He continued in active labor at the hospital for sixty days, and also contributed liberally to the families of the victims of the fever. His will, which would occupy nearly nine pages of this work, contains minute directions as to the disposal of his property. To the Pennsylvania hospital he bequeathed $30,000; to the Pennsylvania institution for the deaf and dumb, $20,000; to the Orphan asylum of Philadelphia, $10,000; to the Philadelphia public schools, $10,000; to the city of Philadelphia, for the distribution of fuel to the poor every winter, $10,000; to the poor of distressed masters of ships, $10,000; to the masonic loan, $20,000; to the city of New Orleans, a large amount of real estate; to the city of Philadelphia, for improvement of its streets, buildings, etc., $500,000; for the improvement of canal navigation in Pennsylvania, $200,000. His principal bequest was $2,000,000, besides the residue of a certain portion of his estate out of which some lega-
GIRARDIN, Louis Huc, educator. He was appointed professor of modern languages in William and Mary in 1903, and conducted a select school for girls in Richmond, Va., for several years. He completed vol. iv. of Burk's "History of Virginia," and in 1905 issued the prospectus of a monthly magazine entitled "Amomitates Graphicae, an Instructive and Amusing Collection of Vines, Animals, Plants, Flowers, Minerals, Antiquities, Customs, and Other Interesting Objects. Selected and engraved from Drawings after Nature, with Descriptive and Explanatory Sketches in English and French." The text by L. H. Girardin, Professor of Modern Languages, History, and Geography in William and Mary College. The Engravings by Frederick Bosler. The first number (the only issue issued) contained six fine plates, colored, engraved in 1809 by Henry Draper, and rendered great service to that leader of the conquest of Peru in 1832. He afterward became rich and powerful, but used his high reputation among the Spanish conquerors to excite them to revolt, as he was dissatisfied with his share of the spoils after the defeat of General Pizarro. On hearing that the Count of Almagro, and Pizarro, having been commissioned to reduce the province of Chacar to subjection in 1583, he levied troops at Cuzco, and then raised the standard of rebellion, drawing to his side all the Spaniards who had belonged to the factions of Almagro and Pizarro. After arresting the means to have been to make it certain that a fire-proof, substantial edifice should be built, in his own words, "avoiding needless ornament, and attending chiefly to the strength, convenience, and neatness of the whole." The principal buildings of the college, which were begun in July, 1833, and finished 1 Jan., 1848, is a magnificent specimen of Greek architecture, in the form of a temple, surrounded by thirty-four elaborate Corinthian columns, and costing, with the accompanying buildings, very nearly $2,000,000.

GIROUARD, John Joseph, Canadian patriot, b. in Quebec, Canada, 11 Nov., 1795; d. in Canada, 18 Sept., 1855. He was left an orphan at an early age, and entirely destitute, but was educated by the Abbé Gatien. He followed his benefactor to St. Eustache, and after the latter's death began to study law at St. Petersburg in 1818. In 1819 he was admitted to practice at the former place in 1816, and established himself at St. Benoît, where he married. He took an energetic part in the discussions between the Canadian governor and the chamber of assembly, and in 1830 was elected to represent the county of Deux-Montagnes. He devoted himself principally to municipal and educational questions, but voted with the patriots in favor of the ninety-two resolutions, the refusal of subsidies, and all the laws that aimed at enforcing the rights of the chamber. When the English government authorized Lord Gosford to take what money he needed from the public treasury, Girouard addressed meetings in several counties of the province of Quebec in opposition to this violation of the prerogatives of the legislature, but still deprecated a resort to physical force. A convention began in 1836, and the leaders of the insurgents who were encamped at St. Benoît, but, seeing that resistance was impossible after the fight at St. Eustache, 14 Nov., 1837, he advised his companions to disperse. He then set out for the United States, but afterward succeeded in making his way to Montreal, where he remained in prison for six months. In 1838 Lord Durham, the new governor-general, offered to allow the leaders of the
insurrection to go into exile and to pardon the rest on condition that the former would sign a paper acknowledging their participation in the revolt. Girouard refused to sign the paper and made strenuous efforts to dissuade his companions. The result proved his wisdom, as the other leaders were easily captured, while he was released after the proclamation of amnesty without conditions. He then returned to St. Benoît, where he devoted himself successfully to his profession. He was offered a portfolio in the Baldwin-Lafontaine ministry of 1842, but declined this and other public office in favor of his duties as acting commissioner of his profession and in succoring families that suffered in the troubles of 1837. He also founded the hospital of Youville in St. Benoît.

GIRTY, Simon, leader of Indians, b. in Pennsylvania about 1750; d. about 1815. His father had died, and his mother had married again, when in 1755 the whole family were taken captive by Indians, and the step-father was burned at the stake. Simon remained a prisoner till 1758, when he was released. In 1774 he was a soldier and spy under Lord Dunmore at Petersburg, and a friend and companion of Simon Kenton. Being an active lobbyist, he left Pennsylvania at the beginning of the Revolution, became a leader of the savages, and was concerned in many atrocities. It is not known whether he was given a British commission. He was in the battle of the Wanaunik near Pittsburg, but escaped, collected about 400 Indian warriors in the summer of 1777, and in September attacked Fort Henry (now Wheeling, W. Va.), which was garrisoned by about forty men. After defeating with great slaughter a reconnoitring party, and reducing the garrison to twelve men, he made a demand for its surrender, but was refused. The Indians now laid siege to the fort, but, as they had no artillery, the garrison held its own until it was relieved next day by forty mounted men. In 1778, with two other Tories, Girty went through the Indian country with the Wanaunik Indians, plundering the savages to take up arms against the Americans. He was present at the torture and death of Col. William Crawford (q. r.) in 1782, and is charged with showing delight at his sufferings; but Girty averred that he did what he thought to save Crawford's life. Subsequently, when his old associate, Simon Kenton, was captured by the Indians, Girty exerted himself to the utmost to save him from the torture, and succeeded in effecting his release.

In August, 1782, Girty invaded Kentucky and with 600 savages made an attack on Bryan's station near Lexington, which was garrisoned by about fifty men. After an unsuccessful ambuscade Girty laid siege to the fort till the approach of re-enforcements under Daniel Boone caused him to retreat. He was rapidly pursued, and the battle of the Blue Licks followed, in which many of the Kentucky leaders lost their lives. This was the last great Indian battle on Kentucky soil. In the same year Girty was active in the expulsion of the Moravian missionaries who had been laboring quietly among the Wyanontoes. He lived for some time on Sandusky Bay, but he was captured by the Indians and left on Canastota, and planned and led many marauding excursions. He was present at Gen. Arthur St. Clair's defeat in 1791, and directed a savage to kill and scalp Gen. Richard Butler, who lay wounded on the field. Girty acted as interpreter to the commissioners that were appointed by the government to meet the Indians in 1796, and treated with them with insolence, finally securing the failure of the negotiations. He also aided the British in the war of 1812, and is said by some authorities to have been killed in the battle of the Thames in 1813, while others say that he died a natural death two years afterward.

GISBONE, Frederic Newton, Canadian inventor, b. in Broughton, Lancashire, England, 8 March, 1824. He made a tour around the world in 1842-3, coming to New York, then to Europe, and, after spending two years in farming, became one of the operators of the Montreal telegraph company, and opened its first station at Quebec. He was then connected with various telegraphic enterprises, and successfully completed the line across New Brunswick in 1851. In 1855 he was acting commissioner for Newfoundland at the London exhibition, represented it at the Paris exhibition of 1865, and was appointed London agent for mines and minerals by the government of Nova Scotia. In 1870 he was made superintendent of the Dominion government telegraph and signal service, which office he now holds (1887). He has invented electric, pneumatic, and mechanical ship signals, anti-corrosive and anti-fouling compositions for the bottoms of iron ships, an electric recording target, and a gramophone. In 1879 a ship's semaphore was awarded a gold medal at the late fishery exhibition in London. He was one of the original members of the Royal society of Canada.

GIST, Christopher, scout. He was summoned from his home on the Yadkin in North Carolina by the Ohio commissioner of Indian trade, to whom he had written, asking for help. He went to Pittsburg, and gathered a band of Virginia planters, to whom he had been given a royal grant to examine the western country "as far as the falls of the Ohio," to mark the passes in the mountains, trace the course of rivers, and observe the strength and numbers of the Indian nations. In 1749 he was commissioned to explore the Ohio, and returned by way of the Roanoke. In 1755 the Ohio company opened a road into the western valley, and Gist established a plantation near the Yougghoughy. In November of that year hostilities were threatened between the French and English; and George Washington, then just twentysix years old, but thoroughly familiar with the wilderness, was selected as an envoy from Gov. Dinwiddie of Virginia, to make a winter journey to the streams of Lake Erie, with Christopher Gist as his guide. After a month's journey they reached the junction of the Alleghany and Monongahela rivers, and on 23 Nov., 1753, swam their horses across the Alleghany, and wrapped themselves in their blankets for the night. Their journey ended at Waterford, near the shores of Lake Erie, where they were not courteously received. They hastened their return to Pittsburg with a treaty that was signed upon by an Indian in ambush. "I would have killed him," wrote Gist, "but Washington forbade." They took him prisoner instead. Dismissing their captive at dusk, they travelled all night and next day, resting at dark under a huge tree. The dispatches were now in the hands of the British, destined for the junction of the rivers which Washington and Gist had crossed, where Pittsburgh now stands. It was afterward, 17 April, seized by the French, and named Fort Duquesne. Washington hastened
forward, Gist acting as his scout, and on 27 April the latter announced that the French were within five miles of the American camp. An engagement followed, and the French were beaten. Gist's subsequent history is unknown.

GIST, Mordecai, soldier, b. in Baltimore, Md., in 1748; d. in Charleston, S. C., in 1792. His ancestors were early English emigrants to Maryland. He was educated for commercial pursuits. At the beginning of the Revolution the young men of Baltimore associated under the title of the "Baltimore Independent company," and elected Gist captain. It was the first company raised in Maryland for the defence of popular liberty. In 1776 Gist was appointed major of a battalion of Maryland regulars, and was with them in the battle near Brooklyn. In January, 1779, congress appointed him a brigadier-general in the continental army, and he took the command of the 2d Maryland brigade. He fought stubbornly at the battle of Camden, S. C., in 1780, and at one time after a bayonet charge his acquaintance secured fifty prisoners, but the British under Cornwallis rallied and the Marylanders gave way. Gist escaped, and a year later was present at the surrender of Cornwallis. He joined the southern army under Greene, and again when the army was remodeled in 1782 he was given the command of the light corps. On 28 Aug., 1782, he rallied the broken forces of the Americans under Laurens at the battle of the Combahee, and gained a decisive victory over the British. After the war he resided on his plantation near Charleston, S. C.; but Gist possessed an excellent figure, symmetrical proportions, great strength, and expressive features. He had but two children, sons, one of whom he named "Independent" and the other "States."

GLADDEN, Adley H., soldier, b. in South Carolina; d. in April, 1882. He was a major in Col. Butler's Palmetto regiment of South Carolina volunteers in the Mexican war, became lieutenant-colonel, and commanded the regiment at the battle of Chapultepec, where, at both of whose superior officers were killed. He was severely wounded at the Belden Gate. In 1861 he was appointed a brigadier-general in the Confederate army, and was assigned a brigade in Withers's division of Bragg's corps. He was wounded on the first day of the battle of Shiloh, and died soon afterward.

GLADDEN, Washington, clergyman, b. in Pittsburg, Pa., 11 Feb., 1836. He was graduated at Williams in 1859. After a course of theology he became pastor of the State street Congregational church in Brooklyn in 1869, then in Morrisania and in North Adams, Mass., in 1867-71, when he removed to New York and was one of the lay teachers of the New York "Independent" until 1875. From 1875 till 1883 he was pastor of the North Congregational church in Springfield, Mass., and for some time edited "Sunday Afternoon." He then went to Columbus, Ohio, to be pastor of the first church in that city. He has been a frequent contributor to papers and periodicals, a successful public lecturer, and has published "Plain Thoughts on the Art of Living" (Boston, 1888); "From the Hub to the Hudson" (1889); "Workingmen and their Employers" (1891); "The Young Men and the Churches" (Boston, 1885); and "Applied Christianity" (Boston, 1884).
and finished it in a year. He did not live, however, to learn that his work had been approved by some of the finest judges of literature, and he died shortly afterward, intrusting his manuscript to Mr. Reynolds, by whom it was published in 1835. It was highly commended by such competent judges as Professors Anthon, Maclean, and Alexander, and Presidents Tyler, Du Pont, and Fisk. It was used as a text-book for some time in the grammar-school of Columbia college, and might have won its way into general acceptance but for the fact that the stereotyped plates were destroyed in a fire, and the book was never reprinted. The fatality which pursued Mr. Glass through life seems to have followed him after death. "Washingtoni Vita" has now become a literary curiosity. On the title-page appeared a selection in Latin purporting to be from the fragments of Cicero, prophesying the future appearance and deeds of Washington. It is said that scholars imitated the fragments of Cicero without success; and their bewilderment was only relieved when Prof. Anthon acknowledged that he had written the passage himself.

GLASS, James W., artist, b. in 1825; d. in 1857. He became a pupil of Huntington in New York city and went to London, 1845, where he applied himself to art for several years, returning to the United States in 1856. His "Last Return from Duty," an equestrian portrait of the Duke of Wellington, brought him first into prominence in England. It was purchased by Lord Elgin and was placed in the new Buckingham Palace by the queen. The subject has been engraved by James Faid. He was particularly successful in his drawing of horses. His works include "The Battle of Basing," "The Royal Standard," "Puritan and Cavalier," and "The Free Companion." 

GLEASON, John J., naval officer, b. in New York City; d. there, 12, March, 1882. He was appointed midshipman, 1 Feb., 1823, and in that year served under Com. Porter in the suppression of piracy in the West Indies. In 1827 he received the commission of sub-lieutenant in the U. S. Navy. In 1839 he was appointed captain of the steam frigate "Passaconaway" and served in that capacity in the Mexican War. In 1842 he was appointed captain of the sloop "Falmouth," and in 1846 he was appointed commander of the sloop "Pacifica," of the coast survey, 1847-50. He was appointed commodore on the retired list, 4 April, 1867.

GLEAZER, William, author, b. in Fowler, St. Lawrence Co., 22 April, 1841. He went to his boyhood on a farm, and was educated principally at the state normal-school at Albany. He taught in Schoodack, N. Y., in 1859-60, and in 1861 enlisted in the 2d New York or Harris cavalry regiment. He had risen to the rank of lieutenant, when he was taken prisoner at the cavalry skirmish near Buckland Mills, Va., on 18 Oct., 1863, and sent to Libby prison. He was afterward transferred to Georgia, to Charleston, and then to Columbia, S. C., whence he made his escape, but was recaptured near Spartanburg, Ga. He escaped again from Weldon, Ga., 19 Dec., 1864, and returned home, his term of service having expired, but on 25 Feb., 1865, entered the army again as 1st lieutenant in the 28th New York cavalry, and served till the end of the war. He has since devoted himself to literature, and wrote the "History of the United States," for which he went from Boston to San Francisco on horseback, and was captured by hostile Indians near Skull Rocks, Wyoming territory, but made his escape. In 1881 he made a canoe voyage of 3,000 miles, from the Arctic to the mouth of the Mississippi, and claimed to be the discoverer of a small lake south of Lake Itasca, which he maintains should be regarded as the true source of the Mississippi. It has since been found that this lake is laid down on the maps of the government surveys. Capt. Gleizer's works include "Capture of the Prison Pen, and Escape," over 400,000 copies of which were sold (Albany, 1865); "Three Years in the Federal Cavalry" (New York, 1870); "Battles for the Union" (Hartford, 1874); "Heroes of Three Wars" (Philadelphia, 1878); "Peculiarities of American Cities" (1880); and "Down the Great River" (1887). See his life by John A. Owens, entitled "Sword and Pen" (Philadelphia, 1884).

GLEASON, Frederic Grant, musician, b. in Middletown, Conn., 17 Dec., 1848. After studying under Dudley Buck, he, in 1864, went to Leipzig, Germany. In 1869 he went to London, where he applied himself to art for several years, returning to the United States in 1876. His "Last Return from Duty," an equestrian portrait of the Duke of Wellington, brought him first into prominence in England. It was purchased by Lord Elgin and was placed in the new Buckingham Palace by the queen. The subject has been engraved by James Faid. He was particularly successful in his drawing of horses. His works include "The Battle of Naseby," "The Royal Standard," "Puritan and Cavalier," and "The Free Companion." 

GLEIG, George Robert, author, b. in Stirling, Scotland, 30 April, 1796. He is the son of Bishop Gleig, a Scottish theologian and man of letters. The son was educated at Glasgow and Balfol college, Oxford, joined a regiment in Cork in 1812, and was transferred to the 9th Light Infantry. In 1813 he was sent to Spain in 1813. He served under Wellington in the Peninsular war, was sent with his regiment to this country, and took part in the battles of Bladensburg—where he was wounded—Baltimore, and New Orleans. He returned to England in 1815, was retired from the army, took orders, and in 1819 was appointed a curacy in Kent. In 1821 the Archbishop of Canterbury presented him to the perpetual curacy of Ash, to which was added the charge of Ivy church, Kent. He was appointed chaplain of Chelsea hospital in 1824, and during the last four years of his service was appointed by Wellington made chaplain-general to the forces, which office he held until he retired at the age of eighty. His exertions to establish a system of education for the soldiers gained for him the post of inspector-general of military schools, and he was presented with St. Paul's cathedral. Mr. Gleig was for half a century a contributor to "Blackwood's Magazine," and occasionally published papers in the "London Quarterly," and the "Edinburgh Review," also contributing to "Frasier's Magazine," of which he was a joint editor. He may be called the oldest of living writers, having as lately as 1886 contributed to the "Fortnightly Review" an article on the second
GLEIM, John Godfried, clergyman, b. in Germany; d. in Germantown, Pa., in 1757. In 1764 he came to this country with Caspar Fahnestock. He settled in Blackwood in 1784 and remained until his death. In conjunction with Weiser and Mathias he published "The Inspired."—His son, George Christian, soldier, b. in 1730; d. in Lancaster county, Pa., 21 July, 1787, took part in the war of the Revolution and was severely wounded near Philadelphia. He removed to Lancaster county in 1776, where he resided until his death. —George's son, Christian, journalist, b. in Lancaster county, Pa., 10 Jan., 1790; d. in Pittsburgh, Pa., 21 Sept., 1861, went to Philadelphia, where he entered the printing-office of Ezra Baley. He settled in Harrisburg in 1812, and was appointed to print the senate journal in English. Afterward he established and edited "The Pennsylvanian." He served as ensign of volunteers in the war of 1812-15. From 1832 till 1824 he was sheriff of Dauphin county. He resided at Pittsburgh in 1830, and resided there until his death.

GLENDY, John, clergyman, b. in Londonderry, Ireland, 24 June, 1755; d. in Philadelphia, Pa., 4 Oct., 1832. He was educated at the University of Glasgow, where, after studying theology, he was ordained. He accepted a call from the church in Londonderry, and remained there until he was exiled during the Irish insurrection of 1798, in which he protested against the aggressive measures of the government, and rendered himself obnoxious to the nobility. He arrived in Norfolk, Va., in 1796, and afterward supplied the congregations of Staunton and Bethel, Augusta co., Va., for nearly two years. He was invited by President Jefferson to be his guest in Washington, and during his visit delivered a discourse in the capitol. In 1800-30 he was pastor of the Reformed Presbyterian church in Baltimore, Md. In 1806 he served as chaplain of the U. S. house of representatives, and in 1815 and 1816 of the senate. In 1823 the University of Maryland gave him the degree of D. D. He published an "Oration in Commemoration of Washington," delivered in 1831.

GLENDY, William Marshall, naval officer, b. in Virginia in 1801; d. in Baltimore, Md., 16 July, 1873. He was appointed midshipman in 1818, commissioned lieutenant in 1827, and served successively with the Brazil and Pacific squadrons. In 1847 he was made commander, and served in the Mediterranean for eighteen months. Subsequently he commanded in the East Indies. In 1855 he was made captain, and in 1861—2 served as senior officer on the coast of Africa. He was promoted to the rank of commodore in 1862, and in the following year took part in the Washington and D. C. He served six months as lighthouse-inspector, and in 1865 retired from active service.

GLENN, James, governor of South Carolina from 1744 till 1755. Toward the end of his administration he concluded a treaty with the Cherokee in which the flow of the Oconee was ceded to the king, which contributed largely to the interest and safety of the colony. He published "A Description of South Carolina" (London, 1761).

GLENN, George, physician, b. in Philadelphia, Pa., 22 July, 1735; d. there, 4 Nov., 1792. He was graduated at the University of Edinburgh in 1758. During the last French war in America he was a surgeon in the British army. In 1777 he served as surgeon of a regiment, and afterward was a major. In 1800 he was made a surgeon in the continental army, and became director-general of hospitals for the middle division.

GLIDON, George Dana Boardman, naval officer, b. in Ellsworth, Me., 15 April, 1844; d. in Cambridge, Mass., 25 Jan., 1888. He was graduated at the U. S. naval academy in 1867. In the same year he was made ensign. His first year of service was passed on the "Seminole," of the Western Gulf blockading squadron. He took part in the battle of Mobile Bay, 5 Aug., 1864, where he received the highest commendations from his commanding officer. From 1865 till 1867 he served on the "Wyoming," of the East India squadron. He was appointed master in 1866, lieutenant-commander in 1868, and commander in 1888. He was engaged with the Asiatic squadron from 1867 till 1869, when he was stationed at the Naval academy. In 1870 and 1871 he commanded the "Tennessee." He served with the "Wachusett," of the European fleet, from 1872 till 1874, and with the "Omaha," of the Pacific fleet, from 1875 till 1877. He was on duty at the Boston navy-yard in 1878. His last service was in the Asiatic waters, where he commanded the "Palos," from which he was detached in 1884.

GLIDDON, George Robins, archaeologist, b. in Devonshire, England, in 1809; d. in Panama, 16 Nov., 1867. At an early age he went to Alexandria, where his father was a merchant, and also U. S. consul. For nearly twenty-three years he resided in Egypt, and during a great part of that time served as U. S. vice-consul. He visited the United States, and lectured in Boston, New York, and Philadelphia on Egyptian antiquities. He was agent for the Honduras interoceanic railway at the time of his death. He wrote "A Memoir on the Cotton of Egypt" (London, 1841); "An Appeal to the Antiquaries of Europe on the Destruction of the Monuments of Egypt" (1841); "Discourses on Egyptian Archaeology," (1841); "Ancient Egypt" (1830; new ed., 1869); "Types of Mankind," written in conjunction with Dr. Josiah C. Nott, which contained contributions from Agassiz and Dr. Samuel G. Morton (Philadelphia, 1854); and "Indigenous Races of the Earth," with Dr. Josiah C. Nott (1855).

GLISAN, Rodney, physician, b. in Linganore, Frederick co., Md., 29 Jan., 1827. He was graduated in the medical department of the University of Maryland in 1849. After practicing for a year in Baltimore, he was appointed assistant surgeon in the U. S. army, and engaged as medical officer from 1850 till 1861. He served five years on the plains, and six years in Oregon during the Indian wars, from 1855 till 1861, when he resigned his commission. After practicing a year in San Francisco, he settled in Portland, Oregon. He was president of the Oregon Medical society in 1872 and 1876, and of the Oregon state medical society in 1875-6, and has been for several years a member of the American medical association. He was a delegate to the 7th International medical congress, held in London in 1891, and a member of the American Medical association, held in Washington, D. C., in 1887. He is now (1887) emeritus professor of obstetrics and diseases of women and children in the medical department of Willamette university. Among his notable cases were the first amputations of the shoulder and thigh, and the second operation for strangulated inguinal hernia ever performed on the Pacific
coast north of San Francisco. He has travelled throughout the United States, British and Central America on two and a half trips through Europe. He has written numerous articles upon medical subjects, published in the "U. S. Army Statistics" (1850 and 1860), in the "American Journal of the Medical Sciences" (1863-78 and 1880), and in Erichsen's "Collection of Medical Rhymes" (Chicago, 1884). He had published a "Journal of Army Life" (San Francisco, 1874); a "Text-Book of Modern Midwifery" (Philadelphia, 1881); and "Two Years in Europe" (New York, 1887).

GILOSSON, Oliver S., naval officer, b. in Ohio, 1 Jan., 1814. He midshiped from Indiana, 1 Nov., 1826, became lieutenant in 1837, and commanded the sloop "Reefer" during the Mexican war. He served in the navy-yard at Norfolk, Va., from 1848 till 1850, when he was on special duty. He was attached to the steam frigate "Puskwah," of the East India squadron, in 1852, and from 1853 till 1855 was on the Japanese expedition, being in Japan when the first treaty was made by Com. Perry. He was appointed commander, and assigned to the steamer "Mount Vernon" in the North Atlantic blockading squadron, and became captain of the same. In 1855 and while the "Mount Vernon" saved the transport "Mississippi," which was bound to New Orleans with 1,500 men of Gen. Butler's expedition. It was supposed that she was intentionally run upon by the Frying-pan shoal. He also burned a light-boat and schooner. He was on the blockade of Wilmington, N. C. He commanded the steam sloops "Iroquois" and "Mohican" in 1862, and the steamer "Santiago de Cuba" in 1864-3. He was present in the two attacks on Fort Fisher, December, 1864, and January, 1865, and being recommended for promotion by Admiral Porter for covering the landing of the troops and carrying the division into action. He became commodore in 1866, and commanded the station at League Island, Pa., from 1867 till 1870, when he was appointed rear-admiral of the East and to command the European fleet. He was retired 18 Jan., 1871.

GLOSSBRENNER, John Jacob, Moravian bishop, b. in Hagerstown, Md., 24 July, 1813; d. in Churchville, Augusta co., Va., 7 Jan., 1887. After receiving a common-school education, he was appointed to a silver kursaal in 1833, and began to read theological books. He was licensed to preach by the Virginia annual conference in 1833, and labored as itinerant missionary, circuit preacher, and presiding elder till May, 1840, when he was first elected bishop of the United Brethren in Christ. He was re-elected for the quadrennial terms, and, when no longer able to render active service, was appointed bishop emeritus, May, 1885. He visited conferences on the Pacific coast in the time of pioneer settlement, and was active in promoting the interests of his church. Previous to his death he was senior bishop, without any assigned district of labor. Several of his occasional sermons have been published in the denominational journal, "The Telescope," Dayton, Ohio. The degree of D. D. was conferred upon him by Valley college in 1884.

GLOVER, John, soldier, b. in Salem, Mass., 5 Nov., 1732; d. in Marblehead, Mass., 30 Jan., 1797. At the beginning of the Revolution he raised 1,000 men and joined the army at Cambridge, where he was of great service in organizing and disciplining troops. He commanded the 12th regiment, afterward the 14th, which was one of the first, as well as the best, in the continental army. Being composed almost entirely of fishermen, it was called the "amphibian regiment." On the retreat from Long Island it manned the boats and crossed the entire army in safety. These troops also manned the boats and led the advance over the Delaware on the night before the victory at Trenton. Col. Glover participated in the battle of Shirley, and was with Washington at Valley Forge. He was appointed brigadier-general, and conducted the prisoners to Cambridge. In 1778 he joined Greene's division in New Jersey, signed the protest against D'E斯塔ing, and was detached to Rhode Island under Sullivan. He was ordered to Massachusetts in 1780 to superintend the drafts from that state. He was a member of the court of inquiry concerning Major Andrè, which assembled on 29 Sept., 1780. Glover was diminutive in person, active and energetic, and possessed considerable military ability. See a memoir of him by William P. Upham (Salem, Mass., 1863).

GLOVER, Sir John Hawley, governor of Newfoundland, b. in 1820; d. in England, 30 Sept., 1863. He entered the navy at an early age, and was made a lieutenant in 1851. He served in the Baltic in 1854, was given command of the "Otter," a steam vessel, in 1855, and was promoted to the rank of commander in November, 1862. After a few years' cruising on the African coast, he became governor of Lagos, an island on the coast of Guinea, which office he administered until he resigned in 1872. In 1872, he is said to have given up his office to the friendly native chiefs in the British settlements on the Gold Coast, and performed his mission so successfully that, on his return to England, he received the thanks of parliament and the honor of knighthood. He was appointed governor of Newfoundland in 1876, and administered this office till June, 1881, when he was appointed governor of the Leeward islands. He was again governor of Newfoundland from 1883 until his death.

GLOVER, Joseph, physician, b. about 1780; d. in Charleston, S. C., about 1840. He was graduated in the medical department of the University of Pennsylvania in 1800, and in that year became a member of the medical society of South Carolina. He was active in establishing a free dispensary in 1801, and gave his services gratuitously to the poor. Receiving a vote of thanks from the trustees in 1805. Among his suggestions which the medical society made to the city council was that of planting trees, the sanitary advantages of which he showed in his report in 1808. Dr. Glover was noted for fearlessness and skill as a surgeon. He successfully performed lithotomy, removed a portion of the spleen and the omentum, and was one of the first in this country to revive the operation of tapping the head for hydrocephalus. A descrip-
tion of the case was published in pamphlet-form (1819), and was widely quoted.

GLOVER, William, governor of North Carolina. In 1767 Thomas Cary obtained a commission as deputy-governor of North Carolina. While collector of the rents he had neglected to settle his accounts, and the lords proprietors, disapproving of his election to this office, directed their deputies to appoint one of their number in his place. When the barque "Preble" on which Cary sailed for England, the result of this voyage was a detailed and formal proposition made by Gunn to the U.S. government to attempt the peaceful opening of Japan by diplomacy, backed by a show of force. The expedition, as finally organized, grew to the proportions of a fleet, the command of which was given to the cabinet officers of highest rank—first by Aulick, and then by Perry. Other results of this episode were preparation of the Japanese mind for Perry, the training of the interpreter Moriyama Yenouke, who did good service in 1854, and of the hydrographer, Isut, Silas Bent, the only officer in Perry's fleet conversant with Japanese waters, who, in a paper read before the American geographical society in 1856, first clearly defined and described the Kuro Shio, "Dark Stream," or Gulf Stream of the Pacific ocean. Gunn was made a captain in 1839.

GMEINNER, John, clergyman, b. in Bavaria, Bavaria, 5 Dec., 1847. He came with his parents, in 1849, to Milwaukee, Wis., entered the theological seminary there in 1858, and was ordained priest, 10 June, 1870. He was pastor of various congregations up to 1886, at St. Gmeiner's, a "Catholic Columbian," and contributing frequently to German and English Roman Catholic journals. He was appointed professor of ecclesiastical history and homiletics in the seminary of St. Francis of Sales, Milwaukee, in 1876, which chair he still holds (1887). His best work is "Gemeinde Kirche in den Vereinigten Staaten" (Milwaukee, 1875); "Sind wir dem Weltende nahe?" (Detroit, 1877); "Modern Scientific Views and Christian Doctrines compared" (Milwaukee, 1884); "The Spirits of Darkness and their Manifestations on Earth, or Ancient and Modern Spiritualism" (1886); and "The Church and the Various Nationalities of the United States" (1887).

GODDARD, Calvin, jurist, b. in Shrewsbury, Mass., 17 July, 1708; d. in Norwich, Conn., 2 May, 1842. He was educated at Dartmouth, and in 1736 studied law with Oliver Ellsworth, was admitted to the bar in 1790, and settled in Plainfield, Conn. In 1791 he was sent to the state legislature, and, with re-elections, continued to serve until 1801, being speaker during the last three years. He was then elected to the U.S. Senate in 1809, and held his seat for two terms—from 7 Dec., 1801, till 3 March, 1805. He removed to Norwich in 1807, and was a member of the state executive council from 1808 till 1815. He was a presidential elector in 1812, and a delegate to the Hartford convention in 1814. From 1815 till 1818 he was judge of the superior court of Connecticut. Subsequently, for five years, he held the office of district attorney for the county of New London, and for seventeen years was mayor of Norwich.

GODDARD, Calvin Luther, inventor, b. in Covington, N. Y., 2 Jan., 1820. He was graduated at Yale in 1845, after which he taught the classics in New York for a year. From 1846 till 1854 he was engaged as a clerk, and then began business on his own account. His attention seems to have been called at once to the necessity of thoroughly cleansing wool in the earliest stages of its manufacture, in order to secure perfection in the finished product, and to this end he arranged a burring picker. Subsequently he patented solid packing burring machines, and feed-rolls as an attachment for the picker, and since devised several valuable improvements for this machine. The steel ring feed-rolls, with ad-
justable stands and spring boxes, were also patented by him. For his inventions he has been honored with many medals, including gold medals from the world's fair held in London in 1862 and that in Paris in 1867. Bishop, in his "American Manufactures," says of Mr. Goddard: "Probably no man in the United States has labored more zealously and effectively to place American woolen goods on an equality with those of Europe, and to open the Orient, where his labors were begun in Bangkok, Siam, in 1840. In 1848 he removed to Ningpo, where he remained until his death, preaching and working with energy, although in failing health. He prepared several tracts, an English and Chinese vocabulary, and a translation of the New Testament into Chinese.

GODDARD, Josiah, clergyman, b. in Wendell, Mass., 27 Oct., 1813; d. in Ningpo, China, 4 Sept., 1854. He was graduated at Brown in 1835, and at the Newton theological institution in 1838, was appointed a missionary to the Chinese in Siam, and arrived in Singapore in June, 1839. His labors were begun in Bangkok, Siam, in 1840. In 1848 he removed to Ningpo, where he remained until his death, preaching and working with energy, although in failing health. He prepared several tracts, an English and Chinese vocabulary, and a translation of the New Testament into Chinese.

GODDARD, Paul Beck, physician, b. in Baltimore, 26 Jan., 1811; d. in Philadelphia, Pa., 3 July, 1866. He was graduated at Washington college in 1829, and at the medical department of the university in 1833, and settled in Philadelphia, where he followed his profession. Dr. Goddard acquired reputation through his work as an editor of medical books. These include a series of twelve plates "On the Arteries," and a similar series "On the Nerves" (Philadelphia); with Joseph E. Parker, "The Anatomy, Physiology, and Pathology of the Human Teeth, with the most Approved Methods of Treatment." (Philadelphia, 1844); Moreau's "Practical Treatise on Midwifery" (1844); the iconographic portion of Rayer's "Theoretical and Practical Treatise on the Diseases of the Skin" (Philadelphia, 1848). He also published "The Diseases peculiar to Women" (1848); Philip Ricord's "Illustrations of Syphilitic Diseases" (1851); Wilson's "System of Human Anatomy, General and Special" (1851); and Wilson's "Dissector, or Practical and Surgical Anatomy" (1851). He was a member of the Medical Society of the State of New York, in New London, Conn., in 1740; d. in Providence, R. I., 23 Dec., 1817. He established the first printing-press at Providence on 20 Oct., 1762, where he also began printing the "Gazette." He soon afterward became one of the publishers of the "New York Gazette and Postboy," and in 1766 removed to Philadelphia, where, with Galloway and Wharton, he published the "Pennsylvania Chronicle." In 1773 he went to Baltimore and established the "Maryland Journal." He was active in organizing the post-office, and was appointed surveyor of roads and highways in 1775. He sold his press in 1792, and retired to a farm in Johnston, R. I., but afterward moved to Providence. He was a Whig in the Revolution. His friend, Gen. Charles Lee (who was the writer of the "Queries" in the "Journal," which caused Goddard trouble with the Whig club in 1779), bequeathed him a portion of his extensive landed estate in Virginia. He published a history of the Pennsylvania Chronicle" (1770).

His son, William, an educator, b. in Johnston, R. I., 2 Jan., 1794; d. in Providence, 16 Feb., 1846. He was graduated at Brown in 1812, was professor of moral philosophy and metaphysics there in 1825-34, and of rhetoric and belles-lettres in 1834-42. He was editor and proprietor of the "Rhode Island Annual." Providence in 1814-30. He had been a member of the Rhode Island legislature. His writings were edited by his son, F. W. Goddard (2 vols., 8vo, Providence, 1870).

GODDU, J. H., Canadian patriot, b. in St. Denis, Canada, 1786; d. there in 1882. At the age of six he served in the Canadian volunteers during the war of 1812, rose to the rank of major and distinguished himself at the battles of Lacolle and Chateaugay. He was afterward present at the naval engagement of Plattsburg, where he commanded a gun-boat. He then settled on a farm, which was granted him by the government as a reward for his services, in the township of Weeden, but subsequently removed to St. Césaire. In 1837 he took an active part in the Canadian agitation. He was present, 23 Oct., 1837, at the assembly of the six counties, and was the first to take up arms; named commander of the insurgents of St. Césaire, and reported at the head of over a hundred men at St. Mathias. The defeat of the Canadians at St. Charles convinced him that the struggle was hopeless, and he led his men back to St. Weeden and was the first to surrender. He was conducted to Montreal and imprisoned till 2 July, 1838, when, with six others, he entered into an agreement with Lord Durham to plead guilty of high treason. He was exiled to the Bermudas during the pleasure of the queen of England; but was pardoned and exiling British subjects without trial was annulled. Goddu came to the United States, and after some time was allowed to return to Canada.

GOEDE, Louis Antoine, publisher, b. in New York city, 6 June, 1814; d. in Philadelphia, 29 Nov., 1878. He was educated in the lower districts, and after many years he kept a book-store and circulating library. Removing to Philadelphia, he in 1830 founded "Goede's Lady's Book," the first periodical of the kind published, which was continued by him with great success until 1877, when it was sold to a stock company. On retiring from the editorship and proprietorship of the magazine, Mr. Goede remarked that not an immoral thought or profane word could be found in its pages during the entire period of his connection with it. He also published the "Daily Chronicle" newspaper, "Jarvis's Musical Library," and "Young People's Book." Mr. Goede left a fortune of over $1,000,000, acquired entirely from his publications.

GODFREY, Thomas, mathematician, b. in Bristol, Pa., in 1794; d. in Philadelphia in December, 1799. He followed the trade of a glazier in the metropolis, and, having a fondness for mathematical studies, mastered such books as he met with, subsequently acquiring Latin, that he might become familiar with the mathematical works in that language. Having obtained a copy of Newton's "Principia," he found out how he had made in Davis's quadrat to James Logan, who was so impressed that he at once addressed a letter to Edmund Halley in England, giving a full description of the construction and uses of Godfrey's instrument. Halley appears to have ignored this communication, and, after a few years' time, had elapsed, Logan transmitted a copy of the invention to Peter Collinson, with a request that it
be communicated to the Royal society. Meanwhile, John Hadley, then vice-president of the society, had presented his memoir of 1731, which had been inserted in the "Philosophical Transactions" of that year, describing a reflecting quadrant of the same character, which he claimed as his own. It was decided that both were entitled to the honor of the invention, although statements were made to the contrary of what they might have become known to Hadley. The society sent to Godfrey, as his reward, household furniture to the value of £200, instead of money, on account of his habits of intemperance. Benjamin Franklin resided in the same house with Godfrey, and says that, like most great mathematicians from whom he had met, he was not a pleasant companion, since he expected universal precision in everything said, and was perpetually denying or distinguishing on trifles, to the disturbance of all conversation. —His son, Thomas, poet, b. in Philadelphia, Pa., 4 Dec., 1786, near Washington, N. C., 8 Aug., 1788, received a fair education in his mother's tongue, and was apprenticed to a watchmaker. In 1798 he obtained a lieutenant's commission in the provincial forces raised for an expedition against Port Duquesne, but, on the disbanding of the troops, he went to North Carolina and accepted an appointment of purchasing agent, remaining so occupied for three years. His employer dying, he returned to Philadelphia, and then sailed to New Providence as a supercargo. He settled to return by way of New England, but contracted a fever, from the effects of which he died. While in North Carolina he wrote the tragedy of "The Prince of Parthia," which was offered to a company performing in Philadelphia in 1758. This is regarded as the first dramatic work in the English language. Godfrey's poems and his "Account of T. Godfrey," a work published by his friend, Nathaniel Evans, in 1767.

**GODIN, Louis (go-deen), French astronomer, b. in Paris, 28 Feb., 1704; d. in Cadiz, Spain, 11 Sept., 1768. He was graduated at the College de Le Grand, and studied astronomy under Dufour. When the French Academy gave him the first prize in 1727, and the academy elected him a pensionary member. He was commissioned to write a continuation of the history of the academy, left unfinished by Fontenelle, and was also authorized to submit to the minister, Cardinal Fleury, the best means of discovering the truth in regard to the figure of the earth, and proposed sending expeditions to the equator and the polar sea. The minister approved the plan and appropriated the necessary means, the academy designating La Condamine, Bouguer, and Godin to go to Peru in 1754. The expedition sailed from Rochelle, 16 May, 1755, touched at Cadiz to take two naval lieutenants, whom Philip V. had ordered to accompany it, and proceeded to Santo Domingo, where they remained six months to take observations. They arrived in Quito on the 17th of September, 1755. Having lost the greater part of his wife's dowry in speculations, he resolved to try his fortune in Cayenne, where he arrived in May, 1750, and settled on the banks of the river Oyapok. For fifteen years he explored Cayenne and the Brazilian Guianas, north of the Amazon, and the coast nearly along the equator, to investigate the species of plants. From 1765 till 1775 he explored the Amazon. In the latter year he finally returned to France, and settled on his estate of St. Amand. He gave his botanical collections to the museum of natural history, where they are still preserved. In 1768 he was elected a member of the Academy of science, and he labored thenceforth to arrange the notes taken during the many years of his explorations, and published "Flore raisonnée du Perou, comprenant 4,000 espèces, dont plus de 1,500 nouvelles," (6 vols., Paris, 1768, with two volumes of illustrations containing over 750 plates); "Les plantes de la Guayane" (1777); "Flora de la Guayana," (1777); "Flore de la Guayane, explication de l'écriture naturelle" (5 vols., 1779, with three volumes of illustrations); "Flore de l'Amazone, explication, etc." (4 vols., 1783; with one volume of illustrations); "Grammaire de la langue Quichua ou des Incas" (1782); "Dictionnaire de la langue Quichua" (1783); and "Grammaire comparée des langues Indiennes de l'Amérique du..."
GODKIN, Edwin Lawrence, journalist, b. in Mayne, County Wicklow, Ireland, 2 Oct., 1831. His father, James, wrote a "Religious History of Ireland" (1873). The son was educated at a grammar school near Wakefield, England, and at Queen's college, Belfast, where he was graduated in 1851. He was a correspondent of the London "News" in Turkey and Russia during the Crimean war, 1854-6. In the autumn of 1856 he came to the United States, and in the ensuing winter made a journey on horse-back through the south and west of the United States, and returned by the overland route to New York. He returned to New York at the close of 1858, and was a correspondent of the New York "Times" until July, 1859, when he established and became editor of the "Nation," which in 1866 passed into the hands of Mr. Godkin and two other gentlemen as proprietors. In 1881 "The Nation" was made the weekly issue of the "Evening Post," and Mr. Godkin became one of the editors and proprietors of the joint publication. He is the author of a "History of Hungary, A. D. 300-1850" (London, 1856), and of the work on "Government," a "Dictionary of American Science," 1873.

GODMAN, John D., physician, b. in Annapolis, Md., 30 Dec., 1794; d. in Germantown, Pa., 17 April, 1830. He was left an orphan at an early age without means, and after he had been a short time at school was apprenticed to a printer in Baltimore. In the autumn of 1814 he entered the military service of the flotilla stationed in Chesapeake bay, and was present at the defence of Fort McHenry. In 1815 he began the study of medicine under Dr. Luckey in Elizabethtown, whence he soon afterward removed to Baltimore, studied under Dr. Davidge, filling the place of his preceptor, who was professor of anatomy in the University of Maryland, while the latter was disabled by sickness. After he was graduated in February, 1818, he practised successively in New Holland, Pa., Anne Arundel county, Md., and Andous, about 450 miles, from which she could easily reach the Portuguese government, but lost their guide, and were reduced to the most frightful sufferings in the desert. At the end of three days they all died except Madame Godin, who, after wandering for several weeks through a dense wood, was taken by an Indian to the mission at Andous. All attempts to find Oresavall were unsuccessful, and so she never profited by the transport which the Portuguese government furnished her. She had still to travel over 9,000 miles to reach her husband, and, after a long time and much suffering, she arrived at Oyapok, where he had remained several years waiting for his wife. Afterward they embarked for France, and arrived in La Rochelle, 26 May, 1775. The rest of Madame Godin's life was passed on her husband's estate at St. Amand in Berry. Prince Charles Bonaparte, the imperialist, has given Madame Godin's name to a remarkable species of South American birds, the "Champelaea Godinae," "consecrated," he says, "to the memory, which can never be too much honored, of Isabel Godin des Oresavall, who, alone and abandoned, traversed the American continent in its greatest width, sustained by her greatness of soul and her martyrdom to duty." See her life by Ferdinand Denis, based on family documents, in the "Magnis pittoresque" (1854), and "Les voyages dans les forêts de la Guyane," by Malouet.

GODON, Sylvanus William, naval officer, b. in Philadelphia, 18 June, 1809; d. in Blois, France, 10 May, 1879. He was appointed midshipman in 1819, and, after serving at sea in various parts of the world, he appeared in the U. S. Navy in 1827, and lieutenant in 1836. He accompanied Commodores Hull to the Mediterranean on the flagship "Ohio" in the years 1838, 1840, and 1841, was actively employed during the Mexican war, and was present in the bombardment of Vera Cruz. He was made commander in 1855, and captain in 1861, at the beginning of the civil war. In command of the "Mohican" he took part in the attack on Fort Royal by the fleet under Admiral Du Pont. He placed his ship
in position to secure an enflaming fire on the fort on Hilton Head, and materially assisting in silencing the batteries of the enemy. In 1863 he was promoted commodore, and commanded the 4th division of Admiral Porter's fleet at both bombardments of Fort Fisher, N. C., in December, 1864, and January, 1865. In the report of the latter, the safety of the Flagship, of which he was an honor guard, and for which the heroic efforts of his men, the "Susquehanna." At the close of the war he was made rear-admiral, and commanded the South Atlantic or Brazil squadron in 1866-7. His last active employment was as commander of the Brooklyn navy-yard in 1868-70. He was retired on account of age in 1871.

GODWIN, Parke, editor, b. in Paterson, N. J., 25 Feb., 1816. His father was an officer in the war of 1812, and his grandfather a soldier of the Revolution. He was educated at Princeton in 1834, studied law, and was admitted to the bar of Kentucky, but did not practise. He married the eldest daughter of William Cullen Bryant, and from 1857 till 1853, excepting one year, was connected with the "Evening Post." In 1845 he issued the "Pathfinder," a weekly, which was suspended after three months. He contributed many articles to the "Democratic Review," in which he advocated reforms that were subsequently introduced into the constitution and code of New York.

GOESBRIAND, Louis de, R. C. bishop, b. in St. Urbain, France, 4 Aug., 1816. He studied the classics at Quimper and Pont Croix, Finisterre, and theology in the seminary of Quimper, and that of St. Sulpice, Paris. After his ordination in 1840 he resolved to devote himself to the American mission, and in 1847 sailed for that country. In the same year. Between 1840 and 1847 he was occupied with missionary duties in the diocese of Cincinnati. He was next appointed vicar-general of the diocese of Cleveland and rector of the cathedral.

GOESSMANN, Charles Anthony, chemist, b. in Naumburg, Germany, 13 June, 1827. He was educated at the gymnasium in Fritzlar, and then studied under Friedrich Wöhler in the University of Göttingen, where he received the Ph. D. in 1853. From 1853 till 1857 he was assistant in the chemical laboratory, and privat-docent in the university. He then came to the United States, and at first was engaged in the development of the salt industry in New York and Michigan. In 1863 he became professor of chemistry in the Rensselaer polytechnic institute in Troy, but resigned that chair after two years. He was elected in 1869 to the chair of chemistry in the Massachusetts agricultural college, and in addition to his professorship has been chemist to the Massachusetts state board of agriculture since 1873, director of the state agricultural experiment station since 1882, and analyst of the Massachusetts state board of health since 1888. His contributions to chemical literature have been numerous, and include, prior to his coming to the United States, papers on organic acids which were voted to him the "Anzeichen der Chemie und Pharmacie." Dr. Goessmann's later papers include articles on sugar, salt, various foods, and special fertilization of plants. These have appeared chiefly in the reports of the organizations with which he has been connected.
States, probably in 1728. He studied divinity, and in 1737 applied for ordination to the presbytery of Philadelphia, but was refused, and he was ordained by his instructor. At the end of ten years' work in the ministry the question of his ordination again arose; it was submitted to the New York and Long Island conferences, and Mr. Goff's brethren desired the congregations of churches were closed against him, and some of his parishioners had their children rebaptized. In 1749 he removed to Hackensack, N. J., disagreed with his colleague on ecclesiastical questions, and sought the dissension of the latter to a seat in the council on one Sunday, apprehending his resistance to his preaching, he buckled on a sword and entered the pulpit, prepared to use the weapon if forcibly ejected. Mr. Goetschius was an instructor in divinity and a trustee in Queens (now Rutgers) college, and, although of violent passions, was learned and devout. His publications are ‘The Unknown God’ and ‘Sermons’ (Newton, N. J., 1742).—His brother, John Mauritus, b. in Liguria, Switzerland, in 1720; d. in New Jersey about 1800, removed to this country in 1744, and practised medicine and law. He was concerned in the establishment of a college in New Jersey, to study for the ministry. He preached to both Dutch and Germans in Schobarch, N. Y., and also practised medicine. He was one of the original trustees of King's (now Columbia) college.

GOFF, Nathan, politician, b. in Clerksburg, W. Va., Oct. 18, 1845. He was educated at the Northwestern Virginia academy, Georgetown college, and the University of New York. In 1861 he enlisted in the National army in the 1st regiment of Virginia volunteer infantry, served as lieutenant and then adjutant of this regiment, and in 1863 was appointed major of the 14th Virginia cavalry. In 1865 he was elected to the bar and elected to the West Virginia legislature, in 1868 was appointed district attorney, which office he resigned in 1881 to accept the secretarship of the navy, to fill out the unexpired term of Mr. W. H. Thompson, who had vacated it. In March, 1881, he was reappointed district attorney of West Virginia. He ran again in July, 1882, and was elected to congress as a Republican in 1884, and was re-elected in 1886.

GOFF, William, reformer in England about 1605; d. in Hartford, Conn., in 1679, or, as is held by some historians, at New Haven in 1680. The weight of testimony is in favor of Hartford. He was the fourth son of Stephen Goffe, rector of Stanmore, Sussex. The elder Goffe was a “very severe Puritan,” and his son inherited his hatred of papist and churchman. Prior to his joining the army in 1647 he was engaged in some commercial pursuit. He rose rapidly in the parliamentary army, becoming a major-general in 1653, with command in Sussex, Hampshire, and Berkshire. He commanded the soldiers of the eastern part of Harrow's parliament, and assisted in the violent proceeding known as Pride's purge, in which obnoxious Presbyterians were summarily excluded from parliament. He was returned a member of parliament from Harrow in 1654, and from Southampton in 1656, and Cromwell appointed him a seat in his house of lords or “other house.” He varied his military duties by exhorting in religious gatherings. He was made master of arts at Oxford in 1649, in company with ten other parliamentary officers. He was held in great esteem by Cromwell and by the court in general—so much so that he was spoken of with favor as the successor to the protectorship. On the news of Charles's return, Goff, with Whalley, his father-in-law, made prepara-

GOLDSBOROUGH, Charles, statesman, b. in Maryland in 1780; d. in Shoals, Md., Dec. 18, 1844. He served in congress as a representative from Maryland, 1805, to 3 March, 1817, and was governor of Maryland in 1818-19. His cousin, Charles Washington, clerk of the navy department, b. in Cambridge, Md., 18 April, 1779; d. in Washington, D. C., 14
Sept., 1843, was the first clerk of the bureau of provisions and clothing of the U. S. navy and chief clerk of the naval department from 1798 to 1812, under Secs. Benjamin Stoddart, Robert Smith, and Paul Hamilton. From 1841 until separate naval bureaus were established he was secretary of the naval board. He is the author of The U. S. Naval Chronicle" (Washington, 1836), and an undated and unpublished "History of the American Navy," now in manuscript and in the possession of the senior editor of this work.—Charles Washington's son, Louis Malesherbes, naval officer, b. in Washington, D. C., 18 Feb., 1809; d. there, 20 Feb., 1877, entered the navy as midshipman at seven years of age. He was promoted lieutenant in January, 1825, and, after serving a short time in the Mediterranean squadron, went to Paris and passed two years in study. In 1827 he joined the "New Carolina," in the Mediterranean, and while cruising in the schooner "Po-poise," in the Greece, he commanded a night expedition of four boats and thirty-five men for the recovery of the English brig "Comet," which had been captured by Greek pirates. After a fierce fight, in which forty of the pirates were killed, the "Comet" was rescued, and on the arrival of the expedition at Malta he received the thanks of the English government. In 1833 he married the daughter of William Wirt, and went to Florida, taking with him a colony of Germans to cultivate lands belonging to his father-in-law. During the Seminole war he commanded a company of volunteer cavalry, and also an armed steamer. In September, 1841, he was promoted commander. During the Mexican war he was executive officer of the frigate "Ohio," which bombarded Vera Cruz, and captured the city on March 14, 1847. He was senior member of the joint army and naval commission to explore Oregon and California, and to report on various military matters in 1848. From 1838 till 1857 he was superintendent of the U. S. naval academy, and commanded the schooner "Levant" in the Mediterranean, and the frigate "Congress" in the Brazil squadron in 1858-60. He was commissioned captain in 1855. At the beginning of the civil war in 1861 he was appointed flag-officer, and placed in command of the "Minnesota" of the North Atlantic blockading squadron. In September, 1861, he planned and executed a joint army and navy expedition to the sounds of North Carolina, and captured Roanoke island, 5 Feb., 1862. (See BURNSIDE, AMBROSE.) He received the thanks of congress for this service. He was made rear-admiral in 1864, and was despatched in 1863 to the duty of preparing a code of regulations for the naval service, and of revising the book of naval allowances. In 1863 he commanded the European squadron, in 1869 was ordered to Mare island, California, and in 1870 was placed on the retired list, and died in Washington. At the time of his death he had been in the service longer than any other naval officer then living, and had seen more active duty.

—Another son, John Rodgers, naval officer, b. in Washington, D. C., 3 July, 1834; d. there, 22 June, 1877, became midshipman in 1842, lieutenant in 1857, commander in 1855, captain in 1862, and commodore in 1867. While midshipman on the sloop "Warren," of the Mediterranean squadron, in 1852-3, he was engaged against the Greek pirates, and in a land action captured the schooner "Helene," of four guns, and manned by fifty-eight pirates. In 1844-50 he was attached to the coast survey, and in 1851-4 to the sloop "Saratoga." During the civil war he commanded the steamer "Union," in 1861, employed in blockading Charleston, Savannah, and Cape Hatteras. He captured and sunk the Confederate schooner "York," and bombarded the fort off Point Mathias on the Potomac. He commanded the "Florida," of the South Atlantic blockading squadron, in 1862, and the "Colorado," of the West Gulf blockading squadron, in 1862-3. He served in the East India squadron, on the sloop "Shenandoah." In 1870 he was retired.

GOLDSBROUGH, Robert, patriot, b. in Cambridge, Md., in 1733; d. there, 31 Dec., 1788. He was graduated at Philadelphia College (now the University of Pennsylvania) in 1756, took an active part in the ante-Revolutionary movements, was attorney-general of Maryland in 1778, and a delegate to the Continental congress of 1774-5, and of May, 1776.

GOLDSBROUGH, Robert Henry, senator, b. in New Easton, Md., in 1780; d. there, 5 Oct., 1838. He was elected U. S. senator as an anti-Jackson Democrat, and served from 24 May, 1819, till 3 March, 1819. He was again elected as a Whig, without opposition, to fill the vacancy caused by the resignation of Charles Pinckney, and served from 23 Jan., 1833, till his death.

GOLDSBROUGH, George, senator, b. in Boston, 10 Dec., 1809; d. in Montgomery, Ala., 18 March, 1879. He received a primary education at a grammar-school in Boston, and at thirteen years of age entered the U. S. military academy, in which he remained two years. In 1826 he removed to Montgomery, Ala., studying law with his brother Henry, and being admitted to the bar in his eighteenth year. He practised his profession until his election as circuit judge in 1845, was appointed justice of the supreme court in 1850, and in 1856 became chief justice, but held the office only thirteen days, when he resigned from the bench and resumed the practice of his profession. At the beginning of the civil war he was appointed adjutant-general of the state of Alabama. He was elected judge of the circuit court in 1866, but lost the office through an act of congress which disqualified him. In 1870 he was elected U. S. senator, served on the committees of claims and Revolutionary claims, and in 1877 retired to private life. His elder brother, Henry, jurist, b. in Boston, Mass., in 1799; d. in Mobile, Ala., in 1847, was liberally educated in Boston, studied law, and removed to Montgomery, Ala., where he became the partner of Gov. Benjamin Fitzgerald. He edited a newspaper, served in the state legislature several terms, and afterwards removed to Mobile, where he became a successful lawyer. From 1839 until his death he was a judge of the supreme court of Alabama.

GÓMEZ, Antonio, Mexican musician, b. in the city of Mexico in 1805; d. in Tulancingo in 1876. At the age of eight he studied with Iquino and Ginestra, and while traveling in Europe and in several small compositions of his own, which were favorably received. He became leader of the orchestra of Garcia's Italian opera company in
1837. Gomez founded in Mexico a conservatory of music, but abandoned it for want of pecuniary assistance, and the musical library of the cathedral, of which he was appointed director, was arranged by him. In 1844 Gomez became organist of the new cathedral at Tulancingo, but in his latter years practiced left-hand composition. Among his compositions are: "La Independencia," for piano, flute, and violoncello; "Miserere," for eight voices and grand orchestra; a Te Deum; psalms; vespers; matins; and several masses; all for full orchestra.

GÓMEZ, Teodoro (b. 1817), Brazilian musician, b. in Campinas, São Paulo, in 1839. His father was leader of a military band in Campinas, and cultivated his son's love of music from his earliest years. At the age of eleven he left school, and began the study of music. He excelled as a performer on the piano, and in São Paulo gave a series of concerts with his brother José Pedro, a violinist, in 1856. At that time he composed several romances and one popular song, "Tão longe de mim distante," which was soon known all over the empire. When we left the cathedral, where he was admitted to the conservatory of music, and soon made remarkable progress. In 1861, when the national opera was established, Gomez presented his first opera, "Noites e do castello," which met with great success. The imperial government gave him a pension for four years, and he might perform his studies in Europe. In 1870 he returned to Brazil. His most noteworthy opera, "Guaranys," was represented for the first time in Rio Janeiro in 1872, and has also been given in several theatres of Italy and some of the capitals of Europe. His other operas include "Hércules" (1874), "Salvador Rosa" (1875), and "Cromwell" (1876).

GÓMEZ, Esteban, Spanish navigator, b. in Cadiz, Spain, in 1478 (or, according to Barbosa Machado, in Oporto in 1474); d. at sea in 1530 (or, according to Barbosa, in Toledo in 1534). He had served in the Portuguese East in India fleet, acquired a reputation as a skilled pilot, and was pilot of the "San Antonio," commanded by Juan de Cartagena, on Magellan's expedition in 1519. Irritated by his failure to obtain the appointment of chief pilot of the expedition, he frequented an insurrection, in January, 1520, which was suppressed by Magellan, but Gomez escaped execution with the other rebels, because his services as pilot were needed. He afterward incited the crew of the "San Antonio" to mutiny, and on his arrival in Portugal, 24 March, 1521, was imprisoned, but soon set at liberty. In 1524, when the difficulties between Spain and Portugal respecting the limits of their colonial discoveries arose, Gomez was one of the council of pilots appointed to decide this question, and proposed to the emperor to avoid these difficulties by seeking a western passage to the East Indies by the north of the new continent. His proposal was accepted, and, in command of a caravel, he left San Lucar in November, 1524. He reached the coast of Florida in January, 1525, and continued his voyage north, exploring every inlet and bay. On the 2nd of October, he was taken prisoner by a party of 37 north latitude, probably Chesapeake Bay. On arriving at latitude 42° N, without discovering any western passage, he resolved to return, but explored the country from the 42° to the 40th parallel, and filled his vessel with captured natives. On his return to San Lucar in August, 1521, on presenting himself at court, he was unfavorably received by the emperor, who, according to Gomara, reproached him with the capture of the Indians, as he would thereby discredit future explorers. He now tried to interest some merchants in a new expedition of discovery, and sailed in 1530 with two vessels for another exploration, but was never heard of again. Barbosa Machado, in his "Biblioteca Lusitana," says that Gomez died in Toledo in 1534 in high favor at court, and that his body was exhumed from entitled his labors. Among his compositions are: "La Independencia," for piano, flute, and violoncello; "Miserere," for eight voices and grand orchestra; a Te Deum; psalms; vespers; matins; and several masses; all for full orchestra.

GÓMEZ, Valentín, Argentine statesman, b. in Buenos Ayres in 1774; d. there in 1833. He was graduated at the University of Cordoba as doctor in theology in 1795, and at the University of Chuquisaca in civil and canonical law 1796. He was appointed professor of philosophy in the University of Cordoba in 1799, took holy orders in 1802, and soon afterward was appointed prebendary of the cathedral of that city. When the war of independence of Argentina broke out, he worked zealously to promote the cause of liberty, protecting the patriots from the persecutions of the royalists, and collecting subscriptions for the revolutionary cause. At the battle of Piedras he fought so valiantly that he was mentioned honorably in the general order of the day. After his return he might perfectly settle in Buenos Ayres, and was for several years rector of the university of that city. He was elected deputy to congress, and became secretary and president of that body. He was appointed minister to London in 1821, and in 1823 to Brazil.

GÓMEZ-PEDRAZA, Valentín (gomez-fah-re-as), Mexican statesman, b. in Guadalajara, 14 Feb., 1781; d. in the city of Mexico in July, 1838. He studied medicine in his native city, and in 1810 was appointed professor of the university. Later he practiced in Aguas Calientes, and joining the cause of independence he equipped a battery at his own expense. After the fall of Iturbide, he was elected a member of the first constituent congress, and attracted the hatred of the church party by his liberal principles. After the fall of Benavente and the shambles of 1820, Gomez Pedraza, he was elected vice-president with Santa-Anna, and, as the latter was absent, assumed the executive on 1 April, 1833. He immediately abolished the legal expropriation for unpaid church-tithes, prohibited the admission of new monks to the existing cloisters, and attacked the privileges which military chiefs had arrogated. In consequence there were several revolts, but these were soon quelled. The clergy now tried to bribe Gomez by the offer of a fortune; but he refused indignantly, and on 4 Jan., 1835, a so-called constitutional congress assembled, which refused to acknowledge the authority of the president. Gomez, tired of the struggle, left the country, but in 1838 returned to Mexico, where he was received by a public ovation. The jealousy of the president, Bustamante, caused him to be sent to prison, but he was released, but he was induced by popular influence to return to the city. In 1843, he led an unsuccessful attempt at revolution, and was banished a second time. He returned to Mexico in 1845, and in 1846 was again elected vice-president, with Santa-Anna as president. As the latter had taken command of the army in the war with the United States, Gomez became president of the executive; but in February, 1847, there was a revolt against him, which continued till 21 March, when it was quelled by Santa-Anna. The vice-presidency was abolished by a decree of the
congress, and Gomez was elected a deputy to that body. In 1850 he was a defeated candidate for the presidency. When Santa-Anna declared himself dictator in 1853, Gomez-Farias took part against him, and was again a candidate for the presidency. Alvarez president in October, 1855. He was appointed postmaster-general, and in 1857 took part in the formation of the liberal constitution.

**GÓMEZ-PEDRAZA, Manuel, Mexican statesman, b. in Soto, Miguel. According to others, in Queretaro, 1786, d. in the city of Mexico, 14 May, 1851. He was educated in Queretaro, entered the militia, and at the beginning of the revolution of 1810 remained faithful to the royalists. When Iturbide proclaimed the empire in 1822, Gomez sided with him, and became commander of the city of Mexico. He surrendered the city to the republican authorities, and in 1825 was appointed by President Victoria secretary of war. He became president in 1828, defeating the ultra liberal party under Guerrero, and the latter, complaining of the fraud in the elections, appealed to arms. Gomez fled to Europe on 4 Dec., and returned in 1830, but Gen. Bustamente ordered him to leave the country immediately, and he went to the United States, fixing his residence in Pennsylvania. He was afterward responsible for the death of Don Guadalupe de la Peña, who was minister of state under the second administration of Santa-Anna, and in 1842, 1844, and 1845 was deputy to congress, where he acquired fame as an orator. In 1850 he was again a candidate for the presidency, but was defeated, and died as a private citizen, 30 Jan., 1851.**

**GONZALEZ, Jose Maria de Jesus, clergyman, b. in Guadalajara, Mexico, 21 Aug., 1803; d. in Santa Barbara, California, 3 Nov., 1875. He was a member of the order of St. Francis, and was sent to the San Jose mission, Cal., in 1832. In 1889 he was appointed vicar-general and president of the mission. In 1846 he was made vicar-general of the two Californias, and in 1847 was nominated bishop. He was vicar-general from 1852 till 1858, and also guardian of the apostolic college of Zacatecas in 1855. He was appointed president of the college of Santa Barbara in 1858, and continued in that office till his death.**

**GONZALEZ, Francisco, b. near Matamoros Tamaulipas, Mexico, in 1829. He began to figure in the civil wars of Mexico about 1838, fighting with the reactionary party under the guerilla chief Marcelino Cobos. (See Conos.) Up to 1861 he participated in all the engagements between the reactionary and the Liberal partisans, and with other guerillas was the terror of the valley of Mexico. He has been many times wounded in battle, and his right arm was twice shattered, once requiring an amputation. When the allied armies of France, England, and the United States invaded Mexico in December, 1861, he offered his sword to the Liberal leader, Juarez. He was ordered to join Gen. Vidaurre near the northern frontier; but in 1863 the latter complained to the secretary of war that Gonzalez was of a rebelious disposition, and requested that he might be recalled. After accompanying the president in his flight from the capital as far as San Luis Potosi, he made a countermarch to the mountains of Hidalgo, where he maintained himself till the year 1865. Toward the end of the year, he made a rapid march through the midst of the French and imperial forces, joined Gen. Escobedo, and accompanied him in his advance toward the south. He was promoted colonel in 1865, brigadier-general in 1867, and in June entered the capital with Escobedo, Corona, and Berrioabals. In 1869 he was appointed governor of the government in the south. In 1871, he was in this position till 1871, when he was arrested on a charge of complicity in the disappearance of the palace of the gold and silver plate which had belonged to the emperor Maximilian. He took advantage of the revolution of 1871 to escape, and joined the forces of Porfirio Diaz. He afterward refused to submit to the government of
Lerdo de Tejada, and in January, 1876, joined the third rebellion of Porfirio Díaz, and organized the body only from the result of light cavalry that harassed and checked the government forces. On 16 Nov., 1876, during the decisive battle of Lomas de Tecoa, between Altarre and Díaz, González arrived at the head of 3,000 cavalry, and with a vigorous attack disorganized and scattered many of the enemy's forces. The situation decided the overthrow of Lerdo's government, and in 1878 Díaz appointed González secretary of war, in which office he did much for the Mexican army. In 1879 he was made commander-in-chief of the northern department, where he soon quelled all seditious movements, and, returning to Mexico, received from congress the rank of general of division, and the title of “Pacificador of the Occident.” In June, 1890, he resigned the portfolio of war, as his candidacy for president had been proclaimed. He was elected on 25 Sept., and on 30 Nov. assumed the executive, and appointed Díaz secretary of public works. His administration was distinguished by financial mismanagement. He decreed extraordinary import duties on foreign manufactures, doubled the state debt, and released the silver mint from the obligation of a great quantity of nickel coins, which were largely disposed of to speculators at a discount. The opposition to these culminated in a riot in 1894, which led to their withdrawal and redemption by the government. The proposition to allow the government to run the state mines was defeated. He died Nov. 15, 1890, for expenses to be incurred in settling the English debt led to another riot in November, 1894 (see Díaz). In the same year the Monte de Piedad bank was forced to suspend by the efforts of a rival institution, and through reports that government would make a demand on the bank for funds, which proved unfounded. González also published a decree suppressing the liberty of the press. On 30 Nov., 1884, he resigned the government to his successor, Gen. Díaz, with a bankrupt exchequer. He has since been governor of the state of Guadalupe. On 30 Oct., 1895, there was presented in congress a resolution of impeachment against the ex-president for misappropriation of public funds, which in November was referred to the section for the grand jury of the congress for action. This accuses him, and deposes him.

GONZÁLEZ BALCARCE, Antonio, South American soldier, b. in Buenos Ayres, Argentine Republic, in 1774; d. there, 5 Aug., 1819. He entered the army at an early age, was taken prisoner by the English in Montevideo, 5 Nov., 1807, and remained in England until the declaration of peace. He then went to Spain and fought against the armies of Napoleon. He returned to South America in 1809, and took part in the Argentine revolution of 25 May, 1810. González was appointed major-general of the expedition to assist the revolutionists of Peru, and gained the victories of Styapachca and Cotagaita. He was then made commander-in-chief of the army, and soon afterward entered the city of La Plata, and was appointed its prefect. He filled the office of president of the city in 1818, went to Chile to join the army of San Martin in the following year, and commanded the infantry in the battle of Maypa, 5 April, 1818. As commander of the army of the south he drove the Spaniards from Concepción. He then returned to Buenos Ayres, and died suddenly while engaged in preparing a plan of defence for the city against the Spaniards.

GONZALEZ DE SANTA CRUZ, Roque, South American missionary, b. in Asuncion, Paraguay, in 1736; d. in Uruguay in 1823. He was born of Spanish parents, entered the Society of Jesus in 1806, and after the capture of this college by the Archbishops of Lima in 1821, was dismissed. He effected numerous conversions, among them that of the cacique and his wife, and in 1811 determined to found a “reduction” or Indian colony on the river Jejuy, an affluent of the Parana, at 24° south latitude. He had already formed several Indians in this colony, containing nearly 800 families. In August, 1816, he founded a third colony on the St. Anne river. On 8 Dec., 1823, he laid the foundation of a colony which he called Concepción, and which soon had a population of nearly 4,000. In 1828 he founded the colony of St. Nicholas, containing 2,000 families. He was murdered by order of a cacique, who feared the missionary was undermining his authority.

GONZÁLEZ DEL VALLE, Manuel, Cuban lawyer, b. in Havana in October, 1802; d. there in January, 1842. He was the son of a noted lawyer of his native city, received the diploma of doctor of philosophy, and was admitted to the bar. He taught law and philosophy in the University of Havana, and filled many high offices in that city. He published “Dicionario de las Musas” (New York, 1838); “Programa de Materiales filosóficos” (Havana, 1839); “Artículos sobre Psicología” (1840); “Estudios de la Moral” (1843).—His brother, José Z., author, b. in Havana, Cuba, in 1829; d. in Madrid, Spain, in October, 1851, studied law in his native city. He went to New York to finish his education, and was admitted to the bar in 1840. He was for many years professor of natural philosophy in the University of Havana, but, on account of his health, went to Spain in 1850, and was appointed honorary secretary to the queen. He published several novels, including “Carmen y Adelia,” “Amar y Morir” (1839); “Tropicales,” a volume of poems (Havana, 1842); “Viajes por Europa” (1843); “Guaralde Fúnebre” (1844); “Rasgo Histórico de la Filosofía” (1848); “Lecciones de Meteorología” (1849).—Another brother, Ambrósio Z., b. in Havana in 1822, was graduated in medicine in his native city in September, 1846, and appointed to fill the chair of anatomy at the university. He is a member of several Spanish scientific societies, and has done much to improve the sanitary conditions of Havana. He published “Manual del Fiebrotomano” and “Manual de Obstetricia” (1849); “Muerte Aparente” (1869); “Higiene Pública” (1870); and “Tablas Obituarias” (1870–9).

GONZÁLEZ-VIGIL, Francisco de Paula, Peruvian author, b. in Tacna, 15 Sept., 1792; d. in Lima in 1857. He entered the seminary of Arequipa, and was ordained priest in 1818, but afterward became vice-rector of the College of the independence of Arequipa. In 1825 he was elected deputy to congress, and came to Lima. He opposed the movést toward republicanism, voted against the constitution which that general tried to impose on Peru. In 1829 he was again elected deputy, and in 1834 he was editor of the “Genio del Rímac,” the organ of the Liberal-reform party, but subsequently retired to his native city, whence he was called in 1836 to prepare a national library. In 1837 he was again elected to congress and in 1838 re-elected, when he proposed the indictment of the government of Gamarras, but
afterward devoted himself to literature until he again took charge of the National library. For some time he was one of the editors of "El Con-stituyente," an enthusiastic study of the "Defensa de la Autoridad de los Gobiernos contra las pretensiones de la Curia Romana" (6 vols., Lima, 1848), the second part of which appeared under the title "Defensa de la Autoridad de los Obispos" (4 vols., 1856). He also published "Los Jesuitas" (4 vols.); "El Principio Griego," "El Principio sighis Marquina," "El Principio del Romano Pontífice," "Diá-logos sobre la Existencia de Dios," "Defensa de Bossuet y de Fénelon," "Catecismo Patriótico," and numerous political and social pamphlets, including "Por personas en América."

GOOCH, Frank Austin, chemist, b. in Watertown, Mass., 2 May, 1852. He was graduated at Harvard in 1872, and was an assistant under Prof. Josiah P. Cooke in the chemical laboratory until 1875. Subsequently he was associated in the analytical work performed in Newport, R. I., under the authority of the U. S. geological survey, receiving in 1877 the degree of Ph. D. from Harvard for his original researches. In 1879 he was ap- pointed special agent to the tenth U. S. census, and was detailed as an expert to make analyses of the foods and waters of the states. These subjects appear in one of the volumes of the census. From 1881 till 1884 Dr. Gooch was chief chemist of the northern transcontinental survey, and from 1884 till 1886 assistant chemist to the U. S. geological survey in Washington. In 1886 he was ap- pointed professor of chemistry in the U. S. Naval academy, and has undertaken the reorganization of that department, which, owing to the development of the Sheffield scientific school, had for some time been neglected. The Kent chemical laboratory at Yale, the con- struction of which seems to have been begun in 1857, was planned by him. Dr. Gooch is a member of scientific societies, and his contributions to chemical literature, though few in number, have been of great value. They consist principally of descriptions of improved methods of analysis, and of new formulas. He has, in addition, the "Gooch filter," which is now extensively used.

GOOCH, Sir William, bart., governor of Vir- ginia, b. in Yarmouth, England, 21 Oct., 1811; d. in London, 17 Dec., 1871. He served with distinction under Marlborough in the low countries, and received a colonel's commission on the surrender of Louvain, 29 Oct., 1715. In 1727 he succeeded Sir Hugh Drysdale as governor of Virginia, in which office he continued until 1747. In 1740 Gov. Gooch joined Admiral Vernon in his expedition against Cartagena, New Grenada (See Eslava, Sebastian), was severely wounded, and contracted the fever from which many of the English squadron died. He returned to Virginia, and in 1746 was appointed brigadier-general in the army raised to invade Canada, but declined to serve. The same year he was created a baronet and appointed major-general. In 1749, after two years' service as governor of Georgia, he returned to England "amid the blessings and tears of his people, among whom he had lived as a wise and beneficent father." In April, 1745, Gov. Gooch made an address opposing all religious or- ganizations, which the colonists adopted, and proceeding punishment for others that should convene in public for religious purposes.

GOODALE, Elaine, poet, b. in Mount Wash- ington, Berkshire co., Mass., 9 Oct., 1803. Her life has been closely associated with that of her sister, Eliza B., b. in Newton, Mass., 9 Oct., 1806. The sisters were brought up on their father's farm. Elaine learned to read very early, and began to make verses almost as soon as she began to write. Her sister also composed verses at the age of six. In a short time both were en- thusiastic students, and received, at the house of "la señora de la Curia Romana" (6 vols., Lima, 1848), the second part of which appeared under the title "Defensa de la Autoridad de los Obispos" (4 vols., 1856). He also published "Los Jesuitas" (4 vols.); "El Principio de los Obispos," "Defensa de la Autoridad de los Obispos," "Defensa del Principio del Romano Pontífice," "Diá- logos sobre la Existencia de Dios," "Defensa de Bossuet y de Fénelon," "Catecismo Patriótico," and numerous political and social pamphlets, including "Por personas en América."

GOODALE, Elaine, poet, b. in Mount Wash- ington, Berkshire co., Mass., 9 Oct., 1803. Her life has been closely associated with that of her sister, Eliza B., b. in Newton, Mass., 9 Oct., 1806. The sisters were brought up on their father's farm. Elaine learned to read very early, and began to make verses almost as soon as she began to write. Her sister also composed verses at the age of six. In a short time both were en-thusiastic students, and received, at the house of "la señora de la Curia Romana" (6 vols., Lima, 1848), the second part of which appeared under the title "Defensa de la Autoridad de los Obispos" (4 vols., 1856). GOODALL, Albert Gallatin, bank-note en- graver, b. in Montgomery, Ala., 31 Oct., 1826; d. in New York city, 10 Feb., 1897. His mother having been a widow in straitened circumstances, removed with her family to the Creek reservation in Alabama, and engaged in farming, but was driven out with the other settlers in 1836 by the Indians. She returned to Galveston, Tex., and died the year following. When fifteen years of age, young Goodall entered the Texan navy as
GOODE, George Brown, ichthyologist, b. in New Albany, Ind., 13 Feb., 1851. He was graduated at Wesleyan in 1870, and in 1871 took charge of the college museum. In 1873 received an appointment as assistant in the Philadelphia exhibition in 1876. He was U. S. commissioner to the international fishery exhibitions held in Berlin in 1880, and in London in 1883, and was also a member of the government executive board for the New Orleans, Cincinnati, and Louisville expositions in 1884. In 1877 he was employed by the department of state as statistical expert in connection with the Halifax fisheries commission, and in 1879-80 was in charge of the fisheries division of the tenth census. He has travelled through Europe for the purpose of studying the methods of administration of public museums, and has made extensive natural history explorations in the Bermudas and Florida. His published papers are numerous, and include about 100 titles on topics in ichthyology, museum administration, and fishery economy. Dr. Goode has published in book form "The Catalogue of the Fishes of the Bermudas" (Washington, 1879); "Annual Resources of the United States" (1876); with Tarleton H. Bean, "A Catalogue of the Fishes of Essex County" (Salem, 1878); "Game Fishes of the United States" (New York, 1879); "American Fishes" (London, 1867); "The Menhaden" (1880); "Materials for a History of the American Mackerel Fishery" (Washington, 1882); "Materials for a History of the Sword Fishes" (1882); "The Natural History of the Bermuda Islands" (1882, edited); "A Review of the Fishing Industries of the United States" (London, 1882); "Fisheries Industries of the United States" (Washington, 1884); "The Status of the United States Fish Commission in 1884" (1884); "The Beginnings of Natural History in America" (1889); and "British, Saxon, and American" (1887).

GOODE, John, solicitor-general, b. in Bedford county, Va., 27 May, 1829. He was graduated at Emory and Henry college in 1848, studied law at Lexington, Va., and was admitted to the bar in 1851. In the latter year he was elected a member of the Virginia legislature, and in 1851 sat in the State convention that passed the ordinance of secession. He was twice sent to the Confederate congress, serving from 22 Feb., 1862, until the end of the war, and during the recesses of that body acted as volunteer aide on the staff of Gen. Jubal A. Early. After the war Mr. Goode removed to Norfolk, Va., but is now (1887) engaged in the practice of the law in Washington, D. C. Shortly after his removal to Norfolk he was again elected to the Virginia legislature, and was then chosen to congress as a Democrat, serving from 6 Dec., 1875, till 3 March, 1881. Mr. Goode was a member of the National Democratic conventions of 1868 and 1872, and was a presidential elector in 1832, 1856, and 1884. In May, 1885, he was appointed solicitor-general of the United States, and retained the office until August, 1887. During his term of service he visited British Columbia, to represent the United States in an extradition case.

GOODE, William Osborne, legislator, b. in Mecklenburgh county, Va., 16 Sept., 1798; d. in Boydton, Va., 3 July, 1859. He was graduated at William and Mary, studied law, and was admitted to the bar in 1821, beginning the practice of his profession at Boydton. He was for many years a member of the legislature, taking an active part in the debates on slavery in 1832, and was sent as a delegate to the State reform convention in 1827-29. He was elected to congress as a Democrat, serving from 31 May, 1841, till 3 March, 1843. He was again, for several successive years, chosen to the state legislature, and was three times elected speaker of the Virginia house of delegates. He was a member of the State constitutional convention of 1831. He was again elected to congress, serving from 5 Dec., 1835, to 3 March, 1839. He was re-elected, but died before taking his seat. Regarding slavery, he was in favor of gradual emancipation.

GOODELL, William, missionary, b. in Templeton, Mass., 14 Feb., 1792; d. in Philadelphia, Pa., 18 Feb., 1867. He was graduated at Dartmouth in 1817, spent the three years following in the Andover theological seminary, and in 1822 sailed for the isles of Malta and of Malta, as a missionary. After a year spent in the study of languages, he proceeded to Beirut, where he remained five years, enduring many hardships and dangers, the town being plundered, his house sacked by Be- douins and the fire life threatened, after the repulse of the Greeks in March, 1826. Mr. Goodell went, in 1831, to Constantinople, where he labored especially among the Armenians. During his twenty-nine years of missionary life Dr. Goodell was compelled to change his residence thirty-three times. The crowning work of
GOODENOw's life, to which he devoted the greater part of his time during the fifteen years preceding its publication, was the translation of the Scriptures from the original Greek and Hebrew into Armeno-Turkish. The Old Testament was completed in 1841, and the New Testament about two years afterward. He spent several years' additional labor upon the work, and was made a resident in 1863. He was also the first to receive the long residence in the east, he returned to the United States in 1865. He had received the degree of D. D. from Hamilton college in 1854. During the remaining years of his life he contributed to the New York \"Society for the Diffusion of Knowledge\" a series of \"Reminiscences of the Missionary's Early Life,\" which he did not live to complete.—His wife, Abigail P., b. in Holden, Mass., in 1799; d. in Philadelphia, 11 July, 1871, gave her husband efficient aid in his work.—Their son, William, physician, b. in Malta, 17 Oct., 1829, was graduated at Williams in 1851, and at Jefferson medical college in 1854. He first practised his profession for six years in Constantine, where he returned to the United States, establishing himself at West Chester, Pa. In 1863 he removed to Philadelphia, where after lecturing for a while at the medical college of the University of Pennsylvania, he was, in 1874, appointed clinical professor of the diseases of women and children. Dr. Goodell has been a prolific writer on subjects connected with his specialty, and is the author of \"Lessons in Gynecology\" (Philadelphia, 1890).—Another son, Henry Will, educator, b. in Constantine, 20 May, 1839, was graduated at Amherst in 1862. He entered the army and served until 1863, when he was aide-de-camp on the staff of Col. Bissell, of the 19th army corps. He taught the modern languages at Williston seminary, Easthampton, Mass., in 1864-7, and afterward in the Massachusetts agricultural college at Amherst, of which institution he was chosen president, 1 July, 1866. He is the author of \"Biographical Record of the Class of Sixty-two,\" and of \"Compilation of Historic Fiction\" (Amherst, 1876).

GOODENOw, John M., lawyer, b. in Massachusetts in 1792; d. in Steubenville, Ohio, in 1838. He received a public-school education, studied law, was admitted to the bar, and practised in Steubenville, to which place he was an early emigrant. He was a prominent member of the legislature, and held other offices. He was elected to Congress as a Jackson Democrat, serving from 7 Dec., 1829, till 9 April, 1830, when he resigned to become judge of the supreme court of Ohio. He had a large practice at the bar, and published \"American Jurisprudence in Contrast with the Doctrine of English Common Law\" (1819). The object of this work, of which only 100 copies were printed, was to prove that the courts in the state were not possessed of common law jurisdiction.

GOODFELLOw, Ede, editor, b. in Philadelphia, 28 Feb., 1828. He was graduated at the University of Pennsylvania in 1848, and entered the government service as aid and sub-assistant in the U. S. coast survey. In 1860 he became assistant in the U. S. coast and geodetic survey, and was executive assistant from 1861 till 1862, and again from 1875 till 1882. He then became editor of the publications of the survey, and in that capacity has edited the annual reports for the years from 1882 till 1886.—His brother, Henry, soldier, b. in Philadelphia, 27 Aug., 1833; d. in Fort Leavenworth, Kansas, 29 Dec., 1885, accompanied the Arctic expedition of Dr. Elisha K. Kane from May, 1833, until October, 1835, and received the medals presented by the British government to those who served on expeditions in search of Sir John Franklin. Subsequently he studied law, and was admitted to the Philadelphia bar in 1859, and to practise before the U. S. circuit court in 1861. He entered the National army as captain in the 61st Pennsylvania volunteers, and served continuously with the Army of the Potomac until the battles of the Wilderness and Spottsylvania. He was brevetted major and ant-colonel and colonel for gallant conduct in the battles of Gettysburg and the Wilderness. In February, 1867, he became major and judge-advocate in the U. S. army, and at the time of his death was lieutenant of the 1st U. S. Artillery, stationed at Fort Leavenworth.

GOODHUE, Benjamin, senator, b. in Salem, Mass., 1 Oct., 1748; d. there, 28 July, 1814. He was graduated at Harvard in 1760, and early engaged in commercial pursuits. He was a member of the state senate from 1784 till 1789, when he was elected to the 1st congress from Massachusetts, and served from 1789 till 1795. His knowledge of business affairs proved of service to him as a legislator, and, with the assistance of Mr. Fitzsimmons, of Philadelphia, he drew up a code of revenue laws, the majority of which are still in force. In 1790, on the resignation of John Adams as minister to the U. S. senate, serving until 1800, when he resigned and retired from public life. During his term as senator he gained an enviable reputation as chairman of the committee on commerce.—His son, Jonathan, merchant, b. in Salem, Mass., 21 June, 1788; d. in New York city in 1848, represented a liberal education, and at the age of fifteen entered the counting-room of John Norris, of Salem, who was extensively engaged in trade with Europe and the West Indies. After two voyages as supercargo, Mr. Goodhue published himself in business in New York city in 1807. The early embargo, and the subsequent war with England, were unfavorable to his business, and on receipt of the news of the conclusion of peace he dispatched an express to Boston, with instructions to proclaim the tidings every town on the route. After a short period Mr. Goodhue became a prosperous merchant.

GOODMAN, John, physician, b. in Frankfort, Ky., 22 July, 1837. He was graduated at Georgetown college in 1856, and at the University of Louisiana in 1859. He subsequently began practice at Louisville, making a specialty of obstetrics and the diseases of women. In 1860 he was demonstrator of anatomy in Kentucky school of medicine, in 1868 was appointed professor of obstetrics in the Louisville medical college, and in 1875 was chosen to fill the same chair in the first-named institution. He has contributed to medical literature \"A New Method of conducting the After-Treatment in the Operation for Vesico-vaginal Fistula,\" \"Treatment of Chronic Cystitis in the Female,\" \"Menstruation and the Law on Monthly Periodicity,\" etc.

GOODMAN, Walter, artist, b. in London, England, 11 May, 1839; d. in Philadelphia, under J. M. Leigh and at the Royal academy, where he was admitted a student in 1857. In 1860 he went to the Continent, where he remained three years. In 1864 he accompanied Señor Joaquín Cuadrás, a Spanish artist, to the West Indies, where he remained for five years, most of the time in Cuba. He not only painted during his stay on that island, but wrote for the New York and local press. To the latter he contributed a series of humorous sketches entitled \"Un Viaje al Estranjerio.\" He was arrested and imprisoned in Moro Castle, and was connected with the Cuban revolution of 1896, and compelled to leave the island. After a year in the United States, he returned to England, where he devoted himself to portrait-painting. He was the
first European artist to obtain a commission from a native of China. Mr. Goodrich has painted portraits of Sir Thomas and Lady Brassey, Wilkie Collins, the Duke of Edinburgh, and others. He also contributes to periodical literature both drawings and articles. One of his sketches of life in Cuba, first published in "All the Year Round," have been since collected in book-form under the title of "The Pearl of the Antilles; or, an Artist in Cuba."

GOODRICH, Aaron, jurist, b. in Sempronius, Cayuga co., N. Y., 6 July, 1807. His father moved to the country near Buffalo, N. Y., and the son spent part of his minority on a farm. He studied law in Buffalo, N. Y., and Dover, Tenn., was admitted to the bar, and began practice in Stewart county, Tenn. He was a member of the legislature in 1847 and 1848, and a presidential elector in 1848, having taken an active part in the canvass of that year, as a Whig. He was appointed by President Taylor in 1849 chief justice of the recently organized territory of Minnesota, and served three years. Subsequently he practised law in St. Paul, and after the admission of Minnesota into the Union, in 1858, he was appointed by the legislature one of a commission to revise the laws and prepare a system of pleading and practice. Two years later he was made chairman of a similar commission. Judge Goodrich continued to take an active interest in legislation, and was a delegate to the National Republican convention at Chicago, 1860, where he warmly supported his friend, William H. Seward. In March, 1861, at Mr. Seward's suggestion, he was appointed by President Lincoln secretary of legation at Brussels, which office he held eight years, serving under Davis, at his request, at his post, and as bearer of despatches to and from his government. He is the author of "A History of the Character and Achievements of the so-called Christopher Columbus" (New York, 1874).

GOODRICH, Charles Augustus, clergyman, b. in Ridgefield, Conn., in 1799, d. in Hartford, Conn., 4 Jan., 1862. He was graduated at Yale in 1812, studied theology with Dr. Yates, of East Hartford, and in 1816 was ordained and installed as pastor of the 1st Congregational church in Worcester, Mass., where he remained four years. In 1819 he settled in Berlin, Conn., and in 1824 removed to Hartford, where he held a pastorate. He was a member of the state senate, and held other offices of trust. He was associated with his brother Samuel (Peter Parley) in writing books for the young, and also published the following volumes independently: "View of Religion" (1829); "Lives of the Signers" (Hartford, 1839; 2d ed., New York, 1839); "History of the United States of America" (Boston, 1832-5; revised edition, 1847); "Family Tourist" (1844); "Family Sabbath-Day Miscellany" (Philadelphia, 1855); "Geography of the Chief Places mentioned in the Bible" (New York, 1855); "Greek Grammar" (Hartford, 1855); "Child's History of the United States" (Philadelphia, 1856); "Bible History of Prayer" (1856); "Great Events of American History" (1859); and "Universal Traveller," -"Charles Augustus's brother, Samuel Griswold (Peter Parley), author, b. in Ridgefield, Conn., 19 Aug., 1793; d. in New York city, 9 May, 1890, in 1823-4 travelled abroad, and on returning to the United States became a resident in New York, and began to issue juvenile tales there. Removing thence to Boston, from 1828 till 1842 he edited an original annual, "The Token." The contributions and illustrations to this were exclusively the products of American authors and artists, and it contained poems, tales, and essays, from the pen of the editor. The encouragement that he gave to young writers became proverbial. Among these was Nathaniel Hawthorne, the best of whose "Twice-Told Tales" appeared originally in "The Token." In 1838-9 Mr. Goodrich was in the Massachusetts senate, and did much to improve and reform legislation. He established, and from 1841 till 1854 edited, "Merry's Sketches, and Parley's Magazine." He was consul of the United States in Paris from 1851 till 1855, during Fillmore's administration. While there he arranged for the publication of a series of books in France, under his supervision. Mr. Goodrich published altogether about 200 volumes, mainly juvenile and educational, which contributed to the worldwide popularity. About 170 of the number were issued under the name of "Peter Parley." Their popularity in this country led to their republication in Europe, and subsequently his pen-name was fraudulently attached to over seventy volumes in this country, and changes of affairs at his post, and as bearer of despatches to and from his government. He is the author of "A History of the Character and Achievements of the so-called Christopher Columbus" (New York, 1874).

GOODRICH, Charles Augustus, clergyman, b. in Ridgefield, Conn., in 1799, d. in Hartford, Conn., 4 Jan., 1862. He was graduated at Yale in 1812, studied theology with Dr. Yates, of East Hartford, and in 1816 was ordained and installed as pastor of the 1st Congregational church in Worcester, Mass., where he remained four years. In 1819 he settled in Berlin, Conn., and in 1824 removed to Hartford, where he held a pastorate. He was a member of the state senate, and held other offices of trust. He was associated with his brother Samuel (Peter Parley) in writing books for the young, and also published the following volumes independently: "View of Religion" (1829); "Lives of the Signers" (Hartford, 1839; 2d ed., New York, 1839); "History of the United States of America" (Boston, 1832-5; revised edition, 1847); "Family Tourist" (1844); "Family Sabbath-Day Miscellany" (Philadelphia, 1855); "Geography of the Chief Places mentioned in the Bible" (New York, 1855); "Greek Grammar" (Hartford, 1855); "Child's History of the United States" (Philadelphia, 1856); "Bible History of Prayer" (1855); "Great Events of American History" (1859); and "Universal Traveller," -"Charles Augustus's brother, Samuel Griswold (Peter Parley), author, b. in Ridgefield, Conn., 19 Aug., 1793; d. in New York city, 9 May, 1890, in 1823-4 travelled abroad, and on returning to the United States became a resident in New York, and began to issue juvenile tales there. Removing thence to Boston, from 1828 till 1842 he edited an original annual, "The Token." The contributions and illustrations to this were exclusively the products of American authors and artists, and it contained poems, tales, and essays, from the pen of the editor. The encouragement that he gave to young writers became proverbial. Among these was Nathaniel Hawthorne, the best of whose "Twice-Told Tales" appeared originally in "The Token." In 1838-9 Mr. Goodrich was in the Massachusetts senate, and did much to improve and reform legislation. He established, and from 1841 till 1854, edited, "Merry's Sketches, and Parley's Magazine." He was consul of the United States in Paris from 1851 till 1855, during Fillmore's administration. While there he arranged for the publication of a series of books in France, under his supervision. Mr. Goodrich published altogether about 200 volumes, mainly juvenile and educational, which contributed to the worldwide popularity. About 170 of the number were issued under the name of "Peter Parley." Their popularity in this country led to their republication in Europe, and subsequently his pen-name was fraudulently attached to over seventy volumes in this country, and changes of affairs at his post, and as bearer of despatches to and from his government. He is the author of "A History of the Character and Achievements of the so-called Christopher Columbus" (New York, 1874).

GOODRICH, Charles Augustus, clergyman, b. in Ridgefield, Conn., in 1799, d. in Hartford, Conn., 4 Jan., 1862. He was graduated at Yale in 1812, studied theology with Dr. Yates, of East Hartford, and in 1816 was ordained and installed as pastor of the 1st Congregational church in Worcester, Mass., where he remained four years. In 1819 he settled in Berlin, Conn., and in 1824 removed to Hartford, where he held a pastorate. He was a member of the state senate, and held other offices of trust. He was associated with his brother Samuel (Peter Parley) in writing books for the young, and also published the following volumes independently: "View of Religion" (1829); "Lives of the Signers" (Hartford, 1839; 2d ed., New York, 1839); "History of the United States of America" (Boston, 1832-5; revised edition, 1847); "Family Tourist" (1844); "Family Sabbath-Day Miscellany" (Philadelphia, 1855); "Geography of the Chief Places mentioned in the Bible" (New York, 1855); "Greek Grammar" (Hartford, 1855); "Child's History of the United States" (Philadelphia, 1856); "Bible History of Prayer" (1855); "Great Events of American History" (1859); and "Universal Traveller," -"Charles Augustus's brother, Samuel Griswold (Peter Parley), author, b. in Ridgefield, Conn., 19 Aug., 1793; d. in New York city, 9 May, 1890, in 1823-4 travelled abroad, and on returning to the United States became a resident in New York, and began to issue juvenile tales there. Removing thence to Boston, from 1828 till 1842 he edited an original annual, "The Token." The contributions and illustrations to this were exclusively the products of American authors and artists, and it contained poems, tales, and essays, from the pen of the editor. The encouragement that he gave to young writers became proverbial. Among these was Nathaniel Hawthorne, the best of whose "Twice-Told Tales" appeared originally in "The Token." In 1838-9 Mr. Goodrich was in the Massachusetts senate, and did much to improve and reform legislation. He established, and from 1841 till 1854, edited, "Merry's Sketches, and Parley's Magazine." He was consul of the United States in Paris from 1851 till 1855, during Fillmore's administration. While there he arranged for the publication of a series of books in France, under his supervision. Mr. Goodrich published altogether about 200 volumes, mainly juvenile and educational, which contributed to the worldwide popularity. About 170 of the number were issued under the name of "Peter Parley." Their popularity in this country led to their republication in Europe, and subsequently his pen-name was fraudulently attached to over seventy volumes in this country, and changes of affairs at his post, and as bearer of despatches to and from his government. He is the author of "A History of the Character and Achievements of the so-called Christopher Columbus" (New York, 1874).
GOODRICH, Charles Rush, naturalist, b. in Troy, N. Y., 16 March, 1839; d. in Plushing, N. Y., 28 Aug., 1856. He was graduated at Yale in 1849, and received medicine, but never practiced, becoming a chemist and naturalist. He edited, with Prof. Benjamin Silliman, Jr., "The World of Science, Art, and Industry," illustrated with 500 drawings from the New York exhibition of 1853 (New York, 1854), and was one of the editors of "Practical Science and Mechanism" (1854).

GOODRICH, Elizur, clergyman and scholar, b. in Wethersfield, now Rocky Hill, Conn., 26 Oct., 1784; d. in Norfolk, Conn., 22 Nov., 1797. He was graduated at Yale in 1752, and was tutor there in 1755-6. He was then ordained as a Congregational minister, and settled in Durham, Conn., retaining his pastorate till 1797. In 1786, to supplement his income, he began to prepare students for college. His thorough scholarship made him a successful teacher, and during the following twenty years he instructed more than 500 young men. He was frequently sent by the general association of Connecticut as a delegate to conventions and synods in New York and Philadelphia from 1766 till 1777. He was an able astronomer, and spent much time in mathematical studies, calculating the eclipses of each successive year. He drew up the fullest and most accurate account ever published of the aurora borealis of 1780. He accumulated a library which was regarded as the largest and most complete ever brought into the colonies on private account. Dr. Goodrich was at one time a candidate for governor of Connecticut, and in 1777 his name was proposed for the presidency of Yale, but the opposing candidate, Dr. Stiles, was elected by a small majority. He was a fellow of the college from 1776 till 1797, and served on its prudential committee during the whole of Dr. Stiles's presidency, and a part of that of Dr. Dwight. He received the degree of D. D. from Princeton college in 1783. His published works consist of sermons and addresses (1761-90). — Elizur's son, Chauncey, statesman, b. in Durham, Conn., 20 Oct., 1799; d. in Hartford, Conn., 19 Aug., 1815, was graduated at Yale in 1776, was tutor there in 1781-91, and also studied law. He was admitted to the bar in 1781, began to practise in Hartford, and soon attained eminence. He was a member of the state house of representatives in 1793, and in 1795 was elected a representative in congress, serving from 1795 till 1801. He was a member of the state executive council in 1802-7, and in the latter year was elected to the U. S. senate in place of Uriah Tracy, deceased, serving till 1813, when he resigned, to accept the office of lieutenant-governor of Connecticut. He was also mayor of Hartford and a delegate to the Hartford convention of 1814. — Chauncey's wife, Mary Ann, daughter of Oliver Wolcott, a signer of the Declaration of Independence, was one of the most distinguished beauties of her time. Her portrait, on this page, is taken from an original picture in the possession of Frederick H. Wolcott. — Another son, Elizur, jurist, b. in Durham, Conn., 24 March, 1781; d. in New Haven, 1839. He graduated at Yale in 1779, was a tutor there in 1781-3, studied law, was admitted to the bar, and began practice in New Haven in 1783. He was a presidential elector in 1797, and was chosen a representative to congress, as a Federalist, serving from 1799 to 1801. He was appointed collector of customs in New Haven in the latter year, but was removed by Jefferson immediately after his election to the presidency. The discussion of this act drew from Jefferson the letter in which he avowed his approval of removal for political opinion, and his authority to suspend the writ of habeas corpus for probate for seventeen years, judge of the county court for twelve years, professor of law in Yale in 1801-10, and mayor of New Haven from 1808 till 1822. Yale college conferred the degree of LL. D. on him in 1826. — The second Elizur's son, Chauncey Allen, lexicographer, b. in New Haven, Conn., 23 Oct., 1799; d. there, 25 Feb., 1860, was graduated at Yale in 1810, served as tutor there in 1812-14, and afterward studied theology. He settled in Middletown, Conn., in 1816 as pastor of the Congregational church there, but ill health obliged him to leave in 1817. In 1829 he was chosen president of Williams college, but declined the office. He was professor of rhetoric and oratory in Yale from 1817 till 1839, when he was transferred to the chair of pastoral theology in the same institution, and held it till his death. Dr. Goodrich exerted a wide influence, and co-operated with many learned societies. As a teacher he inspired his pupils to the highest effort. He was a liberal benefactor of the Yale divinity-school. The degree of D. D. was conferred on him by Brown university in 1834, and numerous contributions to periodical literature, and in 1829 established the "Christian Quarterly Spectator," with which he was connected nearly ten years, being its sole editor after 1836. While a tutor in Yale, Dr. Goodrich published a Greek grammar (1814), and in 1829, at the request of the President Dwight, he prepared a text-book, "Greek and Latin Lessons" (1822), which was extensively used in New England. Soon after the publication of the "American Dictionary," by his father-in-law, Noah Webster (1828), Dr. Goodrich was instructed by its author to prepare an abridgment of the work, which he did, conforming the orthography more nearly to the common standard. This edition, in the preparation of which he was assisted by Benjamin Silliman, Denison Olmsted, and others, was issued in 1847, and the "Universal" edition of the same work appeared in 1856. In 1859 the supplement was issued, to which comprehensive additions were made. At the time of his death Dr. Goodrich was engaged on a radical revision of the dictionary, but he died before the work received its final form, and it was published under the editorship of Noah Porter (1844). He was also engaged in preparing a new edition of the Bible, with English text, as one of the American Bible society's committee on ver-
sions." Dr. Goodrich was also the author of "Select British Eloquence" (1853). A commemorative discourse by President Theodore D. Woolsey has been published in pamphlet-form (New Haven, 1860).—Chauncey Allen's son, Chauncey, clergyman, contributed to the church during his stay in New Haven, Conn., 27 March, 1858, was graduated at Yale in 1837, after which he studied in the theological department. In 1840 he became pastor of the Congregational church in Malden, Mass., and in 1849 of the church in Watertown, Conn., which he resided in until his death. He thereafter resided in New Haven, occupied with literary labors, chief among which was the continuation of his father's work in the revision of Webster's dictionary. He was secretary of the New Haven colony historical society, for which body he prepared and read valuable papers.—Another son, William Henry, clergyman, b. in New Haven, Conn., 19 Jan., 1823; d. in Lausanne, Switzerland, 17 July, 1874, was graduated at Yale in 1843, studied in the divinity-school from 1844 till 1846, and held pastorates in Bristol, Conn., Binghamton, N. Y., and Cleveland, Ohio. He died while on a foreign tour taken for his health. He received the degree of D. D. from Western Reserve college in 1864. Dr. Goodrich was a brilliant pulpit orator, published sermons and addresses, and was largely interested in religious periodicals. His contributions are "Southern Slavery in its Present Aspects," containing a reply to Bishop Hopkins on slavery (1864); "The New Realistic Divinity neither the Religion of the Bible and Prayer-Book nor of the Holy Catholic Church" (1879); a "Memorial Discourse on the career of Henry, the alumni of Bowdoin college (1882); "Notes on the Revision of the New Testament Version" (1883); and "Christian Eschatology" (1885).

GOODWIN, John, physician, b. in England; d. in Philadelphia, Pa., 28 Dec., 1727. He was the first English physician that came to Pennsylvania under Penn's charter, and was among the first that bought lands in the province of the "Free society of Quakers," and settled in Philadelphia. In 1682 he was appointed "chirurgeon" to the society, and was sent to the province, arriving there shortly before Penn. It was then to his coming to this country he had practised his profession in London. In 1695 he was appointed a judge of the courts of common pleas and quarter sessions and the orphans' court, which office he held many years. From 1686 till 1701 he was one of the proprietaries commissioners of property, and in November, 1744, was appointed by Penn to be deputy-governor, or mayor, of the province, and the office filled until October, 1696, when he resigned. He was an elder of the Society of Friends.

GOODWIN, Daniel, jurist, b. in Geneva, N. Y., 24 Nov., 1799. He was graduated at Union college, studied law, and was one of the early emigrants to Michigan territory. He was U. S. district attorney for Michigan in 1834-41, judge of the supreme court in 1843-50, president of the State constitutional convention of 1850, and a member of that of 1867. In 1850-81 he was circuit judge for the upper peninsula of Michigan. Judge Goodwin served repeatedly in the legislature, and in 1851 appeared for the people in the trial known as the railroad conspiracy case."—His son, Daniel, b. in New York city, 26 Nov., 1832, was graduated at Hamilton college in 1852, studied law in Auburn, N. Y., and Detroit, Mich., and in 1855 was admitted to the bar of the state of Michigan. He was judge-advocate of militia in 1856, and assistant U. S. attorney in Chicago in 1862-4. He has been U. S. commissioner for Illinois since 1861, and a trustee of the Illinois University and ear infirmary since 1861. He has published "James Pitts and his Sons in the American Revolution" (Chicago, 1885); "The Dearborns" (1884); "The Lord's Table" (1885); and "Provincial Pictures" (1886).

GOODWIN, Daniel Raynes, clergyman, b. in North Berwick, Me., 12 April, 1811. He was graduated at Bowdoin at the head of his class in 1832, and entered Andover theological seminary, but left in 1835 to become a tutor in Bowdoin, where he soon afterward became professor of modern languages, first spending two years in Europe in preparation. He remained at Bowdoin until 1853, and while there he was ordained deacon, 13 July, 1847, and priest, 10 Sept., 1848. He became president of Trinity college, Hartford, in 1853, and professor of Christian ethics, but removed to Philadelphia in 1860 to become provost of the University of Pennsylvania, where he was engaged in the study of philosophy. In addition to this, when, in 1862, the diocesan divinity-school was organized, he took the professorship of apologetics, which he exchanged in 1865 for that of systematic divinity. He resigned his office in the university in 1868, in order to devote himself to the divinity-school. He made its dean, and held the office till 1884, when he again became professor. The university then conferred upon him the degree of LL. D., and he had previously received that of D. D. from Bowdoin in 1853. He had one of the delegates to every general convention of his church in the United States for twenty-five years, is one of the foremost low-church presbyters in Pennsylvania, and for many years not only has been president of the standing committee of his diocese, but has largely directed the religious press. His publications are "Southern Slavery in its Present Aspects," containing a reply to Bishop Hopkins on slavery (1864); "The New Realistic Divinity neither the Religion of the Bible and Prayer-Book nor of the Holy Catholic Church" (1879); a "Memorial Discourse on the career of Henry, the alumni of Bowdoin college (1882); "Notes on the Revision of the New Testament Version" (1883); and "Christian Eschatology" (1885).

GOODWIN, Jehudah, governor of New Hampshire, b. in North Berwick, N. H., 10 Oct., 1796; in Portsmouth, N. H., in 1822. His education was received at the South Berwick academy. Shortly after leaving that institution he entered the counting-house of Samuel Lord, a merchant and ship-owner of Portsmouth. He became supercargo and after some years he became captain of one of his own ships, and followed the sea till 1822, when he established himself in Portsmouth as a merchant. He was six times a representative in the legislature between 1838 and 1856, and was a delegate at large from New Hampshire to the National conventions at which Clay, Taylor and Scott were nominated by the Whigs for the presidency, serving as vice-president of the first two bodies. He served twice in constitutional conventions, and was several times an unsuccessful Whig candidate for congress, being the last nominee of that party for governor of the state. In 1850 he was the successful Republican candidate for the same office, and was re-elected for the succeeding term, which expired in June, 1861. When President Lincoln made his call for troops in 1861 the legislature was not in session, and the municipal banking institutions undertook the draft for the Union. Gov. Goodwin accepted $600,000, and with this sum raised and equipped ten regiments. Gov. Goodwin was active in the Unitarian church, and was widely known for his charities. He was connected with many railroad and other corporations, and with various trusts. He was a man of liberal views, and was a pillar in the community.

GOODWIN, John Noble, statesman, b. in South Berwick, Me., 18 Oct., 1824. He was graduated at Dartmouth in 1844, studied law, was admitted to the bar in 1849, and began practice in South Berwick. He was elected to the senate of
GOODWIN, William Frederick, author, b. in Concord, Mass., 27 Sept., 1823; d. in Concord, N. H., 12 March, 1872. He was graduated at Bowdoin in 1848, and taught in a high-school in Concord, N. H., and in New Bedford, Mass., from 1851 till 1853. He was then graduated at the Harvard law school in 1854, and was admitted to the bar in Concord, N. H., in 1855. He was appointed 1st lieutenant of the 16th regular infantry in May, 1861, and after acting as mustering officer in New Hampshire, joined his regiment in March, 1863, and was engaged at the actions of Hoover's Gap and Chickamauga, where he was wounded. He was brevetted captain for gallant conduct in that battle, and was retired in 1865, from incapacity resulting from his wound, after receiving his promotion to a captaincy in 1864. After his retirement he was disbursing officer in Rhode Island in 1865, and was afterward on duty in New York City. He was also engaged on a "Biography of Gen. Alexander Scammel," and left various manuscripts, which have not been published.

GOODWIN, William Watson, scholar, b. in Concord, Mass., 9 May, 1831. He was graduated at Harvard in 1851, studied at Bonn, Berlin, and Göttingen, and was tutor at Harvard from 1856 till 1890, after which he became Eliot professor of Greek literature, and still (1887) holds that chair. He was first director of the American school of classical studies at Athens, Greece, in 1882–3, and was president of the American philological association from 1872 till 1883. Prof. Goodwin is also a member of the Imperial archeological institute of Germany, of the American academy of arts and sciences, and of the Massachusetts historical society, and is a knight of the Greek order of the Saviour. He received the degree of Ph. D. from the University of Göttingen in 1853, and that of LL. D. from Amherst, and from the University of Cambridge, England, in 1883. He has been an extensive contributor to literary and philological journals, and to the transactions of various learned societies in the United States and England. He has published an interesting "Report on the American School of Classical Studies in Athens" (Boston, 1888), and "Papers of the American School of Classical Studies at Athens, Vol. 1st, edited by William W. Goodwin and Thomas W. Ludlow" (1885). His works include "Syntax of the Moods and Tenses of the Greek Verb" (Cambridge, 1869; revised ed., 1885; London, 1873); "Elementary Greek Grammar" (Boston, 1870; enlarged ed., Boston and London, 1879); a "Greek Reader" with Joseph H. Allen (Boston, 1871; 4th ed., edited by William W. Goodwin, with alterations, 1877); and an edition of Xenophon's "Anabasis," Books I–IV., with John W. White (Boston and London, 1877).
described as "a man with an India-rubber coat on, India-rubber shoes, an India-rubber cap, and in his pocket an India-rubber purse and not a cent in it." Failing of success in New York, he settled in Roxbury, Mass., where E. M. Chaffee placed at his disposal the plant of the Roxbury rubber company, a time when he realized the value of his patents; but the nitric-acid process cured only the surface of the material, and the goods were valueless except in the form of thinnest cloth. His bright prospects vanished, his property was swiftly dissipated, and his name became infamous. He was strongly urged to discontinue his experiments, but a persistent faith in the ultimate success of his efforts led him to persevere. Meanwhile he found that Nathaniel Hayward (q. v.), in his employ, was in the habit of sprinkling sulphur on the surface of the rubber and drying it in the sun. The effect produced was similar to that obtained by nitric acid, and, believing himself to be on the verge of an important discovery, he continued his experiments. Early in 1839 he found that the application of considerable heat to the sulphured articles caused it to sublimate, to have its elasticity increased at all times, and its offensive odor much diminished. After years of patient work, during which he strove to determine the exact conditions under which the most favorable results would ensue, though he was not sure in 1856, he succeeded in making his children's school-books to purchase new material, he finally, after being aided by his brother-in-law, William DeForest, obtained, in 1844, his patent for vulcanized rubber. He continued till his death to improve the process of vulcanization and to extend the utility of which the improved material could be put. As he was unable to comply with certain of the requirements of the law of France, his patent was declared void in that country, and he was equally unfortunate in England. "There was no method," he superceded by that of Thomas Hancock, who "re-discovered" the process after receiving information from Goodyear, with whom he was carrying on negotiations for the introduction of rubber into England. He acquired about sixty patents, and the original vulcanizing patent was extended in 1856, and in 1867 was reissued, owing to the persistent opposition of those who, during his lifetime, grew rich by infringing on his rights. The benefits conferred on humanity by Goodyear's patents have been nowhere more conspicuous than in connection with the military service during the civil war. The great council medal of the world's fair held in London in 1851 was conferred on him, and he also received the grand medal of the world's fair held in Paris in 1855 together with the cross of the legion of honor, which was presented to him by Napoleon III. Although he died in debt, he lived to see his material applied to nearly 500 uses, and to give employment to upward of 60,000 persons. Dr. Leander Bishop says: "In the art of modifying the curious native properties of caoutchouc and gutta-percha, and of moisturizing their plastic elements into a thousand forms of beauty and utility, whether hard or soft, smooth or corrugated, rigid or elastic, American ingenuity and patient experiment have never been excelled." See Bradford K. Peirce's "Trails of an Inventor" (New York, 1869); and Parton's "Famous Americans of Recent Times" (Boston, 1867).

GOOKIN, Daniel, soldier, b. in Kent, England, about 1612; d. in Cambridge, Mass., 19 March, 1687. He came with his father to Virginia in 1621. During the Indian massacre of 1622, Gookin, with thirty-five men, held his plantation, at what is now New London, Conn. He was the only man left alive. In May, 1644, in consequence of his doctrinal sympathies with the Puritans, he removed to Cambridge, Mass., where he was soon afterward appointed a captain of militia and a member of the house of deputies. In 1651 he was speaker of the house, and in 1655 elected a magistrate. In 1656 he was appointed by legislative enactment superintendent of all the Indians who acknowledged the government of Massachusetts, an office which he retained until his death, although he became unpopular because of the protocol which, as a magistrate, he extended to the Indians. He zealously co-operated with John Eliot in his efforts for their spiritual instruction. King Philip's war led to the passage of several measures against the Natick and other Indians, who had submitted to his rule, with the English, and a commission was appointed in 1675 to join Eliot in opposing these measures, and consequently subjected himself to reproaches from his fellow-magistrates, and insult in the public streets. He visited England in 1655, and was authorized by Cromwell to invite the people of New England to colonize Jamaica, then recently conquered from Spain. He went to England again in the following year, returning in 1660 in the same ship with the fugitive regicides, Goffe and Whalley, whom he aided in protectorate. He was one of the licensees of the Cambridge printing-press in 1662. In 1661 he was made major-general of the colony. He took an active part on the side of the people against the measures which terminated in the withdrawal of the colonial charter in 1666. He died so poor that John Eliot solicited from Robert Boyle a gift of £10 for his widow. His "History of New England" and "History of New Netherland," written in 1674, was published by the Massachusetts historical society in 1792. He was also author of a "History of New England," never published, the fate of which is unknown.—His grandson, Nathaniel, clergyman, b. in 1688; d. in 1754, was educated at Harvard, and ordained in 1710. He published three sermons on the occasion of the earthquake in October, 1727; to which were added an account of the earthquake, and of some remarkable thunder-storms.
GORDON, Adoniram Judson, clergyman, b. in New Hampton, N. H., 19 April, 1806. He was graduated at Brown in 1820, and at Newton theological seminary in 1823. He was ordained 29 June, 1823, and in the same year became pastor of the Baptist church at Jamaica Plains, Mass. In 1829 he accepted a call to the Clarendon street Baptist church, Boston, which he resigned in 1847. He is a trustee of Brown University, from which he received in 1877 the degree of D. D. His publications include "Grace and Glory" (Boston, 1860); "In Christ" (1872); "Ministry of Healing" (1888); "The Melchizedek Life" (1884). He was also one of the composers of the hymn-book known as the "Service of Song." [1]

GORDON, Andrew Robertson, Canadian explorer, b. in Aberdeen, Scotland, 13 Feb., 1831. He was educated in his native city, entered the British navy in 1844, was specially promoted for a meteorological examination in 1857, and retired from the service with the rank of lieutenant in October, 1873. He then removed to Canada and became attached to the meteorological observatory in Toronto, and was appointed deputy superintendent of the service in 1860. On the expiration of six years he continued to pursue a project to connect Manitoba and the northwest to Hudson Bay by means of a railway, an expedition, commanded by Lieut. Gordon, was fitted out in 1864 to determine the length of that part of the year during which the bay was navigable, and to make surveys. Experiments during three seasons, from 1864 till 1866, proved that the bay would admit of safe navigation during four months of the year. By this route the distance to Europe would be lessened by many hundreds of miles. He published official charts and sailing directions for explorations. [2]

GORDON, Clarence, author, b. in New York city, 28 April, 1865. His ancestor, John, came from Scotland to New Haven, Conn., about 1760, and his father was a cotton-merchant. Clarence graduated at the Lawrence scientific school of Harvard in 1886. He resided chiefly in Savannah, Ga., till 1866, lived in or near Boston in 1866-8, and then moved to Newburg, N. Y., where he still (1887) resides. He was special agent of the U. S. census bureau in 1879-83, in charge of the investigation of meat-production in the grazing states, and has since engaged in the real-estate business. He has contributed largely to journals and magazines, and besides his census report (Washington, 1884) has written stories for boys, under the pen-name of "Vieux Moustache." These include "Christmas at Under-Tow" (New York, 1864); "Our Fresh and Salt Tutors" (1866); "Two Lives in One" (1870); and "Boarding-School Days" (1873). [3]

GORDON, George Henry, soldier, b. in Charlton, Mass., 19 July, 1825. He was graduated at the U. S. military academy in 1846, and assigned to the mounted rifles. In the Mexican war he was engaged in the siege of Vera Cruz in March, 1847, in the battle of Cerro Gordo, 17-18 April, where he was wounded and brevetted 1st lieutenant, took part in the battles of Contreras and Chapultepec, and was present at the assault and capture of the city of Mexico. In a hand-to-hand encounter with two guerrillas near the San Juan Bridge on 21 Dec., 1847, he was severely wounded. On 5 Jan., 1848, he was promoted 2d lieutenant and assigned to recruiting service; ill health necessitated leave of absence in 1848-9, with permission to keep the salary in the considerably lower pay in the cavalry school for practice at Carlisle, Pa. From 1850 till 1854 he was on frontier duty, and was promoted to a 1st lieutenant, 30 Aug., 1855. He resigned, 31 Oct., 1854, studied law, and entered upon practice in Boston in 1857. At the beginning of the civil war he raised the 2d Massachusetts regiment, became its colonel on 24 May, 1861, and was made military governor of Harper's Ferry. In 1862 he commanded a brigade under Gen. Banks, and for his conduct in the retreat from Strasburg to Williamsport was relieved of command on 9 June, 1862. He was engaged in a large number of battles and skirmishes, took part in the North Virginia and Maryland campaigns, was in the second battle of Bull Run, and at Antietam fought with his brigade under Gen. Asbell. At the battle of Mansfield's corps, and guarded the upper Potomac at Harper's Ferry in September to December, 1862. He was with the Army of the Potomac in pursuit of the Confederate army from the Potomac to Warrenton in July, 1863, engaged in operations about Charleston harbor, S. C., from August, 1863, till April, 1864, was in command of Florida in August, guarded and kept open the communications by White river with Little Rock, Ar., in July, and took part in the operations against Mobile in August. From November, 1864, till 16 June, 1865, he was on duty at Washington, and in command of the eastern district, and was brevetted major-general of volunteers on 9 April, 1865. He was mustered out of service on 24 Aug., 1865, and returned to the practice of law in Boston. [4]

GORDON, George Phineas, inventor, b. in Salem, N. H., 21 April, 1819; d. 27 Jan., 1879. His education was received in the schools of Salem, N. H., and Boston, Mass. Turning his attention to printing at an early age he devoted himself to the improvement of job and treadle presses. He was granted more than fifty patents, and gave his name to the press known in the United States and Europe as the "Gordon." [5]

GORDON, George William, West Indian insurgent, d. in Jamaica, W. I., 23 Oct., 1865. He was a member of the colonial legislature in the island of Jamaica in 1863, and was leader in mass-meetings held by the colored people to give expression to various grievances. In the beginning of October, 1865, in the district of Morant bay, in the eastern portion of the island, an attempt was made to expel the negroes from certain unoccupied lands of which they had taken possession. This called forth great indignation, and when on 7 Oct. a negro was tried on account of this affair before the court at Morant bay, a mob collected, threatening to liberate him. The court ordered the arrest of the leaders of the mob, but the latter overpowered the police. On 8 Oct. the court issued writs for the arrest of twenty-eight of those charged with having participated in the riot, and on 11 Oct., when the prisoners were to be brought before the court, a new riot broke out. The volunteers who had been called out were overpowered, and many of them, together with several magistrates, massacred, and the court-house burned. According to an official statement of the governor, sixteen whites were killed and eighteen wounded. In several adjoining districts the negroes rose and plundered the plantations, but, as far as known, only two persons were killed. The troops who had been sent into the interior returned, and reported that they had met no armed resistance, that they had not lost a single man, but had shot and hanged, without the least form of trial, hundreds of persons suspected of the rebellion. The governor claimed to have received proofs of the guilt of Mr. Gordon as one of the chief instigators of the revolt, although the latter was a resident of Kingston, where there was
no disturbance, and had not been absent from home during the riots. He was, however, arrested, taken to Morant bay and tried by a court-martial, who adjudged him guilty. The evidence brought forward against him stated that he had been seen on one Sunday at a certain chapel at which Paul Bogle, another Negro leader, was worshipped: that somebody had said that Mr. Gordon had desired the people of a certain district in the parish to hold a meeting; that certain placards in blank had been found in Mr. Gordon's portmanteau; that a placard headed "The State of the Island" (in which there was a charge of disorder and disloyalty or sedition) had been penned by Mr. Gordon; that he had used some strong language in a meeting of the people; that he had written a letter to one Chisholm, advising him, with reference to the sufferings of the people, to "pray to God for help and deliverance." Mr. Gordon protested solemnly against having had knowledge of or part in the plot. Nevertheless Gov. Eyre sanctioned the finding of the court-martial, and Gordon was hanged on 28 Oct. At the close of that month the number of those hanged with and hanged by the soldiery without trial, or by order of the court-martial, was reported as reaching 2,000.

GORDON, Sir James Alexander, British naval officer, b. about 1782; d. in Greenwich hospital, England, 8 Jan., 1862. He entered the navy in 1798, and rose rapidly in his profession. He was at the battle of the Nile, served in the West Indies, the Mediterranean, and the Adriatic; commanded the frigate "Active" at the battle of Lissa, for which he received a gold medal and a pension of £300, and, at the capture of the French frigate "La Pomone," had a leg carried away by a 36-pounder. In August, 1814, with a squadron under his command, he entered the Potomac, reduced Fort Washington and other batteries, and subsequently forced the city of Alexandria to capitulate. He also took part in the operations against New Orleans in 1814–15. In 1827 he was appointed governor of the royal naval hospital at Plymouth. In 1840 he became lieutenant-governor of Greenwich hospital, and in 1853 was advanced to the post of governor of that establishment. Altogether he served in the navy nearly 50 years, and was the last survivor of Lord Nelson's band of captains. He was created a K. C. B. in 1815; in 1834, G. C. B.; and became admiral of the fleet in 1866.

GORDON, James D., missionary, b. in Prince Edward island; d. in Erramunga, New Hebrides, 23 Feb., 1872. He entered the ministry of the Presbyterian church, and in 1864 went to Erramunga, one of the New Hebrides group of islands, as a missionary. At the end of six years he withdrew from outside support, and entirely alone trusted himself unreservedly among the natives until his death. During his residence on the island he translated portions of the Bible into the language of Erramunga, besides preparing primers and hymns for their use. He also acquired a knowledge of the language of the island of Espiritu Santo; and for ten years he was the medical officer of the island. He perished at the hands of hostile natives.

GORDON, John Brown, governor of Georgia, b. in Sumter county, Ga., 6 Feb., 1832. He was educated at the University of Georgia, studied law and was admitted to the bar, but had practised only a short time when he entered the Confederate army as a captain of infantry. He rose successively to the rank of lieutenant-general. He commanded one wing of Lee's army at Appomattox Court-House, and was wounded in battle eight times during the war. He was the Democratic candidate for governor of Georgia in 1868, but, though his election was claimed by his party, his opponent, Rufus B. Bullock, secured the office. He was a member of some of the New Hebrides Democratic conventions of 1868 and 1872, presidential elector for the same years, and in January, 1873, was elected to the U. S. Senate. He was re-elected in 1879, but resigned his seat in 1880. He took an active part in the proceedings of the Senate, and gave a moderate support to the administration of President Hayes. In 1886 he was elected governor of Georgia.

GORDON, Patrick, soldier, b. in 1644; d. in Philadelphia, Pa., 5 Aug., 1736. He was bred to arms in the British service, and served from his youth to the close of Queen Anne's reign with a high reputation. He was afterward appointed governor of Pennsylvania, arrived there with his family in the summer of 1726, and met the assembly in August. In his first address he said that he had been a soldier, knew the crooked ways of professed politicians, and must rely upon a blunt, straightforward course in his communications with them and in the administration of the government. At a council of war in Philadelphia on 26 May, 1728, for the purpose of renewing treaties with the Indian tribes then represented, it was said by the Indians in reference to the governor's address, "The governor's words were all right and good; we have never had any such speech since William Penn was here." Gov. Gordon was equally popular with his own people. He published "Two Indian Treaties at Conestoga, 1728." (Philadelphia, 1728).

GORDON, Thomas, statesman, b. in Pitlochry, Scotland; d. in Amboy, N. J., in 1722. He came to New Jersey in 1684, and settled in Scotch Plains. He was elected attorney-general of the eastern district in 1698, chief secretary and register in 1702, licensed as an attorney in 1704, elected to the legislature, and became speaker of the assembly. In 1709 he became chief justice, and was afterward receiver-general and treasurer of the province.

GORDON, Robert F., historian, b. in Philadelphia, Pa., in 1787; d. in Beverly, N. J., 17 Jan., 1860. He was a member of the Philadelphia bar, but devoted much of his time to historical and archaeological researches. He published "Digest
of the Laws of the United States" (Philadelphia, 1827); "History of Pennsylvania from its Discovery to 1776" (1828); "History of New Jersey from its Discovery to 1789" (Trenton, 1818); 2d ed., 1834); "History of America" (Philadelphia, 1831); "Cabinet of American History"; "History of Ancient Mexico" (1832); "Gazetteer of New Jersey" (Binghamton, 1836); "Gazetteer of New York" (1868 and 1847); and "Gazetteer of Pennsylvania" (Philadelphia, 1839).

GORDON, William, clergyman, b. in Hitchin, England, in 1790; d. in Ipswich, England, 19 Oct., 1807. He was settled over a large independent society at Ipswich, and afterward at Old Gravel Lane, Wapping; and came to Massachusetts in 1770. After preaching a year to the Third church in Roxbury, he became its pastor, 6 July, 1772. During the Revolution he took an active part in public measures, and while chaplain to the Provincial Congress of Massachusetts preached a fast-day sermon, strongly expressing his political sentiments. He was dismissed from his post, as the legislature regarded his prayers as intended rather to dictate their measures than to implore the divine direction of them. He returned to England in 1786, and published in 1787, "God's Providence in the Rise, Progress, and Establishment of the Independence of the United States," a minute and generally faithful narrative (4 vols., London, 1789). The value of this work was somewhat impaired by the expurgation of such passages as might incur persecution. He subsequently settled at St. Neots, Huntingdonshire. Besides his history, he published "A Plan of a Society for making Provision for Widows by Life Annuities" (1772); "First Anniversary Sermon after the Declaration of Independence" (1777); and "Judgment of Edwards's Work on 'The Affections.'"

GORDON, William Robert, clergyman, b. in New York city, 19 March, 1811. He was graduated at the University of the city of New York in 1834, studied theology in the New Brunswick seminary, and was licensed to preach in 1837. He held Dutch Reformed pastorates in North Hempstead in 1838-39, in Flushing in 1843-49, in Houston street, New York City, in 1845-58, and in Schenectady, N. J., till 1860, when he resigned on account of failing health, but continued to preach occasionally and edits the "Sower and Mission Monthly." The degree of S. T. D. was conferred on him by Columbia in 1859. He has been a constant contributor to various theological journals, and published, besides sermons and essays, "Supreme Godhead of Christ" (New York, 1844); "Particular Providence, proved by the History of Joseph" (1855); "Threefold Test of Modern Spiritualism" (1856); "Christocracy" (1867); "The Church and her Sacraments" (1870); "Life of Henry Ostrander, D. D." (1875); and "Revealed Truth Impregnable." (1879).

GORE, Charles, b. in Boston, Mass., 21 Sept., 1758; d. in Waltham, Mass., 1 March, 1827. His father, John (1719-90), was prosecuted and banished as a loyalist in 1778, but was restored to citizenship in 1787 by act of legislature. The son was graduated at Harvard in 1776, studied law, and in 1781 acquired a lucrative practice in Boston. In 1789 he was appointed by Washington the first district attorney for Massachusetts, which office he held until 1795. In that year he was appointed, with William Pinckney, commissioner to England under John Jay's treaty to settle the American spoliation claims, and succeeded in obtaining the restitution of a large amount of property. He remained in London for eight years, during the last of which he was charge of affairs. He returned to Boston in 1804, and was appointed governor of Massachusetts in 1809, but served only one year. He was a member of both branches of the legislature, and in 1813 was elected U. S. senator in place of James Lloyd, which office he held till 1816. After serving as a presidential elector in 1817 he retired to private life. He was for a time Daniel Webster's tutor in law. He left valuable bequests to the American academy of sciences and to the Massachusetts historical society, of which associations he was a member, and bequeathed nearly $100,000 to Harvard, of which he had been a fellow. The Harvard library building, Gore hall, which was completed in 1841, is named in his honor. Gore gave him the degree of LL. D.

GORGIS, Josiah, soldier, b. in Dauphin county, Pa., 1 July, 1818; d. in Tuscaloosa, Ala., 15 May, 1888. He was graduated in 1841 at the U. S. military academy and assigned to the ordnance corps. He served with credit in the Mexican war, rising to the rank of captain in 1855. After acting in various arsenals as assistant he resigned at the beginning of the civil war, and was placed at the head of the 1st Illinois artillery, serving with the rank of brigadier-general. After the close of the war he devoted himself to business. He was elected vice-chancellor of the University of the South at Sewanee, Tenn., in 1873, and was made president of the University of Alabama in 1878, where he remained until he was compelled to resign owing to failing health.

GORIES, Sir Ferdinand, proprietor of Maine, b. in Ashton Phillips, Somerset, England, about 1555; d. in England in 1647. He was engaged in the commerce of the West Indies; and when Weymouth returned from New England in 1605, bringing five Indians, Gories took three of them, Mantic, Sketwarees, and Tafquamento, into his home, and after instructing them in the English language gained much information relative to their country, and determined to become a proprietor of land beyond the Atlantic. His efforts resulted in the formation of the Plymouth, which with the London company was incorporated in 1606. Between these was divided the territory extending fifty miles inland from the 34th to the 45th parallel of north latitude. Plymouth company had the northern portion, which was styled North Virginia. The patentees were authorized to maintain the government for twenty-one years, with permission to impose taxes, to coin money, and to exercise all the power of a well-organized society. After several unsuccessful expeditions, two ships were despatched from Plymouth in 1607, bearing a party who erected a fortified storehouse, near the mouth of the Kennebec, in Maine, which they called Fort George. Owing to the severity of the climate and many hardships, this was abandoned in the following spring. In 1614 Gories engaged Capt. John Smith, who had visited New England in the service of the Plymouth company. He set sail in March, 1615, with two ships. His own becoming dissatisfied, he returned to port, and the voyage alone, but unsuccessful. After other unsuccessful attempts, Gories sent out a party under Richard Vines, in 1616, which encamped on the Saco during the winter. In 1619
Dermer made a second voyage. The London company had now incurred the resentment of King James, and Gorges and his party formed a new corporation on 3 Nov., 1620, under the name of the "Council established at Plymouth, in the county of Devon, for the planting, ruling, ordering, and government of an English settlement in America." It was the foundation of all the grants made in New England. This corporation consisted of forty patentees, most of whom were persons of distinction, including thirteen peers. Gorges was styled the "father of colonization America." He settled grants with John Mason of the district called Laconia, and attempted settlements. In 1635 the council resigned its charter to the king; but Gorges obtained a new charter in 1639, which constituted him lord-proprietor of the province of Maine, with extraordinary governmental powers, which were to be transmissible with the property to his heirs and assigns. He prepared to visit New England, but the company became embarrassed for funds, and was obliged to sell the ship and pinnace which had been built. Sir Ferdinando had also become interested in a new proprietary project. Through the influence of his father and of Lord Edward Gorges, Robert, the youngest son of Sir Ferdinando, was commissioned lieutenant-governor of New England. He had just returned from the Venetian wars, and was a share-holder in the grant. He also had a property in a tract of land on the northeast side of Massachusetts bay, which had been made to him in consideration of his father's services to the company. He came to Plymouth in 1623, bringing with him an Episcopal clergyman, William Morell. He attempted to form a settlement at Wessagusset, which ended in a dispute with Weston, who had begun the colony there, and returned to look after it. Robert Gorges, having power to "restrain interlopers," began proceedings against him. He returned to England in less than a year, and his people dispersed—some to England, some to Virginia. In 1631 a grant of land was made to several persons, including Ferdinando Gorges, a grandson of Sir Ferdinando. This territory was situated on the Acenomantic river, and several settlements were made there. These were subjected to no external government until the arrival of Capt. William as deputy governor of the province, which was called "New Somersetshire." The first meeting of the commissioners was held on 23 March, 1636, in Saaco, then containing 150 inhabitants, and was the first provincial government for this section of New England. The charter of Maine covered the same territory as that of New Somersetshire, and Sir Ferdinando issued a commission for its government, and sent his nephew, Thomas, to be deputy governor. The first general court of this government, which exercised the powers of an "executive, legislative, and judicial body in the name of Sir Ferdinando Gorges, late proprietor of Maine," was held in Saaco, 25 June, 1640. After the Gorges government was established, in 1641, the borough of Acenomantic and the town of Gorges were incorporated. Thomas Gorges arrived in 1641, and settled in this town. He sailed for England in 1643, leaving Richard Vines at the head of the government. In that year the four New England colonies formed a confederacy, excluding the settlements of Gorges, for they "ran a different course both in their ministry and civil administration." On the death of Sir Ferdinando, the estate was left to his son, John, who totally neglected the province. After writing repeatedly to the heirs and receiving no replies, the Gorges colonies formed themselves into a body political for the purpose of self-government, and submitted to the jurisdiction of Massachusetts. —Sir Ferdinando's grandson, Ferdinando, b. in Loftes, Essex, England, in 1629; d. in England, 25 Jan., 1718, petitioned the king against the usurpation of Massachusetts, and commissioners were sent to adjust the affairs of the province. In 1747, he sold his rights to Massachusetts for £1,250. He published "America Painted to the Life" (London, 1659). GORHAM, John, physician, b. in Boston, Mass., 24 Feb., 1758; d. there, 29 March, 1839. He was graduated Harvard in 1777, and studied in Edinburgh. In 1809 he was appointed adjunct professor of chemistry and materia medica in Harvard, and in 1815 was made professor of chemistry and mineralogy. He published an "Inaugural Address" (1817); "Elements of Chemical Science" (1819); and a "Contribution on Sugar" to Thomas's "Annual Philosophy" (1817). GORHAM, Nathaniel, statesman, b. in Charlestown, Mass., 27 May, 1728; d. there, 11 June, 1796. After receiving a common-school education, he engaged in mercantile pursuits in his native town. He took an active part in the Revolutionary movement. At the beginning of the Revolution, was a member of the colonial legislature from 1771 till 1775, a delegate to the Provincial congress from 1774 till 1775, and a member of the board of war from 1778 until its dissolution in 1781. In 1779 he served in the State constitutional convention, and two years later he was a delegate to the Continental congress from 1782 to 1783, and also from 1785 till 1787, serving as president of that body in June, 1786. For several years he was judge of the court of common pleas. He took high rank in the convention that framed the National constitution, and, when it was ratified, he was chairman of the whole, he was called by Washington to preside, and filled the chair for three months. He afterward exerted a powerful influence in securing the ratification of the constitution in the State convention. In connection with Oliver Phelps he purchased from the state of Massachusetts in 1786 an immense tract of land on Genesee river, for the sum of $1,000,000. This had been previously ceded to Massachusetts from the state of New York. They soon extinguished the Indian title to a part of this territory, convicted the speculators of the fraud, and sold large parts to speculators and settlers. In 1790 they sold nearly all their property, and, being unable to fulfill their contract in full to Massachusetts, Phelps and Gorham compromised and surrendered that portion of the land which remained under the Indian title.—His eldest son, Nathaniel, d. in Canandaigua, N. Y., 22 Oct., 1826, was a pioneer settler of this tract, having been placed there in charge of his father's interests. —Another son, Benjamin, lawyer, b. in Charlestown, Mass., 13 Feb., 1775; d. in Boston, Mass., 27 Sept., 1853, was graduated at Harvard in 1793. He studied law under Theophilus Parsons, and rose to eminence at the Boston bar. He was elected a representative to congress as a Federalist to fill the vacancy caused by the resignation of Jonathan Mason, and served from 1810 till 1821. He was again in congress from 1827 to 1833, and from 1833 till 1835. He was also a member of the state house of representatives. He gave his professional services without compensation to defend the newspaper press in libel suits. GORHAM, Arthur Price, senator, b. in Howard county, Md., 13 March, 1839. He received a public-school education, and in 1852 became a page in the U. S. senate, where he remained till 1866, and on 1 Sept., he was appointed collector of internal revenue for the fifth district of Maryland, which
office he held till March, 1869. In June of that year he was made a director in the Chesapeake and Ohio canal company, and became its president in 1872. In November, 1869, he was elected to the Maryland legislature as a Democrat, re-elected in 1871 and chosen speaker of the house. He was elected to the state senate in 1875, and served four years. In 1880 he was appointed by the U. S. senate as a Democrat to succeed William Pinkney White, and served from 1881 till 1887.

GORMAN, John Berry, physician, b. in Newberry district, S. C., 22 Feb., 1783; d. in Talbot county, Ga., 12 Nov., 1864. He studied medicine in the country. He was elected to the Legislature of the State of South Carolina in 1811 after a practice of twenty years in Milledgeville and Talbotton, Ga., gained a large fortune. He owned a valuable library, was fond of painting, and left a picture entitled the “Nightmare.” He published “The Philosophy of Animated Existence” (Philadelphia, 1845), and contributed to the State periodicals.

GORMAN, Willis Arnold, soldier, b. near Flemingsburg, Ky., 12 Jan., 1814; d. in St. Paul, Minn., 20 May, 1876. He was graduated at the law-school of the University of Indiana, was admitted to the bar, and began to practice in Bloomington and Madison. He was elected a clerk in the state senate, and was afterward several times elected to that body as a Democrat. He was appointed major of Gen. Lane’s regiment of Indiana volunteers in 1846, served in the Mexican war, and led an independent rifle battalion at the battle of Buena Vista. In 1847 he was made colonel of the 4th Indiana regiment, which he commanded in several battles. In 1848 he was civil and military governor of Puebla. From 1849 till 1853 he was a representative to Congress from Indiana, having been chosen as a Democrat. In 1858 he addressed large meetings in favor of Gen. Pierce’s election to the presidency. He was appointed governor of the territory of Minnesota in 1858, and ex-officio superintendent of Indians, which office he held till 1857. In that year he was a delegate to the State constitutional convention. He represented St. Paul in the Minnesota legislature in 1858, and in 1860 was a candidate for presidential elector on the Douglas ticket. He practised law in St. Paul till 1891, when he was made colonel of the 1st Minnesota regiment, and served in the battle of Bull Run. He was appointed brigadier-general of volunteers on 7 Sept., 1861, led a bayonet charge at Fair Oaks, and commanded a brigade at South Mountain and Antietam. He was at the head of the 2d division, 2d corps, till the reorganization of the army following Gen. McClellan’s removal. In 1864 he was mustered out of the service and resumed his law practice in St. Paul. He was elected city attorney in 1869, and held this office till his death.

GOROSTIZA, Manuel Eduardo de (go-rost-e-tha), Mexican dramatist, b. in Vera Cruz, 13 Oct., 1786; d. in Tampico, E. T., May 1, 1851. He was educated in Madrid, and at the age of twelve years wrote a comedy. He entered the Spanish guard as a cadet in 1808, and left the service in 1814 with the rank of lieutenant-colonel, to devote himself to literary work, and wrote much in defence of liberal ideas. His first book, “Besugo,” was published in 1816. He returned to Mexico in 1838, in the same year was elected deputy to the National congress, in 1838 secretary of the treasury, and in 1839 secretary of foreign relations. In 1844 he went as envoy extraordinary to the United States, and displayed diplomatic skill in his mission. In 1851 he returned to Madrid, was elected to the Spanish Cortes, and in 1851 was appointed the minister to the United States. In 1852 he was made president of the Republic of Texas. He fought in the defense of Churubusco in 1847. Gorostiza took much interest in education, and was also director of the National theatre. In 1851 his bust was placed in the hall of the National theatre of Mexico. His best known comedies are “Tal para Cual,” “Las Costumbres de Antano,” and “Don Dioguito,” which were published and represented in Madrid in 1821; and of his later works, “Contigo Pan y Cebolla,” which was adapted in French by Scribe under the name of “Une chaumiere et son coeur.”

GORRIE, Peter Douglas, clergyman, b. in Glasgow, Scotland, 21 April, 1813; d. in Potsdam, N. Y., 12 Sept., 1884. He emigrated to the United States in 1820, and entered the ministry of the Methodist Episcopal church. He was a member of the New York conference from 1836 till his death. He was a member of the New England historical society. He published “The Churches and Sects in the United States” (New York, 1850); “Episcopal Methodism as it Was and Is” (1852); “Lives of Eminent Methodist Ministers in Europe and America” (1852); an essay on Episcopal Succession; and “Black River Conference Memorial.” (1852, 2d vol., 1881).

GORRINGE, Henry Honeychurch, naval officer, b. in Barbados, W. I., 11 Aug., 1841; d. in New York, 7 July, 1862. He was the English clergyman of the established church, came to the United States at an early age, and entered the merchant-marine service. At the beginning of the civil war he enlisted in the National service as a common sailor, 13 July, 1862. Three months later he was attached to the Mississippi squadron, and by 1865 had risen through successive promotions for gallantry to the rank of acting-volunteer lieutenant. He was promoted to lieutenant-commander on 18 Dec., 1868, and from 1869 till 1871 commanded the sloop “Portsmouth” in the South Atlantic squadron. He was engaged in the hydrographic office in Washington, D. C., from 1872 till 1876, when he was sent with the “Gettysburg” on special service in the Mediterranean, where he remained till 1878, contributing letters to the New York “Nation.” He was born into notice in 1880 by his work of transporting and erecting an Egyptian obelisk that had been offered to the United States by the khedive Ismail in 1879 at the opening of the Suez canal. On arriving in Alexandria on 18 Oct., 1879, Commander Gorringle began his operations with the assistance of 100 Arabs, and on 6 Nov. had removed 1,280 cubic yards of earth from around the pedestal of the obelisk. By means of simple and original machinery devised by Gorringle, the monolith was removed from its pedestal and placed in a horizontal position on 6 Dec., 1879. The iron steamer “Dessou,” owned by the Egyptian government, was purchased from Mahomet Dowlak for £5,100, and the obelisk was introduced into the boat through an aperture made for the purpose. The mechanism by which the obelisk was confined in the vessel was entirely of Commander Gorringle’s construction, and consisted of the innumerable bolts of iron, steel and wood. The obelisk arrived in New York on 20 July, 1880. By the aid of iron tracks and cannon-balls the mono-
Gorrini, Joseph Ignatius (gore-i-nay), Argentinian socialist, was born in Jan 1772, d. in Sucre, Bolivia, 9 Nov., 1885. He studied in the University of Cordoba, and then went to Chuquisaca to be graduated as doctor in law, but at the death of his father in 1791 returned home to take charge of his property. With the revolution of May, 1810, he joined the patriot cause, and at once sided with the cause of independence, serving during the war of upper Peru. During the campaign of Salta and Tucuman in 1819 and 1820, he spent a great part of his fortune in the maintenance of the Argentine army. In 1826 he was sent as a delegate for the province of Salta to the first constituent congress; and in the same year, when the government of Salta, Gen. Gliemers, was called to the field, Gorrini became governor in his place. When the Spanish general Marquiegui invaded the province, Gorrini with a small body of men repulsed the vanguard of his forces and forced the main body to retire to upper Peru. In 1821 there was a revolution against Gliemers, and Gorrini was requested to take charge of the government, but he refused and retired to private life. When the province continued in anarchy, he came forward again, and took part in the defense against the last exertions of the royalist armies. He also strenuously opposed Quiroga, but, when the latter defeated Gen. Alvarado in 1831, Gorrini emigrated to Bolivia and died there.

Gosford, Archibald Acheson, Earl of, governor-general of Canada, was born in England about 1775; d. 27 March, 1849. He was the second earl of the name, and was created a peer of the United Kingdom, as Lord Worthington, 13 June, 1885. He was appointed governor-general of Canada in 1856, and arrived at Quebec in August of that year. A spirit of intense dissatisfaction formed in Upper Canada by William Lyon Mackenzie and in Lower Canada by Papineau, prevailed in both those provinces at the time of Earl Gosford's appointment. He was one of a royal commission, of which the other members were Sir Charles F. Grey and Sir George Gipps, which had been appointed to investigate the grievances complained of in Canada. Both as chief of the commission and as governor, Lord Gosford pushed to the utmost the policy of concession and conciliation which he had been instructed to adopt if Canada's connection with the empire was to be maintained. At the same time he begged to be relieved of his office, and this request was granted by the home government, which approved all that Gosford had done in Canada, though his mission was a failure. He left Canada on 26 Feb., 1858.
GOSNOLD, Bartholomew, English navigator, d. in Virginia, 29 Aug., 1607. After accompanying Raleigh to Virginia in his unsuccessful attempt to found a colony in Virginia, Gosnold commanded an expedition that was fitted out at the expense of the Earl of Southampton for planting a colony in New England. On 26 March, 1602, he sailed from Plimouth with one vessel and twenty colonists, and, instead of taking the usual southerly course, undertook the direct voyage across the Atlantic to America. From the Azores, to which he was carried by opposing winds, he took a westerly course, and after seven weeks came in sight of Cape Elizabeth, Maine. Thence he followed the coast to the southwest, and on 14 May anchored to the east of York harbor. Here he was visited by natives, and then proceeding south in search of a more suitable place for a settlement, discovered, on 15 May, a promontory which he named Cape Cod. He and fathers of his men went ashore, and this was the first spot in that region ever trod by Englishmen. Sailing around the cape, and stopping at an island now known as No Man's Land, Gosnold landed at the mouth of Buzzard's Bay, and planted his colony on an island, which he called Elizabeth island, in honor of the queen, but which is now known by its Indian name of Cuttyhunk. The hostility of the Indians, scarcity of provisions, and disputes about a division of profits had a discouraging effect on the colonists, who returned to England, where they arrived, 23 July, with a cargo of sea难得, and the first sarsaparilla, and other commodities. Gosnold then organized a company for colonization in Virginia, led by Wingfield, Hunt, and Capt. John Smith. A charter was granted by James I., 10 April, 1606, the first under which an English colony was planted in America. On 19 Dec. of that year he sailed with three small vessels and one hundred and five adventurers, only twelve of whom were laborers, and after a tedious voyage reached the mouth of the James River, which they named after the king. Sailing up the river he explored its mouth, and founded Jamestown, notwithstanding the numerous of Gosnold, who opposed the selection of this site owing to its unhealthy location. Before autumn fifty of their number, among them the projector of the colony, died.

GOTTWALD, Henry, zoologist, b. in Worcester, England, 6 April, 1810. He removed in infancy to Poole, Dorset, where he displayed his taste for natural history. In 1827 he went to Newfoundland in a mercantile capacity, and while there occupied his leisure in collecting insects and in making colored drawings of them. After residing there for eight years he removed to Lower Canada, and pursued his natural-history researches there for three years. Subsequently he travelled in the United States, resided in Alabama for nearly a year, and made a large collection of drawings of insects, especially of the lepidoptera of that region. He returned to England in 1839, and in 1844 visited Jamaica, where he spent eighteen months in studying the geology of that island, and in making collections. On his return to England he made a special study of the British butterflies, and has conducted his more recent researches with the aid of the microscope. In 1853 he took an active part in the formation of public and private collections of marine animals. In 1856 Mr. Gosse was elected a fellow of the Royal Society. His works, which are numerous, include the following on American natural history: "The Canadian Naturalist" (London, 1840); "Birds of Jamaica" (1847); "Natural History of Birds, Mammals, Reptiles, and Fishes" (1848-51, 4 vols., Svo); "Ocean Described" (1849); and "A Naturalist's Sojourn in Jamaica" (1851); "Letters from America" (London, 1859).

GOTTWALD, Louis Moreau, musician, b. in New Orleans, La., 8 May, 1859; d. in Tijuca, Brazil, 18 Dec., 1899. His father was of German-Jewish descent and his mother of Creole birth. At an early age he showed marked musical ability. To complete his musical education, his father sent him to Paris, where he studied the piano with Hallé and Camille Stamatz, and harmony with Malden. He also formed a friendship with Hector Berlioz, who gave him valuable advice. His first appearance was made in Paris in 1845. He continued his studies in musical composition till 1848, when he gave a series of public concerts in Paris with much success. He then travelled in Switzerland and Spain, and made a European reputation before returning to the United States in 1853. His first appearance in this country was made in Boston, and he afterward played in New York, in other cities of the United States, and in Mexico and South America. After spending some time in Buenos Ayres and Montevideo, he went to Rio Janeiro, where he gave many concerts and projected a musical festival, beginning 24 Nov., 1899. On the second evening's performance he became ill while playing one of his compositions, "La Mort," and was removed at once to Tijuca, where he died. Gottschalk played principally his own compositions, which are dreamy and sensuous, but without intellectual vigor and force. He executed them with feeling and delicacy of expression, which appealed to the popular taste. His arrangements of the works of others are of no special merit, nor was he a skilful interpreter of the works of the masters. His pieces are chiefly illustrative of his own style and southern life, and include "La Bananier," "La Savane," "Ricordata," "La Marche de Nuit," "O ma Charmante," "Repons-moi," "Manchega," "Grande Valse de Concert," "Grande Etude de Concert," "Mazeppa," "La Moissonneuse," "La Danse des Ombres," "Ossian Ballads" "La Bamboula" (a wild African dance), and Cuban dances. He was decorated with the cross of the legion of honor and the order of Isabella the Catholic. He contributed to the "American Monthly," "Notes of a Pianist," which were edited by his sister (Philadelphia, 1851).

GOTTWALD, Luther Alexander, clergyman, b. in York Springs, Adams co., Pa., 31 Jan., 1833. He was graduated at Pennsylvania college, Gettysburg, in 1857, and at the theological seminary there in 1859. In the same year he was ordained to the ministry of the Lutheran church, and has held pastorates at Shickshinny and Lebanon, Pa., Dayton, Ohio, Chambersburg and York, Pa., and Springfield, Ohio. He has been a successful preacher, and has held various offices in the general synod, as trustee of its college and seminary, and as a member of the boards of church extension and home missions. Pennsylvania college gave him the degree of D. D. in 1873. Dr. Gottwald is a frequent contributor to the periodicals of his church.
and has published various pamphlets and "Church Orders; or, the Necessity of a Right Call to the Office of the Ministry" (Gettysburg, Pa., 1879). GOUDE, William M., author. In Philadelphia, 10 Nov., 1796; d. in Trenton, N. J., 14 July, 1863. He edited the "Philadelphia Gazette" and other journals, and for thirty years contributed articles on banking to various periodicals. He was for thirty years connected with the Treasury department at Washington. He published "History of the American Banking System" (1835); "Expediency of Dispensing with Bank Paper" (1837); and a "Fiscal History of Texas" (1838). Gough, John Bartholomew, temperance lecturer, b. in Sandgate, Kent, England, 22 Aug., 1817; d. in Frankford, Pa., 18 Feb., 1886. His father had served in the Peninsular war as a private soldier. The son received his education chiefly from his mother, and, when twelve years of age, after the death of his father, was sent to the United States. He arrived in New York in August, 1829, and went to Oneida county, where he lived on a farm for two years. He then obtained a situation in a publishing-house in New York city, where he learned the trade of a bookbinder. Here his mother and sister joined him, but in 1838, during a time of depression, he lost his situation, and the family was reduced to destitution. In a few months after her arrival in New York his mother died, and Gough drifted into the worst of dissipation. For some years he obtained a precarious subsistence about drinking-shops and low resorts by singing and by his remarkable delineation. He had always a passion for the stage, and made one or two efforts to become an actor, but owing to his habits gained little favor. He married in 1838, and became a bookbinder on a larger scale.

The effort to do his work without giving up his nightly dissipation so affected him that he was on the verge of delirium tremens. He lost his wife and child, and was reduced to the utmost misery. In 1842 he was in Worcester, Mass., where he was regarded as a hopeless drunkard. Delirium had taken possession of him, and, as he used to relate to his audiences in after years, the tools of his trade seemed to turn to serpents and crawl about him. Thousands of people have heard him tell how, in October, 1842, a little kindness shown him by a Quaker induced him to attend a temperance meeting, to sign the pledge, and to keep it, in spite of a raging appetite for drink. A few months later some of his former companions induced him to violate his pledge, and he confessed the fact at a public meeting at Worcester. From the time of his taking the pledge in December 1831 came upon him an irresistible desire to devote his life to the cause of temperance, and he clung with singular tenacity to his purpose. He set forth, carpet-bag in hand, to tramp through the New England states, glad to obtain even seventy-five cents for a temperance lecture, and lived largely for eloquence. An intense earnestness derived from experience, and his power of imitation and expression, enabled him to work on the sensibilities of his audiences as few men have been able to do. He was accustomed to mime the passions and humorous in such a way as to attract thousands to hear him who had no purpose but to be interested and amused. In the first year of his travels he spoke 386 times, and thenceforward for seventeen years he dealt only with temperance. During that period he addressed over 2,000 audiences. He visited England in 1853, by invitation of the London temperance league, was entertained by George Cruikshank, the veteran artist and total abstainer, and his first address, delivered at Exeter Hall, produced a great sensation. He intended to stay but six months, but was kept busy for two years. In 1854 he had undertaken to speak at Oxford, and the students had determined to prevent him. He was greeted with hisses, cat-calls, and yells. But Gough had a disciplined temper and the courage of his convictions, and an appeal to the Briton's proverbial love of fair play ended in his obtaining a hearing. On a subsequent visit, in 1878, he was received with distinguished attention by the Oxonians. He returned to the United States in 1858, and took up his old work with unabated success. In 1867 he joined the Union temple in England, and lectured for three years. In his temperance efforts Mr. Gough always kept aloof from politics or any organized effort to accomplish results through legislation, relying entirely on moral influence and on the total abstinence pledge. After quitting his last lecture on temperance for seventeen years, he began to take up other subjects, literary and social, though from first to last his chief successes were obtained on the temperance platform. After his popularity had led him to vary his subject and to lecture before larger audiences, he became a moderator, but failed to produce some reference to the evils of intemperance. His oratory was not acquired, but natural. He had no eloquent training, his reading was singularly restricted, and all his resources were from within, set never failing to dazzle his audiences.

For several years Mr. Gough had made his home at West Boylston, Mass., where he spent much time among his books and friends. He was engaged in the delivery of a lecture at the 1st Presbyterian church, Frankford, Pa., when he was stricken by cerebral apoplexy, two days afterward lapsing into unconsciousness that lasted until his death. Amherst conferred upon him the honorary degree of A. M. A sketch of his life was published by Rev. W. Reid in 1884. His publications (some of which have been translated into French, Dutch, Scandinavian, and Tamil) are "Autobiography" (London, 1846; 2d ed., 1853); "Orations" (1854): "Temperance Address" (New York, 1870); "Temperance Lectures" (1875); and "Sunlight and Shadow, or Gleanings from my Life-Work" (1880). GOULD, Benjamin, soldier, b. in Topsfield, Mass., 15 May, 1757; d. in that town, 10 May, 1841. At the beginning of the Revolutionary war he marched at the head of thirty minute-men from Topsfield, and participated in the fight at Lexington on 19 April, 1775. He received a bullet wound, the scar of which was conspicuous on his cheek throughout life. He became the subject of a poem by his daughter, Hannah F. Gould. He was commissioned captain, and was
the last man to leave Charlestown neck at the retreat of the Continental forces from Bunker Hill in June, 1775. Subsequently he was engaged in the battles of White Plains, Princeton, and Stillwater, and had command of the main guard at West Point when Arnold fled and André was captured. After the war he settled in Newburyport, where the remainder of his life was spent.— His son, Benjamin A. Gould, born in Lancaster, Mass., 15 June, 1787; d. in Boston, 24 Oct., 1859, was graduated at Harvard in 1814, and became principal of the Boston Latin-school, remaining there until 1838. During his administration this institution became one of the most famous preparatory schools in the United States. His health failing in 1828, he was obliged to relinquish teaching, and spent two years in European travel. On his return he became a shipowner in the China and East Indian importing business. Mr. Gould also filled important public offices in the state. He was one of the first American teachers to annotate classical authors, and published "The Prize Book" (6 numbers, Boston, 1820-6); "Adams's Latin Grammar" (Northampton, 1825); and editions of Ovid (Boston, 1827), Horace (1828), and Virgil (1829).—Benjamin's daughter, Hannah Flagg, poet, b. in Lancaster, Mass., 5 Sept., 1820; d. in Newburyport, Mass., 5 Sept., 1865, removed with her father to Newburyport in 1860, and after the death of her mother became his constant companion, a fact that accounts for the patriotism of her earlier verses. In youth she was famed for vivacity and wit; her poems were written by true thought, refined and tender emotion, and healthful, moral tone, which made them favorites, and led to their frequent appearance in print, both at home and abroad. She led a quiet life in the homely house which a century—her life that would have been as secluded as it was unostentatious but for her genial hospitality and the many visitors and distinguished authors who sought her acquaintance. Miss Gould began her literary career by writing for periodicals. She published "Poems" (Borion, 1832); "Epistles to Young Poe[l...]

Gould, Emily Bliss, philanthropist, b. about 1825; d. in Perugia, Italy, 31 Aug., 1875. She was the wife of Dr. Gould, physician to the American legation. Mrs. Gould founded the American schools in Rome, and assisted in establishing those of Florence. Her labors were begun after the inundation of the Tiber, 31 Dec., 1870, which was the cause of much distress, and especially in March, 1871. Mrs. Gould opened a home and school for the poorer class of Italian children in a room lent by a Vaudois clergyman. She had no teacher, and only three little girls for scholars. Owing to generous contributions, at the time of her death there were two thousand in the kindergarten. Her main purpose was to secure to these children means of obtaining a living for
themselves. Among the trades that of printing was proposed as adapted to this end, as the increasing number of books and newspapers in Italy would demand good printers. In the winter of 1832, it was supposed that the work should be prepared by the authors living in Rome at that time. Printed at the home, and sold for its benefit. Among the contractors were Matthew Arnold, Mary Cowden Clarke, William W. Story, William and Mary Howitt, Howard M. Ticknor, and George P. Putnam. In Boston, in November, 1832, and after the death, when it was printed at the home under the title of a "Wreath to the Memory of Mrs. Emily Bliss Gould."

GOULD, James, jurist, b. in Branford, Conn., 5 Dec. 1779; d. in Litchfield, Conn., 11 May, 1838, Richard, his great-grandfather, came from Devonshire to Branford about 1700. James was graduated at Yale in 1791, and was a tutor there in 1793-3. In the latter year he entered the law-school at Litchfield, Conn., and after his admission to the bar became in 1799 associated with its founder, Judge Reeve, as professor in that institution. He was raised in 1816 to the office of judge of the supreme court of Connecticut, from which he was displaced in 1818 by the adoption of the new constitution. In 1820 Judge Gould took the supreme court school, and after the death of Judge Reeve, in 1823, continued to conduct it till 1833. He published "Principles of Pleading in Civil Actions" (New York, 1832; new ed. by Franklin F. Hear, Albany, 1867).--His son, Edward Sherman, author of "Law for Youth," and "A New World," in 1806; Mr. James married in New York, 21 Feb., 1885, was an early contributor of tales to the "Kickerbecker Magazine," to the "New World," the "Mirror," the "Literary World," and other journals. His signature of "Apostles" in Charles King's "America" was one of the best known. In 1886 he lectured before the New York mercantile library association on "American Criticism in American Literature," in which he opposed the prevalent spirit of ultra- admiration as injurious to the interests of the country. "Translations of Thucydides' "Travels in Egypt and the East" (1839); Dupuy's "Progress of Democracy" (1841); Balzac's "Eugénie Grandet" (1841), and "Père Goriot" (1842); and Dumas' "Impressions of Travel in Switzerland," Victor Hugo's "Handsomes Peppin," and A. Royer's "Charles de Bourbon" (1843-35). In addition to contributing to many literary and theological journals, he wrote "The Sleep Rider; or, the Old Boy in the Omnibus, by the Man in the Clay-clored Coat," and a parody on a report made to the legislature regarding a riot which the police had failed to suppress (1842). He signed himself "The Man in Claret," and the work made a sensation in literary circles. Besides the foregoing, he published "Abridgment of Alison's History of Europe" (New York, 1833); "The Very Age," a comedy (1850); "John Doe and Richard Roe; or, Epic of Litchfield," New York, 1862; and "The English, or Popular Errors in Language" (1867); "Classical Education" (1867); and "Supplement to Ducquigny's History of the New World" (1871).

Another son, John W., author, b. in Litchfield, Conn., 5 Nov., 1814; d. at sea, 1 Oct., 1888, took a long cruise on the coast of South America; was a masterful writer of tales and sketches connected with the sea, some of which, entitled "Forecastle Yarns," were published in 1843 in the "New World Press," and afterward issued in book-form. A second edition, containing these, accompanied by a biographical sketch, and his journal of the voyage on which he died, was issued by his brothers for private circulation, under the title "John W. Gould's Private Journal of a Voyage from New York to Rio Janeiro" (New York, 1854). GOULD, James, jurist, b. in Roxbury, Delaware co., N. Y., 27 May, 1836. His early years were spent on his father's farm, and at the age of fourteen he entered Hobart academy, New York, and kept the books of the village blacksmith. He acquired a taste for mathematics and surveying, and on leaving school he took on the same occupation and conducted surveys for a map of Ulster county. The accuracy of this work attracted the attention of the late John Delafield, who applied to the legislature for aid in the completion of a topographical survey of the entire state by Mr. Gould. Mr. Delafield died before any material progress was made, and Mr. Gould undertook to make the surveys unaided. During the summer of 1833 he completed a survey of Albany county, and surveyed and mapped the village of Cohoes, and in the following year made the survey and map of Delaware county, and organized and despatched parties to survey Lake and Geauga counties, Ohio, and Oakland county, Mich. From these surveys he accumulated $5,000. He published a "History of Delaware County" (1836), and while projecting other surveys was prostrated with typhoid fever, which caused him to seek the acquaintance with Zadock Pratt, who sent him into the western part of the state to select a site for a tannery. He chose a fine hemlock grove, erected a saw-mill and blacksmith-shop, and with Mr. Pratt was soon doing a large lumbering business. Subsequently he bought out Mr. Pratt's interest and conducted the business alone till just before the panic of 1857, when he sold out his entire plant. In 1857 he became the largest stockholder and a director in the Stroudsburg, Pa., bank. Shortly after the crisis he bought the bonds of the Rutland and Washington railroad at ten cents on the dollar, abandoning every other interest and putting all his money into railroad securities. For a long time he was president, treasurer, and general superintendent of this company. He brought about a consolidation of small large road, and with the proceeds removed to New York city in 1859, established himself as a broker, and invested heavily in Erie railroad stock. He entered the directory of that company and became president, holding the office till the reorganization of the directory in 1872. He next made large purchases of the stocks of the Union Pacific, the Wabash, the Texas Pacific, the St. Louis and northern, the Missouri Pacific, and the Missouri, Kansas, and Texas railroad companies, taking the latter out of the hands of its receiver. He also invested deeply in the stock of the Atlantic and Pacific telegraph company, and on its consolidation with the Western union he organized the American union (1879), which was merged into the Western union in 1881. In December, 1880, official records showed that Mr. Gould was in control of 10,000 miles of railroad, or more than one tenth of the entire road of the country. Early in 1881 he became interested in the elevated railroad system of New York city. A doubt having been cast upon his financial standing, he summoned several gentlemen to his private office on 13 March, 1882, and spread before them for example he had a piece of stock of the value of $53,000,000, all in his own name, and offered to produce $20,000,000 more, if desired. In March, 1887, Mr. Gould purchased a controlling interest in the St. Louis and San Francisco railroad company, which has an aggregate mileage of nearly 900 miles, and is a joint owner with the Atchison,
GOULD, John Stanton, philanthropist, b. in 1810; d. in Hudson, N. Y., 8 Aug., 1874. He was a member of the Society of Friends, had received a thorough education, especially in physical science, and was well known as an industrious student and a popular expositor of physical and scientific subjects. He had an admirably conducted farm in Columbia county, N. Y., and took an active part in agricultural improvement. He was for several years president of the State agricultural society, and did much to advance its interests. He was also an earnest temperance advocate, and though in earlier years a Whig, and a member of the assembly from that party in 1846, and subsequently acting generally with the Republicans, he held his temperance principles above party allegiance, and was recognized as a Prohibitionist. He was much interested in the subject of prison reform, and was for many years one of the directors and executive officers of the New York prison association.

GOULD, Nathaniel Duren, musician, b. in Chelmsford (now Bedford), Mass., 26 March, 1781; d. in Boston, Mass., 26 May, 1864. His name was originally Durance. He was graduated in 1806, in honor of an uncle, who adopted him in 1792 and left him his estate in 1808. His father, Reuben Duren, was distinguished as a builder, and received a premium for the model of a bridge over the Merrimack at Pachaug Falls. His son exhibited a talent for partnership, and enlarged many public documents and engraved title-pages for books. At the age of eleven he removed to the home of his uncle in New Ipswich, N. H., where in 1804 he was instrumental in forming the first military society in that part of the state. In 1806 he studied vocal music under Dr. Reuben Emerson, and at the age of sixteen taught in the public schools. In 1798 he established his first singing-school in Stoddard, N. H., and for twenty years conducted singing-schools in New Hampshire and Massachusetts. About 1807 he published the first minstrel musical piece in the United States. Another musical society was formed, of which he was conductor for several years. This society published the “Middlesex Collection.” He removed to Boston in 1819, and taught vocal music and chirography there and afterward in New York for ten years. He then returned to Boston, and passed the rest of his life as a professional penman. He aided in compiling several hymn- and tune-books and anthems for church choirs, and composed several tunes, among which is “Woodlawn.” His principal work is a “History of Church Music” (Boston, 1833). Previous to this he had published in Boston “Companion to the Psalmist”; “National Church Harmony”; “Sabbath-School Harmony”; “Social Harmony”; “Sacred Minstrel”; “Beauties of Writing”; “Writing-Master’s Assistant”; and “Progressive Penmanship.” His son, Angustine Duren, naturalist, b. in New Ipswich, N. H., 23 April, 1805; d. in Boston, Mass., 15 Sept., 1866. He was graduated at Harvard in 1825, and at the medical department in 1830. He followed his profession in Boston with great success, and in 1856 was appointed visiting physician to the Massachusetts general hospital. Meanwhile he became a devoted student of natural history, and for two years taught botany and zoology in Harvard. He made a specialty of conchology, and stood pre-eminent in that branch of science, both at home and abroad. When Sir Charles Lyell visited the United States, in order to pursue his geological investigations, he immediately sought the aid of Dr. Gould as a co-worker. In 1846 the shells collected by the Wilkes exploring expedition were submitted to him for examination, and a number of the shells collected by Capt. Ringgold and Capt. Rogers were reported on by him. Dr. Gould was also a student of vital statistics, and contributed papers of great value to nearly every volume of the registrar-general of Massachusetts. He was a fellow of the American academy of arts and sciences, the American philosophical society, and one of the original members of the National academy of sciences. In 1845 he delivered the annual address, entitled “Search out the Secrets of Nature,” before the Massachusetts medical society, and was its president from 1864 till his death. He was also one of the founders of the Boston society of natural history. He was a large contributor to periodicals, and his publications in book-form include a translation of Lamarck’s “Genera of Shells” (Boston, 1833); “A System of Natural History” (1835); “Report on the Invertebrata of Massachusetts” (Cambridge, 1839); “Mollusca and Shells” (Washington, 1846); “Principles of Zoology,” with Louis Agassiz (Boston, 1848); Dr. Amos Binney’s “The Terrestrial Air-breathing Mollusks of the United States and Adjacent Territories of North America,” edited by A. N.℃. S. in 1845; and “The Invertebrata of New Ipswich, New Hampshire,” with Frederic Kidder (1852); “The Mollusca of the North Pacific Expedition” (Washington, 1869); and “Otid Conchologia,” consisting of descriptions of new species of shells, with notes on changes in their nomenclature (Boston, 1840). Another work of his, “The Mollusca of the North Pacific Expedition” (Washington, 1869), was published, b. in Ipswich, N. H., 2 Feb., 1807; d. in Boston, Mass., 17 Jan., 1875, became a member of the publishing firm of Gould, Kendall and Lincoln in 1853. The title of the firm was changed in 1859 to Gould and Lincoln, and Mr. Gould remained a partner in it until his death.

GOULD, Thomas R., sculptor, b. in Boston, Mass., in 1818; d. in Florence, Italy, 26 Nov., 1881. In his early life he was engaged with his brother in the dry-goods business, and was an active member of the Boston mercantile and musical societies. He later devoted himself to art until in later life. His only master was Seth Cheney, in whose studio he modeled his first figure in 1851. He followed his profession in Boston until 1880, and among the works that he produced were two colossal heads, “Christ” and “Satan,” both of which were exhibited at the Boston Athenaeum in 1883, but afterward removed to Mr. Gould’s studio in Florence. James J. Jarves, in his “Art Thoughts,” mentions the “Christ,” in its character of an opposing conception to “Satan,” as “one of the finest ideals in modern sculpture.” Previous to the civil war, Mr. Gould had acquired a moderate fortune, which he lost in the exigencies of the succeeding crisis. In 1868 he went to Italy, and settled with his family in Florence, where he devoted himself to study and work. One of his most celebrated statues is “The West Wind,” in marble, which has been several times reproduced, and was brought into special prominence in 1874, through a charge that it was a reproduction of Canova’s “Hebe,” with the exception of the drapery, which was modeled by Signor Mazzoli. An animated newspaper correspondence followed this charge, and it was proved groundless. Mr. Gould declared that his designs were entirely his own, and that not a statue, bust, or medallion was allowed to leave his studio until finished in all points on which depended their character and expression. A copy of the “West Wind” was at the
Centennial exhibition, Philadelphia, in 1876. He returned to Boston in the spring of 1878. Among Mr. Gould's works were licensed in Portrait busts, including one of Emerson, now in Harvard university library; one of John A. Andrew, belonging to Mrs. Andrew; one of Seth Cheneys, owned by John Cheneys, of Connecticut; and one of the elder Booth. In statue he has produced "Cleopatra," a Miss "Catherine Money," and a portrait statue of "John Hancock," which was exhibited at the centennial celebration of the battle of Lexington in 1875, and is now in Lexington town-hall. His portrait statue of John A. Andrew, a commission from the soldiers of the Grand army of the Republic, was painted beside the statue of that statesman in the Hingham cemetery, Massachusetts, in 1875. In 1879 Mr. Gould visited Boston, and exhibited "The Ghost in Hamlet," a front view of a head in alto-rilievo. The two alti-rilievi representing "Steam" and "Electricity," which rank the vestibule of the Boston "Herald" building, were among his latest works.

GOULD, Walter, artist, b. in Philadelphia in 1829. He studied drawing and perspective under J. R. Smith, and painting under Sully. He became a member of the artists' fund society of Philadelphia in 1846, working there and in Fredericksburg, Va., where he painted a large number of portraits, nearly all of which were destroyed during the civil war. He removed to Florence in 1849, spent some months of study in Paris, and made occasional sketches in the south. His works are generally oriental, and illustrate principally the habits and customs of the Turks. In 1861 he visited Asia Minor, lived with and painted portraits of the imprisoned governor of Kosuth, and many other prominent men. He also visited Constantinople, and painted besides the graves of that persons there. "An Eastern Story-Teller," painted for the collection of Matthew Baird, of Philadelphia, is regarded as his most valuable work.

GOULDING, Thomas, clergyman, b. in Midway, Ga., 14 March, 1798; d. in Columbus, Ga., 26 June, 1848. He was educated at Wabash, Conn., and studied law with Judge David Daggett in New Haven, but determined to devote himself to the ministry, and was the first licentiate of the Presbyterian church in Georgia that was born in the state, and had been licensed. Wrote a life he preached in White Bluff, and was ordained as the regular pastor of the church there on 1 Jan., 1816. In 1822 he removed to Lexington, Oglethorpe co. On the establishment of a theological seminary by the synod of South Carolina and Georgia, he was appointed its only professor, and taught a class in theology in connection with his pastoral work. At the end of a year the seminary was transferred to Columbia, S. C., and he was professor of ecclesiastical history and church government until January, 1833, when he took charge of the church at Columbus, Ga. He was many years president of the board of trustees of Oglethorpe university.—His son, Francis Robert, author, b. in Midway, Ga., 28 Sept., 1810; d. in Roswell, Ga., 22 Aug., 1881, was graduated at the University of Georgia in 1830, and at the Presbyterian seminary of that city in 1833. His life was devoted to the ministry until the failure of his health in 1865, when he applied himself to literature. Before this he had published "Little Josephine," a Sunday-school story (New York, 1837), and "Robert and Harold," or the Young Mariners on the Florida Coast," a story of adventure for boys (Philadelphia, 1852). The latter attained great popularity in the United States and Great Britain, where it was reprinted by six different publishers. An enlarged edition of it was published in Paris, and was translated into Polish in Philadelphia in 1866. After retiring from the pulpit he published "Marooner's Island" (Philadelphia, 1889); "Frank Gordon" (1869); "Fishing and Fishes"; "Life Scenes from the Gospel History"; and "Woodruff Stories" (1870).

GOULEY, J. William, M.D., physician, b. in New Orleans, La., 11 March, 1832. His parents were of French origin. He received a classical education, and was graduated M. D. at the College of physicians and surgeons in New York city in 1853. He then established himself in practice in that city, and performed operations in surgery, such as excising half of the lower jaw, the entire radius, and the entire lower jaw. In 1856 he was professor of anatomy in the Vermont medical college at Woodstock. In 1859 he became attending physician at Bellevue hospital, New York City. In 1851 he was an assistant surgeon in the U.S. Army. In 1864-6 he was demonstrator of anatomy and instructor in histology and in operative surgery in the medical department of the University of New York, in 1866-71 professor of clinical surgery, and in 1876 was reappointed. He has published various papers, and a volume on "Diseases of the Urinary Organs" (New York, 1873).

GOUPIL, Rene, French missionary, b. in Angers, France, in 1807; d. in Smith's Island, near Westport, Mass., 19 Sept., 1825. He was known in his native town as "the good Rene." He studied to be a physician, but left the profession to become a novice of the Society of Jesus. He was forced by ill-health to leave the novitiate, and then became a "monseigneur" of the society—that is, one who gives his life to the service of the society. In 1820 he was appointed a missionary to the Hurons. He himself attempted to return from Canada, accompanied Father Jougues on his return from Quebec to St. Mary's of the Hurons in August, 1642. The fathers of canoes, in one of which they sailed, reached the Indians. He had been given three leagues from the place where the Hurons were killed by Mohawks in ambush. During the panic that ensued Father Jougues and Rene could have escaped from the Mohawks, who were wholly intent on securing their Huron and Jesuit brethren; but they, however, in order to be near the captives, Goupl was cruelly beaten by his captors, and dragged from village to village for seven days, witnessing the deaths, one by one, of the Huron Christians. He was engaged in constant prayer during the whole agony, and in the middle of his torments instructed the young Indians to make the sign of the cross and to pray. This infuriated the savages still further, and finally, while in the act of teaching an Indian girl to make the sign of the cross, near the village of Andagogor, he was killed by a young Mohawk. Miracles are said to have attested his sanctity, and his name occurs in the list of martyrs recommended for canonization by the plenary council of Baltimore held in 1884.

GOURGUES, Dominique de, French soldier, b. in Mont-de-Marsan, France, in 1557; d. in Tours, France, in 1598. In the Italian wars, under Marechal de Strozzi, was captured by Spaniards in 1557, and then by the Turks, and served several years in the galleys. After his return to France he made a voyage to Brazil and the West Indies, and then entered the service of Lorraine, and was employed against the Huguenots. The massacre by Pedro Menendez d'Aviles of the French colonists who had estab-
lished themselves on the St. John's river in Flori-
da, and there built the Caroline fort, or Fort
Charles, aroused indignation in France among
Patriots. The king sent complaints to the Spanish court, but Moncey
and his associates, instead of being punished for the
deed, received rewards and honors. Capt. de
Gourgas, embittered by the cruelty and indignity
that he had received from the Spaniards, deter-
mined to avenge the death of commons and con-
stant companion patriots, though he was himself a Catholic. He
sold a part of his estate, fitted out an expedition,
and sailed from France on 23 Aug., 1567, with one
small and two large vessels, with a commission to
capture slaves at Benin. The real object of the
expedition was not disclosed even to the soldiers
who joined it. Arriving there, after a fight with
some negro chiefs, he gained possession of the har-
bors, and sailed away with a cargo of slaves for the
West Indies. At Puerto de la Plata, in Santa
Domingo, one of his Spanish customers furnished him
with a pilot for the coast of Florida. His force
consisted of 150 arquebusiers, who volunteered
from among the nobility and commonalty of Gas-
cony, and 80 sailors who could serve as soldiers.
According to the romantic French account of the
expedition, he did not declare his intention until
they were on board. His squadron passed two batteries at the entrance of the St.
John's river, being taken for Spanish vessels, and
anchored at the mouth of the St. Mary's. The
survivors of the former expedition had fled into
the wilderness rather than trust themselves to the
mercy of the bloodthirsty Menendez, who had at-
tached placards to the murdered Huguenots with the
inscription, "Not as Frenchmen, but as heres-
ities." They had made friends with some of the
Indians, and were protected by Saturiba, the only
cannibal of the tribe. His white men were
beheaded, and his island became another Huguenot
island. Gourgas, at the head of his small band,
stepped ashore and invited the Indians to join him
in the enterprise. They received him cordially,
and he gained possession of the island. He
then crossed to the mainland, and occupied the
country. Gourgas then went to the coast of Florida,
and was received with open arms by the Spaniards,
who had heard of his exploits. He was
received as a hero, and was made governor of the
province. He was appointed commander-in-chief of the
province, and was made a deputy in the
national assembly. He was a lieutenant-
general, and commanded the vanguard of Laffay-
ette's army when he was killed.

GOUVION, Jean Baptiste, French soldier, b.
in Troyes, 8 Jan., 1747; d. near Grisselle, 11 June,
1792. He was an officer of engineers in the French
army, came to America in 1777, served on the staff of
Lafayette, was appointed major and afterward
lieutenant-colonel of engineers, and received a pen-
sion for services at Yorktown. He returned to
France at the end of the war, became adjutant-
general in 1787, and major-general in the national
guard in 1789. In 1792 he was a deputy to the
national assembly. He was made a lieutenant-
general, and commanded the vanguard of Laffay-
ette's army when he was killed.

GOVE, William Hazeltine, politician, b.
in Ware, N. H., 10 July, 1817; d. there, 11 March,
1876. He received the degree of A. M. at Harvard
in 1839, and the degree of LL. D. at Amherst
in 1854. He was a member of the Free-soil
convention, held in Buffalo, N. Y., in 1848, and
was a candidate of his party for the office of
reelector, in 1854, and in 1855, by a combination of Free-soilers
and Whigs, he was elected. He was re-elected in
1852 and 1855. After the Free-soil organization
was merged in the Republican party, Mr. Gove was
for many years an active Republican. During the
campaign of 1872 he was a delegate to the Liberal Repub-
lican convention at Cincinnati, and acted thence-

reprinted in French's "Historical Collections of
Louisiana and Florida" (New York, 1869).
forth with the Democratic party, which elected him to the state senate in 1873-4. In the latter year he was made its president. As a young man Mr. Gove was engaged in the Washingtonian temperance movement, and spoke and wrote eloquently in aid of the cause. He edited for a short time the "Temperance Banner," published at Concord, N. H.

Gowan, James Robert, jurist, b. in County Wexford, Ireland, 22 Dec., 1817. His parents emigrated to Canada in 1821. The son studied law, was admitted to the bar in 1839, and in 1843 was elected judge of the judicial district of Simcoe, Upper Canada. He became associate judge of Queen's bench and common pleas in 1857, and chairman of the board of county judges, which regulates the procedure of the division courts. He aided in preparing the bills to make the criminal law uniform in Canada, embodying a consolidation of the criminal laws in force in the several confederated provinces, with valuable additions and improvements in procedure, which were enrolled on the statute book of 1859, and are now in force. In 1873 he was one of the royal commissioners to investigate charges against the ministry in connection with the Canada Pacific railroad contract. When the consolidation of the statute law for Ontario was determined in 1876, Judge Gowan was appointed by a commission issued for that purpose, and rendered important service, for which he received a gold medal from the government of Ontario. He retired from the bench in 1885. He has been interested in educational matters, serving as chairman of the board of public instruction from its foundation, and for many years as chairman of the senior high-school board of the county of Simcoe. He was appointed to the senate in 1883. In 1853 he established the first legal periodical in his province, "The Upper Canada Law Journal," to which he was a frequent contributor. The degree of LL. D. was conferred upon him by Queen's college in 1883. "The Addresses and Proceedings in Connection with the Retirement from the Bench of His Honor Judge James Robert Gowan," with selections from printed works during his career, have been published for private circulation (1884).

Gowan, Ogle Robert, member of the Canadian parliament, b. in County Wexford, Ireland, in 1796; d. in Toronto 21 Aug., 1876. His father, Capt. John Hunter Gowan, of Mount Nebo, was a leading officer in the American Revolution, and distinguished himself in combating the Irish rebellion of 1798. In early life he edited the "Antidote," a newspaper in Dublin. He removed to Canada in 1828, residing for a time in Esquimalt, Ontario, and subsequently in Toronto. During the rebellion of 1837 he was appointed captain in the Leeds militia, and was present at the capture of Hickory island, near Kingston, in 1838. In the same year he was appointed lieutenant-colonel of militia. At the engagement between the British troops and the invaders, at "the Windmill," near Prescott, in November, 1838, he commanded the right wing of the British forces, and was three times wounded. For his bravery on that occasion, Lieut.-Col. Gowan was thanked in the military general orders, and by a general order of 4 Dec., 1838, his regiment, as a mark of distinction, was made the "Queen's Royal Borderers." He was subsequently appointed to the command of 24 regiment of Leeds militia, and during the McKenzie-Papineau rebellion of 1837-9 he was designated "the right arm of British power in America," being the head of a most powerful body of loyal men organized and sworn to support British supremacy. For twenty years he was the grand master of the Orange lodges of North America, of which he was the founder. He was a member of the Canadian parliament from 1854 till 1841, and was an ardent supporter of the administrations of Lords Seaton, Metcalfe, and Cathcart. Mr. Gowan as a post-office inspector, and afterward a license officer in Toronto. He was the author of "Annals of Orangeism" and "Orangeism: Its Origin and History."
first book-catalogue was issued in 1842, his last one, No. 28, in 1870. These brochures were interspersed with valuable notes on books, and remarks on noted persons with whom the author had come in contact. Among his friends were Bennett, Forrest, Fanny Kemble, Halleck, Macdonald Clarke, the mad poet, Poe, and Simms. Gowans's stock of books at the time of his death numbered nearly 300,000 volumes, and were disposed of by auction. The catalogue was in sixteen parts, containing 2,295 pages of text. His first grand jury, in 1843, and he ended 5 Feb., 1872, lasting for about a month in each season. His funeral discourse was delivered by the Rev. John Thompson, D.D., and memorial sketches were written by his friend and physician, Dr. Samuel S. Purple, and the Rev. S.T. Prime, D.D., of the "New York Observer."

GOWEN, Franklin Benjamin, railroad manager, b. in Philadelphia, Pa., 9 Feb., 1836. He was educated at Emmitsburg, Md., and in a Moravian school at Lititz, Pa. In 1858 he entered into the business of mining coal, which he soon abandoned, and began the study of the law. He was admitted to the bar in 1860, and began practice in Schuylkill, rising to distinction in his profession. In 1863 he was elected district-attorney of Schuylkill county. On resuming his general practice at the bar, he was returned to the House of Representatives, and became member of the Girard railroad, and of the Girard coal-trusts, in connection with their large interests in the mining region. In 1869 he was chosen to the presidency of the former company, and filled the office until 1881, when, because of opposition to his plans for the improvement of the road, he was defeated for re-election. But he was again chosen in 1882. In 1872 he was elected a member of the Constitutional convention of Pennsylvania, and in this body ranked as one of its ablest members. Mr. Gowen conceived and established the Philadelphia and Reading coal and iron company, which is probably the largest land and mining company ever organized in this country. To him is also due the honor of being the one who conceived and put in operation the movement against the famous organization known as the "Black Hand," which had previously a reign of terror in the coal region, extending over a period of twenty years, and which the machinery of the law had been unable to suppress. In the trials which followed this movement in 1872, Mr. Gowen was one of the counsel for the Commonwealth. He is an orator of force and eloquence, and has been eminent as a financier and railroad manager. His argument in the case of the State vs. Thomas Munley (one of the Molly Maguire trials) has been published (Pottsville, Pa., 1876).

GOYENCHE Y BARRERA, José Manuel (go-yay-nay-chay), count of Guauqi, South American soldier, b. in Arequipa, Peru, 13 June, 1775; d. in Madrid, Spain, 15 Oct., 1846. He entered the military service as a cadet in the organized military, and in 1793 was lieutenant of the cavalry of Caracas. He left Spain in 1795, and in 1803 was sent to the different countries of Europe, to study the progress of military tactics and their application for the defence of Spain. On his return he rose to the rank of brigadier, and after the entry of the French into Madrid was appointed by Soult to Magenta, where he had the command of the French domination, but on his way espoused the cause of Ferdinand VII. In 1809 he was appointed captain-general and president of the audiencia of Peru, and in that year marched against the revolutionists and defeated them, 25 Oct., near La Paz. After the declaration of independence in Buenos Ayres, 25 May, 1810, Goyeneche marched against the republican forces of that province, reconquering the whole upper part of it. He subsequently won other battles, but his lieutenant, Tristan, was defeated, Bennet, Forrest, Fanny Kemble, Halleck, Macdonald Clarke, the mad poet, Poe, and Simms. Gowans's stock of books at the time of his death numbered nearly 300,000 volumes, and were disposed of by auction. The catalogue was in sixteen parts, containing 2,295 pages of text. His first grand jury, in 1843, and he ended 5 Feb., 1872, lasting for about a month in each season. His funeral discourse was delivered by the Rev. John Thompson, D.D., and memorial sketches were written by his friend and physician, Dr. Samuel S. Purple, and the Rev. S.T. Prime, D.D., of the "New York Observer."

GRAEME, Thomas, physician, b. in Balgowan, Scotland, 20 Oct., 1888; d. in Graeme Park, near Philadelphia, Pa., 4 Sept., 1772. He came to this country in 1717, in the company of Sir William Keith, lieutenant-governor of Pennsylvania. Having previously studied medicine, shortly after his
arrival he entered on its practice in Philadelphia, occupying a prominent place in his profession throughout his life. In 1727 he was appointed naval officer at Philadelphia, was again chosen in 1741, and continued to fill the office for over twenty years thereafter. In February, 1729, he became a member of the provincial council, in which capacity he served several years, in 1749 he was chosen the first president of St. Andrew's society, and in 1751-3 was physician to the Pennsylvania hospital, of which charity he was one of the founders. He was one of the early members of the American Philosophical society of Philadelphia.

GRAFF, Frederick, engineer, b. in Philadelphia, Pa., 27 Aug., 1715; d. there 13 April, 1847. His early life was devoted to the trade of a carpenter, and he acquired skill as a draughtsman. When twenty years old he met with an accident, and was received by B. Latrobe, as his assistant engineer, in erecting the first water-works in Philadelphia, which were in Centre square, the site of the present city-hall. On 1 April, 1803, he was elected superintendent and engineer of the works. These proved to be wholly inadequate after several years of trial, and in 1811 he recommended Fairmount as the proper place for the water-works, and was intrusted with their construction. At this time the pipes were made of wood, but he devised the iron-pipe system which is now universally used. He brought the works to perfection, and patterns of his fire-plugs and stop-cocks were sent to England. His experience and ability now became acknowledged throughout the country, and he supplied detailed information to about thirty-seven corporations in the United States, including New-York, Philadelphia, and Baltimore; he was engaged for forty-two years in the service of the city of Philadelphia, and a monument to his memory is erected in the grounds at Fairmount water-works. In 1822 the city water committee sent him a resolution of thanks, and he was presented with a silver vase. In 1825 he was invited to be a member of the water committee "as a testimonial of respect for his talents and zeal effectually displayed in overcoming unforeseen difficulties encountered in the construction of the northeast reservoir at Fairmount."

GRAFF, John Michael, Moravian bishop, b. in Saxe-Merlingen, Germany, 28 July, 1714; d. in Salem, N. C., 28 Aug., 1782. He was graduated at the University of Jena, came to this country in 1751, and served for two years as an itinerant evangelist in Pennsylvania and the neighboring colonies. After this he took charge of the Moravian church at Nazareth, Pennsylvania, where he labored until 1761. During the French and Indian war Graff displayed no little prudence in caring for the safety of his parishioners. On several occasions hostile bands of the savages came into the neighborhood of Nazareth, but never ventured to attack the town. From Nazareth he was transferred to the new Moravian settlement in North Carolina, where, in 1778, he was appointed a member of the southern governing board, and on 6 June of the same year consecrated to the episcopacy. In this capacity he was long trying to stabilize the Moravian church, and he labored with great zeal and courage until his death.

GRAFENRIED, de, pioneer, lived in the 17th and 18th centuries. During the settlement of Carolina by the Palatines, fugitives from the Rhine and Neckar, the Tuscarora tribe of Indians became quite hostile at the new-comers. Graffenried, who had undertaken the charge of establishing the exiles, accompanied by Lawson, the surveyor-general of the northern provinces, ascended the Neuse river in 1711 to discover how far it was navigable, and also to explore the neighboring country. They were seized by a party of sixty well-armed Indians and taken to a village of the Tuscaroras, where a council was assembled. Complaints were made of the conduct of the settlers in Carolina, especially that of Lawson, who had divided the women and children among his party. They charged him with being "the man who had sold our land." After a discussion of two days, the death of the prisoners was decreed. A fire was kindled, a ring formed around the victims, and the council assembled. Behind the ring the two rows of chiefs, about 300 Indians were dancing. No reprieve was granted to Lawson, but after five weeks Graffenried was permitted to return through the woods on foot to the settlements, after promising to occupy no land without the consent of the tribe.

GRAFTON, Edward C., naval officer, b. in Boston, Mass., d. in New York city, 24 June, 1856. His father, Joseph, rose to the rank of major in the regular army, won distinction in the war of 1812, and afterward became surveyor of customs in Boston. The son entered the navy as midshipman in 1841, and in 1846 was commissioned lieutenant, 15 Sept., 1855; lieutenant-commander, 16 July, 1862; commander, 20 Dec., 1866, and was retired, 18 Jan., 1871. At the time when the Confederate ram "Merrimac" attempted to raise the blockade, Lieut. Grafton was flag-officer of Fort Morgan, Mobile bay, then lying near the mouth of the James river. In the engagement that followed in Hampton Roads he played an active part. On being commissioned lieutenant-commander he was placed in command of the steam gun-boat "Genesee," and participated in the bombardment of Fort Morgan. Mobile bay, in 1864. In 1866 he was in command of the "Gettysburg," of the North Atlantic squadron.

GRAFTON, Joseph, clergyman, b. in Newport, R. I., 9 June, 1757; d. in Newton, Mass., 16 Sept., 1806. His early education was confined to the elementary branches. He was licensed to preach as a Congregationalist, but in 1787, having changed his views, he united with the 1st Baptist church in Providence, R. I. Soon afterward he accepted a call to Newton, Mass., and was ordained as pastor of the Baptist church in that place, 18 June, 1788. Here he remained for nearly half a century. He was one of the best-known and most honored preachers of his denomination. He was for a time president of the board of trustees of the Newton theological institution.

GRAHAM, Charles Kinnaird, civil engineer, b. in New York city, 3 June, 1854. He was entered in the U. S. navy as midshipman in 1841, and served in the Gulf during the war with Mexico, at the close of which, in 1848, he resigned, returned to New York, and devoted himself for several years to the study of engineering. About 1857 he was appointed constructing engineer of the Brooklyn navy-yard, the dry-dock and landing-ways being built under his supervision. At the beginning of the civil war he volunteered in the National army, about 400 men in his employ in the navy-yard following his colors. The Excelsior brigade was organized, in which Graham subsequently became major and colonel. Throughout the early part of the contest he was actively engaged in the Army of the Potomac. In November, 1862, he was commissioned brigadier-general, and fought at the battle of Fredericksburg. The Excelsior brigade was wounded. He was afterward assigned to the command of a gun-boat flotilla on the James river under Gen. Butler, and was the first to carry the national
Graham, David, lawyer, b. in London, England, 1820; d. in Nice, France, 27 May 1859. At the time of his birth, Mr. Graham's father, an Irishman, was leaving Great Britain for political reasons. The son was educated partly at Columbia and partly under the supervision of his father, who, according to Prof. Charles Anthon, was one of the best scholars in the country. Young Graham studied law, and was admitted to the bar. During 1842 he served as counsel for General Custer. He was subsequently appointed, in conjunction with Archibald Loomis and David Dudley Field, "to revise, reform, simplify, and abridge the rules of practice, pleading, and evidence in the courts of record of the state of New York, under the constitution adopted 3 Nov., 1846. This was the forerunner of the present system of practice, and occupied Mr. Graham and his associates several years. He was successful in the war, especially in criminal cases. In the trial of Bishop Benjamin T. Onderdonk before the house of bishops in 1844, Mr. Graham, as counsel for the defendant, added greatly to his reputation. On the opening of the New York university in the spring of 1843, he was appointed professor of law and practice. Mr. Graham is the author of "Practice of the Supreme Court (of New York)" (New York, 1833). It passed through a second edition (1836), and he had finished revising the first volume of a third (1847) at the time of his death. He also published "New Trials" (1844; new ed., greatly enlarged, by D. Graham, Jr., and Thomas W. Watterman, 3 vols., 1856), and "Courts of Law and Equity in the State of New York" (New York, 1859). In addition to the above, he issued an annotated edition of Smith's "Chancery Procedure," with the second American edition of that work in 1842.

Graham, George, soldier, b. in Chester county, Pa., in 1758; d. near Charlotte, N.C., 29 March, 1828. His mother was left a widow with six children, and but slender means. The son emigrated to North Carolina, and was educated at the Queen's museum, Charlotte. When only seventeen, with a few others, he rode all night to reach Salisbury, and there seized two Tory lawyers, Dunn and Bothee by name, and carried them to Camden, S.C., where they were imprisoned, but subsequently sent for safe-keeping to Charleston as "persons inimical to the country." He served throughout the Revolutionary war, and on 3 Oct., 1780, was one of twelve who attacked and drove back a superior British force seven miles to the south of Charlotte. He was the manager of his own concern, near his residence, in attacking their foraging parties. After the declaration of peace he served several terms in the legislature, was for a long time clerk of the court of Mecklenburg county, became major-general of militia, and filled other responsible positions. He was father of James, b. in Chester county, Pa., 13 Oct., 1759; d. in Lincoln county, N.C., 12 Nov., 1836. At the age of seven he accompanied his widowed mother to North Carolina. He was educated at Queen's museum in New York, and later at Charlotte, and soon after the closing of the war he returned to the practice of engineering in New York city. He was brevetted major-general of volunteers 13 March, 1863. Among the enterprises with which he has since been connected are the Broadway pavement commission and the Beach Forestry tract company. General Graham was chief engineer of the dock department from 1873 to 1875, and surveyor of the port of New York from 1878 to 1883, when he became naval officer, and held that post until 1885.

James, lawyer, b. in Lincoln county, N.C., in January, 1793; d. in Rutherford county, N.C., in September, 1851, was graduated at the University of North Carolina in 1814, studied law, was admitted to the bar, and practised successfully in his native county for many years. Removing to Rutherford county, he served several terms in the legislature in 1822-9, and was elected to congress as a Whig, serving from 2 Dec., 1838, till 3 March, 1848, excepting from 25 March, 1838, to 5 Dec., 1838, when a Democratic house declared his seat vacant, although it was not given to his competitor. Mr. Graham was again chosen at a new election. He was also elected to the 29th congress, serving from 1 Dec., 1845, till 3 March, 1847, when he retired and devoted the remainder of his life to the practice of law in Hillsborough. He was father of James, b. in Hunter county, N.C., 5 Sept., 1804; d. in Saratoga Springs, N.Y., 11 Aug., 1875, was graduated at the University of North Carolina in 1829, admitted to the bar at Newbern, N.C., and began to practise law in Hillsborough. He was father of William Alexander, b. in Lincoln county, N.C., 5 Sept., 1804; d. at Brier Creek, 11 Aug., 1857, was graduated at the University of North Carolina in 1828, admitted to practice in 1833, and practised successfully in his native county for many years. William Alexander, senator, b. in Lincoln county, N.C., 5 Sept., 1804; d. in Saratoga Springs, N.Y., 11 Aug., 1875, was graduated at the University of North Carolina in 1829, admitted to the bar at Newbern, N.C., and began to practise law in Hillsborough. He was the eldest son of James.
to the U. S. senate to fill the vacancy occasioned by the resignation of Robert Strange, serving from 10 Dec., 1840, to 3 March, 1843. In 1844 he was elected governor by the Whigs on a larger vote than was ever before polled. He was re-elected in 1848 by an increased majority, but declined a third term, and retired to private life. He was offered the Spanish mision by President Taylor in 1849, but declined it, and in 1850 became secretary of the navy in Fillmore's cabinet, but resigned in 1852 in consequence of having been nominated by the Whigs for vice-president on the ticket with Gen. Scott. During term of office as secretary he projected and carried out the important expedition to Japan under Com. Perry. Gov. Graham served as senator in the 21st Confederate congress from 22 Feb., 1864, until the end of the war. He was also a delegate to the Union convention at Philadelphia in 1866, which was called to sustain the policy of Andrew Johnson. At the time of his death he was acting as one of a commission that had been appointed to settle the boundary dispute between the states of Maryland and Virginia.

Graham, George Rux, editor, b. in Philadelphia, Pa., 18 Jan., 1813. He was early intended for the bar, but the death of his father compelled him to relinquish this ambition, and he lived with his uncle in Montgomery county, Pa., where he employed every spare moment in reading. In 1832 he returned to Philadelphia and began to learn the trade of a cabinet-maker, meanwhile devoting six hours daily, after his work was completed, to literary pursuits. A few years later he was enabled to enter a law office, and in 1839 was admitted to the bar. He had already contributed a set of his papers to the Philadelphia press, which met with such favor that he was invited to become the editor of the “Saturday Evening Post,” and afterward was one of its proprietors. His relations with this journal continued until 1848. He purchased in 1839 a monthly called “Atkinson’s Casket,” which he published until 1841, when, uniting with it the “Gentleman’s Magazine,” he began the publication of “Graham’s Magazine.” This periodical attained a large circulation under his management, and its contributors included William C. Bryant, J. Fenimore Cooper, Henry W. Longfellow, Edgar A. Poe, and Bayard Taylor. For many years it was the best periodical of its kind published in the United States. In 1848 he purchased the “North American,” and in 1847 the “United States Gazette,” which he incorporated with the “North American.” Later he engaged in stock operations, losing thereby much of his money, and was compelled to part with the “North American” and the “Magazine.” But subsequently he regained control of the “Magazine,” and continued its publication until about 1871. He then lived by his pen, but failing health led to his being supported through the liberality of George W. Childs. At present (1885) he is an inmate of the New York ophthalmic hospital, where he is awaiting an operation for cataract on both eyes.

Graham, Isabella, philanthropist, b. in Lanarkshire, Scotland, 29 July, 1742; d. in New York city, 27 July, 1814. She was the daughter of John Marshall, who educated her carefully. In 1765 she married Dr. John Graham, a physician of Paisley, and accompanied him to New York, where she spent four years. Her husband was then ordered to the island of Antigua, where he died in 1774. Mrs. Graham returned to Scotland, but in 1789 came to New York city, and established a school for young ladies, in which for many years she was eminently successful. Before she left Scotland she had founded the Penny society, now known as the Society for the relief of the destitute sick, and she continued to labor in the same field in New York. Among the more important of the institutions established by her are the Widows and Orphans' asylum societies, the Society for the promotion of industry, and the first Sunday-school for ignorant adults. She also aided in organizing the first missionary society, and the first monthly missionary prayer-meeting in the city of her residence. She was the first president of the Magdalen society, systematically visited the insane and the sick female convicts in the state-prison, and distributed Bibles and tracts long before there was a Bible or tract society in New York. Her daughter, Joanna, who survived her, was the mother of the well-known author of the “Life and Letters” of Mrs. Graham (1816; last edition, London, 1838) more than 50,000 copies have been sold in this country, and many editions issued in England and Scotland. See “Letters and Correspondence,” selected by her daughter, Mrs. Bethune (New York, 1858); and Mrs. Graham's “Memoir of Isabella Graham,” published by the American tract society.

Graham, James Lorimer, consul, b. in New York city in January, 1835; d. in Florence, Italy, 30 April, 1878. He was partly educated at Amiens, France, where, on account of his precocious literary talent, he was selected to deliver a poetical address of welcome to Lamartine when the latter visited the school in 1848. Mr. Graham lived for a time in Rio Janeiro, and, after returning to New York, was a passenger in the steamer “Francisco” which founded in a gale off Cape Hatteras. His experience in this wreck injured his health and hastened his death. In 1856 he married and settled in New York, where he became widely known through his taste for art and literature and his brilliant conversational talents. As a member of the Century club, the Geographical society, and kindred institutions, he made the acquaintance of many artists and authors. He spent the years 1862–3 in Europe, and after remaining in New York until 1866 again went abroad. Meanwhile he had been busily engaged in acquiring whatever curiosities he had found in his travels, until he had large collections of coins, autographs, drawings, and books. Some time after his return to Europe, Mr. Graham was appointed U. S. consul-general for Italy, and resided in Florence. When the capital was transferred to Rome, he preferred to accept the office of a simple consul rather than change his home.

Graham, John, clergyman, b. in Edinburgh, Scotland, in 1804; d. in Woodbury, Conn., in December, 1774. He was a descendant of one of the marquises of Montrose. He was educated at Glasgow, and studied medicine. Coming to this country with emigrants from Londonderry in 1718, he first resided at Exeter, N. H., but afterward studied theology, and was ordained as the first clergyman of Stafford, Conn., in 1723. He obtained his dis-
missed in 1751 on the ground of insufficient support, and in 1763 he was called to the 2d church of Southbury, then Woodbury, where he spent over forty years. During the great New England revival of 1740 he was especially active. Mr. Greenalso, rector of St. James, against the Church of England in Connecticut (1829), a "Tract" on the same subject, and "A Rejoinder to Johnson's Answer." (See Chandler's "Life of Samuel Johnson.").—His son, Andrew, physician, d. in 1783, was a patriot of the Revolution, and represented New Haven in the legislature. In the battle of Danbury he acted as regimental surgeon, and in the engagement at White Plains, N. Y., was taken prisoner and was not released until the surrender of Gen. Cornwallis.

Andrew's son, John Andrew, advocate, b. in Southbury, Conn., 10 June, 1755; d. in New York city, 29 Aug., 1841, was admitted to the Connecticut bar in 1785, and at once removed to Rutland, Vt. He subsequently went on an unsuccessful mission to England to obtain the consecration of Bishop Peters from the English bishops, and on a second mission in 1791 he obtained the degree of LL. D. from the University of Aberdeen. After 1805 he resided constantly in New York city, and became well known as an able criminal lawyer. He published "A Descriptive Sketch of the Present State of London (1797); a volume of speeches (1812); and "Memoirs of Lord Chief Justice Kenyon, by John Horne Tooke; also, Proofs Identifying him as the Author of Junius" (New York, 1828).—John Hodgts, naval officer, son of John Andrew, b. in Vermont 9 March, 1794; d. in Newbury, N. H., 15 March, 1873, entered the navy as midshipman, 16 June, 1812, was promoted to be lieutenant, 5 March, 1817, and captain, 7 March, 1849. He was placed on the reserved list in 1855, and made commodore on the retired list, 4 April, 1867. He served in the war of 1812, and, while a midshipman under Com. Chauncey, Lake Ontario, was one of twelve officers who took part in an expedition against the British stronghold opposite Black Rock, N. Y. Nine of the party were killed or severely wounded. Among the latter was young Graham, who subsequently was compelled to submit to the amputation of a leg. In the engagement at Lake Champlain, 11 Sept., 1814, he had command of Com. McDonough's flag-ship. After the declaration of peace, Com. Graham was engaged in shore duty. John Lorimer, lawyer, another son of John Andrew, b. in London, England, 20 March, 1797; d. in Flushing, N. Y., 29 July, 1876, was admitted to the New York bar in 1821, and soon acquired a large practice. In 1834 he was appointed regent of the state university, and from 1840 till 1844 was postmaster of New York city. He occupied important offices in the state militia, and in 1861 received an appointment in the treasury department at Washington. He was elected to the council of the University of the city of New York, in which institution he founded a free scholarship.

Graham, John, diplomatist, b. in Dumfries, Prince William Co., Va., 2 June, 1779; d. in Washington, D. C., 6 Aug., 1820. He was graduated at Columbia in 1790, and emigrated to Kentucky, where he represented Lewis county in the legislature. He was then sent by President Jefferson to the territory of Orleans as secretary, and subsequently held a similar office in the American legation in Spain. During the time when James Madison was secretary of state, Graham was chief clerk under him. In 1818 he accompanied a commission to obtain political information in Buenos Ayres, and wrote an elaborate report, which was printed by the state department. He was next sent by President Monroe as minister to the court of Portugal, then resident in Rio Janeiro. His health gave way under the Brazilian climate, and he died soon after returning to Washington. His brother, George, also a secretairy in the war of 1812, in Dumfries, Prince William Co., Va., about 1772; d. in Washington, D. C., in August, 1830, was graduated at Columbia in 1790, studied law, and practiced in his native town. He afterward removed to Fairfax county, and raised and commanded the "Fairfax light infantry" in 1812. On the retirement of Gen. Armstrong from the war department after the burning of Washington, Graham was placed in charge as chief clerk. During the last two years of Madison's administration, and until relieved by John C. Calhoun in the first year of Monroe's term, he was acting secretary of war. In 1818, at Mr. Calhoun's request, he made a long and perilous journey to inspect a settlement which had been made by Gen. Lallemand, Napoleon's chief of artillery, with 600 armed colonists, at Orcogues Bluffs, on Trinity river. Finding the colony in a most distressing condition, he compelled them to submit to the authority of the United States and abandon their enterprise. On his return he became president of the Washington branch of the U. S. bank, which office he held until he was appointed commissioner of the land office in 1823, serving in the capacity of commissioner for the remainder of his life. While connected with the bank he was employed by the government to wind up the "Indian factorage" affairs, and in doing so is said to have saved the country not less than $250,000.

Graham, Henry Hale, jurist, b. in London, England, 1 July, 1781; d. in Philadelphia, Pa., 24 Jan., 1790. He came to this country with his father, William Graham, in 1783, and settled in Chester county, Pa. He became a lawyer, and was a man of large influence in the province. He held the office of recorder, recorder of county, and was at one time president of the several courts of Chester county, and from 1761 till 1789 was one of the judges of the courts of the county. During the latter year Delaware county was created, and he was commissioned president judge of its court of common pleas. In 1790 he was chosen a delegate to the constitutional convention of the state, and died during the sitting of the convention, which body, out of respect to his memory, adjourned, and sent three of their members to Chester to attend his funeral.

Graham, Sylvester, vegetarian, b. in Suffield, Conn., in 1794; d. in Northampton, Mass., 11 Sept., 1851. His father was an English clergyman, a graduate of Oxford, who came to this country and settled in Suffield. At nineteen years of age he began to teach, and continued as long as his health would permit. In 1823 he matriculated at Amherst with the intention of preparing for the ministry, but, having exhibited unusual powers of education, he was denounced as a "stage actor" and a "mad enthusiast," and did not complete the course. He, however, entered the Presbyterian ministry soon after his graduation, but, he was employed by the Pennsylvania temperance society as a lecturer, and while thus engaged he became convinced that the prevention and cure of intemperance would be best achieved by the adoption of a purely vegetable diet, which he supposed would take away the desire for stimulation. He subsequently applied this theory to all forms of disease. He published an "Essay on the Cholera" (1832); "Graham Lectures on the Science of Human Life" (2 vols., Boston, 1839); "Bread and Bread-making"; "A Lecture to Young Men on
Chastity," and "The Philosophy of Sacred History" (only one volume of which was completed).

**GRAHAM, William Montrose**, soldier, b. in Prince William county, Va., in 1798; d. in Mexico, 8 Sept., 1847. He was graduated at the U. S. military academy in 1817, and entered the army as lieutenant in the 1st artillery. Hereafter, he served in the various grades to be lieutenant-colonel of the 11th infantry in April, 1847. He served on recruiting duty, constructing military roads in Mississippi and in Florida, and in garrison until 1835. He took part in the campaigns against the Seminoles in 1836-38, being twice severely wounded. In the Mexican war he was engaged in the battles of Palo Alto, Resaca de la Palma, Monterrey, Contreras, Churubusco, and Molino del Rey, where he was killed while leading an assault on the enemy's works. His brother, **James Duncan**, topographical engineer, b. in Prince William county, Va., 4 April, 1799; d. in Boston, Mass., 25 Dec., 1863, was graduated at the U. S. military academy in 1817, and became lieutenant of artillery. He was promoted several steps in this arm of the service, and, in 1839, was assigned to topographical duty, but it was not until 1829 that his specialty was recognized. He was then brevetted captain and afterward major, that he might enter the corps of topographical engineers, receiving the full commission of major in 1838. In 1839-40 he was lieutenant of engineer of the United States army in Texas. In 1839, the army of the United States established the boundary-line between the southern and the then new republic of Texas. In 1840 he was appointed commissioner for the survey and exploration of the northeastern boundary of the United States, and was employed along the Maine and New York frontiers until 1843. In the same year he was ordered to duty as an astronomer on the part of the United States for the joint demarcation of the boundary between the United States and the British provinces, under the treaty of Washington. He was then employed during the Mexican war. In conclusion he was brevetted lieutenant-colonel, the commission reading, "for valuable and highly distinguished services, particularly on the boundary-line between the United States and the provinces of Canada and New Brunswick." In 1850 Col. Graham was engaged by the states of Maryland, Pennsylvania, and Delaware, to examine certain disputed questions regarding the intersection of the boundary-line of these states. He made a thorough survey of the line originally made by Mason and Dixon, and published a voluminous report thereon. He was employed in the final settlement of the questions resulting from the war with Mexico, and during 1851 was U. S. astronomer in the survey of the boundary-line between this country and Mexico. For the ten next years he was engaged on various harbor improvements on the northern and northwestern lakes, in which he discovered the existence of a lunar tide (1858-59). At the time of his death he was superintending engineer of the sea-walls in Boston harbor, and of the repairs of harbor works on the Atlantic coast from New York to Key West. In 1861 he was promoted to be colonel of the engineer corps, 1 June, 1863. He was a member of several scientific societies. — Another brother, **Lawrence Pike**, soldier, b. in Amelia county, Va., 8 Jan., 1815, was appointed 2d lieutenant of the 2d dragoons in 1837, and subsequently promoted engineer and captain. In 1842 he served in the campaign against the Seminoles, and was present at the battle of Loachathee. In the Mexican war he was brevetted major for gallantry in the engagements at Palo Alto and Resaca de la Palma, and promoted major, 14 June, 1858. In October, 1861, he was made lieutenant-colonel of the 8th cavalry, colonel 4th cavalry, 9 May, 1864, and brevet brigadier general for meritorious services during the civil war, 13 March, 1865. Previously, in August, 1861, he was commissioned brevet major of volunteers, and in 1862 raised and commanded a brigade of cavalry in the Army of the Potomac. He afterward acted as president of a general court-martial at St. Louis, and of a board for the examination of invalid officers at Annapolis. He was mustered out of the volunteer service, 24 Aug., 1865, and placed on the retired list, 15 Dec., 1870.

**GRAHAME, James**, historian, b. in Glasgow, Scotland, 21 Dec., 1790; d. in London, England, 3 July, 1842. He was graduated at St. John's college, Cambridge, and in 1812 was admitted an advocate at the Scottish bar. After practising for fourteen years, and finding that his health required a residence in a milder climate, he removed to the south of England, where he began a "History of the Rise and Progress of the United States of North America," which was completed in 1808." The first two volumes appeared in 1827, and a new edition (4 vols.) in 1836, bringing the work down to the year 1776; but its thoroughly American spirit interfered with its success in England, and for several years it was little known in the United States. A party that insisted on the "History," by the historian Prescott, appeared in the "North American Review," in which it was styled "the most thorough work, and incomparably the best on the subject, previous to Mr. Bancroft's." A Philadelphia edition (4 vols.) was published in 1843, and one (2 vols.) in 1848-49, the former containing a memoir of Graham by Josiah Quincy. Mr. Quincy also published a work entitled "The Memory of the Late James Graham, the Historian of the United States, Vindicated from the Charges of Mr. Bancroft" (Boston, 1846). In 1837 Mr. Graham undertook to continue the "History" to the close of the Revolution, but was compelled by failing health to relinquish literary labor of all kinds. The last production of his pen was the pamphlet "Who is to Blame? or, Cursory Review of the American Apology for American Accession to Negro Slavery" (London, 1842).

**GRAINGER, James**, Scottish physician, b. in Dunse, Scotland, about 1723; d. in the island of St. Christopher in 1767. He served as a surgeon in the British army, and afterward practised medicine in London, and still later in the West Indies. He published a treatise on "Dysentery" (London, 1756), one on "West India Diseases" (1764), and other professional writings. Besides translations from Tibullus, an "Ode to Solitude," and other poetical productions, he published in 1764 a poem on "The Sugar-Canes," in which he described, sometimes in absurd poetical diction, but with picturesque force and interesting detail, the scenery and life of the plantations and all the processes connected with sugar-culture.

**GRANBERY, John Cowper**, M. E. bishop, b. in Norfolk county, Virginia, 1829. He graduated at Randolph-Macon college in 1848, and the same year became a preacher in the M. E. church, south. During the civil war he was a chaplain in the Confederate army. From 1875 till 1882 he was professor of moral philosophy and practical theology in Vanderblit divinity school, Nashville, Tenn., and in the latter year was appointed a bishop in the M. E. church, south. Randolph-Macon college gave him the degree of D. D. in 1870. He has published a "Bible Dictionary" (Nashville, Tenn., 1882).
GRANDIN, Vital Justin, Canadian R. C. bishop, b. in St. Pierre-sur-Orne, France, 8 Feb., 1839. He was educated at Precigné, and in divinity at Marville, where he was ordained priest in 1854. He was sent to British America in the same year, and in 1859 was consecrated coadjutor bishop of St. Boniface. In 1871 he became the first bishop of St. Albert, Canada. Bishop Grandin, in the discharge of his official duties, has travelled widely for 50 years past over British North America.

GRANDMONT, Louis de, buccaneer, b. in Paris in 1645; d. at sea about 1686. He belonged to a good family. An officer having treated him as a child, Grandmont forced him to accept a challenge, wounded him mortally, and was arrested, but was pardoned, and entered the navy, where he distinguished himself by his bravery and intelligence. He obtained command of a privateer and sailed to Martinique, where he captured a Dutch merchantman, valued at 400,000 francs, but, having spent the entire sum in dissipation, he fled to Santo Domingo, and joined the buccaneers. His fine appearance, distinguished manners, and daring gained for him the confidence of his new associates. Placing himself at the head of a certain number among them, he captured in 1678 Maracaibo, and in 1679 Puerto Calderon. In April 1682, with Graaf and Van Horn in the capture of Vera Cruz, and in August of the same year succeeded in getting possession of the town of Campeachy, where he gained a large booty. In order to obtain the freedom of two of his companions, who had been made prisoners by the English, he proposed to surrender the governor of Campeachy, and to release the captured garrison. The commander refused to consent, and even answered Grandmont's threat to destroy the entire town and massacre all the inhabitants by saying that he had money enough to rebuild it and men enough to repeople it; whereupon the buccaneer cut off the heads of five Spaniards, burned the city, blew up the fortifications, and on the festival of St. Louis burned logwood valued at 200,000 crowns in honor of Louis XIV., who, as a reward for his courage and military talent, had created him "lieutenant of the king," and had desired to appoint him governor of the southern part of Santo Domingo. But Grandmont, with the object of rendering himself still more worthy of the favors of his master, determined to sail on a new campaign, and sailed from Santo Domingo in October, with a single vessel and a crew of 180 men. The vessel probably perished, as nothing further was heard of it.

GRANGER, Daniel Tristram, lawyer, b. in Saco, Me., 18 July, 1807; d. in Eastport, 27 Dec., 1854. He was graduated at Bowdoin in 1826, his part in the commencement being an oration in French, then first introduced among the exercises. He studied law in the office of Judge Ether Shep-ley, was admitted to the bar in 1829, and began practice in Newfield. In July, 1836, he moved to Eastport, and became a partner of Frederic Hobbs, and in 1837 he assumed the management of the whole of the extensive business of the firm. In 1834 he was appointed a judge on the supreme bench of Maine, but declined the appointment because of failing health. He was distinguished throughout for his profound regard for learning, his sagacity as a counsellor, the extreme care with which his cases were prepared, and the fluency and earnestness with which they were presented.

GRANGER, Gideon, statesman, b. in Suffield, Conn., 19 July, 1767; d. in Canandaigua, N. Y., 31 Dec., 1848. He was graduated at Yale in 1784, became a lawyer, and served for several years in the legislature of Connecticut, where he took a leading part in the establishment of the school fund, of which he has sometimes been called the father. He became postmaster-general of the United States in 1801, and held that office for thirteen years, discharging its arduous duties during the whole of Mr. Jefferson's administration. On leaving Washington, in 1814, he established himself in Canandaigua, N. Y., and a few years afterward became a member of the New York State legislature. He was conspicuous for his advocacy of the great system of internal improvements, with which the name of his illustrious friend, DeWitt Clinton, is identified. In 1821 failing health compelled him to withdraw from public service. He delivered a 4th of July oration at Suffield in 1797, which is in print, and his "Political Essays," under the signature of Algeron Sidney and Eppamondes, were published in pamphlet-form. His son, Francis, statesman, b. in Suffield, Conn., 1 Dec., 1792; d. in Canandaigua, N. Y., 28 Aug., 1898. He was graduated at Yale in 1811, was educated as a lawyer, and, on his father's removal to Canandaigua in 1814, became a member of the Ontario bar. For many years he represented Ontario county in the legislature of New York, and was twice an unsuccessful candidate of his party for governor, being defeated by a small Democratic majority. In 1836 he was the candidate of the National Republicans, or Whigs, for vice-president of the United States, on the ticket with William H. Harrison. Two years afterward he was elected to Congress. On the accession of Gen. Harrison to the presidency in 1841, Mr. Granger was called to a place in the cabinet, and discharged the duties of postmaster-general with efficiency until the dissolution of the cabinet under President Tyler. He declined the offer of a foreign mission, and was once more elected a representative in Congress, of which he had been a member for several previous terms.

At the close of the 27th Congress he declined re-election, and retired to private life. But he still occasionally attended meetings of his old Whig friends, and his silver-gray hair gave the name to a party that originated in a convention of which he was president. He was also, by appointment of the gov-
GRANGER, soldier, b. in New York in 1821; d. in Santa Fe, New Mexico, 10 Jan., 1876. He was graduated at the U. S. military academy, and took part in the principal battles of the Mexican war, being brevetted 1st lieutenant and captain for bravery at Contreras and Churubusco and Chapultepec. When the civil war began he served on the staff of Gen. McClellan in Ohio, then in Missouri, being engaged in the battles of Pea Ridge and Pea Ridge, and brevetted major for gallant services at Wilson's Creek, and on 2 Sept., 1861, became colonel of the 2d Michigan cavalry. On 26 March, 1862, he was made a brigadier-general, and commanded the cavalry in the operations that led to the fall of Corinth. He became a major-general of volunteers on 17 Sept., 1862, and was placed in command of the Army of Kentucky. He conducted operations in Tennessee in the spring of 1863, repelled Forrest's raid in June, and took part in Rosecrans' Tennessee campaign. He distinguished himself in the battle of Chickamauga, was soon afterward assigned to the command of the 4th army corps, and took a prominent part in the operations around Chattanooga and in the battle of Missionary Ridge. He commanded a division at Fort Gaines, Ala., in August, 1864, and was in command of the 13th army corps in the capture of Fort McAllister and throughout the operations that resulted in the fall of Mobile in the spring of 1865. He was brevetted lieutenant-colonel and colonel, U. S. army, for services at Chickamauga and Chattanooga, and brevetted major for gallantry in the capture of Mobile, and major-general for the capture of forts Gaines and Morgan. He was mustered out of the volunteer service on 15 Jan., 1866, was promoted colonel on 28 July, 1866, and at the time of his death commanded the district of New Mexico.

GRANJA, Juan de la (gran'-ha), Spanish journalist, b. in Balmaseda, Spain, about 1785; d. in Mexico, 6 March, 1853. He was in business in Madrid from 1809-14, when, in consequence of the political disturbances in Spain, he emigrated to Mexico. After travelling widely in that country and the United States, he engaged in mercantile business in Mexico in 1820-6, but in the latter year fixed his residence in New York, where he established the "Noticiario de Ambos Mundos," probably the first Spanish newspaper published in this country. He called the attention of the Mexican government to the proposed annexation of Texas, and in acknowledgment of his services was appointed, in May, 1838, vice-consul of Mexico in New York. When in 1842 the truth of his assertions of an intended annexation of Texas became apparent, the Mexican government declared him a Mexican citizen, and promoted him to consul-general in New York. In 1846 he resolved to share the fate of his adopted country, and sailed for Mexico, where he was elected member of congress for the state of Vera Cruz, and took an active part in the discussion of the treaty of peace with the United States in 1848, being one of the few deputies who voted in the negative. Afterward, Granja devoted himself to his long-cherished idea of establishing telegraphic communications between the republics south of the United States, and for the means for his preliminary studies, he embarked first in a mining enterprise in San Luis Potosi, and afterward established a bookstore in the city of Mexico. After many failures he formed a company, and on 5 Nov., 1851, the first telegraphic line was begun, which was extended from Mexico City to Nopalucan, a distance of forty-five leagues, was opened. The line was now rapidly extended; but Granja had overtaxed his strength, and the unusual labor soon caused his death.
GRANT, Anne, author, b. in Glasgow, Scotland, 21 Feb., 1755; d. in Edinburgh, 7 Nov., 1838. Her father, Duncan MacVicar, was an editor in a Highland regiment, her mother a member of the family of Stewart, of Invernahyle, Argyllshire. In 1758 Mrs. MacVicar and her daughter came to this country, and settled at Claverack on the Hudson, where her husband was stationed with his regiment. Here Anne was taught to read by her mother, and learned to speak Dutch. In 1760 Capt. MacVicar conducted his company through the wilderness to Oswego, accompanied by his wife and child. In the summer of 1762 her talents attracted the attention of Madame Schuyler, with whom she resided in Albany for several years. Soon after the conquest of Canada, MacVicar resigned from the army and became a settler in Vermont, where he received a grant of land from the British government, to which he made large additions by purchase from his brother officers. His career of prosperity was interrupted by impaired health and low spirits, and in 1765 he decided to return to his native land. Anne accompanied her parents, and at the age of thirteen left the New World never to see it again. Unfortunately for MacVicar, she was an orphan, and he took his departure from the country without disposing of his property, which, soon after, upon the beginning of the war, was confiscated by the new regime of government. He was, therefore, compelled to depend chiefly upon his limited pay as a schoolmaster of Port Augustus in Inverness-shire, to which position he had been appointed in 1773, and his daughter was no longer looked upon as an heiress. Her residence there terminated in 1779 with her marriage to the Rev. James Grant, the military chaplain and an accomplished scholar, when they removed to the parish of Laggan, to which he had been appointed. Her lines had fallen in pleasant places. In the simple life of a Highland parish, many happy years passed in Laggan. In 1801 Mr. Grant died, leaving his widow with eight children dependent upon her own exertions. Her poems, written during a series of years, were collected in an octavo volume in 1803, and through the aid of the celebrated Duchess of Gordon three thousand subscribers were obtained. This was followed in 1806 by her "Letters from the Mountains." Through the efforts of Miss Lowell, of Boston, and a few other ladies, an American edition of this work was published in that city, and the profits, amounting to three thousand pounds, were remitted to Mrs. Grant. Her best-known work, begun at the age of fifty-two, and issued in London in 1808, is entitled "Memoirs of an American Lady." It is a charming picture of New York colonial life, and one that was greatly admired by Sir Walter Scott and Margaret South. In May, 1831, the description of the breaking up of the ice in the upper Hudson was "quite Homeric." A second edition of the memoir of Mrs. Schuyler appeared in 1809, and was reprinted the same year in Boston and New York. Other editions were issued in the latter city in 1836 and 1846, while a third edition was published in London in 1817. The previous American editions being out of print, another appeared in 1876, accompanied by a fine steel portrait of Mrs. Grant, and a memoir written by her godson, the senior editor, who was of her husband's wife, Mrs. Grant removed in 1810 from Stirling, where she had resided since her husband's death, to Edinburgh, which continued to be her home for twenty-eight years. The year following she published "Essays on the Operations of the Highlanders," a work full of enthusiasm for the people among whom she so long resided. So conspicuous was her pre-eminence in her beautiful translations of Highland poetry and her thorough knowledge of the people, that the earlier volumes of the Waverley novels were frequently attributed to her pen. "Eighteen Hundred and Thirteen," a metrical poem, appeared in 1814, followed by her last literary production, entitled "Popular Models and Impressive Warnings for the Sons and Daughters of Industry," which was published one of the last remaining twenty-three years between the appearance of her last volume and her death. Mrs. Grant's literary labors were no longer necessary for her support, as she was in receipt of a pension of $100 from the British government, in consideration of her literary talents, which, with the earnings of the emolument from her pupils, and several legacies from friends, rendered her life free from pecuniary cares. Among the latter was one of $5,000, as a mark of affectionate veneration for her character, from John Lowell, Jr., of Boston, who became acquainted with Mrs. Grant during the residence of several years in Edinburgh. Her house in Manor place was frequented by Scott, Francis Jeffrey, Henry MacKenzie, and other magnates of the Scottish literary world; and few Americans of distinction visited Edinburgh without being welcomed by Mrs. Grant, usually designated "of Laggan," to distinguish her from her friend and contemporary, Mrs. Grant of Carron. To the closing year of her long life she continued to correspond with Mrs. Alexander Hamilton and many other American friends and the young American freemen in the shadow of the stately castle of Edinburgh, and near her resting-place, in what is known as the Auld West Kirk, is the grave of Thomas De Quincey. Her letters, with a memoir by her only son, John Peter Grant, appeared in 3 vols. (London, 1844; revised edition, 1845 and 1850). Mr. Grant died in 1870, leaving a widow and four children, two of whom are sons, in the service of the British government. The accompanying portrait is copied from a miniature made at the age of threescore and ten, while an earlier one, painted by Sir John Watson Gordon for Mrs. Douglas Cruger, of New York, was by her heirs presented in 1876 to her daughter-in-law, Mrs. John P. Grant, of Edinburgh. See "The Poets and Poetry of Scotland" (New York, 1876).

GRANT, Asahel, missionary, b. in Marshall, Allegany co., N. Y., 17 Aug., 1807; d. in Moscow, Asiatic Turkey, 25 April, 1844. He studied medicine, and had acquired a large practice in Utica, N. Y., when, in 1834, his attention was directed to missionary work. The field of Oromiah, a district in Persia along the Turkish frontier, was selected by him, and in 1844 he left Boston, reaching his new home in October. Dr. Grant's character as a physician secured him the
favor of the Persian governor, and the Nestorian bishops and priests gave him a hearty welcome. For five years he worked with great assiduity among this remnant of the once great Nestorian church. Schools were established both for boys and girls, and great good was wrought among those who came under his influence. His wife's death and her long illness retarded his work in the United States, but receiving the appointment of missionary to those Nestorians who lived in the rugged hills of Kordistan, known as the "Walled-Dones of the East—the Protestants of Asia," he again went to Persia a resident, and opened a school. An arrangement had been made tending toward the destruction of the independence of this people, he endeavored to persuade them to make terms with the Turks; but this they were unwilling to do, and in consequence a massacre occurred in 1843, in which 10,000 were killed. The missionaries were compelled to fly for their lives, and Dr. Grant, settling for a while in Mosul, devoted all his energies to the work of relieving the wretched fugitives who crowded the city. He published "The Nestorians, or the Lost Tribe of Judah," The Times, London, 1841. See "Memoir of Asahel Grant, M.D." (New York, 1847) and "Grant and the Nestorians" (Boston, 1855).

GRANT, Clement Rollins, artist, b. in Freeport, Me. 10 Nov., 1803. At the age of eighteen he went to Europe, spending some months in study and observation in Great Britain and France, and on his return established a studio in Boston and became a member of the Boston art club. His specialty is landscape and portrait painting. Among his pictures are "A Dutch Church, in Aqqua, Venice," "Media, and Mesopotamia" (London and Boston, 1841). See "Memoir of Asahel Grant, M.D." (New York, 1847) and "Grant and the Nestorians" (Boston, 1855).

GRANT, George Monroe, b. in Stetlanton, Pictou co., Nova Scotia, 22 Dec., 1835. He was educated at Pictou academy and at the West River seminary of the Presbyterian church in his native province, winning at the latter, in 1853, a bursary that entitled him to a theological course in the University of Glasgow. He distinguished himself, and on his return to Nova Scotia he spent some time as a missionary in the maritime provinces, and in May, 1858, became pastor of St. Matthew's church, Halifax, which office he retained until 1877, when he was appointed principal of Queen's university, Kingston. In the summer of 1872 he accompanied Sandford Fleming on a tour across the continent, and the same year published "Ocean to Ocean," a diary of his journey. He is a contributor to periodicals, and editor of "Picturesque Canada."

GRANT, James, soldier, b. in Ballendalloch, Scotland, in 1729; d. 13 April, 1806. He was appointed major of the Montgomery Highlanders in 1757, and in September, 1758, marched with 800 men to reconnoitre Fort Duquesne. Dividing his forces in order to tempt the enemy into an ambuscade, he surprised and defeated, with a loss of 295 killed and prisoners. He and nineteen officers were captured. He was appointed governor of East Florida in 1770, and lieutenant-colonel of the 40th foot, and sent by Gen. Amherst early in 1771, with a force of 730 troops, to reduce the Spanish colonies in Carolina. In May, 1771, he led the expedition against the Cherokees, defeating them in a severe battle at Etchies, and was promoted to a colonelcy, 25 May, 1772. In the battle of Long Island, August, 1776, he commanded the 4th and 6th brigades of the British army. In December, 1776, Lord Howe gave him the command in New Jersey at a most critical period; the American victories of Trenton and Princeton immediately followed. In 1777 he was made a major-general, and commanded the 2nd Brigade of Howe's army in Brandywine, and at Germantown, 4 Oct., forced the left of the American army to give way. In May, 1778, he was detached with a strong force to cut off Lafayette on the Schuylkill, but was unsuccessful. He defeated Lee at Monmouth, and led 4 New Jersey regiments in command of the troops sent against the French West Indies. In December he took St. Lucia, and in 1791 was made governor of Stirling castle, a lieutenant-general in November, 1782, and a general in May, 1786.

GRANT, James Alexander, Canadian physician, b. in Inverness-shire, Scotland, 8 Aug., 1829. His father was Dr. James Grant, of Edinburgh, and his maternal grandfather was well known as a writer on archaeological subjects. When Dr. Grant was one year old his parents removed to Canada. He was educated at the Universities of Glasgow, London, and Montreal, and graduated at McGill, Montreal, where he took his medical degree in 1854. He settled in Ottawa, and has ever since enjoyed a lucrative practice. He has also been physician to all the governors-general of Canada from the time of Lord Monk to the present (1887). In 1872 he was elected president of the Canadian medical association, and shortly afterward of the St. Andrew society of Ottawa, and in 1885 was elected an honorary member of the British medical association. In 1887, as a Conservative, he was elected as the first member from the county of Russell to the Dominion parliament, but resigned in 1872, but was defeated in 1874. While in parliament, Dr. Grant introduced the original Pacific railway bill, and was the first to advocate the admission of the Northwest territory into the Dominion. In addition to numerous contributions to British and Canadian medical periodicals, he has published papers on geology.

GRANT, Lewis A., soldier, b. in Vermont about 1820. He was commissioned major of the 5th Vermont infantry, 15 Aug., 1861; lieutenant-colonel, 25 Sept., 1861; and colonel, 16 Sept., 1862. He commanded the 2d brigade of the 2d division, 6th corps, at the battle of Chancellorville, and was commissioned brigadier-general of volunteers, 27 April, 1864. He was brevetted major-general of volunteers on 10 Oct., 1864, and mustered out of service, 24 Aug., 1865.

GRANT, Robert, author, b. in Boston, Mass., 24 Jan., 1832. He was educated first at the Boston Latin-school, and was graduated at Harvard in 1857; received the degree of Ph. D. in 1876, and was graduated at Harvard law-school in 1878. Subsequently he entered on the practice of law in Boston. Mr. Grant has written some clever verse and several novels. His published works include "The Little Tin Gods on Wheels," a satire in verse (Cambridge, 1879); "The Confessions of a Frivolous Girl" (Boston, 1880); "The Lambs" (1882); "Yankee Seaboard" (New York, 1883); "The Knavo of Hearts" (Boston, 1985); "A Romantic Young Lady" (1886); "Face to Face" (New York, 1886); and a part of the 250th anniversary of the Boston Latin-school, which was published with other exercises under the title of "The Oldest School in America" (Boston, 1885).
GRANT, Ulysses S., eighteenth president of the United States, b. at Point Pleasant, Clermont co., Ohio, 27 April, 1822; d. on Mount McGregor, near Saratoga, N. Y., 23 July, 1885. (See the accompanying view of Grant's birthplace.) He was of Scottish ancestry, but his family had been American in all its branches for eight generations. He was a descendant of Matthew Grant, who arrived at Dorchester, Mass., in May, 1630. His father was Jesse R. Grant, and his mother Hannah Simpson. They were married in June, 1819, in Clermont county, Ohio. Ulysses, the oldest of six children, spent his boyhood in assisting his father on the farm, a work more congenial to his tastes than working in the tannery of which his father was proprietor. He attended the village school, and in the spring of 1838 was appointed to a cadetship in the U. S. military academy by Thomas L. Hamer, M. C. The name given him at birth was Hiram Ulysses, but he was always called by his middle name. Mr. Hamer, thinking this his first name, and that his middle name was probably that of his mother's family, inserted in the official appointment the name of 'Ulysses S.' The officials at West Point were notified by Cadet Grant of the error, but they did not feel authorized to correct it, and it was acquiesced in and became the name by which he was always known. As a student, Grant showed the greatest proficiency in mathematics, but he gained a fair standing in most of his studies, and at cavalry-drill he proved himself the best horseman in his class, and afterward was one of the best in the army. He was graduated in 1843, standing twenty-sixth in a class of thirty-nine. He was commissioned, on graduation, as a brevet 2d lieutenant, and was attached to the 4th infantry and assigned to duty at Jefferson barracks, near St. Louis. (See portrait taken at this period on page 711.) In May, 1844, he accompanied his regiment to Camp Salubrity, Louisiana. He was commissioned 2d lieutenant in September, 1845. That month he went with his regiment to Corpus Christi (now in Texas) to join the army of occupation, under command of Gen. Zachary Taylor.

He participated in the battle of Palo Alto, 8 May, 1846; and in that of Resaca de la Palma, 9 May, he commanded his company. On 19 Aug., he set out with the army for Monterey, Mexico, which was reached on 19 Sept. He had been appointed regimental quartermaster of the 4th infantry, and was placed in charge of the wagons and pack-train on this march. During the assault of the 21st on Black Fort, one of the works protecting Monterey, instead of remaining in camp in charge of the quartermaster's stores, he charged with his regiment, on horseback, being almost the only officer in the regiment that was mounted. The adjutant was killed in the charge, and Lieut. Grant was designated to take his place. On the 23d, when the troops had gained a position in the city of Monterey, a volunteer was called for, to make his way to the rear under a heavy fire, to order up ammunition, Lieut. Grant volunteered, and the men were sent in order to safety, accomplishing his mission. Garland's brigade, to which the 4th infantry belonged, was transferred from Twiggs's to Worth's division, and ordered back to the mouth of the Rio Grande, where it embarked for Vera Cruz. He joined the army under Gen. Scott. It landed near that city on 9 March, 1847, and the investment was immediately begun. Lieut. Grant served with his regiment during the siege, until the capture of the place, 29 March, 1847. On 13 April his division began its march toward the city of Mexico; and he participated in the battle of Cerro Gordo, 17 and 18 April. The troops entered Puebla on 15 May, and Lieut. Grant was there ordered to take charge of a large train of wagons, with an escort of fewer than a thousand men, to obtain forage. He made a two days' march, and procured the necessary supplies. He participated in the capture of San Antonio and the battle of Churubusco, 20 Aug., and the battle of Molino del Rey, 8 Sept., 1847. In the latter engagement he was with the first troops that entered the mills. Seeing some of the enemy on the top of a building, he climbed to the roof, received the surrender of six officers and quite a number of men. For this service he was brevetted 1st lieutenant. He was engaged in the storming of Chapultepec on 13 Sept., distinguished himself by conspicuous services, was highly commended in the report made by Major-General St. Eustache, and brevetted captain. While the troops were advancing against the city of Mexico on the 14th, observing a church from the top of which he believed the enemy could be dislodged from a defensive work, he ordered for volunteered and wired twelve men of the 4th infantry, who were afterward joined by a detachment of artillery, he made a flank movement, gained the church, mounted a howitzer in the belfry, using it with such effect that Gen. Worth sent for him and complimented him in person. He entered the city, 14 Sept., and a few days afterward was promoted to be 1st lieutenant. He remained with the army in the city of Mexico till the withdrawal of the troops in the summer of 1848, and then accompanied his regiment to Pascagoula, Miss. There he obtained leave of absence and went to Mississippi, where, on 22 Aug., 1848, he married Miss Julia B. Dent, sister of one of his classmates. He was soon afterward ordered to Sackett's Harbor, N. Y., and in April following to Detroit, Mich. In the spring of 1851 he was again transferred to Sackett's Harbor, and on 5 July, 1852, he sailed from New York with his regiment for California via the Isthmus of Panama. While the troops were crossing the isthmus, cholera carried off one seventh of the command. Lieut. Grant was left behind in charge of the sick, on Chagres river, and displayed great skill and devotion in caring for them and supplying means of transportation. On arriving in California, he spent a few weeks with his regiment at Benicia barracks, and then accompanied it to Fort Vancouver, Oregon. On 5 Aug., 1853, he was promoted to the captaincy of a company stationed at Humboldt bay, Ca., and the next September he went to that post.

He resigned his commission, 31 July, 1854, and settled on a small farm near St. Louis. He was engaged in farming and in the real-estate business in St. Louis until 1860, when he removed to Galena, Ill., and there became a clerk in the hardware and leather store of his father, who in a letter
to Gen. Jno. Grant Wilson, dated 20 March, 1868, writes: "After Ulysses' farming and real-estate experiments in St. Louis county, Mo., failed to be self-supporting, he came to me at this place [Covington, Ky.] for advice and assistance. I referred him to Simpson, my next oldest son, who had charge of my Galena business, and who was staying with me in June of the ill health of his negro in St. Louis. Simpson sent him to the Galena store, to stay until something else might turn up in his favor, and told him he must confine his wants within $200 a year. That if he would not support himself he must draw what it lacked from the rent of his house and the hire of his negro in St. Louis, and did draw $1,500 in the year, but he paid back the balance after he went into the army." When the news was received of the beginning of the civil war, a public meeting was called in Galena, and Capt. Grant was chosen to preside. He took a pronounced stand in favor of the Union cause and a vigorous prosecution of the war. A company of volunteers were raised, and accompanied to Springfield, III. Gov. Yates, of that state, employed Capt. Grant in the adjutant-general's department, and appointed him mustering officer. He offered his services to the National government in a letter written on 24 May, 1861, but no answer was ever made to it. On 16 June he was appointed colonel of the 21st Illinois regiment of infantry, which had been mustered in at Mattoon. The regiment was transferred to Springfield, and on 3 July he went with it from that place to Palmyra, Mo., thence to Salt River, where it guarded a portion of the St. Louis. He went to Galena in April, 1860, about one year before the capture of Sumter; then he left. That amount would have supported his family then, but he owed debts at St. Louis, and did draw $1,500 in the year, but he paid back the balance after he went into the army." I propose to move immediately upon your works." The garrison was surrendered the same day, unconditionally. The capture included 14,624 prisoners. The killed and wounded numbered about 2,500. Grant's loss was 2,941 killed, wounded, and missing. This was the first capture of a prominent strategic point since the war began, and indeed the only significant victory thus far for the National arms. It opened up two important navigable rivers, and left the enemy no strong foothold in Kentucky or Tennessee. Grant was soon afterward made a major general of volunteers, and this order dating from 16 Feb., and his popularity throughout the country began from that day. He urged a prompt following up of this victory, and set out for Nashville, 28 Feb., without waiting for instructions, but telegraphing that he should go if he received no orders to the contrary. For this, and under the pretense that he had not forwarded to his superiors in command certain reports showing the strength and positions of his forces, he was deprived of his command, and ordered to remain at Fort Henry. He was not restored to command until 13 March, when his services were again required in view of the enemy's having concentrated a large army near Corinth, Miss., and he transferred his headquarters to Savannah, on Tennessee river, on the 20th. He found the forces under his command, numbering about 38,000 men, encamped on both sides of the river, and at once transferred them all to the west side and concentrated them in the vicinity of Pittsburg Landing. He selected a favorable position, and on the 27th of April, with the National troops at Shiloh Church, nearly three miles from the river. He was directed not to attack the enemy, but to await the arrival of Gen. Buell's army of 40,000 men, which was marching southward through Tennessee to join Grant. On 9 April the Confederate army, numbering nearly 50,000 men, commanded by Gen. Albert S. Johnston, made a vigorous attack at daylight, drove the National troops back in some confusion, and continued to press the advantage gained during the entire day. Gen. Johnston was killed about one o'clock, and the command of the Confederates devolved upon Gen. Beauregard; 5,000 of Grant's troops did not arrive on the field during the day, so that his command was outnumbered, and it required all his efforts to hold his position on the river until evening. Late in the afternoon the head of Buell's column crossed the river, but not in time to participate actively in the fighting, as the enemy's attacks had ceased. Grant sought shelter that night in a hut; but the surgeons had made an emaciating hospital of it, and he found the sight so painful that he went out into the rain and snow and slept under a tree. He had given orders for an advance all along the lines the next morning. Buell's troops had now joined him, and the attack was pushed with such vigor that the enemy were steadily driven back, and retreated across the river. The national loss on this day Grant's sword-scabbard was broken by a bullet. His loss in the battle was 1,754 killed, 8,408 wounded, 2,885 missing; total, 13,047. The enemy acknowledged a loss of 1,728 killed, 8,012 wounded, and 857 missing; total, 10,609; but there are evidences that it was much greater. The National loss was nearly 120,000 men. The enemy was behind strong fortifications, and numbered over 50,000. Grant was named second in command of all the troops, but was especially intrusted with the right wing and reserve. On 30 April an advance was begun against Corinth, but the enemy resisted the advance and retreated, without fighting, on 30 May. On 21 June, Grant moved his headquarters to Memphis. Gen. Halleck was appointed general-in-chief of all the armies, 11 July. Grant returned to Corinth on 15 July, and on the 17th Halleck set out for Washington. Halleck's Grant became commander of the Army of the Tennessee, and on 25 Oct. he was assigned to the command of the Department of the Tennessee, including Cairo, Fort Henry and Donelson, northern Mississippi, and portions of Kentucky and Tennessee west of Tennessee river. He ordered a movement against the enemy at Juka to capture Price's force at that place, and a battle was fought on 19 and 20 Sept. The plan promised success, but the faults committed by the officer commanding one wing of the troops engaged permitted the enemy to escape. The National loss was 736, that of the Confederates 1,438. Grant strengthened the position around Corinth, and remained there about eight weeks. When the enemy afterward attacked it, 3 and 4 Oct., they met with a severe repulse. Gen. William S. Rosecrans was in immediate command of the National troops. On the 5th they were struck while in retreat, and badly beaten in the battle of the Hatchie. The entire National loss was 2,359. From the best attainable sources of information, the Confederates lost nearly twice that number.

After the battle of Corinth, Grant proposed to Halleck, in the latter part of October, a movement looking to the capture of Vicksburg. On 3 Nov. he left Jackson, Tenn., and made a movement with 30,000 men against Grand Junction, and on the 4th he had seized this place and La Grange. The force opposing him was about equal to his own. On the 13th his cavalry occupied Holly Springs; on 1 Dec. he advanced against the enemy's works on the Tallahatchie, which were hastily evacuated, and on the 5th reached Oxford. On the 8th he ordered Sherman to move down the Mississippi from Memphis to attack Vicksburg. Grant's column to cooperate with him by land. On 20 Dec. the enemy captured Holly Springs, which had been made a secondary base of supplies, and seized a large amount of stores. Col. Murphy, who surrendered the post without fighting, taken prisoner, and the post of defence, was dismissed the service. The difficulties of protecting the long line of communication necessary for furnishing supplies, as well as other considerations, induced Grant to abandon the land expedition, and take command in person of the movement. The Missionary Ridge had reached Milliken's Bend, on the west side of the river, twenty miles above Vicksburg, on the
24th, with about 32,000 men. He crossed the river, ascended the Yazoo to a point below Haines's Bluff, landed his forces, and made an assault upon the enemy's strongly fortified position at that place on the 29th, but was repelled with a loss of 175 killed, 490 wounded, and 744 missing. The enemy surrendered, 5000 men, at 9 A.M. on the 30th. Grant's headquarters were established at Memphis on 10 Jan., and preparations were made for a concentrated movement against Vicksburg. On the 29th he arrived at Young's Point, opposite the mouth of the Yazoo into the Mississippi, and took command in person of the operations against that city, his force numbering 50,000 men. Admiral Porter's co-operating fleet was composed of gun-boats of all classes, carrying 250 guns and 400 men. Three plans suggested themselves for reaching the high ground behind Vicksburg, the only position from which it could be besieged: First, to march the army down the west bank of the river, cross over below Vicksburg, and co-operate with Gen. Banks, who was in command of an expedition ascending the river from New Orleans, with a view to capturing and operating upon a line for supplies from below. The high water and the condition of the country made this plan impracticable at that time. Second, to construct a canal across the peninsula opposite Vicksburg, through which the fleet of gun-boats and transports could pass, supplies could be held up upon a line for communication for supplies. This plan was favored at Washington, and was put into execution at once; but the high water broke the levees, drowned out the camps, and flooded the country, and after two months of laborious effort Grant reported it impracticable. The third plan was to turn the Mississippi from its course by opening a new channel via Lake Providence, and through some bayous to Red River. A force was set to work to develop this plan; but the way was tortuous and choked with timber, and by March it was found impossible to open a practicable channel. In the mean time an expedition was sent to the east side of the river to open a route via Yazoo pass, the Tallahatchie, the Yalobusha, and the Yazoo rivers; but insurmountable difficulties were encountered, and this attempt also had to be abandoned. Grant had thoroughly tested all the safer plans, now determined to try a bold and more hazardous one, which he had long had in contemplation, but which the high water had precluded. This was to run the batteries with the gun-boats and transports loaded with supplies, to march his troops down the west side of the river from Milliken's Bend to the vicinity of New Carthage, and there ferry them across to the east bank. The movement of the troops was begun on 29 March, They were marched to New Carthage and Hard Times. On the night of 16 April the fleet ran the batteries under a severe fire. On 29 April the gun-boats attacked the works at Grand Gulf, but made little impression, and that night ran the batteries to a point below. On 30 April the advance of the army was ferried across to Bruinsburg, below Grand Gulf and 30 miles above Vicksburg, and moved toward and the siege of Port Gibson, Everything was made subordinate to the decision of the movement. The men had no supplies except such as they carried on their persons. Grant himself crossed the river with no personal baggage, and without even a horse. He sent an armistice to the enemy on the east side. The advance encountered the enemy, under Gen. Bowen, numbering between 7000 and 9000, on 1 May, near Port Gibson, routed him, and drove him in full retreat till nightfall. Grant's loss was 131 killed and 719 wounded. The Confederates reported their loss at 448 killed and wounded, and 884 missing; but it was somewhat larger, as Grant captured 650 prisoners. At Port Gibson he learned of the success of Grierson, whom he had despatched from La Grange, 17 miles, and 10 miles onward with 1000 cavalry, torn up many miles of railroad, destroyed large amounts of supplies, and arrived, with but slight loss, at Baton Rouge, La., 2 May. On 3 May, Grant entered Grand Gulf, which had been evacuated by two regiments commanded by Gen. John C. Pemberton at Vicksburg, numbering about 32,000 men; the other by Gen. Joseph E. Johnston at Jackson, 50 miles east of Vicksburg, who was being rapidly re-enforced. Gen. Sherman had been ordered to make a demonstration against Haines's Bluff, to compel the enemy to detach troops for its defence and withhold them from Grant's front; and this feint was successfully executed, 30 April and 1 May, when Sherman received orders to retire and join the main army. Grant determined to push on to Port Gibson and move with all speed on a line for communication from Jackson, encountered the enemy advancing from Vicksburg, and defeated and drove him from the field with a loss of 100 killed, 305 wounded, 413 prisoners, and 2 guns. Grant's loss was 66 killed, 250 wounded, and 37 missing. He pushed on to Port Gibson and made a stand near Raymond, encountered the enemy approaching from Jackson, and defeated and drove him with a loss of 42 killed, and 251 wounded and missing. The enemy lost 845 in killed, wounded, and missing, and 17 guns. Grant now moved rapidly toward Vicksburg, and attacked Pemberton in a strong position at Champion Hill. After a hotly contested battle, the enemy was completely routed, with a loss of between 3900 and 4000 killed and wounded, 3900 prisoners, and 30 guns; Grant's loss being 410 killed, 1844 wounded, and 187 missing. The enemy made a stand at Big Black river bridge on the 18th, holding a strongly entrenched position; but by a vigorous assault the place was carried, and the enemy was driven across the river in great confusion, with the loss of many killed, 1551 prisoners, and 18 guns. Grant's loss was but 39 killed, 357 wounded, and 3 missing. On the 19th the National army closed up against the outer works of Vicksburg, driving the enemy inside his fortifications. Sherman took possession of Haines's Bluff, a base for supplies was established at Chickasaw Landing, and on the 21st the army was once more supplied with full rations. On 19 and 22 May assaults were made upon the enemy's lines, but only a few outworks were carried, and on the 23d the siege was regularly begun. By 30 June there were 220 guns in position, all light field-pieces except six 32-pounders and a battery of heavy guns supplied by the navy. Grant now had 71,000 men to conduct the siege and the army of Johnston's army threatening him in the rear. The operations were pressed day and night; there was mining and countermining; and the lines were pushed closer and closer, until the garrison abandoned all hope. On 3 July, Pemberton asked for an armistice, and proposed that commissioners to arrange terms of capitulation. Grant replied that there would be no terms but unconditional surrender; and this was made on the 4th of July. He permitted the officers and
men to be paroled, the officers to retain their private baggage and side-arms, and each mounted officer one horse. Grant showed every consideration to the vanquished, supplied them with full rations, and, when they marched out, issued an order saying, "Instruct the commands to be orderly and quiet as these prised peace, and to make no offensive remarks." The surrender included 31,600 prisoners, 172 cannon, 60,000 muskets, and a large amount of ammunition. Grant's total loss in the Vicksburg campaign was 8,873; that of the enemy nearly 60,000. Fort Hudson now surrendered to Banks, and Mississippi, as far as from its mouth, was in its power. Grant was made a major-general in the regular army; and congress, when it assembled, passed a resolution ordering a gold medal to be presented to him (see illustration), and returning thanks to him and his army.

He soon recommended a movement against Mobile, but it was not approved. He went to New Orleans, 30 Aug., to confer with Banks, and while there was severely injured by a fall from his horse, while engaged in a trial of speed with the senior editor of this work. For nearly three months he was advised to remain quiet, but on 10 Sept., he went out for Vicksburg, being carried on board the steamboat. He received orders from Washington on the 27th to send all available forces to the vicinity of Chattanooga, to co-operate with Rosecrans. While personally superintending the carrying out of this order, he received an order, dated 10 Oct., to report at Cairo. He arrived there on the 16th, and was directed to proceed to Louisville. At Indianapol is he met by Mr. Stanton, secretary of war, who accompanied him to Louisville and delivered an order to him placing him in command of the military division of the Mississippi, which was to embrace the departments and armies of the Tennessee, the Cumberland, and the Ohio. He at once went to Chattanooga, arriving on the 23rd, and took command there in person. On 29 Oct., the battle of Wauhatchie was fought, and a much-needed line of communication for supplies was opened to the troops in and around Chattanooga, besieged by Bragg's army, which held a strongly fortified position. Thomas commanded the Army of the Cumberland, which held Chattanooga; Sherman, who had succeeded Grant in command of the Army of the Tennessee, was ordered to bring all his available troops to join Thomas; and Burnside, who was in Knoxville, in command of the Army of the Ohio, besieged by Longstreet's corps, was ordered to hold his position at all hazards until Bragg should be crushed and a force could be sent to the relief of Knoxville. Grant, having concentrated his troops near Chattanooga, made an assault upon the enemy's lines on the 23d, which resulted in carrying important positions. The attack was continued on the 24th and 25th, when the enemy's lines were captured, and his army completely routed and driven out of Tennessee. Grant's forces consisted of 60,000 men; those of the Confederates, 45,000. The enemy's losses were reported at 361 killed and 2,180 wounded, but were undoubtedly greater. There were captured 4,442 men, 40 pieces of artillery, 7,000 stands of small-arms. Grant's losses were 757 killed, 4,529 wounded, and 330 missing. On the 28th a force was despatched to Knoxville, the command of the expedition being given to Sherman. On the 29th, Longstreet assaulted Knoxville but was repelled. On the 30th, the city was taken. On the 9th, Grant visited Knoxville the last week in December, and went from there to Nashville, where he established his headquarters, 13 Jan., 1864. He now ordered Sherman to march a force from Vicksburg into the interior, to destroy the enemy's communications and supplies. It moved on 3 Feb., went as far as Meridian, reaching there 14 Feb., and, after destroying railroads and great quantities of supplies, returned to Vicksburg. The grade of lieutenant-general was revived by joint resolution of Congress in February, and Grant was nominated for that office on 1 March, and confirmed by the Senate on the 2d. He left Nashville on the 4th, in obedience to an order calling him to Washington, arrived there on the 8th, and received his commission from the President on the 9th. He was assigned to the command of all the armies on the 12th (Sherman being given the command of the military division of the Mississippi on the 18th), and established his headquarters with the Army of the Potomac at Culpepper, Va., on the 26th.

Grant now determined to concentrate all the National forces into several distinct armies, which should move simultaneously against the opposing Confederate armies, operate vigorously and continuously, and prevent them from detaching forces to strengthen threatened points, or for the purpose of making raids. He announced that the Confederate armies would be the only objective points in the coming campaign. Sherman was to move toward Atlanta against Johnston. Banks's army, after it could be withdrawn from the Red River expedition, was to operate against Mobile. Sigel was to move down the valley of Virginia against Breckenridge to destroy communications and supplies, and prevent raids from that quarter. Butler was to ascend the James river and threaten Richmond. The Army of the Potomac, re-enforced by Burnside's troops and commanded by Meade, was to cover Washington, and assume the offensive against the Army of northern Virginia, commanded by Gen. Robert E. Lee. Orders were issued for a general movement of all the armies in the field on 4 May. During the night of the 4th and 5th Grant crossed the Rapidan and encountered Lee in the Wilderness, where a desperate battle was fought on the 5th, 6th, and 7th. Grant's loss was 2,301 killed, 8,785 wounded, and 2,802 missing. Lee's losses have never been reported; but, as he was generally the attacking party, he probably lost more. He fell back on the 7th, and on that day and the next took up a strong defensive position at Spottsylvania. Grant moved forward on the night of the 7th. As he rode through the troops, the men greeted him as their new commander with an extraordinary demonstration in recognition of the victory, shouting, cheering, and kindling bonfires by the roadside as he passed. The 8th and 9th were spent by both armies in skirmishing and manœuvring for position. Sherman's cavalry was detached on the 9th to make a raid in rear of the enemy and threaten Richmond. On the 10th there was heavy fighting, with no decisive results, and on the 11th skirmishing
and reconnoitering. On the morning of this day Grant sent a letter to Washington containing the famous sentence, "I propose to fight it out on this line, if it takes all summer." On the 12th a heavy assault was made on Lee's line, near the centre, in which he lost nearly 4,000 prisoners and 30 guns. Victory was now a certainty of the Union, and the enemy fought desperately. Grant's losses from the 8th to the 21st of May, around Spotsylvania, were 2,571 killed, 9,360 wounded, and 3,725 missing. His estimate of the enemy's loss, in killed and wounded, was nearly as great as that of the National army, besides about 4,000 prisoners and 30 cannon captured. In the mean time Butler had occupied Bermuda Hundred, below Richmond. Sherman had reached Dalton, Ga., and was steadily driving Johnston's army toward Atlanta. But Sigel had been forced to retreat before Breckinridge. On the 21st, Grant moved by the left flank to North Anna river, where he again encountered Lee, and after several engagements moved again by the left from that place toward Cold Harbor. Grant's losses between the 20th and 28th were 186 killed, 792 wounded, and 163 missing. Lee's losses during this period have never been fully ascertained. After much fighting by detached portions of the two armies, Grant made a general assault upon Lee's heavily entrenched position at Cold Harbor on 3 June, but did not succeed in carrying it, being repelled with a loss of about 7,000 in killed, wounded, and missing, while Lee's loss was probably not more than 2,500. The campaign had now lasted thirty days. Grant had received during this time about 40,000 re-enforcements, and had lost 39,359 men—6,896 killed, 20,047 wounded, and 6,626 missing. Lee had received about 30,000 re-enforcements. There are no official figures as to his exact losses, but they have been estimated at about equal to his re-enforcements. Sherman had now reached Kenesaw, within thirty miles of Atlanta; and on the 7th news arrived that Hunter, who had succeeded Sigel, had gained a victory and had seized Staunton, on the Virginia Central railroad. Grant made preparations for transferring the Army of the Potomac to the south side of the James river, to operate against Petersburg and Richmond from a more advantageous position. The army was withdrawn from the enemy's front on the night of 12 June, and the crossing of the river began on the 13th, and occupied three days. A force had also been sent around by water, by York and James rivers to City Point, to move against Petersburg. On the 15th the advanced troops attacked the works in front of that place; but, night coming on, the successes gained were not followed up by the commanders, and the next morning the position had not been recovered, and the assault strengthened. An assault was made on the afternoon of the 16th, which was followed up on the 17th and 18th, and the result was the capture of important outworks, and the possession of a line of works. Lee had arrived, and again confronted the Army of the Potomac. Grant's headquarters had been established at City Point. On 22 and 23 June he made a movement from the left toward the Weldon railroad, and heavy fighting took place; but no result except to render Lee's position of that line of communication more precarious. Sheridan had set out on a raid from Pamunkey river, 7 June, and, after defeating the enemy's cavalry, in the battle of Trevilian Station, destroying portions of the Virginia railroad, and inflicting other damage, he returned to White House, on York river, on the 20th. From there he crossed the James and rejoined the Army of the Potomac. A cavalry force under Gen. James H. Wilson had also been sent to the south and west of Petersburg, which destroyed the railroad passage and seriously interrupted the enemy's communications via the Danville and South-side railroads. Hunter, in the valley of Virginia, had destroyed the stores captured at Staunton and Lexington, and moved to Lynchburg. This place was re-enforced, and after a sharp fight Hunter made a successful attack. Grant's army drove the National troops out of Martinsburg, crossed the upper Potomac, and moved upon Harperstown and Frederick. There was great consternation in Washington, and Grant was harassed by many anxieties. On 11 July, Early advanced against the fortifications on the north side of Washington; but Grant had sent the 6th corps there, which arrived opportunely, and the enemy did not attack. Sherman had outflanked Johnston at Kenesaw, crossed the Chattahoochee on 17 July, drove to Atlanta, and destroyed a portion of the railroad in his rear. In Burnside's front, before Petersburg, a large mine had been constructed beneath the enemy's works. Many of Lee's troops had been decoyed to the north side of the James by feints made upon the lines there. The mine was fired at daylight on the morning of 30 July. A defective fuse caused a delay in the explosion, and when it occurred the assault ordered was badly executed by the officers in charge of it. Confusion arose, the place was re-enforced, and it was subsequently had to be withdrawn, after sustaining a heavy loss. Grant, in his anxiety to correct the errors of his subordinates, dismounted and made his way to the extreme front, giving directions in person, and exposing himself to a most destructive fire. He went to Monocacy on 6 Aug., and met Sheridan on the 6th, and placed him in command of all the forces concentrated in Maryland, with directions to operate against Early's command. On 14 Aug., Hancock's corps was sent to the north side of the James, and made a demonstration against the enemy at Deep Bottom, to develop his strength and prevent him from detaching troops to send against Sheridan. This resulted in the capture of six pieces of artillery and a few prisoners. On 18 Aug., Warren's corps moved out and, after heavy fighting, seized and held a position on the Weldon railroad. Fighting continued on the 19th, with Warren's troops re-enforced by part of the 9th corps. Lee attempted to recover the Weldon road by an assault on the 21st, but was repelled. On the 23d Ream's Station was occupied by the National troops, and the enemy attacked them in this place in force. They met, but the place was finally captured, and the National troops were compelled to fall back. Sherman's series of brilliant battles and manoeuvres around Atlanta had forced the enemy to evacuate that place, and his troops entered the city on 2 Sept. Sheridan attacked Early's army on 19 Sept., and in the battle of Winchester completely routed him. He pursued the enemy to Fisher's Hill, and on the 22d gained another signal victory. Grant now made several movements against Richmond and the enemy, in an effort to keep Lee from detaching troops, to extend the National lines, and to take advantage of any weak spot in the enemy's front, with a view to penetrative it. On 29 Sept., Butler's forces were ordered to
make an advance upon the works at Deep Bottom. Fort Harrison, the strongest work north of the James, was also defended by guns and several hundred prisoners. On the 30th the enemy made three attempts to retake it by assault, but was each time repelled with heavy loss. On the same day Meade moved out and carried two redoubts and a line of rifle-pits at Peebles's farm, two miles west of the water, as a front in prisoners. Meade's left was attacked; but it successfully repelled the assault, and he advanced his line on the 2d. Butler lost, in the engagements of the 20th and 30th, 394 killed, 1,584 wounded, and 824 missing. Meade lost, from 2d Sept. to 2 Oct., 161 killed, 516 wounded, and 1,148 missing. On 19 Oct., Sheridan's army was attacked by Early at Cedar Creek. Sheridan, who was on his return from Washington, rode twenty miles from Winchester, turned a defeat into a decisive victory, captured 24 guns, 1,600 prisoners, and 300 wagons, and left the enemy a complete wreck. On 27 Oct., Butler was ordered to make a demonstration against the enemy's line in his front, and had some fighting. At the same time, Meade moved out to Hatcher's run; but the enemy was found strongly intrenched, the greatest part of the population had been evacuated, and they attacked and captured two batteries. In the afternoon a heavy attack was made by the enemy, but was successfully resisted. That night the National forces were withdrawn to their former positions. Meade's loss was 143 killed, 608 wounded, and 488 missing. The enemy's casualties were heavy, as 15,189 prisoners alone about 1,300 men. Butler lost on this day 700 in killed and wounded, and 400 prisoners.

Sherman destroyed the railroad in his rear, cut loose from his base, and set out from Atlanta, 16 Nov., on his march to Savannah. Gen. John H. Hunt, as ordered, attacked and repulsed General Thomas, who had been placed in command of the troops left for the defense of Tennessee. Thomas concentrated his forces in the vicinity of Nashville. Schofield was at Franklin, twenty-five miles from Nashville, and destroyed a large amount of railway and railroad establishments, and forty-three cannon. The enemy was compelled to evacuate Charleston. On 3 March, Sherman struck Cheraw, and seized a large quantity of material of war, including 25 guns and 3,600 barrels of gun cotton. On 24 Nov., he captured Columbia on 16 Dec., and destroyed large amounts of cotton in the Carolina. On 9 Dec., he captured the finely equipped arsenal and twenty guns. On the 12th he took Savannah.

The Confederates reported their loss at 500. On the 19th Johnston's army attacked a portion of Sherman's forces at Bentonville, and made six heavy assaults, which were all successfully met, and on the night of the 21st the enemy fell back. The National loss was 191 killed and 1,455 wounded and missing, that of the Confederates was reported on 233 killed, 1,457 wounded, 633 missing, but Sherman reports his captures of prisoners at 1,621. On the 23d Sherman reached Goldsboro, where Schofield had arrived two days before, and was again in communication with the sea-coast, and able to draw supplies. On 20 March, Gen. George Crook was sent east of the Tennessee, toward Lynchburg, and on the same day Gen. E. R. S. Canby moved against Mobile. Gen. Pope, who had succeeded Rosecrans in Missouri, was ordered to drive Price beyond Red river. Hancock had been assigned to command the middle division of the Army of the Potomac, and the troops under him near Washington were held in readiness to move.
All was now in readiness for the spring campaign, which Grant intended should be the last. President Lincoln, between whom and Grant had sprung up a strong personal attachment, visited him at City Point on 22 March, and Sherman came there on the 27th. They, with Grant and Admiral Porter, were on their way to meet the exiled General on the 26th, when Sherman set out again to join his army. At daylight on 25 March, Lee had made a determined assault on Grant's right, capturing Fort Steadman, breaking through the National lines, and gaining possession of several batteries; but in a few hours he was driven back, and all the captured positions were regained. Lee took this step to endeavor to force the withdrawal of troops in front of his left, and enable him to leave his intrusions and retreat toward Danville. Its failure prevented the attempt. The country roads being considered sufficiently dry, Grant had issued orders for a general advance on the 29th, and these were carried out at the appointed time. Sheridan, with his cavalry, was sent in advance to Dinwiddie Court-House. The 5th corps had some fighting on the 29th, and in moving forward on the 31st was attacked and driven back a mile. Supported by a part of the 2d corps, it made a counter-attack, drove the enemy back into his breastworks, and secured an advanced position. Sheridan had pushed on to Five Forks, but his command encountered a strong force of infantry and cavalry, and after a heavy fight all day he fell back to Dinwiddie Court-House, where he repelled the repeated assaults made upon him, and held the place. The 5th corps was that night ordered to report to Sheridan. The enemy, on the morning of 1 April, fell back toward Five Forks, closely followed by Sheridan, which pressed the enemy closely. In the afternoon he had taken up a strongly intrenched position at Five Forks, on Lee's extreme right. The 5th corps having joined Sheridan, he made a combined attack, with infantry and cavalry, and by nightfall had gained a brilliant victory, capturing the Confederate works, 6 guns, and nearly 8,000 prisoners. His cavalry pursued the broken and flying enemy for six miles beyond the field of battle. That night, after getting the full details of Sheridan's success, Grant determined to make a vigorous assault the next day, with all his troops upon the lines around Petersburg. It began at daylight, 2 April; the works were carried, and in a few hours Grant was closing in upon the inner defenses of the city. Two of the forts, Gregg and Whitworth, were secured in the afternoon. The former was captured by assault, the latter was evacuated; 12,000 prisoners and over fifty guns were already in Grant's hands. Richmond and Petersburg were evacuated that night, and the National forces entered and took possession on the morning of the 3d. Grant, anticipating this, had begun a movement westward during the night, to head off Lee from Danville, and a vigorous pursuit by the whole army was ordered. It became evident that Lee was moving toward Amelia Court-House, and a force was urged forward to Jetersville, on the Danville railroad, to get between him and the cavalry, where he met him, and the head of the 5th corps reached there on the afternoon of the 4th and intrenched. The Army of the Potomac arrived by forced marches on the 5th, while the Army of the James, under Ord, pushed on toward Burkeville. An attack was ordered upon Lee's right, on the 6th, but he fell back from the left Amelia Court-House during the night, and was pushing on toward Farmville by the Deatonsville road. He was closely pursued, and on the afternoon of the 6th, Sheridan, with his cavalry and the 6th corps, attacked him at Sailor's Creek, capturing 7 general officers, about 7,000 men, and 14 guns. The 2d corps had kept up a running fight with the enemy all day, and had captured 4 guns, 1,700 prisoners, 13 flags, and 300 wagons. Lee was continuing his retreat through Farmville, and Grant urged troops to that place by forced marches on the 7th. The 2d corps and a portion of the cavalry had been repelled in their attacks on Lee, north of the Appomattox, and the 6th corps crossed from Farmville on the evening of the 7th to re-enforce them. That night Grant sent a note from Farmville to Lee, calling his attention to the hopelessness of further resistance, and asking the surrender of his army. He received a reply from Lee on the morning of the 8th, saying he was not entirely of Grant's opinion as to the hopelessness of further resistance, but asking what terms would be offered. Grant, who was still at Farmville, immediately replied, saying that, as peace was his great desire, he would insist on but one condition—that the men and officers surrendered should be disqualified from taking up arms again until properly exchanged. On the 8th Lee's troops were in full retreat on the north side of the Appomattox. The 2d and 6th corps followed in hot pursuit on that side, while Sheridan, Ord, and the 6th corps were pushed forward with all speed on the south side to head off Lee from Lynchburg. Near midnight on the night of the 8th Grant received another note from Lee, saying he had not intended to propose the surrender of his army, but desired to know whether Grant's proposals would lead to peace, and suggested a meeting at 10 a.m. the next morning. Grant replied that such a meeting could lead to no good, as he had no authority to treat on the subject of peace, but suggested that the south's laying down their arms would hasten the event and save thousands of lives and hundreds of millions of property. Early on the morning of 9 April, Lee's advance arrived at Appomattox Court-House; but by extraordinary forced marches, Sheridan, Ord, and Griffin reached that place at the same time. Lee attacked the cavalry; but, when he found infantry in his front, he sent in a flag of truce, and forwarded a note to Grant, asking an interview in accordance with the offer contained in Grant's letter of the day before. Grant received it on the road while riding toward Appomattox Court-House, and sent a reply saying he would move forward and meet Lee at any place he might select. They met in the McLean house, in Appomattox (see accompanying illustration), on the afternoon of the 9th, and the terms of surrender were drawn up by Grant and accepted by Lee. The conference lasted about three hours. The men and officers were paroled and allowed to
The U.S. court in Virginia had found indictments against Gen. Lee and other officers prominent in the rebellion, and much anxiety was manifested by them over their fate. These terms were so magnanimous, and the treatment of Lee and his officers so considerate, that the effect was to induce other Confederates to seek the same terms and bring the rebellion to a speedy close. In riding to his camp after the surrender, Grant heard that Lee had said at once to suppress them, and said: “The war is over; the rebels are again our countrymen, and the best sign of rejoicing after the victory will be to abstain from all demonstrations in the field. The number paroled was 23,386. In addition to these, 18,129 had been captured during the campaign since 29 March. The killed were estimated at 6,000. After 9 April, over 20,000 stragglers and deserters besides came in and surrendered. The National losses during this period were 2,000 killed, 6,500 wounded, and 2,500 missing. Grant’s losses, including those of Butler’s army during the year beginning with the battle of the Wilderness, were 12,868 killed, 49,559 wounded, and 30,498 missing; total, 82,720. No accurate reports of the Confederate losses can be obtained; but Grant’s captures in less than a month amounted to fully 63,000, and the regular paroled prisoners of war, and to desist from further prosecution of them.”

On 10 April, Grant went to Washington to hasten the disbanding of the armies, stop purchases of supplies, and save expense to the government. He did not stop to visit Richmond. President Lincoln was assassinated on the 14th, and Grant would probably have been the same day had he been leaving Washington that day. On 18 April, Sherman received the surrender of Johnston’s army, but on terms that the government did not approve, and Grant was sent to North Carolina to conduct further negotiations. On the 26th Johnston surrendered to Sherman in the presence of those given to Lee, and 31,248 men were paroled. Grant remained at Raleigh and avoided being present at the interview, leaving to Sherman the full credit of the capture. Canby’s forces appeared before Mobile on 27 March, and the principal defensive works were captured on 9 April, and Mobile was evacuated on the 11th, when 200 guns and 4,000 prisoners were captured, but about 9,000 of the garrison escaped. Wilson’s cavalry command captured Selma, Ala., on 3 April, and Tuscaloosa on the 4th, occupied Montgomery on the 14th, and took Fort Point and Gold drive, Ga., and Fort Moultrie, S.C., on the 16th. Macon surrendered on the 21st. Kirby Smith surrendered his command, west of the Mississippi, on the 26th. There was then not an armed enemy left in the country, and the rebellion was ended. Grant established his headquarters in Washington. He was greeted with ovations wherever he went, honors were heaped upon him in every part of the land, and he was universally hailed as the country’s deliverer. In June, July, and August, 1865, he made a tour through the northern States and Canada. In November he was welcomed in New York by a demonstration that exceeded all previous efforts. It consisted of a banquet and reception, and the manifestations of the people in their greetings knew no bounds. Immediately after the war, Grant sent Gen. Sheridan with an army corps to the Rio Grande, with directions to support the French, who were then in Mexico supporting the Imperial government there in violation of the Monroe doctrine. This demonstration was the chief cause of the withdrawal of the French. Maximilian, being left without assistance from a European power, was soon driven from his throne, and the republic of Mexico was re-established.

In the autumn of 1866, President Johnson having changed his policy toward the south, finding that Grant refused to support him in his intentions to assume powers that Grant believed were vested only in congress, ordered him out of the country, with directions to support the Emperor Maximilian of Mexico. Grant refused, saying that this was not a military service but a diplomatic mission, and that he claimed the right possessed by every citizen to decline a civil appointment. An effort was afterward made to send him west, to prevent his presence in Washington, but it failed. The 39th congress, fearing the result of this action
GRANT

on the part of the president, attached a clause to the army appropriations bill passed on 4 March, 1867, providing that: "all orders and instructions relating to military operations shall be issued through the general of the army," and added that he should "not be removed, suspended, or relieved from command, or assigned to duty elsewhere than at the headquarters in Washington, except at his own request, without the previous approval of the senate." The president signed the bill, with a protest against this clause, and soon obtained an opinion from his attorney-general that it was unconstitutional. The president then undertook to send this opinion to the district commanders, but, finding the secretary of war in opposition, he issued it through the adjutant-general's office. Gen. Sheridan, then at New Orleans, in command of the fifth military district, inquired what to do, and Grant replied that a "legal opinion was not entitled to the force of an order," nor to enforce his own construction of the law until otherwise ordered.

This brought on a crisis. The president claimed that under the constitution he could direct the district commanders to issue such orders as he directed, and that he had met this objection by the act of congress, passed in July, 1866. The district commanders had been ordered by the act of congress to "subject to the disapproval of the general of the army." Thus Grant was given chief control of affairs relating to the reconstruction of the southern states. The president still retained the power of removal, and on the adjournment of congress he removed Gen. Hancock out of the service for his acts in Louisiana, Stanton opposed it, and it was defeated. Soon afterward he recommended Hancock for a major-generalship in the regular army, to which he was appointed.

The "caucus" order, and was opposed by the president from removing a cabinet officer without the consent of the senate; but President Johnson suspended Sec. Stanton, and appointed Grant secretary of war ad interim on 12 Aug., 1867. Grant protested against this action, but retained the office until 14 Jan., 1868, when the senate refused to confirm the suspension of Stanton. Grant immediately notified the president, who, finding that the general of the army would not retain the place in opposition to the will of congress, and that Sec. Stanton had re-entered upon his office, ordered Grant verbally to disregard Stanton's orders. Grant declined to do so unless he received instructions in writing. This led to an acrimonious correspondence. The president claimed that Grant had promised to sustain him. This Grant emphatically denied, and in a long letter reviewing his action said: "The course you would have me undertake is to agree to a pursuit, was in violation of law, and was without orders from you, while the course I did pursue, and which I never doubted you understood, was in accordance with law. . . . And now, Mr. President, when my honor as a soldier and integrity as a man have been so violently assailed, do you imagine for one instant that I regard this whole matter, from the beginning to the end, as an attempt to involve me in the resistance of law for which you hesitate to assume the responsibility in orders?" On 21 Feb., the president appointed Lorenzo Thomas adjutant-general, and on 28 Feb., directing Gen. Hancock to take possession of the office. On 24 Feb., articles of impeachment were passed by the house of representatives. Throughout these years of conflict between the executive and congress, Grant's position became extremely delicate and was subject to military operations shall be issued through the general of the army," and added that he should "not be removed, suspended, or relieved from command, or assigned to duty elsewhere than at the headquarters in Washington, except at his own request, without the previous approval of the senate." The president signed the bill, with a protest against this clause, and soon obtained an opinion from his attorney-general that it was unconstitutional. The president then undertook to send this opinion to the district commanders, but, finding the secretary of war in opposition, he issued it through the adjutant-general's office. Gen. Thus Grant was given chief control of affairs relating to the reconstruction of the southern states. The president still retained the power of removal, and on the adjournment of congress he removed Gen. Hancock out of the service for his acts in Louisiana, Stanton opposed it, and it was defeated. Soon afterward he recommended Hancock for a major-generalship in the regular army, to which he was appointed.
for the office. So much doubt existed as to his political proclivities that prominent Democrats had made overtures to him to accept a nomination from their party only a few months before the nominating conventions were held. But he was at heart in thorough accord with the principles of the Republican party. He believed in a national banking system of a character that would fairly protect American industries, in the fostering of such internal improvements as would unite our seaboards and give the eastern and western sections of the country mutual support and protection, in the establishment of a militia that would secure equal justice to all citizens of the republic, regardless of race, color, or previous condition.

As early as August, 1863, he had written a letter to Elihu B. Washburne, member of congress, in which he said: "It became patent to my mind early in the rebellion that the north and south could never live at peace with each other except as one nation, and that without slavery. As anxious as I am to see peace established, I would not, therefore, be willing to see any settlement until this question is forever settled." In his inaugu-

rantial address, he declared that the bonds should be paid in gold, and advocated a speedy return to specie payments, and made many important recommenda-
tions in reference to public affairs. Regarding the good faith of the nation he said: "To protect the national honor, every dollar of government indebtedness should be paid in gold, unless otherwise expressly stipulated in the contract. . . . Let it be understood that no repudiator of one farthing of our public debt will be trusted in public place, and it will go far toward strengthening a credit which ought to be the best in the world, and will ultimately enable us to replace the debt with bonds bearing less interest than we now pay." Congress acted promptly upon his recommendation, and on 18 March, 1869, an act was passed entitled "An act to strengthen the public credit." Its language gave clear proof to the world that the debts of the country would be paid in coin unless there were in the obligations express stipulations to the contrary. Both in his inaugural address and in his first annual message to congress he took strong ground in favor of an effort to "civilize and Chris-
tianize" the Indians, and fit them ultimately for citizenship. His early experience among these people, while serving on the frontier, had eminently fitted him for inaugurating practical methods for improving their condition. He appointed as commissioner of Indian affairs the chief of the Six Nations, Gen. Ely S. Parker, a highly educated Indian, who had served on his staff, and selected as members of the board of Indian commissioners gentlemen named by the various religious denom-
inations throughout the country. Although such men were not always practical in their views, and many obstacles had to be overcome in working out this difficult problem, great good resulted in the end; public attention was attracted to the amelio-
ration of the condition of our savage tribes; they came to be treated more like wards of the nation, were gathered upon government reservations, where there was less danger of their being murdered for, the number of Indian wars was reduced, and large sums of money were saved to the government.

The 15th amendment to the constitution, adopted 26 Feb., 1869, guaranteed the right of suffrage without regard to race, color, or previous condition of servitude, to all citizens of the four

fourths of the states, and declared in force, 30 March, 1870. The adoption of this amendment had been recommended by President Grant, and had had his active support throughout, and it is largely due to his efforts that it is now a part of the constitution. He proclaimed its adoption by the somewhat unusual course of sending a special mess-
gage to congress, in which he said: "I regard it as a measure of grander importance than any other one act of the kind from the foundation of the govern-
ment to the present day." His special message that congress should encourage popular education, in order that the negro might become better fitted for the exercise of the privileges conferred upon him by this amendment.

In the summer of 1867 a dispatch from Santo Domingo informed the president that the government and people of that republic favored annexation to the United States. The president sent several officers of the government to investigate the condition of affairs there, and became so clearly impressed with the advantages that would result from the acquisition of that country that he negoti-
tiquote;ted a treaty of annexation, and submitted it to the senate at the next meeting of congress. In May, 1870, he urged favorable action on the part of that body in a message in which he set forth the reasons that had led him to believe that the bondholders should be paid in gold, advocated a speedy return to specie payments, and made many important recommenda-
tions in reference to public affairs. Regarding the good faith of the nation he said: "To protect the national honor, every dollar of government indebtedness should be paid in gold, unless otherwise expressly stipulated in the contract. . . . Let it be understood that no repudiator of one farthing of our public debt will be trusted in public place, and it will go far toward strengthening a credit which ought to be the best in the world, and will ultimately enable us to replace the debt with bonds bearing less interest than we now pay." Congress acted promptly upon his recommendation, and on 18 March, 1869, an act was passed entitled "An act to strengthen the public credit." Its language gave clear proof to the world that the debts of the country would be paid in coin unless there were in the obligations express stipulations to the contrary. Both in his inaugural address and in his first annual message to congress he took strong ground in favor of an effort to "civilize and Chris-
tianize" the Indians, and fit them ultimately for citizenship. His early experience among these people, while serving on the frontier, had eminently fitted him for inaugurating practical methods for improving their condition. He appointed as commissioner of Indian affairs the chief of the Six Nations, Gen. Ely S. Parker, a highly educated Indian, who had served on his staff, and selected as members of the board of Indian commissioners gentlemen named by the various religious denom-
inations throughout the country. Although such men were not always practical in their views, and many obstacles had to be overcome in working out this difficult problem, great good resulted in the end; public attention was attracted to the amelio-
ration of the condition of our savage tribes; they came to be treated more like wards of the nation, were gathered upon government reservations, where there was less danger of their being murdered for, the number of Indian wars was reduced, and large sums of money were saved to the government.

fourths of the states, and declared in force, 30 March, 1870. The adoption of this amendment had been recommended by President Grant, and had had his active support throughout, and it is largely due to his efforts that it is now a part of the constitution. He proclaimed its adoption by the somewhat unusual course of sending a special mess-
gage to congress, in which he said: "I regard it as a measure of grander importance than any other one act of the kind from the foundation of the govern-
ment to the present day." His special message that congress should encourage popular education, in order that the negro might become better fitted for the exercise of the privileges conferred upon him by this amendment.

In the summer of 1867 a dispatch from Santo Domingo informed the president that the government and people of that republic favored annexation to the United States. The president sent several officers of the government to investigate the condition of affairs there, and became so clearly impressed with the advantages that would result from the acquisition of that country that he negoti-
tiquote;ted a treaty of annexation, and submitted it to the senate at the next meeting of congress. In May, 1870, he urged favorable action on the part of that body in a message in which he set forth the reasons that had led him to believe that the bondholders should be paid in gold, advocated a speedy return to specie payments, and made many important recommenda-
tions in reference to public affairs. Regarding the good faith of the nation he said: "To protect the national honor, every dollar of government indebtedness should be paid in gold, unless otherwise expressly stipulated in the contract. . . . Let it be understood that no repudiator of one farthing of our public debt will be trusted in public place, and it will go far toward strengthening a credit which ought to be the best in the world, and will ultimately enable us to replace the debt with bonds bearing less interest than we now pay." Congress acted promptly upon his recommendation, and on 18 March, 1869, an act was passed entitled "An act to strengthen the public credit." Its language gave clear proof to the world that the debts of the country would be paid in coin unless there were in the obligations express stipulations to the contrary. Both in his inaugural address and in his first annual message to congress he took strong ground in favor of an effort to "civilize and Chris-
tianize" the Indians, and fit them ultimately for citizenship. His early experience among these people, while serving on the frontier, had eminently fitted him for inaugurating practical methods for improving their condition. He appointed as commissioner of Indian affairs the chief of the Six Nations, Gen. Ely S. Parker, a highly educated Indian, who had served on his staff, and selected as members of the board of Indian commissioners gentlemen named by the various religious denom-
inations throughout the country. Although such men were not always practical in their views, and many obstacles had to be overcome in working out this difficult problem, great good resulted in the end; public attention was attracted to the amelio-
ration of the condition of our savage tribes; they came to be treated more like wards of the nation, were gathered upon government reservations, where there was less danger of their being murdered for, the number of Indian wars was reduced, and large sums of money were saved to the government.

The 15th amendment to the constitution, adopted 26 Feb., 1869, guaranteed the right of suffrage without regard to race, color, or previous condition of servitude, to all citizens of the four

fourths of the states, and declared in force, 30 March, 1870. The adoption of this amendment had been recommended by President Grant, and
count of fraud and illegal practices at the polls. In the president's annual message to congress, December, 1869, he recommended the passage of an act authorizing the funding of the public debt at a lower rate of interest. This was followed by the passing of an act, approved 14 July, 1870, which authorized the secretary of the treasury to issue bonds to the amount of $200,000,000, bearing interest at the rate of 5 per cent., $300,000,000 at the rate of 4 1/2 per cent., and $1,000,000,000 at the rate of 4 per cent. Under this act, and subsequent amendments thereto, the national debt has been refunded from time to time, until the average rate of actual interest does not exceed 4 per cent.

In 1870 President Grant sent special messages to congress urging upon that body the necessity of building up our merchant marine, and the adopting of methods for increasing our foreign commerce, and relating to our relations with Spain, which had become strained in consequence of the action of Spanish officials in Cuba. In August of this year, soon after the beginning of the war between France and Germany, he issued a proclamation of neutrality as to both of those nations, and defined the duties of Americans toward the belligerents. He directed the U. S. minister to France, Elihu B. Washburne, to remain at his post in Paris, and extend the protection of the American flag to peoples of all nationalities who were without the protection of their own flag—an act that saved much suffering and loss to individuals.

In his annual message in 1870, the president took strong ground in favor of civil service reform, saying: "I would have it govern, not the tenure, but the manner of making all appointments," and "The present system does not secure the best men, and not even fit men, for public place." This subject gave rise to a spirited controversy in congress, many declaring the principle to be wholly unknown in America, and calculated to build up a favored class, who would be in great measure independent of their executive chiefs, etc. But on 3 March, 1871, an act was passed authorizing the president to appoint a civil service commission, and to prescribe rules and regulations governing the appointments of civil officers. He appointed seven gentleman on this commission, selecting those who had been most prominent in advocating the measure, and transmitted their report to congress, with a special message urging favorable action. The plan recommended, which provided for competitive examinations, was approved, and was put into operation Jan., 1872. An appropriation had been procured for the expenses of the commission and the carrying out of the plan, but congress gave little countenance to the measure. Up to 1874 the president continued to urge that body to give legislative sanction to the rules and methods proposed, and declared that it was impossible to maintain the system without the "positive support of congress." He finally notified congress that if it ad-

journed without action he would regard it as a disapproval of the system, and would abandon it; but he continued it until its expenses were provided for. The agitation of the question had been productive of much good. The seeds thus sown had taken deep root in the minds of the people, and bore good fruit in after years. In March, 1871, the disaffection in the southern states, growing out of conflicts between the whites and the blacks, had assumed such proportions that the president sent a special message to congress requesting "such legislation as shall effectually secure life, liberty, and property, and the enforcement of law throughout all parts of the United States." In April congress passed an act that authorized the president to suspend, under certain defined circumstances, the writ of habeas corpus in any district, and to use the army and navy in suppressing insurrections. He issued a proclamation, 4 May, ordering all unlawful armed bands to disperse, and, after expressing his reluctance to use the extraordinary power conferred upon him, said he would "not hesitate to exhaust the power thus vested in the executive, whenever and wherever it shall become necessary to do so for the purpose of securing to all the citizens of the United States the peaceful enjoyment of the rights guaranteed to them by the constitution and the laws." As this did not produce the desired effect, he issued a proclamation of warning, 12 Oct., and on the 17th suspended the writ of habeas corpus in parts of North and South Carolina. He followed this by vigorous prosecutions, which resulted in sending a number of prominent offenders to prison, and the outrages soon ceased. The most important measure of foreign policy during President Grant's administration was the treaty with Great Britain of 8 May, 1871, known as the treaty of Washington. Early in his administration the president had begun negotiations looking to the settlement of the claims made by the United States against Great Britain, arising from the depredations upon American vessels and consuls and property by Confederate cruisers which had been fitted out or obtained supplies in British ports, and the questions growing out of the Canadian fishery disputes and the location of our northern boundary-line at its junction with the Pacific ocean, which left the jurisdiction of the island of San Juan controversial. Nearly all of the above-mentioned questions had been settled by the treaty of peace of 1783, or any subsequent treaties. The fishery question was referred to arbitration by three commissioners, one to be chosen by the United States, one by Great Britain, and the third by the other two, provided they should make a choice within a stated time, otherwise the selection to be made by the Emperor of Austria. The two commissioners having failed to agree, the third was named by the Austrian emperor. The award was unsatisfactory to the United States, the decision of the commission was severely criticized, and the dispute has from time to time been reopened to the detriment of both countries. The San Juan question was referred to the emperor of Germany as arbitrator, with sole power. His award fully sustained the claim of the United States. A high joint commission was appointed at Washington, composed of American and English statesmen, which formulated the treaty of Washington, and by its terms the claims against Great Britain growing out of the operations of the Confederate cruisers, commonly known as the "cruiser claims," were referred to a court of arbitration, which held its session at Geneva, Switzerland. In September, 1872, it awarded the United States the sum of $15,
policy was steadfast, dignified, and just, always exhibiting a conscientious regard for the rights of foreign nations, and at the same time maintaining the rights of our own. He instructed the ministers to China and Japan to deal with those powers as "we would wish a strong nation to deal with us if we were weak." During the insurrection in the island of Cuba, which had lasted for several years, a number of American citizens had been arrested by the Spanish authorities, under the pretense that they had been furnishing aid to the insurgents, and American vessels plying in Cuban waters had at times been subjected to much inconvenience. Then matters culminated in the seizure by Spain, without justification, of an American vessel named the "Virginii." The excitement created in the United States by this outrage was intense, and many statesmen were clamorous for war. But the president believed that pacific measures would accomplish a more satisfactory result, and, by acting with promptness and firmness, he soon wrung from Spain ample apology and full reparation.

Political troubles were still rife in certain states of the South. The result of the election in Louisiana in 1872 was in dispute, and armed violence was threatened in that state. Early in 1873 the president called the attention of congress to the inadequacy of the laws applying to such cases, saying that he had recognized the officers installed by the decision of the returning-board as representing the de facto government, and added: "I am extremely anxious to avoid any appearance of undue interference in state affairs, and if congress differs from me as to what ought to be done, I respect fully urge its immediate decision to that effect." Congress, however, took no action, and left with the executive the sole responsibility of dealing with this delicate question. The next year the trouble was renewed, and the fierce contest that was waged between the Republicans under Kellogg, and the Democrats under McHenry, their respective candidates for the governorship, resulted in armed hostilities. Kellogg, the de facto governor, called upon the Federal authority for protection, and Gen. Emory was sent to New Orleans with U. S. troops, and the outbreak was for a time suppressed. But difficulties arose again, and the president sent Gen. Sheridan to Louisiana to report upon the situation of affairs, and, if necessary, to take command of the troops and adopt vigorous measures to preserve the peace. Gen. Sheridan became convinced that his duty was to sustain the government organized by Kellogg, and, on the demand of the governor, he ejected some of McHenry's adherents from the state capitol. The president submitted the whole history of the case to congress, asking for legislation defining his duties in the emergency. Getting no legislation on the subject, he continued his recognition of the government, of which Kel-
logg was the head, until the election of a new governor; but there was afterward no serious trouble in Louisiana. Difficulties of the same nature arose in Arkansas and Texas, which were almost as perplexing to the executive; but these attracted less attention because of the public. Difficulties of a somewhat similar kind were encountered also in Mississippi, but the president in this case avoided interference on the part of the general government.

In April, 1874, congress passed what was known as the "Inflation bill," which increased the paper currency of the country, and was contrary to the financial principles that the president had always entertained and advocated in his state papers. Many of his warmest political supporters had approved the measure, and unusual efforts were made to convince him that it was wise financially and expedient politically. The president gave much thought and study to the question, and at one time wrote out the draft of a message in which he set forth all the arguments that could be made in its favor, in order that he might fully weigh them; but, on reading it over, he became convinced that the arguments were unsound and weak, and that the measure would in the end be injurious to the true business interests of the country, and delay the resumption of specie payment. He therefore returned the bill to congress, with his veto, 22 April. The arguments contained in his message were republished, while the whole of the veto, and his course was sustained by the whole country. Perhaps no act of his administration was more highly approved by the people at large, and the result amply proved the wisdom of the firmness he exhibited at this crisis. About two months after this, in a conversation at the executive mansion with Senator Roscoe Conkling, of New York, and Senator John P. Jones, of Nevada, the president entered at length upon his views concerning the duty of the government to take steps looking to the resumption of specie payment. The earnestness on this subject, and the advantages of the methods proposed, so impressed the senators that they asked him to commit his views to writing. He complied with this request by writing a letter addressed to Senator Jones, dated 4 June, 1874, in which he began by saying, "I believe it a high and plain duty to return to a specie basis at the earliest practical day, not only in compliance with legislative and party pledges, but as a step indispensable to national lasting prosperity." Then followed his views at length. This letter was made public, and attracted much attention, and in January, 1875, the "Resumption act" was passed, which, to a large extent, embodied the views that had been suggested by the president.

There were doubts in the minds of many as to the ability of the government to carry it into effect; but it proved entirely successful, and the country was finally relieved from the stigma of circulating an irredeemable paper currency.

During 1875 the president had reason to suspect that frauds were being practised by government officials in certain states in collecting the revenue derived from the manufacture of whiskey. He at once took active measures for their detection, and the vigorous pursuit and punishment of the offenders. He issued a stringent order for their prosecution, closing with the famous words, "Let no guilty man escape." Many indictments soon followed, the ringleaders were sent to the penitentiary, and an honest collection of the revenue was secured. Some of the revenue officials were men of much political influence, and had powerful friends. The year for nominating a president was at hand, and the excitement ran high. Friends of the convicted, political enemies and rivals for the succession in his own party, resorted to the most desperate means to break the president's power and diminish his popularity. The grossest misrepresentations were practised, first in trying to bring into question the honesty of his public conduct and the prosecution afterward in endeavoring to rob him of the credit of his labor after they had purified the revenue-service. But these efforts signally failed.

In September, 1875, Gen. Grant, while attending an army review, offered three resolutions on the subject of education, and made a speech in which he used this language: "Let us labor for the security of free thought, free speech, free press, pure morals, unfeignedly religious sentiments, and equal rights and privileges for all men, irrespective of nationality, color, or religion; encourage free schools; resolve that not one dollar appropriated to them shall go to the support of any sectarian school; resolve that neither state nor nation shall support any institution save those where every child may get a common-school education, and leave the matter of religious teaching to the family altar, and keep church and state forever separate." This was published broadcast, and was received with marked favor by the press and people.

In 1876, Gen. J. T. Grant, of New York, was nominated for the presidency by the Democrats, and Gen. Rutherford B. Hayes, of Ohio, by the Republicans. When the election was held in November, the result was in dispute, and a bitter contest was likely to follow in determining which of the two was the legally elected candidate. After an exciting debate in congress, a bill was passed providing for an electoral commission, to whose decision the question was to be referred. It decided in favor of Gen. Hayes, and he was inaugurated on 4 March, 1877. During this time the national passions of the people were raised to fever-heat, serious threats of violence were made, and the business interests of the country were greatly disturbed. President Grant took no active part in the determination of the question, but devoted himself to the preservation of the peace. After his inauguration there were many changes in the cabinet during Grant's two administrations. The following is a list of its members, giving the order in which they served:

- Secretaries of state: Elihu B. Washburne, of Illinois; Hamilton Fish, of New York.
- Secretaries of the treasury: Alexander T. Stewart, of New York (appointed, but not confirmed, on account of the discovery of an old law rendering him ineligible because of his having engaged in the business of an importing merchant); George S. Boutwell, of Massachusetts; William M. Richardson, of Massachusetts; Benjamin H. Bristow, of Kentucky; Lot M. Morrill, of Maine.
- Secretaries of the interior: James A. Garfield, of Pennsylvania; James A. Garfield, of Ohio; George E. Boring, of Pennsylvania; George M. Robeson, of New Jersey.
- Secretaries of the post office: John A. A. Creswell, of Maryland; Marshall Jewell, of Connecticut; James A. Tyner, of Indiana.
- Secretaries of the navy: Ebenzer R. Hoar, of Massachusetts; Amos T. Akerman, of Georgia; George H. Williams, of Oregon; Edwards Pierpont, of New York; Alonzo Taft, of Ohio.
- Secretaries of agriculture: Interior: Gen. Jacob D. Cox, of Ohio; Columbus Delano, of Ohio; Zachariah Chandler, of Michigan.

(See articles on each of these cabinet offi-
Grant's administrations the taxes had been reduced over $300,000,000, the national debt over $450,000,000, the interest on the debt from $160,000,000 to $100,000,000; the balance of trade had changed from $120,000,000 against this country to $130,000,000 in its favor; the reconstruction of the southern states had been completed; the first transcontinental railroad had been finished; all threatening foreign complications had been satisfactorily settled; and all exciting national questions seemed to have been determined and removed from the arena of political contests. Gen. Grant, while president, exhibited the same executive ability as in the army, insisting upon a proper division of labor among the different branches of the government, leaving the head of each department great freedom of action, and holding him to a strict accountability for the conduct of the affairs of his office. He decided with great promptness all questions referred to him, and suggested many measures for improving the government service, but left the carrying out of details to the proper chiefs. While positive in

his nature led him at times to be imposed upon by those who were not worthy of the faith he placed in them; but persons that once lost his confidence, never regained it.

After retiring from the presidency, 4 March, 1877, Gen. Grant decided to visit the countries of the Old World, and on 17 May he sailed from Philadelphia for Liverpool on the steamer "Indiana," accompanied by his wife and one son. His departure was the occasion of a magnificent demonstration on the Delaware. Distinguished men from all parts of the country had assembled to bid him good-by, and accompanied him down the river. A fleet of naval and commercial vessels and river boats, decorated with brilliant banners, convoyed his steamer, crowds lined the shores greeting him with cheers, bells rang, whistles sounded from mills and factories, and innumerable flags saluted as he passed. On his arrival in Liverpool, 28 May, he received the first of a series of ovations in foreign lands scarcely less cordial and demonstrative than those which had been accorded him in his own country. The river Mersey was covered with vessels displaying the flags of all nations, and all vied with each other in their demonstrations of welcome. He visited the places of greatest interest in Great Britain, and was accorded the freedom of her chief cities. At each place the granting of citizenship. He received a greater number of such honors than had ever been bestowed even upon the most illustrious Englishman. In London he was received by the queen and the Prince of Wales, and afterward visited her majesty at Windsor Castle. While he was entertained in a princely manner by royalty, the most enthusiastic greetings came from the masses of the people, who everywhere turned out to welcome him. His replies to the numerous addresses of welcome were marked by exceeding good taste and were read with much favor by his own countrymen. Upon leaving England he visited the continent, and the greetings there from crowned heads and common people were repetitions of the receptions he had met ever since he landed in Europe. The United States minister had been put at his disposal, and on board that vessel he made a cruise in the Mediterranean, visiting Italy, Egypt, and the Holy Land. He sailed from Marseilles for India, 23 Jan., 1873, arrived at Bombay, 12 Feb., and from there visited Calcutta and many other places of interest. He journey through the country called forth a series of demonstrations which resembled the greetings to an emperor passing through his own realms. He sailed in the latter part of March for Burmah, and afterward visited the Malacca peninsula, Siam, Cochin China, and Hong-Kong, arriving at the latter place on 30 April. He made a tour into the interior of China, and was everywhere received with honors greater than had ever been bestowed upon a foreigner. At Pekin, Prince Kung requested him to act as sole arbiter in the settlement of the dispute between that country and Japan concerning the Loo Choo islands. His plans prevented him from entering upon the duties of arbitrator, but he studied the questions involved and gave his advice on the subject, and the matters in dispute were afterward settled. On 21 June he reached Nangasaki, where he was received by the imperial officials and became the guest of the mikado. The attention shown him while in Japan exceeded in some of its features that which he had received in any of the other countries included in his tour. The entertainments prepared in his honor were memorable in

his views, and tenacious of his opinions when they had once been formed after due reflection, he listened patiently to suggestions and arguments, and had no pride of opinion as to changing his mind, if convincing reasons were presented to him. He was generally a patient listener while others presented their views, and seldom gave his opinions until they were thoroughly matured; then he talked freely and with great force and effect. He was one of the most accessible of all the presidents. He reserved no hours that he could call his own, but was ready to see all classes of people at all times, whether they were high in position or from the ranks of the plain people. His patience was one of the most characteristic traits of his character, and his treatment of those who came in contact with him was frank and cordial to the highest degree. His devotion to his friends was proverbial, and his loyalty to others commanded loyalty from them, and accounted, in great measure, for the warmth and devotion of his followers. Wherever he placed trust he reposed rare confidence, until it was shaken by actual proofs of betrayal. This characteristic of
the history of that empire. He sailed from Yokohama, 8 Sept., and reached San Francisco on the 20th. He had not visited the Pacific coast since he had served there as a lieutenant of infantry. Preparations had been made for a reception that should surpass any ever accorded to a public man in that part of the country, and the demonstration in the harbor of San Francisco on his arrival formed a pageant equal to anything of the kind seen in modern times. On his journey east he was tendered banquets and public receptions, and greeted with every manifestation of welcome in the different cities at which he stopped. Early in 1880, he travelled through some of the southern states and visited Cuba and Mexico. In the latter country he was hailed as its staunchest and most pronounced friend in the days of its struggle against foreign usurpation, and the people testified their gratitude by extending to him every possible act of personal and official courtesy. On his return he took his family to his old home in Galena, Ill. A popular movement had begun looking to his renomination that year for the presidency, and overtures were made to him to draw him into an active canvass for the purpose of accomplishing this result; but he declined to take any part in the movement, and preferred that the nomination should either come to him unsolicited or not at all. When the Republican convention met in Chicago in June, 1880, his name was presented.

In May, 1884, the firm without warning suspended. It was found that two of the partners had been practising a series of unblushing frauds, and had robbed the general and his family of all they possessed, and left them hopelessly bankrupt. Until this time he had refused all solicitations to write the history of his military career for publication, intending to leave it to the official records and the historians of the war. Almost his only contribution to literature was an article entitled "An Undeserved Stigma," in the "North American Review" for December, 1882, which he wrote as an act of justice to Gen. Fitz-John Porter, whose case he had personally investigated. But now he was approached by the conductors of the "Century" magazine with an invitation to write a series of articles on his principal campaigns, which he accepted, for the purpose of earning money, of which he was then greatly in need, and he accordingly produced four articles for that periodical. Finding this a congenial occupation, and receiving handsome offers from several publishers, he set himself to the task of preparing two volumes of personal memoirs, in which he told the story of his life down to the close of the war, and proved himself a natural and charming writer, and a valuable contributor to history. The contract for the publication of the book was made on 27 Feb., 1885, and the work appeared about a year afterward. The sales were enormous, having reached up

and for thirty-six ballots he received a vote that only varied between 302 and 313. Many of his warmest admirers were influenced against his nomination by a traditional sentiment against a third presidential term, and after a long and exciting session the delegates to the convention compromised by nominating Gen. James A. Garfield. Gen. Grant devoted himself loyally during this political canvass to the success of the party that had so often honored him, and contributed largely by his efforts to the election of the candidate.

In August, 1881, Gen. Grant bought a house in New York, where he afterward spent his winters, while his summers were passed at his cottage at Long Branch. On Christmas eve, 1883, he slipped and fell upon the icy sidewalk in front of his house, and received an injury to his hip, which proved so severe that he never afterward walked without the aid of a crutch. Finding himself unable with his income to support his family properly, he had become a partner in a banking-house in which one of his sons and others were interested, bearing the name of Grant and Ward, and invested all his available capital in the business. He took no part in the management, and the affairs of the firm were left almost entirely in the hands of the junior partner.

to this time 319,000 sets. The amount that Mrs. Grant has already (June, 1887) received as her share of the profits is $394,459.53, paid in two checks, of $200,000 and $150,000, and several smaller amounts, the largest sum ever received by an author or his representatives from the sale of any single work. It is expected by the publishers that the amount of half a million dollars will be ultimately paid to the general's family. In the summer of 1884 Gen. Grant complained of a soreness in the throat and roof of the mouth. In August he consulted a physician, and a short time afterward the disease was pronounced to be cancer at the root of the tongue. The sympathies of the entire nation were now aroused, messages of hope and compassion poured in from every quarter, and on 4 March, 1885, congress passed a bill creating him a general on the retired list, thus restoring him to his former rank in the army. He knew that his disease would soon prove fatal. He now bent all his energies to the completing of his "Memoirs," in order that the money realized from the sale might provide for his family. He summoned all his will power to this task, and nothing in his career was more heroic than the literary labor he now performed. Hovering between life and death, suffer-
ing almost constant agony, and speechless from disease, he struggled through his daily task, and laid down his pen only four days before his death. At this time the last portrait was made of the great soldier, which appears on page 718.

On 16 June, 1885, he was removed to the Joseph W. Dexter cottage on Montague St., Utica, near Sartoga, N. Y., where he passed the remaining five weeks of his life. (See illustration on page 721.)

The cottage was offered by its owner as a gift to the U. S. government. As it was not accepted, Mr. Dexter kept the cottage and its contents in the condition in which he left them at the general's death, and will continue to do so. On Thursday, 23 July, at eight o'clock in the morning, Grant passed away, surrounded by his family. The remains were taken to New York, escorted by a detachment of U. S. troops and a body of the Grand army of the republic composed of veterans of the war. A public funeral was held in that city on Saturday, 8 Aug., which was the most magnificent spectacle of the kind ever witnessed in this country. The body was deposited in a temporary tomb in Riverside park, overlooking the Hudson river, where it is preserved as a memorial monument, for which about $125,000 have already (June, 1887) been subscribed. In Chicago a bronze equestrian statue of the general, executed by Rebisco, will soon be erected near the centre of Lincoln park, overlooking Lake Michigan. The illustration on page 723 is a representation of the statue, which on the following page is a view of the eastern façade of the structure, designed by Whitehouse, which is surmounted by the statue. The large collection of swords, gold-headed canes, medals, rare coins, and other articles that had been presented to Gen. Grant passed into the possession of William H. Vanderbilt as security in a financial transaction shortly before the general's death. After that event Mr. Vanderbilt returned the articles to Mrs. Grant, by whom they were given to the United States government, and the entire collection is now in the National museum at Washington. Among the many portraits of the great soldier, perhaps the best are those painted by Healy for the Union league club about 1865, and another executed in Paris in 1877, now in the possession of the family, those painted in 1882 by Le Clear for the White House at Washington and the Calumet club of Chicago, and one executed by Ulke for the U. S. war department, where it is also to be seen a fine marble bust, executed in 1872–3, by Hiram Powers.

See “Military History of Ulysses S. Grant,” from April, 1861, to April, 1885,” by Adam Badeau (3 vols., New York, 1867–81); “Life and Public Services of Gen. U. S. Grant,” by James Grant Wilson (1869); revised and enlarged edition (1886); “Ancestry of General Grant and their Contemporaries,” by Edward C. Marshall (1890); “Around the World with General Grant,” by John Ruskin (1880); and “Personal Memoirs of U. S. Grant,” written by himself (2 vols., 1885–6); also various biographies and numerous addresses, among them one by Henry Ward Beecher, delivered in Boston, 22 Oct., 1866, his wife, Julia Dent, b. in St. Louis Mo., 26 Jan., 1826, is the daughter of Frederick and Ellen Wrenshall Dent. Her father was the son of Capt. George Dent, who led the forlorn hope at Fort Montgomery, when it was stormed by Mad Anthony Wayne. On her mother's side she was descended from John Wrenshall, who came from England to this country, to escape religious intolerance, and settled in Philadelphia, Pa. At the age of ten years she was sent to Miss Moreau's boarding-school, where she remained for eight years. Soon after her return home she met Lieut. Grant, then of the 4th infantry, stationed at Jefferson barracks at St. Louis, and in the spring of 1844 became engaged to him. Their marriage, deferred by the war with Mexico, took place on 22 Aug., 1848. The first year of married life was spent at Detroit, Mich., and at Sackett's Harbor, N. Y., where Capt. Grant was stationed. In 1852 Mrs. Grant returned to her father's home in St. Louis, her health not being sufficiently strong to accompany her husband to California, whither his command had been ordered.

Two years later he resigned from the army and joined his family in St. Louis. During the civil war Mrs. Grant passed much of the time with Gen. Grant, or near the scene of action, he sending for her whenever opportunity permitted. She was with him at City Point in the winter of 1864–5, and accompanied him to Washington when he returned with his victorious army. She saw her husband twice inaugurated president of the United States, and was his companion in his journey around the world. She herself has said: “Having learned a lesson from her predecessor, Penelope, she accompanied her Ulysses in his wanderings around the world.” After Gen. Grant's death a bill was passed by congress giving his widow a pension of $5,000 a year. She is the fourth to whom such a pension has been granted, the others being Mrs. Tyler, Mrs. Polk, and Mrs. Garfield. Four children were born to her—three sons, Frederick Dent, Ulysses, Jr., and Jesse, and one daughter, Nellie, who, in 1874, married Algernon Sartoris, and went to reside with him in England. Mrs. Grant resides in New York city, surrounded by her children and grandchildren.—The eldest son, Frederick Dent, b. in St. Louis, Mo., 30 May, 1850, accompanied his father during the civil war, and was in five battles before he was thirteen years of age. In 1867 he entered the U. S. military academy, where he was graduated in 1871 and assigned to the 4th cavalry. During the summer of 1871 he was employed on the Union Pacific and Colorado Central railroads as an engineer. Late in 1871 he visited Europe with Gen. Sherman, and in 1872 was detailed to command the escort to the party that was making the preliminary survey for the Southern Pacific Railroad. In 1875 he was assigned to the staff of Gen. Sherman as lieutenant-colonel, in which capacity he served eight years, accompanying nearly every expedition against the Indians. He is now with his father in the oriental part of the journey round the world, and in 1881 resigned his commission. During his father's illness, Col. Grant remained constantly with him and assisted somewhat in the preparation of the “Personal Memoirs.” Since Gen. Grant's death his son has been in the care of his mother and her estate, residing with her.

GRASSE, François Joseph Paul, count de, b. in Provence, France, in 1723; d. in France, 11 Jan., 1788. He entered the navy at the age of
fifteen. While lieutenant of a frigate he was captured by a British ship in 1742 and confined in England until he was exchanged. He served under La Galissonnière during the Seven Years' war, and assisted in taking Minorca. He was engaged under D'Ache in three actions with French in the East Indies, and towards the end of the war was made captain. At the beginning of 1781 he was appointed to command a French fleet to assist the Americans against the British, and, although much younger than Count de Barras, he was made superior in command, with the title of lieutenant-general. When the fortifying Yorktown, and Washington was uncertain what course to pursue, the agreeable intelligence was dispatched from Count de Barras that Grasse would sail from Cape François, W. I., on 13 April, for the mouth of the Chesapeake, with twenty-nine sail and 3,000 troops under command of the Marquis St. Simon. They arrived at the close of August, and at Cape Henry found an officer sent from Lafayette to give information to Grasse respecting the situation of the armies in Virginia. Although Rodney was informed of the movements of the French, he did not leave Sandy Hook until after their arrival in the Chesapeake. Carefully eluding the British fleet, Grasse blockaded the York and James rivers and defeated his men so as to cut off Cornwallis's retreat. Owing to the failure of the British admiral to bring his forces together, and to the adroitness of Grasse, the first encounter resulted in a victory for the French. On 17 Sept., Washington, accompanied by Rochambeau, Chastellux, Gen. Knox, and Gen. Du Portail, visited Grasse on his flag-ship, "La Ville de Paris," off Cape Henry, to make arrangements with regard to the attack upon Cornwallis at Yorktown. During this engagement the American troops were stationed on the right wing, the French on the left, and Grasse remained in Lynn Haven bay to prevent naval assistance from reaching Cornwallis. When Washington announced the victory, congress voted honors to him, to Rochambeau, and to Grasse, with special thanks to the French troops, as "victory had twined double garlands around the banners of France and America." At the close of the Virginia campaign Grasse embarked for the West Indies, receiving two horses as a token of personal esteem from Washington. On his return he established the naval power of France, recaptured and restored St. Eustatius to the United Provinces, and took St. Christopher Nevis and Montserrat. On 19 Feb., 1782, Rodney, who had been carefully watching his movements, appeared at Barbadoes with re-enforcements. In order to cope with him he ascended to unite with the Spanish squadron, and on 8 April, 1782, he sailed for Hispaniola. An engagement took place on 9 April at St. Domingue, and three days later Rodney, by skilful movements, drove the French into a broad expanse of water between several small islands. Having the advantage of ships in good repair and finely disciplined men, as well as advantage in numbers, he began the attack. Although the French handled their guns well at a distance, they needed presence of mind for a close engagement. The battle was concluded by a ship-to-ship encounter, and the "Ville de Paris" foundered. Grasse lost the favor of the king after this defeat, and lived unhappily until his death, six years later. Washington, alluding to the death of Grasse in a letter to Rochambeau, writes: "He seems to have died as he should be buried in the grave with him, while his name will be long deservedly dear to this country on account of his successful career in the glorious campaign of 1781."

GRASSI, John, clergyman, b. in Verona, Italy, 1 Oct., 1779; d. in Italy, 12 Dec., 1849. He entered the Society of Jesus in 1799, and in 1810 was sent to Maryland as superior of Jesuit missions. He was recalled to Italy in 1817, and afterward held several important offices in the order. He was rector of the College of Rome, and died in 1849 of his death assistant of Italy. He wrote on his return to Italy "Notizie varie sullo Stato presente della Repubblica degli Stati Uniti dell‘America Settentrionale scritte al principio del 1818" (Rome, 1818; Turin, 1822).

GRATACAP, Louis Pope, naturalist, b. in Brooklyn, N. Y., 1 Nov., 1850. He was graduated at the College of the city of New York in 1889 and at the Columbia school of mines in 1876. Subsequently he received the appointment of assistant curator in palaeontology and mineralogy in the American museum, his first publication being a short account of the arrangement of the specimens in the present building was largely conducted under his supervision. Mr. Gratacap has also held the office of chemist to the Metropolitan gaslight company in New York for many years. He has been a large contributor to scientific journals, and besides botanical notes in the "Bulletin of the Torrey Botanical Club," has published a series of papers on "The Ice Age" in the "Popular Science Monthly" for 1878, a series on "Gas and Gas-Making" in the "Scientific American Supplement" (1886), and a valuable series on archaeology in the "American Antiquarian" (1883-4). Mr. Gratacap is also the author of "Philosophy of Ritualism, or Apologia pro Ritu" (New York, 1867).

GRATIOT, Charles, soldier, b. in Missouri in 1788; d. in St. Louis, Mo., 18 May, 1853. He was graduated at the U. S. military academy in 1806, and entered the army as 2d lieutenant of engineers. He was appointed captain in 1806, and served with distinction in the war with Great Britain as chief engineer of Harrison's army in 1813-14, when he was brevetted colonel. He was engaged in the defence of Fort Meigs in 1813, and in the attack on Fort Mackinac in 1814. In 1815 he was appointed major of engineers, and superintended the fortifications on the Delaware river, and subsequently those in Hampton Roads, Va. He became the head of the United States Signal Corps, and principal engineer in charge of the engineer bureau of Washington, D. C., in 1828. He was brevetted brigadier-general, 24 May, 1828, and appointed to be inspector of West Point, which office he held until 6 Dec., 1838, when he was dismissed by the president for having amassed in the treasury certain balances of money placed in his hands for public purposes. After holding a clerkship in the land-office in Washington, D. C., from 1840 till 1853, he went to St. Louis, where he died.
in destitute circumstances. Fort Grattan, on St. Clair river, Michigan, and the villages of Gratiot, in Michigan and Wisconsin, were named in his honor.

**GRATTAN, Thomas Colley**, English author, b. in Dublin, Ireland, in 1798; d. in London, England, 4 July, 1864. He studied law in Dublin, but soon renounced this profession, and obtained a commission in the army. He settled in France, but went to Belgium in 1828 and resided principally in Brussels, devoting himself to literature. Having taken an active part in supporting the pretensions of King Leopold to the throne of Belgium, he was, at that monarch's special request, appointed in 1830 British consul at Boston. He held this office until 1838, when he accepted an office in the queen's household. His works include a pamphlet on the "Boundary Question between Great Britain and the United States" (1842); "Civilized America," a splendid attack on American society, in 2 vols., London, 1839; "The Woman of Color"; and "England and the Disrupted States of America" (1861).

**GRAU, Miguel** (grauw), Peruvian naval officer, b. in Piura in June, 1834; d. at sea, 6 Oct., 1879. He shipped on board a merchant vessel at the age of 15, and in 1852 was appointed midshipman in the naval school of Callao, became, in 1852, a midshipman in the Peruvian navy. He joined in the revolt of 1856 against the government of Castilla, and, on its suppression in 1858, returned to the merchant service. He re-entered the navy in 1860, was given command of the "Lerendi," and in 1865, when the war with Spain began, had reached the rank of captain. He took a distinguished part in the combat of Abtao in October, and on 2 May, 1866, participated in the defence of Callao against the Spanish bombs, and was promoted to the rank of commander of the monitor "Maco Capac." He afterward took command of the turret-ship "Huascar." In 1875 he was a deputy to congress, and a supporter of the government of Manuel Pardo. He was appointed director of the naval academy, and when the war with Chile began, 5 April, 1879, he held the rank of rear-admiral. He at once joined the fleet, and took command of his old ship, the "Huascar," and of the small Peruvian fleet. On 21 May he attacked two small Chilian vessels off Iquique with the "Huascar" and "Independencia," and sunk one of them, but the "Independencia" was washed up, by the other. As this loss left the Peruvian fleet still more inferior to the Chilian than before, Grau received orders to avoid an engagement with the Chilian iron-clads, and, owing to his superiority in speed, made a successful cruise along the coast, seriously harassing the enemy. At daybreak of 23 July, the "Huascar" and "Unión" captured off Antofagasta the powerful Chilian transport-steamer "Rimac," with a cavalry regiment of 300 on board. His successful depredations on the coast caused the Chilian government to strain every nerve for the capture of the "Huascar." In thick, foggy weather, while the Peruvian vessels were cruising near Antofagasta, Grau was surprised and forced to a combat by the Chilian fleet. Ordering the "Unión" to part company, and try by her superior speed to escape, Grau resolved to fight his ship to the last. He died of wounds received on 8 Oct., the day of the battle. Half an hour after the beginning of the contest, a shell from the "Cochrane" burst inside the "Huascar's" tower, killing the admiral and his signal-officer. Shortly afterward the other division of the Chilian fleet came up, and after an hour and a half of fighting, the flag of the "Huascar" was lowered, 64 men out of 193 being killed. After the war, the Peruvian nation erected a monument to Grau in Lima.

**GRAVEL, Elphige**, Canadian R. C. bishop, b. in St. Antoine, Rivière Chaudière, Quebec, 13 Oct., 1838. He was educated at St. Hyacinthe and Montreal colleges, and has been a professor of rhetoric and philosophy. He became parish priest of Bedford in 1873, of St. Hyacinthe in 1880, and canon of that place in the same year. In 1885 he was consecrated bishop. He was married to Mathilda de la Camp, the daughter of Louis de la Camp, a prominent lawyer and journalist, and settled in France, but went to Belgium in 1828 and resided principally in Brussels, devoting himself to literature. Having taken an active part in supporting the pretensions of King Leopold to the throne of Belgium, he was, at that monarch's special request, appointed in 1830 British consul at Boston. He held this office until 1838, when he accepted an office in the queen's household. His works include a pamphlet on the "Boundary Question between Great Britain and the United States" (1842); "Civilized America," a splendid attack on American society, in 2 vols., London, 1839; "The Woman of Color"; and "England and the Disrupted States of America" (1861).

**GRAVES, Thomas**, naval officer, b. in Ratcliffe, England, 6 June, 1805; d. in Charlestown, Mass., 31 July, 1833. From 1833 till 1835 he was master of several ships sailing between England and this country. On 7 Oct., 1839, he was admitted to the church in Charlestown with his wife Catherine Courtmore. In 1843 he was master of "The Tryal," which was the first ship ever built in Boston. As a reward for his capture of a Dutch privateer in the English Channel, during Cromwell's protectorate, he was appointed to command a ship-of-war and made a rear-admiral. He was presented with a silver cup by the owners of his ship.

**GRAVES, William Jordan**, lawyer, b. in New castle, Ky., in 1803; d. in Louisville, Ky., 27 Sept., 1848. He received an academic education, studied law, and was admitted to the bar. He was a member of the state legislature in 1834, and served in congress from 1835 till 1841, having been chosen as a Whig. During his term of office he fought a duel with rifles, on 24 Feb., 1838, at Bladensburg, Md., near Washington, with Jonathan Cilley, a representative from Maine, in which the latter was killed. He was re-elected to the legislature of Kentucky in 1843, representing Jefferson county. In 1848 he was a presidential elector.

**GRAVES, Zwinglius Calvin**, educator, b. in Chester, Vt., in 1816. After attending various academies he went to Harvard in 1834. In 1837 he opened a school in Ashtabula. He was soon elected principal of Kingsville academy, in the same state, where he remained until 1860. In this year he was called to take charge of the Mary Sharpe female college, Winchester, Tenn., which was founded with the aid of Mrs. Sharpe. She was educated at the Jefferson and Kingsville academies, and after her graduation in 1841 became teacher of Latin and English composition in the latter institution, where she remained until 1847. In 1841 she married Mr. Graves, and after his removal to Mary Sharpe college served there as matron and professor of rhetoric until 1881, and since that date has been secretary and treasurer. For many years she has been an invalid. In 1856-7 she edited the "Southern Child's Book." In 1899 she wrote children's stories for the Baptist Sunday-school union under the pen-name of "Aunt Alice." These include a "Life of Columbus," two volumes of "Poems for Children," and also wrote "The New Testament Catechism of Questions and Answers in Rhyme" under her own signature. Her other publications are 'Jephtha's Enigma and "Psa" drama for the schools (Memphis, 1867); "Seclusival, or the Arts of Romanism" (Memphis, 1869); and "Woman in Sacred Song" (Boston, 1886).—Zwinglius Calvin's brother, James Robinson, clergyman, b. in Chester, Vt., 10 April, 1830, became a teacher at the same as his brother in Vermont and subsequently in Kentucky, whither he removed on account of impaired health. While teaching he pursued the studies of a college.
course without any assistance. In Kentucky he was ordained to the Baptist ministry. In 1845 he opened an academy in Nashville, Tenn., and in the same year became pastor of the 2d Baptist church in that city. In the following year he was made editor of the "Southwestern Publishing House," Nashville, Tenn. He has been widely known as a vigorous controversialist, particularly in support of the Baptist high church views that have received the name of "Old Landmarkism." His published works are "The Great Iron Wheel" (1854); "The Intermediate State" (1855); "Old Landmarkism" (1879); "The Intercommunion of Churches" (1879); "The Redemptive Work of Christ" (1883); "The New Great Iron Wheel" (1884); "Denominational Sermons" (1885); and "The Parables and Prophecies of Christ" (1887).

GRAVIER, James, missionary, b. in France; d. in Mobile, Ala., in 1708. He was a member of the Society of Jesus, and was sent as a missionary to Canada, but it is uncertain at what time. He was stationed at Sillery in the autumn of 1684 and the first reports concerning him went westward after he was on the Illinois mission in 1688, and succeede

GRAY, Alfred G., naval officer, b. in Norfolk, Va., in 1818; d. in Brooklyn, N. Y., 10 Nov., 1876. He went to sea at the age of seventeen, and became a captain when twenty-seven. He was appointed lieutenant in the Texas service in 1843, when he commanded the screw-mast "Austin" in the engagement off "Republic," the Mexican war steamer. During the war he was involved in several engagements.

GRAY, Alonzo, educator, b. in Townsend, Va., 21 Feb., 1808; d. in Brooklyn, N. Y., 10 March, 1860. He was graduated at Amherst in 1834, and at Andover theological seminary in 1838. Meanwhile he had become professor of natural science in Plattsburgh academy, where he remained until 1845, when he was professor of chemistry in Marietta college. In 1845 he became a teacher in the Brooklyn heights female academy, and six years later founded the Brooklyn heights female seminary, of which he was principal until his death. He published "Elements of Chemistry" (Andover, 1841; 40th ed., New York, 1858); "Elements of Scientific and Practical Agriculture" (Andover, 1843); "Elements of Natural Philosophy" (New York, 1851); and, with Charles B. Adams, "Elements of Geology" (1852).

GRAY, Asa, botanist, b. in Paris, Oneida co., N. Y., 18 Nov., 1810. He received his early education in the Clinton grammar-school and in the Fairfield academy, after which he began the study of medicine with Dr. John F. Towbridge in Bridgewater, N. Y., and was graduated at the College of physicians and surgeons of the western district of New York in 1831. He soon left his practice and began the study of botany with Dr. John Torrey. In 1834 he was appointed botanist to the U. S. exploring expedition sent out under the command of Capt. Charles Wilkes, but, in consequence of the delay, he declined this chair, and accepted in 1848 the Fisher professorship of natural history at Harvard, continuing there till 1873, when he retired from the active duties of his office, but retained charge of the herbarium. Prof. Gray's scientific work began at a time when the old artificial systems of botany were giving way to the natural system, and, with Dr. John Torrey, he was among the first to attempt the classification of species on the natural basis of affinity. His first paper, presented to the New York lyceum of natural history in December, 1834, bears the title "A Notice of Some New, Rare, or Otherwise Interesting Plants from the Northern and Western Portions of the State of New York." Four years later, under the joint authorship of John Torrey and Asa Gray, the first part of the "Flora of North America" appeared. This work was continued in numbers that were published from time to time until the Compositae were finished, when the accumulation of fresh material had so increased that to complete the undertaking would require an appendix greater than the "Flora" itself. In other ways, however, this classification was still carried on. The valuable acquisitions of the U. S. government expeditions were referred to these botanists, and their results are to be found in numerous memoirs published in the government reports, and as separate monographs. The most important of these are: "Planta Linnéiæ-americanæ," an account of plants collected in western Texas by Ferdinand Lindheimer (Boston, 1845-50); "Planta Fendleriæ Novi Mexicani," a description of plants collected in New Mexico by August Fendler (1849); "Planta Wrightiæ Texana-Neo-Mexicana" describing the extensive collections made by Charles Wright (Washington, 1832-3); "Planta Thurbereianæ" (Boston, 1854); and "Genera Flore Americae Boreali-Orientalis Illustrata" (New York, 1848-50).
Prof. Gray's herbarium, numbering more than 200,000 specimens, and his library of 2,200 botanists were presented to Harvard on the completion, in 1864, of a fire-proof building for their reception. He received the degree of A. M. from Harvard in 1844, and of L.L. D. from Hamilton in 1860, and has delivered three courses of lectures in the Harvard Institute. In 1871 he received the appointment of rector of the Smithsonian institution, succeeding Louis Agassiz in that office. For ten years, from 1863 till 1873, he was president of the American Academy of arts and sciences, and in 1872 was president of the American association for the advancement of science. At his retirement he addressed the Dubuque meeting. Prof. Gray was one of the original members of the National academy of sciences, and has since passed to the grade of honorary membership. Besides his connections with societies in this country, he is either corresponding or honorary member of the Linnean society and the Royal society in London, and of the academies of sciences in Berlin, Munich, Paris, St. Petersburg, Stockholm, and Upsala. Prof. Gray has been a very large contributor to periodical literature, and his separate papers include nearly 300. For many years he has been one of the editors of the "American Journal of Science," and his "Botanical Contributions" have long been published in the "Proceedings of the American Academy of Sciences and Arts." He has also written biographical sketches of many who have achieved distinction throughout the United States, and has passed through many editions. They include "Elements of Botany" (1836), republished as "Botanical Text-Book" (1853), and now called "Structural and Systematic Botany" (New York, 1858); "Manual of the Botany of the Northern United States" (New York, 1867); "Lessons in Botany and Vegetable Physiology" (New York, 1857); "Botany for Young People and Common Schools," comprising "How Plants Grow" (1858) and "How Plants Behave" (1875); "Field, Forest, and Garden Botany" (1869), which, with the "Lessons in Botany," have been bound together under the title "School and Field-Book of Botany" (1875); "Structural Botany or Organography on the Basis of Morphology" (1879), being the first volume of the series called "Gray's Botanical Text-Book": "Botany of the United States Pacific Exploring Expedition" (Washington, 1854); and "Synoptical Flora of North America" (New York, 1878).

GRAY, David, journalist, b. in Edinburgh, Scotland, 9 Nov., 1836. He emigrated with his father's family to the United States in May, 1849, and settled in Marquette county, Wis. Thence he went to Buffalo, N. Y., in 1856, and three years later entered the service of the "Courier" as a reporter. In 1855-'8 he travelled and studied in Europe and the east. Returning to Buffalo the latter year, he became manager of the "Buffalo Courier." In 1876 its editor-in-chief. In 1888, owing to impaired health, he left journalism, and for two years, with his family,
GRAY, George, senator, b. in New Castle, Del., 4 May, 1840. He was graduated at Princeton in 1863 and studied law in the office of Benjamin B. Burton. He was admitted to the bar in 1863. He first opened an office in New Castle, but in 1870 removed to Wilmington, where he was admitted to the bar in 1873. He was a delegate to the National Democratic conventions of 1876, 1880, and 1884, and was elected to the U. S. Senate to fill the vacancy caused by the appointment of Thomas F. Bayard as secretary of state. He took his seat on 19 March, 1885, and in January, 1887, was re-elected for a full term.

GRAY, George Edward, civil engineer, b. in Washington, D. C., 19 Sept., 1843. His early education was received in the public schools, and studied civil engineering under Peletiah Rawson. In 1853 he was appointed chief engineer of the New York Central railroad, and held the office till 1855, when he resigned and was appointed consulting engineer of the Central Pacific railroad. He remained connected with this road until 1871, when he was appointed chief engineer of the Southern Pacific railroad of California, but resigned when that road was leased to the Southern Pacific company in 1873. Mr. Gray has also been chief engineer of the Southern Pacific railroad of Arizona, of the Southern Pacific railroad of New Mexico, and directed the location and construction of the Galveston, Harrisburg, and San Antonio railroad from El Paso to San Antonio, Texas. He is a life member of the Pittsburgh institute of civil engineers, a member of the American society of civil engineers, and a life member of the California academy of sciences, and president of its board of directors. Mr. Gray has been appointed (1887) one of the trustees of the university in California founded by E. D. Stanford in memory of his son.

GRAY, George Zabriskie, clergyman, b. in New York city, 14 July, 1848. He was graduated at the University of New York in 1868. From 1859 till 1861 he studied for the ministry at the Alexandria seminary. He was ordained deacon by Bishop Horatio Potter, 22 April, 1862, and ordained priest by the same bishop on 22 Jan., 1863. After holding pastorates in Vernon, N. J., Kinderhook, N. Y., and Bergen Point, N. J., he was appointed, in 1876, dean of the Protestant Episcopal theological school in Cambridge, Mass., which place he now occupies (1887). In 1872 he gave him the degree of D. D. in 1876. He has published "The Children's Crusade in the Thirteenth Century" (Boston, 1872); "Recognition in the World to Come" (New York, 1875); and "Husband and Wife, or the Theory of Marriage" (Boston, 1885). His brother, Albert Zabriskie, clergyman, b. in New York city, 2 March, 1840, was graduated at the University of New York in 1860, and at the General theological seminary of the Protestant Episcopal church in 1864. During the civil war he served as chaplain of the 4th Massachusetts cavalry. After his ordination, he was elected warden of Racee college, Wis., in 1883, post which he now occupies (1887), and he has been associated with the work of church reform and union in Europe undertaken by the Protestant Episcopal church, and was a delegate to the general convention in 1886. His publications are "The Land and the Life, or Sketches and Studies in Palestine" (New York, 1876); "Mexico as It Is" (1878); "Words of the Cross" (1880); and "Jesus Only, and Other Sacred Songs" (1882). GRAY, Henry Peters, actor, in New York city, 23 June, 1819; d. there, 12 Nov., 1877. He entered the studio of Daniel Huntington in 1838, and in the following year went to Europe for study. In 1848 he returned to New York and executed several good parts. He made a second trip to Europe in 1846, where he produced several of his most characteristic works, including "Cupid beggin his Arrows," "Prosperine and Bacchus," and "Teaching a Child to Pray." He then established himself in New York, and was elected, in 1849, president of the National academy, which place he held until 1871, when he went to Florence, and remained there till 1874. Classical subjects were his favorites, and he was fond of studying the old Venetian masters, especially Titian. During the latter years of his life he devoted his time to a receive of his early education in the public schools, and studied civil engineering under Peletiah Rawson. In 1853 he was appointed chief engineer of the New York Central railroad, and held the office till 1855, when he resigned and was appointed consulting engineer of the Central Pacific railroad. He remained connected with this road until 1871, when he was appointed chief engineer of the Southern Pacific railroad of California, but resigned when that road was leased to the Southern Pacific company in 1873. Mr. Gray has also been chief engineer of the Southern Pacific railroad of Arizona, of the Southern Pacific railroad of New Mexico, and directed the location and construction of the Galveston, Harrisburg, and San Antonio railroad from El Paso to San Antonio, Texas. He is a life member of the American society of civil engineers, a member of the American academy of sciences, and president of its board of directors. Mr. Gray has been appointed (1887) one of the trustees of the university in California founded by E. D. Stanford in memory of his son. He served in the civil war as captain in the 4th Indiana cavalry, but was compelled to retire, owing to feble health. Subsequently he recruited the 147th Indiana infantry. He was at first a Whig, and then a Republican, but since 1873 has acted with the Democratic party. In 1888 he was elected to the state senate, and served four years. He was a delegate to the Liberal Republican convention in 1872, and was elected lieutenant-governor on the Democratic ticket in 1876 and governor in 1884.

GRAY, James, clergyman, b. in Ireland, 23 Dec., 1770; d. in Gettysburg, Pa., 20 Sept., 1824. He was graduated at the University of Glasgow in 1793, studied theology, and was licensed to preach by the presbytery of Monaghan. He came to the United States in 1797, and, after laboring in Washington, N. Y., from 1801 to 1803, he became pastor of an Associate Reformed church in Philadelphia. He was active in establishing the theological seminary of that denomination in New York city, assisted in the organization of the Philadelphia Bible society in 1808, and was for some time its corres-ponding secretary. He opened a classical academy at Wylie, Pa., in 1814, and retired after several years and went to Baltimore, Md., where he devoted himself to the study of special subjects in theology. For one year he edited the Theological Review, and published "Mediatorial Head, the Son of God" (1814), "Discourses on the Priesthood of Jesus Christ and Mediation, together with the Life of Christ" (Hagerstown, Md., 1850); and sermons.
GRAY, John, soldier, b. in Fairfax Court-House, Va., 6 Jan., 1702; d. in Noble county, Ohio, 29 March, 1868. At the age of sixteen he entered the continental army, and served throughout the entire war. He removed to Ohio before it was a state, and remained there until his death. For a few years previous to that event congress had granted him a pension of $500 per annum. He was reputed to be the last surviving soldier of the American Revolution.

GRAY, J. H., Canadian statesman, b. in St. George's, Bermuda, in 1814. He removed to Canada, was admitted to the bar in 1837, and entered parliament in 1850. He became a member of the executive council in 1851, and premier of New Brunswick in 1856. In 1857 he was a member of the British and the United States under the treaty of Washington, and was royal commissioner on the tenant-right question in Prince Edward Island. He was arbitrator for the Dominion in 1867, was appointed judge of the supreme court of British Columbia in 1872, and was a member of the Canadian Chinese immigration commission in 1884. He is the author of "Confederation," a history (1871).

GRAY, John Fyfe, physician, b. in Hallowell, Me., 7 Nov., 1845; d. in Utica, N. Y., 29 Nov., 1886. He was graduated at Dickinson in 1864, and at the medical department of the University of Pennsylvania in 1868. In 1851 he was appointed third assistant physician to the New York state lunatic asylum in Utica, and in 1883 became acting superintendent. When the Michigan state asylum was projected in that year, he was elected its medical superintendent, and designed the plans for the new institute at Kalamazoo. In 1894 he resigned and became medical superintendent of the Utica asylum, where he spent the rest of his life. He did much to better the condition of the insane in this country, to improve modes of treatment, and to make them as near insane within reach of the hospitals. Dr. Gray introduced into the asylums of this country the microscopic and the brain. He was appointed consulting manager of the state asylum for insane criminals at Auburn in 1858, and acted as commissioner and adviser in establishing other asylums in the state. He served as president of the State medical society, and in 1870 of the psychological section of the International medical congress in Philadelphia, where he read a paper on "Mental Hygiene." He was made professor of psychological medicine and jurisprudence in Bellevue hospital medical college in 1854, and in the Albany medical college in 1876, and held these offices until 1889. His services as an expert on insanity were frequently employed in the courts, and he was regarded as good authority on all medical questions relating to life-insurance. His management of the New York state asylum gave that institution a wide reputation. His influence was felt in the state legislature on the subject of insanity, and his papers and reports were valuable contributions to science. In addition to his service in the asylum, he edited for many years the "American Journal of Insanity," of which he took charge in 1854. He took great interest in all public charities, and was active in the establishment of orphan asylums, hospitals, and all societies for the relief of the destitute. On 16 March, 1885, he was shot by Henry Remshaw, a lunatic, and never fully recovered from the effects of the wound. Dr. Gray was a member of the medical societies both here and abroad. Hamilton gave him the degree of L.L.D. in 1874. He delivered many addresses, including "Homicide in Insanity" (1857); "Thoughts on the Causing of Insanity" (1874); "Mental Hygiene" (1876); "Abstract of the Laws of New York relating to Insanity" (1878); "Heridity" (1884); and "Insanity and Some of its Preventable Causes" (1885). These lectures will shortly be published by his widow.

GRAY, Robert, discoverer, b. in Tiverton, R. I., in 1755; d. in Charleston, S. C., in 1806. He commanded the sloop "Washington," which was fitted out with the ship "Columbia," by merchants of Boston, for the purpose of trading with the natives on the northwest coast. The vessels sailed on 30 Sept., 1787, and carried with them medals for distribution among the Indians. He heard the name of the ship and a sloop under sail with the words "Columbia and Washington, commanded by John Kendrick," and on the reverse, "fitted out at Boston, N. America, for the Pacific ocean by," encircling the names of the six proprietors. He returned in 1790 in the "Columbia," and was the first man to carry the American flag around the globe. Later he made a second voyage, and on 11 May, 1791, discovered the mouth of a great river to which he gave the name "Columbia," after his own vessel. Subsequently he commanded trading vessels from Boston until his death.

GRAY, Solomon S., inventor, b. in Bowdoinham, Me., in 1820. He became a carpenter, and a maker of doors, sashes, and blinds, and perceiving that these could be made more easily by the application of improved machinery devised Gray and Wood's planing machine. He disposed of his interest to his partner in 1861, and turned his attention to the manufacture of paper collars, for which he took out eight distinct patents. He was the inventor of the "molded collar."

GRAY, William, merchant, b. Lynn, Mass., 27 June, 1790; d. in Boston, Mass., 4 Nov., 1825. He was of humble parentage and was apprenticed to merchants in Salem. He afterward began business for himself, and amassed a fortune, having at one time more than sixty square-rigged ships on the ocean. He was a Democrat, and sympathized with Jefferson during the embargo, notwithstanding the pecuniary injury to his business and its unpopularity in New England. He removed to Boston, became a state senator, and in 1810 was elected lieutenant-governor. His wife, Elizabeth Chipman, b. in Essex, and d. in Boston, 24 Sept., 1823, married Mr. Gray in 1782. Although the wife of the richest man in Massachusetts, and probably in New England, she managed her domestic affairs personally. A portion of her time was devoted to the poor, who were the constant recipients at the Gray table. Her son, Francis Calley, lawyer, b. in Salem, Mass., 19 Sept., 1790; d. in Boston, 29 Dec., 1856, was graduated at Harvard in 1809. He studied law with William Prescott, but did not practice his profession. He was private secretary to John Quincy Adams while the latter was minister to Russia, and served frequently in the Massachusetts legislature.
He was president of the Boston Athenaeum, and a fellow of Harvard in 1829-36. In 1841 the degree of D. D. was conferred upon him by Harvard. He left a collection of 3,000 rare engravings, with $16,000 for keeping it in order and publishing a catalogue. He also left $50,000 for the establishment and maintenance of a museum of comparative zoology. The bestowal of these bequests was left to the discretion of his son-in-law, Henry William, and the latter presented them to Harvard in 1858, and also contributed $25,000 for the purchase of books for the college library. The sum for the establishment of a museum was supplemented by legislative appropriation and private subscription, and a building erected, which was dedicated in November, 1858, and placed in charge of Prof. Louis Agassiz. Mr. F. C. Gray published numerous orations and addresses, and a work on "Prison Discipline" (Boston, 1847). He discovered a manuscript copy of the Massachusetts "Body of Liberties" of 1641, which was published in the "Collections of the State historical society" (3d series, vol. viii.). Gray's Hall, one of the buildings of Harvard, was named for these benefactors of the college.—Another son, John Chipman, lawyer, b. in Salem, Mass., 29 Dec., 1817; d. in Boston, 3 March, 1855, was graduated at Harvard in 1831. He never practised law, but took an active interest and part in public affairs, serving many years in the common council of Boston, and in each branch of the Massachusetts legislature, and in the governor's council. He delivered an oration for the 1832 Theta Beta Kappa society in 1821, and address before the Massachusetts horticultural society, and a number of addresses before the city authorities.—Horace, grandson of William, jurist, b. in Boston, Mass., 1828, was graduated at Harvard in 1848, and was admitted to the bar in 1851. In 1854 he was appointed reporter of the Massachusetts supreme court, and served for seven years. On 23 Aug., 1854, he became associate justice of the court, which office he held till he was appointed its chief justice on 7 Jan., 1857. In 1852 he was made associate justice of the U. S. supreme court, which office he now fills (1867).

GRAYDON, Alexander, author, b. in Bristol, Pa., 10 April, 1792; d. in Philadelphia, Pa., 2 May, 1844. He was the son of Col. Alexander Graydon of the first regiment of Pennsylvania foot, which enlisted in Pennsylvania and was educated in Philadelphia, and lived with his mother, at whose residence he met some of the notable people of the time. Mr. Graydon acquired a knowledge of law, but in 1753 received the appointment of captain from congress, and raised recruits for the army. He served in the battle of Long Island, and was taken prisoner in the subsequent action on Harlem heights. For a time he was confined in New York and then in Flatbush, but afterward was released on parole. He then passed through the American camp in Morristown, and then went to Reading, Pa. He was exchanged in 1778, but did not again join the army. He received the appointment of provost-marshal of Dauphin county, Pa., and, settling in Harrisburg, held that office until a change of administration caused his removal in 1793, and under Tennessee in 1816, when he removed to Philadelphia, he resided near Harrisburg. Mr. Graydon was a contributor to literary and political journals, and, under the title of "Notes of a Desultory Reader," furnished in 1815-14 a series of papers to the Philadelphia "Sternhold," which included articles on the classics, and English and French literature. He published "Memoirs of a Life, chiefly passed in Pennsylvania, within the Last Sixty Years," with occasional remarks upon the general occurrences, characters, and events of the era. (Harrisburg, 1811; re-printed in London; Edinburgh, 1823; Philadelphia, 1840).—His brother, William, lawyer, b. near Bristol, Pa., 4 Sept., 1759; d. in Harrisburg, Pa., 13 Oct., 1840. He was educated in Philadelphia, and studied law there. In the organization of William, and the latter presented them to Harvard in 1858, and also contributed $25,000 for the purchase of books for the college library. The sum for the establishment of a museum was supplemented by legislative appropriation and private subscription, and a building erected, which was dedicated in November, 1858, and placed in charge of Prof. Louis Agassiz. Mr. F. C. Gray published numerous orations and addresses, and a work on "Prison Discipline" (Boston, 1847). He discovered a manuscript copy of the Massachusetts "Body of Liberties" of 1641, which was published in the "Collections of the State historical society" (3d series, vol. viii.). Gray's Hall, one of the buildings of Harvard, was named for these benefactors of the college.—Another son, John Breckenridge, soldier, b. in Kentucky in 1807; d. in Florida in 1862. He was graduated at the U. S. military academy in 1826, served as an aide from the 29 March to 4 June, 1828, and was then on topographical duty till 29 March, 1832. He was on duty in various forts and garrisons until 1833, became 1st lieutenant, 30 April, 1834, served in the Seminole war in 1835-6, and on comissionary duty at Forts Marion and Yorktown, was promoted to a captaincy, 11 Dec., 1838, and served in the Mexican war in 1847-8, as chief of commissariat of the army under Gen. Scott. He was at Vera Cruz, Cerro Gordo, Churubusco, where he was brevetted major, Molino del Rey, Chapultepec, where he was brevetted brevet captain, and at the assault and capture of the city of Mexico. On his return to the United States he was assigned to comissionary duty at Detroit, Mich., was promoted major, 21 Oct., 1852, and made chief of the commissariat of the department of New Mexico till 1861. He resigned his commission on 1 July, 1861, and joined the Confederate army. Grayson, William, senator, b. in Prince William county, Va.; d. in Dumfries, Md., 12 March, 1790. He was educated at the University of Oxford, England, and studied law at the Middle Temple. He returned to the colonies, settled in Dumfries, Md., and entered on the practice of his profession. He was appointed aide-de-camp to Washington, 24 Aug., 1776, became colonel of a Virginia regiment on 1 Jan., following, and distinguished himself at the battle of Monmouth in 1778. He was a commissioner on the board of war in 1780-1; a commissioner to treat with Sir William Howe respecting prisoners while the army was at Valley Forge: a member of the Continental congress in 1784-7; a member of the Virginia convention in 1788 on the adoption of the Federal constitution, and was one of the minority who opposed the ratification. He was one of the senators from Virginia to the 1st congress, taking his seat on 21 May, 1789, and serving until his death.—His son, William J., statesman, b. in Beaufort, S. C., in 1837, graduated at the College of Charleston, S. C., in 1859, and bred to the legal profession. Entering upon its practice at Beaufort, he became a commissioner in equity of South Carolina, a member of the state legislature in 1876, and a member of the governor of South Carolina in 1881, but was not disposed to push the collision to the extremity of civil war. He served in congress from 2
Dec., 1833, till 3 March, 1837, and in 1841 was appointed collector of customs at Charleston. In 1843 he retired to his plantation. During the secession agitation of 1860 he published a "Letter to Gov. Seabrook," deprecating disunion, and pointing out the evils that would follow it. He died of an illness following on a paralytic stroke. He was a frequent contributor to the "Southern Register," and wrote the "Slave," a poem (Charleston, S. C., 1854); "Chicora and Other Poems," "The Country," a poem; "The Life of James L. Petigru" (New York, 1866); and is supposed to have been the author of a narrative poem entitled "Marion."

GREYSON, William, statesman, b. in Maryland in 1786; d. in Queen Anne county, Md., 9 July, 1898. He was a planter in his native state, at an early period identified himself with the Democratic party, and became one of its leaders. He served with distinction for several years in both houses of the general assembly of Maryland, and took an active part in the struggle to obtain a new and more liberal constitution for the state, which began in 1836, and successfully terminated in 1838. Gratitude to Mr. Grayson induced his constituents to nominate him for governor, and he was elected, serving from 1841 to 1844. The expiration of his term of service he retired to private life.

GREATHOUSE, Lucien, soldier, b. in Carlinville, Ill., in 1843; d. near Atlanta, Ga., 21 June, 1884. He was graduated at the Illinois Wesleyan university, and studied law. At the beginning of the civil war he volunteered as a private, and, after passing through every intermediate grade, was commissioned colonel of the 48th Illinois. His regiment bore a conspicuous part in the movements of the Army of the Tennessee.

GREATOREX, Henry Wellington, musician, b. in Burton-on-Trent, England, in 1816; d. in Charleston, S. C., in September, 1858. He received a thorough musical education from his father, who was for many years organist of Westminster Abbey, and conductor of the London "concerts of ancient music." He came to this country in 1839, settled in New York city as a teacher of music and organist of Calvary church, and frequently sang in concerts and oratorios. For some years he was organist and conductor of the choir at St. Paul's church. Greatorex did much to advance the standard of sacred music in the days when singing-school teachers imposed their trivial melodies and the convivial measures of foreign composers on the ear of the people. He published a "Collection of Psalm and Hymn Tunes, Chants, Anthems, and Sentences" (Boston, 1851). — His wife, Eliza, artist, b. in Manor Hamilton, Ireland, 25 Dec., 1819, was the daughter of Rev. James Caltcott Pratt, and came to New York in 1840, where in 1841 she studied art under Greatorex. She subsequently studied art with William II. Witherspoon and James Hart in New York, with Emile Lambinet in Paris, and also at the Pinkothek in Munich. During 1870 she studied etching with C. Henri Grevé and Henry Tousaint. She was a member of the Artists' fund society of New York. Mrs. Greatorex has acquired reputation by her pen-and-ink sketches, many of which have appeared in book-form, notably "The Homes of Ober-Ammergau" (Munich, 1872); "Summer Etchings in Colorado" (New York, 1873); "Everywhere Ober-Ammer- berg" (1875); and "Old New York from the Battery to the Bloomingdale" (1876), the text of which was prepared by her sister, Mrs. Matilda F. Deepard. Eighteen of the sketches illustrated by New York were exhibited at the Centennial exhibition in Philadelphia in 1876. Her pen drawing of "Durer's House in Nuremberg" is in the Vatican, Rome. Among her paintings are "Bloomingdale" (1888); "Chateau de Madame Oliffe" (1889); "Bloomingdale Church," painted on a panel taken from the north wall of St. Paul's Church; and "The North Dutch Church," each painted on panels taken from these churches (1876); "Normandy" (1888); and "The Home of Louis Philippe in Bloomingdale, N. Y." (1884).—Their daughter, Kathleen Horner, artist, b. in Englewood, 27 Oct., 1861, has studied art in New York, Rome, and Munich. She has devoted herself to decorative work and book illustration, but latterly has won success as a painter, obtaining honorable mention for her work in the Paris salon of 1886. Many of her paintings have been exhibited in the Metropolitan Museum. She has exhibited "The Last Bit of Autumn" (1875); "Goethe's Fountain, Frankfort" (1876); panels with "Thistles" and "Corn" (1877); and "Hollyhocks" (1883).—Another daughter, Elizabeth Eleanor, artist, b. in New York, 26 May, 1854, has studied art in the National academy of design and at the Art students' league in New York, in Paris with Carolus Duran, in Munich, and in Italy. Like her sister, she has decorated china, and illustrated books, but now gives her chief attention to painting. She has exhibited at the National academy "The Sower" (1884), and "The Color that Burns as if no Frost could Tame" (1885).

GREBLE, John Trout, soldier, b. in Philadelphia, 19 Jan., 1834; killed in the battle of Big Bethel, Va., 10 June, 1861. He was graduated at the U. S. military academy in 1854, assigned to the 2d artillery, and stationed at Newport, R. I. In September of that year he was made 2d lieutenant and sent to Tampa, Fla., where he served in the Indian troubles for two years. He was compelled, in consequence of a severe fever, to return home on sick leave, but in the beginning of 1856 resumed his duties, acting part of the time as quartermaster and commissary till December, 1856, when he was appointed acting assistant professor of geography, history, and ethics in the military academy, where he remained till 24 Sept., 1860. He was promoted to the rank of major and detailed for active duty at Fort Monroe in March, 1861, and rendered efficient service in preventing its seizure. On 26 May, 1861, he was sent to Newport News as master of ordnance, superintended the fortifications of that point, and trained the volunteers to serve in the recently organized auxiliary artillery. The hazardous expedition to Big Bethel was planned, he was unexpectedly detailed to accompany it with two
grew, though in his own judgment it was ill-advised and would probably prove fatal to him. When the National troops were repelled, by his admirable management of the guns he protected them from pursuit and destruction. Just at the close of the action, when he had given the orders to withdraw his guns from the field, he was struck by a rifle-ball on the right temple and instantly killed. For his bravery in the two days' action he was brevetted captain, major, and lieutenant-colonel, on the day of his death.

Greeley, Horace, journalist, b. in Amherst, N. H., 3 Feb., 1811; d. in Pleasantville, near New York city, 29 Nov., 1872. His birthplace is shown in the accompanying engraving. On both sides his ancestors were of Scotch-Irish origin, but had been settled in New England for some generations. His father, Zachariah Greeley, was a small farmer, always poor, and, by the time Horace was ten years old, a bankrupt and a fugitive from the start to escape arrest for debt. Horace was the third child, four followed him, and when the little homestead of fifty acres of stony land at Amherst was lost and his father became a day-laborer at West Haven, Vt., the united exertions of all that was left to work brought the family only a hard and bare subsistence. Horace had been a precocious child, feeble, and not fond of sports, but with a strong bent to books. He could read before he could talk plainly, when he was not yet three years old, and he was soon after the acknowledged chief in the frequent contests in the village spelling-match. He received only a common-school education, and after his sixth year had schooling only in winter, laboring at other times in the field with his father and brothers. When six years old he declared he would be a printer, and at eight he tried to be apprenticed in the village office. He was rejected then on account of his youth, but tried again, three years later, at East Poultney, Vt., in the office of the "Northern Spectator," and was accepted as an apprentice for five years, to be boarded and lodged, and, after six months, to be paid at the rate of $15 a year. He learned the business rapidly, became an accurate compositor, gained the warm regard of his employer and of the whole village, showed a special aptitude for politics and political statistics, rose to be the neighborhood oracle on disputed points, became the chief in the local debating societies, and was intrusted with a portion of the editorial work on the paper. Meantime he spent next to nothing, dressed in the cheapest way, went without a coat in summer and without an overcoat in winter, was laughed at as "gawky" and "stingy," and sent almost every cent of his forty dollars a year to his father. At last, in June, 1838, the paper was suspended, and young Greeley, then in his twentieth year, was released from his apprenticeship, and turned out upon the world as a "trampy" jour-compositor. Fourteen months of such experience sufficed. He visited his father, who had now removed to the "new country" near Erie, Pa., worked with him on the farm when he could not find employment in country printing-offices, sent home most of his earnings, when he could, and at last, to be paid at the rate of $15 a week in New York city.

With his wardrobe in a bundle, slung over his shoulder by a stick, he set out on foot through the woods, walked to Buffalo, thence made his way, partly on canal-boats, partly by walking the tow-path, to Albany, and there down the Hudson on a tug that cost him $100 in his stipend, and his stipend, and bundle still over his shoulder, on 18 Aug., 1831, he entered the city in which he was to be recognized as the first of American journalists. He wandered for days from one printing-office to another vainly searching for work. His grotesque appearance was against him; nobody supposed he could be a competent printer, and most thought him a runaway apprentice. At last an Irishman at the cheap boarding-house he had found told him of an office where a compositor was needed; a Vermont printer interceded for him, when he was about to be rejected on his appearance, and at last he was taken on trial for the day. The matter assigned him had been abandoned by other printers because of its uncommon difficulty. At night his was found the best day's work that anybody had yet done, and his position was secure.

He worked as a journeyman printer in New York for fourteen months, sometimes in job-offices, for a few days each in the offices of the "Evening Post" and the "Commercial Advertiser," longer in that of the "Spirit of the Times," making friends always with the steady men he encountered, and saving money. Finally, in January, 1833, he took part in the first effort to establish a penny paper in New York. His partner was Francis V. Story, a fellow-printer; they had $150 between them, and on this capital and a small lot of type bought on credit from George Bruce, on his faith in Greeley's honest face and talk, they took the contract for printing the "Evening Post." It failed in three weeks, but they had only lost about one third of their capital, and still had their type. They had therefore become master job-printers, and Greeley never worked again as a journeyman. They got a "Bank-note Reporter" to print, which brought them in about $12 a week, and a little tri-weekly paper, "The Constitutionalist," which was the lottery organ. Its columns regularly contained the following card: "Greeley and Story, No. 54 Liberty street, New York, respectfully solicit the patronage of the public to their business of letter-press-printing, particularly lottery-printing, such as schemes, periodicals, and so forth, which will be executed on favorable terms."

Mr. Greeley had renewed his habit of writing for the papers on which he was employed as a compositor. He was thus a considerable contributor to the "Spirit of the Times," and now, by an article contributed to the "Constitutionalist," defending the lotteries against a popular feeling then recently aroused, he attracted the attention of Dudley S. Gregory, of Jersey City, the agent of a great lottery association, whose friendship soon became helpful and was long-continued. His partner, Story, died after seven months, and his brother-in-law, Jonas Winchester, was taken into the partnership instead. The firm prospered, and by 1834 Mr. Greeley again began to think of editorship. The firm now considered itself worth $20,000. With this capital and the brains of the senior partner, the "New Yorker," the best literary weekly then
in America, was founded. Shortly before its appearance James Gordon Bennett visited Mr. Greeley and proposed to unite with him in establishing a new paper to be called the "New York Herald." In declining, Mr. Greeley recommended another partner, who accepted and continued the partnership until, three years after, the "New York" died and burned, when he retired. The "New Yorker" appeared on 22 March, 1834, sold one hundred copies of its first number, and for three months scarcely increased its circulation from this point over one hundred copies a week. By September, however, it had risen to over 1,000; and by the end of the year it was 4,500, at the end of the second year 7,000, and of the third 8,500. It was steadily popular with the press and people, and steadily unsuccessful pecuniarily. The first year showed a loss of $5,000, the second year of $2,000 more, and the third year of a further $3,000. Mr. Greeley became widely known and respected as its editor, was able to add to his income by furnishing editorials to the "Daily Whig" and other journals, and within four years had attained such prominence that the town-boarded printing-press was moved to a run-away apprenticeship and dismissed from the "Evening Post" office, because the proprietors wished to have "at least decent looking men at the cases," was selected by William H. Seward and Thurlow Weed as the best man available for the conduct of a campaign paper, which they desired to publish at Albany, to be called the "Jeffersonian." He continued his work on the "New Yorker," but went back and forth between New York and Albany each week. The "Jeffersonian," for a campaign paper, was unusually quiet, calm, and intelligent; it seems to have given the Whig central committee satisfaction, and it still further brought its editor to the notice of the press and of influential men throughout the state. The "Jeffersonian" lasted until the spring of 1839, and Mr. Greeley was paid a salary of $1,000 for conducting it. Few months later the coediters paid a salary of $1,000 for conducting it. Few months later the coediters withdrew upon the extraordinary popular excitement attending the presidential canvass of 1840, and when Mr. Greeley, prompt to seize the opportunity, issued simultaneously at New York and Albany, under the firm-name of "H. Greeley & Co.," the first number with a campaign paper called the "Log Cabin," it sprang at once into a remarkable circulation; 20,000 copies of the first issue were printed, and this was thought to be an extravagant supply; but it was speedily exhausted. Other editions were called for, and finally, the type having been distributed, the number had to be reset, and in all 48,000 copies were sold. In a few weeks 60,000 subscriptions had been received, and the advance did not cease until the weekly issue had risen to between 80,000 and 90,000 copies—a circulation then absolutely unprecedented. The "Log Cabin" was more aggressive than the "Jeffersonian" had been, and, displaying many of the personal peculiarities of its editor, his quaintness, his homely common sense, and an extraordinary capacity for compact and pungent statement. It printed rough caricatures of Van Buren and other Democrats, gave a good deal of campaign poetry, with music attached, and yet made room for lectures upon the "Elevation of the Laboring Classes." In all the heat and fury of that turbulent campaign its editor set in one the principle of moderation not always followed in contests of a like character. In answer to a correspondent he said flatly: "Articles assailing the personal character of Mr. Van Buren or any of his supporters cannot be published in the 'Log Cabin.'" Meantime, Mr. Greeley was widely consulted, was appointed on campaign committees, asked to make speeches, and called hither and thither to aid in adjusting political differences. He had become a person of influence and a political factor. He continued his paper for one week after the tergiversation, or so-called "die-down," of the presidential canvass, and on the 10th instant, the subscriber will publish the first number of a new morning journal of politics, literature, and general intelligence. 'The Tribune,' as its name imports, will labor to advance the interests of the people and to promote their moral, social, and political well-being. The immoral and degrading police reports, advertisements, and other matter which have been allowed to disgrace the columns of our leading penny papers will be carefully excluded from this, and no exertion spared to render it worthy of the hearty approval of the numerous and welcome visitors at the family fireside. Horace Greeley, 30 Ann street.

Until this time Mr. Greeley had acquired great reputation, but no money. In spite of the brilliant success of the "Log Cabin," and the general esteem for the "New Yorker," neither had ever been profitable, and their editor, always talked of as "able, but queer," began also to be recognized as lacking in business qualifications. He gave credit profusely, loaned money when he had it to almost anybody who seemed to have the popular demand, and had no faculty for advertising his own wares. Once, when admitting that his paper was not profitable, he frankly said: "Since the 'New Yorker' was first issued, seven partners in its publication have successively withdrawn from the concern, without, I trust, to say, without having improved their fortunes by the connection, and most of them with the conviction that the work, however valuable, was not calculated to prove lucrative to its proprietors. 'You don't humbug enough' has been the complaint of more than one of our retiring associates; 'You ought to make more noise, and vaunt your own merits. The world will never believe you print a good paper unless you tell them so.' Our course has not been changed by these representations."

Mr. Greeley, although eccentric enough in his appearance and habits, had thus far developed but few eccentricities of thought. He was temperate almost to the verge of total abstinence, partly, no doubt, from taste, partly also, perhaps, from his observations on the intemperate habits common about his father's early home in New Hampshire. He was an advocate of, and possessed of, a depreciated northern intercession; approved of the colonization society, and opposed anti-slavery societies at the north. He believed prohibition impracticable, but was warmly in favor of high license. He was vehemently in favor of a protective tariff, and always, as he expressed it, "an advocate of the interests of unassimilating industry."

He had been captivated by vegetarian notions, and was for a short time an inmate of a Grahamite boarding-house. There he met Miss Cheney, a young teacher from Connecticut, who was making a short stay in New York, on her way to North Carolina. She was a highly nervous, excitable person, full of ideas, prone to "isms," and destined to have a strong and not always helpful influence on
his life. He continued the acquaintance by correspondence, became engaged, married her in North Carolina, and made a short wedding-journey, of which his first visit to Washington was the principal feature. About the same period he contributed a great deal to the "Historic Pencilings," "Nero's Tomb," "Fantasies," "On the Death of William Wirt," etc. They are not destitute of poetic feeling, but in later years he was never glad to have them recalled. In 1839, learning that Robert Bonner, of the "New York Ledger," proposed to include representative poetical verses in a volume to be made up from authors not appearing in Charles A. Dana's "Household Book of Poetry," Mr. Greeley wrote: "Mr. Bonner, be good enough—you must—to exclude me from your new poetic Pantheon. I have no business therein, no right and no desire to be installed there. I am no poet, never was (in expression), and never shall be. True, I wrote some verses in my callow days, as I suppose most persons who can make intelligible pen-marks have done; but I was never a poet, even in the mists of deluding fancy, and until now it has been accused of all possible and some impossible offences against good taste, good morals, and the common weal; I have been branded aristocrat, communist, infidel, hypocrite, demagogue, dissisionist, traitor, corruptionist, and so forth, and so forth, but I stand untried by the severest tests. Let me face my youthful transgressions in the way of rhyme. . . . Let the dead rest! and let me enjoy the reputation, which I covet and deserve, of knowing poetry from prose, which the ruthless resurrected spirit of my verses would subvert, since the unobserving majority would blindly infer that I considered them poetry.

In establishing the "Tribune," Mr. Greeley had considerable reputation, wide acquaintance among newspaper men and practical politicians, one thousand dollars in money borrowed from James Coggeshall, and the promise from another source of a thousand more, which was never realized. He had employed, some time before, at $8 a week, a young man fresh from the University of Vermont. This young man, Henry J. Raymond, now became his chief assistant in the conduct of the "Tribune," and gradually a considerable force of people of similar fitness, gathered about him, the paper always having an attraction for men of intellect and scholarly tastes. In the early years it thus enjoyed the services of George William Curtis, William Henry Fry, Charles A. Dana, Margaret Fuller, Albert Brisbane, Bayard Taylor, Count Gruyowski, and others. Of its first number, 5,000 copies were printed, and, as Mr. Greeley said, "with difficulty given away." About 600 subscribers had been procured through the exertions of his personal and political friends. Being published at first at one cent a copy, it was regarded as a serious rival by the cheap papers, and the "Sun," especially undertook to interfere with its circulation by forbidding its newsellers to sell the new paper. The public courted this unfair, and the "Tribune" was greatly helped. In four weeks it reached a circulation of 6,000; in four weeks more its circulation had risen to the limit of the press, being between 11,000 and 12,000. Its business management was elastic, but by July the chances for a permanent success were so clear that Thomas McElrath, a business man of excellent standing, was taken in as an equal partner. A weekly issue was projected, and on 29 Sept. the "New Yorker" and the "Log Cabin" were merged in the first number of "The New York Weekly Tribune," which soon attained considerable circulation and ultimately became a great political and social force in rural communities, particularly in the period of the anti-slavery discussion prior to and during the war for the Union. From this time forward Mr. Greeley was more secure, but the "Tribune" might easily have been far more successful from the mere money point of view if its editor had been less outspoken and indifferent to the light in which the New York public might regard his opinions. The controlling influence in the "Tribune" was then a strong protector of free-trade: but he made the "Tribune" aggressively protectionist. A commercial community was necessarily conservative, but the "Tribune" soon came to be everywhere regarded as radical. New York had close business connections with the South, but the "Tribune" gradually became more and more explicit in its anti-slavery utterances. The prevailing religious faith among the better educated classes was orthodox; Mr. Greeley connected himself almost from the outset with a Universalist church. He aimed always to practise the sincere and honest humanitarian, and he was always an opponent, so that people soon talked of the "isms" of the "Tribune." Sympathizing profoundly with the workingmen, he was led constantly to schemes for bettering their condition, and became interested in the theories of Fourier. Before the "Tribune" was a year old he discussed the theories of Fourierism in France in an article beginning thus: "We have written something, and shall yet write much more, in illustration and advocacy of the great social revolution which our age is destined to commence, in rendering all useful labor at once attractive and honorably paid, and all consequent degradation from the glide. The germ of this revolution is developed in the writings of Charles Fourier." In March, 1842, he began publishing, under a contract with a number of New York Fourierists, one daily, which he called the first page of the "Tribune," on Fourierite topics, from the pen of Albert Brisbane. The theories here advanced were also occasionally defended in the editorial columns. Mr. Greeley became a subscriber to one or two Fourierite associations, notably that of the "American Phalanx" at Red Bank, N. J., and occasionally addressed public meetings on the subject. When the famous Brook Farm experiment was abandoned, its chief, George Ripley, sought employment on the "Tribune," and was soon its literary editor. Another of its members, Charles A. Dana, became in time the "Tribune's" managing editor. Another, Margaret Fuller, contributed literary work and occasional editorials, and lived in Mr. Greeley's family; and another, George William Curtis, was also employed. In 1846 Henry J. Raymond, who had now, owing to some disagreement, left the "Tribune" and became a leading editor on the "Courier and Enquirer," saw that Fourierism offered an inviting point for attack upon the "Tribune." Mr. Greeley, whose conduct of the paper was always argumentative and pugnacious, responded to some criticism by challenging Mr. Raymond's articles. The discussion of the whole subject, in a series of twelve articles and replies, to be published in full in all the editions of each paper. Mr. Raymond accepted, and made therein his first wide reputation in New York. Mr. Greeley's articles were undoubtedly able, but he was not a adroit a fencer as his opponent, and he had the unpopular side. The discussion left on the public mind the impression that Mr. Raymond was the victor, and the Fourierite movement from that date began its de-
cline in America. Mr. Greeley was always careful to mark his dissent from many of Fourier's propositions. In the 1840s, Mr. Raymond endeavored to force him into the position that no man can rightfully own land (substantially the doctrine of which Henry George has since been the apostle), but Mr. Greeley indignantly repudiated it. In later years he dwelt upon the principle of associations to which, in Fourierism and the gaudetian, he particularly attracted him; and in the form of co-operation among working-men this always received his zealous support.

The rappings and alleged spiritual manifestations of the Fox sisters at Rochester early attracted attention in the "Tribune," and were fairly described and discussed without absolute incredulity. In 1848, at Mrs. Greeley's invitation, the Fox sisters spent some time in his family as his guests. He listened attentively to what they said, inquired with interest into details, but hesitated to accept the doctrine of actual spiritual communication, and at any rate failed, he said, to see that any good came of them. Nevertheless, the open-minded readiness that he displayed in investigating this, like any other new subject presented to him, led to his attention, if not in his whole mind, at least in the public mind, with the spiritualistic movement, so that as effective a weapon as could be used against the "Tribune" in commercial and conservative New York was to call it a Fourierite and spiritualistic organ. With all his radicalism, however, there were two subjects on which he never moderated and almost continuously, and if Mr. Greeley had not been hopelessly incapable in business matters, should soon have placed him in a position of comfortable independence. In twenty-four years it invested from its earnings $382,000 in real estate and machinery, and divided the surplus equal to an annual average of over $50,000. But Mr. Greeley inherited his father's tendency to reckless indiscretions for his friends, was readily imposed upon by adventurers, and found it easier to give a dollar to every applicant than to inquire into his case. In the winter of 1861-62, he was thus often in serious straits for money, and lived in an extremely plain if not always economical fashion. Presently, as his property became more valuable, he contracted the habit of raising money for immediate necessities by parting with some of it. After it was clear to practical men that the "Tribune" was a success, he sold half of it to Thomas McElrath for $2,000. By the time it was seven years old he owned less than a third of it. In 1860 his interest was reduced to three twentieths, in 1868 to less than one tenth, and by 1872 he actually owned only six shares out of the hundred into which the property was then divided. Meantime, though always hampered by his business ideas, the property had advanced in value until in 1867 he was able to sell at $6,500 a share a restoration to the Chase that of the daily "Tribune" was kept at one cent until the beginning of its second volume, when it was advanced to two cents for a single number, or nine cents a week. It then had 12,000 subscribers, and did not lose 200 of them by the increase in price. At one time it reached a circulation of 28,000, and advertisements were so numerous that frequent supplements were issued. After a time the price was again advanced to three cents, and finally to four. The circulation rose to a steady average of 35,000 to 40,000, and there were periods of extraordinary interest, especially during the civil war, when for months it reached from 60,000 to 65,000. The weekly edition, being free then from competition, with strong weekly issues in the inland cities, gained a wide circulation throughout the entire north, being given in business houses and kept up for some years in the northern states and territories than any other one newspaper. During political canvases it sometimes reached a total circulation of a quarter of a million copies, and often for years ranged steadily above 100,000 copies a week. A semi-weekly expression was begun for the benefit of weekly readers enjoying mail facilities that led them to want their news oftener, and this edition ultimately attained a steady circulation of from 15,000 to 20,000 copies.

First Whig, then Anti-slavery Whig, then Republican, the "Tribune's" political course was generally in accord with the more popular and aggressive tendency of these parties. But it was also a highly individualized journal, constantly representing many opinions advocated by its editor irrespective of party. It opposed, for example, woman suffrage unless it could be first shown that the majority of women themselves desired it. It assailed repudiation in every form, north or south, and was the bitter critic of the repudiating states. In practice a total abstinence, he always favored the restriction of the use of liquor, and almost continuously, and if Mr. Greeley had not been hopelessly incapable in business matters, should soon have placed him in a position of comfortable independence. In twenty-four years it invested from its earnings $382,000 in real estate and machinery, and divided the surplus equal to an annual average of over $50,000. But Mr. Greeley inherited his father's tendency to reckless indiscretions for his friends, was readily imposed upon by adventurers, and found it easier to give a dollar to every applicant than to inquire into his case. In the winter of 1861-62, he was thus often in serious straits for money, and lived in an extremely plain if not always economical fashion. in the east. He actively encouraged one of his agricultural editors to establish a colony in Colorado on land that could be cultivated only by irrigation, and was proud that the successful town founded by this colony was called by his name, and that its first newspaper bore as its title the "Greeley Times", which he heard with delight in the evening news of his handwriting. He had personally a great fondness for farming, but little success at it, though he derived great comfort and recreation from his experiments on the farm that he bought at Chappaqua, thirty-three miles north of New York, where his family and friends were always expected. For many years he spent his Saturdays chopping down or trimming his trees, and occasionally assisting at other farm labor. He favored an international copyright. He constantly watched for new men in literature, was one of the first editors in America to recognize the rising genius of Dickens, and copied a sketch by "Boz" in the first issue of his first newspaper. He was one of the earliest in the east to discover Bret Harte, and perhaps the earliest to recognize Swinburne. He held frequent public discussions, one with Samuel J. Tilden and Parke Godwin on protection, another with Robert Dale Owen on marriage and divorce. He frequently addressed, in his editorial columns, open letters to distinguished public men, promptly printed replies if any came, and was apt to follow these with a "Tribune" issue. He printed Tilden's and Godwin's letters, and, with Benjamin H. Butler, Oliver P. Morton, John J. Crittenden, Samuel J. Tilden, and many others, were thus singled out. He was fond of taking readers into his confidence. Thus he published details of his experiments in farming, and printed serially a charming autobiography. He advertised his intended movements, particularly his trips to Europe and through the west. The latter proved an ovation, especially in the territories and in California. Being arrested once in Paris as a director of the American world's fair, at the suit of a disappointed French exhibitor, he published a graphic and amusing account of his imprisonment in Chichy. He admired Fenimore Cooper, and yet was involved in the series of libel suits instituted by that novelist, through a letter (written by Thurlow Weed) published anonymously in the "Times," on which he pleaded his own case, and promptly published another; he was a great reader of the trial and the adverse verdict. Sometimes, especially in discussion, he was less good-humored. In an angry letter to a state officer about some public documents advertised in the New York "Times," he referred to its editor as "that little villain, Raymond." Replying to a charge against him by the "Evening Post" of some corrupt association with the slave interest, he began, "You lie, villain, wilfully, wickedly, basely lie." A subscriber in Aurora, N. Y., discontinued his newspaper on the ground of Greeley's opposition to William H. Seward, and angrily said his only regret in parting was that he was under the necessity of losing a three-cent stamp to do it. Greeley published the letter with this reply: "The painful regret expressed in yours of the 18th inst. excites my sympathy. I am not prepared to answer the remarks, nor am I prepared to add to the personal animosity with which his readers and a large portion of the general public regarded him. He became, in spite of almost every oratorical defect, a popular speaker, always in demand, and always greeted with the loudest applause on whatever occasion, social, educational, reformatory, or political, he appeared. As early as January, 1848, he was announced as a lecturer on the subject of "Human Life," the advertisement being accompanied with the request, "If those who care to hear will send it near the owner's weak and husky voice." He was afterward able to make this weak and husky voice heard by mass meetings of thousands, and by the delivery of lectures throughout the west, he often more than doubled in a winter the annual salary that he received from the papers. He would do some public speaking whenever he could, wherever he was asked, whether paid or not. He was always ready to write for other people's papers, too, sometimes for pay, because he needed the money, but almost as readily without it, because he craved new audiences.

In 1848 he was elected to the National house of representatives, to fill a vacancy for three months. Regarding as an abuse the methods then pursued by congressmen in charging mileage, he published a list of the members' mileage accounts. This caused great indignation, and was followed by the free comments on congressional proceedings contributed daily to the "Tribune" over his signature. Thus he said that if either house "had a chaplain who dared preach of the faithlessness, neglect of duty, iniquitous waste of time, and robbery of the public by single members," it would be good enough in the chaplain business; but any ill-bred Nathan or Elijah who should undertake such a job would be kicked out in short order." He broke down the mileage abuse. He also introduced the first bill giving homesteads, free, to actual settlers on the public lands. In 1860 he was a candidate for U. S. senator against William M. Evarts, defeating Evarts, but being defeated in turn by the combination between Evarts' supporters and a few men favoring Irwin Harris, of Albany, who was elected. In 1864 he was one of the Republican presidential electors. In 1867 his friends again put him forward for the senate, but his candor in needlessly restating the views he held on general amnesty, then very unpopular, made his election impossible. The same year he was chosen delegate-at-large to the convention for revising the state constitution. At first he took great interest in the proceedings, but grew weary of the endless talk, and finally refused either to attend the body or draw his salary. Two years later he was made the Republican candidate for state comptroller. At a time when the election of the ticket was known to be hopeless, and in 1870 he was again nominated for congress by the Republicans in a hopeless Democratic district, where he reduced the adverse majority about 1,700, and ran largely ahead of the Republican candidate for governor. On the death of Charles G. Halpine ("Miles O'Reilly"), he accepted an appointment to the city office that Halpine had held, and discharged the duties gratuitously, turning over the salary to Col. Halpine's widow. With one notable exception, this completes his career as office-holder or candidate for office.

Mr. Greeley's voice grew stronger from the beginning of his editorial career. In 1848 he was intense in opposition to the Mexican war, on the ground that it was intended to secure more slave territory. In 1852 he sympathized with the Free-soil movement, and disapproved of the Whig platform—"the constitution itself"—but nevertheless supported the Whig candidate, Gen. Winfield Scott, because he thought that better than, by supporting a ticket that he knew could not be elected, to risk the success of the
Democrats. In 1856 he was an enthusiastic supporter of John C. Frémont, and during the next few months he may be said to have been the chief inspiration and greatest popular leader in the movement that carried the Republican party into power. He was indicted in Virginia in 1856 for circulating incendiary documents—viz., the "Tribune." Postmasters in many places in the south refused to deliver the paper at all, and persons subscribing for it were sometimes threatened with lynching. Congressman Albert Rust made a personal assault upon him in Washington, and no northern name provoked at the south more constant and bitter denunciation. Throughout the Kansas-Nebraska excitement the "Tribune" was constantly at a white heat, and its voluminous correspondence and ringing editorials greatly stimulated the northern movement that made Kansas a free state. Still, he favored only legal and constitutional methods for putting an end to the aggressions of slavery, and brought upon himself the hostility of the Garrison and Wendell Phillips abolitionists, who always distrusted him and often stigmatized him as cowardly and temporizing.

Up to this time the popular judgment regarded Seward as a radical, but in 1854 Mr. Greeley had addressed a highly characteristic letter to Gov. Seward complaining that Seward and Weed had sometimes used their political power to his detriment, and shown no consideration for his difficulties, with the result that "Gen. Patterson and Mr. Greeley" had become "an obstacle to the governor's advancement." Having labored to secure a legislature that would send Seward to the U.S. senate, it seemed to him "a fitting time to announce the dissolution of the political firm of "Seward, Weed, and Greeley" by the withdrawal of the junior partner." The letter showed that the writer was hurt, but it was not unfriendly in tone, and it ended thus: "You have done me acts of valued kindness in the line of your profession; let me close with the assurance that these will be ever gratefully remembered by Yours, Horace Greeley." Gov. Seward's friends claimed that on account of Greeley's disappointment as an office-seeker, as shown in this private letter, he had resolved to prevent Seward's nomination for the presidency in 1860. Mr. Greeley denied this emphatically, but it is true that he did not think the nomination advisable, and that in opposing Seward he discharged a public duty, in utter disregard of personal considerations. At any rate, he did oppose him successfully. The Seward men prevented his reaching the National convention as a delegate from New York; but he secured a seat as delegate from Oregon in place of an absentee, and made such an effectual opposition to Mr. Seward that he may fairly be said to have brought about the nomination of Abraham Lincoln. In the canvass that followed, the "Tribune" was still a great national factor. With a sense of responsibility after the election Mr. Greeley said: "If my advice should be asked respecting Mr. Lincoln's cabinet, I should recommend the appointment of Seward as secretary of state. It is the place for him, and he will do honor to the country." When the civil war approached, Mr. Greeley at first shrank from it. He hoped, he said, never to live in a Union whereof one section was pinned to the other by bayonets. But after the attack on Fort Sumter and the uprising at the north he urged the most vigorous prosecution of the war, to the end that it might be short. He chafed at the early delays, and the columns of his paper carried for weeks a stereotyped paragraph, "On to Richmond!" demanding the speediest advance of the National armies. Rival newspapers hastened in consequence to hold him responsible for the disaster at Bull Run, and his horror at the calamity, and sensitiveness under the attacks, for a time completely prostrated him. He subsequently replied to his critics in an editorial, which became famous, headed "Just as it is in the south refused to deliver the paper at all, and persons subscribing for it were sometimes threatened with lynching. Congressman Albert Rust made a personal assault upon him in Washington, and no northern name provoked at the south more constant and bitter denunciation. Throughout the Kansas-Nebraska excitement the "Tribune" was constantly at a white heat, and its voluminous correspondence and ringing editorials greatly stimulated the northern movement that made Kansas a free state. Still, he favored only legal and constitutional methods for putting an end to the aggressions of slavery, and brought upon himself the hostility of the Garrison and Wendell Phillips abolitionists, who always distrusted him and often stigmatized him as cowardly and temporizing.

Up to this time the popular judgment regarded Seward as a radical, but in 1854 Mr. Greeley had addressed a highly characteristic letter to Gov. Seward complaining that Seward and Weed had sometimes used their political power to his detriment, and shown no consideration for his difficulties, with the result that "Gen. Patterson and Mr. Greeley" had become "an obstacle to the governor's advancement." Having labored to secure a legislature that would send Seward to the U.S. senate, it seemed to him "a fitting time to announce the dissolution of the political firm of "Seward, Weed, and Greeley" by the withdrawal of the junior partner." The letter showed that the writer was hurt, but it was not unfriendly in tone, and it ended thus: "You have done me acts of valued kindness in the line of your profession; let me close with the assurance that these will be ever gratefully remembered by Yours, Horace Greeley." Gov. Seward's friends claimed that on account of Greeley's disappointment as an office-seeker, as shown in this private letter, he had resolved to prevent Seward's nomination for the presidency in 1860. Mr. Greeley denied this emphatically, but it is true that he did not think the nomination advisable, and that in opposing Seward he discharged a public duty, in utter disregard of personal considerations. At any rate, he did oppose him successfully. The Seward men prevented his reaching the National convention as a delegate from New York; but he secured a seat as delegate from Oregon in place of an absentee, and made such an effectual opposition to Mr. Seward that he may fairly be said to have brought about the nomination of Abraham Lincoln. In the canvass that followed, the "Tribune" was still a great national factor. With a sense of responsibility after the election Mr. Greeley said: "If my advice should be asked respecting Mr. Lincoln's cabinet, I should recommend the appointment of Seward as secretary of state. It is the place for him, and he will do honor to the country." When the civil war approached, Mr. Greeley at first shrank from it. He hoped, he said, never to live in a Union whereof one section was pinned to the other by bayonets. But after the attack on Fort Sumter and the uprising at the north he urged the most vigorous prosecution of the war, to the end that it might be short. He chafed at the early delays, and the columns of his paper carried for weeks a stereotyped paragraph, "On to
tations failed, and Mr. Greeley's share in the business brought upon him more censure than it deserved. As soon as the surrender did come he was eager for universal amnesty and impartial suffrage, and he thought the treatment of Jefferson Davis a mistake. When, after imprisonment and delay, the warrant failed to issue, Mr. Davis in trial, Mr. Greeley visited Richmond and in the open court-room signed his bail-bond. This act provoked a storm of public censure. He had been writing a careful history of the civil war under the title of "The American Conflict." The first volume, an unprecedented sale, and he had realized from it far more than from all his other occasional publications combined. The second volume was just out, and its sale was ruined, thousands of subscribers to the former volume refusing to take it. On the movement of George W. Blunt, an effort was made in the Union League club to expel Mr. Greeley. This roused him to a white heat. He refused to attend the meeting, and addressed to the president of the club one of his best letters. I shall not attend your meeting this evening, for I do not feel capable of judging or even fully apprehending me. You evidently regard me as a weak sentimentalist, misled by a maudlin philosophy. I arraign you as narrow-minded blockheads, who would like to be useful to a great and good cause, but don't know how. Your attempt to base a great enduring party on the hatred and wrath necessarily engendered by a bloody civil war is as though you should plant a colony on an iceberg which had somehow drifted into a tropical ocean. I tell you there that, out of a life earnestly devoted to the good of human kind, your children will recollect my going to Richmond and signing the bail-bond as the wisest act, and will feel that it did more for freedom and humanity than all of you were competent to do, though you had lived to the age of Methuselah. I ask nothing of you, then, but that you proceed to your end by a brave, frank, manly way. Don't side off into a wild resolution of censure, but move the expulsion which you purpose and which I deserve if I deserve any reproach whatever. I propose to fight it out on the line that I have held from the day of Lee's surrender. So long as any man is seeking to overthrow our government he is my enemy; from the hour in which he laid down his arms, he was my formerly erring countryman. The meeting was held, but the effort at any censure whatever failed.

Mr. Greeley did not greatly sympathize with the movement to make the foremost soldier of the war president in 1868, but he gave Gen. Grant a cordial support. He chafed at the signs of inexperience in some of the early steps of the administration, and later at its manifest disposition to encourage, in New York chiefly, the wing of the Republican party that had been unfriendly to himself. He disapproved of Gen. Grant's scheme for acquiring Santo Domingo, and was indignant at the treatment of Charles Sumner and John Lorthrop Motley. The course of the "carpet-bag" state government of South Carolina, and some of the acts of the Reconstruction, alarmed him, and brought him into open hostility to the administration he had helped to create. In 1871 he made a trip to Texas, was received everywhere with extraordinary cordiality, and returned still more outspoken against the policy of the governors and legislators of a part of the state. The satisfaction of his party was a sufficient Republican now began to speak freely of him as a candidate for the presidency against Gen. Grant. Numbers of the most distinguished Republicans in the senate and elsewhere combined in the formation of the Liberal Republican party, and called a convention at Cincinnati to nominate a national ticket. Eastern Republicans, outside of New York at least, generally expected Charles Francis Adams to be the nominee, and he had the united support of the whole revenue reform and free-trade party. But Mr. Greeley found them stronger than any other with western and southern delegates. On the sixth ballot he received 332 votes, against 324 for Adams, a sudden concentration of the supporters of B. Gratz Brown upon Mr. Greeley having been decided. This had swelled his majority, so that when the vote was finally announced it stood: Greeley, 489; Adams, 187. In accepting the nomination, which he had not sought, but by which he was greatly gratified, Mr. Greeley made the restoration of all political rights lost in the rebellion, together with a suffrage impartially extended to white and black on the same conditions, the cardinal principle of the movement. His letter ended with this notable passage: "With the distinct understanding that, if elected, I shall be the president, not of a party, but of the whole people, I accept your nomination in the confident trust that the masses of our countrymen, north and south, are eager to clasp hands across the bloody chasm which has too long divided them, forgetting that they have been enemies in the joyful consciousness that they are and must henceforth remain friends." Mr. Greeley's nomination at first caught the popular fancy, and his canvass promised for a time to resemble that of 1840, in the enthusiastic turmoil of which he had first risen to national prominence. But, contrary to his judgment (though in accordance with that of close friends), the Democrats, instead of putting no ticket in the field, as he had expected, formally nominated him. This action of his life-long opponents alienated many ardent Republicans. The first elections were considered in his favor, and when in the summer North Carolina voted, it was believed that his friends had carried the state. The later official vote, however, gave the state to the Grant party, and from that time the Greeley wave seemed to be subsiding. At last, on appeals from his supporters, who thought extraordinary measures needful, he took the state in person. He was made in his tour, extending from New England through New York, Pennsylvania, Ohio, and Indiana, evoked great enthusiasm. All sides regarded them as an exhibition of brilliant and effective work unprecedented in that generation. But they were not enough to stem the rising tide. Mr. Greeley received 2,884,079 of the popular vote, against Gen. Grant's 3,597,070; but he carried none of the northern states, and of the southern states only Georgia, Kentucky, Maryland, Missouri, Tennessee, and Texas. He had always been more sensitive to attacks and reverses than the public imagined, and now the strain proved too great. The canvass had been one of extraordinary bitterness, his old associates reviling him as a turncoat and traitor, and his friends, especially his friends in Congress, turned away in alarm from his unseemly rancor. His wife, always feeble, and of late years suffering greatly from a combination of nervous and other diseases, fell ill while he was absent on his tour. On his return he watched almost continuously for weeks at her bedside, and he buried her in the presence of a few friends. He had been a sufferer from insomnia; he had necessarily lost much sleep, and during and after his wife's illness he scarcely slept at all. He was not disappointed in the election, for he had known for
weeks that defeat was inevitable. Nor did this act, though generally disapproved by his friends, weaken his friendships. Henry Ward Beecher wrote: "You may think that it is a cloud of small dust, but that all your old friends who parted company with you in the late campaign will turn a momentary difference into a life-long alienation. It will not be so. I speak for myself, and also from what I perceive in other men's hearts. Your mere political influence will, for a time be impaired, but your own power for good in the far wider fields of industrial economy, social and civil criticism, and the general well-being of society, will not be lessened, but augmented." But Mr. Greeley's avowed explanation resulted in an inflation of the upper membrane of the brain. He resumed his editorial duties, but in a few days was unable to continue them. He remained sleepless, delirium soon set in, and he died on 20 Nov., 1872.

The personal regard in which he was held, even by his bitterest opponents, at once became manifest. His body lay in state in the city hall, and a throng of many thousands moved during every hour of the daylight through the building to see it. The president, vice-president, and chief justice of the United States, with a great number of the leading politicians of both parties, attended the funeral, and followed the hearse, preceded by the mayor of the city and other civic authorities, down Fifth avenue and Broadway. John G. Whittier described him as "our later Franklin," and the majority of his countrymen have substantially accepted that simile in the history of his life, while members of the press consider him perhaps the greatest editor, and certainly the foremost political advocate and controversialist, if not also the most influential popular writer, the country has produced. In 1867 Francis R. Carpenter painted a portrait of Mr. Greeley for the "Tribune" association; a larger one, executed by Alexander Davis, was exhibited in the Paris salon, afterward became the property of Whitehead Reid, and is now (1887) in the "Tribune" counting-room. At the time of Mr. Greeley's visit to Rome, Hiram Powers made a portrait bust, and at a later date Ames Van Wart executed one in marble, on a commission from Marshall O. Roberts. The bronze bust in Greenwood cemetery was presented by the printers of the United States. John J. Audubon is now (1887) completing a correspondingly fine statue, to be placed at the entrance of the "Tribune" building. The accompanying portrait is from an excellent photograph by Bogue and Davis. Mr. Greeley's works are "Hints Toward Reforms" (New York, 1850); "Glances at Europe" (1851); "History of the Struggle for Slavey Extension" (1856); "Overland Journey to San Francisco" (1860); "The American Conflict" (2 vols., Hartford, 1864-6); "Recollections of a Busy Life" (New York, 1868; new ed., with appendix containing an account of his later years, his argument on the slave-trade and divorce with Robert Dale Owen, and miscellaneous, New York, 1873); "Essays on Political Economy" (Boston, 1870); and "What I Know of Farming" (New York, 1871). He also assisted his brother-in-law, John F. Cleveland, in editing A Political Treatise on the Constitution of the United States, and supervised for many years the annual issues of the "Whig Almanac" and the "Tribune Almanac." Lives of Horace Greeley have been written by James Parton (New York, 1853; new eds., 1863, and Boston, 1873); L. U. Reavis (New York, 1872); and Lewis D. Watrous (London, 1879). The last is also a "Memorial of Horace Greeley" (New York, 1873).
letters. Here they suffered greatly from want of provisions, and were finally forced to live on boiled meat and hardtack. Sixteen of the party died of starvation; one was drowned, and one, Private Henry, was shot by Lieut. Greely's orders, on the ground that he repeatedly stole food. The seven survivors were rescued by the third relief expedition, under Capt. Winfield Schley, on 22 June 1881, in a vessel chartered for the purpose. A short delay of a few hours' delay would have been fatal. Since the return of Lieut. Greely he has been charged with incapacity and arbitrary conduct in his management of the expedition; but these charges have not been listened to by his superiors. He was promoted to captain, 11 June 1886, and in 1887, after the death of Gen. William B. Hazen, was appointed by President Cleveland to succeed that officer as chief of the signal-service corps, with the rank of brigadier-general. In 1885 he was given the queen's gold medal by the Royal geographical society of London, and he has also received a gold medal from the Paris geographical society. He has published "Three Years of Arctic Service" (New York, 1886). See also "The Rescue of Greely," by Capt. Winfield S. Schley, U. S. N. (1885).

GREEN, Alexander Little Page, clergyman, b. in Tennessee, 1801; d. in Nashville, 15 July, 1874. He received an academic education, was ordained elder in the Tennessee conference of the Methodist Episcopal church in 1827, and, besides performing missionary labor, filled several pastorates. In 1844 he was a delegate to the general conference which met in New York city to adopt measures for the organization of the Methodist Episcopal church, south, and was one of the commissioners in the adjustment of the church property question consequent on the division. He was a member of the publishing office, and was chairman of the book committee. Mr. Green was a trustee of Vanderbilt and Nashville universities, and was an authority in Indian lore. He published "Church in the Wilderness" (Nashville, 1840), and was preparing a work on the Cherokee, when he died.

GREEN, Anna Katharine, author, b. in Brooklyn, N. Y., 11 Nov., 1846. She was graduated at Ripley female college, Poughkeepsie, N. Y., in 1867, and in 1867-69 lived in Buffalo. In November, 1868, she married Charles Rohles, of Brooklyn. Her novels, some of which are deratories, include "The Leaverton Case," (New York, 1879); "A Strange Disappearance" (1879); "The Sword of Damocles" (1881); "X. Y. Z." (1883); "Hand and Ring" (1883); "The Mill Mystery" (1886); and "7 to 12" (1887). She has also published "The Defence of the Bride, and other Poems" (1882), and "Risifi's Daughter," a dramatic poem (1886).

GREEN, Beriah, reformer, b. in New York state in 1794; d. in Whistenton, N. Y., 4 May, 1874. He was graduated at Middlebury college in 1819, and studied theology with the intention of becoming a Presbyterian minister, but formed a creed of his own, which did not admit of his joining any denomination. He removed to Kennebunk, Me., in 1820, and the following year to Ohio, and was professor of sacred literature in the Western College. His determined opposition to slavery shortened his stay in this college, and after three years later he became president of the Oenida institute, Ohio. Throughout his life he was the earnest friend of Gerrit Smith and other abolitionists, and in 1834, having taken an active part in the organization of the American anti-slavery society, was chosen its president. Mr. Green was also a temperance advocate and promoter of public education. In 1845 he founded the Manual labor school in Whistenton, N. Y. He had just addressed the board of excise in the town-hall of Whistenton, urging the abolition of intoxicating liquors, and was waiting at the head of a line of citizens to place his vote in the ballot-box, when he fell dead. He published "History of the Quakers" (Albany, 1828) and "Sermons and Discourses, with a Few Essays and Additions," 4 vols. (1833).

GREEN, Charles, naval officer, b. in Connecticut in 1814; d. in Providence, R. I., 7 April, 1887. He entered the U. S. navy, 1 May, 1826, became passed midshipman, 29 April, 1832, lieutenant, 8 March, 1837, commander, 14 Sept., 1853, captain, 16 July, 1862, and commodore, 4 April, 1867. On account of incapacity resulting from long and faithful service he was placed on the retired list, 15 Nov., 1882. When commanding the "Jamestown" in 1861-2, and on blockade duty off Savannah, Ga., Fernandina, Fla., and Wilmington, N. C., he took six prizes. While on the coast of Florida he sent out a boat-expedition and destroyed the bark "Alvarado" under the guns of the fort at Fernandina.

GREEN, Duft, politician, b. in Georgia, about 1790; d. in Dayton, Ga., 10 June, 1875. He studied law in early life, and was admitted to practice in 1808.

GREEN, Ezra, physician, b. in Malden, Mass., 17 June, 1746; d. in Dover, N. H., 25 July, 1847. He was graduated at Harvard in 1766, and engaged in the practice of medicine in 1768. In June, 1775, he joined the continental army as surgeon, was on the Canada expedition, and in the sloop-of-war "Ranger," under Paul Jones, in 1777. He remained in the service until 1781, when he resigned and engaged in private practice. He was a Federalist in politics, and a delegate to the New Hampshire constitutional convention of 1820.

GREEN, Francis, merchant, b. in Boston, 1 Sept., 1742; d. in Medford, Mass., 21 April, 1809. His father, Benjamin, was president of the council and commander-in-chief of Nova Scotia. Francis was graduated at Harvard in 1760; joined the army as an ensign after the beginning of the French war, was present at the siege of Louisburg in 1758, at that of Martinique, and in 1762 at the capture of Havana. In 1765 he went to England, and on his return sold his commission. He returned to his business in Boston. At the beginning of the Revolution, although he declared that he was the friend of liberty, he adhered to the crown. In 1776 he went to Halifax, where he was appointed a magistrate, returned to New York in 1777, and the next year was procured to quit and banished. He returned to England till 1784, when he returned to Nova Scotia, and was sheriff of the county of Halifax and senior judge of the court of common pleas. He returned to Massachusetts in 1797, and settled in Medford. He was member of the American anti-slavery society, was chosen its president. Mr. Green was also a temperance advocate and promoter of public education.
GREEN, Francis Marshall, naval officer, b. in Boston, Mass., 23 Feb., 1835. He early became a seaman, and in June, 1861, was appointed acting master in the U.S. navy, and attached to the screw "Vincennes," of the West Gulf squadron. Subse-

quent to being promoted to the command of the Mississippi, served on the screw "Oneida," and commanded the steamer "Commodore." In April, 1864, he was promoted to acting volunteer lieutenant, and served on special duty on the "Niagara." Later he commanded the "Boxer," and participated in the capture of Fort Fisher. In 1864, at the close of the war he was transferred to the regular navy, and in December, 1868, was commissioned lieutenant-commander. From 1873 till 1888 he was connected with five expeditions for determining exact latitudes and longitudes in various parts of the world. In July, 1883, he was made commander, and after some time spent on shore duty was given command of the "Yantic." Com-

mander Green has been associated in the publication of government reports, such as "Navigation of the Caribbean Sea" (1877); "A Report on the Progress of Exploration in the Belcher and New Hebrides Islands" (1877); similar reports for South America (1880), and the East Indies, China, and Japan (1888), and a work on "Geographical Positions" (1888).

GREEN, Jacob, b. in Critten, Rensselaer Co., Vt., 24 Dec., 1802; d. in Sing Sing, N. Y., 29 Nov., 1866. He was educated at the high-

school at Brandon and the classical school of Rut-

land, Vt., and in 1824 was graduated in medicine in Middlebury. He began practice in Rutland, and after several years went abroad, and studied in the hospitals of Edinburgh, London, and Paris, making a specialty of the diseases of the throat and air-passages. He was elected, on his return, to the chair of these diseases in the Medical col-

lege of Castleton, Vt., and remained there until his removal to New York City in 1830. He revisited the hospitals in Paris in 1831, and on his return was elected to the chair of the theory and practice of medicine in the New York medical college. He assisted in establishing the "American Medical Monthly" in 1834, and became one of its editors. His "Serious Illness in 1834" he pronounced to be a nervous disorder and went to Cuba, dying of a lingering pulmonary disease. The degree of LL. D. was conferred on him by the University of Vermont. His works are "A Treatise on the Diseases of the Air-Passages" (New York, 1846); "Pathology and Treatment of Croup" (1849); "Surgical Treatment of the Polypi of the Larynx" (1853); "Re-

port of a Hundred Cases of Pulmonary Diseases" (1858); and "Selections from the Favorite Prescrip-

tions of Living American Physicians" (1858).

GREEN, Jacob, soldier, b. in Malden, Mass., 23 June, 1722, d. in Morristown, N. J., 24 May, 1796. His parents were poor and he was apprenticed to a trade in order to meet his college exp-

enses. He was graduated at Harvard in 1744, and under the influence of George Whitefield became a clergyman in 1745, and was installed pastor of the Presbyterian church in Morristown, N. J. To support his family he also studied and practised medicine while occupying this pulpit. In 1757 he was elected president of the College of New Jersey. He was a delegate to the Provincial congress of that state in 1773, was chairman of the committee that drafted the state constitution, and wrote a series of articles on the depreciation of paper currency, which had wide circulation. His suggestions regarding the redemption of continental currency were much the same as were those afterward adopted by congress. Mr. Green's published works are "Sermons" (Philadelphia, 1769); "Sermons" (1799); "A Pamphlet on the Jewish Church" (1798); and an "Autobiography," which was published in "The Christian Advocate" by his son.

His son, Ashbel, ill-fated Disciple of the College of New Jersey, N. J., 6 July, 1762; d. in Philadelphia, 19 May, 1848, taught to acquire the means to attend college, but in 1778 his studies were interrupted by the Revolutionary war, in which he served as a sergeant until the spring of 1780. He then entered Prince-

ton, was graduated A. M. 1784, and removed to Philadelphia, where he was appointed tutor, and afterward became professor of mathematics and natural philosophy. In 1786 he was licensed to preach by the presbytery of New Brunswick, and the next year was installed pastor of the 2d Presbyterian church of Philadelphia. He was a delegate to the general assembly of his church in 1790, and moved a renewal of communica-
tions between this and the Congregational church. In 1792 he was appointed chaplain to congress. The Princeton college buildings were destroyed by fire in 1802, and when it was rebuilt, Dr. Green, who had been president, was re-elected in 1811. The college elected its president in 1812. The same year the title of LL. D. was given him by the University of North Carolina, and he was elected president of the board of trustees of Princeton theological seminary. He resigned the presidency in 1822, and removed to Philadelphia, where he edited "The Christian Advocate" for twelve years, and during a portion of the time "The Assembly's Magazine." During this period he frequently supplied vacant pulpits. He was a voluminous writer. His principal works are: "Commentary on the Constitution of the College of New Jersey, with a History of the College" (Boston, 1822); "Presbyterian Missions" (1820); "Sermons on the Assembly's Catechism" (1818); "Sermons from 1790 to 1836" (1838); and "Reports and Addresses from 1798 to 1830" (1837). He also edited Dr. Witherspoon's works, and wrote an autobiography of Jacob Green (Philadelphia, 1802).

ASHBEL's son, Jacob, scientist, b. in Philadelphia, 26 July, 1790; d. there, 1 Feb., 1841, in his boyhood developed a taste for botany, and made a large col-

lection of plants. At an early age he wrote a treatise on electricity, and entered medical school. In 1806 he was graduated at the University of Pennsylvania, studied law, and began practice, but accepted in 1815 the chairs of chemistry, experimental philosophy, and natural history, in Prince-

ton. In 1822 he became professor of chemistry in Jefferson medical college, where he remained until his death. He is the author of "Chemical Diag-

grams"; "Chemical Philosophy" (Philadelphia, 1838); "Astronomical Recreations" (1829); "A Syllabus of a Course of Chemistry" (1833); "Trichobites" (2 vols., 1838); "The Botany of the United States" (1839); "Notes of a Traveller" (1831); and "Diseases of the Skin" (1841).

GREEN, James Stephen, politician, b. in Pau-

querry, Va., 28 Feb., 1817; d. in St. Louis, Mo., 9 Jan., 1870. He received a common-school education, removed to Arkansas, Missouri, where he was admitted to the bar, and began to practise at Canton. He was presidential elector on the Polk and Dallas ticket in 1844, and was elected to congress as a Democrat, serving from 1847 till 1851. He was charged with affairs in the United States of Columbia in 1850, was appointed consuls in 1854, but did not act in that capacity. On his return in 1856 he was again elected representative to congress, but did not take his seat, having been chosen to the U.S. senate, where he served from 1857 till 1861. He bore a
conspicuous part in the Kansas contest, 1857-8, and presented the majority report of the committee on territories. He favored the statehood of Kansas from 1853 till his death, and from 1890 to 1878 was president of the board. In 1850 the degree of LL.D. was conferred on him by Princeton. He published two volumes of "Reports of Cases in the Courts in Chancery of New Jersey." (New York, 1842-46).

GREEN, John Orne, physician, b. in Malden, Mass., 14 May, 1799; d. in Lowell, Mass., 23 Dec., 1886. He was graduated at Harvard in 1817, and at the medical school in 1822. He then settled in East Chelmsford (now Lowell), Mass., and practised his profession. In 1834 he was president of the Medical Society of Massachusetts, and in 1846 delivered the annual address before that body. From 1866 till his death he was senior physician of St. John's hospital. For many years he was president of the "Old residents' historical society," chairman of the school committee, and was interested in municipal affairs. He published "History of Small-Pox in Lowell" (Boston, 1837); "Memorial of John C. Dalton" (1864); "An Address before the Citizens of Lowell at the Dedication of the Green School-House" (Lowell, 1865); "Lowell and Harvard College in Relation to the "Massachusetts Patients' Association" (1877); and an address before that body (1888).—His son, John Orne, physician, b. in Lowell, Mass., 7 June, 1841, was graduated at Harvard in 1863, and at the medical school in 1866. In 1867 he visited Europe, and studied in Berlin, Vienna, and Würzburg. In 1868 he returned to Boston. In 1868-70 he was instructor in auricular surgery in Harvard, and since that date has been auricular surgeon in the Boston city hospital. Dr. Green has contributed frequent papers to medical and surgical journals.

GREEN, John Cleve, merchant, b. in Lawrenceville, N. J., 14 April, 1800; d. in New York city, 28 April, 1875. He received an academic education, and in early manhood entered a counting-house in New York city. He went as a consignee to South America and China from 1823 till 1839, and while in Canton became a member of the British usseil & Co. and was eminently successful in business. He returned to New York in 1839 with a large fortune, and settled there, continuing his connection with the China trade. Much of his time was devoted to religious and charitable enterprises. He was a trustee of the New York hospital for the Deaf and Dumb, the board of directors of the Home for crippled, and for many years financial agent and trustee of Princeton theological seminary. He endowed Princeton seminary with the Helena professorship of history, built one of the professor's houses, renovated the chapel, expending a sum which amounted to its original cost, remodelled the dining-hall, and bequeathed to the institution $50,000. Mr. Green also founded at Princeton the "John C. Green" school of science, and was liberal in his gifts to the University of New York. A green memorial alcove containing his portrait was added to the New York society library by his widow, who gave $50,000 for that object.—His brother, Henry Woodhull, jurist, b. in Lawrenceville, N. J., 20 Sept., 1802; d. in Trenton, 19 Dec., 1876, was graduated at Princeton, was admitted to the bar of Trenton in 1823, and continued in practice there for twenty-one years. He was a member of the legislature in 1842, of the Constitutional convention of 1844, and was appointed afterward chancery reporter. He was chief justice of the supreme court from 1860, when he became chancellor, but failing health compelled him to resign in 1866. His later years were given to study and to educational and charitable enterprises. He was a trustee of the Princeton theological seminary from 1833 till his death, and from 1860 till 1878 was president of the board. In 1850 the degree of LL.D. was conferred on him by Princeton. He published two volumes of "Reports of Cases in the Courts in Chancery of New Jersey." (New York, 1842-46).

GREEN, Jonathan H., "the reformed gambler," b. near Lawrenceburg, Ind., in 1813. His mother died while he was in infancy, and his father, who was dissipated, bound him to an unkind master. After various adventures, he ran away from his employer in 1828, and obtained work in Cincinnati, where, for some boyish offenses, he was arrested and thrown into jail, where he contracted the habit of card-playing with his companions. For the next twelve years he led a wandering life, travelling up and down the Mississippi, under assumed names, and engaging in gambling as a profession. He was convicted of fraud and imprisoned on the bar of Trenton in 1823, and continued in practice there for twenty-one years. He was a member of the legislature in 1842, of the Constitutional convention of 1844, and was appointed afterward chancery reporter. He was chief justice of the supreme court from 1860, when he became chancellor, but failing health compelled him to resign in 1866. His later years were given to study and to educational and charitable enterprises. He was a trustee of the Princeton theological seminary from 1833 till his death, and from 1860 till 1878 was president of the board. In 1850 the degree of LL.D. was conferred on him by Princeton. He published two volumes of "Reports of Cases in the Courts in Chancery of New Jersey." (New York, 1842-46).
zens of Philadelphia. The press commented favorably on Mr. Green's good sense and good nature during the discussion, and the three days' argument was published in part in the newspapers and some of the periodicals of that date. He has published "Gambling Unmasked, An Autobiography" (Philadelphia, 1847), and "Secret Band of Brothers" (1847). He was living in Philadelphia in 1887.

GREEN, Joseph, b. in Boston, Mass., in 1766; d. in London, England, 11 Dec., 1789. He was graduated at Harvard in 1782, and espoused the patriot cause; in 1789 he was one of the fifty-eight Boston memorialists who arrayed themselves against the crown, and in 1784 a member of the committee with Samuel Adams to report instructions to the Boston representatives. He changed his political views, however, on the prospect of the war, and was appointed in 1774, by Gov. Thomas Gage, one of the "mandamus" council for remodelling the government of Massachusetts in order to curtail the rights of the colonists; he did not take the oath of office, but signed the loyal address approving Gov. Hutchinson's political course, and in 1776 was proscribed and banished. Green was regarded as the wit of his day, and his political lampoons, in which he satirized first one and then the other party, were in great repute. His works include "The Wonderful Lament of Old Mr. Tenor," written after the change in currency (Boston, 1774), and "Poems and Satires" (1780).

GREEN, Joseph F., naval officer, b. in Maine, 24 Nov., 1811. He was appointed midshipman, 1 Nov., 1828; in the Bombardment of Fort Wagner, 18 July, 1863. From 1866 till 1868 he was on ordnance duty at the Boston navy-yard, and was commissioned as commodore, 24 July, 1867. He was assigned to special duty in 1868, commanded the southern squadron of the Atlantic fleet in 1870. In the same year he resigned and retired 25 Nov., 1872.

GREEN, Louis Warner, educator, b. in Boyle county, Ky., 28 Jan., 1800; d. in Danville, Ky., 26 March, 1883. He was graduated at Centre college, Ky., in 1800, and at the Princeton theological seminary in 1802. He was then licensed to preach and appointed professor in Centre college, and, after remaining there two years, went to Europe, where he spent some months in study. On his return, Mr. Green was appointed vice-president of Centre college, and professor of belles-lettres, and at the same time was associated with the Presbyterian church in Danville. He was afterward elected to the chair of oriental literature in the Western theological seminary at Alleghany, Pa., where he remained for seven years. He then became pastor of the 2d Presbyterian church in Bellefonte, Pa., and afterward among the Hampden Sidney college, where he remained until 1856. In that year he removed to Kentucky, and was president of the State normal school. He afterward accepted the presidency of Centre college, and resigned in 1864.

GREEN, Mart. E., soldier, b. in Lewis county, Mo., about 1825; d. in Vicksburg, Miss., 27 June, 1863. At the beginning of the civil war he organized a regiment near Paris, Mo., and, joining Gen. Sterling Price, contributed largely to the success of the Confederate forces in the capture of Lexington, Mo., and the Union garrison commanded by Col. James A. Mulligan. He ordered his men to roll hemp-bales up the river-bank, which formed movable breastworks. After this battle he was appointed brigadier-general of the Missouri volunteer army and Price throughout the Missouri campaign, and was conspicuous for bravery in the battles of Farmington, Juka, Cornith, and Baker's Creek.

GREEN, Norvin, capitalist, b. in New Albany, Ind., 17 April, 1818. He was graduated in medicine at the University of Louisville, Ky., in 1840, and afterward served three terms in the Kentucky legislature. He became president of the Southwestern telegraph company about 1854, was afterward vice-president of the American and Western union companies, and in 1878 succeeded William Orton as president of the latter named corporation. Dr. Green was also president of the Louisville, Cincinnati, and Lexington railroad in 1869-73.

GREEN, Samuel, printer, b. in England, in 1615; d. in Cambridge, Mass., 1 Jan., 1702. He was one of the first printers in New England, being the successor of Samuel Green. His works include "Cambridge Platform" in 1649, and a revised edition of the Psalms in 1650. In October, 1658, Green was granted by act of legislature 300 acres of land, "where it is to be found." It was subsequently laid out for him in Haverhill. In 1659 a second press was built on Cambridge Common, and in 1659 he printed a version of the Psalms in the Indian tongue. In 1661 the New Testament was issued; and in 1663 the entire Old and New Testament, with the New English Psalms in Indian verse, translated by Rev. John Eliot (q. v.), were published at the dialect of the Nipmuck or Nativ Indians. A second edition of the Indian Bible was printed in 1685. Green continued printing to an advanced age. He had nineteen children, and, although his descendants were nearly all printers, there was no printing done for forty years after his death. His son, Bartholomew, printer, b. in Cambridge, Mass., 12, Oct., 1666; d. in Boston, Mass., 28 Dec., 1782, succeeded to his father's business. He first set up his press in Cambridge, and afterward at Boston, where it was destroyed by fire, 16 Oct. 1807. In the same year he resumed business in Boston. On 24 April, 1704, he issued the first number of the "Boston News Letter," which was continued by him during his life. It was printed weekly, and published by authority of John Campbell, postmaster, who was the proprietor. It became the property of Green eighteen years afterward, and for fifteen years was the only newspaper in the colonies. The contents of the first number, covering three pages of folio post, were extremely meagre, and it contained but one advertisement, that of the proprietor. Green endeavored to avoid political discussions of the religious and political quarrels of the times. "The Design of this Paper" said his prospectus "is not merely to Amuse the Reader, much less to Gratify any ill tempers by Reproach or Ridicule, to Promote Contention, or Espouse any Party among us." For about forty years Green was printer for the government, and the foremost publisher in Boston. It was said of him at his death that he "had much of that primitive Christianity which has always been the distinguishing glory of New England." After his death the "Boston News Letter" was carried on by his son-in-law, John Draper, and then by the latter's son Richard (q. v.).
GREEN, Samuel Abbott, physician, b. in Groton, Mass., 16 March, 1810. He graduated at Harvard in 1831, and received his medical degree three years later, after which he spent several years in Europe. On his return he began practice in Boston, and became one of the district physicians for the city dispensary. On 15 May, 1838, he was licensed by Gov. Bache, surgeon of the 2d militia regiment. At the beginning of the civil war he was commissioned assistant surgeon of the 1st Massachusetts regiment of volunteers, and was the first medical officer mustered in for three years service. He was promoted surgeon of the 24th Massachusetts regiment on 2 Sept., 1861, where he remained until 2 Nov., 1864, serving on the staffs of various cavalry officers. He had charge of the hospital ship "Recluse," of the Burnside expedition to Roanoke island, of the hospital ship "Cosmopolitan" on the coast of South Carolina, and during the siege of Port Royal was chief medical officer on Morris island. In October, 1863, he was sent to Florida, and was post-surgeon at St. Augustine and Jacksonville; thence he was sent to Virginia, and was with the army when Bermuda Hundred was taken. He was appointed acting surgeon of the 1st Massachusetts regiment, commended of Richmond after the fall of that city. For gallant and distinguished services in the field in 1864 he was brevetted lieutenant-colonel of volunteers. Dr. Green organized "Roanoke cemetery" in 1863, which was one of the first regular burial-places for National soldiers. After the close of the war Green was from 1865 until 1872 superintendent of the Boston dispensary, a member of the Boston school board in 1860-2 and 1869-73, trustee of the public library in 1868-74, and acting librarian from October, 1874, to October, 1878. In 1870 Gov. Claflin appointed him one of a commission to care for disabled soldiers. In 1871 he became city physician of Boston, and retained the office till 1880. He was chosen a member of the board of experts authorized by congress in 1878 to investigate the yellow fever, and in 1882 he was elected mayor of Boston. Dr. Green has given much time to historical studies, and for some years has been librarian of the Massachusetts historical society. In addition to a large number of papers on scientific and historical subjects, he has published "Voyage of Captain Amaud," written and kept by Count William de Deux-Ponts, 1790-1); translated from the French manuscript, with an introduction and notes (Boston, 1868); "An Account of Percival and Ellen Green and of Some of Their Descendants" (printed privately, Groton, Mass., 1870); "Epitaphs from the Old Burying-Ground in Groton, Massachusetts" (1879); "The Early Records of Groton, Mass., 1632-1877" (1890); "History of Medicine in Massachusetts," a centennial address delivered before the Massachusetts medical society at Cambridge, 7 June, 1881 (Boston, 1881); "Groton during the Indian Wars" (Groton, 1882); "Groton during the Witchcraft Times" (1883); "The Boundary-Lines of Old Groton" (1885); "The Geography of Groton," prepared for the use of the Appalachian (mountain) club (1886); and "A History of the Cuyahoga Indians" (20 numbers, 1884-7).

GREEN, Seth, pisciculturist, b. in Rochester, N. Y., 19 March, 1817. He received a common-school education, but early manifested a passion for fishing, hunting, and woodcraft. For many years he was the proprietor of the only fish and game market near his home. In 1857 he conceived the idea of the artificial propagation of fish, and in 1858, during a trip to Canada, made observations on the habits of salmon. Observing that as soon as the spawn was cast the male salmon and other fish ate it, he directed his attention to methods of protecting it, and increased the yield of fish till he had raised the product to ninety-five per cent. In 1864 he discovered a method of artificially impregnating dry spawn, and began the propagation of fish as a business at Caledonia, Livingston county, N. Y. In 1867, by invitation of the fish commissioners of four of the New England states, he experimented on the hacking of shad at Holyoke, on the Connecticut river, and by his improvements hatched in a fortnight's time 15,000,000, and in 1868, 40,000,000. His work was afterward extended to the Hudson, the Potomac, the Susquehanna, and other important rivers, where he succeeded in artificially propagating fifteen of the more common species with largely increased products. In 1888 he was appointed one of the fish commissioners of New York, and soon afterward made superintendents of fisheries in that state. He transported in 1871 the first shad ever taken to California. As a result, over 1,000,000 marketable shad were sold on the Pacific coast in 1885. He has hatched artificially the spawn of about twenty kinds of fish, and has also hybridized striped bass with whitefish, and has bred trout with salmon trout, brook trout with California salmon, salmon trout with white-fish, and European trout with American brook trout. He has been decorated with two gold medals by the Sociéé d'acclimatation of Paris. He has invented important appliances for use in the propagation of trout, and other fishes, and is the author of "Trout Culture" (Rochester, 1870), and "Fish Hatching and Fish Catching" (1879).

GREEN, Thomas, governor of Maryland, b. in England; d. in Maryland. He was one of the Roman Catholic refugees that accompanied Leonard Calvert to Maryland in 1634, and was appointed a privy councillor in 1639. Leonard Calvert named him governor on his death-bed. He served in 1637-8, and was again chief executive for a part of 1644, during the absence of Gov. Stone. He was reappointed a privy councillor toward the end of the same year, and as such took part in the assembly that passed the toleration act. The date of his death is not known.

GREEN, Thomas, soldier, b. in Virginia in 1816; d. in Jefferson, La., 14 April, 1864. His father was chief justice of Tennessee and president of Lebanon law-college. The son removed to Texas in early manhood, was a ranger in the war of Texan independence, and also served in the Mexican war. In 1855-8 he was clerk of the supreme court of Texas. He afterward joined the Confederate army, and was engaged in the battles of Valverde, Bislard, and Galveston, and the capture of the "Harriet Lane." In the campaign of 1863 he commanded the cavalry of Gen. Richard Taylor's division, and was honored by the National army, commanded by Gen. Grant, and Capt. Carson and Grover, at the battle of Bayou la Fourche. After this action he was appointed major-general for distinguished services, and placed in command of the cavalry of the trans-Mississippi department. In April, 1864, he commanded the Texas infantry for the Red river campaign. He retired near Pleasant Hill, 12 April, 1864, by a shot from a National gun-boat.

GREEN, Thomas Jefferson, soldier, b. in Warren county, N. C, in 1801; d. there, 13 Dec., 1883. He removed to Texas in 1844, and became brigadier-general of volunteers in the war of Texan independence. In 1843, with other officers, he refused to obey the orders of Gen. Sammerville
whose loyalty he doubted, and, with a small force, left the main body of troops and attacked the town of Mier. The battle lasted from 1834 to the Texas, and 198 officers and men were taken prisoners. In attempting to escape, they were recaptured, taken to the city of Mexico, and every tenth man was ordered to be shot by Santa-Anna. Green was kept a prisoner at hard labor till 16 Sept., 1844, when, with 99 other officers, he was released. He removed to California several years later, served in the state senate, and was major-general of militia. When the civil war began he entered the Confederate army, and was engaged in the early Virginia campaigns. He published "The Mier Expedition" (New York, 1845).—His son, Whitfield, a politician, b. in St. Mark's, Fla., about 1840, was educated at Harvard, the U. S. military academy, and the universities of Virginia and Cumberland, Tenn. He visited Europe in 1858, and on his return settled as a planter in Warren county, N. C. He served throughout 1861 in the Confederate army as lieutenant-colonel of a North Carolina regiment, was wounded at Washington, N. C., and Gettysburg, and imprisoned at the close of the war at Johnson's island. He was a delegate to the Democratic national convention of 1868, and was elected and re-elected in 1864.

GREEN, Tralll, chemist, b. in Easton, Pa., 23 May, 1813. He was graduated at the medical department of the University of Pennsylvania in 1833, was for a year physician to the Philadelphia dispensary, and then settled in Easton, where he has since practiced. In 1837 he was elected professor of general and applied chemistry in Lafayette, and four years later was called to the chair of natural sciences in Marshall college, where he remained until 1847. He returned during the same year to Easton, and became president of the Pardee scientific department of Lafayette, where he has since occupied. At his own expense he erected an observatory there, and on the establishment of the Pardee scientific department of Lafayette he became its dean. Dr. Green has held several state appointments in connection with hospitals, and since 1860 has worked as a teacher and president of the school board at Easton. He is a member of many scientific societies, was president of the Pennsylvania medical society in 1868, and first president of the American academy of medicine. He delivered the annual address before the medical department of the University of Pennsylvania in 1868, and received the degree of L.L. D. from Washington and Jefferson colleges in 1866.

GREEN, William Alexander, physician, b. in Augusta, Ga., 5 Jan., 1834. He spent his early life as a clerk in a drug-store, devoting his spare hours to the study of medicine. In 1857 he was graduated from the Augusta medical college. He then settled in Americus, Ga., and remained there till 1861, when he entered the Confederate army. He afterward became surgeon, and then chief surgeon of artillery in the 34th army corps, and, in the staff of Gen. D. P. Hill, where he remained till the surrender of Lee. He served on many battle-fields, and was the first to bring to the notice of the medical authorities in the field the operation for resection. He was the inventor of a hypodermic syringe, the descent of diabetes, and was one of Dr. Green's "pocket-cases." He introduced many new remedies hypodermically, and gave much attention to pharmacy and chemistry. After the war he returned to Americus, and in 1875 removed to Macon. He has published many articles in medical journals, and has contributed to the "Smallest Pox," "Vaccination and its Results," and "The Use of the Hypodermic Syringe."
In October he was made colonel, with charge of Fort Mercer, on the Delaware. A year later, in October, 1777, the fort was assaulted by the Hessians, under Count Donop, who were repulsed with heavy loss, and theircommander mortally wounded. Congress voted Greene a pension and an arsoude which in 1786 was presented to his son by Gen. Henry Knox, who was then secretary of war. In 1778 Col. Greene and his regiment were detached for special service in Rhode Island, and was placed under the command of Gen. John Sullivan, whose headquarters were in Providence. Early in 1781, while in command on the Croton river, his headquarters were surrounded by a party of loyalists, by whom he was killed. A monument to his memory was erected near Red Bank, N. J., in October, 1829, by New Jersey and Pennsylvanians volunteers.

GREENE, David, clergyman, b. in Stoneham, Mass., 11 Nov., 1791; d. in Westborough, Mass., 7 April, 1866. He was graduated at Yale in 1821, spent two years in teaching, and then was graduated at the Andover theological seminary in 1828. Two years later he became assistant secretary of the American board of commissioners for foreign missions, and during his first year of service made a tour extending over nearly 6,000 miles, and lasting eight months, during which he visited nearly thirty missions to the Indian tribes. In 1832 he was chosen corresponding secretary, succeeding Jeremiah Evarts, and was ordained as a Congregational minister in August, 1833. He continued his connection with the board until 1848, and his duties consisted largely in editing the "Missionary Herald," and in correspondence with the Indian missions. Failing health caused him to decline a re-election, and he settled in Westborough, where he spent the remainder of his life, except a short residence in Windsor, Vt. Mr. Greene prepared twelve of the "special reports" of the society, many of which were of great value. He was also associated with Lowell Mason in the compilation of the hymn-book called "Church Psalmody."

GREENE, Frances Harriet, author, b. in Smithfield, R. I., 4 Sept., 1805; d. in California, 10 June, 1875. She was educated in Providence, R. I. and was early thrown on her own resources for support through the business failure of her father, George Whipple, who was at one time a wealthy citizen of Smithfield. In 1842 she married at Lowell, Mass., Charles C. Greene, an artist, and removed to Springfield, Mass. The marriage proved uncongenial, and she was divorced in September, 1847. In 1860 she visited California, was married in 1863 to William C. McDougall, of that state, and remained there till her death. In the Dorr rebellion in Rhode island, in May, 1842, she became a violent partisan of the suffrage party, and suffered much
social unpopularity from her course. During this year she conducted "The Wampanoag," a journal designed for the elevation of the laboring classes, and, particularly to "The Spiritual Philosopher," a paper devoted to the exposition of the principles of nature in their application to individual and social life. In 1848 she became a member of "The Young Men's Journal of Literature, and Art," a monthly magazine published in New York city. Mrs. Greene is the author of "The Original" (Providence, R. I., 1829); "Memoir of Eleanor Eldridge, a Colored Woman" (1838); "The Mechanic" (1841); "Might and Right, a History of the Dorr Rebellion" (1844); Primary Class-Book of Botany" (New York, 1855); "Shahmah in Pursuit of Freedom" (1858); "The Dwarf Boy, and Minor Poems" (1858); and a work published posthumously, entitled "Beyond the Veil," by Emanual Swedenborg and others, through the mind of Frances H. Greene, deceased (1875).

GREENE, George Sears, soldier, b. in Apponaug, Warwick, R. I., 6 May, 1801. He is a descendant in the sixth generation from John Greene, deputy governor of Rhode Island, whose father, John, came from Salisbury, England, in 1639, and settled in South Kingstown. R. I., and was graduated at the U. S. military academy in 1828, second in his class. He served in various garrisons and as instructor at West Point until 1838, when he left the army and became a civil engineer, building many railroads in the states of Maine, Alabama, Mississippi, Louisiana, Maryland, and Virginia. In 1856 he served in the Croton aqueduct department in New York. He designed and built the reservoir in Central park, and the enlargement of High Bridge. He was made a colonel in the 60th New York regiment, and was appointed brigadier-general of volunteers, 28 April, 1862. He commanded his brigade at Cedar Mountain, 9 Aug., 1862, and was in command of the 2d division of the 12th army corps in the battle of Antietam. He led his brigade at the battle of Chancellorsville. At Gettysburg, on the night of 2 July, 1863, with a part of his brigade, he held the right wing of the Army of the Potomac at Culp's Hill against more than a division of Confederate troops, thereby averting a disaster which might have resulted in the surrender of the army. He was transferred to the western armies in September, 1863, and in a night engagement at Wauhatchie, near Chattanooga, 28 Oct., 1863, was dangerously wounded in the jaw. This wound disabled him from active service till January, 1865, when he rejoined Sherman's army in North Carolina and participated in the engagements preceding Johnston's surrender. He was brevetted major-general of volunteers for his services on 13 March, 1865, and retired from the army in 1866. In 1867 he became chief engineer and commissioner of the Croton aqueduct department, and held the office till 1871, when he was made chief engineer of public works in Washington, D. C., but resigned in 1872. He was president of the American society of civil engineers from 1873 till 1877, and since that date has been chairman of a number of various organizations. For several years he was president of the New York genealogical and biographical society.—His son, George Sears, Jr., b. in Lexington, Ky., 26 Nov., 1837, entered Harvard in 1856, but left before graduating, in order to study civil engineering under his father, and was subsequently assistant engineer on the Croton aqueduct, on various railroads in Cuba, and in copper mining on Lake Superior. During 1868 he conducted extensive and accurate topographical surveys in Westchester county and Long Island City, N. Y., and at that time introduced several improvements in instruments. These have since been adopted by the U. S. coast survey, and have come into general use. In 1875 he was appointed engineer-in-chief of the Department of docks, New York, for the design and execution of the new river walls, wharves, and piers in difficult situations. In 1887 he became a member of the American society of civil engineers, was director from 1882 till 1886, and vice-president in 1888-9.

Another son, Samuel Dana, naval officer, b. in Cumberland, Me., 11 Feb., 1836; d. in Portsmouth navy-yard, N. H., 11 Dec., 1884, was graduated at the U. S. naval academy in 1859, and served as midshipman on the "Hartford," of the China squadron. On his return to the United States in 1861 he volunteered for service on the iron-clad "Monitor," then building at New York, and served continuously on this vessel from the day she was launched until she foundered off Cape Hatteras on the night of 29 Dec., 1862. The "Monitor" left New York, 6 March, 1862, for Hampton Roads. She was built for river and harbor service, and on her way narrowly escaped destruction, the crew finding that her officers and crew had been without sleep for forty-eight hours when they arrived at Hampton Roads on the morning of 9 March, 1862. Notwithstanding their exhaustion, they proceeded immediately to attack the "Virginia," and in the memorable engagement which followed, General commanding officer, Lieut. Worden, directed the movements of the vessel from the pilot-house, while Lieut. Greene had charge of the guns in the turret. He personally fired every shot until near the close of the battle was engaged, and was later devolved on him in consequence of the wounding of Lieut. Worden. In the delay incident to the change of command the vessels drifted apart. As soon as Lieut. Greene reached the pilot-house he turned the "Monitor" again toward the "Merrimac," but the latter was already in action with the iron-clad Norfolk. Being without a pilot, he was unable to follow the "Merrimac" into the tortuous channel of the Elizabeth river, and, after firing a few shots after her, returned to the wooden vessels which had been saved from destruction by the timely arrival of the "Monitor" at the scene of the battle. During the attack on Fort Darling and other naval actions on the James river. After the loss of the "Monitor" he served as executive officer of the "Florida" on blockade duty in 1863, of the "Iroquois," in search of the "Alabama," in 1864-5, and on various other vessels from 1865 till 1869. He was promoted to lieutenant-commander in 1866, and to commander in 1872, and commanded the "Junipeta" in 1875, the "Monongahela" in 1876-7, and the "Despatch" in 1882-4. He also served at the naval academy as assistant professor of mathematics in 1865-8, of astronomy in 1871-5, and as assistant to the superintendent in 1878-82. He received a vote of thanks from the legislature of Rhode Island for his gallant services in the action between the "Monitor" and the "Merrimac."—Another son, William Morris, son of General William Worden, R. I., 27 June, 1830, was graduated at the U. S. military academy in 1870, and assigned to the engineer corps. He served on the international commission for the survey of the northern boundary of the United States, as assistant astronomer and surveyor; he was promoted to captain, and to the rank of lieutenant, 13 Jan., 1874, and was military attached to the U. S. legation at St. Petersburg in 1877-9.
being for a year with the Russian army in the field. He was assistant to the engineer in charge of public works in the District of Columbia in 1879-85, being made captain in January, 1883, instructor in practical engineering at West Point from 1 Sept., 1885, to January, 1886, and on 31 Dec. of the latter year resigned his commission. He was posted "Cmdr of Plumb-Line along the 49th Parallel" (1876); "The Russian Army and its Campaigns in Turkey in 1877-8" (2 vols., New York, 1879); "Army Life in Russia" (1880); and "The Mississippi" (in "Campaigns of the Civil War" series, 1885).

GREENE, Nathanael, soldier, b. in Potsowmut, within the jurisdiction of Warwick, R. I., 6 June, 1742; d. at Mulberry Grove, Ga., 19 June, 1789. He was the fifth in descent from John Greene, a surgeon, who came over in the next company after Roger Williams, and became an original proprietor of the town of Providence and Shawomet. Nathanael was the fourth son in a family of eight boys and one girl, two being the issue of Nathanael the elder's first marriage, and the others of the second. The elder Nathanael was a Quaker, exercising on Sunday his gift as a preacher, and his sons were brought up according to the strictest principles of that sect. Young Nathanael was trained in common with the other boys to work in the field, the mill and the forge. Young Greene was of a robust nature, fond of athletic sports, in which he excelled; but he was also of a studious disposition. A chance meeting with a young collegian named Giles aroused a desire for more knowledge than the crude educational materials in vogue in this Quaker community afforded. His father was appealed to, to enlarge his means of study; and shortly afterward Nathanael, under the guidance of a Scotchman named Maxwell, began Latin and geometry. Euclid became an absorbing study, and a copy of this treatise, purchased with his own earnings, was his almost constant companion on his daily round of duty. Between 1758 and 1759 he made the acquaintance of President Stiles, then a clergyman in Newport, and under his guidance acquired a knowledge of such authors as Locke, Watts, and Swift. The latter was his literary model, and the latter his idea of history upon Ferguson's "History of Civil Society." At this time he met Lindley Murray, the "grammarian of three generations of ungraduate school-boys," with whom he had many profitable discussions on the subjects of his readings. In 1760 Nathanael took a step that exhibited his independence of judgment and action. At that time a strong prejudice against inoculation prevailed, and the practice of it had been forbidden by the assemblies of Massachussetts and Rhode Island, the latter rejecting it as late as 1772. Greene, finding the charge of small-pox raging in New York on one of his visits, submitted to inoculation, much to the scandal, it is presumed, of his neighbors and friends. In order to conduct intelligently a lawsuit in which the family had become involved, he made, in his twentieth year, a thorough study of the "Code iniquus," or "Law Dictionary." As the business of the Greene force, at Coventry, required the constant attention of one of the partners, Nathanael removed to that place in 1770. In April, 1775, he had been admitted a freeman in Warwick, by virtue of his birth in the City of Providence in one of the wealthiest families. Three years later he canvassed the county for signatures to the association test, and shortly after his removal to Coventry he sat in the general assembly as a representative from that place. The disputes between the colonies and the British government were commented upon by the young legislator, and so well known were his sentiments that the royal agents appointed to seek out the offenders in the burning of the "Gaspé" at once fixed their suspicions upon him, and for some time he was in danger of being arrested by "Pembroke-Lincoln along the 49th Parallel" (1876); "The Russian Army and its Campaigns in Turkey in 1877-8" (2 vols., New York, 1879); "Army Life in Russia" (1880); and "The Mississippi" (in "Campaigns of the Civil War" series, 1885).
surprised the Hessian garrison at Trenton, and gained a complete victory. Greene urged a rapid pursuit of the enemy, but was overruled by a council of war. The victory, however, was soon followed by a strategic retreat on the flank of the enemy. Greene's conduct and wise counsel throughout the campaign had commended him to Washington; and, in March, 1777, the latter was so far convinced of his merit that he wished to present him with a congress. Greene was selected for the mission. The "Conway cabal," which in the succeeding winter assumed dangerous proportions, had already begun its work of discrediting Washington and Greene with congress, and partly on this account Greene was sent. He succeeded in having a resolution passed relieving Washington from subservience to a council of war.

But Greene's most important work at this period was the part he took in the battle of the Brandywine, 11 Sept., 1777. The only hope of success for the British in the attempt to drive Washington from his very strong position at Chadd's and Brin- ton's fords was in turning his right flank by a circuitous march of eighteen miles up the Lancaster road and across the forks of the Brandywine toward Philadelphia. Greene was in command of the British forces in front of the town, and on 20 August he and his men were safe in trying this, because their superior force (18,000 against 11,000) enabled them to separate the wings of their army with little risk. The movement was admirably conducted by Cornwallis, but he did not succeed in striking the American force on the first day of the battle. Greene had made a new front with his right wing under Sullivan, near Birmingham meeting-house, so that Sullivan received the attack on his front. Yet, in spite of this, the superiority of the British in discipline gave them the advantage in the desperate fight that ensued, and Cornwallis succeeded in pushing Sullivan obliquely toward the village of Dilworth. If this movement had been completed it would have cut the American army in two and utterly routed it; but it was foiled by the generalship of Greene in executing Washington's prompt orders to move his army in a circuitous line. Greene received the command of the reserve, stationed on a lofty eminence a little in the rear of Wayne, who commanded the centre behind Chadd's ford. On receiving Washington's order he marched his brigade five miles in forty minutes, and when he arrived with Sullivan near Dilworth, averted the impending destruction of the army. Wayne had time to withdraw the centre, and Armstrong the right wing, in good order; and so the whole army was united at Chester in excellent condition. Careless writers sometimes vaguely described the American army as "routed" at the battle of the Brandywine, and this notion has crept into text-books of American history. An army cannot properly be said to be "routed" when it is ready to renew the fight next day. The best commentary on the battle of the Brandywine is found in the fact that, while it was fought on 11 Sept., it was not until the 26th of that month that Gen. Howe reached Philadephia. This delay was due to Washington's skilful maneuvering; but the best of generals cannot manoeuvre and detain the enemy with an army that is already in reverse. The Americans were not routed at the Brandywine as is to be found in Greene's memorable double-quick march to Dilworth, and the admirable manner in which he sustained the languishing fight at that critical point.

On 26 Sept., Gen. Howe, having eluded Wash-
and the militia, to cover the country and the public stores. Clinton attacked Greene at Springfield on 23 June, 1780; but Greene held him at bay at the Railway bridges, and, gradually contracting his front, which had been lengthened to cover the movement, forced out all the troops of the town, and there awaited another attack. Clinton's forces, after setting fire to the town, retreated, and did not halt until they had reached Staten Island. Greene and his officers were thanked in general orders on 17 September for hearing out for Hartford, for a conference with Rochambeau, leaving Greene in command of the army. The Americans moved forward to Tappan on the 19th, and late in the evening of the 20th Greene was apprised, in a few hurried lines from Hamilton, of Arnold's treason. The captive André arrived at Tappan under close guard on 28 Sept., and the following day a board of inquiry, with Greene as president, was convened for his trial. With tears Greene signed the decree of the court condemning the young officer to death. Clinton despatched three commissioners to argue André's case, and Greene was sent by Washington to confer with them; but their efforts were unavailing. It has been asserted, but not confirmed, that Greene cast a deciding vote in the council against granting André's prayer to be shot instead of hanged. He held that André's death was so necessary that the punishment was a just one. Washington's enemies in congress chose to consider this action as a mark of disrespect for that body, and attempted unsuccessfully to drive him from the army. The post at West Point, left vacant by Arnold's treason, was added to Greene, who assumed the command on 8 Oct., 1780. Gates's failure in the southern campaign compelled his recall in August, and by common consent Greene was looked upon as the fittest man to retrieve the fortunes of the southern army. Washington, himself bitter, named him by circular of 14 Dec. as asking Greene to take Gates's late command. The task he found before him on taking command at Charlotte, 2 Dec., 1780, was formidable enough to daunt the boldest spirit. In front of him was an army of 3,224 men, abundantly clothed and fed, well disciplined, elated with victory, and led by an able general. To oppose this force, he had an army of 2,307 men, of whom 1,482 were present and fit for duty, 547 were absent on command, and 128 were detached on extra service, half fed, scantily clothed, cast down by defeat, and many of them deficient in all discipline. Furthermore, the country was infested with Tories. Recognizing the impossibility of facing Cornwallis with such inferior numbers, Greene resolved to divide his forces, by which means he might not only secure an abundant supply of food, but could keep the enemy within narrow bounds, cut them off from the supplies of the upper country, revive the drooping spirits of the inhabitants, threaten the posts and communications of the enemy, and compel him to suspend his threatened invasion of North Carolina. Morgan was detached with the famous Maryland command, Col. Washington's division of light dragoons, to take up a position near the confluence of the PeeDee and Broad rivers, in the hope of threatening his adversary's left flank. With the other division, Greene, after a laborious march through a barren country, took post at Hick's creek on the Pedee, near the South Carolina line. Tarleton, who was hastening forward from the main army, meditating a decisive blow at his despoiled opponents, attacked Morgan at the Cowpens, on 17 Jan., 1781, and, after a gallant battle, was utterly routed, losing over 300 men killed and wounded, with about 500 prisoners, out of a total force of 1,100. Cornwallis was infuriated by this disaster, and, ridiculing himself of his heavy baggage and whatever might impede his progress, set out on 18 March with 600 men. In a most brilliant march Greene effected a junction of the two divisions of his army at Guilford Court-House on 9 Feb., 1781. He had expected here to meet re-enforcements from Virginia, but, as they had not yet arrived, he thought it best to retreat toward them and put the broad stream of the Dan between himself and the enemy. By practising every expedient his fertile mind could devise, he succeeded in getting across the river, without loss of men, baggage, or stores. Cornwallis, who had been close upon his heels for more than 200 miles, finding his troops fatigued and dispirited by their fruitless march, prudently retired to Hillsborough. Presently Greene received his re-enforcement, and thereupon, crossing the Dan, came to battle with Cornwallis at Guilford Court-House, 13 March. Although this battle was a tactical success for Greene, it was a defeat, as it only gained a decisive strategic advantage, for the enemy, being too much shattered to continue the contest, retired to Wilmington, from which point he moved into Virginia to effect a junction with the forces of Gen. Phillips. Greene immediately turned his face southward and proceeded unmolested into Virginia. Greene's reasons for this move were given to Washington in a letter on 23 March, as follows: "I am determined to carry the war immediately into South Carolina. The enemy will be obliged to follow us, or give up the posts in that state." If the former took place, it would take the war out of the devastated state of North Carolina, and give the inhabitants time to recuperate; and, in the event of leaving the posts in South Carolina to fall, the enemy would lose far more than the 14. On 20 April the American army established itself in a strong position at Hobkirk's Hill, near Camden, and on the 25th it was assaulted there by the British under Lord Rawdon. This was exactly the move for which Greene had been preparing. The assault ought to have resulted in the total ruin of the British army; but, through an accidental misunderstanding of orders, Greene's very best men in the Maryland brigade behaved badly, and he was forced to abandon his position. The defeat, however, did not prevent his reaping, as he invariably did, all the fruits of victory. He had already sent Marion and Lee to take Fort Watson, and thereby furnish the British with a communication with South Carolina, and to prevent the operation, admirably planned and brilliantly successful, obliged Rawdon to abandon Camden and fall back toward Charleston, and from this time Greene had the game entirely in his own hands. During May and June he reconquered all the back country from South Carolina to Fort Motte, Fort Granby, Orangeburg, and Augusta, with all their garrisons. After a sanguinary siege of twenty-eight days, he forced the British to evacuate Fort Ninety-Six, and thus give up their last hold upon the interior.
Greene's army had now been incessantly in motion for seven months. After a rest of about six weeks, the army, which had marched from Savannah to Hills in Santee, he met the British army, in the command of which Rawdon had been succeeded by Stuart, in a decisive action at Eutaw Springs. In the morning the British were driven off the field by a superb charge upon their left flank; but, after retaining a distance in disorder, they retired in a strong position, protected by a brick house and palisaded garden, and succeeded in remaining there during the afternoon, but only because Greene desisted from further attack until the cool of the evening. For this holding their second position a few hours, all that interference, the British absurdly claimed a victory, and the error has been repeated by American writers who ought to know better. At nightfall the British retreated, as Greene saw they must, and he renewed his attack. The enemy were chased nearly thirty miles by Marion and Leffingwell, who captured a large part of the enemy's baggage, and a hundred and twenty prisoners. Among the 2,300 men with whom Stuart had gone into the battle, barely more than 1,000 reached Charleston, where they remained for the next fourteen months, shut up under the shelter of Fort Sullivan. The battle at Eutaw Springs was a decisive and final victory for the Americans in South Carolina.

Congress testified its appreciation of Greene's brilliant conduct by a gold medal and a vote of thanks. Little more was done till the next July, when Savannah was taken by Wayne. On 14 Dec., 1782, Greene marched into Charleston at the head of his army, and the next summer, when the army was disbanded, he journeyed homeward, stopping at Philadelphia, where he was greeted by enthusiastic crowds and treated with high consideration by the government that had commenced its guerilla warfare in the country of his services. In the autumn of 1785 he removed to a plantation at Mulberry Grove, which had been presented to him by the state of Georgia. Although his fortune was impaired by the war, and he was compelled to bear a heavy pecuniary burden incurred through the dishonesty of an army contractor for whom he had become security while quarter-master-general, his life on his plantation was very happy in the society of his charming wife and genial friends. His death, at the age of forty-four, was caused by sunstroke. In his obituary tribute, Alexander Hamilton said that Greene's qualifications for statesmanship were not less remarkable than his military ability, which was of the highest order. His series of campaigns from December, 1778, to September, 1781, will bear comparison with the best work of Turenne or Wellington. What he might have done on a greater scale and with more ample resources, it is, of course, impossible to say; but the intellectual qualities that he showed were precisely those that have won distinction for the foremost strategists of modern times. It would be difficult to praise too highly the superb manoeuvring that drew Cornwallis 200 miles from his base, forced a battle on him at Guilford under such circumstances that victory proved hardly less fatal to him than defeat, and thus turned him off into the Carolinas. The possibility thereof through the hips of Rawdon from Camden and reconquer South Carolina. Congress voted that a monument to Greene be raised at the seat of government; but more than ninety years elapsed before the resolution was fulfilled by placing an equestrian statue, from the hands of the master, in that city. He was the monument, dedicated to Greene and Pulaski jointly, stands in a public square in Savannah. Greene married, 20 July, 1774, Miss Catherine Littlefield, niece of the wife of the governor of Rhode Island, and by her he had two sons and three daughters. The authoritative life of the great general is by his grandson, George Washington Greene (8 vols., 8vo, New York, 1867–71). The sketch previously published by the same author in Sparks's "Library of American Biography" was corrected from original documents. The controversy between George Bancroft and George W. Greene, occasioned by some remarks in Bancroft's history, was carried on in the pages of the "North American Review" and the "Historical Magazine." The letters connected with this dispute in 1828 and 1829 were published in the second volume of Greene's life, which also contains numerous extracts from the general's private correspondence. The addresses on the presentation of the statue of Gen. Greene were published by the government at Washington in 1870, in a pamphlet of eight pages. A selection from his despatches relating to the southern campaign is preserved in two folio volumes in the state department. Some of his letters may be found in Force's "Archives," and others in Sparks's "Correspondence of the Rev. John Sergeant." The bulk of his correspondence still remains in manuscript. Mr. Greene's intention, announced in 1870, of publishing all his grandfather's papers in a work of several volumes, was never carried out.—His grandson, George Washington, author, b. in East Greenwich, R. I., 5 August, 1816, entered Brown university, but left before graduation on account of failing health. From 1835 till 1847 he lived in Europe, and in 1837 he was appointed U. S. consul at Rome. On his return to this country he was appointed professor of modern French literature in Brown. In 1848 he removed to New York, and devoted himself to teaching, and writing historical and other articles for periodicals. In 1858 he edited Addison's works, with copious notes (6 vols., New York). He took up his residence at his native place in 1866, and soon afterward was chosen to represent the town of East Greenwich in the legislature. He made speeches in 1867 and 1869 on the ratification of the 14th and 15th amendments to the constitution of the United States. In 1872 he was chosen professor of American history at Cornell. His published works include, besides two volumes of French grammar, and several addresses: "Historical Studies" (New York, 1850); "History and Geography of the Middle Ages" (1851); "Biographical Studies" (1860); "Historical View of the American Revolution" (Boston, 1865); "Nathanael Greene: an Examination of the Ninth Volume of Bancroft's History" (1866); a life of Gen. Nathanael Greene in Sparks's "American Biography," and a more extended one, published separately (8 vols., New York, 1867–71); "The German Element in the War of American Independence" (1873); and a "Short History of Rhode Island" (Providence, 1877).—Nathanael's nephew, Albert Collins, U. S. senator, b. in East Greenwich, R. I., 15 April, 1791; d. in Providence, 8 Jan., 1863, was the son of Perry Greene. He received an academic education in New York, and then went down to Philadelphia, where he was admitted to the bar. Subsequently he returned to Rhode Island, and there practised his profession. In 1815 he was elected to the lower branch of the state legislature, in the year following was chosen brigadier-general of the militia, and later major-general. He was also elected to the state legislature, and held office from 1822 till 1825, being speaker during the last year. From 1825 till
1848 he was attorney-general of Rhode Island, then for two years a member of the state senate, when he was elected to the U. S. senate, serving from 1 Dec., 1845, till 3 March, 1851. Subsequently he served for a single term in each branch of the legislature, and finally retired in 1857.

**GREENE, Nathaniel**, editor, b. in Boscauen, N. H., 20 May, 1797; d. in Boston, Mass., 29 Nov., 1864. He was left childless and was dependent upon his own resources, and in 1806 became an apprentice in the office of the "New Hampshire Patriot." Three years later he became editor of the "Concord Gazette," and in 1814 removed to Portsmouth, where he had charge of the "New Hampshire Gazette." After this he settled in Haverhill, and for two years managed the "Haverhill Gazette." In May, 1817, he founded and edited the "Essex Patriot," with which journal he remained connected until 1821, when he was invited to Boston, and there established the "Boston Statesman," which first appeared as a semi-weekly and then became the foremost daily Democratic journal of the state. He was postmaster of Boston in 1829-30, and again in 1845-6. From 1848 till 1861 he resided in Paris, and on his return settled in Boston. He contributed more than two hundred poems to various Boston journals, which appeared over the pen-name of "Boscauen," and he published a translation of G. Sforzoni's "History of Italy" (New York, 1838); "Tales from the German" (Boston, 1837); "Tales from the German, Dutch, and French" (1845); "Piracy and Translations" (1852).—His brother, Charles Gordon, journalist, b. in Boscaun, N. H., 1 July, 1804; d. in Boston, Mass., 27 Sept., 1880, was sent to the Bradford academy by Nathaniel, in whose care he was placed on the death of his father in 1812. Soon after he settled in Haverhill, and, following him to Boston, became his assistant on the "Statesman." In 1825 he managed and for a time edited the "Free Press" in Taunton, Mass., and after publishing the "Boston Spectator" in 1826, removed in 1827 to Philadelphia, where, with James A. Jones, he bought the "National Palladium," the first daily newspaper in Pennsylvania, to advocate the candidacy of Andrew Jackson. A year later he became connected with the "United States Telegraph" in Washington, and in 1829 he returned to Boston, succeeding his brother as editor of the "Berkeley Statesman." He founded, in November, 1831, the "Boston Morning Post," which he conducted until he sold it in 1875. Mr. Greene was on several occasions a Democratic candidate for office, at one time a member of the state legislature, and naval officer of the port of Boston for two terms, having been appointed in 1853 by Franklin Pierce, and reappointed by James Buchanan in 1857.—Nathaniel's son, William Batchelder, author, b. in Haverhill, Mass., 4 April, 1819; d. in Weston-Super-Mare, England, 30 May, 1876, was appointed to the U. S. military academy from Massachusetts in 1835, but left before graduation. He was made 2d lieutenant in the 7th infantry in July, 1839, and, after serving through the Florida war, resigned in November, 1841. Subsequently he was connected with the Faro Almanac, and studied theology, and was graduated at the Harvard divinity-school in 1845. He then became a Unitarian clergyman, and for several years was settled in Brookfield, Mass. Later he went to Europe, but returned in 1861. Although a Democrat, he was a strong friend of the Union, and for the three succeeding years of the civil war was colonel of the 14th Massachusetts infantry, afterward the 1st Massachusetts heavy artillery. In 1862, while stationed with his regiment in Fairplay, Va., he was rendered ush for the U. S. sena, serving from 1 Dec., 1845, till 3 March, 1851. Subsequently he served for a single term in each branch of the legislature, and finally retired in 1857.

**GREENE, Samuel Stillman**, educator, b. in Belchertown, Mass., 3 May, 1810; d. in Providence, R. I., 24 Jan., 1883. He was graduated at Brown, with the degree of A. B. 1829, and with the degree of A. M. in 1831, and in 1832 entered the Baptist academy at Worcester, Mass., and in the English and grammar high-schools of Boston, he was the first superintendent of public schools in 1832. He was also superintendent of public schools in Spiritfield, Providence, 1835. In 1851 he was called to the professors of didactic in Brown, and held this place 1855, when he was appointed professor of mathematics and civil engineering. He remained in chair until his death. He was at various times, president of the Rhode Island and the American Institute of instruction, of the National institute of instruction, and of the National teachers' association. He was active in the affairs of the Baptist denomination in Rhode Island. Prof. Greene was the author of "Analysis of the English Language" (1849); "First Lessons in Grammar," "Elements of English Grammar" (1852); "English Grammar" (1867); and "Introduction to English Grammar" (1868).—His nephew, Charles Warren, physician, b. in Belchertown, Mass., 17 Aug., 1840. He was graduated at Brown in 1863, and subsequently studied medicine at Harvard and at Dartmouth, where he was graduated in 1867. In July, 1862, he entered the army, and served for three years, attaining the rank of captain. After his graduation in medicine he practised in Massachusetts until 1872, and since has devoted himself to literary pursuits. He has been a large contributor to various encyclopedias, chiefly in the domain of natural science. Dr. Greene has held the office of principal editor of recent editions of Lippincott's "Gazetteer" (1879); Worcester's "New School Dictionary" (1883); Thomas' "Biographical Dictionary" (1886); and other dictionaries, still (1887) un-published. In addition to the foregoing he wrote "Animals; their Homes and Habits" (Philadelphia, 1860), and "Birds; their Homes and Habits" (1866).
commander in September, 1855, and subsequently, until 1860, was lighthouse-inspector, after which he was at the navy-yard on Mare island, California, until 1862. In July, 1862, he was made captain of the San Francisco, the San Antonio, the Santiago, and the "San Jacinto." While he held the command of the latter, he was left in command of the East Gulf squadron. Later he commanded the "Richmond," of the West Gulf squadron, and in 1865 protected the troops while they were landing for the attack on Mobile. In 1866, he was given command of the "Powhatan," of the Pacific squadron. He received his commission as commodore in July, 1867, and had charge of the Pensacola navy-yard from 1868 till 1871, when he was retired. In March, 1872, he became rear-admiral on the retired list.

**GREENE, William**, governor of Rhode Island, b. in Warwick, R. I., 16 March, 1805; d. in Providence, R. I., 22 Feb., 1758. For many years he held the office of clerk of the county court in Providence. He became the county governor of Rhode Island in 1740, and was governor from 1743 till 1758. His son, **William**, governor of Rhode Island, b. in Warwick, R. I., 16 Aug., 1781; d. there, 29 Nov., 1800. He was chief justice of the colony, and was governor of the state from 1778 till 1786, and from 1790 till 1796, being the first and last man on the ordnance duty in Portsmouth, N. H., and in 1807 was given command of the "Powhatan," of the Pacific squadron. He received his commission as commodore in July, 1867, and had charge of the Pensacola navy-yard from 1868 till 1871, when he was retired. In March, 1872, he became rear-admiral on the retired list.

**GRENF, William Houston**, chemist, b. in Columbia, Pa., 30 Dec., 1854. He was educated at the Philadelphia public schools and at Jefferson medical college, where he was graduated in 1878. For the three following years he was demonstrator of chemistry at Jefferson medical college, and then spent two years studying chemistry in Adolphe Wurtz's laboratory in Paris. On his return in 1879 he became demonstrator of chemistry in the University of Pennsylvania, and a year later was appointed professor of chemistry in the Central high-school in Philadelphia, which office he now holds. Dr. Greene is a member of scientific societies at home and abroad. Besides the results of investigations in chemistry, contributed to scientific journals, he has published translations of Wurtz's "Elements of Modern Chemistry" (Philadelphia, 1879); "Notes on the Science of the Alkaloids" (1880); "Text on the Science of Physical Chemistry" (1884); and edited Paul Bert's "First Steps in Scientific Knowledge" (1886).

**GREENE, Richard Theodore**, lawyer, b. in Philadelphia, Pa., 30 Jan., 1844. After studying at Cambridge grammar-school, at Oberlin preparatory school, and at Phillips Andover academy, he entered Harvard, and in 1870 was its first colored graduate. During his college course he won more prizes than any classmate or contemporary. From 1870 till 1873 he was principal of the male department of the "Institution for Colored Youth" in Philadelphia, and for a year filled a similar office in the preparatory high-school in Washington, D. C. He was then called to fill the chair of metaphysics and logic in the University of South Carolina, and remained there until 1880, teaching in the departments of Latin and Greek, and teaching classes in international law and the constitution of the United States. In 1875 he was appointed a member of the board of health of Columbia, S. C., and in 1876 a member of the state commission to reorganize the common schools of South Carolina. Meanwhile he was graduated from the law department of the University of South Carolina in 1876, and was admitted to the bar in Washington, D. C., in April, 1877, where until 1882 he was dean of the law faculty in Howard university. Mr. Greener has recently made New York his residence, and in October, 1886, he was appointed examiner in the municipal civil service of New York. Prof. Greener was active as a Republican campaign orator from 1876 till 1884. He received the degree of L. L. D. from the College of Liberia in Monrovia in 1882, and was elected a member of the American philological association in 1875. He has been a large contributor to journals and reviews and also to various works of reference, and has delivered numerous addresses, including his inaugural address, in the South Carolina university, on "The Charles Sumner, the Idealist, Statesman and Scholar" (June, 1874); "Eulogy on the Life and Services of William Lloyd Garrison" (June, 1879); "Socrates as a Teacher" (April, 1880); "The Intellectual Position of the Negro" (July, 1880); "Free Speech in Ireland" (October, 1882); "Benjamin Banneker, the Negro Astronomer" (February, 1882); "Henry Highland Garnet" (May, 1882); and "An African Roscious" (June, 1882).

**GREENFIELD, Elizabeth Taylor**, singer, b. in Natchez, Miss., in 1808; d. in Philadelphia, Pa., in 1876. She was born a slave, but early gave great promise as a singer, and was freed by her mistress, Mrs. Greenfield, who gave her a liberal education. She sang with success, not only in this country, but in England, where the Duchess of Sutherland and the Duchess of Argyll became her patrons. She was known as the "Black Swan."

**GREENHOU, Robert**, scholar, b. in Richmond, Va., in 1800; d. in San Francisco, Cal., in 1854. His father, Robert, was at one time mayor of Richmond. His mother perished at the burning of the Richmond theatre in 1811, and the son barely escaped with his life. He was graduated at William and Mary in 1816, and finished his education in New York, studying medicine with Dr. David Hosack and Dr. John W. Francis, and taking his degree at the College of physicians and surgeons in 1821. He then visited England and France, and other distinguished men, and on his return delivered lectures on chemistry before the New York literary and philosophical society. He became translator to the department of state in Washington in 1828, and in 1859 removed to California, where in 1857 he was sent to the U. S. land commission. He published a "History of Tripoli" (1835), and a "Report on the Discovery of the Northwest Coast of North America," prepared by order of Congress in 1837 (New York, 1849), and afterward enlarged into a "His-
tory of Oregon and California," a work of high authority (1846). Dr. Greenleaf also read before the New York Historical Society in 1848 a paper in relation to the supposed missionary labors of Archbishop Penelon (since found to have been those of a brother) among the Iroquois of New York.

GREENLEAF, Benjamin, educator, b. in Haverhill, Mass., 25 Sept., 1786; d. in Bradford, Mass., 29 Oct., 1864. He graduated at Dartmouth in 1813, was principal of Bradford academy in 1814–36, and of Bradford teachers' seminary in 1839–48. He represented Bradford in the legislature in 1827–29. Mr. Greenleaf published a series of mathematical text-books, the first of which was his "Natural Arithmetic" (1827, 1835).

GREENLEAF, Ezekiel Price, b. in Quincy, Mass., 22 May, 1790; d. in Boston, Mass., 3 Dec., 1886. He was educated at Quincy, and engaged in business in Charleston, S. C., and in Boston, where he failed. He then removed to his father's farm in Quincy. Inheriting from his son, he invested it with caution, denying himself the necessities of life and living like a hermit. He spent fifty years in Quincy, but after 1879 lived in Boston. He bequeathed nearly all his estate, amounting to $500,000, to Harvard, with directions to keep it apart from other funds, and to call it the "Greenleaf fund"; $3,000 of the income is to be divided yearly into scholarships of $300 each, called the "Price Greenleaf scholarships," and part is to be devoted to a special division of the library, to be known as the "Price Greenleaf room," in case the regents of the university fail to comply with the conditions, it is to be equally divided between the Home for Aged Men and the Children's Hospital of Boston.

GREENLEAF, Moses, author, b. in Newburyport, Mass., 1778; d. in Williamsburg, Me., 20 March, 1854. He removed from Newburyport in 1835, and Moses, his father, was a captain in the Revolutionary army. He published "Statistical View of the District of Maine" (Boston, 1816), and "Survey of the State of Maine," with a map, the best made up to that time (Portland, 1823). His brother, Jonathan, engaged, in Newburyport, Mass., 4 Sept., 1785; d. in Brooklyn, N. Y., 24 April, 1865, was licensed to preach in 1814, and was pastor at Wells, Me., in 1815–28. He then took charge of the Mariner's church, Boston, removed to New York in 1833, and edited the "Sword," a journal of his sect. He was a member of the Seamen's friend society, first in Boston and then in New York, till 1841. He organized the Wallabout Presbyterian church in Brooklyn in 1843, and was its pastor till his death. Bowdoin gave him the degree of M. A. in 1824, and Princeton that of D. D. in 1833. Dr. Greenleaf published "Sketches of the Ecclesiastical History of Maine" (Portsmouth, N. H., 1821); "History of New York Churches" (New York, 1846); and "Genealogy of the Greenleaf Family" (1854).—Another brother, Simon, jurist, b. in Newburyport, Mass., 5 Dec., 1785; d. in Cambridge, Mass., 6 Oct., 1853, removed with his father to Maine when a child, and in 1801 began the study of law in New Gloucester, Me., with Ezekiel Whitman, afterward chief justice of the state. In 1800 he began practice in Standish, but in 1803 was removed to Saco, where by diligent study he laid the foundation of his subsequent legal learning. He went to Portland in 1818, and in 1830, after the admission of Maine to the Union, and the establishment of a supreme court, he became its reporter, holding the office till 1822, when he reached the rank of chief justice. He was appointed royal professor of law in the Harvard law-school in 1833, and in 1846, on the death of Judge Story, was transferred to the Dane professorship. On his resignation in 1848 he was made president of the law school, in connection with the law-school he had the direction of its internal affairs, and for many months of each year, during Judge Story's absence in Washington, the entire management and work of instruction devolved on him. Prof. Greenleaf was for many years president of the Map (Chutist) Bible society, which in 1833 gave him the degree of LL. D. in 1834. The clearness of his style and the correctness of his principles have placed him in the front rank of legal authors. His works are "Origin and Principles of Freemasonry" (Portland, 1825); "Full Collection of Cases Overruling-nond, which are Limited in their Application" (1821; 3d ed., by E. Hammond, New York, 1840, afterward expanded to 3 vols.); "Reports of Cases in the Supreme Court of Maine, 1820–31" (9 vols., Hallowell and Portland, 1822–35; digest, Portland, 1835; revised ed., 8 vols., Boston, 1859); "Prudence on the Law of Evidence," his greatest work (3 vols., 1840–53; 14th ed., with large additions by Simon Greenleaf, Croswell, 1888); "Examination of the Testimony of the Four Evangelists, by the Rules of Evidence administered in Courts of Justice, with an Account of the Tenets of Jesus" (1846, and an enlarged edition of William Cruise's "Digest of the Laws of England Respecting Real Property," adapted to American practice (3 vols., 1849–50). He also published his inaugural discourse on entering upon his professorship, and a work on the life and character of Joseph Story (1845).

GREENOUGH, Horatio, sculptor, b. in Boston, Mass., 6 Sept., 1805; d. in Somerville, Mass., 18 Dec., 1852. His idea of form was strongly marked in early youth, and he manifested a striking mechanical aptitude. He settled in the Smith's foundry, impressed himself on his mind. When he was fifteen years old, a French sculptor, Binon, taught him modelling in clay, and the rudiments of his art. Soon after he entered Harvard, and during his two years' course there enjoyed the advice of Mr. W. H. Bartlett. At an early age he made the design from which the present Bunker Hill monument was constructed. Before completing his college course Greenough sailed for Florence, and thence proceeded to Rome, where he arrived in the autumn of 1825. With the exception of a short sojourn as secretary to the American Consul, he was occupied in modelling the busts of many distinguished men, and a brief visit to Paris, for the purpose of modelling a bust of Lafayette, he made his permanent residence in Italy, and there produced, most of his historical and ideal compositions. In 1841 the sculptor returned to the United States, for the purpose of placing a group of four historical figures, entitled "The Rescue," in Washington. This work was ordered by Congress, and the artist devoted about eight years to its construction. He died suddenly of brain fever. Greenough was an industrious artist; his works are numerous, of extended scope, and highly prized. Among the most important are the colossal statue of Washington, for which Congress voted an appropriation of $20,000. It was completed in 1848, and now stands in front of the Capitol, to Styx, where by diligent study he laid the foundation of his subsequent legal learning. He went to Portland in 1818, and in 1830, after the admission of Maine to the Union, and the establishment of a supreme court, he became its reporter, holding the office till 1822, when he reached the rank of chief justice. He was appointed royal professor of law in the Harvard law-school in 1833, and in 1846,
of the conception, the truth of the character, or the accuracy of an anatomical study and mechanical skill. Among Greenough's marble busts are those of John Jacob Astor, James Fenimore Cooper, Henry Clay, Gen. Lafayette, John Marshall, and Josiah Quincy. His ideal sculptures include "Mecora," "The Guardian Angel," "Chanting Cherus," "Venus Victrix." Venus contending for the Golden Apple," "Lucretia," and "Cato." For an extended notice of his works, see Henry T. Tuckerman's "Memorial of Horatio Greenough" (New York, 1833). Greenough's letters to his brother Henry have been edited by Frances B. Greenough (Boston, 1837). His brother, Henry, architect, b. in Boston, Mass., 5 Oct., 1807; d. in Cambridge, Mass., 31 Oct., 1888, entered Harvard in 1828, but left in his junior year, and did not receive his degree till 1833. He studied painting and architecture abroad in 1831-4, 1845-50, and 1869, and planned the Cambridgeport city hall, the Agassiz museum, and many private houses in Cambridge and Boston, including those of Agassiz, Guyot, and Judge Loring. In 1853 he superintended the decoration of the Crystal Palace in New York. He published two novels, "Ernest Carroll" (Boston, 1859), and "Adonais" (1860), and a treatise on the "Courtyard of Jules Sandrart's "Sacred Painting." Another brother, Richard Saltonstall, sculptor, b. in Jamaica Plains, Mass., 27 April, 1819, practised his art in Paris at the beginning of his career, and was particularly successful as a sculptor of portrait busts. Returning to the United States, he lived for several years in Newport, R. I., during which time he produced numerous works in bronze and marble. In 1874 Greenough again returned to Europe, where he has since spent most of his time. Among his works are a statue of Franklin, placed in the city-hall square of Boston, the "Boy and Eagle," owned by the Boston Athenaeum; a "Carthaginian Woman"; a "Cupid on a Tortoise"; an "Eagle"; a "Psyche," which he erected as a monument to his wife in the cemetery at Rome, Italy. His bust of Shakespeare, found on the Chancos porcolato, is highly praised. —Richard Saltonstall's wife, Sarah Dana (Loring), author, b. in 1827, has published "Arabesques," four stories of the supernatural (Boston, 1871); "In Extremis, a Story of a Broken Law" (1872); and "Mary Magdalene," a poem (1880). —Henry T. Tuckerman, b. in Boston, Mass., 24 Dec., 1837, was graduated at Harvard in 1859, studied medicine in Paris and Florence, Italy, and took his degree at Harvard medical-school in 1866. In 1871-5 he was an instructor there. He is a member of various medical societies, being secretary of the Boston society for medical improvement in 1871-7, and has contributed to the current literature of his profession.

GREENEUP. Christopher, governor of Kentucky, b. in Virginia in 1750; d. in Frankfort, Ky., 24 April, 1818. He served through the Revolution, attaining the rank of colonel, and at the close of the war removed to Frankfort, Ky., then the "dark and bloody ground," where he studied law, and practised his profession. He was chosen to congress for three successive terms, serving in 1791-7, was governor of the state, and a member of the United States Senate. In 1830 he was an associate editor of the "Christian Examiner," Harvard gave him the degree of D. D. in 1839. Dr. Greenwood was fond of conchology and botany, and was an early member of the Boston society of natural history, to whose journal his name is often connected with articles written by good taste, poetic imagination, and graceful style. They include "Lives of the Apostles" (Boston, 1827); "History of King's Chapel" (1838); "Sermons to Children" (1841); "Sermons of Conviction" (1842); "Sermons on Various Subjects," edited with a memoir by Hon. Samuel A. Eliot (2 vols., 1844); and "Miscellaneous Writings,"
GREENWOOD, Isaac, mathematician, b. 7 May, 1702: d. in Charlestown, Mass., 22 Oct., 1745. He was graduated at Harvard in 1721, and on 13 Feb., 1728, was chosen to fill the chair of mathematics and natural philosophy founded there by Thomas Hollis, the first man in this country to hold such a professorship. He continued in office till 13 July, 1738, and published an arithmetic (1729), and a philosophical discourse on the death of Thomas Hollis (1731).

GREENWOOD, James E., educator, b. near Springfield, Ill., 15 Nov., 1852. His early education was obtained in the common schools. He removed with his parents, when he was sixteen years old, to Adair county, Mo., where he worked on a farm, studied by himself, and began to teach, also spending a year in Canton seminary. In 1867-74 he taught mathematics and logic in the normal school at Kirksville, Mo., and in the latter year became superintendent of schools in Kansas City, Mo., where he still remains (1887). He has given much attention to improved methods of instruction, and, besides papers and articles on education, published a "Practical Education Practically Applied" (New York, 1887).

GREENWOOD, Miles, manufacturer, b. in Jersey City, N. J., 19 March, 1807: d. in Cincinnati, Ohio, 6 Nov., 1863. He removed to Ohio with his father in 1817, settled near Cincinnati, and in 1832 established, on the Miami canal, the Eagle iron-works, which soon became the largest in the west. His buildings were destroyed by fire in 1832, but were soon rebuilt. During the civil war the works were employed in behalf of the government, all other business being suspended. At the beginning of the war Mr. Greenwood made for Gen. Frémont twelve anchors for pontoon-bridges on twenty-four hours' notice. He also built machines that rifled 3,000 smooth-bore muskets a day, cast 150 bronze field guns in a brief period, and built a turrent-monter when other factories declined the contract. Southerners vainly tried to persuade him to cease aiding the government, and his works were set on fire three times, with a loss of $100,000. He organized the first paid fire department in Cincinnati in 1832, and in the same year aided in introducing into the United States the first steam fire-engine in the United States. He used to boast that in thus abolishing the old-fashioned fire-engine house and its attendant vices, he had done more for the cause of morality than many preachers. He was one of the founders of the Ohio mechanics' institute.

GREENER, James Augustus, naval officer, b. in Cincinnati, Ohio, 28 Feb., 1833. He entered the navy as midshipman, 10 Jan., 1848, became lieutenant, 16 Sept., 1853, and lieutenant-commander, 16 July, 1862. He commanded the iron-clad " Benton" and a division of Admiral Porter's squadron at the passage of the Vicksburg batteries on 16 April, 1863, and in the succeeding engagements on the Mississippi until the fall of that city. He also accompanied the Red river expedition. He was made commander, 25 July, 1866, and in 1873 commanded the "Star." He was mentioned in the case of "Tugger" in the court of inquiry. He was promoted to the grade of captain on 26 April, 1876, in 1886 served as president of the examining board, and in the same year was made commodore.

GREENE, Edward, author, b. in Sandwich, Kennebec, 1 Dec., 1833. He was educated by private tutors, was a member of the English naval expedition to Japan in 1855-6, spent six years on station and shore duty, and learned the language and studied the history of that country. He came to the United States, was naturalized, and engaged in commercial pursuits in New York. He is the author of the following plays: "Vendome," "Mirah," "The Third Estate," "The College Belles," and "Uncle Abner," and of the following works on Japanese history: "Blue Jackets" (4 vols., 1885); "Yung Americans in Japan" (Boston, 1880); "Yung Americans in Japan" (Boston, 1881); "The Wonderful City of Tokio" (1882); "The Golden Lotus" (1883); "Nursing Brothers of Yezo" (1884); and "A Captive of Love" (1885). He is a member of the Zoological and Anthropological society of London.

GREENE, Alexander, P. E., bishop, b. in Society Hill, Darlington district, S. C., 8 Oct., 1819. He was graduated at South Carolina college in 1838 with the highest honors of his class. He then studied law, was admitted to the bar, and practiced at Cheraw, S. C., in the northeastern circuit. Having resolved to enter the ministry, he was baptized and confirmed in St. David's church, Cheraw, in 1843, and became a candidate for holy orders. He was ordained deacon by Bishop Gadsden, 10 June, 1846, and ordained priest in St. Philip's church by the same bishop Dec. 1847. His first and only parish was that of St. David's, Cheraw, of which he became rector in 1846. He received the degree of D. D. from South Carolina college in 1859. Dr. Gregg was active and efficient in diocesan and church affairs during this period. In 1872 he was elected bishop of Texas. He was consecrated in the Monumental church, Richmond, Va., 13 Oct., 1859, and entered at once on his extensive field of labor. In 1867 he attended the first Lambeth conference in England. At the general convention in 1874 conference was given to a division of the diocese of Texas, and two missionary jurisdictions were set off for northern and western Texas. Bishop Gregg removed to Galveston, retaining the southern portion of the state as his diocese. Between 1862 and 1867 he made several contributions to the church literature in the way of sermons, addresses, and triennial charges. He has also published a "History of Old Cheraw," embracing an account of the Indian tribes in the valley of the Pedee, S. C., the first white settlements, the organization of St. David's parish, and the Red river fire-engine in 1835, and a "Brief Sketch of the Church in Texas," an article in "The Church Encyclopedia" for 1884.

GREENE, Andrew, senator, b. in Carlisle, Pa., 10 June, 1755: d. in Bellefonte, Pa., 20 May, 1855. His parents came from Ireland to New Hampshire, but removed to Delaware in 1782, and to Pennsylvania in 1783. The son was educated in Carlisle, and in Newark, Del., where he served in the militia during the Revolution. From 1779 to 1788 he was a tutor in the College of Philadelphia (now University of Pennsylvania). He was a merchant at Middletown, Pa., in 1788-9, and then became a farmer in the wilderness of Penn's valley. He was elected a member of congress from Pennsylvania, and served from 24 Oct., 1791, till 3 March, 1807, and was a U. S. senator from the same state, serving thence to 1793, and then became a member of the U. S. House of Representatives for the sixth district of Pennsylvania, a part of which time he was president pro tempore of the senate. In 1814 he removed to Bellefonte, was appointed secretary of state for Pennsylvania in 1816, and in 1823 was a unsuccessful candidate for governor. He was a fine classical scholar, and a man of rigorous constitution, having published in Dr. William H. Egle's "Pennsylvania
GREGG.

Genealogies." (Harrisburg, 1889.)—Andrew's grand-son, John Irvin, soldier, b. in Bellefonte, Pa., 10 July, 1786. In 1808 he was a lieutenant of the 11th regular infantry in Kentucky, 1827. He was married in 1810 to Eliza Ogle, and they had five children, including Andrew. In 1848 he returned to Pennsylvania and took up farming. He died in 1853.

GREGORY.

William, Canadian educator, b. in Killycree, County Donegal, Ireland, 5 July, 1817. He was graduated from Queen's College, Cork, and Edinburgh University, where he took the degree of M. A. in 1844. Subsequently he studied theology in the College of the Free Church at Edinburgh, and was licensed to preach in February, 1846. Immediately afterward he was sent as a missionary to Canada, and in June, 1847, was ordained minister of the John street Presbyterian church, Belleville. He retained this pastorate till July, 1857, when he became pastor of Cooke's church, Toronto, and remained there till July, 1872. In 1864 he was appointed lecturer in apologetics in Knox college, Toronto, and was one of the theological classes in the Montreal Presbyterian college during part of its first session in 1867. In 1872 he was appointed professor of apologetics in Knox college, which chair he still occupies, and also conducts the classes in church history, and is moderator of the Free Church of Canada in 1861, when the union was effected between it and the United Presbyterian church of that country. He has edited "Prayers for Family Worship" (Toronto, 1873), and is the author of "History of the Presbyterian Church." (1877.)

GREGORI, Luigi, artist, b. in Bologna, Italy, 8 July, 1819. In 1840 he went to Rome, where he studied under Tomaso Minardi. He received in 1856 the grand gold medal of the Academy of Bologna for historical painting; and lived in the Vatican for several years as a painter. In 1856 he was at Merode, engaged in restoring the old masters. He was also placed as head of a commission appointed to decide by whom certain old and valuable pictures were painted. He came to the United States in 1874, and was made director of the art department of the University of Notre Dame. He is professor of the University of Notre Dame, and has decorated the church of the university, and painted religious pictures in the cathedrals of Baltimore, Philadelphia, Dubuque, and Detroit. In the main corridor of the University of Notre Dame he has executed a series of large historical pictures, twelve in number, representing scenes in the life of Columbus. He has also painted portraits of Cardinal Gibbons, Gen. Sheridan, and Archbishop Ryan. Queen Marguerite, of Italy, sent him a watch set with diamonds, and the University of Notre Dame gave him the grand gold medal for art in 1876. While in Rome he catalogued the library of the Marquis Campani, and published a work on art. He has been successful in pure frescoes and colossal figures and in miniatures, and also has merit as a sculptor.

GREGORY, Lawrence, editor, b. in Carmel, Putnam co., N. Y., 21 Aug., 1833. He was graduated at Princeton in 1857, and studied in the theological seminary, acting also as tutor in rhetoric in 1859-60. After holding pastorate in Galena, Ill., Troy, N. Y., New Haven, Conn., and South Salem, N. Y., he became in 1871 professor of metaphysics and logic in Wooster university, Ohio, and in 1875 was transferred to the chair of mental science and English literature. In 1879 he
became president of Lake Forest university, Ill. He has contributed to the "Princeton Review."  

GREGORY, Dudley Sanford, philanthropist, b. in Reading, Conn., 5 Feb., 1800; d. in Jersey City, N. J., 8 Dec., 1874. He removed with his father to Albany, N. Y., in 1806. In 1818-27 he was assistant collector and received the place of chief clerk in the canal department. He then became identified with the legal lotteries carried on for the state for the endowment of schools and colleges, and in 1834 removed to Jersey City, then a small village, and became one of its first firemen. In 1836 he entered the city, was its first mayor, serving three terms, and held many other local offices. He was also elected to congress as a Whig, and served from 1847 till 1849. Mr. Gregory was at one time a director of sixteen different railroads. He was a bounty giver to churches of all denominations, and to public schools, city parks, and benevolent institutions. His grandson, Elliot, artist, b. in New York city, 13 Oct., 1854, entered Yale in 1871, but was not graduated. He studied art in Rome and Paris, under Carolus-Duran and Cabanel, and is the only American that has exhibited both painting and sculpture in the Paris salon. His pictures include "Soubrette" (1883); "Coquetterio" (1884); "Children," for which he received honorable mention in Paris; and portraits of Gen. George W. Custer (1880); his uncle, Admiral Baldwin (1882); Mrs. John Sherwood (1885); and Ada Rehan (1887).

GREGORY, Francis Hoyt, naval officer, b. in Norwalk, Conn., 9 Oct., 1798; d. in Brooklyn, N. Y., 4 Oct., 1866. He was in the merchant service in 1807-8, but became a midshipman in the navy in 1811, was promoted yachtsman in 1816, and at the end of 1817 was serving on the "Vesuvius," and in charge of one of her barges near the Balize, he surprised and captured an English slaver. He was made acting master in 1811, and, while in command of gumbost No. 122, captured a schooner fitting for piratical purposes, disabled and drove away a privateer of greater superior force, that had been annoying our commerce, and took a Spanish pirate of fourteen guns. He was with Com. Chauncey in all his actions on Lake Ontario, and on 28 June was made lieutenant. In August, 1814, he was taken prisoner and sent to England, remaining eighteen months. He soon afterward joined one of the frigates cruising against the Algerines, without coming home. In 1821-3, while in command of the schooner "Gramusic," he was active in suppressing piracy on the coasts of Cuba and Mexico, capturing near St. Croix the notorious pirate brig "Pandrita," a vessel far superior to his own in armament and number of men. He was promoted to commander, 28 April, 1828, and to captain, 18 Jan., 1838, and in 1844 commanded the "Harrington" in the blockade of the Mexican coast. His last sea-service was in command of the African squadron in 1849-52. In July, 1861, he was ordered to superintend the construction of all vessels of war built outside of navy-yards, and was engaged in this duty when he died. He was made rear-admiral on the retired list.

GREGORY, Frank M., artist, b. in Mansfield, Togo co., Pa., 21 Oct., 1848. He was educated for a business career, but abandoned it for the pursuit of art. He entered the schools of the National Academy of design in 1871, and subsequently studied at the Art Institute in Chicago, in 1872. He also followed water-color painting, and acquired some note in etching and designing. Among his paintings are: "The Truant"; "Waiting for Repairs"; and "First Snow of the Season."
GREINER, John, journalist, b. in Philadelphia, Pa., 14 Sept., 1810; d. in Toledo, Ohio, 18 May, 1871. He removed to Ohio when a boy, and became distinguished as a temperance orator. He was an enthusiastic Whig, and in the Harrison campaign (1840) attained celebrity by his election songs, "Old Zip Coon," "The Wagoner Boy," and other pieces. He aided in the liberate from 1845 till 1851, when he was appointed Indian agent for New Mexico, and in 1852 became governor of that territory. He was afterward successively local editor of the "Ohio State Journal," and editor and proprietor of the Columbus "Gazette" and "Zanesville "Times." He was receiver in the U. S. land-office in Santa Fé, N. M., in 1861-2, and sub-treasurer there in 1862-6.

GRELET, Stephen, missionary, b. in Limoges, France, 2 Nov., 1778; d. in Burlington, N. J., 18 Nov., 1865. He was known in France as Etienne de Grelet de Mabillier. His parents were wealthy and belonged to the nobility. His father, Gabriel Marc Antoine de Grelet, was comptroller of the mint, the friend and counsellor of Louis XVI., and the proprietor of iron-works and of extensive porce- lain factories. Thenceforward he was a Roman Catholic, and was educated at the military college of Lyons. At the age of seventeen he entered the body-guard of Louis XVI. During the Revolution his family estates were confiscated, and he and his brothers became prisoners of war and were sentenced to be shot. After the execution of the king he made his escape to Demerara. In 1796 he came to New York, where he shortly afterward joined the Society of Friends. He removed to Philadelphia, and during the prevalence of the yellow fever in 1798 ministered to the sick and afflicted. In 1799 he returned to New York, and in 1800 engaged in mercantile pursuits. He afterward made a missionary tour in the southern states as far as Georgia, and in 1801 travelled to New England and Canada. In 1804 he married Rebecca, the daughter of Isaac Collins, the publisher. He visited the south of France in 1807, travelled in England and Germany in 1813, preached in Hayti in 1816, and during the two following years travelled through Norway, Sweden, Russia, Greece, and Italy, and preached before Pope Pius VII., who listened to his exhortations with respect and courtesy. He returned to New York, and another missionary tour to Europe from 1831 till 1834, when he retired to Burlington. See "Memoirs of Stephen Grelet," edited by Benjamin Seebohm (Philadelphia, 1898).

GRENELLE, Honoré, jurist, b. in Greenfield, Mass., 25 Dec., 1786; d. there, 20 Nov., 1877. He was graduated at Dartmouth with the highest honors in 1808, studied law, and was admitted to the bar, beginning his practice in Greenfield. He was prosecuting attorney of Franklin county from 1830 till 1838, and state senator from 1824 to 1877. In 1838 he was elected to congress as a Whig, where he served until 1839. He was a trustee of Amherst from 1838 till 1859. In 1849 he was made probate judge, which office he held until 1853. Subsequently he was clerk of the Franklin county courts until 1866, a member of the board of the Troy and Greenfield railroad, and was its first president. During his term in Congress he proposed the recognition of the independence of Hayti. The degree of LL. D. was conferred upon him by Amherst in 1854.

GRENVILLE, George, English statesman, b. in England, 14 Oct., 1712; d. there, 13 Nov., 1770. He was educated at Eton and at Christ Church, Oxford, where he was distinguished as a mathematician. He was admitted to the bar in 1732, and entered parliament in 1741 as a member for Buckingham, which borough he represented until his death. He was a lord of the admiralty in 1744; lord of the treasury in 1747; treasurer of the navy and privy-councillor in 1754; leader of the house of commons in 1751; secretary of state and first lord of the admiralty from 1751 till 1753; and first lord of the treasury and chancellor of the exchequer in 1758-59. He introduced plans for taxing the colonies, and was the author of the famous "Stamp Act," which was one of the causes of the American Revolution. He published "Considerations on Commerce and Finances" (1767) and "The English State of the Nation" (1780). His son, Thomas, b. in 1755; d. in 1846, was one of the agents employed in negotiating the peace of the United States in 1782-3.

GRENVILLE, Sir Richard, English navigator, b. in Cornwall, England, in 1549; d. at sea in 1591. At the age of sixteen he served in the German imperial army as a volunteer against the Turks. On his return he was appointed to a command in Ireland, and was made a sheriff of Cork. He represented Cornwall in parliament in 1571, and afterward was made high sheriff of that country, and knighted by Queen Elizabeth. He entered actively into the colonization schemes of Sir Walter Raleigh, who was his cousin, and on 9 April, 1585, sailed from Plymouth in command of seven vessels bearing 106 colonists, which were destined to Carolina by Raleigh. The fleet touched the West Indies, where it captured two Spanish frigates, and on 20 June reached the mainland of Carolina, or Florida, as it was then called. They encountered a storm, and narrowly escaped being wrecked on the cape, where Grenville named it after Cape Fear. They anchored at Wooken on 26 June, and passing through the Ocracoke inlet made their way to Roanoke island. Grenville and his party explored the country for eight days, and in revenge for the theft of a silver cup burned an Indian village and destroyed the Indian maize around it. Grenville left the colony under the government of Robert Lane, and returned to England with his ships, capturing a Spanish galleon on his way. On his second visit to the colony he found it deserted, as the colonists had returned to England with Sir Walter Raleigh, and another party to trouble with the Indians. In order to keep possession of the country he left fifteen men there and sailed for England. He was made a member of the council that was created in 1588 to devise means of defence against the Spanish armada, and in 1591 he was raised to the rank of vice-admiral and sent in conjunction with Lord Howard to cruise against the Spaniards in the West Indies. He encountered off the Azores a Spanish fleet consisting of fifty-two ships. With only five ships he attacked the enemy, and fought for three days and a day without suffering a man killed. During the action four of the Spanish ships were sunk and a thousand men killed. Grenville was wounded early in the engagement, and was finally shot through the body and carried into the cabin. Upon this the rest of the crew surrendered. When the vessel was in the harbor of Corunna, a Spanish vessel boarded a Spanish ship, where he died three days afterward. His name is written Grenville, Green- ville, and Granville. The voyage of Sir Richard Grenville in 1585 was related by one of the persons who accompanied him, and an account after their arrival was written probably by Ralph Lane. See Hakluyt's "Voyages."
was educated in country schools, and spent one year in the state university at Bloomingon, Ind., but was not graduated. He then studied law in Corydon, Ind., was admitted to the bar in 1858, and became a successful lawyer. He was elected to the legislature in 1860, but resigned in August, 1861, to become lieutenant-colonel of the 30th Indiana regiment. He was promoted to colonel of the 53d Indiana in December, and on 11 Aug., 1863, after the fall of Vicksburg, was made brigadier-general of volunteers. He commanded the 4th division of Blair's corps in the fighting before Atlanta, and received a severe wound that disabled him for a year, and prevented him from seeing further service. On 13 March, 1865, he was brevetted major-general of volunteers for his gallantry at Atlanta. After the war he resumed practice at New Albany, Ind. He was an unsuccessful Republican candidate for congress in 1866, and in 1867-'8 was financial agent of his state in New York. President Grant, who held him in great esteem, made him U.S. judge for the district of Indiana in 1869, and in 1880 he was an unsuccessful candidate for U.S. senator. He resigned his judgeship in April, 1882, to accept the position of postmaster-general in President Arthur's cabinet, and in July, 1884, on the death of Secretary Folger, was transferred to the treasury portfolio. In October of that year he was appointed U.S. judge for the 7th judicial circuit, which office he still holds (1887). Judge Graham was a strong supporter of Gen. Grant for a third term in the late convention of 1880, but has not been conspicuous in politics.

GREVILLE, Lord Charles Montague, governor of South Carolina, b. 29 May, 1741; d. in January, 1784. He was the second son of Robert, third Duke of Manchester. He was a knight of the shire of Huntington, and at one time governor of Jamaica. From 1766 till 1773 he held the office of governor of South Carolina. During his administration, in 1769, the circuit court law was passed, and courts of justice were established at Ninety-Six, Orangeburg, and Camden. Montague street, in Charleston, is named for him.

GREY, Charles, British soldier, b. in England, 23 Oct., 1729; d. 14 Nov., 1807. In 1757 he was aide-de-camp to the Duke of Brunswick, and took part in the battle of Minden, in which he was wounded. He was appointed lieutenant-colonel in 1761, and commanded the 98th regiment at the capture of Belle Isle in 1763. In 1772 he received the commission of colonel. He accompanied Howe to Boston in 1775, and was raised by him to the local rank of major-general. On the night of 21 Sept., 1777, he surprised Gen. Wayne near the Pauli Tavern on the Lancaster road, where the latter was encamped. Grey approached stealthily, and, ordering the flints to be taken from the guns, attacked the patriots with the bayonet, de-

fusing them with great slaughter. For this act he received the name of "No Flint Grey." He took an active part in the battle of Germantown, 4 Oct., 1777, and in the following year destroyed the shipping and stores in New Bedford and Martha's Vineyard. On 7 Sept., 1778, he surprised Bayly's Virginia regiment, which lay at Tappan on the Hudson near Peekskill, and captured the regiment, and took its commander, Lord Howe, to the West Indies to sustained the island of Martinique and St. Lucie. In 1790 he was made general. He was raised to the peerage in 1801, received the title of Earl Grey in 1807, and was the father of the celebrated English statesman of that name.

GRIDLEY, Jeremiah, lawyer, b. in Boston, Mass., 10 March, 1702; d. in Brookline, Mass., 10 Sept., 1787. He was graduated at Harvard in 1725, was for several years an assistant in a grammar-school in Boston, studied theology, and occasionally preached. He was admitted to the bar. For a year he edited a weekly newspaper called "The Rehearsal," which was established in Boston in 1731. He soon acquired reputation, was elected a member of the general court from Brookline, and became an opponent of the Massachusetts interest. On the understanding this he was appointed attorney-general for the province of Massachusetts Bay. In 1761 while holding this office he defended the "writs of assistance" which the British custom-house officers had applied for to enable them to enter the dwellings of suspected individuals at their discretion. He encountered the powerful opposition of his former pupil, James Otis. In addition to his legal station he was colonel of militia, grand master of freemasons, and president of the Marine society. He contributed many articles of great merit to the "Rehearsal." His brother, Richard, soldier, b. in Boston, Mass., 3 Jan., 1711; d. in Stoughton, Mass., 20 June, 1766, had great reputation as an artist. He served as engineer in the reduction of Louisburg in 1745, became in 1755 chief engineer and colonel of the British works of Bunker Hill, and the following year took part in the expedition to Crown Point under Winslow, and constructed the fortifications on Lake George. He served under Amherst in 1758, and subsequently under Wolfe on the plains of Abraham, being at the capture of Quebec. At the conclusion of the war, as a reward for his services, he received Magdalen island from the British government, with half pay for life. He espoused the patriot cause in 1775, and was appointed chief engineer and commander of artillery of the colonial army at Cambridge. He planned the works of Bunker Hill the night before the battle of 17 June, 1775. Although sixty-five years of age, he fought during the entire engagement, and was wounded, being exposed to the severest fire of the enemy. He was active in constructing the fortifications around Boston. On 20 Sept., 1775, he was commissioned major-general by the Continental Congress, and had command of the Continental artillery until November.

GRIDLEY, Philo, jurist, b. in Paris, Oneida co., N. Y., 10 Sept., 1796; d. in Utica, N. Y., 17 Aug., 1864. He was the British at College, Clinton, with its first class in 1816. He then studied law on Owasaga and Waterville, and was admitted to the bar in 1820, beginning his practice in Waterville. A few years later he removed to
Hamilton, Madison co., where he attained eminence at the bar. He served as district attorney for Madison county, was appointed a judge of the 5th judicial circuit. He removed to Utica in 1839, and on the adoption of a new constitution in 1846 was elected one of the judges of the state supreme court, which office he resigned after six years’ service. In 1849 a Canadian named McLeod was arrested in the county and charged with the murder of York in the American steamboat “Caroline,” which carried supplies to 500 insurgents on Navy island, Niagara river. The British government demanded his release on the ground that the deed was done by order of the Canadian government, and threatened war unless its demand should be complied with. There was so much excitement on the border that McLeod was transferred to Judge Gridley’s court for trial. The prisoner was finally acquitted, as an alibi was proved.

GRIFFIN, David, soldier, b. in York county, Pa., in 1742; d. in York, Pa., 3 June, 1790. He received a classical education, studied law, and was admitted to the York county bar in 1771. He served in the French and Indian war, and when the war for independence began he was commissioned a major in the 60th battalion of the Pennsylvania line, served in the campaign against Canada, was promoted to major in October, 1776, and subsequently to lieutenant-colonel of the 7th Pennsylvania line. He was wounded at the Paoli massacre in September, 1777. At the close of the war he resigned his commission at York, was elected to the assembly in 1783, served as a delegate to the convention to ratify the Federal constitution, and was chosen by the constitutionals one of the first presidential electors.

GRIFFIN, Robert Collier, jurist, b. in Cumberland county, Pa., 5 March, 1794; d. in Philadelphia, Pa., 26 Sept., 1870. He was graduated at Dickinson in 1812, and after teaching there one year he returned to Northumberland, Pa., to assist his father in the academy, of which he became principal in 1815. He devoted his leisure to the study of law, was admitted to the bar in 1817, and practised in Bloomsburg, Pa. He then removed to Danville, where he attained eminence in his profession. He supported his mother, and educated a family of ten brothers and sisters. He was appointed judge of the district court of Alleghany county in 1828, and removed to Alleghany City, but went to Philadelphia in 1848 and resided there till his death. He was appointed justice of the U. S. supreme court by President Polk on 4 Aug., 1846, and held that office until his death, although he had sent in his resignation in 1848. He was originally a Federalist, but acted with the Democratic party until the civil war, when he supported the national cause.

GRIFFIN, William Nicholson, soldier, b. in Pennsylvania in 1812; d. at Napa Springs, Ca., 9 July, 1883. He was graduated at the U. S. military academy in 1835, and assigned to the 1st dragoons. He was on frontier duty in the Chatoe nation from 1839 till 1840, when he became assistant instructor of infantry and cavalry tactics at West Point, and held the office one year, after which he was engaged on the frontier duty in the west. He was appointed captain, 23 April, 1846, and entered on active service at the beginning of the Mexican war. He was brevetted major for gallant and meritorious conduct in the battle of Salado Cruz by Rosales, 16 March, 1848, and was on frontier duty at Fort Rice, Tex., in 1849. During the two following years he took part in the expedition against the Apache Indians, and was wounded in the skirmish at Too-koon-kurre Butte, 17 Nov., 1849. Subsequently he was in active service on the Pacific coast, as judge of the 5th and 6th judicial circumscriptions, serving in expeditions against the Indians in Washington territory. In 1861–2 he served as acting inspector-general of the Army of the Potomac, and commanded the 1st regiment of cavalry in the Virginia peninsula campaign. He was present at the battle of Malvern Hill, Gen. Magruder, drove back the enemy, and contributed largely to the success of the day. He was present at the second battle of Bull Run, and was charged by Pope in his re-
port with refraining from taking part in the action, while he "spent the day in making ill-natured strictures upon the commanding general." Gen. Griffin was arrested for trial on this charge, but was soon released. Having been promoted to the command of a division, he took part in the battles of Antietam and Fredericksburg, and in Hooker's campaign. On Aug. 6, 1864, he was brevetted major-general of volunteers, and on 18 Aug. he received the brevet of colonel in the regular army. He was present at Gettysburg, and was conspicuous in all the engagements from the Wilderness to Five Forks. As chief of the corps, directed by Gen. Grant, he received the arms and colors of the Army of northern Virginia, after the surrender at Appomattox Court-House. On 13 May, 1865, Gen. Griffin was brevetted brigadier- and major-general in the regular army, and on 10 Aug., 1865, was assigned to the command of the district of Maine, with headquarters at Portland. On 28 July, 1866, he was made colonel of the 38th infantry, and in 1867 commanded the Department of Texas, with headquarters at Galveston. On 5 Sept., 1867, while the yellow fever was raging at Galveston, he received a message from the Secretary of the Navy, asking him to take command of the 5th military district on the removal of Gen. Sheridan, and ordered to make his headquarters at New Orleans. He replied that "to leave Galveston at such a time was like deserting one's post in time of battle." He remained and fell ill in the fever.

GRIFFIN, Cyrus, jurist, b. in Virginia in 1749; d. in Yorktown, Va., 14 Dec., 1810. He was educated in England, and while there married a lady belonging to a noble family. He gave early adherence to the American cause, was a member of the Virginia legislature, a delegate to the old congress in 1778-81 and in 1787-8, and was president in the latter year. He was president of the supreme court of admiralty from its creation until its abolition, was commissioner to the Creek nation in 1789, and was a justice of the Supreme Court for the district of Virginia from December, 1789, until his death.

GRIFFIN, Ebenezer, lawyer, b. in Cherry Valley, N. Y., 29 July, 1789; d. in Rochester, N. Y. When he was quite young his father removed to Clinton, Oneida co., where the boy received his preparatory education. He entered Union college, but, before completing his course, began the study of law, and was admitted to the bar at Utica in 1811. He engaged in practice in Clinton, where he remained for eight years, and afterward removed to Utica, but in 1825 went to New York city. Among the many important cases in which he was employed as counsel was that of Mather, who was charged with being a conspirator in the abduction of Morgan. Mr. Griffin was retained to conduct the defense, which he did so ably that Mather was acquitted, notwithstanding the state of public feeling. Mr. Griffin continued to practice in New York until 1842, and then removed to Rochester, where he remained until his death.

GRIFFIN, Edward Dorr, clergyman, b. in East Haddam, Conn., 6 Jan., 1770; d. in Newark, N. J., 10 July, 1856. He continued to study theology under Jonathan Edwards, of New Haven, who was subsequently president of Union college. He was licensed as a preacher in October, 1792, and in January, 1783, began his ministerial work at New Salem, Conn. In June, 1793, Mr. Griffin was ordained pastor of the Congregational church at New Hartford, and afterward held pastorates at Newark, N. J., and Boston, Mass. Union college gave him the degree of D. D. in 1808, and he became professor of rhetoric in the recently established Andover theological seminary, 31 June, 1809, which chair he filled until 1811. In 1821 he was chosen president of Williams, and remained there till 1836. He was an eloquent and popular preacher, and published "Lectures delivered in Park Street Church, Boston." Boston, 1819, and "Sixty Sermons on Practical Subjects." (New York, 1844). In his works, with a memoir of the author by Rev. William B. Sprague, D. D., was published after his death (2 vols., 1839). See also "Recollections of Rev. E. D. Griffin," by Parsons Cooke (1836).—His brother, George Dorr, b. at East Haddam, Conn., 14 Jan., 1778; d. in New York city, 6 May, 1850, was graduated at Yale in 1787, studied in the Litchfield law-school, and was admitted to the bar in 1799. He practised in Wilkesbarre, Pa., for six years, and subsequently in New York city. He is the author of "Sufferings of Our Saviour," "Evidences of Christianity," and "The Gospel its Own Advocate." (New York, 1850).—George's son, Edmund Dorr, b. in Vermont, Pa., 10 Sept., 1804; d. in New York, 1 Sept., 1830, was graduated at Columbia in 1828. He studied law in his father's office, was admitted to the bar, and in 1825 published "Pertinences," and was ordained a deacon in the Protestant Episcopal church in August, 1826. Soon afterward he became assistant minister of St. James's church, Hamilton Square, near New York city, and a little later acted in the same capacity in Christ church, New York city, but was soon forced, by failing health, to abandon his charge. He sailed for Europe in October, 1828, and returned to New York in April, 1830. In the following May and June he delivered a course of lectures upon Roman, Italian, and English literature in Columbia. His brother Francis published his "Remains," with a memoir by Rev. John MacVicar (1831).

GRIFFIN, Gildoyer Wells, author, b. in Louisville, Ky., 6 March, 1840. He was educated at the University of Louisville, and was admitted to the bar in 1861. After practicing for a few years he engaged in journalism. He was appointed U. S. consul at Copenhagen in 1871, at the Samoan islands in 1876, at Auckland, New Zealand, in 1879, and at Sydney, Australia, in 1884. He has published a biographical sketch of George D. Prentice (1869); edited the subsequent edition of "Pertinences" (Philadelphia, 1871); wrote for it a "Life of Prentice," which he afterward re-wrote and enlarged; "Studies in Literature" (1871); "Life of Charles S. Todd" (1873); "Danish Days" (1874); "A Visit to Stratford" (1875); and "New Zealand, her Commerce and Resources" (Wellingtom, N. Z., 1884).

GRIFFIN, Nathaniel Herrick, educator, b. in Southhampton, L. I., 28 Dec., 1814; d. in Williamstown, Mass., 16 Oct., 1878. He was graduated at Williams in 1834, and afterward studied in Princeton theological seminary for two years. He was tutor for one year in Yale, and in June, 1839, was installed pastor of the church at Delhi, N. Y., where he remained till 1841. After teaching in Brooklyn, N. Y., for two years, he became, in 1846, professor of the Greek and Latin languages for Williams, and in 1854, first vacant professor of the Greek language and literature. He resigned in 1857, opened a private school in Williamstown, and from 1868 till his death was librarian of the college. He published the triennial catalogues of Williams for eleven years, prepared the first annual necrological sketch of the college, and published numerous articles in reviews and magazines.

GRIFFIN, Simon Goodell, soldier, b. in Nelson, Cheshire co., N. H., 9 Aug., 1824. He was a teacher for several years, and represented his native
town in the legislature. He subsequently studied law, was admitted to the bar in 1860, and began practice in the Essex district of New Jersey. During the Civil War he was commissioned captain in the 2d regiment of New Hampshire volunteers, and was present at the first battle of Bull Run. In October, 1861, he was promoted lieutenant-colonel, and transferred to the 6th New Hampshire regiment, and in 1862 was made a brigadier of the whole of the division under his command. On 7 April, 1862, he commanded an expedition of 600 men, assisted by five gun-boats, to Elizabethtown, N. C., which resulted in the capture of prisoners and many stands of arms, and in the breaking up of a Confederate rendezvous at that place. He commanded the entire regiment at the battle of Camden, N. C., 19 April, and for its gallantry on this occasion was permitted to inscribe “Camden, 19 April, 1862,” upon its colors. On 22 April he was commissioned colonel of the 6th regiment. He was in the second battle of Bull Run, at Chantilly, and at Antietam with his regiment and the 2d Maryland, he charged the stone bridge and carried it in the face of a heavy fire. He was present at Fredericksburg, his regiment losing one third its number, and on 20 May, 1863, he was assigned to the command of the 1st brigade, 2d division, 9th army corps. The army was in June, went to assist Gen. Grant in his operations against Vicksburg, and participated in its capture. He was with his command in the Mississippi campaign of Gen. Sherman, and in the spring of 1864 was assigned to the 3d brigade, 2d division, and commanded it in the battles of Wilderness and Spottsylvania Court-House, and was commissioned a brigadier-general on Gen. Grant’s recommendation. On the night of 16 June Gen. Griffin, in command of his own and Gen. Curtin’s brigade, attacked the enemy entrenched lines on the front of Petersburg, carrying their works and capturing 1,000 prisoners, with arms, artillery, and ammunition. On 2 April, 1865, he was appointed to the post of Fort Hele, and for gallant conduct was brevetted a major-general, and afterward participated in the pursuit and capture of Gen. Lee’s army. He was mustered out in September, 1865, and declined a commission in the regular army. Subsequently Gen. Griffin settled in Keene, N. H., and served in the state legislature in 1866-8, in which最后 time he was being speaker of the house.

GRIFFIS, William Griffiths, M. D., physician, b. in Philadelphia, 13 Feb., 1798; d. 26 June, 1850. He was graduated in medicine at the University of Pennsylvania in 1820, and was physician to the Philadelphia board of health in 1834-5. He became professor of materia medica in the University of Maryland, and editor, in Philadelphia, of the “American Medical Monthly” in 1838 accepted the chair of medicine in the University of Virginia. Dr. Griffith became noted as a botanist and conchologist, and gave a large collection of shells to the Philadelphia academy of natural sciences, of which he was vice-president in 1849-50. He was a member of many other learned societies, wrote many articles on botany, conchology, and medicine, and published “Medical Botany” (Philadelphia, 1847), and “Universal Formulary” (1848), and edited, with annotations; Taylor on “Medical Jurisprudence” and on “Poisons”; Müller’s ‘Principles of Physic’ (1847); Ryan’s and Chitty’s works on “Medical Jurisprudence”; and Ballard and Garrod’s “Materia Medica.” At the time of his death he had been an college professor, and had planned one on “The Botany of the Bible,” which he was urged to write by Prof. Asa Gray and other noted botanists.

GRIFFITHS, John W., naval architect, b. in New York city, 6 Oct., 1808; d. in Brooklyn, N. Y., 29 Aug., 1883. His father, Mr. Griffiths, was a shipwright in New York. After working at various occupations, the boy was apprenticed to
his father's trade, and when nineteen years of age laid the lines of the frigate "Macedonia." In 1836 he published in the Portsmouth, Va., "Advocate" a series of articles giving his ideas on naval architecture, and in 1842 gave in New York and other places an interesting subject on the subject of the ships delivered in the United States, also opening a free school for instruction in ship-building. He favored many improvements, suggested the clipper model of the fast ships built for the China trade, and, on the discovery of gold in California, as early as 1849 he proposed the establishment of a house of shipowners and ship-builders. He made the calculations for the Collins steamers, and in 1850 sent to the World's exhibition in London a steamship model that attracted much attention. In 1853 he began to build for William Norris, of Philadelphia, a steamer intended to cross the Atlantic in seven days, and though, from the failure of Norris, it was not completed according to his designs, it made the fastest time on record between Havana and New Orleans.

In 1856 Mr. Griffiths became part proprietor and co-editor of the "Nautical Magazine and Naval Records," was elected a member of the United States Navy Yard in 1853, and the same year was elected as the American Architect and Naval Engineer. In 1862 he designed the smallest and lightest-draught vessel of her displacement that was ever built, and, although drawing only ten feet of water, carried a frigate's battery. In 1864 he invented a timber-bending machine, which he first used in building the ship "New Era," the first war-ship built in Boston in 1867. Every first timber that required curvature was bent from the straight log, and the futtocks were extended in one stick from the keel to the rail. The use of iron in ship-building supplanted this method. In 1871-2 he erected improved timber-bending machinery for the government, and in 1872 built the U. S. ship "Enterprise" at Portsmouth, N. H. His machines received two prize medals at the Centennial exhibition in 1876. He was the originator of the idea of life-boat steamers, and also showed a model and plans for such steamers at the Centennial. In 1870 Mr. Griffiths was elected in New York city a weekly journal entitled the "American Ship." Although many of Mr. Griffiths's innovations in ship-building were opposed by more conservative architects, experience has usually proved the wisdom of his views, and no architect in the United States has been as generally followed by young ship-builders. Other inventions by him are iron keelsons for wooden ships (1848); bilge keels, to prevent rolling (1863); triple screws for great speed (1866); and improved rivets (1860). His most important work is his "Treatise on Marine and Naval Architecture" (New York, 1850; 4th ed., 2 vols., 1854), which was republished in England, and had a wide sale through Europe. Its publication did more to advance American ship-building than any other single influence, and it brought its author orders for models and drawings from nearly every maritime nation. He also published "The Shipbuilder's Manual" (2 vols., 1853); and "The Progressive Ship-Builder" (2 vols., 1857-60).

GRIGGTS, Samuel Powell, physician, b. in Philadelphia, Pa., 21 July, 1799; d. there, 12 May, 1826. He was graduated at the University of Pennsylvania in 1799, and after studying medicine abroad for three years began practice in Philadelphia in 1784. He founded the Philadelphia dispensary in 1786, was its physician for seven years, and in 1792-9 held the chair of materia medica in the University of Pennsylvania. In the pestilence of 1793, and the epidemics of 1797-9, 1802, and 1803, he remained at his post regardless of personal danger, and was of great service. In 1803-4 he was active in the subject of emigration from Santo Domingo, and collected $12,000 to aid them. From 1817 till his death Dr. Griffiths was vice-president of the College of physicians, and was also active in establishing, under the auspices of the Philadelphia yearly meeting of Friends, an institution for the education of destitute persons. He was one of the editors of the "Eclectic Repertory," and on 1 June, 1820, read before a convention for the formation of a pharmacopoeia, held in Washington, an "Essay of a Pharmacopoeia," of which he was the principal author.

GRIGGS, John, publisher, b. in Cornwall, England, in 1792; d. in Philadelphia, 2 Aug., 1864. He was left an orphan at six, and at twelve went to sea. After making several voyages he spent a year with relatives in Richmond, Va. He removed to Warren, Ohio, about 1818, and was clerk of the court there. He died in 1864. A son of Mr. Griffiths, and a graduate of the University of Virginia, in 1848, entered the woollen-factory in Scott county, Ky. He entered a publishing-house in Philadelphia in 1818, and in 1833 began business on his own account, and was very successful. After taking various partners he retired in 1860, with a large fortune, and after a year's absence entered upon a publishing-house in the city. He gave his son, John Warner, b. about 1819; d. in Philadelphia in August, 1869, left $117,000 to various charities in that city.

GRIGGS, Samuel Chapman, publisher, b. in Tolland, Conn., 20 July, 1819. He began business as a bookseller in Hamilton, N. Y., but in 1845 went to Chicago, where he continued in the same calling, and in a few years was at the head of the largest bookselling business in the northwest. In the great fire of 1868, Mr. Griggs lost his whole house, his books, and his dwelling-house on Michigan avenue, being destroyed. In 1873 he sold his interest in the business to his partners, and, with John C. Buckee, junior partner, established another publishing-house. In April, 1873, Mr. Buckee retired from the firm of S. C. Griggs & Co. The publications of the house comprise more than 70 works, literary, scientific, and academical, some of which have met with a very extended sale, and a large proportion of which reflect credit on the publishers.

GRIEB, Hugh Blair, historical scholar, b. in Norfolk, Va., 22 Nov., 1808; d. in Charlotte county, Va., 28 April, 1881. He represented Norfolk in the legislature when scarcely more than a boy, and in 1828-30 was a member of the State convention with Thomas Jefferson, James Madison, and other noted men. He subsequently devoted himself to literature and agriculture, and was an authority on the history of Virginia. He was president of the Virginia historical society, and became in 1871 chancellor of William and Mary college, which had given him the degree of LL. D. in 1855. He contributed to the "Virginia Historian," and wrote numerous historical discourses, including one on the Virginia convention of 1829-30 delivered before the historical society in 1853, another on that of 1776 delivered at William and Mary college, and "Discourse on Hon. Littleton W. Tazewell." (Norfolk, 1860).

GRIJALVA, Juan de (gre-hahl'-bah), Spanish adventurer, b. in Cuellar, Spain, in the latter part of the 15th century; d. in Nicaragua, 21 Jan., 1527. His uncle, Vasques, the governor of Cuba, gave
GRILLET, John, French missionary, b. in France about 1830; d. in Guiana about 1875. He was a member of the Jesuit society, and was sup- ported by the inhabitants. He went to the coast, and was slain during an uprising of the Indians in the valley of Bidau.

GRILLET, John, French missionary, b. in France about 1830; d. in Guiana about 1875. He was a member of the Jesuit society, and was sup- ported by the inhabitants. He went to the coast, and was slain during an uprising of the Indians in the valley of Bidau.

GRILLET, John, French missionary, b. in France about 1830; d. in Guiana about 1875. He was a member of the Jesuit society, and was sup- ported by the inhabitants. He went to the coast, and was slain during an uprising of the Indians in the valley of Bidau.

GRILLET, John, French missionary, b. in France about 1830; d. in Guiana about 1875. He was a member of the Jesuit society, and was sup- ported by the inhabitants. He went to the coast, and was slain during an uprising of the Indians in the valley of Bidau.

GRILLET, John, French missionary, b. in France about 1830; d. in Guiana about 1875. He was a member of the Jesuit society, and was sup- ported by the inhabitants. He went to the coast, and was slain during an uprising of the Indians in the valley of Bidau.

and in 1799 became senior associate, and thus virtu-
ally chief justice. He was also frequently a
member of the legislature, speaker of the house
in 1785-6, and a member of the convention of
1788 that adopted the Federal constitution. Judge
Grimké, during the latter part of his life, became
involved in much litigation, which made him un-
popular. Owing to this, and to some hasty action
on his part, he was impeached before the legis-
lat,ure in 1811, but the charges were not sustained.
Princeton gave him the degree of LL. D. in 1789.
He published "Revised Edition of the Laws of
South Carolina to 1789," "Law of Executors for
South Carolina," "Probate Directory," "Public Law
of South Carolina" (Philadelphia, 1790), and "Duty
of Justices of the Peace" (2d ed., 1796).—His son,
Thomas Smith, reformer, b. in Charleston, S. C.,
26 Sept., 1786; d. near Columbus, Ohio, 11 Oct.,
1834, was graduated in 1807 at Yale, and dur-
ing one of his vacations travelled with President
Timothy Dwight.
Abandoning his intention of
studying for the ministry, he became a lawyer in
defence to his father's wishes, and attained dis-
tinction at the bar and in politics. On 17 March,
1827, he advocated, in an address before the Bar
association of South Carolina, the codification of
the laws of that state. He was a member of the
state senate in 1826-30, and in 1828 made a speech
in support of the general government on the tariff
question. One of his finest efforts was his argu-
ment on the South Carolina test-oath question in
March, 1834. He was a pioneer in the temperance
cause, standing at first almost alone in that work,
and one of the most distinguished members of the
American peace society. He aided these and other
reforms both pecuniarily and by his writings, and
his public addresses in their favor won him much
respect and sympathy. He advocated absolute
non-resistance, holding that even defensive warfare
is wicked, and his ideas met with much ridicule.
When asked what he would do if he were mayor
of Charleston, and a piratical vessel should at-
tack the city, he is said to have replied that he
would marshal the Sunday-school children in pro-
cession, and lead them to meet the invader. Though
a fine classical scholar, he opposed both classics
and mathematics as elements of an education, and
urged the adoption of more extensive religious
teaching. He was also one of the earliest advoca-
tes of reform in spelling, which he practically
carried out in his later writings, making not only
the changes advocated by Noah Webster, but others
since advised by the Spelling-reform assoca-
tion, though not generally adopted, such as the
omission of final silent e. In October, 1834, he
delivered an address on "American Education"
before the Western literary institute at Cincinnati,
Ohio, and died suddenly of choleera a few days
afterward while on his way home. He was much
respected and beloved, even by those who did not
agree with his peculiar ideas. He published "Ad-
dresses on Science, Education, and Literature"
(New Haven, 1831).—Another son, Frederick, b.
in Charleston, S. C., 1 Sept., 1791; d. in Chilli-
cothe, Ohio, 8 March, 1863, was graduated at Yale
in 1810, and removed to Columbus, Ohio, in 1814.
He was for some time presiding judge of the Ohio
court of common pleas, and in 1846-47 was a
judge of the state supreme court, resigning, in the
latter year, to devote his time to philosophical
studies. He published an essay on "Ancient and
Modern Literature" and a work on the "Nature
and Tendencies of Free Institutions" (Cincinnati,
1849). His works, with his latest revisions, were
published collectively after his death (1871).—A
daughter, Sarah Moore, reformer, b. in Charle-
ston, S. C., 5 Nov., 1792; d. in Hyde Park, N. Y.,
23 Dec., 1833. After the death of her father, she
and her sister Angelina, afterward Mrs. Theodore
D. Weld (q. e.), having long been convinced of the
evils of slavery, emancipated their negroes and
left their home. In her own account of the event,
Miss Grimké says: "As I left my native state
on account of slavery, deserted the home of my
fathers to escape the sound of the driver's lash
and the shrieks of the tortured victims, I would
gladly bury in oblivion the recollections of those
scenes with which I have been familiar. But it
may not, cannot be; they come over my memory
like gory spectres, and implore me to use my re-
less power in the name of humanity, for the sake
of the slave-holder as well as the slave, to bear witness
to the horrors of the southern prison-house." Miss
Grimké went to Philadelphia in 1821, and became
one of the most active members of the Anti-slavery
society, also advocating women's rights. She lec-
tured in New England, and afterward made her
home with the Weld family, teaching in their
school, which was established in Belleville, N. J.,
in 1840. She published in 1837 an "Epistle to the
Clergy of the Southern States" an effective
anti-slavery document—and afterward wrote "Let-
ters on the Condition of Woman and the Equality
of the Sexes" (Boston, 1838). She also translated
Lamartine's "Joan of Arc" (1867).

GRIMSHAW, William, author, b. in Green-
castle, Ireland, in 1783; d. in Philadelphia, Pa., in
1852. He emigrated to the United States in 1815,
and lived many years in Philadelphia. Among his
works were an "Etymological Dictionary" (Phil-
delphia, 1821); "Gentlemen's Lexicon," and "La-
dies' Lexicon" (1829); "Merchant's Law Book,
"Form Book," "American Chesterfield," "Life of
Napoleon," and school histories of England, France,
Greece, the United States, Rome, South America,
and Mexico, with questions and keys. He also
published revised editions of Goldsmith's histories
of Rome and Greece, of Ramsay's "Life of Wash-
ington," and of Baime's "History of the Wars
Growing out of the French Revolution."
